BUSINESS AND ANTICIPATED BUSINESS PLAN

7. Describe in detail the business of the issuer and the anticipated business plan of the issuer.

Mission Statement – To consistently raise the bar of the customer experience by treating their time as a top priority. Offering made-to-order coffee beverages, we will set new expectations of taste, quality, and expediency of service.

OBJECTIVE – To raise capital for an initial brick and mortar drive thru. From this starting point, Hillhouse plans to scale nationally by building on its superior business model through disruption of competitors and value creation for customers.

Executive Summary

HillHouse Coffee is setting the direction on the future of drive-thru coffee service with its incorporation of exclusive processes into the company’s operations. With the inclusion of these methods, Hillhouse has an unmatched advantage in the coffee marketplace - the speed of service coupled with top tier quality coffee beverages. . With the target of making major inroads to scale nationally, the plan that follows details the specific operations and strategies needed, to launch the first of many locations.

The Problem: In this fast paced world, saving time for the demands of our personal and professional life is more important than ever before. Waiting in a drive thru line for 10+ minutes to get your coffee has become the status quo. When the first drive thru opened in 1947, the goal was to offer a higher level of expediency and high-quality customer service. Since the adaption of the drive thru model in the coffee industry (1990), time consuming business operations and complicated menu offerings have bogged down the ability of the drive model to execute the intended goal of swift service. Coffee chains, from blue chip corporations to the mom & pop café down the street, have accepted the time required for the customer to get their drive thru coffee as an unavoidable truth.

The Solution: Hillhouse Coffee utilizes a proprietary method of concentrated coffee extraction, allowing each hot & iced drink item to be made in under a minute. This accelerated service does not compromise the quality or taste of the coffee drink. This proprietary process involves no sneaky “pre-made” step or other debauchery to execute said offering. Through Hillhouse’s application of kegerators and nitrogen, we provide customers with a great tasting, full bodied, highly caffeinated coffee drink – in the customer's hand in a fraction of the time, when compared to other coffee providers. The magnitude of Hillhouse’s operational supremacy, combined with the convenience of a drive thru, will render the competition obsolete.

The marketplace is a rat race to compete on innovative ideas and services. Leaving competition behind requires a company and its activities to have an innovative configuration that is hard to copy, all while boosting margins and capturing new customers to the market. HillHouse Coffee adheres to a pragmatic, effective strategy for disrupting the competition – by offering timeless, well-known coffee beverages at a high quality that is consistently the fastest in the market. Our vision for growth is fueled by our high-quality menu items fused with the greatly reduced wait time for the customer. Building and retaining loyal customers is a key activity that HillHouse aims to acquire by offering an experience that saves the customer valuable time. We understand that the pressing matters of our customers' lives require minutes on the clock. Hillhouse will replace those wasted minutes spent waiting for coffee with a transforming, convenient experience.

RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

8. Discuss the material factors that make an investment in the issuer speculative or risky:

- **We are controlled by our officers and directors.** Our officers and directors currently hold all of our voting stock, and at the conclusion of this offering will continue to hold a majority of the company's common stock. Investors in this offering will not have the ability to control a vote by the stockholders or the board of directors.

- **It is difficult for us to accurately predict our earnings potential.** Because of our short operating history, it is more difficult to accurately assess growth rate and earnings potential. It is possible that our company will face many difficulties typical for early stage companies.

- **We are selling convertible notes.** The convertible notes will convert into equity securities in the event that the company: 1) sells preferred stock to outside investors where we raise at least \$1 million; 2) we sell all the company's assets, merge with another company, or are taken over by another company; or 3) upon the maturity of the notes. This means that investors will have to wait until a conversion event occurs to know what size stake they have in the company, or what its value might be as assessed by outside investors. An outside investor may value the company at an amount below the \$3 million valuation cap in the convertible note. The valuation cap is not an indication of the company's current value.

Our success is dependent on our key personnel. We believe that our success will depend on the continued employment of our senior management and key personnel. If one or more members of our senior management were unable or unwilling to continue in their present positions, our business and operations could be disrupted and this could put the overall business at risk, and therefore investors could be at risk of losing their investments.

Projections are speculative and are based upon a number of assumptions. Any projected financial results prepared by or on behalf of the Company have not been independently reviewed, analyzed, or otherwise passed upon. Such "forward-looking" statements are based on various assumptions, which assumptions may prove to be incorrect. Such assumptions include, but are not limited to (i) the future status of local, regional and international economies, (ii) anticipated demand for our products, (iii) anticipated costs associated with the development, marketing, sales and distribution of our products, and (iv) anticipated procurement and retention of a customer base. Accordingly, there can be no assurance that such projections, assumptions, and statements will accurately predict future events or actual performance. Any projections of cash flow should be considered speculative and are qualified in their entirety by the

assumptions, information and risks disclosed in this Memorandum. Investors are advised to consult with their own independent tax and business advisors concerning the validity and reasonableness of the factual, accounting and tax assumptions. No representations or warranties whatsoever are made by the Company, its affiliates or any other person or entity as to the future profitability of the Company or the results of making an investment in the Shares. If our future projections end up being significantly different than currently projected, our business could be greatly impacted. Our business therefore may not be able to sustain itself without the projected future revenues. The business could be at risk of closing, and investors may therefore be at risk of losing their investments.

We may not effectively manage growth. The anticipated growth of the Company’s business will result in a corresponding growth in the demands on the Company’s management and its operating infrastructure and internal controls. While we are planning for managed growth, any future growth may strain resources and operational, financial, human and management information systems, which may not be adequate to support the Company’s operations and will require the Company to develop further management systems and procedures. There can be no guarantee that the Company will be able to develop such systems or procedures effectively on a timely basis. The failure to do so could have a material adverse effect upon the Company’s business, operating results and financial condition. Investors could therefore be at risk of losing their investments if growth is not managed effectively.

We expect our expenses to grow as the Company grows. Our expenses will increase as we build infrastructure to implement our business plan. For example, we may hire additional employees, expand our product offerings, and lease more space for our corporate offices. This poses a risk to the financial forecasts and current financial model of the Company.

The Company may require additional financing to support working capital needs. The Company may need to explore additional financing transactions that management determines are in the best interest of the Company, including, without limitation, commercial debt transactions, private offerings of debt or equity securities, a rights offering, and other strategic alternatives. Such additional financing may not be available to the Company, or, if available, the Company may be unable to undertake such additional financing on terms that are advantageous to the Company. If the Company fails to raise additional capital in such an offering, or through other fund raising efforts, such a failure could have a material adverse effect on the Company, and investors in this Offering could be at greater risk of losing their investments due to the inability of the business to proceed with enough working capital to effectively run the Company.

Many of our competitors have greater brand recognition and greater financial, marketing and other resources. Many of our competitors have greater brand recognition, and greater financial, marketing, and other resources than the Company. This may place us at a disadvantage in responding to our competitors’ pricing strategies, technological advances, advertising campaigns, strategic alliances and other initiatives. Consequently, such competitors may be in a better position than the Company to take advantage of customer acquisition and business opportunities, and devote greater resources to marketing and sale of their product offerings. There cannot be any certainty that the Company will be able to compete successfully. If the Company cannot break through and compete successfully, investors may be at risk of losing their investment.

Management has broad discretion as to the use of proceeds. The net proceeds from this Offering will be used for the purposes described under “USE OF PROCEEDS.” The Company reserves the right to use the funds obtained from this Offering and the Debt Offering for other similar purposes not presently contemplated, which it deems to be

in the best interests of the Company in order to address changed circumstances or opportunities. This poses a risk to an investor should they be relying on current use of proceed forecasts for the investment as business conditions may require a change of the use of these funds.

Management has voting control of the Company. Management of the Company presently holds a majority of the issued and outstanding voting common stock in the Company. Due to their stock ownership and positions with the Company, the current officers will be in a position to continue to control the affairs and management of the Company after the Offering. Investors must rely entirely on our management to govern the affairs of the Company.

We operate in intensely competitive and dynamic industries, and our ability to successfully compete and continue to grow our business depends on our ability to respond quickly to market changes and changing technologies and to bring competitive new solutions and services to market in a timely fashion. The market for mobile accessories and second screen products is intensely competitive, dynamically evolving and subject to rapid technological and innovative changes. Development of new proprietary technology or products is complex, entails significant time and expense and may not be successful. We cannot guarantee that we will be able to introduce new solutions or products on schedule, or at all, nor can we guarantee that such solutions or products will achieve market acceptance. Moreover, we cannot guarantee that errors will not be found in our new solution releases or products before or after commercial release, which could result in solution or product delivery redevelopment costs, harm to our reputation, lost sales, license terminations or renegotiations, product liability claims, diversion of resources to remedy errors and loss of, or delay in, market acceptance.

Other economic and public health conditions in the markets in which we operate, including rising commodity and fuel prices, higher labor costs, increased transportation costs, natural disasters, terrorist attacks, outbreaks of public health pandemics or other diseases, or third party conduct could negatively impact our business. Various economic and public health conditions can have a significant negative impact on our business. Significant increases in the costs of other products, which are required by consumers, such as gasoline, home heating fuels, or groceries, may reduce discretionary spending by our target market, which would negatively impact our business. Economic conditions may also be negatively impacted by terrorist attacks, wars and other conflicts, increases in critical commodity prices, or the prospect of such events. Such a weakened economic and business climate, as well as consumer uncertainty created by such a climate, could harm our revenues and profitability.

In addition to experiencing potentially lower or no revenues from our products during times of economic difficulty, in an effort to maintain sales during such times we may need to reduce the price of our products, increase our promotional spending, or take other steps to encourage consumer purchases of our products. Those steps may lower our net revenues, if any, decrease our operating margins, increase our costs and/or lower our profitability, to the extent it is ever achieved.

Operational risks. Supply chain matters are not entirely controllable. First, component vendors could fail to supply key inputs in a timely manner, with sufficient levels of quality, or at a scalable price. Second, manufacturers could fail to deliver finished goods in a timely manner or with sufficient levels of quality. If any of our third party vendors or suppliers were to change product offerings, cease actively supporting our technologies, fail to update and enhance technologies to keep pace with changing industry standards, encounter technical difficulties in the continuing development of these technologies, significantly increase prices, terminate our licenses or supply contracts, suffer significant capacity constraints or suffer significant disruptions, we would need to seek alternative suppliers and incur

additional internal or external development costs to ensure continued performance and productions of our solutions, products and services. Such alternatives may not be available on attractive terms, or may not be as widely accepted or as effective as the intellectual property, components, or technology provided by our existing suppliers. If the cost of licensing, purchasing or maintaining the third party intellectual property, components, or technology significantly increases, our expenses could increase, and our operating earnings, if any, could significantly decrease. In addition, interruption in the functionality or production of our solutions, products and services as a result of changes in third party suppliers could adversely affect our commitments to customers, future sales of solutions, products and services, and negatively affect our revenue and operating earnings.

Team risks. Our core strategic team is small, consisting of two co-founders, but our key activities (e.g., R&D and operations) are presently outsourced to third parties, though closely managed. The two co-founders have developed a collegial and effective working relationship through nearly 5 years of working together. To mitigate team risk, we will seek to internalize key activities as a direct result of additional financing.

There is no minimum capitalization for this offering and investors' subscription funds will be used by us as soon as they are received. There is no minimum capitalization required in this Offering. There is no assurance that all or a significant number of Shares may be sold in this Offering. We will use investors' subscription funds as soon as they are received. If only small portions of the Shares are placed, then we may not have sufficient capital to operate. There is no assurance that we could obtain additional financing or capital from any source, or that such financing or capital would be available to us on terms acceptable to us. Under such circumstances, the project would need to be scaled down, and would have a material adverse effect on our business.

Future capital needs; Dilution. The Company believes that the net proceeds of the Offering of the Shares will be sufficient to fund the implementation of the Company's business plan, operations and growth for the foreseeable future, assuming that it sells all 617,284 Shares offered hereby and that the revenue forecasts for the first 12 months are substantially achieved. Nevertheless, in the event that additional capital is required, no assurance can be given that additional financing will be available at all or on terms favorable to the Company. If adequate funds were not available to satisfy either short or long term capital requirements, the Company may be unable to continue in business, with a resulting loss of all or part of investments made by the Company's investors. Moreover, if additional equity securities are issued in connection with future financings, the ownership percentages of then shareholders could be diluted. Dilution of ownership percentages may also occur as a result of equity securities issued pursuant to possible sales or grants to existing shareholders, officers, managers, consultants, advisors, and/or employees.

Additional unforeseen risks. In addition to the risks described in this section, "RISK FACTORS," and elsewhere in this Memorandum, other risks not presently foreseeable could negatively impact our business, could disrupt our operations and could cause the Company to fail. Ultimately, each investor in the Shares bears the risk of a complete and total loss of his/her/its investment.

Management has broad discretion as to the use of proceeds. The net proceeds from this Securities Offering will be used for the purposes described under "USE OF PROCEEDS." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated, which it deems to be in the best interests of the Company in order to address changed circumstances or opportunities. This poses a risk to an investor should they be relying on current use of proceeds forecasts for the investment as business conditions may require a change of the use of these funds.

Public health epidemics or outbreaks could adversely impact our business. In December 2019, a novel strain of coronavirus (COVID-19) emerged in Wuhan, Hubei Province, China. While initially the outbreak was largely concentrated in China and caused significant disruptions to its economy, it has now spread to several other countries and infections have been reported globally. The extent to which the coronavirus impacts our operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the duration of the outbreak, new information which may emerge concerning the severity of the coronavirus and the actions to contain the coronavirus or treat its impact, among others. In particular, the continued spread of the coronavirus globally could adversely impact our operations, and could have an adverse impact on our business and our financial results.

If we make mistakes or have unforeseen things happen to us, our suppliers, or the world, we can make little or no profit and can be driven out of business.

THE BOTTOM LINE:

Investment in the securities of smaller companies can involve greater risk than is generally associated with investment in larger, more established companies. All investments can result in significant or total loss of your loan and/or investment. If we do well, the stock should do well also, yet life offers no guarantees and neither can we. If we make mistakes or have unforeseen things happen to us, our suppliers or the world, we can make little or no profit and can be driven out of business. We cannot guarantee success, return on investment, or repayment of loans.

Please only invest what you can afford to lose.

21. How are the securities being offered being valued? Include examples of methods for how such securities may be valued by the issuer in the future, including during subsequent corporate actions.

The valuation of the company has been performed based on the issuers' qualitative and financial information, including but not limited to: 1. the quality, size and experience of the management team; 2.- the market of reference and business model; 3. the product/service and customers' feedback; 4. - the presence of strategic partnerships as well as external investors; 5. - the presence of relevant IP and/or legal risks; 6. - the current financial performance of the company; 7. - the projected financial performance of the company.

This information is combined with market-industry data, provided by a comprehensive valuation software, to come up with a comprehensive valuation estimate based on 5 different valuation models, 2 based on a qualitative assessment (named Scorecard and Check-List) and 3 based financial projections (namely: VC method, Discounted Cash Flows with Multiples, and Discounted Cash Flows with Long-Term Growth).

These methods are combined in a weighted average that applies the weights (see above image) according to the stage of development of the company (assessed by the valuation software), giving more emphasis on the 2 qualitative methods for early-stage businesses, and vice versa.

The weights for the above mentioned valuation methods are: Scorecard (32%), Check-list (32%), Venture Capital (16%), DCF- Long Term Growth (10%), and DCF with Multiples (10%).

The full valuation report (17 pages) is part of this offering and is to be found in the Offering’s Documents Section.

The valuation was calculated at pre-money **\$3,008,252**.

Target Offering	1,000	\$10,000	\$9,200
Maximum Amount	25,000	\$250,000	\$230,000

22. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

The right to demand current distributions from an operating business is limited. A majority owner, if she is committed to avoiding any distributions to a minority owner, can usually avoid making any distributions of profits. By establishing generous reserves for future expenses, paying a salary to herself or her relatives at the high range of what is reasonable, pre-paying expenses, investing in new business or new equipment, leasing expensive cars, etc., a majority owner can spend enough that there are rarely any profits to be distributed. So long as the expenses are not grossly unreasonable, the investor, probably, won't be able to force the company to allow you to share in any of the current income of the company.

No right to participate in any management decisions of the company. The majority owner may make a decision that the investor think is bad and puts your interest in the company at risk. The investor may see the majority owner running the company into the ground. The investor can try to convince him that it is the wrong decision, but he doesn't have to take your calls.

The investor has limited rights, if any, to have your interest bought out. You may want to cash out your interest and do other things with the money. State law may give you the right to force the company to buy you out, but these rights are limited.

While the investor would be entitled to a share of any profits on sale of the entire business, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

23. What are the risks to purchasers associated with corporate actions including:

- **Additional issuances of securities:**

Following the investor's investment in the Company, the Company may sell interest to additional investors, which will dilute the percentage interest of the investor in the Company. The Investor might have the opportunity to increase its investment in the Company in such transaction, but such opportunity cannot be assured. The amount of additional capital needed by the Company, if any, will depend upon the maturity and the objectives of the Company.

- **Issuer repurchases of securities:**

The company may have the authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the investor to sell its securities to the Company concurrently.

- **A sale of the issuer or of assets of the issuer:**

As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders.

- **Transactions with related parties:**

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and the Board of Directors of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with

By acquiring and interest in the company, the investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waives any claim with respect to any liability arising from the existence of any such conflict of interest.

24. Describe the material terms of any indebtedness of the issuer:

The Company has no material indebtedness at this time.

Was or is the issuer or any entities controlled by or under common control with the issuer a party to any transaction since the beginning of the issuer’s last fiscal year, or any currently proposed transaction, where the amount involved exceeds five percent of the aggregate amount of capital raised by the issuer in reliance on Section 4(a)(6) of the Securities Act during the preceding 12-month period, including the amount the issuer seeks to raise in the current offering, in which any of the following persons had or is to have a direct or indirect material interest:
