¹ See "Use of Non-GAAP Financial Measures" herein.

² Interest rate spread represents the difference between the annualized weighted average yield on interest-earning assets and the annualized weighted average rate paid on interest-bearing liabilities.

³ Net interest margin represents annualized net interest income as a percentage of average interest-earning assets.

⁴ Efficiency ratio represents non-interest expense as a percentage of the aggregate of net interest income and non-interest income.

Use of Non-GAAP Financial Measures

In addition to the results presented in accordance with GAAP, this earnings supplement includes non-GAAP financial measures such as adjusted earnings, adjusted earnings per diluted common share, and tangible book value per common share. Non-GAAP financial measures have inherent limitations, may not be comparable to similarly titled measures used by other companies and are not audited. Readers should be aware of these limitations and should be cautious as to their reliance on such measures. Although we believe the non-GAAP financial measures disclosed in this report enhance investors' understanding of our business and performance, these non-GAAP measures should not be considered in isolation, or as a substitute for GAAP basis financial measures.

We define "adjusted earnings", a non-GAAP financial measure, as net income without the after-tax impact of non-recurring acquisition-related costs and other costs (unusual or non-recurring charges). Adjusted earnings per diluted common share ("adjusted EPS"), a non-GAAP financial measure, is calculated by dividing non-GAAP adjusted earnings by the average number of diluted common shares outstanding during the period. We believe the non-GAAP measures of adjusted earnings and adjusted EPS provide useful information about the Company's operating performance. We believe excluding the non-recurring acquisition related costs and other costs (unusual or non-recurring) provides investors with an alternative understanding of Axos' core business.

Below is a reconciliation of net income, the nearest compatible GAAP measure, to adjusted earnings and adjusted EPS (Non-GAAP) for the periods shown:

<i>(Dollars in thousands, except per share amounts)</i>	June 30, 2023	March 31, 2023	December 31, 2022	September 30, 2022	June 30, 2022

Adjusted EPS (Non-GAAP)	\$ 1.50	\$ 1.35	\$ 1.38	\$ 1.18	\$ 1.12

¹ Other costs for the three months ended September 30, 2022 reflect an accrual in the first quarter of 2023 as a result of an adverse legal judgement that has not been finalized. Other costs for the three months ended June 30, 2022 reflect a charge due largely to a one-time resolution of a contractual claim.

We define "tangible book value", a non-GAAP financial measure, as book value adjusted for goodwill and other intangible assets. Tangible book value is calculated using common stockholders' equity minus mortgage servicing rights, goodwill and other intangible assets. Tangible book value per common share, a non-GAAP financial measure, is calculated by dividing tangible book value by the common shares outstanding at the end of the period. We believe tangible book value per common share is useful in evaluating the Company's capital strength, financial condition, and ability to manage potential losses.

Below is a reconciliation of total stockholders' equity, the nearest compatible GAAP measure, to tangible book value per common share (non-GAAP) as of the dates indicated:
