FILING FORMAT

This report on Form 10-Q is a Quarterly Report filed separately by two registrants, Puget Energy, Inc. (Puget Energy) and Puget Sound Energy, Inc. (PSE). Any references in this report to the “Company” are to Puget Energy and PSE collectively.

FORWARD-LOOKING STATEMENTS

Puget Energy and PSE include the following cautionary statements in this Form 10-Q to make applicable and to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 for any forward-looking statements made by or on behalf of Puget Energy or PSE. This report includes forward-looking statements, which are statements of expectations, beliefs, plans, objectives and assumptions of future events or performance. Words or phrases such as “anticipates,” “believes,” “continues,” “could,” “estimates,” “expects,” “future,” “intends,” “may,” “might,” “plans,” “potential,” “predicts,” “projects,” “should,” “will likely result,” “will continue” or similar expressions are intended to identify certain of these forward-looking statements.

Forward-looking statements reflect current expectations and involve risks and uncertainties that could cause actual results or outcomes to differ materially from those expressed. Puget Energy’s and PSE’s expectations, beliefs and projections are expressed in good faith and are believed by Puget Energy and PSE, as applicable, to have a reasonable basis, including without limitation, management’s examination of historical operating trends, data contained in Company records and other data available from third parties. However, there can be no assurance that Puget Energy’s and PSE’s expectations, beliefs or projections will be achieved or accomplished.

In addition to other factors and matters discussed elsewhere in this report, some important factors that could cause actual results or outcomes for Puget Energy and PSE to differ materially from those discussed in forward-looking statements include:

- Governmental policies and regulatory actions, including those of the Federal Energy Regulatory Commission (FERC) and the Washington Utilities and Transportation Commission (Washington Commission), with respect to allowed rates of return, cost recovery, financing, industry and rate structures, transmission and generation business structures within PSE, acquisition and disposal of assets and facilities, operation, maintenance and construction of electric generating facilities, natural gas and electric distribution and transmission facilities, licensing of hydroelectric operations and natural gas storage facilities, recovery of other capital investments, recovery of power and natural gas costs, recovery of regulatory assets, implementation of energy efficiency programs and present or prospective wholesale and retail competition;
- Failure of PSE to comply with the FERC or the Washington Commission standards and/or rules, which could result in penalties based on the discretion of either commission;
- Findings of noncompliance with electric reliability standards developed by the North American Electric Reliability Corporation (NERC) or the Western Electricity Coordinating Council for users, owners and operators of the power system, which could result in penalties;
- Changes in, adoption of and compliance with laws and regulations, including decisions and policies concerning the environment, climate change, greenhouse gas or other emissions or byproducts of electric generation (including coal ash or other substances), natural resources, and fish and wildlife (including the Endangered Species Act) as well as the risk of litigation arising from such matters, whether involving public or private claimants or regulatory investigative or enforcement measures;
- The ability to recover costs arising from changes in enacted federal, state or local tax laws in a timely manner;
- Changes in tax law, related regulations or differing interpretation or enforcement of applicable law by the Internal Revenue Service (IRS) or other taxing jurisdiction;
- Inability to realize deferred tax assets and use production tax credits due to insufficient future taxable income;
- Inability to manage costs during the rate stay out period through March 31, 2016, due to unforeseen events which would cause increases in costs of operations;
- Accidents or natural disasters, such as hurricanes, windstorms, earthquakes, floods, fires and landslides, which can interrupt service and lead to lost revenue, cause temporary supply disruptions and/or price spikes in the cost of fuel and raw materials and impose extraordinary costs;
- Commodity price risks associated with procuring natural gas and power in wholesale markets or counterparties extending credit to PSE without collateral posting requirements;
- Wholesale market disruption, which may result in a deterioration of market liquidity, increase the risk of counterparty default, affect the regulatory and legislative process in unpredictable ways, negatively affect wholesale energy prices and/or impede PSE's ability to manage its energy portfolio risks and procure energy supply, affect the availability and access to capital and credit markets and/or impact delivery of energy to PSE from its suppliers;
- Financial difficulties of other energy companies and related events, which may affect the regulatory and legislative process in unpredictable ways, adversely affect the availability of and access to capital and credit markets and/or impact delivery of energy to PSE from its suppliers;

- The effect of wholesale market structures (including, but not limited to, regional market designs or transmission organizations) or other related federal initiatives;
- PSE electric or natural gas distribution system failure, which may impact PSE's ability to deliver energy supply to its customers;
- Changes in climate or weather conditions in the Pacific Northwest, which could have effects on customer usage and PSE's revenue and expenses;
- Regional or national weather, which can have a potentially serious impact on PSE's ability to procure adequate supplies of natural gas, fuel or purchased power to serve its customers and on the cost of procuring such supplies;
- Variable hydrological conditions, which can impact streamflow and PSE's ability to generate electricity from hydroelectric facilities;
- Electric plant generation and transmission system outages, which can have an adverse impact on PSE's expenses with respect to repair costs, added costs to replace energy or higher costs associated with dispatching a more expensive generation resource;
- The ability of a natural gas or electric plant to operate as intended;
- The ability to renew contracts for electric and natural gas supply and the price of renewal;
- Blackouts or large curtailments of transmission systems, whether PSE's or others', which can affect PSE's ability to deliver power or natural gas to its customers and generating facilities;
- The ability to restart generation following a regional transmission disruption;
- The failure of the interstate natural gas pipeline delivering to PSE's system, which may impact PSE's ability to adequately deliver natural gas supply or electric power to its customers;
- Industrial, commercial and residential growth and demographic patterns in the service territories of PSE;
- General economic conditions in the Pacific Northwest, which may impact customer consumption or affect PSE's accounts receivable;
- The loss of significant customers, changes in the business of significant customers or the condemnation of PSE's facilities as a result of municipalization or other government action or negotiated settlement, which may result in changes in demand for PSE's services;
- The failure of information systems or the failure to secure information system data, which may impact the operations and cost of PSE's customer service, generation, distribution and transmission;
- The impact of acts of God, terrorism, asset-based or cyber-based attacks, flu pandemic or similar significant events;
- Capital market conditions, including changes in the availability of capital and interest rate fluctuations;
- Employee workforce factors, including strikes, work stoppages, availability of qualified employees or the loss of a key executive;
- The ability to obtain insurance coverage and the cost of such insurance;
- The ability to maintain effective internal controls over financial reporting and operational processes;
- Changes in Puget Energy's or PSE's credit ratings, which may have an adverse impact on the availability and cost of capital for Puget Energy or PSE generally, or the failure to comply with the covenants in Puget Energy's or PSE's credit facilities, which would limit the Company's ability to utilize such facilities for capital; and
- Deteriorating values of the equity, fixed income and other markets which could significantly impact the value of investments of PSE's retirement plan, post-retirement medical benefit plan trusts and the funding of obligations thereunder.

Any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by law, the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for management to predict all such factors, nor can it assess the impact of any such factor on the business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. You are also advised to consult Item 1A - "Risk Factors" in the Company's most recent Annual Report on Form 10-K.

The accompanying notes are an integral part of the financial statements.

(1) Summary of Significant Accounting Policies

Basis of Presentation

Puget Energy is an energy services holding company that owns PSE. PSE is a public utility incorporated in the state of Washington that furnishes electric and natural gas services in a territory covering approximately 6,000 square miles, primarily in the Puget Sound region. Following the merger with Puget Holdings LLC (Puget Holdings) in 2009, Puget Energy is an indirect wholly-owned subsidiary of Puget Holdings.

The consolidated financial statements of Puget Energy reflect the accounts of Puget Energy and its subsidiary, PSE. PSE's consolidated financial statements include the accounts of PSE and its subsidiary, Puget Western, Inc. Puget Energy and PSE are collectively referred to herein as "the Company." The consolidated financial statements are presented after elimination of intercompany transactions. PSE's consolidated financial statements continue to be accounted for on a historical basis and do not include any purchase accounting adjustments.

The consolidated financial statements contained in this Form 10-Q are unaudited. In the respective opinions of the management of Puget Energy and PSE, all adjustments necessary for a fair statement of the results for the interim periods have been reflected and were of a normal recurring nature. These consolidated financial statements should be read in conjunction with the audited financial statements (and the Combined Notes thereto) included in the combined Puget Energy and PSE Annual Report on Form 10-K for the year ended December 31, 2013.

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

PSE collected Washington State excise taxes (which are a component of general retail customer rates) and municipal taxes totaling \$43.6 million and \$172.1 million for the three and nine months ended September 30, 2014, respectively, and \$45.9 million and \$174.3 million for the three and nine months ended September 30, 2013, respectively. The Company reports the collection of such taxes on a gross basis in operating revenue and as expense in taxes other than income taxes in the accompanying consolidated statements of income.

Beginning July 1, 2013, PSE's electric and gas operations contain a revenue decoupling mechanism under which PSE's actual energy delivery revenues related to electric transmission and distribution, gas operations and general administrative costs are compared with authorized revenues allowed under the mechanism. Any differences are deferred to a regulatory asset for under recovery or regulatory liability for over recovery. Revenues associated with power costs under the Power Cost Adjustment (PCA) mechanism and Purchased Gas Adjustment (PGA) rates are excluded from the decoupling mechanism.

(2) New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers, that outlines a single comprehensive model for use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The ASU is based on the principle that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract.

ASU 2014-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption of the ASU is not permitted. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of the new standard. The Company is currently evaluating the new guidance. At this time we cannot determine the impact this standard will have on its consolidated financial statements.

(3) Accounting for Derivative Instruments and Hedging Activities

PSE employs various energy portfolio optimization strategies, but is not in the business of assuming risk for the purpose of realizing speculative trading revenue. The nature of serving regulated electric customers with its portfolio of owned and contracted electric generation resources exposes PSE and its customers to some volumetric and commodity price risks within the sharing mechanism of the PCA. Therefore, wholesale market transactions and related hedging strategy objective is to minimize costs and risks where feasible thus reducing volatility in costs in the portfolio. In order to manage its exposure to the variability in future

cash flows for forecasted energy transactions, PSE utilizes a programmatic hedging strategy which extends out three years. PSE's energy risk portfolio management function monitors and manages these risks using analytical models and tools. In order to manage risks effectively, PSE enters into forward physical electric and natural gas purchase and sale agreements, fixed-for-floating swap contracts, and commodity call/put options. The forward physical electric agreements are both fixed and variable (at index), while the physical natural gas agreements are variable. To fix the price of wholesale electricity and natural gas, PSE may enter into fixed-for-floating swap (financial) contracts with various counterparties. PSE also utilizes natural gas call and put options as an additional hedging instrument to increase the hedging portfolio's flexibility to react to commodity price fluctuations.

The Company manages its interest rate risk through the issuance of mostly fixed-rate debt with varied maturities. The Company utilizes internal cash from operations, borrowings under its commercial paper program, and its credit facilities to meet short-term funding needs. The Company may enter into swap instruments or other financial hedge instruments to manage the interest rate risk associated with these debts. As of September 30, 2014, Puget Energy had two interest rate swap contracts outstanding which extend to January 2017. PSE did not have any outstanding interest rate swap instruments.

The following table presents the volumes, fair values and locations of the Company's derivative instruments recorded on the balance sheets:

| Puget Energy and Puget Sound Energy (Dollars in Thousands) | September 30, 2014 | | | December 31, 2013 | | |
|--|--------------------|---------------------|--------------------------|-------------------|---------------------|--------------------------|
| | Volumes | Assets ¹ | Liabilities ² | Volumes | Assets ¹ | Liabilities ² |
| Interest rate swap derivatives ³ | \$450 million | \$ — | \$ 9,560 | \$450 million | \$ — | \$ 13,223 |
| Electric portfolio derivatives | * | 7,160 | 33,172 | * | 18,479 | 37,312 |
| Natural gas derivatives (MMBtus) ⁴ | 394.3 million | 12,390 | 19,135 | 423.5 million | 8,121 | 35,676 |
| Total derivative contracts | | \$ 19,550 | \$ 61,867 | | \$ 26,600 | \$ 86,211 |
| Current | | \$ 14,832 | \$ 37,410 | | \$ 18,867 | \$ 48,049 |
| Long-term | | 4,718 | 24,457 | | 7,733 | 38,162 |
| Total derivative contracts | | \$ 19,550 | \$ 61,867 | | \$ 26,600 | \$ 86,211 |

¹ Balance sheet location: Current and Long-term Unrealized gain on derivative instruments.

² Balance sheet location: Current and Long-term Unrealized loss on derivative instruments.

³ Interest rate swap contracts are only held at Puget Energy.

⁴ All fair value adjustments on derivatives relating to the natural gas business have been deferred in accordance with ASC 980, "Regulated Operations" (ASC 980) due to the PGA mechanism. The net derivative asset or liability and offsetting regulatory liability or asset are related to contracts used to economically hedge the cost of physical gas purchased to serve natural gas customers.

* Electric portfolio derivatives consist of electric generation fuel of 147.4 million One Million British Thermal Units (MMBtus) and purchased electricity of 5.4 million Megawatt Hours (MWhs) at September 30, 2014, and 145.6 million MMBtus and 8.6 million MWhs at December 31, 2013.

For further details regarding the fair value of derivative instruments, see Note 4.

ASU 2013-01 requires disclosure of both gross and net information for recognized derivative assets and liabilities. It is the Company's policy to record all derivative transactions on a gross basis at the contract level, without offsetting assets or liabilities. The Company generally enters into transactions using the following master agreements: WSPP, Inc. (WSPP) agreements which standardize physical power contracts; International Swaps and Derivatives Association (ISDA) agreements which standardize financial gas and electric contracts; and North American Energy Standards Board (NAESB) agreements which standardize physical gas contracts. The Company believes that such agreements reduce credit risk exposure because such agreements provide for the netting and offsetting of monthly payments as well as right of set-off in the event of counterparty default. The set-off provision can be used as a final settlement of accounts which extinguishes the mutual debts owed between the parties in exchange for a new net amount.

The following tables present the potential effect of netting arrangements, including rights of set-off associated with the Company's derivative assets and liabilities:

Puget Energy and Puget Sound Energy

September 30, 2014

| (Dollars in Thousands) | Gross Amount Recognized in the Statement of Financial Position ¹ | Gross Amounts Offset in the Statement of Financial Position | Net of Amounts Presented in the Statement of Financial Position | Gross Amounts Not Offset in the Statement of Financial Position | | Net Amount |

Puget Energy and Puget Sound Energy

December 31, 2013

| (Dollars in Thousands) | Gross Amount Recognized in the Statement of Financial Position ¹ | Gross Amounts Offset in the Statement of Financial Position | Net of Amounts Presented in the Statement of Financial Position | Gross Amounts Not Offset in the Statement of Financial Position | | Net Amount |
|----------------------------------|---|---|---|---|---------------------------------|------------|
| | | | | Commodity Contracts | Cash Collateral Received/Posted | |
| Assets | | | | | | |
| Energy Derivative Contracts | \$ 26,600 | \$ — | \$ 26,600 | \$ (19,491) | \$ — | \$ 7,109 |
| Liabilities | | | | | | |
| Energy Derivative Contracts | \$ 72,988 | \$ — | \$ 72,988 | \$ (19,491) | \$ — | \$ 53,497 |
| Interest Rate Swaps ² | \$ 13,223 | \$ — | \$ 13,223 | \$ — | \$ — | \$ 13,223 |

¹ All Derivative Contract deals are executed under ISDA, NAESB and WSPP Master Netting Agreements with Right of Offset.

² Interest Rate Swap Contracts are only held at Puget Energy.

Due to the merger in 2009, Puget Energy recorded all derivative contracts at fair value as either assets or liabilities. Certain contracts meeting the criteria defined in ASC 815 were subsequently designated as Normal Purchase Normal Sale (NPNS) or cash flow hedges, thereby causing differences in the derivative unrealized gains/losses to be recorded through earnings between Puget Energy and PSE. These differences will occur through February 2015.

The following tables present the effect and locations of the Company's derivatives not designated as hedging instruments, recorded on the statements of income:

| Puget Energy (Dollars in Thousands) | Location | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|-------------------------------------|------------|------------------------------------|----------|
| | | 2014 | 2013 | 2014 | 2013 |
| Interest rate contracts: | Non-hedged interest rate swap (expense) income | \$ (323) | \$ (470) | \$ (2,430) | \$ 1,790 |
| | Interest expense | 1,241 | (3,625) | 398 | (4,301) |
| Commodity contracts: | | | | | |
| Electric derivatives | Unrealized gain (loss) on derivative instruments, net | (32,648) | 8,888 | (7,714) | 57,203 |
| | Electric generation fuel | (420) | (9,142) | 8,271 | (22,710) |
| | Purchased electricity | 972 | 2,281 | 2,687 | (32,909) |
| Total gain (loss) recognized in income on derivatives | | \$ (31,178) | \$ (2,068) | \$ 1,212 | \$ (927) |

| Puget Sound Energy (Dollars in Thousands) | Location | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|-------------------------------------|----------|------------------------------------|------------|
| | | 2014 | 2013 | 2014 | 2013 |
| Commodity contracts: | | | | | |
| Electric derivatives | Unrealized gain (loss) on derivative instruments, net | \$ (32,648) | \$ 8,888 | \$ (8,284) | \$ 54,252 |
| | Electric generation fuel | (420) | (9,142) | 8,271 | (22,710) |
| | Purchased electricity | 972 | 2,281 | 2,687 | (32,909) |
| Total gain (loss) recognized in income on derivatives | | \$ (32,096) | \$ 2,027 | \$ 2,674 | \$ (1,367) |

The unrealized gain or loss on derivative contracts is reported in the statement of cash flows under the operating activities section. However, at the time of the merger in 2009, all derivative contracts at Puget Energy were assessed to identify contracts that have a "more than an insignificant" fair value. If the fair value was greater than 10% of the notional value, the contract was deemed as having a financing element. For those contracts, the cash inflows (outflows) are presented in the financing activities section of the statement of cash flows. For the nine months ended September 30, 2014 and 2013, cash outflows related to financing activities of \$8.0 million and \$26.0 million, respectively, were reported on the Puget Energy statement of cash flows.

For derivative instruments previously designated as cash flow hedges (including both commodity contracts and interest rate swaps), the effective portion of the gain or loss on the derivative was recorded as a component of Other Comprehensive Income (OCI), and then is reclassified into earnings in the same period(s) during which the hedged transaction affects earnings.

Puget Energy and PSE expect \$0.5 million and \$2.0 million of losses, respectively, in accumulated OCI will be reclassified into earnings within the next twelve months. The Company does not attempt cash flow hedging for any new transactions and records all mark-to-market adjustments through earnings.

The following tables present the Company's pre-tax gain (loss) of derivatives that were previously in a cash flow hedge relationship, and subsequently reclassified out of accumulated OCI into income:

| Puget Energy | | Three Months Ended | | Nine Months Ended | |
|--------------------------|--------------------------|--------------------|-------------------|-------------------|-------------------|
| | | September 30, | | September 30 | |
| (Dollars in Thousands) | Location | 2014 | 2013 | 2014 | 2013 |
| Interest rate contracts: | Interest expense | \$ — | \$ (1,247) | \$ (144) | \$ (3,886) |
| Commodity contracts: | | | | | |
| Electric derivatives | Electric generation fuel | — | — | — | — |
| | Purchased electricity | — | — | (534) | 164 |
| Total | | \$ — | \$ (1,247) | \$ (678) | \$ (3,722) |

| Puget Sound Energy | | Three Months Ended | | Nine Months Ended | |
|---------------------------|--------------------------|--------------------|-----------------|-------------------|-------------------|
| | | September 30, | | September 30, | |
| (Dollars in Thousands) | Location | 2014 | 2013 | 2014 | 2013 |
| Interest rate contracts: | Interest expense | \$ (122) | \$ (122) | \$ (366) | \$ (366) |
| Commodity contracts: | | | | | |
| Electric derivatives | Electric generation fuel | — | — | — | — |
| | Purchased electricity | — | — | (1,104) | (2,786) |
| Total | | \$ (122) | \$ (122) | \$ (1,470) | \$ (3,152) |

The Company is exposed to credit risk primarily through buying and selling electricity and natural gas to serve its customers. Credit risk is the potential loss resulting from a counterparty's non-performance under an agreement. The Company manages credit risk with policies and procedures for, among other things, counterparty credit analysis, exposure measurement, exposure monitoring and exposure mitigation.

The Company monitors counterparties that have significant swings in credit default swap rates, have credit rating changes by external rating agencies, have changes in ownership or are experiencing financial distress. Where deemed appropriate, the Company may request collateral or other security from its counterparties to mitigate potential credit default losses. Criteria employed in this decision include, among other things, the perceived creditworthiness of the counterparty and the expected credit exposure.

It is possible that volatility in energy commodity prices could cause the Company to have material credit risk exposure with one or more counterparties. If such counterparties fail to perform their obligations under one or more agreements, the Company could suffer a material financial loss. However, as of September 30, 2014, approximately 98.8% of the Company's energy portfolio exposure, excluding NPNS transactions, is with counterparties that are rated at least investment grade and 1.2% are either rated below investment grade or not rated. The Company assesses credit risk internally for counterparties that are not rated by the major rating agencies.

As the Company generally enters into transactions using the WSPP, ISDA and NAESB master agreements, it believes that such agreements reduce credit risk exposure because they provide for the netting and offsetting of monthly payments and, in the event of counterparty default, termination payments.

The Company computes credit reserves at a master agreement level by counterparty (i.e., WSPP, ISDA, or NAESB). The Company considers external credit ratings and market factors, such as credit default swaps and bond spreads, in the determination of reserves. The Company recognizes that external ratings may not always reflect how a market participant perceives a counterparty's risk of default. The Company uses both default factors published by Standard & Poor's and factors derived through analysis of market risk, which reflect the application of an industry standard recovery rate. The Company selects a default factor by counterparty at an aggregate master agreement level based on a weighted average default tenor for that counterparty's deals. The default tenor is used by weighting the fair value and contract tenors for all deals for each counterparty to derive an average value. The default factor used is dependent upon whether the counterparty is in a net asset or a net liability position after applying the master agreement levels.

The Company applies the counterparty's default factor to compute credit reserves for counterparties that are in a net asset position. The Company calculates a non-performance risk on its derivative liabilities by using its estimated incremental borrowing rate over the risk-free rate. Credit reserves are booked as contra accounts to unrealized gain (loss) positions. As of September 30, 2014, the Company was in a net liability position with many of its counterparties, so the default factors of counterparties did not have a significant impact on reserves for the period. The majority of the Company's derivative contracts are with financial institutions and other utilities operating within the Western Electricity Coordinating Council. As of September 30, 2014, PSE has posted a \$1.0 million letter of credit as a condition of transacting on a physical energy exchange and clearinghouse in Canada.

PSE did not trigger any collateral requirements with any of its counterparties, nor were any of PSE's counterparties required to post collateral resulting from credit rating downgrades.

The table below presents the fair value of the overall contractual contingent liability positions for the Company's derivative activity at September 30, 2014:

| Puget Energy and Puget Sound Energy Contingent Feature | Fair Value ¹ | Posted | Contingent |
|---|-------------------------|-------------|------------------|
| (Dollars in Thousands) | Liability | Collateral | Collateral |
| Credit rating ² | \$ (12,891) | \$ — | \$ 12,891 |
| Requested credit for adequate assurance | (15,337) | — | — |
| Forward value of contract ³ | (20) | — | — |
| Total | \$ (28,248) | \$ — | \$ 12,891 |

¹ Represents the derivative fair value of contracts with contingent features for counterparties in net derivative liability positions. Excludes NPNS, accounts payable and accounts receivable.

² Failure by PSE to maintain an investment grade credit rating from each of the major credit rating agencies provides counterparties a contractual right to demand collateral.

³ Collateral requirements may vary, based on changes in the forward value of underlying transactions relative to contractually defined collateral thresholds.

(4) Fair Value Measurements

ASC 820 established a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy categorizes the inputs into three levels with the highest priority given to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority given to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Level 1 primarily consists of financial instruments such as exchange-traded derivatives and listed equities. Equity securities that are also classified as cash equivalents are considered Level 1 if there are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using models or other valuation methodologies. Instruments in this category include non-exchange-traded derivatives such as over-the-counter forwards and options.

Level 3 - Pricing inputs include significant inputs that have little or no observability as of the reporting date. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value.

Financial assets and liabilities measured at fair value are classified in their entirety in the appropriate fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy. The Company primarily determines fair value measurements classified as Level 2 or Level 3 using a combination of the income and market valuation approaches. The process of determining the fair values is the responsibility of the derivative accounting department which reports to the Controller and Principal Accounting Officer. Inputs used to estimate the fair value of forwards, swaps and options include market-price curves; contract terms and prices; credit-risk adjustments; and discount factors. Additionally, for options, the Black-Scholes option valuation model and implied market volatility curves are used. Inputs used to estimate fair value in industry-standard models are categorized as Level 2 inputs because substantially all assumptions and inputs are observable in active markets throughout the full term of the instruments. On a daily basis, the Company obtains quoted forward prices for the electric and natural gas market from an independent external pricing service. For interest rate swaps, the Company obtains monthly mark-to-market values from an independent external pricing service for London Interbank Offered Rate (LIBOR) forward rates, which is a significant input. Some of the inputs of the interest rate swap valuations, which are less significant, include the credit standing of the counterparties, assumptions for time value and the impact of the Company's nonperformance risk of its liabilities. The Company classifies cash and cash equivalents, and restricted cash as Level 1 financial instruments due to cash being at stated value, and cash equivalents at quoted market prices.

The Company considers its electric, natural gas and interest rate swap contracts as Level 2 derivative instruments as such contracts are commonly traded as over-the-counter forwards with indirectly observable price quotes. Management's assessment was based on the trading activity in real-time and forward electric and natural gas markets. Each quarter, the Company confirms the validity of pricing-service quoted prices (e.g., Level 2 in the fair value hierarchy) used to value commodity contracts with the actual prices of commodity contracts entered into during the most recent quarter. However, certain energy derivative instruments with maturity dates falling outside the range of observable price quotes are classified as Level 3 in the fair value hierarchy.

Assets and Liabilities with Estimated Fair Value

The following table presents the fair value hierarchy by level, the carrying value for cash, cash equivalents, restricted cash, notes receivable and short-term debt. The carrying values below are representative of fair values due to the short-term nature of these financial instruments.

| Puget Energy (Dollars in Thousands) | Carrying / Fair Value At September 30, 2014 | | | Carrying / Fair Value At December 31, 2013 | | |
|---|--|------------------|-------------------|---|------------------|-------------------|
| | Level 1 | Level 2 | Total | Level 1 | Level 2 | Total |
| Assets: | | | | | | |
| Cash and Cash Equivalents | \$ 26,470 | \$ — | \$ 26,470 | \$ 44,302 | \$ — | \$ 44,302 |
| Restricted Cash | 54,251 | — | 54,251 | 7,171 | — | 7,171 |
| Notes Receivable and Other | — | 52,795 | 52,795 | — | 53,449 | 53,449 |
| Total assets | \$ 80,721 | \$ 52,795 | \$ 133,516 | \$ 51,473 | \$ 53,449 | \$ 104,922 |
| Liabilities: | | | | | | |
| Short-term debt | \$ — | \$ 25,000 | \$ 25,000 | \$ 162,000 | \$ — | \$ 162,000 |
| Total liabilities | \$ — | \$ 25,000 | \$ 25,000 | \$ 162,000 | \$ — | \$ 162,000 |

| Puget Sound Energy (Dollars in Thousands) | Carrying / Fair Value At September 30, 2014 | | | Carrying / Fair Value At December 31, 2013 | | |
|---|--|------------------|-------------------|---|------------------|-------------------|
| | Level 1 | Level 2 | Total | Level 1 | Level 2 | Total |
| Assets: | | | | | | |
| Cash and Cash Equivalents | \$ 26,412 | \$ — | \$ 26,412 | \$ 44,111 | \$ — | \$ 44,111 |
| Restricted Cash | 54,251 | — | 54,251 | 7,171 | — | 7,171 |
| Notes Receivable and Other | — | 52,795 | 52,795 | — | 53,449 | 53,449 |
| Total assets | \$ 80,663 | \$ 52,795 | \$ 133,458 | \$ 51,282 | \$ 53,449 | \$ 104,731 |
| Liabilities: | | | | | | |
| Short-term debt | \$ — | \$ 25,000 | \$ 25,000 | \$ 162,000 | \$ — | \$ 162,000 |
| Short-term debt owed to parent | — | 28,933 | 28,933 | — | 29,598 | 29,598 |
| Total liabilities | \$ — | \$ 53,933 | \$ 53,933 | \$ 162,000 | \$ 29,598 | \$ 191,598 |

The fair value of the junior subordinated and long-term notes were estimated using the discounted cash flow method with U.S. Treasury yields and Company credit spreads as inputs, interpolating to the maturity date of each issue. Carrying values and estimated fair values were as follows:

| Puget Energy | | September 30, 2014 | | December 31, 2013 | |
|--|---|---------------------|---------------------|---------------------|---------------------|
| | | Level | Carrying Value | Fair Value | Carrying Value |
| (Dollars in Thousands) | | | | | |
| Liabilities: | | | | | |
| Junior subordinated notes | 2 | \$ 250,000 | \$ 324,414 | \$ 250,000 | \$ 269,366 |
| Long-term debt (fixed-rate), net of discount | 2 | 4,691,825 | 5,977,877 | 4,683,476 | 5,594,314 |
| Long-term debt (variable-rate) | 2 | 299,000 | 299,000 | 299,000 | 299,000 |
| Total | | \$ 5,240,825 | \$ 6,601,291 | \$ 5,232,476 | \$ 6,162,680 |

| Puget Sound Energy | | September 30, 2014 | | December 31, 2013 | |
|--|---|---------------------|---------------------|---------------------|---------------------|
| | | Level | Carrying Value | Fair Value | Carrying Value |
| (Dollars in Thousands) | | | | | |
| Liabilities: | | | | | |
| Junior subordinated notes | 2 | \$ 250,000 | \$ 324,414 | \$ 250,000 | \$ 269,366 |
| Long-term debt (fixed-rate), net of discount | 2 | 3,513,259 | 4,341,809 | 3,513,258 | 4,038,455 |
| Total | | \$ 3,763,259 | \$ 4,666,223 | \$ 3,763,258 | \$ 4,307,821 |

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present the Company's financial assets and liabilities by level, within the fair value hierarchy, that were accounted for at fair value on a recurring basis:

| Puget Energy | Fair Value At September 30, 2014 | | | Fair Value At December 31, 2013 | | |
|--------------------------------------|-------------------------------------|-------------|-----------------|------------------------------------|-------------|------------------|
| | Level 2 | Level 3 | Total | Level 2 | Level 3 | Total |
| (Dollars in Thousands) | | | | | | |
| Interest rate derivative instruments | \$ 9,560 | \$ — | \$ 9,560 | \$ 13,223 | \$ — | \$ 13,223 |
| Total derivative liabilities | \$ 9,560 | \$ — | \$ 9,560 | \$ 13,223 | \$ — | \$ 13,223 |

| Puget Energy and Puget Sound Energy | Fair Value At September 30, 2014 | | | Fair Value At December 31, 2013 | | |
|--|-------------------------------------|------------------|------------------|------------------------------------|------------------|------------------|
| | Level 2 | Level 3 | Total | Level 2 | Level 3 | Total |
| Assets: | | | | | | |
| Electric derivative instruments | \$ 2,906 | \$ 4,254 | \$ 7,160 | \$ 14,661 | \$ 3,818 | \$ 18,479 |
| Natural gas derivative instruments | 10,391 | 1,999 | 12,390 | 5,448 | 2,673 | 8,121 |
| Total assets | \$ 13,297 | \$ 6,253 | \$ 19,550 | \$ 20,109 | \$ 6,491 | \$ 26,600 |
| Liabilities: | | | | | | |
| Electric derivative instruments | \$ 15,711 | \$ 17,461 | \$ 33,172 | \$ 18,073 | \$ 19,239 | \$ 37,312 |
| Natural gas derivative instruments | 15,398 | 3,737 | 19,135 | 32,642 | 3,034 | 35,676 |
| Total liabilities | \$ 31,109 | \$ 21,198 | \$ 52,307 | \$ 50,715 | \$ 22,273 | \$ 72,988 |

The following table presents the Company's reconciliation of the changes in the fair value of Level 3 derivatives in the fair value hierarchy:

| Puget Energy and Puget Sound Energy | | Three Months Ended September 30, | | | | | |
|--|-------------|-------------------------------------|-------------|-------------|------------|-------------|--|
| | | 2014 | | | 2013 | | |
| Level 3 Roll-Forward Net Asset/ (Liability) | Electric | Gas | Total | Electric | Gas | Total | |
| (Dollars in Thousands) | | | | | | | |
| Balance at beginning of period | \$ (4,693) | \$ (273) | \$ (4,966) | \$ (36,899) | \$ (2,873) | \$ (39,772) | |
| Changes during period: | | | | | | | |

| Balance at end of period | \$ (13,207) | \$ (1,738) | \$ (14,945) | \$ (29,119) | \$ (2,799) | \$ (31,918) | |

¹ Income Statement location: Unrealized (gain) loss on derivative instruments, net. Includes unrealized gains (losses) on derivatives still held in position as of the reporting date for electric derivatives of \$(3.3) million and \$(0.8) million for the three months ended September 30, 2014 and 2013, respectively.

² Income Statement location: Unrealized (gain) loss on derivative instruments, net. Includes unrealized gains (losses) on derivatives still held in position as of the reporting date for electric derivatives of \$(3.3) million and \$(15.0) million for the nine months ended September 30, 2014 and 2013, respectively.

³ The Company had no purchases, sales or issuances during the reported periods.

Realized gains and losses on energy derivatives for Level 3 recurring items are included in energy costs in the Company's consolidated statements of income under purchased electricity, electric generation fuel or purchased natural gas when settled. Unrealized gains and losses on energy derivatives for Level 3 recurring items are included in net unrealized (gain) loss on derivative instruments in the Company's consolidated statements of income.

In order to determine which assets and liabilities are classified as Level 3, the Company receives market data from its independent external pricing service defining the tenor of observable market quotes. To the extent any of the Company's commodity contracts extend beyond what is considered observable as defined by its independent pricing service, the contracts are classified as Level 3. The actual tenor of what the independent pricing service defines as observable is subject to change depending on market conditions. Therefore, as the market changes, the same contract may be designated Level 3 one month and Level 2 the next, and

vice versa. The changes of fair value classification into or out of Level 3 are recognized each month, and reported in the Level 3 Roll-forward table above. The Company did not have any transfers between Level 2 and Level 1 during the reported periods. The Company does periodically transact at locations, or market price points, that are illiquid or for which no prices are available from the independent pricing service. In such circumstances the Company uses a more liquid price point and performs a 15-month regression against the illiquid locations to serve as a proxy for market prices. Such transactions are classified as Level 3. The Company does not use internally developed models to make adjustments to significant unobservable pricing inputs.

The only significant unobservable input into the fair value measurement of the Company's Level 3 assets and liabilities is the forward price for electric and natural gas contracts. Below are the forward price ranges for the Company's purchased commodity contracts as of September 30, 2014:

| (Dollars in Thousands) | Fair Value | | Valuation Technique | Unobservable Input | Range | | Weighted Average |
|------------------------|---------------------|--------------------------|----------------------|--------------------|------------------|------------------|------------------|
| | Assets ¹ | Liabilities ¹ | | | Low | High | |
| Electric | \$ 4,254 | \$ 17,461 | Discounted cash flow | Power Prices | \$17.64 per MWh | \$44.50 per MWh | \$35.21 per MWh |
| Natural gas | \$ 1,999 | \$ 3,737 | Discounted cash flow | Natural Gas Prices | \$3.60 per MMBtu | \$3.83 per MMBtu | \$3.70 per MMBtu |

¹ The valuation techniques, unobservable inputs and ranges are the same for asset and liability positions.

Below are the forward price ranges for the Company's purchased commodity contracts, as of December 31, 2013:

| (Dollars in Thousands) | Fair Value | | Valuation Technique | Unobservable Input | Range | | Weighted Average |
|------------------------|---------------------|--------------------------|----------------------|--------------------|------------------|------------------|------------------|
| | Assets ¹ | Liabilities ¹ | | | Low | High | |
| Electric | \$ 3,818 | \$ 19,239 | Discounted cash flow | Power Prices | \$17.06 per MWh | \$47.09 per MWh | \$38.74 per MWh |
| Natural gas | \$ 2,673 | \$ 3,034 | Discounted cash flow | Natural Gas Prices | \$3.62 per MMBtu | \$4.19 per MMBtu | \$3.78 per MMBtu |

¹ The valuation techniques, unobservable inputs and ranges are the same for asset and liability positions.

The significant unobservable inputs listed above would have a direct impact on the fair values of the above instruments if they were adjusted. Consequently significant increases or decreases in the forward prices of electricity or natural gas in isolation would result in a significantly higher or lower fair value for Level 3 assets and liabilities. Generally, interrelationships exist between market prices of natural gas and power. As such, an increase in natural gas pricing would potentially have a similar impact on forward power markets. At September 30, 2014 and December 31, 2013, a hypothetical 10% increase or decrease in market prices of natural gas and electricity would change the fair value of the Company's derivative portfolio, classified as Level 3 within the fair value hierarchy, by \$5.1 million and \$7.0 million, respectively.

(5) Retirement Benefits

PSE has a defined benefit pension plan covering substantially all PSE employees. Pension benefits earned are a function of age, salary, years of service and, in the case of employees in the cash balance formula plan, the applicable annual interest crediting rates. Beginning January 1, 2014, all new United Association of Journeymen and Apprentices of the Plumbing and Pipefitting Industry (UA) employees and those new non-represented employees who elect to accumulate the Company contribution in the Cash Balance pension, will receive annual pay credits of 4% each year. They will also receive interest credits like other participants in the Cash Balance pension, which are at least 1% per quarter. When a newly-hired employee with a vested Cash Balance benefit leaves PSE, he or she will have annuity and lump sum options for distribution, with annuities calculated according to the Pension Protection Act. Those who select the lump sum option will receive their current cash balance amount. Participation by continuing employees in the Cash Balance pension plan is not affected. PSE also maintains a non-qualified Supplemental Executive Retirement Plan (SERP) for its key senior management employees.

In addition to providing pension benefits, PSE provides group health care and life insurance benefits for certain retired employees. These benefits are provided principally through an insurance company. The insurance premiums, paid primarily by retirees, are based on the benefits provided during the year.

The 2009 merger of Puget Energy with Puget Holdings triggered a new basis of accounting for PSE's retirement benefit plans in the Puget Energy consolidated financial statements. Such purchase accounting adjustments associated with the re-measurement of the retirement plans are recorded at Puget Energy.

The following tables summarize the Company's net periodic benefit cost for the three and nine months ended September 30, 2014 and 2013:

| Puget Energy | Qualified Pension Benefits | | SERP Pension Benefits | | Other Benefits | |
|--|----------------------------------|-----------------|-----------------------|-----------------|-----------------|---------------|
| | Three Months Ended September 30, | | | | | |
| (Dollars in Thousands) | 2014 | 2013 | 2014 | 2013 | 2014 | 2013 |
| Components of net periodic benefit cost: | | | | | | |
| Service cost | \$ 4,359 | \$ 4,822 | \$ 261 | \$ 375 | \$ 28 | \$ 34 |
| Interest cost | 7,010 | 6,188 | 577 | 511 | 171 | 166 |
| Expected return on plan assets | (10,616) | (9,774) | — | — | (134) | (109) |
| Amortization of prior service cost | (495) | (495) | 12 | (4) | — | — |
| Amortization of net loss (gain) | — | 722 | 228 | 365 | (228) | 17 |
| Net periodic benefit cost | \$ 258 | \$ 1,463 | \$ 1,078 | \$ 1,247 | \$ (163) | \$ 108 |

| Puget Energy | Qualified Pension Benefits | | SERP Pension Benefits | | Other Benefits | |
|--|---------------------------------|-----------------|-----------------------|-----------------|-----------------|---------------|
| | Nine Months Ended September 30, | | | | | |
| (Dollars in Thousands) | 2014 | 2013 | 2014 | 2013 | 2014 | 2013 |
| Components of net periodic benefit cost: | | | | | | |

| Net periodic benefit cost | \$ 10,384 | \$ 16,794 | \$ 3,642 | \$ 4,289 | \$ (328) | \$ 80 |

The following table summarizes the Company's change in benefit obligation for the periods ended September 30, 2014 and December 31, 2013:

| Puget Energy and Puget Sound Energy | Qualified Pension Benefits | | SERP Pension Benefits | | Other Benefits | |
|---|---|---------------------------------------|---|---------------------------------------|---|---------------------------------------|
| | Nine Months Ended September 30, 2014 | Year Ended December 31, 2013 | Nine Months Ended September 30, 2014 | Year Ended December 31, 2013 | Nine Months Ended September 30, 2014 | Year Ended December 31, 2013 |
| (Dollars in Thousands) | | | | | | |
| Change in benefit obligation: | | | | | | |
| Benefit obligation at beginning of period | \$ 573,317 | \$ 616,290 | \$ 47,279 | \$ 51,795 | \$ 14,939 | \$ 17,672 |
| Service cost | 13,077 | 19,285 | 782 | 1,498 | 84 | 134 |
| Interest cost | 21,030 | 24,754 | 1,732 | 2,045 | 513 | 664 |
| Amendment | — | — | — | 478 | — | — |
| Actuarial Net loss/(gain) BOY Census, remeasurement | 1,878 | (48,559) | — | (1,687) | (932) | (2,240) |
| Benefits paid | (38,112) | (38,453) | (1,425) | (6,850) | (1,106) | (1,536) |
| Medicare part D subsidy received | — | — | — | — | 117 | 245 |
| Benefit obligation at end of period | \$ 571,190 | \$ 573,317 | \$ 48,368 | \$ 47,279 | \$ 13,615 | \$ 14,939 |

The aggregate expected contributions by the Company to fund the qualified pension plan, SERP and the other postretirement plans for the year ending December 31, 2014 are expected to be at least \$12.0 million, \$4.0 million and \$0.3 million, respectively. During the three months ended September 30, 2014, the Company contributed \$3.0 million, \$0.5 million, and \$0.1 million to fund the qualified pension plan, SERP and the other postretirement plan, respectively. During the nine months ended September 30, 2014, the Company contributed \$9.0 million, \$1.4 million, and \$0.4 million to fund the qualified pension plan, SERP and the other postretirement plan, respectively.

(6) Regulation and Rates

On September 18, 2014, PSE filed a PGA natural gas tariff with the Washington Commission, which proposed to reflect changes in wholesale gas and pipeline transportation costs and changes in deferral amortization rates. The impact of PGA rates is an annual revenue decrease of \$19.9 million with no impact on net operating income. PSE expects the Washington Commission to approve this filing with an effective date of November 1, 2014.

On April 24, 2014, the Washington Commission approved PSE's request to change rates under its electric and natural gas decoupling mechanism, effective May 1, 2014. The rate change incorporated the effects of an increase to the allowed delivery revenue per customer as well as true-ups to the rate from the prior year. This represents a rate increase for electric of \$10.6 million, or 0.5% annually, and a rate decrease for natural gas of \$1.0 million, or 0.1% annually.

On April 24, 2014, the Washington Commission approved PSE's request to change rates under its electric and natural gas property tax tracker mechanism, effective May 1, 2014. The rate change incorporated the effects of an increase in the amount of property taxes paid as well as true-ups to the rate from the prior year. This represents a rate increase for electric of \$11.0 million, or 0.5% annually, and a rate increase for natural gas of \$5.6 million, or 0.6% annually.

On April 24, 2014, the Washington Commission also approved PSE's request to change rates under its electric and natural gas conservation riders, effective May 1, 2014. The rate change incorporated the effects of changes in the annual conservation budgets as well as true-ups to the rate from the prior year. The rate change represents a rate increase for electric of \$12.2 million, or 0.5% annually, and a rate increase for natural gas of \$0.3 million.

On May 23, 2014, PSE filed its 2014 power cost only rate case (PCORC). The original filing proposed a decrease of \$9.6 million (or an average of approximately 0.5%) in the Company's overall power supply costs with an effective date of December 1, 2014. PSE has filed joint testimony supporting a settlement stipulation. Customer rates will decrease by approximately \$14.9 million or 0.71% as a result of the settlement. Final rate impacts will be determined once power costs are updated in November. New rates will be in effect as of December 1, 2014, assuming the Washington Commission approves the settlement.

On June 25, 2013, the Washington Commission approved PSE's electric and natural gas decoupling mechanism and expedited rate filing (ERF) tariff filings, effective July 1, 2013. The estimated revenue impact of the decoupling mechanism is an increase for electric of \$21.4 million, or 1.0% annually, and an increase for natural gas of \$10.8 million, or 1.1% annually. The allowed decoupling revenue per customer for the recovery of delivery system costs will subsequently increase by 3.0% for the electric customers and 2.2% for the gas customers on January 1 of each year, until the conclusion of PSE's next general rate case.

The estimated revenue impact of the ERF filings is an increase for electric of \$30.7 million, or 1.5% annually, while the revenue impact for natural gas is a decrease of \$2.0 million, or 0.2% annually. The ERF filings also provided for the collection of property taxes through a property tax tracker mechanism. The property tax rate tracker will initially produce no incremental revenue, but is intended to reduce regulatory lag associated with the recovery of future increases in property tax expenses. PSE's 2012 and 2013 property taxes that are not in current rates will be recovered in later years. In its order, the Washington Commission approved a weighted cost of capital of 7.77% and a capital structure that included 48.0% common equity with a return on equity (ROE) of 9.8%.

Subsequently, certain parties to this proceeding petitioned the Washington Commission to reconsider the order. On December 13, 2013, the Washington Commission approved the settlement agreements for rates effective January 1, 2014. These settlement agreements do not materially change the revenues originally approved in June 2013. As a result, certain high volume natural gas industrial customers' rate schedules are excluded from the decoupling mechanism and will be subject to certain effects of abnormal weather, conservation impacts and changes in customer usage patterns.

On July 24, 2013, the Public Counsel Division of the Washington State Attorney General's Office (Public Counsel) and the Industrial Customers of Northwest Utilities (ICNU) each filed a petition in Thurston County Superior Court (the Court) seeking judicial reviews of various aspects of the Washington Commission's ERF and decoupling mechanism final order. The parties' petition argues that the order violates various procedural and substantive requirements of the Washington Administrative Procedure Act, and so requests that it be vacated and that the matter be remanded to the Washington Commission. Oral arguments regarding this matter were held on May 9, 2014. On June 25, 2014, the court issued a letter decision in which it affirmed the attrition adjustment (escalating factors referred to as the K-Factor) and the Washington Commission's decision not to consider the case as a general rate case, but reversed and remanded the cost of equity for further adjudication consistent with the court's decision. As a result, there will be evidentiary proceedings regarding return on equity (ROE) in January 2015 with an order anticipated in the first quarter of 2015.

On October 23, 2013, the Washington Commission approved an update on the Company's PCORC, effective November 1, 2013, which reflected decreases in the overall normalized power supply costs. This resulted in an estimated revenue decrease of \$10.5 million or 0.5% annually.

On October 30, 2013, the Washington Commission approved PSE's PGA natural gas tariff, effective November 1, 2013, which reflected changes in wholesale gas and pipeline transportation costs and changes in deferral amortization rates. The estimated revenue impact of the approved change is an increase of \$4.0 million, or 0.4% annually, with no impact on net operating income.

On December 27, 2013, the Washington Commission approved the annual true-up and rate filing to the PSE's Federal Incentive Tracker tariff, effective January 1, 2014. The true-up filing resulted in a total credit of \$58.5 million to be passed back to eligible customers over the twelve months beginning January 1, 2014. Of the total credit, \$37.8 million represents the pass-back of grant amortization and \$20.6 million represents the pass through of interest, in addition to a minor true-up associated with the 2013 rate period. This filing represents an overall average rate increase of 0.26% as compared to the previous rate.

(7) Litigation

Colstrip

PSE has a 50% ownership interest in Colstrip Units 1 and 2, and a 25% interest in Colstrip Units 3 and 4. On March 6, 2013, the Sierra Club and the Montana Environmental Information Center (MEIC) filed a Clean Air Act citizen suit against all Colstrip owners (including PSE) alleging numerous claims for relief, most which relate to alleged prevention of significant deterioration (PSD) violations. The lawsuit was filed in U.S. District of Montana, Billings Division, requesting injunctive relief and civil penalties, including a request that the owners remediate environmental damage and that \$100,000 of the civil penalties be used for beneficial mitigation projects. This lawsuit followed various Notices of Intent to Sue sent to Colstrip owners (including PSE) from the Sierra Club and the MEIC between July and December 2012. Discovery in the case is ongoing, and has been bifurcated into separate liability and remedy trials. The liability trial is currently set for August 2015, and a date for the remedy trial has yet to be determined. PSE is litigating the allegations set forth in the notices and as such, it is not reasonably possible to estimate the outcome of this matter.

Other Proceedings

The Company is also involved in litigation relating to claims arising out of its operations in the normal course of business. The Company has recorded reserves of \$1.50 million and \$1.38 million relating to these claims as of September 30, 2014 and December 31, 2013, respectively.

(8) Accumulated Other Comprehensive Income (Loss)

The following tables present the changes in the Company's accumulated other comprehensive income (loss) (AOCI) by component for the three and nine months ended September 30, 2014:

| Puget Energy Changes in AOCI, net of tax (Dollars in Thousands) | Net unrealized gain (loss) and prior service cost on pension plans | Net unrealized gain (loss) on energy derivative instruments | Net unrealized gain (loss) on interest rate swaps | Total |
|---|---|--|---|-----------|
| Balance at June 30, 2014 | \$ 47,522 | \$ (358) | \$ — | \$ 47,164 |
| Other comprehensive income (loss) before reclassifications | — | — | — | — |
| Amounts reclassified from accumulated other comprehensive income (loss), net of tax | (314) | — | — | (314) |
| Net current-period other comprehensive income (loss) | (314) | — | — | (314) |
| Balance at September 30, 2014 | \$ 47,208 | \$ (358) | \$ — | \$ 46,850 |

| Puget Energy Changes in AOCI, net of tax (Dollars in Thousands) | Net unrealized gain (loss) and prior service cost on pension plans | Net unrealized gain (loss) on energy derivative instruments | Net unrealized gain (loss) on interest rate swaps | Total |
|---|---|--|---|-----------|
| Balance at December 31, 2013 | \$ 48,514 | \$ (705) | \$ (94) | \$ 47,715 |
| Other comprehensive income (loss) before reclassifications | (945) | — | — | (945) |
| Amounts reclassified from accumulated other comprehensive income (loss), net of tax | (361) | 347 | 94 | 80 |
| Net current-period other comprehensive income (loss) | (1,306) | 347 | 94 | (865) |
| Balance at September 30, 2014 | \$ 47,208 | \$ (358) | \$ — | \$ 46,850 |

| Puget Sound Energy Changes in AOCI, net of tax (Dollars in Thousands) | Net unrealized gain (loss) and prior service cost on pension plans | Net unrealized gain (loss) on energy derivative instruments | Net unrealized gain (loss) on treasury interest rate swaps | Total |
|---|---|--|---|-------------|
| Balance at June 30, 2014 | \$ (83,980) | \$ (1,309) | \$ (6,149) | \$ (91,438) |
| Other comprehensive income (loss) before reclassifications | — | — | — | — |
| Amounts reclassified from accumulated other comprehensive income (loss), net of tax | 1,880 | — | 79 | 1,959 |
| Net current-period other comprehensive income (loss) | 1,880 | — | 79 | 1,959 |
| Balance at September 30, 2014 | \$ (82,100) | \$ (1,309) | \$ (6,070) | \$ (89,479) |

| Puget Sound Energy Changes in AOCI, net of tax (Dollars in Thousands) | Net unrealized gain (loss) and prior service cost on pension plans | Net unrealized gain (loss) on energy derivative instruments | Net unrealized gain (loss) on treasury interest rate swaps | Total |
|---|---|--|---|-------------|
| Balance at December 31, 2013 | \$ (87,405) | \$ (2,027) | \$ (6,307) | \$ (95,739) |
| Other comprehensive income (loss) before reclassifications | (945) | — | — | (945) |
| Amounts reclassified from accumulated other comprehensive income (loss), net of tax | 6,250 | 718 | 237 | 7,205 |
| Net current-period other comprehensive income (loss) | 5,305 | 718 | 237 | 6,260 |
| Balance at September 30, 2014 | \$ (82,100) | \$ (1,309) | \$ (6,070) | \$ (89,479) |

Details about these reclassifications out of accumulated other comprehensive income (loss) for the three and nine months ended September 30, 2014 and three and nine months ended September 30, 2013, respectively, are as follows:

| Puget Energy (Dollars in Thousands) | Affected line item in the statement where net income (loss) is presented | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|--|--|------------|------------------------------------|------------|
| | | 2014 | 2013 | 2014 | 2013 |
| Details about accumulated other comprehensive income (loss) components | | Amount reclassified from accumulated other comprehensive income (loss) | | | |
| Net unrealized gain (loss) and prior service cost on pension plans: | | | | | |
| Amortization of prior service cost | (a) | \$ 483 | \$ 499 | \$ 1,452 | \$ 1,498 |
| Amortization of net gain (loss) | (a) | — | (1,104) | (388) | (3,315) |
| | Total before tax | 483 | (605) | 1,064 | (1,817) |
| | Tax (expense) or benefit | (169) | 212 | (703) | (197) |
| | Net of Tax | \$ 314 | \$ (393) | \$ 361 | \$ (2,014) |
| Net unrealized gain (loss) on energy derivative instruments: | | | | | |
| Commodity contracts: electric derivatives | Purchased electricity | — | — | (534) | 164 |
| | Tax (expense) or benefit | — | — | 187 | (57) |
| | Net of Tax | \$ — | \$ — | \$ (347) | \$ 107 |
| Net unrealized gain (loss) on interest rate swaps: | | | | | |
| Interest rate contracts | Interest expense | — | (1,247) | (144) | (3,886) |
| | Tax (expense) or benefit | — | 436 | 50 | 1,360 |
| | Net of Tax | \$ — | \$ (811) | \$ (94) | \$ (2,526) |
| Total reclassification for the period | Net of Tax | \$ 314 | \$ (1,204) | \$ (80) | \$ (4,433) |

(a) These accumulated OCI components are included in the computation of net periodic pension cost (see Note 5 for additional details).

| Puget Sound Energy (Dollars in Thousands) | | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|--|--|------------|------------------------------------|-------------|
| | | 2014 | 2013 | 2014 | 2013 |

| Total reclassification for the period | | \$ (1,959) | \$ (3,485) | \$ (7,205) | \$ (13,100) |

(a) These accumulated OCI components are included in the computation of net periodic pension cost (see Note 5 for additional details).

(9) Other

Jefferson County Public Utility District (JPUD)

PSE completed the sale of its electric infrastructure assets located in Jefferson County and the transition of electrical services in the county to JPUD on March 31, 2013. The proceeds from the sale exceeded the transferred assets' net carrying value of \$46.7 million, resulting in a pre-tax gain of approximately \$60.0 million. In its 2010 order on the subject, the Washington Commission stated that PSE must maintain such separate accounts and accounting entries as are necessary to preserve fully the Washington Commission's opportunity to consider in an appropriate proceeding the disposition of proceeds of sale and rate treatment of this transaction. As a result, the gain was deferred and recorded as a regulatory liability. On October 31, 2013, PSE filed an accounting petition for a Washington Commission order authorizing PSE to retain \$45.0 million of the gain and to return \$15.0 million to its remaining customers over a period of forty-eight months. On March 28, 2014, intervenors filed response testimonies containing their respective proposals for allocation of the gain, which included a proposal of up to \$57.0 million to customers and \$3.0 million to PSE. A final order was rendered on September 11, 2014 authorizing PSE to retain \$7.5 million of the gain and return \$52.7 million to customers. The customer portion is booked to a regulatory liability account in other current liabilities and accruing interest at PSE's after-tax rate of return. PSE and the parties to the case filed a joint motion to amend the final order to allow for the customer portion to be paid to customers through a bill credit in the month of December 2014. The Commission granted the joint motion on October 1, 2014.

Credit Facilities

In April 2014, the Company completed a one-year extension to the liquidity and hedging facilities of PSE, extending the maturity from February 2018 to April 2019 and updating or clarifying the definitions of other terms and conditions of the facilities from when they were committed in 2013. At this same time, the Company completed an amendment to the senior secured credit facility of Puget Energy, extending the maturity from February 2017 to April 2018, updating the fee structure, eliminating a financial covenant and updating or clarifying the definitions of other terms and conditions of the facility.

Term Loans

In June 2014, Puget Energy entered into three bilateral term loans, with two and three year maturities, which in total, equal \$299.0 million. The proceeds of these term loans were used to pay off the outstanding Puget Energy revolving credit facility balance, which subsequently allows the Company to carry the debt with lower interest expense. The terms, conditions and covenants are consistent with each other and the credit facility agreements, with the exception of maturity and price.

Treasury Grants

PSE received two treasury grants with a total amount of \$107.9 million, related to Baker and Snoqualmie hydro facilities. These grants have been accounted as a reduction to utility plant and will be amortized over the life of the plant based on the Washington Commission authorization. The previous treatment of grants by the Washington Commission is to amortize the grants over 10 years instead of the plant life. The grants are recorded as a regulatory liability due to the 10 year amortization and treatment.

(10) Related Party Transactions

On October 10, 2014, U.S. Bancorp announced the appointment of Kimberly Harris to its board of directors effective October 20, 2014. Ms. Harris is the president and chief executive officer of both Puget Sound Energy, Inc. and Puget Energy, Inc. U.S. Bancorp is the parent company of U.S. Bank N.A., which directly or through its subsidiaries or affiliates provides credit, banking, investment and trust services to both Puget Energy and Puget Sound Energy. For the nine months ended September 30, 2014, Puget Energy and Puget Sound Energy paid a total of approximately \$0.7 million in fees and interest to U.S. Bank N.A. and its subsidiaries or affiliates.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the financial statements and related notes thereto included elsewhere in this report on Form 10-Q. The discussion contains forward-looking statements that involve risks and uncertainties, such as Puget Energy, Inc. (Puget Energy) and Puget Sound Energy, Inc. (PSE) objectives, expectations and intentions. Words or phrases such as "anticipates," "believes," "continues," "could," "estimates," "expects," "future," "intends," "may," "might," "plans," "potential," "predicts," "projects," "should," "will likely result," "will continue" and similar expressions are intended to identify certain of these forward-looking statements. However, these words are not the exclusive means of identifying such statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. Puget Energy's and PSE's actual results could differ materially from results that may be anticipated by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section entitled "Forward-Looking Statements" included elsewhere in this report and in the section entitled "Risk Factors" included in Part I, Item 1A in Puget Energy's and Puget Sound Energy's Form 10-K for the period ended December 31, 2013. Except as required by law, neither Puget Energy nor PSE undertakes any obligation to revise any forward-looking statements in order to reflect events or circumstances that may subsequently arise. Readers are urged to carefully review and consider the various disclosures made in this report and in Puget Energy's and PSE's other reports filed with the United States Securities and Exchange Commission (SEC) that attempt to advise interested parties of the risks and factors that may affect Puget Energy's and PSE's business, prospects and results of operations.

Overview

Puget Energy is an energy services holding company and all of its operations are conducted through its subsidiary PSE, a regulated electric and natural gas utility company. PSE is the largest electric and natural gas utility in the state of Washington, primarily engaged in the business of electric transmission, distribution and generation and natural gas distribution. Puget Energy's business strategy is to generate stable cash flows by offering reliable electric and natural gas service in a cost-effective manner through PSE. In 2009, Puget Holdings LLC (Puget Holdings) completed its merger with Puget Energy. Puget Holdings is owned by a consortium of long-term infrastructure investors including Macquarie Infrastructure Partners I, Macquarie Infrastructure Partners II, Macquarie Capital Group Limited, FSS Infrastructure Trust, the Canada Pension Plan Investment Board, the British Columbia Investment Management Corporation, and the Alberta Investment Management Corporation. As a result of the merger, all of Puget Energy's common stock is indirectly owned by Puget Holdings. Puget Energy accounted for the merger as a business combination and all its assets and liabilities were recorded at fair value as of the merger date. PSE's basis of accounting continues to be on a historical basis and PSE's financial statements do not include any purchase accounting adjustments. Puget Energy and PSE are collectively referred to herein as "the Company."

The Company's mission is to be a safe, dependable, and efficient utility. The Company's objectives are to focus on safety, employees, operational excellence, customer service and financial strength. The Company's strategies are aligned to achieve the objectives and ultimately the Company's mission.

These commitments and investments related to utility infrastructure and customer service may give rise to expenditures that may not be recovered timely through the ratemaking process. PSE has undertaken several initiatives to reduce the volatility and regulatory lag in the business. During 2013, PSE completed an ERF, which is a limited scope rate proceeding, and established a decoupling mechanism for gas operations and electric transmission, distribution and administrative costs. The ERF proceeding established baseline rates on which the decoupling mechanism will operate on going forward. The ERF also established a property tax tracker mechanism in which any difference between amounts in rates and property tax payments will be deferred and recovered in an annual filing based on the annual cash payments for the year.

The decoupling mechanism allows PSE to recover costs on a per customer basis rather than on a consumption basis. Included in the decoupling petition was a rate plan that allows PSE an opportunity to earn its authorized rate of return without the need for another general rate case process during the rate plan period. The rate plan included predetermined annual increases to PSE's allowed electric and natural gas revenue. This plan, with limited exceptions (Power Cost Only Rate Cases (PCORC) or emergency rate relief), requires PSE to file a general rate case no sooner than April 1, 2015 and no later than April 1, 2016. The decoupling mechanism also allows for decoupling revenue on a per customer basis to subsequently increase by 3.0% for electric customers and 2.2% for natural gas customers on January 1 of each year, until the conclusion of PSE's next general rate case.

Washington state law also requires PSE to pursue conservation initiatives that promote efficient use of energy. PSE's mandate to pursue conservation initiatives may have a negative impact on the electric business financial performance due to lost margins from lower sales volumes as power costs are not part of the decoupling mechanism. This mandate, however, will only have a slight negative impact on natural gas business financial performance due to the natural gas business being almost fully decoupled.

PSE generates revenue and cash flow primarily from the sale of electric and natural gas services to residential and commercial customers within a service territory covering approximately 6,000 square miles, principally in the Puget Sound region of the state of Washington. PSE is in balance between its load requirements and generation resources through the next couple of years. The Company's external financing requirements principally reflect the cash needs of its construction program, its schedule of maturing debt and certain operational needs. PSE requires access to bank and capital markets to meet its financing needs.

For the three and nine months ended September 30, 2014, as compared to the same periods in 2013, PSE's net income was affected primarily by the following factors: (1) changes in unrealized gain and loss in derivatives instruments for energy contracts; (2) an increase in electric and natural gas margin; and (3) changes in other income due to lower regulatory income and interest and dividend income, partially offset by a gain on disposal of Jefferson County assets.

Further detail on each of these primary drivers, as well as other factors affecting performance, is set forth in this "Overview" section, as well as in other sections of the Management's Discussion & Analysis.

Factors and Trends Affecting PSE's Performance. PSE's regulatory requirements and operational needs require the investment of substantial capital in 2014 and future years. Because PSE intends to seek recovery of these investments through the regulatory process, its financial results depend heavily upon favorable outcomes from that process. Further, PSE's financial performance is heavily influenced by general economic conditions in its service territory, which affect customer growth and use-per-customer and thus utility sales, as well as by its customers' conservation investments, which reduces energy sales. The principal business, economic and other factors that affect PSE's operations and financial performance include:

- The rates PSE is allowed to charge for its services;
- PSE's ability to recover power costs that are included in rates which are based on volume;
- PSE's ability to manage costs during the rate stay out period through March 31, 2016;
- Weather conditions, including snow-pack affecting hydrological conditions;
- Regulatory decisions allowing PSE to recover purchased power and fuel costs, on a timely basis;
- PSE's ability to supply electricity and natural gas, either through company-owned generation, purchase power contracts or by procuring natural gas or electricity in wholesale markets;
- Equal sharing between PSE and its customers of earnings which exceed PSE's authorized rate of return;
- Availability and access to capital and the cost of capital;
- Regulatory compliance costs, including those related to new and developing federal regulations of electric system reliability, state regulations of natural gas pipelines and federal, state and local environmental laws and regulations;
- Wholesale commodity prices of electricity and natural gas;
- Increasing depreciation; and
- Federal, state, and local taxes.

Regulation of PSE Rates and Recovery of PSE Costs. The rates that PSE is allowed to charge for its services influence its financial condition, results of operations and liquidity. PSE is highly regulated and the rates that it charges its retail customers are approved by the Washington Utilities and Transportation Commission (Washington Commission). The Washington Commission has traditionally required that these rates be determined based, to a large extent, on historic test year costs plus weather normalized assumptions about hydroelectric conditions and power costs in the relevant rate year. Incremental customer growth and sales typically have not provided sufficient revenue to cover year-to-year cost growth, thus rate increases are required. If, in a particular year, PSE's costs are higher than what is currently allowed to be recovered in rates, revenue may not be sufficient to permit PSE to earn its allowed return. In addition, the Washington Commission determines whether expenses and investments are reasonable and prudent in providing electric and natural gas service. If the Washington Commission determines that part of PSE's costs do not meet the standard applied, those costs may be disallowed partially or entirely and not recovered in rates. With the implementation of PSE's electric and gas decoupling mechanisms, which went into effect on July 1, 2013, PSE is able to recover its delivery-system cost based on number of customers as opposed to volumetric sales.

Recent Rate Proceedings

On December 27, 2013, the Washington Commission approved the annual true-up and rate filing to the PSE's Federal Incentive Tracker tariff, effective January 1, 2014. The true-up filing resulted in a total credit of \$58.5 million to be passed back to eligible customers over the twelve months beginning January 1, 2014. Of the total credit, \$37.8 million represents the pass-back of grant amortization and \$20.6 million represents the pass through of interest, in addition to a minor true-up associated with the 2013 rate period. This filing represents an overall average rate increase of 0.26%.

Power Cost Only Rate Case (PCORC). On October 23, 2013, the Washington Commission approved an update on the Company's PCORC, effective November 1, 2013, which reflected decreases in the overall normalized power supply costs. This resulted in an estimated revenue decrease of \$10.5 million or 0.5% annually.

On May 23, 2014, PSE filed its 2014 PCORC. The original filing proposed a decrease of \$9.6 million (or an average of approximately 0.5%) in the Company's overall power supply costs with an effective date of December 1, 2014. PSE has filed joint testimony supporting a settlement stipulation. Customer rates will decrease by approximately \$14.9 million or 0.71% as a result of the settlement. Final rate impacts will be determined once power costs are updated in November and after the Commission makes a determination on PSE's application for the sale of Electron. New rates will be in effect as of December 1, 2014, assuming the Commission approves the terms of the settlement later this fall.

Expedited Rate Filing (ERF). On February 4, 2013, PSE filed revised tariffs seeking to update its rates established in its base rate proceedings in May 2012. This filing was limited in scope and rate impact. This filing was primarily intended to establish baseline rates on which the decoupling mechanisms, described below, are proposed to operate. The filing also provided for the collection of property taxes through a property tax tracker mechanism based on cash payments of property tax made by PSE during the year. Any difference between the amounts in rates and property tax payments will be deferred and recovered in a property tax tracker based on the annual cash payments for the year.

Decoupling. On October 25, 2012, PSE and the Northwest Energy Coalition (NWECC) filed a petition for an order seeking approval of an electric and a natural gas decoupling mechanism for the recovery of its delivery-system costs and authority to record accounting entries associated with the mechanisms. After the petition and supporting testimony were filed, the Washington Commission held two technical conferences to allow interested stakeholders to further discuss the proposed decoupling mechanisms. PSE also responded to inquiries of interested stakeholders seeking additional information about the decoupling proposal.

On March 4, 2013, PSE and the NWECC, taking this process into account, reached an agreement on certain modifications to the decoupling mechanisms and filed an amended petition and testimony in support of these modifications to the original decoupling proposal. The Washington Commission's regulatory staff (Commission Staff) filed testimony in support of the revised proposal on the same day. Included in the amended decoupling petition was a rate plan that allows PSE an opportunity to earn its authorized rate of return without the need for another general rate case process over the plan period. The rate plan includes predetermined annual increases (K factor) to PSE's allowed electric and gas revenue which are effective January of each year. Under this plan, PSE, with limited exceptions, would be allowed to file its next general rate case no sooner than April 1, 2015 and no later than April 1, 2016 unless agreed to otherwise by the parties. PSE would continue to be authorized to file for rate changes under existing rate mechanisms such as the Power Cost Adjustment (PCA) and Purchased Gas Adjustment (PGA) mechanism, and emergency rate relief during the rate plan period.

PSE's rates related to the cumulative deferred decoupling mechanism, accrued by each rate group through the calendar year and effective May 1 in the following year, will be subject to a 3.0% "soft cap" on rate increases. Any amount in excess of the soft cap will be added to the decoupling tracker in subsequent rate periods, subject to a 3.0% soft cap on rate increases in the subsequent year. In addition, PSE and its customers share 50.0% each in any earnings in excess of the authorized rate of return of 7.77%.

The customer's share of any over earnings will be returned to customers over the subsequent 12 month period beginning May 1 of each year.

Washington Commission Decision. PSE filed a settlement agreement with the Washington Commission on March 22, 2013. The agreement was intended to settle all issues regarding decoupling, the power purchase agreement with TransAlta Centralia and the ERF, which included the property tax tracker. The Washington Commission placed these filings under a common procedural schedule. On June 25, 2013, the Washington Commission issued three final orders resolving the amended decoupling petition, the ERF filing and the Petition for Reconsideration of the Washington Commission's decision with respect to the power purchase agreement with Transalta. One of the orders rejected the multi-party settlement agreement between PSE, NWEC and Commission Staff due to uncertainty regarding the legality of approving a settlement that would resolve multiple filings. An order also approved PSE's ERF filing with a small change to its cost of capital from 7.80% to 7.77% to update long term debt costs. The second order approved the property tax tracker discussed above. In addition, this order approved the amended decoupling and rate plan filing as filed by PSE and NWEC on March 4, 2013 with the requirement that PSE update the underlying ERF rates for the change in cost of capital, and with the further condition that PSE and the customers will share 50.0% each in earnings in excess of the 7.77% authorized rate of return. The third order granted in part, and denied in part, PSE's Petition for Reconsideration with respect to the power purchase agreement with Transalta, clarifying certain portions of the Washington Commission's original order.

The property tax rate tracker will reduce regulatory lag associated with the recovery of future increases in property tax expenses. PSE's property taxes which are not in current rates will be recovered in later years. The allowed decoupling revenue per customer for the recovery of delivery system costs will subsequently increase by 3.0% for the electric customers and 2.2% for the gas customers on January 1 of each year, until the conclusion of PSE's next general rate case.

Subsequently, certain parties to this proceeding petitioned the Washington Commission to reconsider the order, and the parties filed settlement agreements relating to the petitions for reconsideration. On December 13, 2013, the Washington Commission approved the settlement agreements for rates effective January 1, 2014. These settlement agreements do not materially change the revenues originally approved in June 2013. As a result, certain high volume natural gas industrial customers rate schedules are excluded from the decoupling mechanism and will be subject to certain effects of abnormal weather, conservation impacts and changes in customer usage patterns.

On July 24, 2013, the Public Counsel Division of the Washington State Attorney General's Office (Public Counsel) and the Industrial Customers of Northwest Utilities (ICNU) each filed a petition in Thurston County Superior Court (the Court) seeking judicial review of various aspects of the Washington Commission's ERF and decoupling mechanism final order. The parties' petition argues that the order violates various procedural and substantive requirements of the Washington Administrative Procedure Act, and so requests that it be vacated and that the matter be remanded to the Washington Commission. Oral arguments regarding this matter were held on May 9, 2014. On June 25, 2014, the court issued a letter decision in which it affirmed the attrition adjustment K-Factor and the Washington Commission's decision not to consider the case as a general rate case, but reversed and remanded the cost of equity for further adjudication consistent with the court's decision. As a result, there will be evidentiary proceedings regarding return on equity (ROE) in January 2015 with an order anticipated in the first quarter of 2015.

Other Proceedings. On April 24, 2014, the Washington Commission approved PSE's request to change rates under its electric and natural gas decoupling mechanism, effective May 1, 2014. The rate change incorporated the effects of an increase to the allowed delivery revenue per customer as well as true-ups to the rate from the prior year. This represents a rate increase for electric of \$10.6 million, or 0.5% annually, and a rate decrease for natural gas of \$1.0 million, or 0.1% annually.

On April 24, 2014, the Washington Commission approved PSE's request to change rates under its electric and natural gas property tax tracker mechanism, effective May 1, 2014. The rate change incorporated the effects of an increase in the amount of property taxes paid as well as true-ups to the rate from the prior year. This represents a rate increase for electric of \$11.0 million, or 0.5% annually, and a rate increase for natural gas of \$5.6 million, or 0.6% annually.

On April 24, 2014, the Washington Commission also approved PSE's request to change rates under its electric and natural gas conservation riders, effective May 1, 2014. The rate change incorporated the effects of changes in the annual conservation budgets as well as true-ups to the rate from the prior year. The rate change represents a rate increase for electric of \$12.2 million, or 0.5% annually, and a rate increase for natural gas of \$0.3 million.

Electric Rates

PSE has a PCA mechanism that provides for the recovery of power costs from customers or refunding of power cost savings to customers in the event those costs vary from the "power cost baseline" level of power costs. The "power cost baseline" levels are set, in part, based on normalized assumptions about weather and hydroelectric conditions. Excess power costs, or an unfavorable imbalance, or power cost savings, or a favorable imbalance, are apportioned between PSE and its customers pursuant to the graduated scale set forth in the PCA mechanism.

The graduated scale is as follows:

| Annual Power Cost Variability | Customers' Share | Company's Share |
|----------------------------------|------------------|-----------------|
| +/- \$20 million | 0% | 100% |
| +/- \$20 million - \$40 million | 50 | 50 |
| +/- \$40 million - \$120 million | 90 | 10 |
| +/- \$120 + million | 95 | 5 |

PSE had an unfavorable PCA imbalance for the three months ended September 30, 2014, which was \$9.8 million above the "power cost baseline" level, of which \$4.1 million was apportioned to customers. PSE had an unfavorable PCA imbalance for the nine months ended September 30, 2014 which was \$24.1 million above the "power cost baseline" level, of which \$4.1 million was apportioned to customers. This compares to a favorable imbalance for the three and nine months ended September 30, 2013 of \$12.3 million and \$51.3 million, respectively, of which \$10.7 million and \$20.2 million were apportioned to customers, respectively.

As discussed above, the Washington Commission approved rate increases related to the recovery of PSE's electric delivery system costs. The following table sets forth the associated electric rate adjustments approved by the Washington Commission and the corresponding impact to PSE's annual revenue based on the effective dates:

| Type of Rate Adjustment | Effective Date | Average Percentage Increase (Decrease) in Rates | Annual Increase (Decrease) in Rates (Dollars in Millions) |
|-------------------------|------------------|---|---|
| Conservation Rider | May 1, 2014 | 0.5% | \$ 12.2 |
| Decoupling Rate Filing | May 1, 2014 | 0.5 | 10.6 |
| Property Tax Tracker | May 1, 2014 | 0.5 | 11.0 |
| PCORC | November 1, 2013 | (0.5) | (10.5) |
| Decoupling Rate Filing | July 1, 2013 | 1.0 | 21.4 |
| Expedited Rate Filing | July 1, 2013 | 1.5 | 30.7 |

In addition, PSE will be increasing the allowed delivery revenue per customer under the decoupling filing by 3.0% for electric customers on January 1 of each year until the conclusion of PSE's next general rate case.

Natural Gas Rates

PSE has a PGA mechanism in retail natural gas rates to recover differences in actual natural gas supply and transportation costs and those included in rates charged to customers. Changes in the PGA rates affect PSE's revenue, but do not impact net income as the changes to revenue are offset by increased or decreased purchased gas and gas transportation costs.

On October 30, 2013, the Washington Commission approved PSE's PGA natural gas tariff, effective on November 1, 2013, which reflected changes in wholesale gas and pipeline transportation costs and changes in deferral amortization rates. The estimated revenue impact of the approved change is an increase of \$4.0 million, or 0.4% annually, with no impact on net operating income.

On September 18, 2014, PSE filed a PGA natural gas tariff with the Washington Commission, which proposed to reflect changes in wholesale gas and pipeline transportation costs and changes in deferral amortization rates. The impact of PGA rates is an annual revenue decrease of \$19.9 million with no impact on net operating income. PSE expects the Washington Commission to approve this filing with an effective date of November 1, 2014.

As discussed above, the Washington Commission approved rate increases related to the recovery of PSE's gas delivery system costs. The following table sets forth the associated natural gas rate adjustments, including those for the PGA, that were approved by the Washington Commission and the corresponding impact to PSE's annual revenue based on the effective dates:

| Type of Rate Adjustment | Effective Date | Average Percentage Increase (Decrease) in Rates | Annual Increase (Decrease) in Rates (Dollars in Millions) |
|--------------------------|------------------|---|---|
| Purchased Gas Adjustment | November 1, 2014 | (2.1)% | \$ (19.9) |
| Decoupling Rate Filing | May 1, 2014 | (0.1)% | (1.0) |
| Property Tax Tracker | May 1, 2014 | 0.6 | 5.6 |
| Purchased Gas Adjustment | November 1, 2013 | 0.4 | 4.0 |
| Decoupling Rate Filing | July 1, 2013 | 1.1 | 10.8 |
| Expedited Rate Filing | July 1, 2013 | (0.2) | (2.0) |

In addition, PSE will be increasing the allowed delivery revenue per customer under the decoupling filing by 2.2% for natural gas customers on January 1 of each year until the conclusion of PSE's next general rate case.

Weather Conditions. Weather conditions in PSE's service territory have a significant impact on customer energy usage, affecting PSE's billed revenue and energy supply expenses. PSE's operating revenue and associated energy supply expenses are not generated evenly throughout the year. While both PSE's electric and natural gas sales are generally greatest during winter months, variations in energy usage by customers occur from season to season and month to month within a season, primarily as a result of weather conditions. PSE normally experiences its highest retail energy sales, and subsequently higher power costs, during the winter heating season in the first and fourth quarters of the year and its lowest sales in the third quarter of the year. Varying wholesale electric prices and the amount of hydroelectric energy supplies available to PSE also make quarter-to-quarter comparisons difficult.

Revenue Decoupling. While fluctuations in weather conditions will continue to affect PSE's billed revenue and energy supply expenses from month to month, PSE's decoupling mechanisms which went into effect on July 1, 2013 for electric and gas operations, will diminish the impact of weather on operating revenue and net income. The Washington Commission has allowed PSE to record a monthly adjustment to its electric and gas operating revenues related to electric transmission and distribution, gas operations and general administrative costs from residential, commercial and industrial customers to eliminate the effects of abnormal weather, conservation impacts and changes in usage patterns per customer with the exception of the electric business where power costs are not part of the decoupling mechanism. As a result, these electric and gas revenues will be recovered on a per customer basis regardless of actual consumption levels. The energy supply costs, which are part of the PCA and PGA mechanisms, are not included in the decoupling mechanism. The revenue recorded under the decoupling mechanisms will be affected by customer growth and not actual consumption. Following each calendar year, PSE will bill or refund the difference between allowed decoupling revenue and the corresponding actual revenue to affected customers during the following May to April time period.

Effective January 1, 2014, certain high volume natural gas industrial customers' rate schedules are excluded from the decoupling mechanism. As a result, PSE will be subject to certain effects of abnormal weather, conservation impacts and changes in customer usage patterns for these customers.

Customer Demand. PSE expects the number of natural gas customers to grow at rates slightly above the number of electric customers. PSE also expects energy usage by both residential electric and natural gas customers to continue a long-term trend of slow decline primarily due to continued energy efficiency improvements.

Access to Debt Capital. PSE relies on access to bank borrowings and short-term money markets as sources of liquidity and longer-term capital markets to fund its utility construction program, to meet maturing debt obligations and other capital expenditure requirements not satisfied by cash flow from its operations or equity investment from its parent, Puget Energy. Neither Puget Energy nor PSE have any debt outstanding whose maturity would accelerate upon a credit rating downgrade. However, a ratings downgrade could adversely affect the Company's ability to renew existing, or obtain access to new credit facilities and could increase the cost of such facilities. For example, under Puget Energy's and PSE's credit facilities, the borrowing costs increase as their respective credit ratings decline due to increases in credit spreads and commitment fees. If PSE is unable to access debt capital on reasonable terms, its ability to pursue improvements or acquisitions, including generating capacity, which may be relied on for future growth and to otherwise implement its strategy, could be adversely affected. PSE monitors the credit environment and expects to continue to be able to access the capital markets to meet its short-term and long-term borrowing needs. PSE's credit

facilities expire in 2019 and Puget Energy's senior secured credit facility expires in 2018. (See discussion on credit facilities in the section entitled "Financing Program - Credit Facilities and Commercial Paper").

Regulatory Compliance Costs and Expenditures. PSE's operations are subject to extensive federal, state and local laws and regulations. These regulations cover electric system reliability, gas pipeline system safety and energy market transparency, among other areas. Environmental laws and regulations related to air and water quality, including climate change and endangered species protection, waste handling and disposal (including generation byproducts such as coal ash), remediation of contamination and siting new facilities also impact the Company's operations. PSE must spend significant amounts to fulfill requirements set by regulatory agencies, many of which have greatly expanded mandates, and on measures including, but not limited to, resource planning, remediation, monitoring, pollution control equipment and emissions-related abatement and fees in order to comply with these regulatory requirements.

Compliance with these or other future regulations, such as those pertaining to climate change and generation by-products, could require significant capital expenditures by PSE and may adversely affect PSE's financial position, results of operations, cash flows and liquidity.

Other Challenges and Strategies

Competition. PSE's electric and natural gas utility retail customers currently do not have the ability to choose their electric or natural gas supplier and therefore, PSE's business has historically been recognized as a natural monopoly. However, PSE faces increasing competition for sales to its retail customers. Alternative methods of electric energy generation, including solar and other self-generation methods, compete with PSE for sales to existing electric retail customers. In addition, PSE's natural gas customers may elect to use heating oil, propane or other fuels instead of using and purchasing natural gas from PSE. Further, PSE faces competition from public utility districts and municipalities that want to establish their own municipal-owned utility, as a result of which PSE may lose a number of customers in its service territory.

Energy Supply. As noted in PSE's Integrated Resource Plan (IRP) filed with the Washington Commission, PSE projects that beginning in 2017, its future energy needs will exceed current resources in its supply portfolio. The IRP identifies reductions in contractual supplies of energy and capacity available under certain long-term power purchase agreements, requiring replacement of supplies to meet projected demands. Therefore, PSE's IRP sets forth a multi-part strategy of implementing energy efficiency programs and pursuing additional renewable resources (primarily wind) and additional base load natural gas-fired generation to meet the growing needs of its customers. If PSE cannot acquire needed energy supply resources at a reasonable cost, it may be required to purchase additional power in the open market at a cost that could, in the absence of regulatory relief, significantly increase its expenses and reduce earnings and cash flows.

Infrastructure Investment. PSE is investing in its utility infrastructure and customer service functions in order to meet regulatory requirements, serve customers' energy needs and replace aging infrastructure. These investments and operating requirements give rise to significant growth in depreciation, amortization and operating expenses, which are not recovered through the ratemaking process in a timely manner.

Operational Risks Associated With Generating Facilities. PSE owns and operates coal, natural gas-fired, hydroelectric, wind-powered, solar and oil-fired generating facilities. The operation of electric generating facilities involves risks that can adversely affect energy output and efficiency levels, including facility shutdowns due to equipment and process failures or fuel supply interruptions. PSE does not have business interruption insurance coverage to cover replacement power costs.

Grant County PUD Purchase Power Contract. On February 27, 2014, Grant County PUD discovered a sixty-five foot long, two inch wide crack in a spillway pier at its Wanapum Development Project. PSE is party to a purchased power contract with Grant County PUD, pursuant to which PSE takes 0.64% of the output from the project and pays a proportional share of the operating cost of the project. Grant County PUD has lowered the reservoir level 26 feet below normal to begin both interim and permanent repairs. Interim repairs are expected to be completed in December 2014, which will allow the reservoir to be raised 16 feet, still 10 feet below normal. This condition will remain for the foreseeable future. The Chelan County PUD Rock Island Project, which is upstream from Wanapum Development Project, will still be impacted, but expected to run on a more regular basis. An engineering assessment of the crack repairs and water flow protocols continue to be developed and it is currently not possible to predict either when the crack will be permanently repaired, or the impact to power costs, if any, at this time. Any additional power cost increases are subject to the Company's PCA mechanism sharing bands.

Markets For Intangible Power Attributes. The Company is actively engaged in monitoring the development of the commercial markets for such intangible power attributes as renewable energy credits and carbon financial instruments. The Company supports the development of regional and national markets for these products that are open, transparent and liquid.

IBEW Contract. The term of PSE and the International Brotherhood of Electrical Workers Local Union 77 (IBEW) contract expired on March 31, 2014. Since the expiration, the IBEW has been working without a contract. There are approximately 850 PSE employees represented by the IBEW who perform work in customer service and electric operations. PSE extended an offer to the IBEW on April 2, 2014, which the IBEW sent out to vote to its members with a recommendation not to ratify. The IBEW vote resulted in a rejection of the proposal. PSE extended another offer to the IBEW on June 24, 2014. The IBEW negotiation committee declined to send the proposal out to vote to its members. Since July, the parties have met with a federal mediator six times. On August 12, 2014, the parties entered into a no strike/no lockout agreement through March 31, 2015, preventing a work stoppage. On September 10, 2014, PSE extended another offer to the IBEW, which PSE believes enables PSE to attract and retain a highly skilled workforce to safely and efficiently perform their duties. The IBEW sent the proposal to vote with a recommendation not to ratify. On October 9, 2014, the IBEW notified PSE that the vote resulted in a rejection. The terms of the prior agreement continue to apply and the Company will continue to negotiate in good faith.

Results of Operations

Puget Sound Energy

The following discussion should be read in conjunction with the unaudited consolidated financial statements and the related notes included elsewhere in this document. The following discussion provides the significant items which impacted PSE's results of operations:

| Puget Sound Energy | Three Months Ended September 30, | | | Nine Months Ended September 30, | | |
|--|-------------------------------------|------------------|-----------------------------|------------------------------------|-------------------|-----------------------------|
| (Dollars in Thousands) | 2014 | 2013 | Favorable/ (Unfavorable) | 2014 | 2013 | Favorable/ (Unfavorable) |
| Operating revenue: | | | | | | |
| Electric | | | | | | |

NON-GAAP FINANCIAL MEASURES - Electric and Gas Margins

The following discussion includes financial information prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP), as well as two other financial measures, electric margin and gas margin, that are considered “non-GAAP financial measures.” Generally, a non-GAAP financial measure is a numerical measure of a company's financial performance, financial position or cash flows that exclude (or include) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. The presentation of electric margin and gas margin is intended to supplement an understanding of PSE's operating performance. Electric margin and gas margin are used by PSE to determine whether PSE is collecting the appropriate amount of energy costs from its customers to allow recovery of operating costs. PSE's electric margin and gas margin measures may not be comparable to other companies' electric margin and gas margin measures. Furthermore, these measures are not intended to replace operating income as determined in accordance with GAAP as an indicator of operating performance.

Electric Margin

Electric margin represents electric sales to retail and transportation customers less the cost of generating and purchasing electric energy sold to customers, including transmission costs to bring electric energy to PSE's service territory. The following table displays the details of PSE's electric margin changes:

| Electric Margin (Dollars in Thousands) | Three Months Ended September 30, | | Favorable/ (Unfavorable) | Nine Months Ended September 30, | | Favorable/ (Unfavorable) |
|---|-------------------------------------|-------------------|-----------------------------|------------------------------------|---------------------|-----------------------------|
| | 2014 | 2013 | | 2014 | 2013 | |
| Electric operating revenue: | | | | | | |
| Residential sales | \$ 200,776 | \$ 211,298 | (5.0)% | \$ 796,983 | \$ 818,483 | (2.6)% |
| Commercial sales | 207,889 | 213,444 | (2.6) | 637,089 | 627,562 | 1.5 |
| Industrial sales | 27,289 | 29,684 | (8.1) | 81,211 | 79,208 | 2.5 |
| Other retail sales, including unbilled revenues | 4,940 | 5,360 | (7.8) | (41,834) | (17,636) | (137.2) |
| Total retail sales | 440,894 | 459,786 | (4.1) | 1,473,449 | 1,507,617 | (2.3) |
| Transportation sales | 2,764 | 1,965 | 40.7 | 7,133 | 6,145 | 16.1 |
| Sales to other utilities and marketers | 10,427 | 15,677 | (33.5) | 31,049 | 33,819 | (8.2) |

* Not meaningful

¹ As reported on PSE's Consolidated Statement of Income.

² Electric margin does not include any allocation for amortization/depreciation expense or electric generation operation and maintenance expense.

Electric margin increased \$17.0 million and \$47.4 million, or 5.3% and 4.5%, to \$339.0 million and \$1,095.7 million from \$322.0 million and \$1,048.4 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013. Following is a discussion of significant items that impact electric operating revenue and electric energy costs, which are included in electric margin:

Electric Operating Revenue

Electric operating revenues decreased \$9.0 million, or 1.9%, to \$468.5 million from \$477.5 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease in operating revenues was primarily due to lower electric retail sales of \$18.9 million and sales to other utilities and marketers of \$5.3 million. The decrease was partially offset by higher miscellaneous operating revenues of \$8.4 million and decoupling revenue related to under-collection of \$5.9 million. These items are discussed in more detail below.

Electric operating revenues increased \$23.9 million, or 1.5%, to \$1,577.7 million from \$1,553.8 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase in operating revenues was primarily due to higher decoupling revenue related to under-collection of \$32.1 million and miscellaneous operating revenues of \$27.7 million. The increase was partially offset by lower electric retail sales of \$34.2 million. These items are discussed in more detail below.

Electric retail sales decreased \$18.9 million, or 4.1%, to \$440.9 million from \$459.8 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease in electric retail sales primarily resulted from a revenue decrease of \$2.4 million due to lower retail electricity usage of 24,627 Megawatt Hours (MWhs), or 0.5% during the three months ended September 30, 2014 as compared to the same period in the prior year. The decrease was driven by a net revenue decrease of \$16.5 million due to the rate increase primarily related to PSE's ERF and decoupling rate increase which became effective on July 1, 2013.

Electric retail sales decreased \$34.2 million, or 2.3%, to \$1,473.4 million from \$1,507.6 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease in electric retail sales primarily resulted from a revenue decrease of \$27.3 million due to lower retail electricity usage of 278,106 MWhs, or 1.8% during the nine months ended September 30, 2014 as compared to the same period in the prior year. The decrease was driven by a net revenue decrease of \$6.9 million due to the rate increase primarily related to PSE's ERF and decoupling rate increase which became effective on July 1, 2013.

Sales to other utilities and marketers decreased \$5.3 million, or 33.5%, to \$10.4 million from \$15.7 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily driven by a decrease of \$4.8 million due to lower electricity usage of 143,556 MWhs, or 30.8%, by other utilities and marketers for the three months ended September 30, 2014.

Sales to other utilities and marketers decreased \$2.8 million, or 8.2%, to \$31.0 million from \$33.8 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily driven by a decrease of \$4.3 million due to lower electricity usage of 147,312 MWhs, or 12.6%, by other utilities and marketers for three months ended September 30, 2014. The decrease was partially offset by an increase of \$1.5 million due to higher wholesale electricity prices.

Decoupling revenues of \$2.8 million and \$29.0 million were recorded for the three and nine months ended September 30, 2014, respectively, due to lower volumetric revenues compared to the allowed decoupled revenues per customer. This is compared to a reduction of \$3.1 million for the three and nine months ended September 30, 2013. The decoupling revenue or liability will be recovered from or passed back to customers through a future rate filing beginning May 1, 2015.

Other electric operating revenue increased \$8.4 million to \$11.6 million from \$3.2 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily the result of an increase of \$5.0 million due to higher non-core gas sales and an increase of \$3.9 million due to higher miscellaneous electric revenue for the three months ended September 30, 2014.

Other electric operating revenue increased \$27.7 million to \$37.1 million from \$9.3 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily the result of an increase of \$15.5 million due to higher non-core gas sales and an increase of \$11.5 million due to higher miscellaneous electric revenue.

Electric Energy Costs

Purchased electricity expense decreased \$24.8 million, or 26.7%, to \$68.0 million from \$92.8 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily the result of a \$10.3 million decrease related to lower energy purchases and an \$8.2 million market price offset related to generation plant in the PCA mechanism for the three months ended September 30, 2014. The PCA mechanism provides the customer an offset for the market power purchases built into current rates that will not be incurred during the deferral period. The decrease was partially offset by an increase of \$4.6 million in transmission expense.

Purchased electricity expense decreased \$16.6 million, or 4.4%, to \$363.8 million from \$380.4 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily the result of a \$14.1 million market price offset related to generation plant in the PCA mechanism for the nine months ended September 30, 2014. The PCA mechanism provides the customer an offset for the market power purchases built into current rates that will not be incurred during

the deferral period. The decrease was partially offset by an increase of \$11.9 million in transmission expense and a \$0.6 million increase primarily related to higher energy purchases.

To meet customer demand, PSE economically dispatches resources in its power supply portfolio, such as, fossil-fuel generation, owned and contracted hydroelectric energy and long-term contracted power. However, depending principally upon availability of hydroelectric and wind energy, plant availability, fuel prices and/or changing load as a result of weather, PSE may sell surplus power or purchase deficit power in the wholesale market. PSE manages its regulated power portfolio through short-term and intermediate-term off-system physical purchases and sales as well as through other risk management techniques.

Electric generation fuel expense increased \$15.8 million, or 20.6%, to \$92.5 million from \$76.7 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily due to a \$14.2 million increase in fuel expense at PSE's combustion turbine facilities. The increase was primarily due to higher volumes of electricity generation from PSE's combustion turbine facilities.

Electric generation fuel expense increased \$26.2 million, or 14.9%, to \$202.7 million from \$176.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily due to a \$24.9 million increase in fuel expense at PSE's combustion turbine facilities.

Residential exchange credits increased \$17.0 million, or 122.0%, to \$31.0 million from \$13.9 million for the three months ended September 30, 2014 as compared to the same period in 2013 as a result of higher electric residential and farm customer sales volumes associated with the Bonneville Power Administration (BPA) Residential Exchange Program (REP). The REP credit is a pass-through tariff item with a corresponding credit in electric operating revenue, with no impact on net income. An additional \$62.9 million of REP benefit will be provided to customers between June 1, 2014 and May 31, 2015.

Residential exchange credits increased \$33.1 million, or 64.4%, to \$84.6 million from \$51.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013 as a result of higher electric residential and farm customer sales volumes associated with the BPA REP. The REP credit is a pass-through tariff item with a corresponding credit in electric operating revenue, with no impact on net income.

Natural Gas Margin

Gas margin is natural gas sales to retail and transportation customers less the cost of natural gas purchased, including transportation costs to bring natural gas to PSE's service territory. The following table displays the details of PSE's natural gas margin:

| Natural Gas Margin (Dollars in Thousands) | Three Months Ended September 30, | | | Nine Months Ended September 30, | | |
|--|-------------------------------------|-----------|-----------------------------|------------------------------------|------------|-----------------------------|
| | 2014 | 2013 | Favorable/ (Unfavorable) | 2014 | 2013 | Favorable/ (Unfavorable) |
| Gas operating revenue: | | | | | | |
| Residential sales | \$ 64,616 | \$ 67,727 | (4.6)% | \$ 439,418 | \$ 442,070 | (0.6)% |
| Commercial sales | 38,266 | 38,756 | (1.3) | 197,444 | 200,064 | (1.3) |
| Industrial sales | 3,993 | 4,470 | (10.7) | 17,872 | 19,475 | (8.2) |
| Total retail sales | 106,875 | 110,953 | (3.7) | 654,734 | 661,609 | (1.0) |
| Transportation sales | 4,150 | 4,187 | (0.9) | 12,595 | 12,177 | 3.4 |
| Decoupling revenue | 7,112 | 2,093 | * | 15,205 | 2,093 | * |
| Other | 3,265 | 3,563 | (8.4) | 10,246 | 10,410 | (1.6) |
| Total gas operating revenues ¹ | 121,402 | 120,796 | 0.5 | 692,780 | 686,289 | 0.9 |
| Minus purchased gas costs ¹ | 42,550 | 45,889 | 7.3 | 310,128 | 315,359 | 1.7 |
| Natural gas margin ² | \$ 78,852 | \$ 74,907 | 5.3 % | \$ 382,652 | \$ 370,930 | 3.2 % |

* Not meaningful

¹ As reported on PSE's Consolidated Statement of Income.

² Gas margin does not include any allocation for amortization/depreciation expense or electric generation operations and maintenance expense.

Natural gas margin increased \$3.9 million and \$11.7 million, or 5.3% and 3.2%, to \$78.9 million and \$382.7 million from \$74.9 million and \$370.9 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013. Following is a discussion of significant items of gas operating revenue and gas energy costs which are included in gas margin:

Gas Operating Revenue

Gas operating revenues increased \$0.6 million and \$6.5 million, or 0.5% and 0.9%, to \$121.4 million and \$692.8 million from \$120.8 million and \$686.3 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013. The increase for the three and nine months ended September 30, 2014 was due primarily to an increase in decoupling revenue that was partially offset by a decrease in natural gas retail sales, as discussed in more detail below.

Decoupling revenues of \$7.1 million and \$15.2 million were recorded for the three and nine months ended September 30, 2014, respectively, due to lower volumetric revenues compared to the allowed decoupled revenues per customer. This is compared to \$2.1 million recorded for the three and nine months ended September 30, 2013. The decoupling revenue or liability will be recovered from or passed back to customers through a future rate filing beginning May 1, 2015.

Natural gas retail sales decreased \$4.1 million, or 3.7%, to \$106.9 million from \$111.0 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily due to a decrease of \$8.0 million, or 7.3%, in natural gas therm sales and offset by the result of a net revenue increase of \$4.0 million for the three months ended September 30, 2014 primarily due to the rate increase primarily related to PSE's decoupling rate increase which became effective on July 1, 2013 and PGA rate increase which became effective on November 1, 2013.

Natural gas retail sales decreased \$6.9 million, or 1.0%, to \$654.7 million from \$661.6 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily due to a decrease of \$15.3 million, or 2.3%, in natural gas therm sales and offset by the result of a net revenue increase of \$8.4 million for the nine months ended September 30, 2014 primarily due to the rate increase primarily related to PSE's decoupling rate increase which became effective on July 1, 2013 and PGA rate increase which became effective on November 1, 2013.

Gas Energy Costs

Purchased gas expenses decreased \$3.3 million, or 7.3%, to \$42.6 million from \$45.9 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily due to a reduction in customer usage of 7.3% and partially offset by higher natural gas costs reflected in PGA rates effective November 1, 2013 for the three months ended September 30, 2014 as compared to the same period in 2013.

Purchased gas expenses decreased \$5.2 million, or 1.7%, to \$310.1 million from \$315.4 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease was primarily due to a reduction in customer usage of 2.3% and partially offset by higher natural gas costs reflected in PGA rates effective November 1, 2013 for the nine months ended September 30, 2014 as compared to the same period in 2013.

The PGA mechanism provides the rates used to determine natural gas costs based on customer usage. The rate decrease was the result of decreasing costs of wholesale natural gas. The PGA mechanism allows PSE to recover expected natural gas supply and transportation costs and defer, as a receivable or payable, any natural gas supply and transportation costs that exceed or fall short of this expected natural gas cost amount in PGA mechanism rates, including accrued interest. PSE is authorized by the Washington Commission to accrue carrying costs on PGA receivable and payable balances. A receivable balance in the PGA mechanism reflects an underrecovery of natural gas cost through rates. A payable balance reflects overrecovery of natural gas cost through rates. The PGA mechanism receivable balance at September 30, 2014 was \$32.4 million.

Non-utility Operating Revenue

Non-utility operating revenue increased \$4.0 million to \$4.0 million from \$0.1 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by \$3.3 million revenue related to PSE's Biogas sales during the three months ended September 30, 2014.

Non-utility operating revenue increased \$11.3 million to \$11.8 million from \$0.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by \$10.5 million revenue related to PSE's Biogas sales during the nine months ended September 30, 2014.

Other Operating Expenses

Net unrealized gain on derivative instruments decreased \$41.5 million to a loss of \$32.6 million from a gain of \$8.9 million for the three months ended September 30, 2014 as compared to the same period in 2013. The net loss during the three months ended September 30, 2014 was due to a loss of \$18.8 million related to PSE's electric derivative instruments and a loss of \$13.9 million related to natural gas derivative instruments. This compares to gains of \$2.3 million and \$6.6 million related to PSE's electric and natural gas derivative instruments, respectively, during the same period in 2013. The decrease was primarily due to an increase in the price of natural gas. The wholesale electricity forward prices were flat over the three-year tenor of PSE's energy supply hedging program.

Net unrealized gain on derivative instruments decreased \$62.5 million to a loss of \$8.3 million from a gain of \$54.3 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The net loss during the nine months ended September 30, 2014 was due to a loss of \$1.4 million related to PSE's natural gas derivative instruments and a loss of \$6.9 million related to electric derivative instruments. This compares to gains of \$45.6 million and \$8.7 million related to PSE's electric and natural gas derivative instruments, respectively, during the same period in 2013. The decrease was primarily due to an increase in the price of natural gas and the wholesale electricity forward prices were flat over the three-year tenor of PSE's energy supply hedging program.

Utility operations and maintenance expense increased \$2.1 million, or 1.7%, to \$132.1 million from \$130.0 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by an increase of \$3.0 million in customer service expenses, primarily related to \$3.0 million in uncollectible accounts expense, an increase of \$1.5 million in gas operations expense and an increase of \$1.0 million in electric transmission & distribution expenses. The increase was offset by a decrease of \$2.3 million in production operations and maintenance expenses and \$1.3 million in administrative & general expense, for the three months ended September 30, 2014.

Utility operations and maintenance expense increased \$21.6 million, or 5.5%, to \$411.1 million from \$389.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by an increase of \$14.1 million in customer service expenses, mostly related to \$13.0 million in uncollectible accounts expense, an increase of \$9.5 million in electric transmission & distribution expenses, an increase of \$1.7 million in gas operations expense and an increase of \$1.3 million in low income program expenses. Additionally, offsetting the increase was a decrease of \$2.3 million in administrative & general expenses for the nine months ended September 30, 2014. The decrease was primarily driven by a decrease in outside services employed expenses.

Non-utility operations and maintenance expense increased \$3.6 million to \$5.9 million from \$2.3 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by an increase of \$3.3 million in expense related to PSE's Biogas sales during the three months ended September 30, 2014.

Non-utility operations and maintenance expense increased \$9.0 million to \$17.5 million from \$8.4 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily driven by an increase of \$9.0 million in expense related to PSE's Biogas sales during the nine months ended September 30, 2014.

Depreciation expense increased \$1.7 million and \$6.8 million, or 1.8% or 2.5%, to \$93.5 million and \$277.1 million from \$91.8 million and \$270.3 million for the three and nine months ended September 30, 2014 as compared to the same period in 2013. For the nine months ended September 30, 2014, the increase was primarily due to electric depreciation in the amount of \$9.8 million caused by additional capital expenditures placed into service, net of retirements, such as Snoqualmie Falls and Baker hydroelectric generating facility projects, which went into service in September 2013 and July 2013, respectively. Gas depreciation also increased in the amount of \$2.6 million, mainly due to new additions, for the nine months ended September 30, 2014. The increase was offset by a decrease of \$5.6 million in common utility plant depreciation, mainly due to the retirement of computer equipment since June 2013.

Amortization expense increased \$7.0 million, or 131.3%, to \$12.4 million from \$5.4 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was due to a reduction in regulatory credits of \$6.1 million for the three months ended September 30, 2014 mainly related to Ferndale and Snoqualmie fixed costs. Also contributing to the increase was the deferral of generating plants fixed costs of \$4.7 million for the three months ended September 30, 2014.

Amortization expense increased \$18.1 million, or 103.4%, to \$35.7 million from \$17.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was due to a reduction in regulatory credits of \$10.6 million for the nine months ended September 30, 2014 mainly related to Ferndale and Snoqualmie fixed costs. Also contributing to the increase was \$4.9 million of non-PTC regulatory debits and a \$2.1 million increase related to CIS project additions related to new computer software which was amortized over the nine months ended September 30, 2014.

Conservation amortization increased \$2.4 million, or 11.6%, to \$23.0 million from \$20.6 million for the three months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily due to a decrease of \$0.1 million in gas conservation amortization, net of the increase of \$2.5 million in electric conservation amortization for the three months ended September 30, 2014.

Conservation amortization decreased \$2.7 million, or 3.5%, to \$74.6 million from \$77.2 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily due to a decrease of \$7.5 million in gas conservation amortization, net of the increase of \$4.8 million in electric conservation amortization for the nine months ended September 30, 2014. The decrease is due to lower retail sales in 2014 as compared to 2013 as this is a volumetric recovery mechanism.

Taxes other than Income Tax increased \$15.3 million, or 7.2%, to \$228.5 million from \$213.3 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The increase was primarily due to an increase in property and municipal tax for electric utilities of \$10.8 million, along with an increase property and municipal tax for gas utilities of \$4.0 million for the nine months ended September 30, 2014.

Other Income and Income Tax Expense

Other income increased \$1.8 million, or 19.1%, to \$11.0 million from \$9.2 million for the three months ended September 30, 2014, as compared to the same period in 2013. The increase was primarily due to an increase of \$7.5 million in gains on disposal of property related to the sale of Jefferson County assets, offset by a decrease of \$1.5 million in allowance for funds used during construction (AFUDC), and a decrease of \$3.8 million in interest and dividend income for the three months ended September 30, 2014, as compared to the same period in 2013.

Other income decreased \$12.2 million, or 38.2%, to \$19.8 million from \$32.1 million for the nine months ended September 30, 2014, as compared to the same period in 2013. The decrease was primarily due to a decrease of \$9.2 million in AFUDC income mostly related to the decrease in average construction work in process, a decrease of \$8.9 million in interest and dividend income, offset by a gain of \$7.5 million on the disposal of Jefferson County assets for the nine months ended September 30, 2014, as compared to the same period in 2013.

Income tax expense decreased \$13.7 million, or 94.2%, to \$0.8 million from \$14.5 million for the three months ended September 30, 2014 as compared to the same period in 2013, primarily due to a decrease in federal income tax due to lower operating income.

Income tax expense decreased \$29.7 million, or 28.2%, to \$75.7 million from \$105.5 million for the nine months ended September 30, 2014 as compared to the same period in 2013, due to lower federal income tax as a result of lower operating income.

Puget Energy

Summary Results of Operations

All the operations of Puget Energy are conducted through its subsidiary PSE. Puget Energy's net income (loss) for the three and nine months ended September 30, 2014 and the same periods in 2013 are as follows:

| Benefit/(Expense) | Three Months Ended | | | Nine Months Ended | | |
|--|--------------------|-----------------|-----------------|-------------------|-------------------|----------------|
| | September 30, | | Percent Change | September 30, | | Percent Change |
| (Dollars in Thousands) | 2014 | 2013 | | 2014 | 2013 | |
| PSE net income | \$ 3,057 | \$ 26,605 | (88.5)% | \$ 181,973 | \$ 233,205 | (22.0)% |
| Other operating revenue | (235) | — | * | (235) | 111 | * |
| Net unrealized gain on energy derivative instruments | — | — | * | 570 | 2,952 | (80.7) |
| Non-utility expense and other | 2,987 | 3,958 | (24.5) | 8,823 | 12,029 | (26.7) |
| Other income | 1 | — | * | 2 | 1 | 100.0 |
| Non-hedged interest rate swap (expense) income | (323) | (470) | * | (2,430) | 1,790 | * |
| Interest expense ¹ | (24,217) | (30,147) | 19.7 | (76,933) | (103,070) | 25.4 |
| Income tax benefit (expense) | 5,772 | 8,594 | (32.8) | 23,977 | 29,901 | (19.8) |
| Puget Energy net income (loss) | \$ (12,958) | \$ 8,540 | (251.7)% | \$ 135,747 | \$ 176,919 | (23.3)% |

* Not meaningful

¹ Puget Energy's interest expense includes elimination adjustments of intercompany interest on short-term debt.

Puget Energy's net income (loss) for the three and nine months ended September 30, 2014 was \$(13.0) million and \$135.7 million with operating revenue of \$593.7 million and \$2.3 billion as compared to a net income of \$8.5 million and \$176.9 million with operating revenue of \$598.3 million and \$2.2 billion for the same period in 2013. Other than the items discussed above regarding PSE, which also impacted Puget Energy's net income, interest expense was also a significant factor that impacted Puget Energy's net income.

Interest expense decreased \$5.9 million, or 19.7%, to \$24.2 million from \$30.1 million for the three months ended September 30, 2014 as compared to the same period in 2013. The decrease for the three months ended September 30, 2014 was primarily due to an increase of \$4.7 million in mark-to-market gains on hedged interest rate swap contracts, and a decrease of \$1.2 million in interest expense related to Puget Energy's revolving senior secured credit facility as its balance was reduced by \$26.0 million during the second quarter of 2013; and the commitment fees and spreads were reduced due to a rating upgrade in the first quarter of 2014.

Interest expense decreased \$26.1 million, or 25.4%, to \$76.9 million from \$103.1 million for the nine months ended September 30, 2014 as compared to the same period in 2013. The decrease for the nine months ended September 30, 2014 was primarily due to an increase of \$3.6 million in mark-to-market gains on hedged interest rate swap contracts, and a decrease of \$3.1 million in interest expense related to Puget Energy's revolving senior secured credit facility as its balance was reduced by \$80.0 million

during the third quarter of 2013; and the commitment fees and spreads were reduced due to rating upgrade in the first quarter of 2014.

Capital Requirements

Contractual Obligations and Commercial Commitments

There have been no material changes to the contractual obligations set forth in Part II, Item 7 in Puget Energy's and PSE's combined annual report on Form 10-K for the year ended December 31, 2013.

The following are the Company's aggregate availability under commercial commitments as of September 30, 2014:

| Puget Sound Energy and Puget Energy (Dollars in Thousands) | Amount of Available Commitments Expiration Per Period | | | | |
|--|--|------|-----------|--------------|------------|
| | Total | 2014 | 2015-2017 | 2018-2019 | Thereafter |
| PSE liquidity facility ¹ | \$ 625,000 | \$ — | \$ — | \$ 625,000 | \$ — |
| PSE energy hedging facility ¹ | 350,000 | — | — | 350,000 | — |
| Inter-company short-term debt ² | 1,067 | — | — | — | 1,067 |
| Total PSE commercial commitments | \$ 976,067 | \$ — | \$ — | \$ 975,000 | \$ 1,067 |
| Puget Energy revolving credit facility ³ | 800,000 | — | — | 800,000 | — |
| Less: Inter-company short-term debt elimination ² | (1,067) | — | — | — | (1,067) |
| Total Puget Energy commercial commitments | \$ 1,775,000 | \$ — | \$ — | \$ 1,775,000 | \$ — |

¹ As of September 30, 2014, PSE had credit facilities totaling \$1.0 billion under which \$25.0 million had been drawn. These facilities consisted of a \$650.0 million liquidity facility to fund operating expenses and serve as a backstop to the Company's commercial paper program, and a \$350.0 million hedging facility to support electric and natural gas hedging. The \$650.0 million liquidity facility includes a swingline feature allowing same day availability on borrowings up to \$75.0 million. The credit facilities also have an accordion feature that, upon the banks' approval, would increase the total size of these facilities to \$1.450 billion. As of September 30, 2014, no loans or letters of credit were outstanding under the PSE energy hedging facility, a \$25.0 million loan was outstanding under the PSE liquidity facility and no amount was outstanding under the commercial paper program. Outside of the credit agreements, PSE had a \$4.2 million letter of credit in support of a long-term transmission contract and a \$1.0 million letter of credit in support of natural gas purchases in Canada. The credit agreements are syndicated among numerous lenders. All other terms and conditions of that facility remain unchanged from when it was committed in 2013.

² As of September 30, 2014, PSE had a revolving credit facility with Puget Energy in the form of a promissory note to borrow up to \$30.0 million of which \$28.9 million was drawn.

³ As of September 30, 2014, Puget Energy had a revolving credit facility totaling \$800.0 million, which expires April 2018. The revolving credit facility is syndicated among numerous lenders. The revolving credit facility also has an accordion feature that, upon the banks' approval, would increase the size of the facility to \$1.3 billion.

Utility Construction Program

PSE's construction programs for generating facilities, the electric transmission system and the natural gas and electric distribution systems are designed to meet regulatory requirements and customer growth and to support reliable energy delivery. Construction expenditures, excluding equity AFUDC, were \$343.6 million for the nine months ended September 30, 2014. Presently planned utility construction expenditures, excluding AFUDC, are as follows:

| Capital Expenditure Projections (Dollars in Thousands) | 2014 | 2015 | 2016 |
|---|------------|------------|------------|
| Total energy delivery, technology and facilities expenditures | \$ 514,278 | \$ 649,230 | \$ 622,476 |

The program is subject to change based upon general business, economic and regulatory conditions. Utility construction expenditures and any new generation resource expenditures may be funded from a combination of sources which may include cash from operations, short-term debt, long-term debt and/or equity. PSE's planned capital expenditures may result in a level of spending that will exceed its cash flow from operations. As a result, execution of PSE's strategy is dependent in part on continued access to capital markets.

Capital Resources

Cash From Operations

Puget Sound Energy

Cash generated from operations for the nine months ended September 30, 2014 increased by \$38.1 million from \$639.3 million generated during the same period in 2013. The increase was the primarily the result of \$70.1 million increase in collection of accounts receivable and \$11.2 million increase related to materials and supplies. Offsetting this increase in cash flow was a \$36.3 million cash outflow related to regulatory liabilities.

Puget Energy

Cash generated from operations for the nine months ended September 30, 2014 was \$605.2 million, an increase of \$25.9 million from the \$579.3 million generated during the nine months ended September 30, 2013. The net increase was positively impacted by \$38.1 million from cash provided by the operating activities of PSE, as previously discussed. The above increase was offset by \$11.7 million cash outflow related to interest.

Financing Program

The Company's external financing requirements principally reflect the cash needs of its construction program, its schedule of maturing debt and certain operational needs. The Company anticipates refinancing the redemption of bonds or other long-term borrowings with its credit facilities and/or the issuance of new long-term debt. Access to funds depends upon factors such as Puget Energy's and PSE's credit ratings, prevailing interest rates and investor receptivity to investing in the utility industry, Puget Energy and PSE.

Credit Facilities and Commercial Paper

Proceeds from PSE's short-term borrowings and sales of commercial paper are used to provide working capital and the interim funding of utility construction programs. Puget Energy and PSE continue to have reasonable access to the capital and credit markets.

Puget Sound Energy Credit Facilities

PSE has two unsecured revolving credit facilities which provide, in aggregate, \$1.0 billion of short-term liquidity needs. These facilities consist of a \$650.0 million revolving liquidity facility (which includes a liquidity letter of credit facility and a swingline facility) to be used for general corporate purposes, including a backstop to the Company's commercial paper program and a \$350.0 million revolving energy hedging facility (which includes an energy hedging letter of credit facility). The \$650.0 million liquidity facility includes a swingline feature allowing same day availability on borrowings up to \$75.0 million. The credit facilities also have an accordion feature which, upon the banks' approval, would increase the total size of these facilities to \$1.450 billion.

In April 2014, the Company completed a one-year extension on both of the liquidity and hedging facilities, extending the maturity from February 2018 to April 2019, and updating or clarifying the definitions of other terms and conditions of the facilities from when they were committed in 2013. The credit agreements are syndicated among numerous lenders and contain usual and customary affirmative and negative covenants that, among other things, place limitations on PSE's ability to transact with affiliates, make asset dispositions and investments or permit liens to exist. The credit agreements also contain a financial covenant of total debt to total capitalization of 65% or less. PSE certifies its compliance with such covenants to participating banks each quarter. As of September 30, 2014, PSE was in compliance with all applicable covenant ratios.

The credit agreements provide PSE with the ability to borrow at different interest rate options. The credit agreements allow PSE to borrow at the bank's prime rate or to make floating rate advances at the LIBOR plus a spread that is based upon PSE's credit rating. PSE must pay a commitment fee on the unused portion of the credit facilities. The spreads and the commitment fee depend on PSE's credit ratings. As of the date of this report, the spread to the LIBOR is 1.25% and the commitment fee is 0.175%.

As of September 30, 2014, \$25 million was drawn and outstanding under PSE's \$650.0 million liquidity facility. No amounts were drawn and outstanding under the \$350.0 million energy hedging facility. No letters of credit were outstanding under either facility, and no amounts were outstanding under the commercial paper program. Outside of the credit agreements, PSE had a \$4.2 million letter of credit in support of a long-term transmission contract and a \$1.0 million letter of credit in support of natural gas purchases in Canada.

Demand Promissory Note

On June 1, 2006, PSE entered into a revolving credit facility with Puget Energy, in the form of a credit agreement and a Demand Promissory Note (Note) pursuant to which PSE may borrow up to \$30.0 million from Puget Energy subject to approval by Puget Energy. Under the terms of the Note, PSE pays interest on the outstanding borrowings based on the lower of the weighted-average interest rates of PSE's outstanding commercial paper interest rate or PSE's senior unsecured revolving credit facility. Absent such borrowings, interest is charged at one-month LIBOR plus 0.25%. At September 30, 2014, \$28.9 million was outstanding under the Note. The outstanding balance and the related interest under the Note are eliminated by Puget Energy upon consolidation of PSE's financial statements.

Puget Energy Credit Facilities

At September 30, 2014, Puget Energy maintained an \$800.0 million revolving senior secured credit facility. In April, 2014, the Company completed an amendment to the senior secured credit facility, extending the maturity from February 2017 to April 2018, updating the fee structure, eliminating a financial covenant and updating or clarifying the definitions of other terms and conditions of the facility. The Puget Energy revolving senior secured credit facility also has an accordion feature which, upon the banks' approval, would increase the size of the facility to \$1.3 billion.

The revolving senior secured credit facility provides Puget Energy the ability to borrow at different interest rate options and includes variable fee levels. Interest rates may be based on the bank's prime rate or London Interbank Offered Rate (LIBOR), plus a spread based on Puget Energy's credit ratings. Puget Energy must pay a commitment fee on the unused portion of the facility. As of September 30, 2014, there was no amount drawn and outstanding under the facility. As a result of Puget Energy's credit rating upgrade in 2014, the spread over LIBOR was 1.75% and the commitment fee was 0.275% as of the date of this report. Puget Energy entered into interest rate swap contracts to manage the interest rate risk associated with the credit facility or similar variable rate debt (see Note 3 and the "Interest Rate Risk" section in Item 3).

The revolving senior secured credit facility contains usual and customary affirmative and negative covenants. The agreement also contains a Maximum Leverage Ratio financial covenant as defined in the agreement governing the senior secured credit facility. As of September 30, 2014, Puget Energy was in compliance with all applicable covenants.

Term Loans

In June 2014, Puget Energy entered into three bilateral term loans, with two and three year maturities, which in total, equal \$299.0 million. The proceeds of the term loans were used to pay off the outstanding Puget Energy revolving credit facility balance, which subsequently allows the Company to carry the debt with lower interest expense. All other terms, conditions and covenants are consistent with each other and the credit facility agreements, with the exception of maturity and price.

Dividend Payment Restrictions

The payment of dividends by PSE to Puget Energy is restricted by provisions of certain covenants applicable to long-term debt contained in PSE's electric and natural gas mortgage indentures. At September 30, 2014, approximately \$395.3 million of unrestricted retained earnings was available for the payment of dividends under the most restrictive mortgage indenture covenant.

Beginning February 6, 2009, pursuant to the terms of the Washington Commission merger order, PSE may not declare or pay dividends if PSE's common equity ratio, calculated on a regulatory basis, is 44.0% or below except to the extent a lower equity ratio is ordered by the Washington Commission. Also, pursuant to the merger order, PSE may not declare or make any distribution unless on the date of distribution PSE's corporate credit/issuer rating is investment grade, or, if its credit ratings are below investment grade, PSE's ratio of Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) to interest expense for the most recently ended four fiscal quarter periods prior to such date is equal to or greater than 3 to one. The common equity ratio, calculated on a regulatory basis, was 47.6% at September 30, 2014 and the EBITDA to interest expense was 4.5 to one for the twelve months then ended.

PSE's ability to pay dividends is also limited by the terms of its credit facilities, pursuant to which PSE is not permitted to pay dividends during any Event of Default (as defined in the facilities), or if the payment of dividends would result in an Event of Default, such as failure to comply with certain financial covenants.

Puget Energy's ability to pay dividends is also limited by the merger order issued by the Washington Commission. Pursuant to the merger order, Puget Energy may not declare or make a distribution unless on such date Puget Energy's ratio of consolidated EBITDA to consolidated interest expense for the four most recently ended fiscal quarters prior to such date is equal to or greater than 2 to one. Puget Energy's EBITDA to interest expense was 3.2 to one for the twelve months ended September 30, 2014.

At September 30, 2014, the Company was in compliance with all applicable covenants, including those pertaining to the payment of dividends.

Debt Restrictive Covenants

The type and amount of future long-term financings for PSE may be limited by provisions in PSE's electric and natural gas mortgage indentures.

PSE's ability to issue additional secured debt may also be limited by certain restrictions contained in its electric and natural gas mortgage indentures. Under the most restrictive tests, at September 30, 2014, PSE could issue:

- Approximately \$2.1 billion of additional first mortgage bonds under PSE's electric mortgage indenture based on approximately \$3.5 billion of electric bondable property available for issuance, subject to an interest coverage ratio limitation of 2.0 times net earnings available for interest (as defined in the electric utility mortgage), which PSE exceeded at September 30, 2014; and
- Approximately \$291.0 million of additional first mortgage bonds under PSE's natural gas mortgage indenture based on approximately \$410.2 million of gas bondable property available for issuance, subject to a combined gas and electric interest coverage test of 1.75 times net earnings available for interest and a gas interest coverage test of 2.0 times net

earnings available for interest (as defined in the natural gas utility mortgage), both of which PSE exceeded at September 30, 2014.

At September 30, 2014, PSE had approximately \$7.1 billion in electric and natural gas ratebase to support the interest coverage ratio limitation test for net earnings available for interest.

Upon approval of the merger in 2009, the Company was required to refinance its debt in place at the time of the merger. The Company has met this refinancing requirement as of September 30, 2014.

Other

New Accounting Pronouncements

For the discussion of new accounting pronouncements, see Note 2 of the notes to the consolidated financial statements.

Colstrip

PSE has a 50% ownership interest in Colstrip Units 1 and 2, and a 25% interest in Colstrip Units 3 and 4. On March 6, 2013, the Sierra Club and the Montana Environmental Information Center (MEIC) filed a Clean Air Act citizen suit against all Colstrip owners (including PSE) alleging numerous claims for relief, most which relate to alleged prevention of significant deterioration (PSD) violations. The lawsuit was filed in U.S. District of Montana, Billings Division, requesting injunctive relief and civil penalties, including a request that the owners remediate environmental damage and that \$100,000 of the civil penalties be used for beneficial mitigation projects. This lawsuit followed various Notices of Intent to Sue sent to Colstrip owners (including PSE) from the Sierra Club and the MEIC between July and December 2012. Discovery in the case is ongoing, and has been bifurcated into separate liability and remedy trials. The liability trial is currently set for August 2015, and a date for the remedy trial has yet to be determined. PSE is litigating the allegations set forth in the notices and as such, it is not reasonably possible to estimate the outcome of this matter.

EPA Draft Rule 111(d)

On June 2, 2014, the EPA issued a proposed rule under Section 111(d) of the Clean Air Act designed to regulate greenhouse gas emissions from existing power plants. The proposed rule includes state-specific goals and guidelines for states to develop plans for meeting these goals. The comment period has been extended, and PSE is continuing review of this proposed rule and work with key stakeholders to monitor it as the rule moves forward towards possible final implementation. PSE cannot yet provide a determination of how the final rule, if any, may impact PSE or its existing generation facilities.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Energy Portfolio Management

PSE maintains energy risk policies and procedures to manage commodity and volatility risks and the related effects on credit, tax, accounting, financing and liquidity. PSE's Energy Management Committee (EMC) establishes PSE's risk management policies and procedures and monitors compliance. The EMC is comprised of certain PSE officers and is overseen by the PSE Board of Directors.

PSE's objective is to minimize commodity price exposure and risks associated with volumetric variability in the natural gas and electric portfolios and related effects. It is not engaged in the business of assuming risk for the purpose of speculative trading. PSE hedges open natural gas and electric positions to reduce both the portfolio risk and the volatility risk in prices. The exposure position is determined by using a probabilistic risk system that models 250 simulations of how PSE's natural gas and power portfolios will perform under various weather, hydroelectric and unit performance conditions.

The nature of serving regulated electric customers with its portfolio of owned and contracted electric generation resources exposes PSE and its customers to some volumetric and commodity price risks within the sharing mechanism of the PCA. PSE's natural gas retail customers are served by natural gas purchase contracts which expose PSE's customers to commodity price risks through the PGA mechanism. All purchased natural gas costs are recovered through customer rates with no direct impact on PSE. Therefore, wholesale market transactions and related hedging strategies are focused on reducing costs and risks where feasible, thus reducing volatility in costs in the portfolio. PSE's energy risk portfolio management function monitors and manages these risks using analytical models and tools. In order to manage risks effectively, PSE enters into forward physical electric and natural gas purchase and sale agreements, fixed-for-floating swap contracts, and commodity call/put options. The forward physical electric contracts are both fixed and variable (at index), while the physical natural gas contracts are variable. To fix the price of wholesale electricity and natural gas, PSE may enter into fixed-for-floating swap (financial) contracts. PSE also utilizes natural gas call and put options as an additional hedging instrument to increase the hedging portfolio's flexibility to react to commodity price

fluctuations. Approximately 85% of these contracts, including Normal Purchase Normal Sale (NPNS) transactions, are entered into with investment grade counterparties which, in the majority of cases, do not require collateral calls on the contracts.

The following table presents the fair values of the Company's energy derivative instruments, recorded on the balance sheets:

Puget Energy and Puget Sound Energy

(Dollars in thousands)

| | September 30, 2014 | | December 31, 2013 | |
|---------------------------------|--------------------|------------------|-------------------|------------------|
| | Assets | Liabilities | Assets | Liabilities |
| Electric portfolio: | | | | |
| Current | \$ 4,197 | \$ 19,263 | \$ 14,565 | \$ 17,731 |
| Long-term | 2,963 | 13,909 | 3,914 | 19,581 |
| Total electric derivatives | \$ 7,160 | \$ 33,172 | \$ 18,479 | \$ 37,312 |
| Natural Gas portfolio: | | | | |
| Current | \$ 10,635 | \$ 11,605 | \$ 4,302 | \$ 23,734 |
| Long-term | 1,755 | 7,530 | 3,819 | 11,942 |
| Total natural gas derivatives | \$ 12,390 | \$ 19,135 | \$ 8,121 | \$ 35,676 |
| Total energy derivatives | \$ 19,550 | \$ 52,307 | \$ 26,600 | \$ 72,988 |

At September 30, 2014, the Company had total assets of \$19.6 million and total liabilities of \$52.3 million related to derivative contracts used to hedge the supply and cost of electricity and natural gas to serve PSE customers. As the gains and losses in the electric portfolio are realized, they will be recorded as either purchased power costs or electric generation fuel costs under the PCA mechanism. Any fair value adjustments relating to the natural gas business have been deferred in accordance with ASC 980, "Regulated Operations" (ASC 980) due to the PGA mechanism, which passes the cost of natural gas supply to customers. As the gains and losses on the hedges are realized in future periods, they will be recorded as natural gas costs under the PGA mechanism.

A hypothetical 10.0% increase or decrease in market prices on September 30, 2014, of natural gas and electricity would change the fair value of the Company's derivative contracts by \$34.6 million.

For further details regarding both the fair value of derivative instruments and the impacts such instruments have on current period earnings and Other Comprehensive Income (OCI), see Notes 3 and 4 to the consolidated financial statements.

Contingent Features and Counterparty Credit Risk

PSE is exposed to credit risk primarily through buying and selling electricity and natural gas to serve customers. Credit risk is the potential loss resulting from a counterparty's non-performance under an agreement. PSE manages credit risk with policies and procedures for, among other things, counterparty analysis and measurement, monitoring and mitigation of exposure.

PSE has entered into commodity master arrangements with its counterparties to mitigate credit exposure to those counterparties. PSE generally enters into the following master arrangements: WSPP, Inc. (WSPP) agreements which standardize physical power contracts in the electric industry; International Swaps and Derivatives Association (ISDA) agreements which standardize financial gas and electric contracts; and North American Energy Standards Board (NAESB) agreements which standardize physical gas contracts. PSE believes that entering into such agreements reduces the credit risk exposure because such agreements provide for the netting and offsetting of monthly payments as well as right of set-off in the event of counterparty default. It is possible that volatility in energy commodity prices could cause PSE to have material credit risk exposures with one or more counterparties. If such counterparties fail to perform their obligations under one or more agreements, PSE could suffer a material financial loss.

Where deemed appropriate, and when allowed under the terms of the agreements, PSE may request collateral or other security from its counterparties to mitigate the potential credit default losses. Criteria employed in this decision include, among other things, the perceived creditworthiness of the counterparty and the expected credit exposure. As of September 30, 2014, PSE held approximately \$791.0 million in standby letters of credit or limited parental guarantees, and had 15 counterparties with unlimited parental guarantees, in support of outstanding transactions. PSE monitors counterparties that are experiencing financial problems, have significant swings in credit default swap rates, have credit rating changes by external rating agencies or have changes in ownership. Counterparty credit risk impacts PSE's decisions on derivative accounting treatment. A counterparty may have a deterioration of credit below investment grade, potentially indicating it is no longer probable that it will fulfill its obligations under a contract (e.g., make a physical delivery upon the contract's maturity). If a forecasted transaction associated with cash flow hedge is probable of not occurring, PSE will reclassify the amounts deferred in accumulated OCI into earnings.

Should a counterparty file for bankruptcy, which would be considered a default under master arrangements, PSE may terminate related contracts. Derivative accounting entries previously recorded would be reversed in the financial statements. PSE would compute any terminations receivable or payable, based on the terms of existing master agreements.

The Company computes credit reserves at a master agreement level by counterparty (i.e., WSPP, ISDA or NAESB). The Company considers external credit ratings and market factors, such as credit default swaps and bond spreads, in determination of

reserves. The Company recognizes that external ratings may not always reflect how a market participant perceives a counterparty's risk of default. The Company uses both default factors published by Standard & Poor's and factors derived through analysis of market risk, which reflect the application of an industry standard recovery rate. The Company selects a default factor by counterparty at an aggregate master agreement level based on a weighted average default tenor for that counterparty's deals. The default tenor is used by weighting the fair value and contract tenors of all deals for each counterparty and arriving at an average value. The default factor used is dependent upon whether the counterparty is in a net asset or a net liability position after applying the master agreement levels.

The Company applies the counterparty's default factor to compute credit reserves for counterparties that are in a net asset position. The Company calculates a non-performance risk on its derivative liabilities by using its estimated incremental borrowing rate over the risk-free rate. The fair value of derivatives includes the impact of credit and non-performance reserves. As of September 30, 2014, the Company was in a net liability position with many of its counterparties, therefore the default factors of counterparties did not have a significant impact on reserves for the period. As of September 30, 2014, PSE has posted a \$1.0 million letter of credit as a condition of transacting on a physical energy exchange and clearinghouse in Canada. PSE did not trigger collateral requirements with any of its counterparties, nor were any of PSE's counterparties required to post collateral resulting from credit rating downgrades.

Interest Rate Risk

The Company believes its interest rate risk primarily relates to the use of short-term debt instruments, variable-rate leases and anticipated long-term debt financing needed to fund capital requirements. The Company manages its interest rate risk through the issuance of mostly fixed-rate debt with varied maturities. The Company utilizes internal cash from operations, borrowings under its commercial paper program, and its credit facilities to meet short-term funding needs. Short-term obligations are commonly refinanced with fixed-rate bonds or notes when needed and when interest rates are considered favorable. The Company may also enter into swap instruments or other financial hedge instruments to manage the interest rate risk associated with these debts. As of September 30, 2014, Puget Energy had two interest rate swap contracts outstanding and PSE did not have any outstanding interest rate swap instruments.

At September 30, 2014, the fair value of the interest rate swaps was a \$9.6 million pre-tax loss. This fair value considers the risk of Puget Energy's non-performance by using Puget Energy's incremental borrowing rate on unsecured debt over the risk-free rate in the valuation estimate.

A hypothetical 10% increase or decrease in interest rates on September 30, 2014, would change the fair value of Puget Energy's interest rate swaps by \$1.0 million.

The following table presents the fair values of Puget Energy's interest rate swaps, recorded on the balance sheet:

| Puget Energy (Dollars in Thousands) | September 30, 2014 | December 31, 2013 |
|--|--------------------|-------------------|
| | Liabilities | Liabilities |
| Interest rate swaps: | | |
| Current | \$ 6,542 | \$ 6,584 |
| Long-term | 3,018 | 6,639 |
| Total interest rate swaps | \$ 9,560 | \$ 13,223 |

From time to time, PSE may enter into treasury locks or forward starting swap contracts to hedge interest rate exposure related to an anticipated debt issuance. The ending balance in OCI related to the forward starting swaps and previously settled treasury lock contracts at September 30, 2014 was a net loss of \$6.1 million after tax compared to an after-tax loss of \$6.3 million in OCI as of December 31, 2013. All financial hedge contracts of this type are reviewed by an officer, presented to the Board of Directors or a committee of the Board, as applicable, and approved prior to execution. PSE had no treasury locks or forward starting swap contracts outstanding at September 30, 2014.

Item 4. Controls and Procedures

Puget Energy Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of Puget Energy's management, including the President and Chief Executive Officer and Senior Vice President and Chief Financial Officer, Puget Energy has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of September 30, 2014, the end of the period covered by this report. Based upon that evaluation, the President and Chief Executive Officer and Senior Vice President and Chief Financial Officer of Puget Energy concluded that these disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Puget Sound Energy

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of PSE's management, including the President and Chief Executive Officer and Senior Vice President and Chief Financial Officer, PSE has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of September 30, 2014, the end of the period covered by this report. Based upon that evaluation, the President and Chief Executive Officer and Senior Vice President and Chief Financial Officer of PSE concluded that these disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

For details on legal proceedings, see the Litigation footnote in the notes to the consolidated financial statements of this Quarterly Report on Form 10-Q. Contingencies arising out of the normal course of PSE's business existed as of September 30, 2014. Litigation is subject to numerous uncertainties and PSE is unable to predict the ultimate outcome of these matters.

Item 1A. Risk Factors

There have been no material changes from the risk factors set forth in Part I, Item 1A in Puget Energy's and PSE's Form 10-K for the period ended December 31, 2013.

Item 6. Exhibits

Included in the Exhibit Index are a list of exhibits filed as part of this Quarterly Report on Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, each registrant has duly caused this report to be signed on their behalf by the undersigned thereunto duly authorized.

PUGET ENERGY, INC.
PUGET SOUND ENERGY, INC.

Officer duly authorized to sign this report on behalf of each registrant

EXHIBIT INDEX

- 3(i).1 Amended Articles of Incorporation of Puget Energy (incorporated herein by reference to Exhibit 3.1 to Puget Energy's Current Report on Form 8-K, dated February 6, 2009, Commission File No. 1-16305).
- 3(i).2 Amended and Restated Articles of Incorporation of Puget Sound Energy, Inc. (incorporated herein by reference to Exhibit 3.2 to Puget Sound Energy's Current Report on Form 8-K, dated February 6, 2009, Commission File No. 1-4393).
- 3(ii).1 Amended and Restated Bylaws of Puget Energy dated February 6, 2009 (incorporated herein by reference to Exhibit 3.3 to Puget Energy's Current Report on Form 8-K, Commission File No. 1-16305).
- 3(ii).2 Amended and Restated Bylaws of Puget Sound Energy, Inc. dated February 6, 2009 (incorporated herein by reference to Exhibit 3.4 to Puget Sound Energy's Current Report on Form 8-K, Commission File No. 1-4393).
- 12.1* Statement setting forth computation of ratios of earnings to fixed charges of Puget Energy, Inc. (2009 through 2013 and 12 months ended September 30, 2014).
- 12.2* Statement setting forth computation of ratios of earnings to fixed charges of Puget Sound Energy, Inc. (2009 through 2013 and 12 months ended September 30, 2014).
- 31.1* Chief Executive Officer certification of Puget Energy pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2* Principal Financial Officer certification of Puget Energy pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.3* Chief Executive Officer certification of Puget Sound Energy pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.4* Principal Financial Officer certification of Puget Sound Energy pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1* Chief Executive Officer certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2* Principal Financial Officer certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 101 Financial statements from the quarterly report on Form 10-Q of Puget Energy, Inc. and Puget Sound Energy, Inc. for the quarter ended September 30, 2014, filed on October 29, 2014 formatted in XBRL: (i) the Consolidated Statement of Income (Unaudited), (ii) the Consolidated Statements of Comprehensive Income (Unaudited), (iii) the Consolidated Balance Sheets (Unaudited), (iii) the Consolidated Statements of Cash Flows (Unaudited), and (iv) the Notes to Consolidated Financial Statements (submitted electronically herewith).
