### UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

## Form 6-K

# REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER THE SECURITIES EXCHANGE ACT OF 1934

Report on Form 6-K for November 21, 2014

Commission File Number 1-31615

Sasol Limited 1 Sturdee Avenue Rosebank 2196 South Africa

(Name and address of registrant's principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-FX Form 40-F
Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):
<b>Note</b> : Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.
Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):
<b>Note</b> : Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.
Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.
Yes NoX
If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82

Changes to segment reporting

Dear stakeholder,

One of the cornerstones of Sasol's past successes stemmed from our diverse businesses and activities being organised along an integrated value chain. While our value chain remains integrated, over the past decade we established and drove independent businesses within Sasol founded on a product-based operating model. Over time, organising our businesses in this manner resulted in increased complexity, leading to slower decision-making, higher costs and greater time required for internal alignment and coordination. To bring greater focus and increased simplicity to how Sasol is structured and managed, we have streamlined our corporate structures and reorganised our businesses from a product-based operating model to one based on our value chain.

Our new operating model, and a simplified and consolidated legal structure, came into effect on 1 July 2014. The new operating model aligns the components of Sasol - operating business units, regional operating hubs, strategic business units, and group functions - according to a single value chain, focused on the production of liquid fuels, high-value chemicals and low-carbon electricity, as outlined below:

- The Operating Business Units comprise our mining and upstream oil and gas activities, focusing mainly on securing feedstock supply;
- The Regional Operating Hubs include our operations in Southern Africa, United States and Eurasia, focusing on sustaining asset management and performance while delivering to plan and optimising the total cost of production;
- The Strategic Business Units focus on our commercial and enhanced customer interfaces within the energy and chemicals arenas, and on optimising business performance through marketing and sales excellence; and
- Our group functions deliver fit-for-purpose business support services and solutions.

To reflect our new operating model, our financial reporting has been updated and new reportable segments will accordingly be restated and presented in the group financial statements for 2015. To keep our stakeholders informed, and to assist investors during our transition, this document provides information on the restated segment disclosures for the financial years ended 30 June 2014 and 2013, and for the six months ended 31 December 2013. Additional supplementary information, which includes a segment overview document, is available on our website at www.sasol.com. This information is preliminary and has not been audited or reviewed by Sasol's auditors.

Paul Victor Acting Chief Financial Officer 21 November 2014 Johannesburg

#### 1. Overview of new operating model

Our previous operating model added both cost and complexity to the organisation. Complex structures, work processes, policies and procedures resulted in slower decision-making and reduced organisational effectiveness.

Accordingly, we moved from our previous model that focused on product lines to a new integrated operating model which has been structured along our value chain.

Our new group structure is presented below:

Operating Business Units	Regional	Operating Hubs	Strategic Business Units			
	Southern Africa	International Operations	Energy Business	Chemicals Business		
	Operations					
Mining	Secunda Synfuels	United States Operations	Southern Africa Energy	Base Chemicals		
Exploration and Production	Secunda Chemicals	Eurasian Operations	International Energy	Performance Chemicals		
International	Sasolburg					
	Natref					
	Satellite Operations					
		Group Functions				

#### 2. Overview of segmental reporting changes

In terms of International Financial Reporting Standard (IFRS) 8, Operating Segments, segmental reporting should reflect how the business is managed and how the results are reported to the Chief Operating Decision Maker (CODM). The CODM for Sasol is the President and Chief Executive Officer. The seven reportable segments have been defined as follows:

Operating Business Units (OBUs)

- 1. Mining comprises our mining activities in South Africa. We mine approximately 40 million tons (Mt) of saleable coal per year, mostly for gasification feedstock and utility consumption at our complexes in Secunda and Sasolburg, in South Africa. We also export approximately 2,9 Mt of coal annually.
- 2. Exploration and Production International manages our oil and natural gas exploration and production interests in West and Southern Africa, Canada and Australia. We pursue opportunities for the exploration, appraisal, development and production of hydrocarbon resources to supply feedstock to existing or potential future Sasol downstream plants and external customers.

Strategic Business Units (SBUs)

- 3. Southern Africa Energy comprises the sales and marketing of liquid fuels, natural gas and electricity. We market approximately 9 billion litres of liquid fuels annually, blended from fuel components produced by the Secunda Synfuels operations, crude oil refined at Natref, and external product purchases. We procure crude oil, refined through Sasol's interest in the Natref refinery and market more than 450 million standard cubic feet per day (mmscf/d) of natural and methane-rich gas. We also generate electricity which is then sold into the grid or consumed by our operations.
- 4. International Energy develops, implements, and manages our international business ventures based on Sasol's proprietary gas-to-liquids (GTL) technology. Our focus is on securing opportunities to advance Sasol's GTL strategy. Sasol's investments in existing and future GTL ventures, including ORYX GTL in Qatar and Escravos GTL (EGTL) in Nigeria are components of this reportable segment.
- 5. Base Chemicals comprises the sales and marketing of ethylene, propylene, polyethylene, polypropylene, polyvinyl chloride, chlor alkali chemicals, mining reagents, solvents (ketones and alcohols) and acrylates to domestic and international customers. Our chemical products are produced in various regional operating hubs depending on the geographical location. We also have joint venture monomer and polymer interests in Malaysia and marketing facilities in China. We also market other products such as fertilisers and mining explosive products.
- 6. Performance Chemicals comprises the sales and marketing of surfactants, linear alkylbenzene, surfactant intermediates, n-paraffins, n-olefins, C6-C22 alcohols, co-monomers, ethylene and other organic intermediates to customers worldwide as well as specialty aluminas, silica aluminas and hydrotalcites. We also market other products such as waxes and phenolics. Our chemical products are produced in various regional operating hubs depending on the geographical location.

Group Functions

7. Comprises our technology research and development activities, as well as our central treasury and financing activities.

Segmental reporting of the new operating model

The key changes from the previous reportable segments to the new reportable segments are depicted below:

PREVIOUS SEGMENTAL REPORTING		NEW SEGMENTAL REPORTING				
Previous reporting clusters Previous reporting segments			New reporting segments			
SA Energy	Mining	Operating BUs	Mining			
	Gas		Exploration and Production			
	Synfuels		International			
	Oil					
	Other					
International Energy	Synfuels International	Strategic BUs	Southern Africa Energy			
	Petroleum International		International Energy			
			Base Chemicals			
Chemicals	Polymers		Performance Chemicals			
	Solvents					
	O&S					
	Other Chemical					
	Businesses					
Other	Other	Other	Group Functions			

Going forward, we will no longer apply the clustering approach. Accordingly, we will report on reportable segments only.

#### Regional Operating Hubs (ROHs)

The ROHs, which include our operations in Southern Africa, North America and Eurasia, houses our current and future operating capacity, and enable the functioning of these operations as integrated manufacturing sites with consolidated functional support. They operate assets on behalf of the SBUs and are accountable for delivering against agreed safety, cost, volume and specifications targets set by the SBUs, within the context of a group-wide plan. They are responsible for ensuring plant efficiency and optimising the total cost of production.

In terms of IFRS 8, the ROHs do not meet the quantitative criteria for disclosure as separate reportable segments, since the profit and loss accountability resides in the SBUs. The ROHs, where the responsibility for optimally operating the Sasol plants resides, will be measured by key performance indicators only.

The costs in the ROHs are passed through the value chain to the SBUs. Fixed assets, including assets under construction and liabilities (including rehabilitation provisions) which are separately identifiable, and directly linked to a SBU, are allocated to specific SBUs. Other common assets and liabilities (which cannot be directly linked to a SBU) are split across the SBUs based on product costing principles.

#### 3. Accounting policies

The accounting policies of the group are not impacted by the change to the new operating model or the change in reportable segments. The group's latest accounting policies can be found in the Consolidated Annual Financial Statements for the year ended 30 June 2014 on www.sasol.com.

#### 4. Geographical segments

The group operates predominantly in the following geographic areas and in evaluating our reportable segments, we have redefined our geographic segments as follows:

- South Africa
- Rest of Africa
  - Mozambique
  - Other areas in Africa
- Europe
  - Germany
  - Rest of Europe
- Americas
  - United States
  - Canada
  - Rest of Americas
- Asia, Australasia and Middle East

In future, our geographical segments will be based on the categories presented above.

#### 5. Simplified and consolidated legal structure

To realise greater efficiencies along our integrated value chain, we have simplified and consolidated our legal structures to reduce statutory compliance for the separate financial statements, work processes and related costs. The new legal structure also enables us to operate the company as one integrated business, by producing and selling what maximises value for the whole Sasol group.

The information presented in the Sasol Limited group's primary financial statements are based on the legal structure which complies with IFRS, JSE and SEC regulations as well as the Companies Act of South Africa. Our segmental reporting

however reflects how the business is managed and may therefore not correlate directly to our legal structure.

6. Supplementary information on the Sasol website

For a more detailed understanding of the new operating model, we refer you to our non-statutory submissions contained on our website at www.sasol.com. These submissions include the following:

- Segment overview document This document provides further context for the changes to the new operating model and a summary of the integration and interface principles which we applied.
- Business performance metrics This document contains key metrics, volumes and statistics for the OBUs, ROHs and SBUs. This document replaces the business unit pages in the Analyst Book.
- Summarised earnings model Simplified earnings and asset valuation model which will assist analysts and investors in understanding the new operating model. This model is based on historical information only and contains no forward looking references or information.
- 7. Investor Relations contacts

For assistance in understanding or questions related to our new operating model, please contact us as follows:

Web: investor.relations@sasol.com

Tel: +27 11 441 3113

Sponsor: Deutsche Securities (SA) Proprietary Limited

8. Restated financial reporting data under the new operating model

Our unaudited restated financial reporting segment data is presented below for the years ended 30 June 2014 and 30 June 2013, and the half year ended 31 December 2013.

The restatement of the financial reporting segment data did not have an impact on the primary financial statements of the Sasol Limited group. The elements of the primary financial statements include the statement of financial position, income statement, statement of changes in equity, statement of cash flows and statement of comprehensive income.

As we continue to implement our new operating model, there may be further refinement to the data presented, however, we do not expect material changes to be made.
