RISK FACTORS

These are the principal risks that related to the company and its business:

- **General Risk** An investment in the Company (also referred to as “we”, “us”, “our”, or “Company”) involves a high degree of risk and should only be considered by those who can afford the loss of their entire investment. Furthermore, the purchase of any units should only be undertaken by persons whose financial resources are sufficient to enable them to indefinitely retain an illiquid investment. Each investor in the Company should consider all of the information provided to such potential investor regarding the Company as well as the following risk factors, in addition to the other information listed in the Company’s Form C. The following risk factors are not intended, and shall not be deemed to be, a complete description of the commercial and other risks inherent in the investment in the Company.
- **Regulated Industry** The liquor industry is one of the most regulated industries. In the U.S. Distilleries must abide by the three-tier distribution system, which, typically, puts the success of their product largely in the hands of a wholesaler that is likely carrying and representing competing products. Some states maintain a monopoly on distributing and retailing distilled spirits, yet all 18 of these states permit wine and beer to be sold by private retail outlets for off-premises consumption. The Alcohol and Tobacco Tax and Trade Bureau (TTB) regulates the production, marketing, and transport of distilled products.
- **The Transferability of the Securities you are buying is limited-new company.** Any Membership Units purchased through this crowdfunding campaign is subject to SEC limitations of transfer. This means that the units that you purchase cannot be resold for a period of one year. The exception to this rule is if you are transferring the units back to the Company, to an “accredited investor,” as part of an offering registered with the Commission, to a member of your family, trust created for the benefit of your family, or in connection with your death or divorce.
- **Loss of Investment or Illiquidity** While the company's plan is to grow and sell the company in the future, you should be prepared to hold your investment for the long-term, or lose your investment. There is no established market for these securities and there may never be one. As a result, if you decide to sell these securities in the future, you may not be able to find a buyer. The Company may be acquired by an existing player in the distilled spirits industry. However, that may never happen or it may happen at a price that results in you losing money on this investment.
- **The Market** The number of competitors is growing at a rate equal to or more

than the growth of the industry. Accordingly, only a percentage of the competition will survive in the market over the next few years. U.S. liquor companies compete directly with wine, beer, and international spirits manufacturers. Consumer alcohol preferences can shift quickly for a variety of reasons, including based on news articles, entertainment and celebrity trends, and health concerns. Spirits and wine have gained over beer in recent years, but beer sales still account for over 50 percent of the total market. Liquor's market share, currently one-third of the total U.S. alcohol market, is below its historical peak of 40 percent in the early 1970s, according to Distilled Spirits Council of the U.S. Anti-alcohol groups have, in the past, successfully advocated more stringent labeling requirements, higher taxes and other regulations designed to discourage consumption of beverage alcohol. More restrictive regulations, negative publicity regarding alcohol consumption and/or changes in consumer perceptions of the relative healthfulness or safety of beverage alcohol could decrease sales and consumption of alcohol and thus the demand for our products. This could, in turn, significantly decrease both our revenues and our revenue growth, causing a decline in our results of operations.

- **Supply Chain** We depend on a limited number of third-party suppliers for the sourcing of all of our products. We do not have long-term written agreements with all of our suppliers. If our suppliers increase their prices, we may be limited to alternative sources of supply and may not be able to raise the prices of our products to cover all or even a portion of the increased costs. In addition, our suppliers' failure to perform satisfactorily or handle increased orders or the loss of our existing suppliers, especially our key suppliers, could cause us to fail to meet orders for our products, lose sales, incur additional costs and/or expose us to product quality issues. The ability of key vendors to supply the Company with timely and quality products. The Company has sought to mitigate this risk by dual sourcing from suppliers.
- **Valuation** The company has determined the valuation based on their opinion, as well as strategic growth and financing plan. No one is saying - or can say - what the company is worth today. It's a question of whether you, the investor, want to pay this price for this security, and whether you believe the company will exceed its present stated value in the future based upon evidence the company has provided in its offering.
- **Projections** There can be no assurance that the company will meet the intended projections. There can be no assurance that the company will create sufficient demand for product, or that people think our products are a better option than the competition, or that we have priced the product at a level that allows the company to make a profit.
- **Retail & Distribution** ONE ROQ is dependent upon licensed wholesale distributors, retailers and online order fulfillment providers to move our products through a Federally regulated supply chain called the "Three-Tier System". The failure or inability of any of the Company's partners to adequately sell our products within our target territories could harm ONE ROQ's sales and result in a decline in its results of operations. Our business plan is dependent upon successfully negotiating strategic business partnerships with capable

wholesalers, retailers and 3rd party fulfillment companies. There can be no guarantees that our initial partnerships will continue for an indefinite time period, or yield a short-term and / or a long-term profit. Failure to leverage this partnerships would have a material adverse effect on our business, financial condition and results of operations. The ultimate success of our products also depends in large part on the ability and desire of retailers and distributors to distribute our products to the desired U.S. target markets, as we rely significantly on them for product placement and retail store penetration. Retailers, such as Total Wines and More, Specs, BevMo, etc., also distribute competitive brands and product lines. We cannot assure you that the Company's U.S. alcohol retailers will continue to purchase ours products, commit sufficient time and resources to promote and market our brands and product lines or that they can or will sell them to the desired or targeted markets.

6. The Members have limited rights to transfer (sell) their Membership Units and certain proposed sales of the Units may be subject to a right of first refusal by the Company and the other Members. This means, if and when a member desires to transfer (sell) his or her units, the member must first offer the unit(s) to the Company and the Existing Membership, before he or she offers for sale the units to the original buyer.
7. Additionally, the ownership of such Membership Units is subject to "drag along" rights (i.e., rights of Members holding more than 50% of the Membership Units to require other Members to sell their Membership Units to a third party buyer). (This describes the potential "exit" event that company is targeting via industry acquisition, specifically.)

Restrictions on Transfer of Units

- o Generally, any proposed transfers of Membership Units in the Company to individuals or entities that do not currently own Membership Units in the Company ("Third Party Buyers") are subject to a right of first refusal of the Company and each of the other Members to purchase the Membership

Units (the “Right of First Refusal”). (i.e., investors must offer to sell their securities to the company or other members before they can offer to sell to an outside 3rd party.)

- The specific terms of the right of refusal provision are set forth in the Company’s operating agreement. Additionally, there are certain proposed transfers of Membership Units that are exempt from the Right of First Refusal. Additionally, holders of more than fifty percent of the Company’s Membership Units (as applicable, the “Dragging Members”) can require all other Members to sell their Membership Units to a Third Party Buyer so long as the Dragging Members sell of their Membership Units to the Third Party Buyer.
- Again, the terms of this “drag-along” provision as well as all other terms, conditions and restrictions relating to transfers are set forth in the Company’s operating agreement.

What it means to be a Minority Holder

As a minority holder of Membership Units, you will have limited rights to influence company policies pertaining to the election of directors, changes to the Company’s governance documents, additional issuance of securities, company repurchases of securities, a sale of the Company, or of assets of the Company, or transactions with related parties.

Dilution

Investors should understand the potential for dilution. Each Investor’s stake in the Company, could be diluted due to the Company issuing additional units. In other words, when the Company issues more units, the percentage of the Company that you own will decrease, even though the value of the Company may increase. You will own a smaller piece of a larger company. This increases in number of units outstanding could result from another offering.

If we decide to issue more units, an Investor could experience value dilution, with each unit being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share.

The type of dilution that hurts early-stage investors mostly occurs when the company sells more units in a “down round,” meaning at a lower valuation than in earlier offerings.

If you are making an investment expecting to own a certain percentage of the Company or expecting each unit to hold a certain amount of value, it is important to realize how the value of those units can decrease by actions taken by the Company.

Dilution can make drastic changes to the value of each unit, ownership percentage, voting control, and earnings per unit.

That being said, the company feels confident it has taken measures that will help to prevent the potential for future additional issuance of units, protecting our initial investors.

Other events

As part of your potential investment it is also important to know that as part of the company's growth and financing strategy, it plans to conduct additional rounds of financing using Regulation CF and Regulation A+ securities exemptions. In order to proceed with these intended subsequent rounds of financing, the company may convert its corporate structure to a C-corp. This conversion will allow the company to avoid costly legal complexities associated with its plan to acquire a large number of shareholders and conduct an exit event.

Transferability of securities

For a year, the securities can only be resold:

- In an IPO;
- To the company;
- To an accredited investor; and
- To a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

Financial Condition

Results of Operation

Background

From day one, the vision of ONE ROQ has been building a Nationally and Internationally recognized American vodka brand by delivering on award-winning, premium taste; affordable-luxury pricing; and world-class creative. Forgoing industry consultants, the Founder - a seasoned entrepreneur - leaped into the distilled spirits

industry, investing to establish the foundational knowledge and expertise he knew would be needed to properly develop a business model to position itself for viability as a high-growth potential lifestyle brand.

Key Learnings From The Company's Foundational Investment

The distilled spirits industry, and each of its yearly 300 or so new entrants, are educated by industry members to develop their marketing strategies within the confines of the **Three-Tier System**; a Federally regulated supply chain where producers must sell their products to wholesalers, who must sell to retailers, who must sell to consumers (creating three degrees of communication separation between brands and their end-users). This system therefore requires brands (new entrants) to carefully align themselves with licensed distributors in each state who they will entrust – and work alongside of - to market their brands in the marketplace. For this model to have a chance of being effective requires large, sustainable cash outlays to be spent towards: 1. keeping the wholesalers focused on selling and building the brand; and 2. a effective consumer communications strategy to 'pull' product through retailers via creating consumer demand.

Success is limited for most new entrants under this traditional industry model due to the following factors:

- Investment to keep wholesalers focused on the brand marketing beyond the initial launch phase is challenging, as wholesaler focus is spread across a broad range of existing portfolio brand responsibilities imparted by pressure from their larger, supplier clients. Therefore, as a partner, *a wholesaler's value is more in the 'delivery' of the product rather than in the brand building that they advertise.*
- Investment to build the consumer market (*using traditional ad strategies*) is futile against the much larger and sustainable ad budgets of "big liquor."
- Without a direct customer acquisition strategy and a compelling value proposition to build the consumer market, new entrants are reliant upon wholesalers who charge for obsolete and unsustainable traditional marketing strategies that have limited to no chances for success

The results of ONE ROQ's initial years of operation are a testament of this reality. Recognizing this at the end of year four, the company chose to go on a holding pattern, spending nearly two years to analyze and develop strategy against these barriers. Today, ONE ROQ Vodka Club embodies that strategy and the current proposed relaunch.

Historical Operational Summary

Year 1 (2012) - Test Launch

The initial year of operation generated the company \$201,138 in sales with a blended gross margin of 47% per case sold. With its initial launch the company invested

approximately \$247,266 in production and materials overstock that would be used to fulfill reorders throughout the year with its initial wholesale customers. Our initial sales were the result of several POs placed by new distributor partners which were created from the company's use of an exclusive industry broker (taking 10% of sales). As part of these new distributor relationships, the company was expected to commit further investment to support the wholesaler's efforts to "sell-in" the product to target markets. To this end, we invested \$170,108 in the production of: point-of-sale displays, posters, bar mats, magazine advertisements, tastings, select outdoor advertising devices and commissions to distributor salesmen. The results of these investments yielded "decent" sell-in rates, but overall, the company was unimpressed with the initial performance of its distributor partners.

Year 2 (2013) - Multiple Market Launch W/ Traditional Industry Marketing Tactics

The company fulfilled \$68,316 in reorders with a blended gross margin of 47% per case sold. We invested approximately \$99,953 in production and materials overstock used primarily to replenish orders received from the initial wholesale customers. With product seeded in several US markets, and sell-through under plan, the company gleaned on advice of *industry* partners, and invested \$238,857 in traditional marketing and advertising tactics in effort to "support" wholesaler partners. These efforts included point-of-sale displays, merchandise, billboard, magazine ads, aerial banners, event sponsorship, tastings, samples, and commissioned wholesaler salesmen. In tandem, the company contracted with several 3rd party staffing agencies to perform numerous weekly and monthly in-store tastings within our active markets. This, and the CEO's salary is reflected in G&A in the amount of \$180,941. While the results of these tactics yielded unimpressive sales, the company was able to continue to bolstr the credentials of its brand

Year 3 (2014) - Reduction in Markets - Traditional Industry Tactics

The company generated sales of \$115,487 with a blended gross margin of 43% per case sold (down 2% from uptick in market price of corn ethanol). We invested \$107,426 in inventory production and materials overstock to fulfill reorders from existing wholesaler partners and sell to new wholesale partners. This year we took lesson from the prior years sales results from investing in traditional marketing and advertising tactics across a scattered number of markets, applying the appropriate changes. These changes included deleting and replacing under-performing wholesalers; reducing our number of focus markets from 7 to 1; implementing product line enhancements in the form of package design and flavor additions; and focusing brand message. Expenses associated with these changes - in addition to the localized relaunch of the new product line - totaled \$180,033, inclusive of G&A.

Years 4 (2015) - Conclusion of Test Launch / Holding Pattern

The company generated sales of \$51,278 with a blended gross margin back up to 47%. The company invested \$90,762 in production and materials overstock to service existing wholesaler customers and did not look to add additional wholesale customers. This year was marked with a substantial reduction in marketing & advertising as the

company began to come to terms with the limitations of its wholesaler-oriented marketing strategy. Consequently, the company placed itself on holding pattern in order to take the necessary time to rethink its business model.

Year 5 (2016) -- Holdings Pattern Cont.

While on hold, the company fulfilled sales of \$2,292, performing the absolute minimum operational responsibility. Any debt, invoices or promotional activity was funded directly by the owner.

Year 5 (2017) -- Holding Pattern Cont.

While on hold, the company generated sales of \$25,418 and invested approx \$60,889 in inventory in preparation for relaunch under ONE ROQ Vodka Club.

In summary, ONE ROQ invested heavily into product development, marketing, and real-world industry exposure from years 2012 to 2015. The results of its investment, discussed above, established great insight into the operational and cultural barriers of the industry. Following this exposure, the company chose to apply holding pattern in order to conduct the necessary analysis and redevelopment on its overall operational and marketing strategies. This process took place from 2016 to 2017, which resulted in the innovation of ONE ROQ Vodka Club, a new operational and marketing model designed to circumvent the cost and communication barriers of the 3-Tier System with a legal, e-model that offers savvy, aspirational consumers a compelling opportunity to align with ONE ROQ's vision to systematically build the world's first members-only lifestyle spirit.

Financial Milestones

The company currently forecasts 2019, 2020 and 2021 revenue (including proceeds from club memberships) of \$3.2 million, \$9.2 million and \$12 million, respectively. Corresponding Yearly Expenditures include: \$1,365,000 in Y1, \$4,280,000 in Y2, and \$7,695,000 in Y3; and Net Income Before Taxes of \$1,835,000 in YR 1, \$4,920,000 in YR 2, and \$6,205,000 in YR 3.

In order to accomplish these financial objectives, the company must enroll 10,000 club members in year 1; 35,000 in year 2; and 65,000 in year 3.

Key Assumptions

- The Average anticipated Club Enrollment amount per member: \$200.00 (Silver Membership)
- Each Member will purchase an average of 6 bottles (one case) per year
- The company will sell its 6-bottle cases to the trade for: \$90.00 and operate with a 45% gross margin in YR1; a 49% gross margin in YR2; and a 52% gross margin

in YR3

- Upon exceeding 50,000 cases in annual sales, the company will seek to conduct an exit in the form of an IPO or strategic industry sale.

Liquidity and Capital Resources

The company is currently reflecting operating losses and requires the infusion of new capital to meet the objectives of its business plan. If the company is successful in this offering, the company will continue to support its operations by raising capital under regulated crowdfunding offerings, equity or debt issuance, or any other method available to the company.

Using the anticipated available capital from this offering, the company anticipates pursuing subsequent crowdfunding capital raises which will allow the company to continue raising money (and enrolling members) direct from the public - via its club platform.

In the interim, the company is confident that the target \$107,000 being sought in this offering and potential increase to \$1.07M will give the company sufficient runway to operate its business, refine key foundational processes, and steward its initial founding members.

In the event qualification of the future capital raising or crowdfunding efforts are either delayed, or operating expenses of the business exceed as planned during this period, the company - as a fail-safe - will turn to a wide range of capital resources to provide the company the necessary financing to bridge the company's operations. This includes but not limited to: commercial lenders, accredited equity investors, and reward-investors.

Indebtedness

Unsecured Term-Notes Payable to Individuals The Company has the following unsecured term-notes payable to individuals maturing in May, 2018. Pursuant to mutual agreement between the Company and the lender, payment of the notes have been deferred indefinitely. \$21,000 - Unsecured 51-month term-note payable to Scarp. Valuation

\$10,000,000.00

We have undertaken several efforts to produce a valuation of the Company - and base this valuation primarily on the company's investments to date, sweat equity of the founder, several awards, accolades and cross promotions which have risen the profile of the brand, historical acquisition data, and the rapid potential of the company's new business model. Accordingly, the Manager believes a \$10M valuation to be fair.

Independent Accountants' Review Report

To the Members of
ONE ROQ Spirits LLC
Buffalo, New York

We have reviewed the accompanying financial statements of ONE ROQ Spirits LLC, which comprise the balance sheets as of December 31, 2018 and 2017, and the related statements of operations and members' deficit, and cash flows for the years then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of Company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountants' Responsibility

Our responsibility is to conduct the review engagements in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountants' Conclusion

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Going Concern Uncertainty

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1, the Company has experienced recurring net losses during its development period and has both working capital and members' equity deficiencies at December 31, 2018 and 2017. These conditions indicate that the Company may be unable to continue as a going concern without sufficient future funding. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our conclusion is not modified with respect to this matter.

1. NATURE OF OPERATIONS

ONE ROQ Spirits LLC (the "Company") was formed in the State of New York on March 12, 2012. The Company is an adult beverage manufacturer which primarily produces vodka under its ONE ROQ® brand name. Its principal products include: ONE ROQ Vodka (plain), ONE ROQ Loganberry (flavored), ONE ROQ Dark Chocolate Truffle (flavored), and ONE ROQ Raspberry (flavored). The Company currently produces its products utilizing facilities located in Denver Colorado (Milehigh Spirits) and Bend, Oregon (Bend Distilling) with self-production as an important tenant of its future business plans.

Since its inception, the Company's activities have been primarily focused on product and brand development, market research, distribution relationship procurement, finance and the development of an overall competitive marketing advantage. As a result, the Company has experienced recurring net losses during its development period and has both working capital and members' equity deficiencies at December 31, 2018 and 2017. These matters raise substantial doubt about the Company's ability to continue as a going concern without sufficient future funding.

The Company plans on raising additional equity investment funds to meet the objectives of its business plan. During December 2018, the Company offered to sell up to 5,350,000 membership units for a total offering of \$1,070,000 in connection with its proposed regulated crowdfunding campaign. As of the date of these financial statements, gross proceeds of \$279,000 prior to intermediary commissions were raised pursuant to this offering. The Company will continue to support its operations by raising additional capital through regulated crowdfunding offerings, equity or debt issuances. However, there are no assurances that management will be able to raise the required capital on terms acceptable to the Company and this may significantly impact its business, financial condition and operating results. These financial statements do not include any adjustments that might result from these uncertainties.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Cash and Cash Equivalents – The Company considers all cash accounts which are not subject to withdrawal restrictions and certificates of deposit with original maturities of three months or less to be cash equivalents. Substantially all of the Company's cash balances are held with one financial institution. Cash and cash equivalents may exceed federally insured limits at various times throughout the year. The Company has not experienced any losses on such accounts and believes it is not exposed to any significant credit risk.

Trade Accounts Receivable – The Company uses the reserve method to account for uncollectible accounts receivable and reviews its accounts on a monthly basis. Allowances for potential credit losses are determined based on an evaluation of the composition of accounts and expected credit trends. When an account is deemed uncollectible, the Company charges expense.

Inventory – Inventory, consisting of various beverages and supplies, is valued at the lower of cost or net realizable value, determined on a first-in, first-out basis.

Property and Equipment – Property and equipment are stated at cost. Depreciation over the estimated useful lives of the assets (5 years) is provided using the straight-line method for financial reporting purposes. Maintenance and repairs are expensed in the period incurred; significant betterments are capitalized.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (*Continued*)

Trademark Costs – The costs of obtaining trademarks are capitalized and amortized over a 15-year period using the straight-line method. At December 31, 2018 and 2017, the amounts in the accompanying balance sheets are reflected net of accumulated amortization of \$168 and \$135, respectively.

Revenue Recognition – The Company recognizes revenue on product sales when pervasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price is fixed or determinable, and collectability is assured. These conditions are generally met at the time of shipment.

Shipping and Handling Costs – Shipping and handling costs are included in cost of goods sold in the accompanying financial statements.

Advertising Costs – The costs of advertising are charged to expense in the period incurred.

Income Taxes – The Company is a Limited Liability Company ("LLC") and not a taxpaying entity for income tax purposes. As an LLC, the Company's member is liable for individual federal and state income taxes on the Company's taxable income. Accordingly, no provision for income taxes has been reflected in the accompanying financial statements.

The Company recognizes the tax benefits from uncertain tax positions only if it is more-likely-than-not that the tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. At December 31, 2018 and 2017, management believes the Company had no uncertain tax positions that would require adjustment to or disclosure in the financial statements. The Company's income tax filings are subject to audit by various taxing authorities. By statute, the Company's tax years subject to audit are 2017 through 2019.

Significant Concentrations of Credit Risk – During the years ended December 31, 2018 and 2017, substantially all of the Company's sales were to one customer.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results could differ from those estimates.

Recent Accounting Pronouncements – In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"). The new standard requires that an entity recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The update also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The guidance is effective for the Company beginning January 1, 2019. The Company is currently evaluating the potential impact of adopting this accounting standard update.

Subsequent Events – Management has evaluated events and transactions that occurred between January 1, 2019 and April 25, 2019, the date these financial statements were available to be issued, for possible disclosure and recognition in the financial statements.

3. NOTES PAYABLE

The Company has several unsecured demand notes payable to Scarp Properties, an unrelated party. The notes bear interest at 5% per annum and matured in May 2018. The lender has agreed to extend the maturity date of the notes indefinitely. The notes payable totaled \$146,502 at December 31, 2018 and 2017.

Pursuant to the Company's third amended and restated operating agreement, additional membership interests may be issued at the direction of the member and upon execution of an adoption agreement. Each membership unit entitles the holder: (1) to one vote, except for certain interested transactions, as defined; (2) to receive its pro rata distributions made by the Company; and (3) to enjoy all other rights, benefits and interests in the Company. All items of income, gain, loss, deduction and credit of the Company shall be allocated to the members pro rata in accordance with their percentage ownership interests. Additionally, the amended and restated operating agreement restricts the sale or transfer of ownership interests, other than certain permitted transfers, in that the selling member must provide the Company and other membership holders the right of first refusal at least 45 days prior to any such transfer, as defined in the agreement. Further restrictions on the transferability of the membership units also exist pursuant to the Company's regulated crowdfunding offering (Note 1).

In addition, the amended and restated operating agreement contains certain drag-along provisions whereby holders of more than 50% of the Company's membership units may sell all of their membership units to an unaffiliated third party as part of a sale of all equity of the Company. In such case, such 50% holders shall have the right to include the other members' membership units in the sale by providing the other members with written notice of the transaction, as defined in the agreement.

Own Your Spirit

Invest in ONE ROQ Vodka Club

When award-winning product developer and serial entrepreneur, Garrett created entered the spirits market in 2012, he knew the odds of going to be able to beat the giant brands at their own game. So, for three years he invested to learn the industry, refine his product, and develop an innovative business model designed to break through their barriers... Today, you can become a Founding member that launches that business model to capitalize on the rare opportunity of building a globally recognized, luxury-lifestyle vodka brand, through **ONE ROQ Vodka Club**.

Our Mission

We love making a superior spirit, but our true passion is sharing the spirited life. For this, ONE ROQ invites you to **Escape The Ordinary**, by **Owning Your Spirit**.

The Very Beginning

In the mid 2000s, Garrett became inspired by the success of French luxury vodka brand **Grey Goose Vodka** after selling to Bacardi Ltd. for \$2 billion a few years earlier - but wondered why the market didn't have an iconic **American-luxury** brand equivalent. Using his entrepreneurial instinct, he saw this as a once in a lifetime opportunity to enter in the **\$70+ billion-a-year distilled spirits market**.

Garrett commenced by scouring US farms and distillers in search for the perfect recipe, eventually discovering a distinguished blend of artisanal mountain water from the Colorado Rockies, and hand-picked sweet corn from the American mid-west. He then began his meticulous process of design, developing the vessel and choosing the name.

The Name

Garrett believes that success requires immense physical and emotional strength in order to overcome the constant challenges of life. With this, the idea of being reliant upon the *self* to consistently find *strength*, led to the notion of "a rock" -- and "ONE ROQ" was born.

Validation

With a finished product, Garrett launched ONE ROQ in 2012, and within 120 days of its introduction, it won the first-place gold medal for taste and design in the 2012 International **SIP Awards In San Francisco** - the world's largest, **consumer-judged** tasting competition - validating ONE ROQ's superior quality, taste and diverse consumer appeal.

Industry Barriers

Over the course of three years, ONE ROQ invested the foundational capital to refine its packaging, build a trusted distribution network, and gain first-hand, exposure to several industry barriers that routinely blind-side new brands. From this experience, Garrett concluded that to be successful in the industry, a brand cannot stand on award-winning credentials alone. The industry's "3-Tier System" "Pay-to-Play" culture

and exhaustive use of lifestyle marketing schemes deployed by larger brands were key barriers to be surmounted with marketing strategy of an alternative realm.

The Problem We're Unveiling

"Lifestyle Marketing" is the common practice of large industry companies placing their brands inside the images of successful or attractive lifestyles. This method is used in an attempt to have us believe that if we buy those brands, we in turn acquire those lifestyles - even "success" in society. ONE ROQ knows this is deceptive, and that the real lifestyles are in reality enjoyed by the owners of brands.

The Solution

So, in 2016, ONE ROQ abandoned the traditional industry marketing mold, transformed its brand philosophy and redeveloped its business model with **ONE ROQ Vodka Club** - an industry-first, experiential platform redefining the lifestyle spirit experience through the luxury of brand ownership, and the *genuine* lifestyle **Privileges** that come with it.

Current Stage

We are currently seeking up to \$1M to commence the legal, marketing and inventory production requirements to launch the ONE ROQ Club platform.

The Foundation is Ready

We've invested heavily to develop an award-winning product, establish deep expertise in the market, and innovate the strategy to achieve material growth to position the company for future success. (Refer to our *Projections and Historical Exits* diagram below.)

Accomplishments To Date

From 2012 to 2015, ONE ROQ Spirits invested over \$1M in comprehensive research and development. Through this initial investment, we were able to develop a beautiful and award-winning product, build a stable operating infrastructure, establish a tremendous understanding of the industry, and become the beneficiary of several accolades from renowned international organizations verifying the outstanding quality, reputation and vision of our brand. Some of these organizations include: Robb Report Magazine, the International SIP Awards, Bentley Motors, Elite Traveler Magazine, Black Book Magazine, BIN Magazine, and others.

However, to date, our most important accomplishment was our ability to apply the early investment of the company as an opportunity to improve our knowledge and overall marketing strategy within the industry. Candidly, we have endured numerous industry lessons. Lessons which routinely defeat the seemingly most promising of beverage brands. Through this process, it was able identify and develop a highly differentiated cultural approach presenting the company, with the opportunity of becoming a breakthrough brand within the coveted industry category of premium vodka.

Key Highlights

- \$1M invested in research, development and industry experience
- 5,000+ cases sold (\$500k) in initial test launch
- Distribution network ready in key states
- Foundational credentials:
 - International Awards (Intl. Sip Awards)

Why We Are in Position to Potentially Become the Most Promising Spirit Company in America

Key Differentiators

- A first of its kind **gluten-, sulfite-, and sodium-free recipe** serving the increasing health and allergy conscious consumer.
- Filtered and distilled using rare copper pot AND glass column distillation. Because, when you start honest ingredients, once is enough.
- **Internationally award winning** - for taste and design - from largest *consumer judged* competition in the world.
- Precise brand positioning targeting the **yet-to-be-established** 'Luxury-American' vodka category
- **\$1M invested into industry experience** and foundational assets (recipe, brand, packaging, distribution infrastructure, strategic partnerships and differentiated marketing strategy). **We are an informed and highly experienced startup.**
- **Innovative "Owners Club"** (in development) will allow the brand to distinguish itself from every major brand by being the only lifestyle spirit owned and guided by the people.
- **Innovative Cultural Strategy:** ONE ROQ believes in the power of its ETHOS. Creating what we believe to be the first people-owned luxury spirit will allow the company to start a powerful dialog with the consumer and the media regarding historical privileges of the wealthy, consumer equality and the profoundly important economic and cultural transformation benefiting aspirational and educated consumers.
- **Direct -to-Consumer Communication:** Traditionally, distilled spirits companies believe they must work with wholesalers to communicate their brand's unique value propositions to the end users. However, the use of the wholesaler under traditional practices brings significant communication (and cost) challenges to new brands, as the model promotes three degrees of separation between producers and their end users (i.e., supplier --> wholesaler -->retailer--> end-user), as well as a 'diffusion of responsibility' on behalf of wholesalers and retailers who sell hundreds, if not thousands of other brands. So, we asked the logical question: How can we truly rely upon a wholesaler to accurately and passionately communicate the unique selling features of our brand to retailers, who then would turn around and accurately represent that same messaging to consumers? (The answer: you can't.) So, instead, we deploy direct-to-consumer methods using digital media marketing and face-to-face promotions via tastings and events to reach and communicate with our end users and acquire them through the ONE ROQ Club offering. **Through this approach, ONE ROQ can control its destiny.** (Note: ONE ROQ is required to sell through a federally regulated supply chain, known as the three-tier system, and lawfully uses this system to carry out the retail availability and home delivery of its product.

Creative Excellence

ONE ROQ will launch print, video and ground promotional assets bearing the "Escape The Ordinary," "Own Your Spirit," and "Members-Only" slogan and taglines driving focus to our company's ETHOS.

Brand Positioning

ONE ROQ will acquire the luxury and aspirational groups from the established and growing market of American vodka consumers by positioning itself as the luxury-American option.

Launch Plan

Key distributor and retailer partners have been established in the State of New York, Florida and California and are ready to begin fulfilling orders for the 1st phase of our launch.

Initial Product Line

ONE ROQ will initially focus with its line of award-winning luxury vodkas. Additional product introductions, in and outside of vodka, will be considered based on the interest and demand of our members.

Intl. Award-Winning Credentials

Presently, we believe ONE ROQ is the first-of-its-kind, gluten, sulfite and sodium free recipe targeting the growing health and allergy conscious consumer. As a people-owned spirit, we are positioning ourselves within the growing shared and decentralized economies.

Seasoned Leadership

Garrett has 14 years of professional startup and product marketing experience. Unlike a large majority of spirit start ups, Garrett has committed the initial risk capital that has allowed the company to establish a command of the industry and a differentiated strategy for success.

The Market

The \$74 Billion global beverage alcohol market is undergoing two macro trends: enormous industry consolidation into five international majors and an explosion of small, premium craft brands driven by skilled marketing and consumer demand. Vodka accounts for approximately 32% of the distilled spirits market, with the category growing at just under 6% per annum and flavored vodka growing at just under 8% per annum. The alcohol beverage market is driven by an increasing shift away from beer and wine towards spirits and in particular premium spirit brands as part of an overall movement towards "high-end" (aspirational) consumption. This macro industry trend has led to the creation of numerous start-up "craft" brands over the last ten years seeking to establish themselves as credible niche players to position themselves as acquisition targets for major industry giants. Highly profitable acquisition opportunities have resulted from industry majors focusing their marketing and distribution prowess to sell larger volumes of portfolio brands, rather than harness resources to internally develop. This market environment has led to on-going demand by these majors to acquire successful niche brands with scalable marketing strategies. Acquisition multiples ranging from 8x to 30x sales with acquisition candidacy triggered at the 30-100k cases (\$10M) per annum in gross sales can be referenced in the "Historical Acquisitions" exhibit and diagram.

Significant Market Stats

- Vodka maintains a dominant market share over all distilled spirit categories with a 10+ year track record of **continuous YOY growth** - it is the preferred spirit of consumers for ease of drinking, mixability, and price - (Source: Discuss.org)
- The total number of vodka consumers in the US is approximately 51M adults - (Source: IWSR 2018)
- 40M people on Facebook (alone) have a confirmed interest in vodka, and about three times that number in alcohol in general - (Source: Facebook.com)
- We believe the US alcoholic beverage industry sustains itself in both strong and weak economies.
- We believe, until now, owning your own luxury spirits brand was a privilege only accessible to the wealthy.

ONE ROQ is changing this.

The Historical Industry Acquisition trend illustrates that ONE ROQ needs to establish 30-50,000 cases to enter salable territory.

- Common denominator of break-through brands: 30,000 cases per year
- Ave. Acquisition Multiples: 8-30x CASE sales
- Ave. Years in operation at sale date: 3.5-4 years
- Ave. Topline Sales: \$10-20 million

ONE ROQ will aim to generate 30,000 cases in sales within 2.5 years, and case sales of 50,000-100,000 cases by years 3.5-4.

This Historical Industry Acquisition chart generated internally based on Company research.

ONE ROQ VODKA HITS \$500k IN FUNDING MARKING SUBSTANTIAL COMPANY MILESTONE

Luxury adult beverage brand, ONE ROQ Vodka Club (ONEROQClub.com) is building the foundation for its an unprecedented business model demonstrating early validation among investors and consumers alike.

Aug 5, 2019, Buffalo, NY - ONE ROQ Spirits, makers of ONE ROQ Vodka, the world's first member-owned luxury adult beverage brand, announces today it has raised **\$500k** from 1200+ of its Member-owners across the US and the world. Its early funding and development success continues to make ONE ROQ a historical brand in the liquor industry.

"In an industry where ninety percent of the volume is controlled by just twenty or so international conglomerates, not one of them and their universe of brands has offered their customers the opportunity to become owners," states Green. "ONE ROQ recognizes that consumers are demanding more from brands and the companies who prey on their minds and their dollar. So far, we remain the first and only brand in our respective industry that seems to be listening and supporting this cultural evolution - and of course, we are beyond excited that our Members will be the ones to benefit."

Last month ONE ROQ was a premier sponsor at their first celebrity gifting suite celebrating the 2019 EMMY Primetime Television EMMY Awards on September 21st. The event hosted over 90 actors, entertainers and spokespeople from the entertainment industry, all of whom visited with ONE ROQ personnel and Founder, Garrett Green with intrigue over the exciting and growing opportunity with ONE ROQ and its platform, ONEROQClub.com

More on this event to be supplied through the ORVC Member-Insider Newsletter .

Conference Call Recap

CONFERENCE CALL RECAP

Members,

As a reminder, copies of last week's [Conference Call Audio](#) and [Presentation](#) are provided here, and in our previous update below. We encourage all Members and prospective Members to review the material for update. As we were limited on time, we were able to cover just about 90% of our updates, but certainly not all. Due to this fact, we will look to reserve additional time in the 4th quarter to organize another call that will allow for more time and more fluid steps to attend as a viewer. As our first set of calls, we will be vastly improving the flow and experience moving forward.

For those who have not yet reviewed the material, there are several areas of the plan that have been enabled by our year to date funding progress. With the holiday season before us (60% of yearly industry sales are conducted between the months of September and Dec 31), we are focused on executing a hand full initiatives to drive our continued funding, development and launch progress to begin delivering value and rewards to Members.

The Major Highlights for recap include:

- **Imminent Club Launch** (Members to create unique profiles, claim perks, explore new privileges, and more)
- **Inventory Building** (New goods are on the ground in TX, FL, CA and NY and are being primed for holiday sales ; Dark Chocolate Truffle to make Christmas)
- **ONE ROQ E-commerce Price reduction and packaging enhancements** for the holiday season forthcoming
- **The ONE ROQ National RV Tour** launch to support our strategic market activations throughout the country over the next 12 to 18 months (we are currently conducting a "Cash Call" of \$100 to facilitate financing). Here is how we want to roll:

The ORVC RV "Own Your Spirit, America" Road Tour

Where to tonight? I know a place. We'll enjoy it.

Can I help you two? Right this way.

Something to drink tonight? I'll have a One Roq. Soda with lime. One Roc Martini. Extra dirty.

I do apologize, we don't carry One Roq here. That's fine. I trust you will soon enough.

Ben, please tell me you didn't forget to get my brother a graduation gift.

Of course.

Ben???

Dear Bobby, congratulations on the accomplishments. All the best. Cheers, Ben.

I like that.

And one for us?

Yes.

There you go.

Cheers to Bobby.

STARTENGINE SUBSCRIPTION PROCESS (Exhibit E)

Platform Compensation

- As compensation for the services provided by StartEngine Capital, the issuer is required to pay to StartEngine Capital a fee consisting of a 6-8% (six to eight percent) commission based on the dollar amount of securities sold in the Offering and paid upon disbursement of funds from escrow at the time of a closing. The commission is paid in cash and in securities of the Issuer identical to those offered to the public in the Offering at the sole discretion of StartEngine Capital. Additionally, the issuer must reimburse certain expenses related to the Offering. The securities issued to StartEngine Capital, if any, will be of the same class and have the same terms, conditions and rights as the securities being offered and sold by the issuer on StartEngine Capital's website.

Information Regarding Length of Time of Offering

- Investment Cancellations: Investors will have up to 48 hours prior to the end of the offering period to change their minds and cancel their investment commitments for any reason. Once within 48 hours of ending, investors will not be able to cancel for any reason, even if they make a commitment during this period.
- Material Changes: Material changes to an offering include but are not limited to: A change in minimum offering amount, change in security price, change in management, material change to financial information, etc. If an issuer makes a material change to the offering terms or other information disclosed, including a change to the offering deadline, investors will be given five business days to reconfirm their investment commitment. If investors do not reconfirm, their investment will be cancelled and the funds will be returned.

Hitting The Target Goal Early & Oversubscriptions

- StartEngine Capital will notify investors by email when the target offering amount has hit 25%, 50% and 100% of the funding goal. If the issuer hits its goal early, and the minimum offering period of 21 days has been met, the issuer can create a new target deadline at least 5 business days out. Investors will be notified of the new target deadline via email and will then have the opportunity to cancel up to 48 hours before new deadline.
- Oversubscriptions: We require all issuers to accept oversubscriptions. This may not be possible if: 1) it vaults an issuer into a different category for financial statement requirements (and they do not have the requisite financial statements); or 2) they reach \$1.07M in investments. In the event of an oversubscription, shares will be allocated at the discretion of the issuer.
- If the sum of the investment commitments does not equal or exceed the target offering amount at the offering deadline, no securities will be sold in the offering, investment commitments will be cancelled and committed funds will be returned.
- If a StartEngine issuer reaches its target offering amount prior to the deadline, it may conduct an initial closing of the offering early if they provide notice of the new offering deadline at least five business days prior to the new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). StartEngine will notify investors when the issuer meets its

target offering amount. Thereafter, the issuer may conduct additional closings until the offering deadline.

Minimum and Maximum Investment Amounts

- In order to invest, to commit to an investment or to communicate on our platform, users must open an account on StartEngine Capital and provide certain personal and non-personal information including information related to income, net worth, and other investments.
- Investor Limitations: Investors are limited in how much they can invest on all crowdfunding offerings during any 12-month period. The limitation on how much they can invest depends on their net worth (excluding the value of their primary residence) and annual income. If either their annual income or net worth is less than \$107,000, then during any 12-month period, they can invest up to the greater of either \$2,200 or 5% of the lesser of their annual income or net worth. If both their annual income and net worth are equal to or more than \$107,000, then during any 12-month period, they can invest up to 10% of annual income or net worth, whichever is less, but their investments cannot exceed \$107,000.
