("Sasol" or "the Company")

SASOL'S LOW-DENSITY POLYETHYLENE (LDPE) UNIT AT LAKE CHARLES ACHIEVES BENEFICIAL OPERATION

Sasol is pleased to announce that the LDPE unit at the Lake Charles Chemicals Project (LCCP) achieved beneficial operation on 15 November 2020. This unit, which was damaged in a fire during commissioning in January 2020, is the last of seven units to be brought into operation. The LCCP is now 100 percent complete with total capital expenditure forecast to be within the previously communicated guidance of US\$12,8 billion.

The LDPE unit, which uses ExxonMobil technology, has a nameplate capacity of 420 kilotons per annum, making it one of the largest of its kind in the world. The LDPE unit is one of the three LCCP plants that will form part of the Sasol/LyondellBasell Louisiana Integrated Polyethylene joint venture. Production from the LDPE unit is an important milestone to ensure the JV will be enabled to make a meaningful expansion into the U.S. polymers production market.

All units which were operating prior to Hurricane Laura have returned to operation, with no further operational impact from Hurricane Zeta.

Disclaimer - Forward-looking statements

Sasol may, in this document, make certain statements that are not historical facts and relate to analyses and other information which are based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to our future prospects, expectations, developments and business strategies. Examples of such forward-looking statements include, but are not limited to, the impact of the novel coronavirus (COVID-19) pandemic on Sasol's business, results of operations, financial condition and liquidity and statements regarding the effectiveness of any actions taken by Sasol to address or limit any impact of COVID-19 on its business; statements regarding exchange rate fluctuations, changing crude oil prices, volume growth, increases in market share, total shareholder return, executing our growth projects (including LCCP), oil and gas reserves, cost reductions, our climate change strategy and business performance outlook. Words such as "believe", "anticipate", "expect", "intend", "seek", "will", "plan", "could", "may", "endeavour", "target", "forecast" and "project" and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and there are risks that the predictions, forecasts, projections and other forward-looking statements will not be achieved. If one or more of these risks materialise, or should underlying assumptions prove incorrect, our actual results may differ materially from those anticipated. You should understand that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors and others are discussed more fully in our most recent annual report on Form 20-F filed on 24 August 2020 and in other filings with the United States Securities and Exchange Commission. The list of factors discussed therein is not exhaustive; when relying on forward-looking statements to make investment decisions, you should carefully consider both these factors and other uncertainties and events. Forward-looking statements apply only as of the date on which they are made, and we do not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant, Sasol Limited, has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
