1. INTRODUCTION

1.1 Purpose

This document details the valid structure and content of the following Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Form D Extensible Markup Language (XML) submission types.

Submission Type	Description
D	Notice of an offering of securities that is made without registration under the Securities Act in reliance on an exemption provided by Regulation D and Section 4(6) under the Act
D/A	Amendment of a previously filed Form D

This specification provides a basis for creating XML submissions without the use of the EDGAR OnlineForms/XML Website.

The Form D submission file must conform to the EDGAR Form D Submission Taxonomy. The primary enclosed document for the submission must adhere to the EDGAR Form D Document XML Taxonomy. These taxonomies are a collection of XML Schema Definition (.xsd) files that define the structures of EDGAR Form D submissions.

1.2 Summary of Changes

The following changes have been implemented:

- The State and Country Codes list has been modified to add and delete values listed below. Filers whose Jurisdiction of Incorporation is one of the newly added countries would need to update their State of Incorporation value from the “Retrieve/Edit Data” utility in order to successfully file a Form D submission. The “Retrieve/Edit Data” utility is available on both the OnlineForms and EDGARFiling websites

- Additions:

Code	State or Country name
Y6	Aland Islands
Y7	Guernsey
Y8	Isle of Man
Y9	Jersey
Z0	Saint Barthelemy
Z1	Saint Martin
Z2	Serbia
Z3	Timor-Leste
Z4	Canada (Federal Level)
Z5	Montenegro

- Deletions:

Code	State or Country name
2F	East Timor
Y2	Yugoslavia

2. EDGAR SCHEMA FILES

These are the Schema files that the EDGAR system uses to validate Form D submissions. They are considered part of this specification and are distributed with this document.

XML Schema File	Scope of File
formDSubmission.xsd.xml	Defines elements that are common to all Form D documents.
formDStateCodes.xsd.xml	Defines the valid EDGAR State and Country codes specific to Form D
statesOfSolicitationCodes.xsd.xml	Defines the valid States of Solicitation for the Sales Compensation Item of Form D

These files define the valid data elements for a Form D submission, the hierarchy and sequencing of these elements, data types, valid values, maximum lengths, number of occurrences, etc.

It is recommended that you download these files and use them for your own validation prior to transmitting a submission. This will greatly reduce the likelihood of receiving an EDGAR Suspense error. These Schema files contain several annotations that describe the nature of the content of some of the elements.

EDGAR does perform several validation checks that are not related to the Schema files, so it is possible for a submission to meet all the Schema constraints and still be **SUSPENDED**. For instance, EDGAR verifies that each Primary Issuer Central Index Key (CIK) / CIK Confirmation Code (CCC) pair is valid.

2.1 Key Schema Indicators

We assume the filer is familiar with the basics of the XML language, Namespaces, and the XML Schema Definition language. If not, you can find numerous references on the World Wide Web. One recommended website that provides several useful tutorials and examples is <http://www.w3schools.com/>.

We would, however, like to highlight the Schema language features used most heavily in the EDGAR Form D Submission Schema files. These are:

Indicator	Purpose
<sequence>	Specifies that child elements must appear in a specific order. This indicator is used with each element hierarchy. Elements must always appear in the order shown in Section 3.4.
<choice>	Specifies that either one child element or another can occur
<minOccurs>	Specifies the minimum number of times that an element can occur
<maxOccurs>	Specifies the maximum number of times that an element can occur

The default value for both the <minOccurs> and <maxOccurs> occurrence indicator is 1. An optional field will have a <minOccurs> value of zero.

This excerpt from the formDSubmission.xsd Schema file includes all four of these indicators.

```
<xs:complexType name="BUSINESS_COMBINATION_TRANSACTION_TYPE">
  <xs:sequence>
    <xs:element name="isBusinessCombinationTransaction" type="TRUE_FALSE_TYPE"/>
  </xs:sequence>
</xs:complexType>
```

```

        <xs:element name="clarificationOfResponse" type="STRING_255_TYPE" minOccurs="0"/>
    </xs:sequence>
</xs:complexType>
<xs:complexType name="STATES_OF_SOLICITATION_LIST">
    <xs:choice>
        <xs:element name="state" type="STATE_COUNTRY_CODE" minOccurs="0"
maxOccurs="unbounded"/>
        <xs:element name="value" fixed="All States" minOccurs="0"/>
    </xs:choice>
</xs:complexType>

```

This is a section of XML that conforms to the Schema definition given above.

```

<businessCombinationTransaction>
    <isBusinessCombinationTransaction>true</isBusinessCombinationTransaction>
</businessCombinationTransaction>
<statesOfSolicitationList>
    <state>All States</state>
</statesOfSolicitationList>

```

3. XML SCHEMAS

This section summarizes the restrictions and constraints imposed on the content of the Form D submission types. These rules are enforced by the Schema files and by EDGAR submission processing applications.

The Schema files cannot enforce all the rules concerning data content, so it is possible for a submission to satisfy all the Schema constraints and still be SUSPENDED by EDGAR.

3.1 Schema Table Column Definitions

The following defines the columns in the two Schema Summation tables provided in Section 3.4.

Column Name	Description
Level	Depth of element in the XML node hierarchy
Order	Order in which elements must appear
Data Type	See the Data Type Constraints table for a detailed description
Element Name	Name of the XML element. This is case-sensitive
Max Length	Maximum length for String fields. EDGAR database stores up to this number of characters
Choice List	This name refers to a list of valid values for this field. The Choice List Values section provides the valid lists
Max Occur	Maximum times a set of elements may be repeated
D	Indicates applicability of this field to this submission type
D/A	Indicates applicability of this field to this submission type

3.2 Data Type Constraints

Each entry in the “Data Type” column of these tables will be one of these values.

Data Type	Constraints										
Boolean	<p>Indicate a “true” value with either a “1” or the word “true.”</p> <p>Indicate a “false” value with either a “0” or the word “false.”</p> <p>A Boolean element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error.</p>										
Date	<p>Must be of the format YYYY-MM-DD. A date element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error. Do not include a date element at all if your goal is to not provide an optional date.</p>										
Decimal	<p>Only valid characters are 0-9 and a period. Cannot contain commas, a minus sign, or a dollar sign, or parentheses. EDGAR stores up to four decimal places.</p> <p>A decimal element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error. Do not include a decimal element at all if your goal is to not provide an optional number.</p> <p>Minimum allowable value = 0</p> <p>Maximum allowable value = 999999999999999</p>										
string	<p>Should not be longer than the length shown in the tables in Section 3.4.</p> <p><signatureName>, and <contactEmailAddress> elements exactly as provided. All other values are stored in the database as uppercase.</p> <p>You must use special escape sequences to represent these four characters:</p> <table data-bbox="570 1184 1027 1417"> <tr> <th>Character</th><th>Escape Sequence</th></tr> <tr> <td><</td><td>&lt; or &#60;</td></tr> <tr> <td>></td><td>&gt; or &#62;</td></tr> <tr> <td>&</td><td>&amp; or &#38;</td></tr> <tr> <td>“</td><td>&quot; or &#34;</td></tr> </table>	Character	Escape Sequence	<	< or <	>	> or >	&	& or &	“	" or "
Character	Escape Sequence										
<	< or <										
>	> or >										
&	& or &										
“	" or "										
NV	<p>These fields cannot have a value. They only contain other XML elements; however, they do need to be present for proper validation</p>										

3.3 Applicability of Schema Elements

Each entry in the Form D and D/A submission/document types columns in the tables in Section 3.4 will have one of these values.

Value	Description
m	Mandatory
m(1)	The list of previous names must be provided or a value of “None” given. However, if a value of “None” is provided and at least one previous name on file in EDGAR is pulled from the database, the filer supplied value of “None” will be removed.
m(2)	The totalRemaining value must equal the totalOfferingAmount – the totalAmountSold.
m(3)	One of the provided choices is mandatory.
m(4)	One or more of the provided choices must be supplied.
m(5)	The tag is mandatory but it may not have any value contained in it.
m(6)	If this child element has data, then all of the children elements must have data.
cm	Conditional Mandatory. The element is mandatory if its parent element is included. The element cannot be included if its parent is not included. This basic rule applies to next four rows that detail additional “Conditional Mandatory” rules.
cm(1)	The <value> is mandatory if <withinFiveYears> under <yearOfInc> is true.
cm(2)	If <isPooledInvestmentFundType> under <typesOfSecuritiesOffered> is true, then <industryGroup.InvestmentFundInfo> becomes mandatory.
cm(3)	If <investmentFundType> is “Hedge Fund” or “Other Investment Fund”, then <aggregateNetAssetValueRange> becomes mandatory else <revenueRange> is mandatory.
cm(4)	This element is mandatory if the <entityType> element has a value of “Other”.
o	Optional
o!	Optional but if you choose the top most choice .One from below choice list is mandatory
o(1)	The tag is optional in the Schema, but it is mandatory for input processing. It is marked as optional so that the value can be removed from the version of the document that is disseminated. In this way, the disseminated document will still conform to this specification.
o(2)	The tag is optional in the Schema and should not be included in the submission. The EDGAR system will replace any value provided with the value on file as the State of Incorporation for the entity. The resulting XML that is disseminated to the public will always have this tag and appropriate value.

Value	Description
o(3)	No value should be provided. The value for the element will be pulled from data on file in the EDGAR database.
NA	Does not apply to submission type. EDGAR uses this field for server-side processing. Do not provide a value for this element.
Blank	Does not apply to submission type

3.4 Mapping of Form D Submission Schemas to Submission Types

Level	Order	Data	Element Name	Max	Choice List	Max	Submission Type	
		Type		Length		Occur	D	D/A
1	1	NV	edgarSubmission			1	m	m
2	1	string	schemaVersion	5		1	o	o

4. CHOICE LIST VALUES

4.1 EntityTypeList

These are the valid values for a <EntityType> element in the primary document.

Value
Corporation
Limited Partnership
Limited Liability Company
General Partnership
Business Trust
Other

4.2 RelationshipTypeList

These are the valid values for a <RelationshipType> element in the primary document.

Value
Executive Officer
Director
Promoter

4.3 AgricultureIndustryList

These are the valid values for a <AgricultureIndustryList> element in the primary document.

Value
Agriculture

4.4 StateCodeList

EDGAR recognizes 309 two-character designators for the <stateOrCountry> element in the primary document. These are provided in Appendix A. These codes are actually a combination of values for the 50 US states, the Canadian Provinces, and other countries and territories. It should be noted that this element will now be validated to ensure that it does not consist only of whitespace.

4.5 SubTypeList

These are the valid values for the <submissionType> element in the submission document and the <documentType> element in the primary document.

Value
D
D/A

4.6 TestLiveList

These are the valid values for the <testOrLive> element in the submission file.

Value
LIVE
TEST

4.7 BankingFinancialIndustryList

These are the valid values for a <BankFinancialIndustryList> element in the primary document.

Value
Commercial Banking
Insurance
Investing
Investment Banking
Pooled Investment Fund
Other Banking & Financial Services

4.8 InvestmentFundList

These are the valid values for a <InvestmentFundList> element in the primary document.

Value
Hedge Fund
Private Equity Fund
Venture Capital Fund
Other Investment Fund

4.9 BusinessServicesList

These are the valid values for a <BusinessServiceList> element in the primary document.

Value
Business Services

4.10 EnergyIndustryList

These are the valid values for a <EnergyIndustryList> element in the primary document.

Value
Coal Mining
Electric Utilities
Energy Conservation
Environmental Services
Oil & Gas
Other Energy

4.11 HealthCareIndustryList

These are the valid values for a <HealthCareIndustryList> element in the primary document.

Value
Biotechnology
Health Insurance
Hospitals & Physicians
Pharmaceuticals
Other Health Care

4.12 ManufacturingIndustryList

These are the valid values for a <ManufacturingIndustryList> element in the primary document.

Value
Manufacturing

4.13 RealEstateIndustryList

These are the valid values for a <RealEstateIndustryList> element in the primary document.

Value
Commercial
Construction
REITS & Finance
Residential
Other Real Estate

4.14 RetailingIndustryList

These are the valid values for a <RetailIndustryList> element in the primary document.

Section 3(c)(13)	3C.13
Section 3(c)(14)	3C.14

4.23 TrueFalseList

Value
TRUE
FALSE

4.24 StateSolicitationList

EDGAR recognizes 52 two-character designators for the <statesOfSolicitationList> element in the primary document. These are provided in Appendix B. These codes are actually a combination of values for the 50 US states, the District of Columbia, and Puerto Rico.

5. BASIC SUBMISSION CONSTRUCTION

5.1 General Submission and Formatting of XML Files

These rules apply to the submission files of an XML-format Form D and D/A submission:

1. The filename must end with an “.xml” extension.
2. The file cannot be compressed or encoded in any fashion.
3. We strongly recommend you format the submission file as shown in the provided sample files. This makes the raw XML files easier to view in a text editor. The submission of ASCII XML files with no line breaks, while legal XML, is strongly discouraged. XML filings are required to be posted on public websites. While usually formatted via style sheets, the raw XML is frequently available for inspection and should be readable by a person. The SEC will not be reformatting XML files for readability. A single line XML file is not viewer-friendly and should be avoided.
4. The `<?xml version="1.0"?>` declaration line is optional; however if it is included it must be the first line in the file. Any text before this line, even white space, will cause a SUSPENSE error. The version value must be “1.0.” Any other value for version will cause a SUSPENSE error.
5. For an XML element with a data value, keep the begin tag, data value, and end tag on the same line of text. Otherwise, you could get a Schema violation error. As an example, for a Issuer CIK value which cannot be longer than 10 characters, this specification is correct:

```
<cik>1212121212</cik>
```

6. This specification will result in a parsing error because the extraneous white space and line feeds will be counted as part of the length of the data value. In other words, the CIK value will be regarded as longer than 10 characters.

```
<cik>
1212121212
</cik>
```

7. The submission file must contain a single “primary” XML document.
8. The submission file must conform to the FormDSubmission.xsd.xml XML Schema file. Any violation of this Schema will result in the suspension of the filing.

A filer can choose to receive a return copy by supplying the `<returnCopy>` element in the xml file while assembling the filing manually. However, this option is not provided using EDGAR OnlineForms/XML Website.

All US Dollar amounts must be supplied as whole number values.

5.2 XML Document Rules

The primary document must conform to the formDSubmission.xsd.xml XML Schema file. Any violation of this Schema will result in the suspension of the filing. The table in Section 3.4 provides a detailed summary of the XML elements that apply to each submission type. The following sections reinforce and supplement the contents of this table.

The <schemaVersion> element should not be included. If you do provide a value for this element, EDGAR will generate a WARNING and discard the value. Additionally, if the value you provide does not match the current version of the Schema file being used by EDGAR, then EDGAR will generate a second WARNING. EDGAR will insert the correct value for this element into the “document of record” that gets disseminated.

5.3 Specifying Issuer

You must provide a CIK and CCC. The CIK does not have to be conformed with leading zeroes. EDGAR will use the Issuer Name that is associated with the provided CIK for the “Name of Issuer” field which will be included in the dissemination. If you do include a value for the <entityName> element, EDGAR will issue a WARNING and discard the provided value.

5.4 Specifying Signatures

A signature is not “tied” to a Primary Issuer. So, the order of multiple signatures does not matter. The number of signatures needs to be the same as the number of issuers except when the primary issuer is an authorized signatory for all other issuers. In that case, there must only be one signature block for the primary issuer.

6. ERROR REPORTING

EDGAR will generate an error for each violation of an XML SCHEMA constraint, as well as for each violation of a Form D filing business rule. The SCHEMA files do not enforce all error checks, so it is possible to construct a submission that meets all the SCHEMA constraints yet is still SUSPENDED.

This table summarizes most of the errors that can result from violations of SCHEMA constraints and EDGAR business rules. This is not an all-inclusive list.

Error Condition	Severity
The Accession Number entered does not match the Accession Number of an accepted Form D filing and cannot be used for another Form D filing.	SUSPENDED
Error, The CIK Number entered is not valid. Please correct and try again.	SUSPENDED
Invalid CIK/CCC combination. Please correct and try again.	SUSPENDED
The Accession Number entered is not valid for a filing submitted by the issuer making this filing. You may only base this filing on a Form D filing made by the same issuer. Please enter an Accession Number for a Form D filing made by this issuer or indicate that this is a new Form D filing not based on a previous filing.	SUSPENDED
The email address you entered is not formatted correctly. All e-mail addresses should include one "@" and at least one "." After the "@"and have 80 or fewer characters."	SUSPENDED
PO Boxes are not acceptable as a Principal Place of Business. Please enter a valid address.	SUSPENDED
You selected the "Other" option for Types of Securities offered; therefore you must enter a description.	SUSPENDED
If you enter any data for a recipient, you must enter data in all required fields.	SUSPENDED
Only \$1 million of securities is permitted to be offered within a 12-month period under Rule 504.	WARNING
Only \$5 million of securities is permitted to be offered within a 12-month period under Rule 505.	WARNING

Error Condition	Severity
You have selected Rule 505 and/or Rule 506 in Item 6, Federal Exemption(s) and Exclusion(s) Claimed. Only 35 non-accredited investors are permitted in Rule 505 and Rule 506 offerings.	WARNING
You entered \$ 0 for the offering amount	WARNING
The selection Investment Company Act Section 3(C) in Section 6 has been chosen. However, the Pooled Investment Fund Interests option in Section 9 has not been selected.	WARNING
The Jurisdiction of Incorporation (State of Incorporation) value on file in EDGAR cannot be NULL.	SUSPENDED
Not supplying a zip code where address fields are required.	SUSPENDED
Supplying “<recipient>” elements of the “<salesCompensationList>” element without supplying values for ALL of the children elements (except Street Address 2).	SUSPENDED
Incorrectly providing an accession number and amendment information for a Form D filing.	SUSPENDED
Not supplying an accession number and amendment information for a Form D/A filing.	SUSPENDED
Not supplying contact information for the submission.	SUSPENDED
Providing an “over 100 flag” without listing the required 100 values.	SUSPENDED
Providing an Issuer Name in the signature block that does not match the EDGAR database.	SUSPENDED
Providing only whitespace in any required field.	SUSPENDED
Providing a future date in the signature block.	SUSPENDED

You may sometimes get multiple error messages reporting the same error. The XML parser EDGAR uses to process a Form D submission generates messages that are rather technical in nature and require an understanding of the XML SCHEMA language. Whenever possible, EDGAR also generates a more “friendly” error message to give a precise description of the error.

7. EXAMPLE FORM D SUBMISSION FILES

The submission files listed below provide examples of the Form D and D/A submissions.

Submission Type	Submission File
D	sampleFormD.xml
D/A	sampleFormDA.xml

APPENDICES

APPENDIX A. STATE AND COUNTRY CODES

These are the valid designators for the <stateOrCountry> element in the primary document. These codes are actually a combination of values for the 50 U.S. states, the Canadian Provinces, and other countries and territories.

APPENDIX C. MAPPING OF FORM D XML ELEMENTS TO PRINTED FORM

This table maps the XML elements that have a displayable value to their corresponding fields on a printed Form D. Not all elements map to the printed form, but the Schema definition as provided in Section 3.4 is repeated here for completeness.

XML Element Name	Printed Form D Field
schemaVersion	N/A
submissionType	N/A
testOrLive	N/A
returnCopy	N/A
contactData	N/A
contactName	N/A
contactPhoneNumber	N/A
contactEmailAddress	N/A
notificationAddressList	N/A
notificationEmailAddress	N/A
primaryIssuer	Issuer's Identity
cik	CIK (Filer ID Number)
ccc	N/A
entityName	Name of Issuer
issuerAddress	Principal Place of Business and Contact Information
street1	Street Address 1
street2	Street Address 2
city	City
stateOrCountry	State/Province/Country
zipCode	Zip/Postal Code
issuerPhoneNumber	Phone No. of Issuer
jurisdictionOfInc	Jurisdiction of Incorporation/Organization
issuerPreviousNameList	Previous Name(s)
