## Summary

My vision is to awaken and champion within every individual, the capacity for deeper self-awareness, unbounded creativity and a more expanded perspective towards transformation, where those individuals can thrive, connect and excel. Through human-to-human connection, we can ignite the best versions of ourselves and connect to the part of us that brings us closer to our True Self. At Sholder, I help develop, bolster, and cultivate a rich community of like-hearted individuals, who are eager and thirsty for deep, informative work that helps impact both themselves and the lives around them. We are Space Holders, a community of souls here to open the possibility to "What If".
