### Risks Related to Our Business

**The company has a single point of manufacturing, which means that any disruption or shutdown of its production facility could adversely affect its ability to meet customer demand, generate revenue, and maintain its competitive position.**

The company may not be able to quickly or cost-effectively resume or relocate its operations in the event of a natural disaster, fire, power outage, labor strike, equipment failure, or other unforeseen event that affects its manufacturing site.

**The company relies on a municipal water source for the supply of water, which is a key ingredient in its product.**

Any contamination, shortage, interruption, or price increase of the water supply could negatively impact the quality, quantity, and cost of the company's product. The company does not have any alternative or backup water sources or contingency plans in place to mitigate this risk.

**The company has a small management team consisting of two people who make all the strategic and operational decisions for the business.**

The loss of either or both of these individuals could significantly impair the company's ability to execute its business plan, maintain its relationships with customers and suppliers, and comply with its legal and regulatory obligations. The company does not have any succession plan or key person insurance to address this risk.

**The company operates on a cash basis, which means that it does not have any long-term contracts or agreements with its customers.**

The company's revenue and cash flow depend on its ability to sell and deliver its product to convenience stores on a regular basis. The company faces the risk of losing customers due to competition, changing consumer preferences, economic downturns, or other factors that may reduce the demand for its product. The company also faces the risk of delayed or non-payment from its customers, which could adversely affect its liquidity and working capital.

**The company is highly dependent on the convenience store channel for its sales and distribution.**

The company self-distributes its product using its own equipment and personnel. The company faces the risk of losing access to this channel due to changes in store policies, shelf space allocation, pricing, or other factors that may favor other products or suppliers. The company also faces the risk of equipment breakdowns, accidents, thefts, or other incidents that may disrupt its distribution operations and increase its costs.

**The company leases its building from a third-party landlord.**

The lease agreement is subject to periodic renewal and rent adjustments. The company faces the risk of losing its premises or paying higher rent in the future, which could negatively affect its production capacity and profitability. The company does not have any option to purchase or extend the lease agreement beyond its current term.

**We may not be able to raise the additional funding needed to fully implement our business plan.**

Additional funding may be required subsequently even if our offering is fully funded. If this is the case, we may also need additional capital in the future. The amount of additional capital needed is dependent on many factors. If additional funding would be needed but not obtained, you may lose your entire investment.

**If we obtain additional equity financing, your ownership interest will be diluted.**

While not currently planned, if we subsequently determine there is a need for additional financing and decide to issue additional equity securities, such issuance(s) will dilute your ownership interest in the Company.

**Series and Future membership may be senior to your future equity Interests.**

If the Company issues new membership units, which it may do in its sole discretion, the new classes of stock may be senior to these equity Interests.

**Our business projections are merely estimates.**

Our business estimates are subjective and there can be no guarantees that we will meet those projections. There are no guarantees that Sateri Group will become profitable.

**The Managers own all the voting rights.**

It will be very difficult for the Members to remove the management team members without their approval. The management team will have control over all aspects of operation.

## Risks Related to this Offering

**The company makes certain claims about the benefits and advantages of its product based on public water studies.**

These claims are highly subjective and may not be supported by scientific evidence or verified by independent third parties. The company faces the risk of legal action, regulatory scrutiny, consumer complaints, or negative publicity if its claims are found to be false, misleading, or unsubstantiated. The company does not have any product liability insurance to cover this risk.

**The company operates in a highly competitive and rapidly evolving market.**

The company faces competition from existing and potential competitors who may offer similar or superior products at lower prices or with better marketing strategies. The company also faces competition from new technologies or innovations that may render its product obsolete or less desirable. The company may not be able to compete effectively or maintain its market share in the face of such competition.

**The company is currently not profitable and has accumulated significant losses since its inception.**

The company expects to incur further losses in the foreseeable future as it invests in expanding its production capacity, distribution network, marketing activities, and research and development efforts. There is no guarantee that the company will ever achieve or sustain profitability or positive cash flow. The company may need to raise additional capital from external sources to fund its operations and growth plans, which may not be available on favorable terms or at all.

**Our Managers have unlimited discretion as to the use of proceeds from this offering.**

Our Managers have discretion regarding the use of proceeds that we will receive from this offering, both by being Managers and by virtue of having all the voting Units in the company. We cannot assure you that any Manager will apply these funds effectively. Additionally, we cannot assure you that our use of the proceeds will be successful in generating the interest in our business model necessary to produce sufficient revenues to stay in business.

**The Security Interests being offered are illiquid and not freely transferable.**

The Security Interests we are offering will not be registered under the Securities Act or qualified under applicable state securities laws and may not be resold unless registered (and qualified) or an exemption from registration (and qualification) is available. There is no public market for the interests, and we do not expect that any such market will develop. In addition, there are restrictions on the transferability of the interests pursuant to the terms of the Operating Agreement. If you invest in the Security Interests, you should expect to hold the Units for an indefinite period of time.

**The offering price may not accurately reflect the value of the Security Interests.**

The pricing of the Security Interests which we are offering was determined subjectively. The pricing is not based on any conventional pricing criteria such as the liquidation value of the Stock or a multiple of net earnings per Unit. We have not obtained any third-party valuations of the Company or Security Interests.

**The rights of the Security Interests in this offering differ in various respects from the other classes of Stocks or Membership Units, including that these Security Interests have no voting rights.**

The Company currently has two classes of stocks outstanding. Voting Common Interests, and Non-Voting Convertible Units, pursuant to this offering. The Voting Common Interests are

substantially similar to the common stock of a corporation in that the holders of the Voting Common Interests will only receive a return on their investment after all creditors of the Company have been paid and non-voting common Interests have also been paid.

**The Voting Common Interests have “drag-along” rights and can force all Director interests to sell their respective Interests in the event of a merger or an asset sale.**

A majority of Voting Common Interests may elect to sell the Company’s Member Interests to a third party. In such an instance, a majority of the Voting Common Interests is permitted to force the other Members to sell their Interests on the same terms as the Voting Common Member Interests are being sold.

**The Manager has the right to transfer Interests to others without offering those Interests to be purchased by other Members.**

Managers may transfer a portion of their Voting Common Interests that they currently hold, at their discretion, without offering other Members the right to purchase said Interests. The intent is for the Managers to use these Interests to compensate employees or future officers in exchange for services.

#### **Buy-out Rights**

The Sateri Group, LLC may redeem an investors’ securities at **any point one year after the close of this offering**. The price per Unit of the securities in such redemption is the fair market value as determined by the majority shareholder of the company after considering a third-party determination relating thereto procured by the majority shareholder from a qualified appraiser.

## Other Material Information

Investors should understand the potential for ownership of The Sateri Group, LLC to be diluted due to The Sateri Group, LLC issuing additional Units of stock. In other words, when the Company issues more Units, the percentage of the Company that an investor participating in this Regulation Crowdfunding offering will own will decrease, even though the value of The Sateri Group, LLC may increase. Such investors will own a smaller Unit of the aggregate outstanding capital stock of The Sateri Group, LLC

Such increases in number of Units of The Sateri Group, LLC capital stock outstanding could be the result of another stock offering, employee restricted stock grants, employees exercising stock options, or conversion of certain instruments (e.g., convertible notes, preferred Units or warrants) into Units of the capital stock of The Sateri Group, LLC. If The Sateri Group, LLC issues more Units, an investor could experience value dilution, with each Unit being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per Unit if newly authorized and issued securities included stated dividend provisions.

Importantly, The Sateri Group, LLC may issue preferred Units in the future that include liquidation preferences to which the Non-Voting Common Stock is subordinated. Such preferences could diminish the residual proceeds of any liquidity event in which holders of Non-voting Common Stock would otherwise be able to participate.

If you are making an investment expecting to own a certain percentage of The Sateri Group, LLC or expecting each Unit to hold a certain amount of value, it is important to realize how the value of Units of Non-Voting Common Stock Units can decrease by actions taken by the Company. Dilution can make drastic changes to the value of each Unit, ownership percentage, voting control, and earnings per Unit.

There is a high probability that The Sateri Group, LLC will need additional financing in the future. To the extent such financing is executed through the issuance of additional Units of capital stock (as opposed to incurring indebtedness), any investor participating in this offering will be diluted. To the extent that such financing is executed by The Sateri Group, LLC by incurring indebtedness, the value of the Non-Voting Common Stock of any investor participating in this offering will be at risk if The Sateri Group, LLC is unable to repay such indebtedness.
