President's Letter

March 31, 2007

DEAR SHAREHOLDER:

Stock markets around the globe generally provided attractive returns over the past 12 months, even as week to week it seemed the degree of price fluctuation accelerated. Most bond markets, meanwhile, were relatively flat. Concerns regarding monthly inflation reports, energy prices, Federal Reserve policy and increased defaults on housing debt were among the short-term factors that seemed to worry some investors.

Enclosed is our report on Ivy Funds' operations for the 12 months ended March 31, 2007. This past fiscal year the S&P 500 Index advanced 11.83 percent, led by utility and telecommunications stocks. Energy stocks were volatile as the price of oil gyrated. Health care and information technology were generally the weakest stock sectors during the fiscal year.

Seasons change, growth continues

As we enter spring, gasoline prices have risen again to above \$2.50 a gallon in many locations. However, the latest round of volatility at the pump pales in comparison to the situation a year ago, when more than \$3 a gallon was briefly the norm, and the U.S. seemed threatened with significantly higher inflation. Overall, the economic news of the past year has been good, including:

- · Moderate oil prices
- Corporate profits remained solid, rising around 10 percent
- Relatively stable inflation and
- · Improving trade and federal deficits.

Our Economic Snapshot chart highlights five selected indicators. As you can see, there's much to be thankful for, as well as a case for optimism about the future. Compared to a year earlier, a slightly smaller percentage of people in the U.S. are unemployed. Inflation is lower. The cost of financing a home is lower. Overall economic growth is slower, however, while oil prices are down slightly.

Economic Snapshot		
	3-31-2007	3-31-2006
U.S. unemployment rate	4.40%	4.70%
Inflation (U.S. Consumer Price Index)	2.80%	3.40%
U.S. GDP	1.30%	3.70%
30-year fixed mortgage rate Oil price per barrel	6.13% \$65.87	6.37% \$66.63
Oil price per parrei	φ05.07	φ00.03

Source: Bloomberg, U.S. Department of Labor

The U.S. Consumer Price Index is the government's measure of the change in the retail cost of goods and services. Gross domestic product measures year-over-year changes in the output of goods and services. Mortgage rates shown reflect the average rate on a conventional loan with a 60-day lender commitment. Oil prices reflect the market price of West Texas intermediate grade crude.

Stock valuations generally appear reasonable, especially given profit levels and still low U.S. interest rates. We see an attractive path ahead for diversified investors in 2007, although one that might be marked by a few unexpected curves. As always, we believe that maintaining a well-rounded portfolio remains an important component of securing your long-term financial future.

Our expertise

In 2007, an affiliate of the Ivy Funds' distributor marks its 70th anniversary. At the Ivy Funds, we have deep resources focused on helping you achieve your long-term financial goals. We are committed to offering you an investment philosophy that emphasizes participation in positive markets as well as a very strong effort to manage risk. To help accomplish this, we have a research culture focused on fundamental excellence.

Thank you for your continued confidence in us.

Respectfully,

Henry J. Herrmann, CFA

Henry J. Herrinam

President

The opinions expressed in this letter are those of the President of the Ivy Funds, and are current only through the end of the period of the report, as stated on the cover. The President's views are subject to change at any time, based on market and other conditions, and no forecasts can be guaranteed.

Illustration of Fund Expenses

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, redemption fees and exchange fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The following tables are intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended March 31, 2007.

Actual Expenses

The first line for each share class in the following tables provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the tables. These fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Simple IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the tables, a customer is charged an annual fee of \$15 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the expense tables. Additional fees have the effect of reducing investment returns.

Hypothetical Example for Comparison Purposes

The second line for each share class of the following tables provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees or exchange fees. Therefore, the second line of each share class in the tables is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the tables), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2007, and divided by 365.

- (1)This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the fourth column.
- (2)This section uses a hypothetical 5% annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

Manager's Discussion of Ivy Balanced Fund

March 31, 2007

Below, Cynthia P. Prince-Fox, portfolio manager of the Ivy Balanced Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. She has managed the Fund for three years and has 24 years of industry experience.

The Fund increased 7.53 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007. This was less than the S&P 500 Index (reflecting the performance of securities that generally represent the stock market), which increased 11.83 percent for the same period. The Fund outpaced the Citigroup Treasury/Government Sponsored/Credit Index (generally reflecting the performance of funds in the bond market), which increased 6.39 percent for the period. Multiple indices are presented because the Fund invests in both stocks and bonds.

During the fiscal year, Lipper, Inc. recategorized the Fund into a new peer group – the Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (reflecting the performance of funds with similar objectives). This group of funds rose 9.56 percent for the 12 months ended March 31, 2007. The Fund's old peer group – the Lipper Balanced Funds Universe Average – rose 9.04 percent for the fiscal year.

This diagram shows the Fund's fixed-income investment style by displaying the average credit quality of the bonds owned and the Fund's interest rate sensitivity, as measured by average maturity. Shaded areas show the past three years of quarterly data. Source: Morningstar

Financial, health care weakened results

We underperformed our peer groups and equity benchmark this past fiscal year primarily because of 1) adverse stock selection in financials, health care and industrials and 2) our positioning in high quality, relatively shorter duration bonds at a time when longer duration, lower quality bonds tended to outperform.

We stayed close to our maximum 75 percent weighting in equities for the majority of the 12 months ended March 31, 2007, and this generally had a positive impact on overall performance. However, the equity portion lagged the S&P 500 primarily as a result of adverse selection as well as an overweighting of the weaker-than-market industrial sector. Meanwhile, the fixed-income portion of the portfolio modestly underperformed its bond market benchmark.

For most of the last few years the Fund has been tilted toward more economically sensitive industries relative to the market. Starting in the first quarter of this last fiscal vear we began to transition the portfolio away from these areas. We reasoned there was growing evidence that the economy was slowing and likely would impact stocks in our portfolio that have been some of our best performers over the past several years. At the end of the first fiscal quarter (March 2006), market psychology seemed to shift from a generally "half empty" mentality toward "half full" as investors reacted to a more favorable inflation picture and a drop in the price of oil. Shortly after the second fiscal quarter started. the war between Israel and Hezbollah began and escalated to a point that few had predicted. As the war raged on, the price of oil climbed to a point that threatened the global boom of the last few years. The war ended in conjunction with a rapid deterioration in the housing market, causing energy and other commodity prices to experience meaningful declines. The bond market took this as an "all clear" signal that inflation was dead and that the Federal Reserve could take a pause after a two-year tightening campaign.

The equity markets' response was decidedly positive, posting strong gains in the final quarter of the 2006 calendar year. In fact, every sector of the S&P 500 posted positive returns last year in contrast to the last couple of years when much of the gains were clustered in a handful of sectors, specifically energy. While energy finished the year as one of the leading performers, we believe the market will continue to broaden out to other sectors of the market.

We believe as the markets grow more comfortable with the idea that commodity prices likely are not going to spiral upwards to a point that inflation concerns reenter the picture, areas that have been impacted by rising commodity costs also may do better. We have added to our technology and retail holdings, as these stocks looked attractive based on a number of valuation metrics. While we believe the consumer likely will face challenges in the months ahead as housing languishes, we believe that other economic factors, such as relatively moderate energy prices and stable interest rates, should remove some of the pressure.

We also think there are some very exciting developments occurring in technology and telecommunications. Some of the trends that we are beginning to witness are a result of the digitization of content and new forms of content distribution. While these trends were a dream just a few years ago, they are real and happening today. We have exposure to these developments and look to increase those, given ongoing consumer technology adoptions.

Overall, we placed our greatest emphasis on energy, industrials and health care relative to the weightings found in the S&rP 500. While the financial sector is the largest weighted sector in the Fund, we were underweight banks for most of the year. We have preferred to invest in financial stocks that we feel should benefit from increasing global wealth management and electronic trading.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	Change in weighting
Exxon Mobil Corporation	Increased
General Dynamics Corporation	Increased
General Electric Company	Increased
Cisco Systems, Inc.	New to Top 10
Colgate-Palmolive Company	Increased
Schlumberger Limited	Decreased
Apple Inc.	New to Top 10
Johnson & Johnson	Increased
UBS Ag	New to Top 10
PepsiCo, Inc.	New to Top 10

See your advisor or www.ivyfunds.com for more information on the Fund's most currently reported Top 10 Holdings.

Our outlook

Global liquidity has found its way into just about every asset class, with real estate, stocks, bonds and commodities all posting positive gains this year. An additional kicker has been private equity creating a bid under the market, particularly in value situations. As we enter the new fiscal year, our broad stance on the markets remains positive. Fiscal policy in many countries around the world has been aimed at containing inflation, and it appears, so far, that inflation has stayed under control. Global growth looks to be slowing, but not nearly to the degree as many had feared, given a slowing U.S. consumer. While we remain cautious as global economic growth matures, we feel that investors likely will put more emphasis on quality and pay greater attention to companies that can demonstrate sustainable earnings power. We continue to make adjustments to the portfolio to reflect our most current thinking on the economy and how we anticipate market reaction.

Bond Portfolio Characteristics	
As of 3-31-07	
Average maturity	4.53 years
Effective duration	3.29 years
Weighted average bond rating	AAA

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3)12-8-03 for Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Spectrum Fund merged into the Ivy Balanced Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Spectrum Fund Class A shares, restated to reflect current sales charges applicable to Ivy Balanced Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Balanced Fund. If these expenses were reflected, performance shown would differ.

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit

*No dividends were paid during the preceding 12 months.

- (A)Illiquid security. At March 31, 2007, the total value of illiquid securities amounted to \$1,315,946, or 1.41% of net assets.
- (B)Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. This security has been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2007, the total value of this security amounted to 0.45% of net assets.

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments.

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

⁽¹⁾ Total return calculated without taking into account the sales load deducted on an initial purchase.

See Notes to Financial Statements.

⁽²⁾Advantus Capital reimbursed the Fund for losses related to certain investment trades. With reimbursed losses, the total return for Class A, for the year ended September 30, 2003, would have been 17.26%.

⁽³⁾Annualized.

⁽⁴⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown above reflect a blended rate that includes the effect of income and expenses for those Class B and Class C shares from October 1, 2003 up to the time of the merger. Actual expenses that applied to Class A shareholders were lower than shown above.

⁽⁵⁾ There was no waiver of expenses during the period.

Managers' Discussion of Ivy Bond Fund

March 31, 2007

The Ivy Bond Fund is subadvised by Advantus Capital Management, Inc.

The Fund rose 6.40 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007, less than its benchmark but slightly ahead of its peer group. The Citigroup Broad Investment Grade Index (reflecting the performance of securities that generally represent the bond market) increased 6.60 percent, while the Lipper Corporate Debt Funds A-Rated Universe Average (reflecting the universe of funds with similar investment objectives) increased 6.10 percent for the same period.

CMBS helped results

Our underweighting in Treasuries and overweighting in collateralized mortgage obligations and commercial mortgage-backed securities (CMBS) benefited the Fund's overall performance. Fueling these results were two primary factors: all non-Treasury sectors outperformed Treasuries during the year (although less so during the most recent quarter), and our security selection within these sectors was very strong. However, our investment in Kinder Morgan bonds detracted from performance as a highly leveraged managed buyout seriously damaged credit quality. This is just one example of the type of activity that made us very cautious toward corporate bonds near the end of calendar year 2006.

SHORT	MATURIT INTERMED	Y LONG	
			СЕ
			CREDIT QUALITY
			LOW

This diagram shows the Fund's fixed-income investment style by displaying the average credit quality of the bonds owned and the Fund's interest rate sensitivity, as measured by average maturity. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

Interest rates increased a bit, but short-term rates rose more, inverting the yield curve. The somewhat minor changes gave us fewer opportunities to enhance performance through duration positioning. Notably, the housing market slowed substantially in 2006, causing many market participants to position themselves for an economic slowdown late in the year and into 2007. Concerns about the subprime lending market leaked into the CMBS and asset-backed securities (ABS) sectors in the last few weeks of the most recent quarter, widening spreads and increasing risk premiums.

Portfolio Characteristics

As of 3-31-07

7.72 years
4.37 years
AA

Avoiding subprime market worked well

The inversion of the yield curve was positive for the Fund because we were positioned for such an occurrence. Also, we took a more positive view on housing and the economy than others, and continued to invest in what we viewed as high-quality, mortgage-related securities that provided bargains. This overweight in ABS, CMBS and mortgagebacked securities (MBS) was of significant benefit to the Fund for the first three quarters of the period, though it did detract from performance slightly in the last quarter. Because we remained in the higher quality portion of these sectors, the concerns in the subprime market at the end of the period did not hurt the Fund as much as other investors. In the corporate sector, we began investing more in bonds that included change-ofcontrol provisions in an effort to protect bond holders in the case of a leveraged buyout.

Our outlook

We expect the Federal Reserve to remain on hold for the next couple of meetings, even though the housing weakness continues to cause concern that it will significantly drag down the economy. We still do not see the subprime problems and potentially broader impact on housing values and consumer confidence as cause for a U.S. recession. We have a positive outlook on higher-rated ABS and CMBS, which we feel have plenty of protection in terms of excess collateral. However, we will be watching closely as this cycle plays out, as we believe it is already creating terrific bond investment values and will likely continue to do so in the future.

We think markets are likely to remain choppy over the next few quarters. In fact, the credit markets are starting to pull back. Whenever this happens, the weakest borrowers are typically the first to be uncovered and then caution enters back into the psychology of the markets. Lending caution will be a welcome return that we hope will lead to higher risk premiums for corporate bonds and structured finance securities. We believe we are well positioned for such an environment and are alert to the potential hazards that can develop along the way. As always, we continue our effort to add value to the Fund through relative value security selection, something that will not change in the future environment envisioned. However, as values change among securities and sectors, we will be sharp to reassess and re-price risk in the markets and take advantage of the potential opportunities that arise.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise.

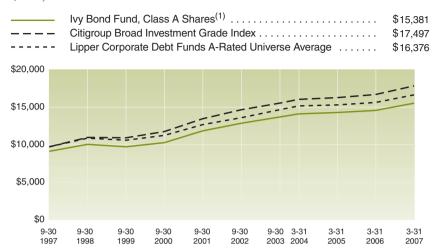

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾				
	Class A	Class B	Class C	Class Y

5-year period ended 3–31–07	4.06%	_	_	_
10-year period ended 3–31–07	5.18%	_	_	_
Since inception of Class ⁽³⁾ through 3-31-07	_	1.64%	2.54%	3.55%

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3)12-8-03 for Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Bond Fund merged into the Ivy Bond Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Bond Fund Class A shares, restated to reflect current sales charges applicable to Ivy Bond Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Bond Fund. If these expenses were reflected, performance shown would differ.

SHAREHOLDER SUMMARY OF IVY BOND FUND

Portfolio Highlights

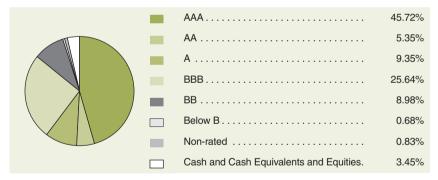

On March 31, 2007, Ivy Bond Fund had net assets totaling \$70,174,918 invested in a diversified portfolio of:

96.55%	Bonds
2.71%	Cash and Cash Equivalents
0.74%	Preferred Stocks

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund owned:

On March 31, 2007, the breakdown of bonds (by ratings) held by the Fund was as follows:

Ratings reflected in the wheel are taken from the following sources in order of preference: Standard & Poor's, Moody's or management's internal ratings, where no other ratings are available.

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit

*Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2007.

- (A)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2007, the total value of these securities amounted to \$10,797,532, or 15.39% of net assets.
- (B)Illiquid security. At March 31, 2007, the total value of illiquid securities amounted to \$2,438,725, or 3.48% of net assets.
- (C)The interest rate for this security is a stated rate, but the interest payments are determined by multiplying the inflation-adjusted principal by one half of the stated rate for each semiannual interest payment date.
- (D)Security serves as collateral for the following open futures contracts at March 31, 2007. (See Note 7 to financial statements):

Description	Туре	Number of Contracts	Expiration Date	Market Value	Unrealized Appreciation
U.S. 2 Year Treasury Note	Long	19	6-29-07	\$3,892,922	\$11,780
U.S. 5 Year Treasury Note	Long	48	6-29-07	5,078,260	26,385
U.S. 10 Year Treasury Note	Short	(72)	6-20-07	(7,784,925)	10,460
U.S. 30 Year Treasury Bond	Short	(33)	6-20-07	(3,671,250)	33,882
				\$(2,484,993)	\$82,507

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments.

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

⁽¹⁾Total return calculated without taking into account the sales load deducted on an initial purchase.

⁽²⁾Annualized.

⁽³⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown above reflect a blended rate that includes the effect of income and expenses for those Class B and Class C shares from October 1, 2003 up to the time of merger. Expenses for Class A shares before and after the merger were limited to 1.15% of average net assets.

⁽⁴⁾ There was no waiver of expenses during the period.

Managers' Discussion of Ivy Cundill Global Value Fund

March 31, 2007

Ivy Cundill Global Value Fund is subadvised by Mackenzie Financial Corporation.

Below, F. Peter Cundill, CFA, and Hiok Hhu Ng, CFA, portfolio managers of the Ivy Cundill Global Value Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2007. Mr. Cundill has 30 years of industry experience and has managed the

Fund since its inception. Mr. Ng has six years of industry experience and has managed the Fund for three years.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund returned 10.71 percent (Class A shares at net asset value) for the year ended March 31, 2007, underperforming its benchmark, the Morgan Stanley Capital International World Index (generally reflecting the performance of securities that represent the global stock market), which increased 15.45 percent for the same period.

The Fund slightly outperformed the 10.60 percent return of one peer group, the Lipper Global Small/Mid-Cap Value Funds Universe

Average (generally reflecting the performance of small-cap and mid-cap value funds with similar global investment objectives). However, the Fund underperformed a broader peer group, the Lipper Global Funds Universe Average (generally reflecting the performance of the universe of funds with similar investment objectives), which increased 13.78 percent.

Financial sector setbacks

We were blindsided by political risk in the Japanese consumer finance sector this past fiscal year. This impaired our initial estimates of intrinsic values for several stocks and resulted in weak fiscal year results for the Fund. AIFUL Corporation, Takefuji Corporation and ACOM Co., LTD. – among our primary holdings in this sector – were among the three worst performers for the Fund for the 12 months ended March 31, 2007

Legislation affecting the consumer finance sector is still pending in Japan's Diet (a Congress-like legislative body). However, we remain confident, based on our analysis, that our primary holdings in this sector offer attractive risk/reward profiles as value investments. In our view, AIFUL Corporation, Takefuji Corporation and ACOM CO., LTD. all trade at significant discounts to their adjusted book values and appear, in our eyes, to have a flexible business model capable of adjusting to the lower rates.

We think the two most important aspects of the pending legislation in Japan are 1) the fact that the industry will be given time to adjust to the lower interest rates (charged to consumers) before being implemented in three years and that 2) the ruling government reserves the right to amend them within two and a half years if the new rates end up being too onerous. Given this, we have continued to build our positions in the Japanese consumer finance sector.

Despite the challenges in Japan, we generated positive returns from our holdings in other countries. We continue to predominantly hedge our international currency exposure in order to solely focus our attention on picking stocks. Our currency hedges led to marginal positive impact on the Fund performance as the U.S. dollar continued to strengthen against major international currencies. Overall, we believe volatility has the potential to be a great friend of value investors. Such was the case for Nikko Cordial Corporation, a Japanese stock, as news of an accounting scandal broke out late last year. We took advantage of what we saw as an opportunity to purchase more shares at distressed prices.

During the year, we saw operating improvements at several companies that are among the larger holdings in the portfolio. For example, Munchener Ruckersicherungs-Gesellschaft Aktiengesellshaft continues to strengthen its underlying operations while maintaining underwriting discipline with the

mindset of returning excess capital to shareholders. KT&G (Korea Tobacco & Ginseng Corporation) announced their midterm plan that includes a return of capital to shareholders via continued share buybacks and higher dividends. To us, it appears that First Pacific Company Limited's restructuring efforts of Indofood is finally being rewarded by investors. Finally, Kirin Brewery Company, Limited announced a comprehensive plan to be more efficient. They plan to divest noncore assets and return these proceeds to shareholders and seek to grow their core businesses organically and via merger-and-acquisition activity.

Our outlook

We are always being opportunistic, and our conviction level grows when the discount to what we see as intrinsic value grows. We are intrigued by Steel Partners' recent takeover offer for Sapporo Holdings, which has created speculation that some of the brewery companies in our portfolio might be interested in making a counteroffer as a white knight. While the outcome of the bidding has yet to be determined, we think consolidation in the domestic alcoholic beverage industry could lead to better profit margins in the long term. Finally, during the quarter we added to our position in a German reinsurance company whose price fell during the quarter after a negative analyst review. We felt the drop created an improved value opportunity.

March 31, 2007 compared to March 31,	2006		
Company	Country	Sector	Change in weighting
Nikko Cordial Corporation	Japan	Financial	Increased
AIFUL Corporation	Japan	Financial	New to Top 10
Takefuji Corporation	Japan	Financial	Increased
Korea Tobacco & Ginseng Corporation	South Korea	Tobacco	Increased
Munchener Ruckersicherungs- Gesellschaft Aktiengesellshaft	Germany	Financial	New to Top 10
Italmobiliare S.p.A.	Italy	Telecom	Increased
Singapore Press Holdings Limited	Singapore	Media	New to Top 10
Korea Electric Power Corporation	South Korea	Utility	New to Top 10
Mabuchi Motor Co., Ltd.	Japan	Autos	New to Top 10
Asatsu-DK Inc.	Japan	Business Equipment and Services	Increased

See your advisor or www.ivyfunds.com for more information on the Fund's most currently reported Top 10 Holdings.

As of March 31, 2007, the portfolio traded at 76 percent of what we believe is its intrinsic value compared to 79 percent on December 31, 2006. The increase in our perceived margin of safety was due to capital being allocated to existing and new securities. Uncovering value ideas remains challenging, but we feel the pipeline of potential ideas has

been growing amid an increase in market volatility. As always, we continue to focus on global value investing through the purchase of holdings that we believe to be trading below their intrinsic value, a bottom-up strategy that focuses on selecting individual securities.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

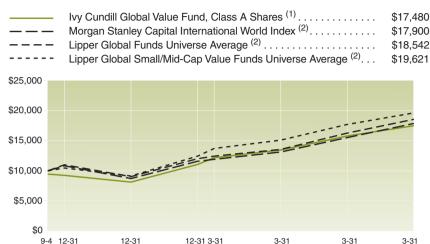

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

2002

2001 2001

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

2005

2003 2004

- (1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions
- (2)Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performance of the indexes (including income) are not available, investment in the indexes was effected as of September 30, 2001.

Average Annual Total Return ⁽³⁾

- (3) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (4)Advisor Class shares and Class II shares are no longer available for investment.
- (5)9-4-01 for Class A shares, 9-26-01 for Class B shares, 10-19-01 for Class C shares, 7-24-03 for Class Y shares, 4-19-00 for Advisor Class shares and 11-5-02 for Class II shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

SHAREHOLDER SUMMARY OF IVY CUNDILL GLOBAL VALUE FUND

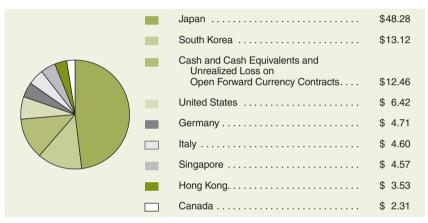

Portfolio Highlights

On March 31, 2007, Ivy Cundill Global Value Fund had net assets totaling \$997,956,963 invested in a diversified portfolio of:

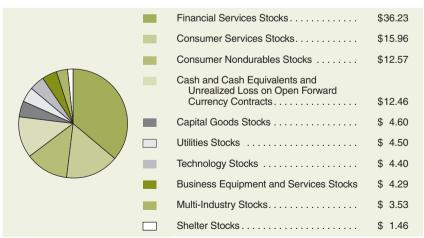

81.12%	Foreign Common Stocks
12.46%	Cash and Cash Equivalents and Unrealized Loss on Open Forward Currency Contracts
6.42%	Domestic Common Stocks

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund was invested by country and by industry, respectively, as follows:

Manager's Discussion of Ivy Dividend Income Fund

March 31, 2007

Below, David P. Ginther, CPA, portfolio manager of the Ivy Dividend Income Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund since its inception and has 12 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 11.57 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007. By comparison, the Russell 1000 Index (reflecting the performance of stocks that generally represent the equity market) increased 11.86 percent, while the Lipper Equity Income Funds Universe Average (reflecting the universe of funds with similar investment objectives) increased 14.54 percent for the same period.

Energy positioning hurt results

We underperformed our benchmark and peer group primarily because of our positioning in the energy sector. We had close to a triple weighting in energy stocks relative to our benchmark this past fiscal year, but our returns in this area were less than half that of the benchmark for the period. Despite energy price volatility, we believe the sector's long-term growth prospect fundamentals remain positive due to growth in China and other Asian countries

We believe the global infrastructure cycle is a long-term secular growth theme as emerging economies continue to demand more energy, materials and higher standards of living. Oil and natural gas prices, while volatile this past year, remained much higher than compared to just a few years ago. We focused on the oil service sector that typically benefits from higher capital spending by major oil companies as they try to increase supply capacity.

Staples helped

Our best success in the portfolio was in the consumer staples area, where we had both a substantially higher-than-benchmark weighting and a higher-than-benchmark return for the year. We benefited from this defensive position as we were concerned about slow economic growth and the

deteriorating housing market. We remained cautious on the consumer, as we feel that higher energy costs and the slowdown in the housing market could potentially reduce discretionary spending. We remain substantially underweighted in the more cyclical consumer discretionary sector.

Consistent strategy

Our strategy continues to target total returns through dividend growth and capital gains. We focus on what we feel are large-capitalization, high-quality companies with established operating records that we believe can accelerate their dividend payout ratio in the future. We believe companies that can continue to grow earnings and increase cash flow likely will increase their dividend payout ratio. We also attempted to position the Fund to take advantage of attractive, long-term fundamentals associated with global economic growth, primarily in China.

Volatile market conditions

The equity markets over the last fiscal year were influenced by volatility in commodity prices and a perceived change in direction of interest rates due to slower economic growth. Crude oil prices experienced significant price volatility, rising substantially through July, only to retreat later in the third quarter of 2006. The markets began the fiscal year with concern that the deceleration in the housing market and higher interest rates, due to fear of higher inflation, would stop economic growth. Instead, the Federal Reserve moved to a neutral stance on interest rates in August, and has maintained that policy. The markets rallied in the second half of the year on the expectation that the next move in interest rates would be lower and that the problems in subprime mortgages have been contained to the housing markets and related areas.

Our outlook

We believe the economy will continue to grow in 2007, but at a lower stainable growth rate than in 2006. In this environment, we are concerned that profit margins have peaked and revenue growth is slowing as the economic cycle matures. We have become more conservative within the slowing economic growth environment and are focusing on what we feel are high-quality companies with stable growth, strong balance sheet and cash flow that we believe can return excess cash to shareholders by increasing dividends, share repurchases and reinvesting within the company. Also, we continue to be concerned that the meltdown in subprime mortgages could spread into other parts of the economy causing an economic slowdown. We believe the Federal Reserve is on hold for now as economic growth is decelerating and commodity prices moderate. Also, we believe that market valuations will continue to be supported by the high-price merger and acquisition environment in the equity markets. As always, we continue to focus on total returns through dividend growth and capital appreciation.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	Change in weighting

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Manager's Discussion of Ivy European Opportunities Fund

March 31, 2007

Ivy European Opportunities Fund is subadvised by Henderson Investment Management Ltd.

Below, Paul Casson, portfolio manager of the Ivy European Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. Mr. Casson has managed the Fund for one year and has nine years of industry experience. He is part of the Pan-European Equities team at Henderson, headed by Stephen Peak, who served as portfolio manager of the Fund for seven years until April 2006. Mr. Peak has 29 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 22.17 percent (Class A shares at net asset value) for the fiscal year. This was less than the 25.38 percent increase in the Morgan Stanley Capital International Europe Index, which reflects the performance of securities that generally represent the European stock market. The Lipper European Region Funds Universe Average (reflecting the universe of funds with similar investment objectives) increased 23.83 percent for the same period.

We faced a turbulent year. Having touched a five-year high in early May 2006, European equity markets became extremely nervous. Concerns included the U.S. dollar, growth

rates, interest rate rises and inflation, all of which converged to spark a big sell off.
European equity markets recovered strongly during the final quarter of the fiscal year – buoyed by a re-acceleration of global merger and acquistion volumes as well as strong consumer confidence and business sentiment survey results.

The main story of the fourth calendar quarter of 2006 was U.S. dollar weakness, which saw the Euro exchange rate move from US\$1.25 to US\$1.32 in less than a week. Factors that led to this weakness included an increase in the European Commission's forecast for economic growth, and a divergence in Fed and European Central Bank policy.

Volatility increased

European equity markets have had a volatile first quarter of 2007. After a positive start to the year, with sentiment underpinned by ongoing merger and acquisition activity, February was also shaping up to be another good month for European equities until a sharp sell-off in markets over the last two trading days of the month erased gains as volatility spiked sharply higher. The correction was triggered by a dramatic one-day fall in the Chinese market and growing concerns over the prospects for the U.S. economy. During March, European equities recovered from the sell-off, regaining momentum on the back of continuing M&A

activity. Notably, European markets comfortably outperformed the UK, U.S. and Japan over the month.

Energy underperformed

It has been a rocky ride for our energy stocks, where we maintained an overweight position. Our holdings suffered from the weakness in oil and gas prices and a large unwinding of speculative positions. Statoil ASA fell in line with other integrated oil companies despite significant new discoveries and now trades at what we feel is a compelling valuation. SeaDrill Limited continued to execute its business plan and has made positive gains since we began purchasing it, albeit in a volatile manner. OMV Aktiengesellschaft was a big laggard earlier in the year following an ill advised attempted merger with Verbund, which was subsequently abandoned. Performance has since improved.

We took the market nervousness and sell off during the second half of 2006 as a buying opportunity for a number of stocks we had been tracking but where valuations were previously unattractive. Key among these was National Bank of Greece S.A.

Health care, real estate woes

Health care was a sector where we had zero exposure for most of 2006. For a while this looked like a mistake but overall the sector underperformed over the year and our stance

proved correct in the end. However, our biggest disappointment was Sanofi-Aventis, a health care stock that we thought was cheap, and just got cheaper. We have pragmatically cut the position due to growing uncertainty on key drugs but haven't completely given up. Some stocks in other sectors fell slightly and in a relentlessly rising market this has a marked impact. Hypo Real Estate Holdings AG fell into this camp but we see a lot of value here and we intend to continue to hold the position for the time being.

Our outlook

We anticipate that the forthcoming corporate earnings reporting season has the potential to pave the way for regional capital appreciation, although in the near term it would not be surprising to see a period of consolidation in European equity markets given this past quarter's volatility. During the final quarter of the fiscal year, our exposure to the information technology sector was the biggest drag on performance for the period, affected by SAP Aktiengesellschaft, a German applications software company. For now, we are maintaining our position because we believe the company has a very strong product line-up and a market-leading position in its core markets. The company had released results in January that disappointed investors by forecasting slower revenue growth and a decline in margins.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006	5		
Company	Country	Sector	Change in weighting

Pfleiderer AG	Germany	Building Materials	Decreased

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top $10\ \text{Holdings}.$

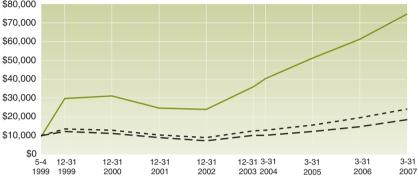

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

	Ivy European Opportunities Fund, Class A Shares ⁽¹⁾	\$74,830
	Morgan Stanley Capital International Europe Index ⁽²⁾	\$18,409
	Lipper European Region Funds Universe Average ⁽²⁾	\$24,024
\$80.000		

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

- (1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.
- (2)Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performance of the indexes (including income) are not available, investment in the indexes was effected as of May 31, 1999.

Average Annual Total Return ⁽³⁾					
	Class A	Class B	Class C	Class Y	Advisor Class ⁽⁴⁾
1-year period ended 3-31-07	15.15%	17.24%	21.33%	22.38%	22.76%
5-year period ended 3-31-07	21.51%	21.83%	21.95%	_	23.35%
10-year period ended 3-31-07 Since inception of Class ⁽⁵⁾	-	-	-	-	-
through 3-31-07	28.96%	28.87%	18.82%	32.24%	30.39%

- (3)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (4) Advisor Class shares are no longer available for investment.
- (5)5-4-99 for Class A shares, 5-24-99 for Class B shares, 10-24-99 for Class C shares, 7-24-03 for Class Y shares and 5-3-99 for Advisor Class shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

A large portion of the Fund's since inception return is attributable to investments in initial public offerings without which the Fund's return would have been lower.

SHAREHOLDER SUMMARY OF IVY EUROPEAN OPPORTUNITIES FUND

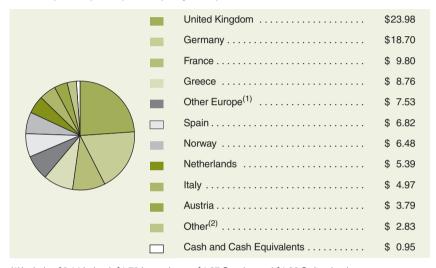

Portfolio Highlights

On March 31, 2007, Ivy European Opportunities Fund had net assets totaling \$514,729,057 invested in a diversified portfolio of:

99.05%	Foreign Common Stocks
0.95%	Cash and Cash Equivalents

Country Weightings

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund was invested by country and by industry, respectively, as follows:

⁽¹⁾Includes \$3.14 Ireland, \$1.70 Luxembourg, \$1.37 Sweden and \$1.32 Switzerland.

⁽²⁾Includes \$0.97 Argentina and \$1.86 Bermuda.

Manager's Discussion of Ivy Global Natural Resources Fund

March 31, 2007

Ivy Global Natural Resources Fund is subadvised by Mackenzie Financial Corporation.

Below, Frederick Sturm, CFA, portfolio manager of the Ivy Global Natural Resources Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund since its inception 10 years ago. He has 25 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of the companies in the Fund, as measured by market capitalization. Shaded areas show quarterly data for the past three years. Source: Morningstar

The Fund climbed 15.47 (Class A shares at net asset value) percent for the 12 months ended March 31, 2007. This was less than the Morgan Stanley Capital International Commodity-Related Index (reflecting the performance of the global natural resource markets), which increased 17.08 percent for the same period. The Lipper Natural Resources Funds Universe Average (reflecting the Fund's peer group of funds with similar investment objectives) advanced 9.34 percent.

A multi-sector approach worked as volatility rose

Natural resources equities confounded skeptics this past fiscal year. Most regional markets except Japan posted solid returns. We are pleased to have provided attractive results relative to our peers that we attribute to our adroit multi-sector positioning across a broad range of natural resources equities. Our results were less than our benchmark this past year because the index benefited to a greater degree than the Fund's portfolio from the strong performance of some commodities this past year.

Our diversification, as well as substantial new commitments from investors, helped us both preserve capital as energy markets weakened in late summer and provided us with additional tactical resources to capitalize on long-term opportunities. We also reached two milestones for our more than quarter-million shareholder accounts this past fiscal year: the Fund grew to more than \$5 billion in net assets as the period drew to a close and we marked the Fund's 10-year anniversary of operations.

Overall, this past fiscal year was a volatile, but profitable time. We saw oil reach a record high of more than \$75 a barrel in 2006, only to fall back by more than \$20 by autumn and close the year at \$66 a barrel, about where it began. Gasoline climbed to more than \$3 a

gallon in many areas, only to drop sharply amid bloated inventories, then rise again in the spring of 2007. Also, the forces of nature in the Gulf of Mexico were calmer than hurricane forecasters expected. Gold prices reached their highest level since the early 1980s, and then retreated amid concerns about global economic growth.

Compared with a year ago, our Top 10 Holdings as of March 31, 2007 show (see table to the right) slightly more representation by U.S.-based energy companies, particularly coal mining firms, and less representation by overseas-based precious metals mining firms. This reflected a repositioning in an effort to take advantage of what we saw as temporary energy and natural resource stock weakness at various points in the fiscal year, and a reduced weighting in gold within the Fund.

Natural resources earnings remained solid

Since global equity markets bottomed in 2002–2003, world stock markets have more than doubled, and in some cases exceed their prior 2000 peak. Since that low, world earnings have advanced at an even larger pace and stand well above their previous peak. The message we see is that equity markets have benefited from a broad improvement in global economic activity.

Resource sectors stand out as an example where earnings have risen faster than share prices. Current P/E (price-to-earnings ratio, or stock price divided by earnings per share) for some of the Fund's largest holdings is much lower than the overall market. We have focused on such low P/E companies, as we believe they have continued attractive growth potential.

M&A helped to lead the way

In 2006, we also saw some leading companies in energy being taken over. The Fund's results benefited from several of these deals. In 2007, we expect more merger and acquisition activity in global energy services, and have invested in several firms (such as Diamond

Offshore Drilling, Inc.) partially for this reason

In the mining sector, we are sticking with our view that gold prices may trade within a wide range of \$550-\$750 an ounce in coming months. We expect to maintain a neutral weighting. Base metal prices have been of some concern to us, and we have almost no exposure to copper and aluminum. However, we continue to be attracted to iron, an industry where a major firm has already contracted a 9.5 percent production increase for 2007. In other areas, we continue to focus on more specialized companies with volume growth participation rather than commodity price leverage. This remains true of chemicals, with our focus on industrial gases and water companies.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	Country	Change in weighting
Companhia Vale do Rio Doce	Brazil	Increased
Diamond Offshore Drilling, Inc.	United States	Decreased
Noble Corporation	Cayman Islands	Increased
Arch Coal, Inc.	United States	Increased
Valero Energy Corporation	United States	Decreased
Gold Fields Limited	South Africa	Decreased
Vallourec	France	New to Top 10
GlobalSantaFe Corporation	United States	New to Top 10
Peabody Energy Corporation	United States	New to Top 10
Smith International, Inc.	United States	New to Top 10

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

Emerging markets lead global growth

The global outlook appears encouraging, in our opinion: inflation risk remains subdued and we think may subside further with easing commodity prices. Global monetary conditions are still supportive with tame interest rate levels and ample money liquidity,

and world trade continues to grow. It appears for the first time ever, emerging market economies were responsible for half of the world's total growth last year. We remain steadfast believers in the long-term demand for more resources as consumers in emerging markets seek a more luxurious lifestyle. We believe that new car sales in China, for instance, will likely post their third consecutive year of more than 20 percent annual growth. In short, we think the demand growth story for resources remains intact and may accelerate as commodity prices ease.

In part because of this trend, we expect natural gas prices to be higher a year from now, even with the December 2006 warm weather surprise in many areas of the U.S. We generally expect to add natural gas firms to the Fund after having underweighted this sector for the past two years. Coal companies, a close proxy for natural gas, are likely also to respond to moderating prices by pushing out some of their expansion plans, in our view.

Alternative energy: here comes the sun

Another area of increasing interest for us is alternative energy. We have been steadily increasing exposure to bio-fuels and solar panels, domestically and abroad. In rough numbers, the annual U.S. consumption of

gasoline through the middle of the next decade should be 150 billion gallons per year. We think there may be increased political dialogue this year on renewable fuels such as ethanol, partially tied to concerns of global warming. We are also investing in firms involved in solar panels, both through providers of technological improvements and in makers of inputs used in making panels.

Our outlook

Looking out over the next 24 months, we see a broad range of opportunities unfolding. For long-term investors, a generally favorable global economic backdrop suggests more worthwhile gains may be attainable. In our view, resource markets have the potential to post returns in excess of fixed-income alternatives over the balance of the decade. For investors looking to deploy additional assets or rebalance a portfolio, we think potential equity market volatility in 2007 may create an attractive buying opportunity.

The pulse of resource equity markets is slowing – we think the bull needs a little time to recover from its most recent charge. In an idealized cycle based on past history, markets last year should have moderated into early summer (they did), rallied to late summer (they did), and then moderated a second time into late year (this they did only partially).

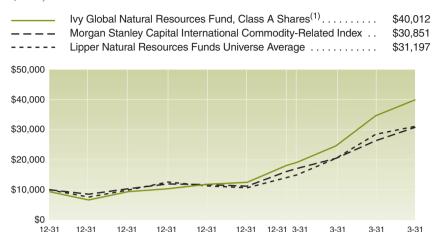

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit.

- (A)Listed on an exchange outside the United States.
- (B)Illiquid security. At March 31, 2007, the total value of illiquid securities amounted to \$17,341,996 or 0.34% of net assets.
- (C)Security valued in good faith by the Valuation Committee appointed by the Board of Trustees.
- (D)Restricted security. At March 31, 2007, the following restricted securities were owned:

Securtiy	Acquisition Date	Shares	Cost	Market Value
Aventine Renewable Energy Holdings, Inc.	Various	1,760,231	\$30,903,678	\$32,071,409
Xtreme Coil Drilling Corp.	Various	650,000	5,868,696	5,737,116
Total		2,410,231	\$36,772,374	\$37,808,525

The total market value of restricted securities represents approximately \$37,808,524 or 0.75% of net assets at March 31, 2007.

(E)Principal amounts are denominated in the indicated foreign currency, were applicable (BRL – Brazilian Real, CAD – Canadian Dollar, ZAR – South African Rand).

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments.

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

^{*}No dividends were paid during the preceding 12 months.

Managers' Discussion of Ivy International Balanced Fund

March 31, 2007

the Fund since its inception and has 12 years of industry experience.

The Fund rose 17.48 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007. The Fund's equity benchmark, the Morgan Stanley Capital International All Country World (Excluding USA) Index (an index that generally reflects the performance of international stock markets) increased 20.29 percent for the period. The Fund's international fixed-income benchmark, the J.P. Morgan Non-U.S. Government Bond Index (generally reflecting the performance of international government

Ivy International Balanced Fund is subadvised by Templeton Investment Counsel, LLC.

Below, Michael Hasenstab and E. Tucker Scott, CFA, portfolio managers of the Ivy International Balanced Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2007. Dr. Hasenstab has managed the Fund for one year and has 11 years of industry experience. Mr. Scott has managed

bonds) rose 8.14 percent. Multiple indexes are presented because the Fund invests in stocks, bonds and other instruments.

During the fiscal year, Lipper, Inc. recategorized the Fund into a new peer group – the Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (reflecting the performance of funds with similar objectives). This group of funds rose 9.56 percent for the 12 months ended March 31, 2007. The Fund's old peer group – the Lipper Global Flexible Portfolio Funds Universe Average – rose 10.49 percent for the fiscal year.

Global themes influenced returns in the period. Global growth remained strong with increasing evidence of some decoupling of growth in Asia and Europe from moderating growth in the U.S. The International Monetary Fund's (IMF) most recent World Economic Outlook projects global growth at 4.9 percent in 2007, which is down from 5.4 percent in 2006, but the same pace as in 2005. Most notably within that projection, the IMF downgraded its growth forecast for the U.S. while increasing the forecast for Asia and Europe.

Strength across equity sectors

This past year the equity portion of the portfolio benefited from the strong liquidity in global capital markets and profuse merger and acquisition activity. The effect in the portfolio was broad-based, across countries and sectors. Over the 12-month period ended March 31, 2007, all ten major sectors delivered positive total returns, eight of them in the double-digits (the exceptions were health care and information technology). In aggregate, the Fund's equity portion performance exceeded that of the benchmark index, the Morgan Stanley Capital International (MSCI) All Country World (Excluding USA) Index (the index), with stronger returns in six of the ten major sectors. Relative to the index, the Fund's performance was strongest in industrials,

Changes to Top 10 Equity Holdings

consumer discretionary and telecommunications services.

Polish bonds helped fixed-income results

The Fund's fixed income portfolio benefited from an overweight exposure to Poland, which generated a 16.89 percent U.S. dollar return (as measured by the JP Morgan GBI Broad) outperforming the Euroland bonds, which returned 11.95 percent (JP Morgan EMU Index), primarily on Euro strength against the U.S. dollar. Over the past 12 months, European treasury yields rose by more than any other region. Short duration positioning in Europe (outside of Poland) benefited relative performance. Additionally, the Fund benefited from an underweight exposure to Japanese government bonds, which underperformed.

The fixed income portfolio also broadly benefited from currency positioning in Thailand, Australia, Singapore and South Korea. Also, as the Japanese Yen weakened 0.70% against the U.S. dollar, we added to our Yen currency positions. In Europe, exposure to the Swedish Krona benefited relative performance. The Norwegian Krone underperformed the Euro but generated a positive return against the U.S. dollar. Finally, the Canadian dollar lagged other major currencies

Weighted average bond rating AA

Liquidity supported bond markets

Overall, the mood in the global bond market was predominantly positive, but was interrupted twice, first in late spring 2006 and again during the first quarter of 2007. Although last year's concern centered on inflation, the main concerns this year were slower growth and declining asset quality. Investors worldwide pondered the possibility that troubles in the U.S. subprime mortgage market could spread into the broader bond market and potentially undermine the pace of global economic and corporate profit growth.

Despite these challenges, global liquidity – petrodollars, corporate cash, private equity, household savings and central banks' reserves – was abundant and continued to look for an investment home. Largely as a result, bond yield spreads over U.S. Treasuries narrowed, and equity and commodity markets rose. Narrower corporate credit spreads (the difference in interest rates between high and low quality) globally reflected greater risk tolerance, while abundant cash supplies in the capital markets contributed to record global merger and acquisition activity.

European stocks led performance

Within equity sectors, holdings that delivered strong returns included Compass Group PLC (food services, U.K.), Vestas Wind Systems A/S (wind turbines, Denmark), and telecom services companies such as Telenor ASA (Norway), Vodafone Group Plc (U.K.) and France Telecom. However, the Fund's performance by sector lagged the benchmark in financials, materials and utilities. This was in part a result of the Fund having relative underweight positions in financials, utilities and materials, which performed strongly in the portfolio and the broader market over the reported period.

While this was detrimental to relative returns over the near term, our primary focus has

always been on performance over the longer term. Our value-focused, bottom-up process always drives our stock selection and implicitly the Fund's absolute and relative weights, by sector, country or industry.

Valuations tested

Over the past several quarters, we deemed that valuations in certain of our materials-related holdings exceeded what we could justify based on underlying company and industry fundamentals. Despite this, the demand for industrial commodities – and related equities – has remained heightened. Valuations have been stretched further due in part to the abundant liquidity in the capital markets and continued interests from financial players, such as hedge funds, in contrast to actual end-users of the underlying commodity. In the utility sector, our European holdings have performed quite strongly on both absolute and relative terms.

In an environment of protracted global economic growth, there is always the risk that a rising stock market can obscure deteriorating fundamentals for an industry, or company. As stock pickers, we are leery of companies that have watched their stock prices appreciate to new highs, but for which the stock market continues to exude much confidence, despite many of these companies being near or beyond historical peaks of profitability. We have moved to relative underweights in these sectors, as we have trimmed or liquidated positions.

Telecom signaled value

Our analyses of stocks that we felt could offer the biggest potential to unlock value over the longer term led us to increase exposure to global telecommunications companies, including the ones we mentioned above. We did this, despite their apparent unattractiveness in the broader market, which prevailed until a few months ago. As of fiscal year end, the Fund's largest overweight position was in the telecom services industry.

The Fund benefited from having this strong presence in telecom stocks, which resulted from analyzing and determining the undervaluation of these stocks, one company at a time. The strong performance in absolute and relative terms over the reported period is a satisfying validation of our analyses, and although the telecom sector retraced part of earlier gains during the first quarter of calendar year 2007, we remained comfortable as our broad assumptions for the sector and our holdings have remained fairly intact.

Our outlook

The global economy seemed resilient in the face of elevated energy prices, higher global interest rates, a weaker U.S. housing market and restrained U.S. economic growth, and continued to expand over the 12-month reporting period. The economic drivers have remained consistent since the recovery began in 2002: strong consumer and corporate demand, reasonably low inflation, tight or improving labor markets, and a moderate, though higher, global interest rate environment.

We continue to favor exposure to global bond markets in an effort to take advantage of U.S. dollar weakness. We view the structural decline in the U.S. dollar as part of a multi-year cycle. Global imbalances persist, most apparent in the imbalance in U.S. goods and capital flows with Asia. Most striking among

the G–7 currencies is the relative value of the Japanese yen. The yen has lagged other major currencies in this year's leg of U.S. dollar weakening, bringing the Japanese currency to the weakest level against the euro since the euro's introduction.

Going forward within the equity markets, we believe that the economic backdrop remains sound, a little uncertain in the U.S. but robust elsewhere, with leading indicators suggesting that activity could potentially pick up in the second half of this year. There are signs that businesses have begun to overcome the caution that has kept capital investment muted. Furthermore, there still appears to be a mismatch between the value placed on businesses by investors and that placed on them by buyout funds that can arbitrage for profit. However, sufficient warning signs do exist to justify a healthy caution, in our view. In particular we are continuously convinced of the importance of investing in businesses that possess clear fundamental strengths and which are attractively valued on their own terms rather than speculating on what they might be worth to a buy-out fund. Subcontracting investment analysis and stock selection to banks and financiers has not often been a winning strategy in the past.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

⁽¹⁾Based on average weekly shares outstanding.

See Notes to Financial Statements.

⁽²⁾Total return calculated without taking into account the sales load deducted on an initial purchase.

⁽³⁾Annualized.

⁽⁴⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown above reflect a blended rate that includes the effect of income and expenses for those Class B and Class C shares from October 1, 2003 up to the time of merger. Actual expenses that applied to Class A shareholders were lower than shown above.

⁽⁵⁾ There was no waiver of expenses during the period.

Managers' Discussion of Ivy International Core Equity Fund

March 31, 2007

Below, John C. Maxwell, CFA, and Thomas A. Mengel, portfolio managers of the Ivy International Core Equity Fund*, discuss positioning, performance and results for the fiscal year ended March 31, 2007. Mr. Maxwell has managed the Fund for one year and has 14 years of industry experience. Mr. Mengel has managed the Fund for four years and has 20 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 17.35 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007, underperforming its benchmark. The Morgan Stanley Capital International EAFE Index (Europe, Australia, Far East – an index that generally reflects the performance of the international securities markets) increased 20.20 percent for the period. The Lipper International Large-Cap Core Funds Universe Average (reflecting the performance of funds with similar objectives) climbed 17.26 percent for the fiscal year.

Parts of Europe worked, Japan did not

The drivers that caused us to lag the index this past year were country selection and adverse foreign exchange rates versus the index. Countries that worked for us this past year were France and Norway, where we were overweight in markets that outperformed and we had strong stock selection.

Underperformance was driven by Germany, where we were overweight and had poor stock selection. In Japan we over stayed our welcome. It was a significant driver of the previous year's strong performance but Japan significantly underperformed the benchmark and we remained market weight. Japan's underperformance was driven by a slowing economy and limited participation in the global mergers and acquisitions (M&A) boom.

From a sector standpoint our best performance was derived from industrials, where we were overweight and had positive stock selection in a sector that outperformed. On the downside consumer discretionary stood out, where we were slightly overweight a sector that performed in line with the benchmark and our stock selection was below average.

Slowdown fears affected results

From a calendar standpoint we were too aggressive in the first fiscal quarter (March-June 2006). During this quarter we experienced the bulk of our underperformance for the year. This was when oil prices spiked to \$78/barrel and concerns over the global economy surfaced. The fear at the time was that the oil price spike would either lead to inflation or slow the global economy. At the time we were significantly overweight early business cycle stocks that were disproportionately benefiting from the strong global economy and low interest rates. This strategy worked great in the previous couple of years; where our performance nicely outpaced the index, but stalled in the first quarter. In retrospect, we should have changed our focus to more stable growth and late cycle companies a few months earlier.

After four great years of global expansion and strong stock markets, we feel we are in the second half of a global economic cycle. The oil and commodity spikes in the first half of 2006 were the first scare and the credit tightening in the U.S. housing market in March 2007 was the second scare. We continue to believe that the global economic expansion is intact and that a downturn is more than a year out, but we are watching this closely.

Focus on cash flow strength

Through the year we geared down the beta of the fund and increased our emphasis on companies with above average cash generation. From a top down standpoint we reduced our weighting in infrastructure and asset appreciation plays. At the same time we increased exposure to: 1) companies benefiting from the strengthening emerging market's consumer and 2) companies that we feel are likely to benefit from the M&A environment.

Over the course of the year our largest sector overweights were in financials and industrials while our largest underweights were in health care and telecom services. From an industry standpoint, the financial sector overweight was driven by financials leveraged to the M&A boom – either investment banks or likely company targets. Within the industrials sector we were heavily weighted in aerospace and defense, and construction and engineering. Our underweights in health care and telecom services reflected only modest exposure to large cap pharmaceuticals and large integrated telecom stocks.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006						
Company	Country	Sector	Change in weighting			
BAE SYSTEMS plc	United Kingdom	Aerospace	New to Top 10			
TOTAL S.A.	France	Energy	New to Top 10			
Siemens AG	Germany	Industrial	New to Top 10			
Nestle S.A.	Switzerland	Food	New to Top 10

Heineken N.V.	Netherlands	Beverages	New to Top 10			
Petroleo Brasileiro S.A. – Petrobras, ADR Prudential plc	Brazil United Kingdom	Energy Financial	New to Top 10 New to Top 10			
L'oreal	France	Consumer Discretionary	New to Top 10			

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

Our outlook

Overall, we are moving to companies that we believe possess more stable earnings growth, and attempting to gain exposure to the following themes:

- the growing disposable income of the emerging markets consumer,
- the continued strength of the M&A boom,
- strong growth in infrastructure spending globally (this would have been at the top of the list last year).
- the increasing discretionary income of high-end consumers, globally.

Given the above themes, we are increasing our emphasis on consumer staples, luxury goods, financials (benefiting from mergers and acquisitions) and aerospace/defense. While still a solid overweight, we are likely to put less emphasis on construction & engineering. Pharmaceuticals have a greater weighting than last year but remain materially underweight. Large integrated telecom services stocks remain underweight. Finally, we took Japanese banks from over to underweight.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

*Please note that effective Dec. 6, 2006, the Fund's name changed from Ivy International Value Fund to Ivy International Core Equity Fund.

Comparison of Change in Value of \$10,000 Investment

	Ivy International Core Equity Fund, Class A Shares ⁽¹⁾	\$20,013
	Morgan Stanley Capital International EAFE Index	
	(with net dividends)	\$21,485
	Lipper International Large-Cap Core Funds Universe Average	\$19,142
400.000		

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾					
	Class A	Class B	Class C	Class Y	Advisor Class ⁽³⁾
1-year period ended 3-31-07	10.60%	12.39%	16.48%	17.47%	17.48%

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3) Advisor Class shares are no longer available for investment.
- (4)5-13-97 for Class A, Class B and Class C shares, 7-24-03 for Class Y shares and 2-23-98 for Advisor Class shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

SHAREHOLDER SUMMARY OF IVY INTERNATIONAL CORE EQUITY FUND

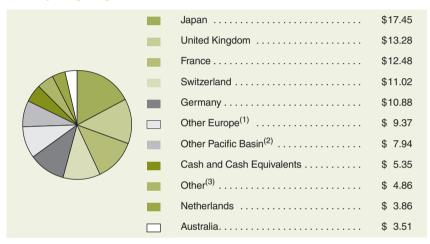

Portfolio Highlights

On March 31, 2007, Ivy International Core Equity Fund had net assets totaling \$215,434,627 invested in a diversified portfolio of:

94.65%	Foreign Common Stocks
5.35%	Cash and Cash Equivalents

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund was invested by country and by industry, respectively, as follows:

Country Weightings

⁽¹⁾Includes \$1.13 Greece, \$1.93 Ireland, \$2.02 Italy, \$2.31 Norway, \$1.05 Spain and \$0.93 Sweden.

Manager's Discussion of Ivy International Growth Fund

March 31, 2007

Below, Thomas A. Mengel, portfolio manager of the Ivy International Growth Fund*, discusses positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund for four years and has 20 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION MEDIUM S
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 16.51 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007, underperforming its benchmark for the fiscal period. The Morgan Stanley Capital International EAFE Index (Europe, Australia, Far East – an index that generally reflects the performance of the international securities markets) increased 20.20 percent for the period.

In May 2007, we changed the Fund's benchmark to the Morgan Stanley Capital International EAFE Growth Index. We feel this index is more representative of the international growth stock universe in which the Fund typically invests. For the 12 months

ended March 31, 2007, the MSCI EAFE Growth Index rose 17.77 percent. For comparison purposes, both indexes will be shown in this year's and next year's reports.

During the fiscal year, Lipper, Inc. recategorized the Fund into a new peer group – the Lipper International Large-Cap Growth Funds Universe Average (reflecting the performance of funds with similar objectives). This group of funds rose 15.61 percent for the 12 months ended March 31, 2007. The Fund's old peer group – the Lipper International Large-Cap Core Funds Universe Average – rose 17.26 percent for the fiscal year.

Stock selection hampers performance

The Fund's performance was impaired primarily by stock selection. We were negatively affected by our positioning in financials, materials and information technology. Our country performance was hurt by some of our selections in smaller markets, as well as our exposure to Japanese consumer stocks.

Early in the fiscal year we made a classical defensive shift in investment policy in response to deteriorating investor confidence. Cash reserves were modestly increased and the Fund's risk profile (as measured by beta) was lowered. We reduced exposure to what we believed were the most vulnerable

countries and sectors, particularly luxury goods, consumer financials, exporters and companies heavily exposed to the U. S. consumer. We chose sectors with stability or more defensive characteristics, such as health care, telecommunication services and utilities. In countries with impressive domestic growth we increased positions in domestic demand beneficiaries as a hedge against possibly slower external demand.

We trimmed the Fund's Japanese holdings in mid–2006 as domestic economic activity softened ahead of a September government leadership change. Our exposure was further reduced in the first quarter of 2007 due to gradually rising local interest rates, weak wage growth and potential risk from slower U.S. demand.

First half: Tighter money, higher energy prices

Higher energy prices in the first half of calendar year 2006 were accompanied by much higher bond yields. Equity markets experienced a significant correction beginning in May 2006 as investors raised inflation concerns. Global monetary accommodation was reduced, as most major central banks increased interest rates. Investors began to worry that some monetary authorities might shift to an actual "tight" monetary policy, particularly the U.S. Federal Reserve. At the same time there was a growing concern about the U.S. housing downturn and how a potentially weaker U.S.

consumer might impact foreign markets. Although business trends were solid in most of the world, investors began to expect a much slower pace of global growth for the second half of 2006. However, this negative sentiment was short-lived.

Second half: Lower energy prices, growth revival

Energy prices began to retreat after midsummer, with oil falling nearly \$20 a barrel. Economic growth then surprised investors on the upside, particularly in the U.S., Continental Europe and China. The pace of global trade slowed in the second half of calendar year 2006 but was still quite impressive on a historical basis. Business demand and loan growth remained strong in most regions while wage inflation varied from soft to moderate. Corporate profit growth remained generally healthy. Merger and acquisition activity reached a seven-year high late in 2006 and was particularly strong across Europe.

The strong global equity market trend from mid–2006 continued well into the first quarter of 2007. However, in late February renewed concerns over the U.S. consumer again triggered an equity and commodity market correction. Investors became concerned that a sudden rise in U.S. subprime mortgage delinquencies might extend to other financial institutions and could negatively impact U.S. consumer trends.

Changes to Top 10 Equity Holdings
March 31, 2007 compared to March 31, 2006

Company	Country	Sector	Change in weighting

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

Improved prospects overseas

Although housing indicators in the U.S. have weakened materially from their cycle highs, opinions remain mixed as to the vulnerability of the U.S. economy and the extent of any possible foreign impact. Economic momentum has clearly slowed in the U.S. in early 2007 while GDP trends remain steady to higher in most countries, highlighted by continued impressive economic growth in emerging Asia. Loan growth remains strong in most regions while wage and consumer inflation trends now range from mild to slightly elevated. Corporate profit growth remains generally healthy, particularly in Europe, but with some increased concern for a slowing trend this year.

Our outlook

We have remained aware of the risk of a global economic slowdown due to uncertainties centered around U.S. housing-related and mortgage finance industries. Because of this risk of a coordinated global

slowdown, sector volatility has been more of an issue than country volatility. Therefore, our sector selections are now more defined. Financials and information technology remain our major sector choices, along with a preference for consumer staples rather than discretionary consumer stocks.

We believe that financial markets may tend to have periods of higher volatility in coming months as investors' expectations remain somewhat unsettled. We feel that market sentiment may occasionally shift toward risk aversion if U.S. financial and consumer trends become a larger global concern. We feel merger activity is likely to remain strong in 2007, especially in Continental Europe where most companies have abundant cash and low debt. Longer term, infrastructure development and emerging consumer needs remain strong global investment themes. We believe that stable growth companies should continue to outperform, particularly healthy market leaders and those with positive pricing power.

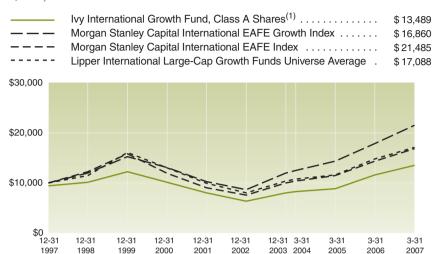

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

*Please note that effective Dec. 6, 2006, the Fund's name changed from Ivy International Fund to Ivy International Growth Fund.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return (2)						
	Class A	Class B	Class C	Class Y	Advisor Class ⁽³⁾	Class II ⁽³⁾

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3) Advisor Class shares and Class II shares are no longer available for investment.
- (4)7-24-03 for Class Y shares and 7-3-02 for Advisor Class shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

SHAREHOLDER SUMMARY OF IVY INTERNATIONAL GROWTH FUND

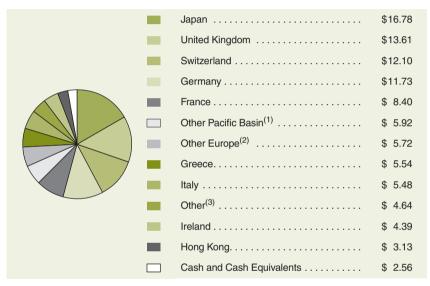

Portfolio Highlights

On March 31, 2007, Ivy International Growth Fund had net assets totaling \$238,232,853 invested in a diversified portfolio of:

94.73%	Foreign Common Stocks
2.71%	Domestic Common Stocks
2.56%	Cash and Cash Equivalents

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund was invested by country and by industry, respectively, as follows:

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit.

- *No dividends were paid during the preceding 12 months.
- (A)Listed on an exchange outside the United States.
- (B)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2007, the total value of these securities amounted to \$7,966,455, or 3.34% of net assets at March 31, 2007.
- (C)Securities valued in good faith by the Valuation Committee appointed by the Board of Tustees.

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments.

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

Managers' Discussion of Ivy Mortgage Securities Fund

March 31, 2007

Ivy Mortgage Securities Fund is subadvised by Advantus Capital Management, Inc.

Below, Christopher R. Sebald, CFA, and David W. Land, CFA, the Fund's portfolio managers, discuss the Fund's positioning, performance and results for the fiscal year ended March 31, 2007. Mr. Sebald has 18 years of industry experience and has managed the Fund for four years. Mr.

Land has 16 years of industry experience and has managed the Fund for three years.

SHORT	MATURIT INTERMED	Y LONG	
			НІСН
			CREDIT QUALITY
			LOW

This diagram shows the Fund's fixed-income investment style by displaying the average credit quality of the bonds owned and the Fund's interest rate sensitivity, as measured by average maturity. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund increased 6.52 percent (Class A shares at net asset value), less than its benchmark index and slightly more than the average of its peer group (based on net asset value returns) for the 12 months ended March 31, 2007. In comparison, the Lehman Brothers Mortgage-Backed Securities Index (reflecting the performance of securities that generally represent the mortgage-backed securities market) increased 6.92 percent, while the Lipper U.S. Mortgage Funds Universe Average (reflecting the performance of the universe of funds with similar investment objectives) increased 6.00 percent.

Subprime mortgage market affected results

This past fiscal year we took a more positive view on housing and the economy than others and continued to invest in what we felt were high-quality securities that provided bargains. While this worked for most of the fiscal period, it did not work in the final fiscal quarter, and this contributed negatively to our results. We are typically overweight in assetbacked securities (ABS) and commercial mortgage-backed securities (CMBS), and that strategy worked to our benefit for the first three quarters of the fiscal year.

However, concerns about the subprime lending market leaked into the CMBS and ABS sectors in the last few weeks of the final quarter of the fiscal year, widening spreads, increasing risk premiums and detracting from our performance. We remained in the higher quality portion of these sectors, so the concerns in the subprime market did not hurt the Fund's portfolio as much as others in our peer group.

High interest rates, sagging housing prices

Interest rates increased a bit, but short-term rates rose more, inverting the yield curve. The somewhat minor changes gave us fewer opportunities to enhance performance through duration positioning. Notably, the housing market slowed substantially in 2006, causing many market participants to position themselves for an economic slowdown late in the year and into 2007. We continued to invest in the ABS and CMBS sectors; this is a core strategy of ours. We believe this diversification will enhance the return of the portfolio throughout market cycles.

Our outlook

We expect that the Federal Reserve will remain on hold for the next couple of meetings, even though the housing weakness continues to cause concern that it will significantly drag down the economy. We still do not see the subprime problems and

potentially broader impact on housing values and consumer confidence as cause for a U.S. recession. We have a positive outlook on higher-rated ABS and CMBS, which we feel have plenty of protection in terms of excess collateral. However, we will be watching closely as this cycle plays out.

In our view, the bond market is likely to remain choppy over the next few quarters. The credit markets are starting to pull back. Whenever this happens, the weakest borrowers are often the first to be uncovered and then caution enters back into the psychology of the markets. Lending caution will be a welcome return that we hope will lead to higher risk premiums for structured finance securities. We believe we are well positioned for such an environment and are alert to the potential hazards that can develop along the way. As always, we will attempt to add value in the portfolio through relative value security selection and this will not change in the future environment we envision. However, as values change among securities and sectors, we will attempt to be sharp to reassess and re-price risk in the markets and take advantage of the opportunities that arise.

Portfolio Characteristics	
As of 3-31-07	
Average maturity	5.65 years
Effective duration	3.71 years
Weighted average bond rating	AAA

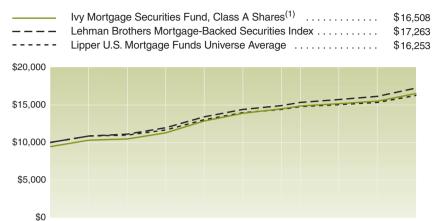

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. The risks incurred by mortgage securities include, but are not limited to, reinvestment of pre-paid loans at lower rates of return. In addition, the net asset value of mortgage securities may fluctuate in response to changes in interest rates and are not guaranteed. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3)12-8-03 for Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Mortgage Securities Fund merged into the Ivy Mortgage Securities Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Mortgage Securities Fund Class A shares, restated to reflect current sales charges applicable to Ivy Mortgage Securities Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Mortgage Securities Fund. If these expenses were reflected, performance shown would differ.

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit.

- (A)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2007, the total value of these securities amounted to \$30.642.590. or 9.53% of net assets.
- (B)Illiquid security. At March 31, 2007, the total value of illiquid securities amounted to \$13,099,353, or 4.07% of net assets
- (C)Securities serve as collateral for the following open futures contracts at March 31, 2007. (See Note 7 to financial statements):

Description	Туре	Number of Contracts	Expiration Date	Market Value	Unrealized Appreciation (Depreciation)
United States 5 Year Treasury Note	Short	7	6-29-07	\$ 740,578	\$ 2,012
United States 10 Year Treasury Note	Short	108	6-20-07	11,677,500	(11,509)
				\$12,418,078	\$ (9,497)

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

^{*}Not shown due to rounding.

^{**}Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2007.

⁽¹⁾ Total return calculated without taking into account the sales load deducted on an initial purchase.

See Notes to Financial Statements.

⁽²⁾Advantus Capital reimbursed the Fund for losses related to certain investment trades. With reimbursed losses, the total return for Class A, for the year ended September 30, 2003, would have been 4.28%.

⁽³⁾Annualized.

⁽⁴⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown reflect a blended rate that includes income and expenses for those Class B and Class C shares before October 1, 2003 up to the time of merger. Expenses for Class A shares before and after the merger were limited to 0.95% of average net assets.

⁽⁵⁾ There was no waiver of expenses during the period.

Manager's Discussion of Ivy Pacific Opportunities Fund

March 31, 2007

Below, Frederick Jiang, CFA, CPA, portfolio manager of the Ivy Pacific Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund for two years and has 12 years of industry experience.

VALUE	STYLE BLEND	GROWTH	_
			C/ LARGE
			CAPITALIZATION MEDIUM S
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 22.60 percent (Class A shares at net asset value) for the fiscal year. This was less than the 23.55 percent increase of the Morgan Stanley Capital International Asia Free (Excluding Japan) Index (an index that generally reflects the performance of the Asian stock markets). The Lipper Pacific ExJapan Funds Universe Average (reflecting the universe of funds with similar investment objectives) increased 23.98 percent for the same period.

We believe that specific stock selection was the primary factor affecting our relative results. During the period, many of our stock selections in the Greater China Region (China, Hong Kong, Taiwan and Singapore) served us well, as we recorded strong relative returns in those markets. Some, however, did not. We generally benefited from our stock selections in financials, consumer stables and materials more than other sectors.

Liquidity abundant

The biggest surprise for Asian equity markets during the fiscal period was that the rising inflation and interest rate profile in developed economies did not slow the money flow into emerging markets, as typically seen in previous economic cycles. Liquidity remained abundant in the Asian market throughout the vear, so much that some local markets reported record-high inflows including China and India, the two largest and fastest growing economies in the region. These delivered strong positive returns relative to the global market. Smaller markets such as the Philippines and Malaysia also recorded strong capital inflows and robust performance for investors. Only one market, Pakistan, recorded a negative return in the fiscal year, after rising exponentially in the previous year. We believe that the strong capital inflow into Asia was the result of high economic growth and cheap stock valuations in the region.

Returns not tied to regional politics

Another surprise was that emerging market investors were not discouraged by the political turmoil and capital controls initiated in Thailand. We believe that foreign investors now have a better understanding and higher confidence in the Asian market, and realize that problems in one specific country no longer easily spread to the rest of the region.

Over the past 12 months, Asia Pacific markets continued to be heavily influenced by strong Chinese macroeconomic factors. China managed to grow its economy at an accelerated speed. The reported 2006 GDP growth rate of 10.5 percent was once again much higher than market expectations. Strong Chinese demand boosted export growth throughout Asia. At the same time, Chinese currency appreciation helped to attract more capital inflow into Asian markets. Most Asian currencies have since appreciated against major world currencies, adding to the positive return of Asian equities when valued in U.S. dollar terms.

The political situation in the region remained relatively stable in the fiscal year, with the exception of Thailand and Taiwan, where political uncertainties reduced positive equity returns. Indonesia and the Philippines saw the biggest improvement in the region as a return to political stability and a more

balanced fiscal situation helped reduce inflation and interest rate levels in both countries. As a result, the two markets gained 36 percent and 56 percent, respectively, in U.S. dollar terms, outperforming the regional markets by a large margin.

Great consumer demand continues

Consistent with the last two years, we continued to focus on selecting companies in the region that we felt would likely benefit from growing demand in China and India. While many investors were worried about overcapacity and the risk of a "hard landing" in the Chinese economy, we continued to believe in the Chinese consumption story and therefore added more names to our portfolio when the market corrected in May and June 2006. We also did very well in Singapore and Taiwan, the other two markets which we view as part of the Greater China Region. We reduced our positions in India when we believed those equity valuations were stretched in the market. This strategy served us well as the Indian market underperformed the regional market. We also focused on selecting undervalued stocks where we could identify stock prices that we felt were much lower than intrinsic values. This strategy worked well as most of the positive portfolio return was derived from individual stock selection during the fiscal year.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006						
Company	Country	Sector	Change in weighting			
Kookmin Bank	South Korea	Financial	Decreased			
Samsung Electronics Co., Ltd.	South Korea	Industrial	Decreased			
Xinhua Finance Media, ADR	China	Media	New to Top 10

AU Optronics Corp., ADR	Taiwan	Information Technology	New to Top 10			

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

We emphasized the energy, materials and industrials sectors throughout the year, as we believed they would benefit most from the fast-growing Chinese and Indian economies. We underweighted the telecommunication services and utilities sectors, because we believed those sectors were less exposed to strong final demand growth in the region. We also were underweight the consumer discretionary and the financial sectors early in the period, but subsequently increased weightings in these sectors toward the end of the fiscal year.

Our outlook

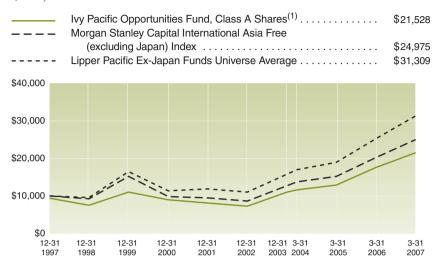

We expect regional demand to continue to be healthy in the new fiscal year, so we are likely to continue to focus on sectors that performed well over the last year. For country allocation, we may increase positions in China and India if we see a healthy correction in these two markets. We believe that these two markets still have great potential as we believe that their economies are likely to remain robust over the next few years. We may choose to raise our low exposure to South Korea because of what we feel are attractively low valuations and expectations for improved earnings growth momentum. Overall, we remain generally bullish on the Asian market, a belief that we feel has been well supported by rapid economic growth. reasonable valuations, high dividend yields and healthy corporate balance sheets relative to other international markets. In addition. we remain bullish on Asian currencies as we believe they are likely to correlate with the Chinese Yuan and outperform the U.S. Dollar. Therefore, we are likely to maintain an unhedged position on our exposure to Asian currencies.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Notes to Schedule of Investments

Certain acronyms may be used within the body of the Fund's holdings. The definitions of these acronyms are as follows: ADR – American Depositary Receipts; CMO – Collateralized Mortgage Obligation; GDR – Global Depositary Receipts and REMIC – Real Estate Mortgage Investment Conduit.

- *No dividends were paid during the preceding 12 months.
- (A)Listed on an exchange outside the United States.
- (B)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2007, the total value of these securities amounted to \$20,496,033, or 4.69% of net assets.
- (C)Illiquid security. At March 31, 2007, the total value of illiquid securities amounted to 0.41% of net assets.
- (D)Securities valued in good faith by the Valuation Committee appointed by the Board of Trustees.

See Note 1 to financial statements for security valuation and other significant accounting policies concerning investments.

See Note 3 to financial statements for cost and unrealized appreciation and depreciation of investments owned for Federal income tax purposes.

Managers' Discussion of Ivy Real Estate Securities Fund

March 31, 2007

Ivy Real Estate Securities Fund is subadvised by Advantus Capital Management, Inc.

Below, Joseph R. Betlej, CFA, and Lowell R. Bolken, the Fund's portfolio managers, discuss positioning, performance and results for the fiscal year ended March 31, 2007. Mr. Betlej has managed the Fund since its inception and has 22 years of industry experience. Mr. Bolken has managed the Fund for one year and has 17 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund advanced 18.09 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007, less than its benchmark index and less than the average of its peer group. The Dow Jones Wilshire Real

Estate Securities Index (an unmanaged group of securities generally representative of the commercial real estate market) climbed 21.96 percent for the fiscal year while the Lipper Real Estate Funds Universe Average (a group of funds with similar investment objectives) rose 22.12 percent.

We are disappointed we did not keep pace with the Fund's benchmark by a significant margin. However, commercial real estate was one of the strongest performing sectors in the overall domestic equity market for the 12-month period ended March 31, 2007, and we benefited from this trend. Investors in real estate stocks enjoyed a rise in occupancy and increased rental rates for most property types. These strong business fundamentals for landlords, as well as merger and acquisition activity, attracted substantial investor interest, even as new residential real estate development sagged and single-family home resales plunged.

Growth outpaced value

We did not do as well as we had hoped because we positioned the portfolio with the expectation that the real estate sector's seven calendar year period of outperformance versus the overall equity market (as measured by the Standard & Poor's 500 Index) would cease. We held more value-oriented stocks in the earlier part of the year with the expectation that the valuation gap between

these stocks and the higher growth, higher multiple companies would narrow. Instead, the momentum stocks continued to surge while value languished in the market.

The strength of underlying operating fundamentals for real estate companies continued despite disruptive market influences such as the inverted yield curve in the bond market, a dramatic slowdown in residential real estate, a depreciating dollar and negative geopolitical events. Earnings for real estate companies reflected strong demand for U.S. office, retail, industrial and hotel space.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	Change in weighting
Simon Property Group, Inc.	Increased
ProLogis	Decreased
Vornado Realty Trust	Increased
Boston Properties, Inc.	New to Top 10
Host Hotels & Resorts, Inc.	New to Top 10
Public Storage, Inc.	New to Top 10
Archstone-Smith Trust	New to Top 10
Brookfield Properties Corporation	Decreased
Equity Residential	Decreased
AvalonBay Communities, Inc.	New to Top 10

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

Costs constrained new construction

Inflation remained persistent in the overall economy, but was dramatically higher in the real estate market. The cost of steel, concrete, copper and oil-based building materials increased at a multiple factor of the consumer price index. Typically, strength in fundamentals translates into a new wave of development. Today, however, development remains quite restrained as rental rates have not risen enough to make new building at the higher costs feasible. As long as the economy continues to slowly improve, we believe real estate should continue to generate strong rental rate growth without new development ruining the party.

While valuation of real estate stocks has risen dramatically in the past few years, the very favorable financing markets for real estate have brought on a surge of merger and acquisition activity for the public real estate companies. With more than \$70 billion of real estate merger activity occurring in calendar year 2006, private market investors voted with their checkbook, suggesting that the public real estate markets were undervalued. The Fund, however, did not participate significantly in this wave of privatizations: many of the companies taken over were weaker operators -- the kind that we typically have underweighted in the portfolio. We were also underweight in the office subsector, which had substantial merger activity. In fact, our results were negatively affected by having a much smallerthan-index position in Equity Office Properties, a company that was the subject of takeover activity.

Hotels, industrial space were points of focus

We positioned the portfolio defensively at the beginning of the fiscal year, reflecting our expectation of a slowing of the economic growth. When it appeared that economic growth would be sustained, we shifted emphasis to what we felt were high quality growth companies operating in supplyconstrained markets or in operating niches that would be expected to generate high quality earnings growth.

During the year, hotel and industrial companies were emphasized due to earnings growth potential and individual company stories. Hotel companies are benefiting from the strength of the business traveler and, more specifically, hotel managers are seeing a significant upswing in incentive management fees at this point in the cycle. Industrial companies saw significant increases in occupancy in the past year, allowing for very profitable growth driven by rent increases.

Our outlook

In the coming year, we believe that office companies have the greatest potential for rental increases. Their markets are improving, in our opinion, allowing for increases in rents and declining costs to lease out properties. We also feel that regional mall companies should continue to have strong results as tenants continue to seek space in malls that generate sales growth and serve more affluent consumers.

Supply-constrained markets, such as Southern California, New York and Seattle,

continue to be favorites for investment as new development is difficult due to high land and building costs. These markets should maintain the best fundamentals and investor interest, in our view.

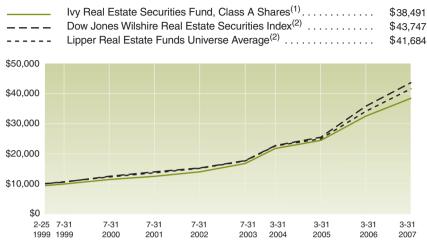

We believe that positive performance should continue for these stocks, subject to continued growth in the economy and jobs. Valuations, however, have pushed the high end of historic norms -- news, both positive and negative, can stir emotions of investors, so one should expect volatility going forward. Still, we feel that strong fundamentals should drive these stocks upward in the long run.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Investment risks associated with real estate securities, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes and differences in real estate market values. Real estate securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

- (1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.
- (2)Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performance of the indexes (including income) are not available, investment in the indexes was effected as of February 28, 1999.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

Average Annual Total Return ⁽³⁾					
	Class A	Class B	Class C	Class Y	Class R
1-year period ended 3-31-07	11.30%	12.93%	17.17%	18.32%	17.98%
5-year period ended 3-31-07	20.64%	_	_	_	_
10-year period ended 3-31-07	_	_	_	_	_
Since inception of Class ⁽⁴⁾ through 3-31-07	18.11%	22.00%	22.84%	24.08%	25.46%

- (3)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares and Class R shares are not subject to sales charges.
- (4)2-25-99 for Class A shares, 12-8-03 for Class B, Class C and Class Y shares and 12-29-05 for Class R shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Real Estate Securities Fund merged into the Ivy Real Estate Securities Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Real Estate Securities Fund Class A shares, restated to reflect current sales charges applicable to Ivy Real Estate Securities Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Real Estate Securities Fund. If these expenses were reflected. performance shown would differ.

SHAREHOLDER SUMMARY OF IVY REAL ESTATE SECURITIES FUND

Manager's Discussion of Ivy Small Cap Value Fund

March 31, 2007

The Ivy Small Cap Value Fund is subadvised by BlackRock Capital Management, Inc.*

Below, Wayne J. Archambo, CFA, the Fund's portfolio manager, discusses the Fund's positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund for two years and has 22 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C, LARGE
			CAPITALIZATION
			ION SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund rose 8.26 percent (Class A shares at net asset value) for the 12 months ended March 31, 2007, underperforming its benchmark index. By comparison, the Russell 2000 Value Index (reflecting the performance of securities that generally represent small company value stocks) increased 10.36 percent during the period. The Lipper Small-Cap Value Funds Universe Average (reflecting the universe of funds with similar investment objectives) increased 7.83 percent during the period.

A volatile year

We faced a challenging year for smallcapitalization stocks as increased volatility and a slowing domestic economy led investors to favor larger cap segments of the market. In this environment, value outpaced growth across the market capitalization spectrum. Following a pronounced sell-off in early May, prompted by spiking energy prices and the Federal Reserve's 16th consecutive increase in short-term interest rates, equities rallied. Crude oil prices pulled back toward \$60/barrel from their early August highs near \$77/barrel. Moving into the first quarter of 2007, equity markets came under pressure following a sharp sell-off overseas. Furthermore, concern surrounding the subprime mortgage market and continued weakness in the housing sector weighed on investors' appetite for risk. However, despite these headwinds, domestic equities ended the quarter in positive territory, contributing to overall gains for the fiscal year.

Within the benchmark Russell 2000 Value Index, utilities, materials and consumer staples were among the strongest performing sectors, while financials and information technology lagged overall index returns. Within the Fund, stock selection gains in consumer discretionary and utilities were largely offset by weakness in financials and energy.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	Change in weighting
BJ's Wholesale Club, Inc.	New to Top 10
Orient-Express Hotels Ltd.	New to Top 10
DJO Incorporated	New to Top 10
Brink's Company (The)	Decreased
Silgan Holdings Inc.	New to Top 10
Pilgrim's Pride Corporation	New to Top 10
Hain Celestial Group, Inc.	
(The)	New to Top 10
Piper Jaffray Companies	Decreased
Texas Industries, Inc.	New to Top 10
Waste Connections, Inc.	New to Top 10

See your advisor or www.ivyfunds.com for more information on the Fund's most recently published Top 10 Holdings.

Despite fears of a slowdown in consumer spending, specialty retailers and hotel and resort holdings were among the key performance drivers in the consumer discretionary sector. Within the Fund, stock selection among specialty retailers added the greatest value, benefiting in part from continued merger-and-acquisition activity within the sector. For example, a private equity group purchased Petco Animal Supplies at a substantial premium. OfficeMax was another contributor to our return. A new management team was able to significantly boost profit margins at the chain of officesupply superstores. Also, hotel and resort holdings added value, led by Orient-Express Hotels Ltd. and Vail Resorts. Inc.

In utilities, solid stock selection, particularly among electric utilities, and an overweight among multi-utilities, contributed to favorable sector comparisons. ITC Holdings Corp. was a standout performer within the sector. Building upon earlier gains, shares of the electricity transmission company spiked higher in mid-January following an announced deal to acquire the transmission assets of Interstate Power & Light Co.

Conversely, the Fund underperformed the Russell 2000 Value Index in financials. Within the sector, an overweight in capital market stocks and underweights among thrifts and mortgage finance and commercial banks added value. However, these relative

gains were overshadowed by the negative impact of an underweight and stock selection among Real Estate Investment Trusts (REITs) and disappointing performance from holdings in the insurance and commercial banking sub-sectors. We continue to believe REITs, which made up 14 percent of the index, are unattractive from both a valuation and yield standpoint. As such, we are maintaining our underweight position. In addition, disappointing stock selection hampered performance comparisons in energy as the Fund remained market weight. The sector was highly volatile during the period as crude oil prices bounced between \$50/barrel and \$77/barrel, before closing March above the \$65/barrel mark. Notable individual detractors included coal producer Massey Energy and equipment and service providers Carbo Ceramics and Hercules Offshore, Inc.

Our outlook

Looking ahead, we expect increased volatility in the equity markets as the positive catalysts of ample liquidity, ongoing strength in merger-and-acquisition activity, aggressive stock buybacks and a possible easing in monetary policy fight the headwinds of slowing economic growth, further deterioration in the housing market and contracting corporate profit margins. Accordingly, the Fund is more neutrally positioned from a sector perspective; with a continued focus on holding stocks of what we feel are high-quality, small-cap companies. As we enter the second quarter of 2007, the most notable sector positioning relative to the benchmark Russell 2000 Value Index includes overweights in consumer staples, health care and industrials, and underweights in information technology and financials, primarily driven by our underweight exposure to REITs and banks. We believe the Fund is well positioned to continue to benefit from heightened merger-and-acquisition activity as our investment process generally leads us to own what we believe to be attractively valued stocks of solid companies that also have the potential to be compelling private equity and leveraged buyout candidates.

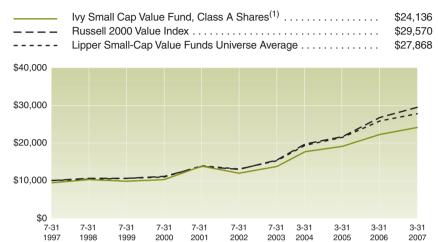

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Investing in small-cap stocks may carry more risk than investing in stocks of larger, more well-established companies. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

*Please note that, effective September 29, 2006, the Fund's subadvisor changed from BlackRock Financial Management, Inc. to BlackRock Capital Management, Inc. due to the contribution by Merrill Lynch & Co., Inc. of its investment management business, Merrill Lynch Investment Managers, to BlackRock, Inc. to form a new asset management company. Between September 29, 2006 and February 2, 2007, BlackRock Capital Management, Inc. served as interim subadvisor.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾				
	Class A	Class B	Class C	Class Y

10-year period ended 3-31-07	11.12%	_	_	_
Since inception of Class ⁽³⁾ through 3-31-07	_	10.88%	11.95%	13.19%

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3)12-8-03 for Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Venture Fund merged into the Ivy Small Cap Value Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Venture Fund Class A shares, restated to reflect current sales charges applicable to Ivy Small Cap Value Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Small Cap Value Fund. If these expenses were reflected, performance shown would differ.

SHAREHOLDER SUMMARY OF IVY SMALL CAP VALUE FUND

See Notes to Financial Statements.

⁽¹⁾Total return calculated without taking into account the sales load deducted on an initial purchase.

⁽²⁾Annualized.

⁽³⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown above reflect a blended rate that includes the effect of income and expenses for those Class B and Class C shares from August 1, 2003 up to the time of the merger. Actual expenses that applied to Class A shareholders were lower than shown above.

⁽⁴⁾ There was no waiver of expenses during the period.

Manager's Discussion of Ivy Value Fund

March 31, 2007

Below, Matthew T. Norris, CFA, portfolio manager of the Ivy Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2007. He has managed the Fund since its inception and has 15 years of industry experience.

VALUE	STYLE BLEND	GROWTH	
			C/ LARGE
			CAPITALIZATION
			TON SMALL

This diagram shows the Fund's equity investment style and the size of companies in the Fund, as measured by market capitalization. Shaded areas reflect quarterly data for the past three years. Source: Morningstar

The Fund increased 14.12 percent (Class A shares at net asset value), underperforming its benchmark but outperforming its peer group. By comparison, the Russell 1000 Value Index (reflecting the performance of securities that generally represent the value sector of the stock market) increased 16.87 percent during the period, and the Lipper Large-Cap Value Funds Universe Average (generally reflecting the performance of the universe of funds with similar investment objectives) increased 13.78 percent.

For the fiscal year, higher growth areas generally lagged behind the more traditional value areas. Meanwhile, economic activity was robust for much of 2006, with corporate earnings growth and profit margins near all-time highs. However, that appears to be slowing as we move through calendar year 2007. Housing has slowed and interest rates are up year over year. Also, the inverted bond market yield curve (short-term rates were higher than long-term rates) was a classic indicator of slowing economic performance this past year.

While corporate profit margins are still healthy, the reinvestment opportunities of that cash to generate future growth appear slim, in our opinion. This is reflected in changing corporate behavior, with more companies choosing to pay down debt or buy back stock, as opposed to investing for future growth by building more plants.

Utilities and telecom led, health care detracted

The markets were led by utilities and telecommunications, perhaps because these are less cyclical areas that likely will be affected less by slowing economic conditions. Areas of poor performance this past year included health care, consumer durables and technology. The Fund underperformed its

benchmark primarily due to a few poor stock selections in health care at the beginning of the fiscal period. Our relative performance improved as the year wore on.

Our outlook

The Fund has concentrated its holdings into fewer names as conditions have dictated. However, our basic approach has not changed: we continue to search for what we feel are high-quality investment ideas, one by one, with stock prices that look to be cheap relative to a company's prospects. Furthermore, we remain diversified across economic sectors in an effort to maximize our ability to manage risk.

Changes to Top 10 Equity Holdings March 31, 2007 compared to March 31, 2006

Company	weighting
Exxon Mobil Corporation	Unchanged
Bank of America	
Corporation	Increased
J.P. Morgan Chase & Co.	Increased
Hewlett-Packard Company	Increased
Unum Group	New to Top 10
Altria Group, Inc.	New to Top 10
ChevronTexaco Corporation	Increased
Travelers Companies, Inc.	
(The)	New to Top 10
Citigroup Inc.	Decreased
FirstEnergy Corp.	New to Top 10

See your advisor or www.ivyfunds.com for more information on the Fund's most currently reported Top 10 Holdings.

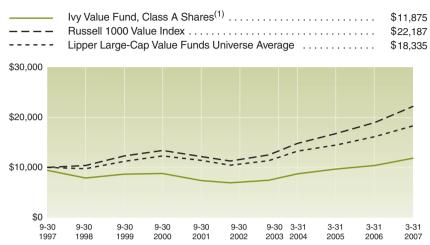

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what is believed to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Comparison of Change in Value of \$10,000 Investment

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾				
	Class A	Class B	Class C	Class Y
1-year period ended 3-31-07	7.56%	8.99%	13.09%	14.28%
5-year period ended 3-31-07	6.07%	_	_	_
10-year period ended 3-31-07	3.70%	_	-	_
Since inception of Class ⁽³⁾ through 3-31-07	_	10.37%	11.20%	12.39%

- (2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfunds.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.
- (3)12-8-03 for Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Cornerstone Fund merged into the Ivy Value Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Cornerstone Fund Class A shares, restated to reflect current sales charges applicable to Ivy Value Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Value Fund. If these expenses were reflected, performance shown would differ.

SHAREHOLDER SUMMARY OF IVY VALUE FUND

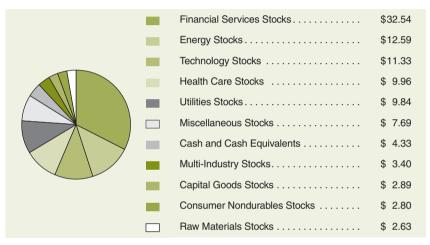

Portfolio Highlights

On March 31, 2007, Ivy Value Fund had net assets totaling \$83,744,428 invested in a diversified portfolio of:

92.56%	Domestic Common Stocks
4.33%	Cash and Cash Equivalents
3.11%	Foreign Common Stocks

As a shareholder of the Fund, for every \$100 you had invested on March 31, 2007, your Fund owned:

⁽¹⁾Total return calculated without taking into account the sales load deducted on an initial purchase.
(2)Annualized.

See Notes to Financial Statements.

⁽³⁾In connection with the reorganization plan effected December 8, 2003, Class B and Class C shares of the predecessor Advantus Fund were exchanged into Class A shares at the time of the merger. The ratios shown above reflect a blended rate that includes the effect of income and expenses for those Class B and Class C shares from August 1, 2003 up to the time of the merger. Actual expenses that applied to Class A shareholders were lower than shown above.

⁽⁴⁾There was no waiver of expenses during the period.

Notes to Financial Statements

March 31, 2007

NOTE 1 – Significant Accounting Policies

Ivy Funds (formerly Ivy Fund) (the Trust) is organized as a Massachusetts business trust under a Declaration of Trust dated December 21, 1983 and is registered under the Investment Company Act of 1940 as a diversified, open-end management investment company. The Trust issues fourteen series of capital shares; each series represents ownership of a separate mutual fund (Fund). The assets belonging to each Fund are held separately by the custodian. The capital shares of each Fund represent a pro rata beneficial interest in the principal, net income and realized and unrealized capital gains or losses of its respective investments and other assets. The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

- A. Security valuation Each stock and convertible bond is valued at the latest sale price thereof on each business day of the fiscal period as reported by the principal securities exchange on which the issue is traded or, if no sale is reported for a stock, the average of the latest bid and asked prices. Bonds, other than convertible bonds, are valued using a pricing system provided by a pricing service or dealer in bonds. Convertible bonds are valued using this pricing system only on days when there is no sale reported. Stocks which are traded over-the-counter are priced using the Nasdaq Stock Market, which provides information on bid and asked prices quoted by major dealers in such stocks. Securities for which quotations are not readily available or are deemed not to be reliable because of significant events or circumstances identified between the closing of their principal markets and the closing of the New York Stock Exchange are valued at fair value as determined in good faith under procedures established by and under the general supervision of the Trust's Board of Trustees. Management's valuation committee makes fair value determinations for the Trust, subject to the supervision of the Board of Trustees. Short-term debt securities, purchased with less than 60 days to maturity, are valued at amortized cost, which approximates market value. Shortterm debt securities denominated in foreign currencies are valued at amortized cost in that currency.
- **B. Security transactions and related investment income** Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Securities gains and losses are calculated on the identified cost basis. Premium and discount on the purchase of bonds are amortized for both financial and tax reporting purposes over the remaining lives of the bonds. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Interest income is recorded on the accrual basis. See Note 3 Investment Securities Transactions.
- C. Foreign currency translations All assets and liabilities denominated in foreign currencies are translated into United States dollars daily. Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. The Trust combines fluctuations from currency exchange rates and fluctuations in market value when computing net realized and unrealized gain or loss from investments.

- D. Forward foreign currency exchange contracts A forward foreign currency exchange contract (Forward Contract) is an obligation to purchase or sell a specific currency at a future date at a fixed price. Forward Contracts are marked-to-market daily at the applicable translation rates and the resulting unrealized gains or losses are reflected in the Trust's financial statements. Gains or losses are realized by the Trust at the time the Forward Contract is extinguished. Contracts may be extinguished either by entry into a closing transaction or by delivery of the currency. Risks may arise from the possibility that the other party will not complete the obligations of the contract and from unanticipated movements in the value of the foreign currency relative to the United States dollar. The Trust uses Forward Contracts to attempt to reduce the overall risk of its investments.
- **E. Federal income taxes** It is the Trust's policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, the Trust intends to pay distributions as required to avoid imposition of excise tax. Accordingly, provision has not been made for Federal income taxes. See Note 4 Federal Income Tax Matters.
- **F. Dividends and distributions** Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as deferral of wash sales and post-October losses, foreign currency transactions, net operating losses and expiring capital loss carryovers. At March 31, 2007, the following amounts were reclassified:

	Accumulated Undistributed Net Realized Gain (Loss)	Accumulated Undistributed Net Investment Income	Additional Paid-in Capital
Ivy Cundill Global Value Fund	\$ (77,429)	\$ 77,429	\$ —
Ivy Dividend Income Fund	(11,297)	11,297	_
Ivy Global Natural Resources Fund.	_	(3,160,500)	3,160,500
Ivy International Core Equity Fund	_	(119,500)	119,500
Ivy Pacific Opportunities Fund	(1,080,809)	1,080,809	_
Ivy Small Cap Value Fund	(438,509)	423,709	14,800

- **G. Repurchase agreements** Repurchase agreements are collateralized by the value of the resold securities which, during the entire period of the agreement, remains at least equal to the value of the loan, including accrued interest thereon. The collateral for the repurchase agreement is held by the custodian bank.
- H. Recently issued accounting standards In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes the minimum recognition threshold a tax position must meet in connection with accounting for uncertainties in income tax positions taken or expected to be taken by an entity, including mutual funds, in a tax return before being measured and recognized in the financial statements. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Trust will adopt FIN 48 during 2007 and its potential impact on each Fund's financial statements, if any, is currently being assessed by management. In September 2006, FASB issued Statement on Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value for purposes of financial statement presentation, establishes a hierarchy for measuring fair value in generally accepted accounting principles and expands financial statement disclosures about fair value measurements that are relevant to mutual funds. SFAS

No. 157 is effective for fiscal years beginning after November 15, 2007. The Trust will adopt SFAS No. 157 during 2008 and its potential impact, if any, on each Fund's financial statements is currently being assessed by management.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

NOTE 2 – Investment Management and Payments to Affiliated Persons

Ivy Investment Management Company (IICO), a wholly owned subsidiary of Waddell & Reed Financial, Inc. (WDR), serves as the investment manager for each Fund. IICO provides advice and supervises investments for which services it is paid a fee. The fee is payable by each Fund at the following annual rates:

Fund	Net Asset Breakpoints	Annual Rate
Ivy Balanced Fund	Up to \$1 Billion	0.70%
	Over \$1 Billion up to \$2 Billion	0.65%
	Over \$2 Billion up to \$3 Billion	0.60%

These fees are accrued daily and are paid monthly. However, IICO has voluntarily agreed to waive its management fee for Ivy Dividend Income Fund on any day that the Fund's net assets are less than \$25 million, subject to IICO's right to change or modify this waiver.

Mackenzie Financial Corporation (MFC) serves as subadvisor to Ivy Global Natural Resources Fund under an agreement with IICO and receives a fee as follows: 0.50% of the Fund's average daily net assets up to \$500 million, 0.425% of net assets over \$500 million and up to \$1 billion, 0.415% of net assets over \$1 billion and up to \$2 billion, 0.40% of net assets over \$2 billion and up to \$3 billion, and 0.38% of net assets over \$3 billion.

Cundill Investment Research Ltd. served as subadvisor to Ivy Cundill Global Value Fund under an agreement with IICO and received a fee that is shown in the following table:

		Annual
Fund	Net Asset Breakpoints	Rate
Ivy Cundill Global Value Fund	On the first \$500 Million	0.50%
	On the next \$500 Million	0.425%
	On the next \$1 Billion	0.415%
	On the next \$1 Billion	0.40%
	On all assets exceeding \$3 Billion	0.38%

Effective September 22, 2006, MFC became the interim subadvisor to Ivy Cundill Global Value Fund. Its fee is the same as that payable to Cundill Investment Research Ltd.

Henderson Global Investors (North America) Inc. (HGINA) serves as subadvisor to Ivy European Opportunities Fund under an agreement with IICO. Henderson Investment Management Ltd., under a subadvisory agreement with HGINA, serves as subadvisor to the Fund. HGINA receives a fee payable monthly at an annual rate of 0.50% of average net assets.

Advantus Capital Management, Inc. serves as subadvisor to Ivy Bond Fund, Ivy Mortgage Securities Fund and Ivy Real Estate Securities Fund under an agreement with IICO and receives a fee equal to, on an annual basis, 0.27%, 0.30% and 0.55% of the respective Fund's average net assets.

BlackRock Financial Management, Inc. served as subadvisor to Ivy Small Cap Value Fund under an agreement with IICO and received a fee equal to, on an annual basis, 0.50% of the Fund's average net assets.

Effective September 27, 2006, BlackRock Capital Management, Inc, became the interim subadvisor to the Fund. Its fee is the same as that payable to the predecessor.

Templeton Investment Counsel, LLC serves as subadvisor to Ivy International Balanced Fund under an agreement with IICO and receives a fee that is shown in the following table:

Fund	Net Asset Breakpoints	Annual Rate
Ivy International Balanced Fund	On the first \$100 Million	0.50%
	All net assets exceeding \$100 Million	0.40%

Pursuant to a Master Fund Accounting Services Agreement, IICO provides certain accounting and pricing services for each Fund. As of March 18, 2003, IICO assigned its responsibilities under the Accounting Services Agreement to Waddell & Reed Services Company (WRSCO), an indirect subsidiary of WDR. For these services, each Fund pays WRSCO a monthly fee of one-twelfth of the annual fee shown in the following table:

Accounting Services Fee

Avera	Average Net Asset Level (in millions)		Level	Annual Fee Rate for Each Level
From	\$	0 to \$	10	\$ 0
From	\$	10 to \$	25	\$ 11,500
From	\$	25 to \$	50	\$ 23,100
From	\$	50 to \$	100	\$ 35,500
From	\$	100 to \$	200	\$ 48,400
From	\$	200 to \$	350	\$ 63,200
From	\$	350 to \$	550	\$ 82,500
From	\$	550 to \$	750	\$ 96,300
From	\$	750 to \$	1,000	\$121,600
	\$1	,000 and	Over	\$148,500

In addition, for each class of shares in excess of one, each Fund pays WRSCO a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Under the Shareholder Servicing Agreement, with respect to Class A, Class B, Class C, Class II and Advisor Class shares, for each shareholder account that was in existence at any time during the prior month: Ivy Balanced Fund, Ivy Dividend Income Fund, Ivy International Balanced Fund, Ivy Real Estate Securities Fund, Ivy Small Cap Value Fund and Ivy Value Fund pay WRSCO a monthly fee of \$1.5792; Ivy Bond Fund and Ivy Mortgage Securities Fund pay WRSCO a monthly fee of \$1,6958; and Ivy Cundill Global Value Fund, Ivy European Opportunities Fund. Ivy Global Natural Resources Fund, Ivy International Growth Fund, Ivy International Core Equity Fund and Ivy Pacific Opportunities Fund each pay WRSCO a monthly fee of \$1.5042. For Class Y shares, each Fund pays WRSCO a monthly fee at an annual rate of 0.15% of the average daily net assets of the class for the preceding month. For Class R shares, each Fund pays WRSCO a monthly fee at an annual rate of 0.20% of the average daily net assets of the class for the preceding month. Effective September 1, 2006, the Shareholder Servicing Agreement with respect to Class A, Class B and Class C shares has been revised so that each Fund pays WRSCO an annual fee (payable monthly) for each account of the Fund that is non-networked and is as shown above; however, WRSCO has agreed to reduce those fees if the number of total shareholders accounts within the Complex (Waddell & Reed Advisors Funds, Waddell & Reed InvestEd Porfolios, Inc., Ivy Funds and Ivy Funds, Inc.) reaches certain levels. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain intermediaries), WRSCO has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries. Each Fund also reimburses WRSCO for certain out-of-pocket costs for all classes. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WRSCO if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. WRSCO pays such broker-dealers a per account fee for each open account within the omnibus account, or a fixed rate (e.g., 0.10%) fee, based on the average daily net asset value of the omnibus account (or a combination thereof).

Pursuant to an Administrative Services Agreement, IICO provides certain administrative services to each Fund. The administrative fee for each Fund is a monthly fee at the annual rate of 0.01% of each Fund's average daily net assets.

As principal underwriter for the Trust's shares, Ivy Funds Distributor, Inc. (IFDI) receives sales commissions (which are not an expense of the Trust) for Class A shares. A contingent deferred sales charge (CDSC) may be assessed against a shareholder's redemption amount of Class B, Class C or certain Class A shares and is paid to IFDI. During the fiscal year ended March 31, 2007, IFDI received the following amounts in sales commissions and CDSC:

	Sales		CDSC	
	Commissions	Class A	Class B	Class C
Ivy Balanced Fund	\$ 135,533	\$ 13	\$ 4,201	\$ 156
Ivy Bond Fund	194,008	794	4,546	471
Ivy Cundill Global Value Fund	2,163,856	20,310	79,396	40,419
Ivy Dividend Income Fund	431,557	1,881	12,200	1,599
Ivy European Opportunities Fund	1,624,827	45,072	25,584	4,745
Ivy Global Natural Resources Fund	6,577,986	32,834	447,637	201,263
Ivy International Balanced Fund	910,194	11,809	3,774	6,957
Ivy International Core Equity Fund	714,049	2,937	4,828	2,670
Ivy International Growth Fund	173,067	165	7,990	1,414
Ivy Mortgage Securities Fund	991,551	1,123	25,234	6,125
Ivy Pacific Opportunities Fund	2,274,196	68,948	13,800	6,384

Ivy Small Cap Value Fund	555,127	864	5,151	621
Ivy Value Fund	238,900	598	2,624	205

With respect to Class A, Class B and Class C shares, IFDI pays sales commissions and all expenses in connection with the sale of the Trust's shares, except for registration fees and related expenses. During the fiscal year ended March 31, 2007, IFDI paid the following amounts:

Ivy Balanced Fund	\$ 135,269
Ivy Bond Fund	197,555
Ivy Cundill Global Value Fund	2,526,523
Ivy Dividend Income Fund	437,392
Ivy European Opportunities Fund	1,734,170
Ivy Global Natural Resources Fund	10,401,236
Ivy International Balanced Fund	1,048,388
Ivy International Core Equity Fund	882,651
Ivy International Growth Fund	227,183
Ivy Mortgage Securities Fund	977,318
Ivy Pacific Opportunities Fund	2,289,335
Ivy Real Estate Securities Fund	1,981,356
Ivy Small Cap Value Fund	555,827
Ivy Value Fund	237,155

Under a Distribution and Service Plan for Class A shares adopted by the Trust pursuant to Rule 12b–1 under the Investment Company Act of 1940, each Fund may pay a distribution and/or service fee to IFDI in an amount not to exceed 0.25% of the Fund's average annual net assets attributable to that class. The fee is to be paid to reimburse IFDI for amounts it expends in connection with the distribution of the Class A shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts.

Under a Distribution and Service Plan for Class B and Class C shares adopted by the Trust pursuant to Rule 12b–1 under the Investment Company Act of 1940, each Fund may pay IFDI a service fee in an amount not to exceed 0.25% of the Fund's average annual net assets attributable to that class. The fee is to be paid to reimburse IFDI for amounts it expends in connection with

the provision of personal services to Fund shareholders and/or maintenance of shareholder

Under the Distribution and Service Plan for Class B shares and Class C shares adopted by the Trust pursuant to Rule 12b–1 under the Investment Company Act of 1940, each Fund may pay IFDI a distribution fee not to exceed 0.75% of the Fund's average annual net assets attributable to that class to compensate IFDI for its services in connection with the distribution of shares of that class. The Class B Plan and the Class C Plan each permit IFDI to receive compensation, through the distribution fee, for its distribution activities for that class.

Under the Class Y Plan, each Fund may pay IFDI a fee of up to 0.25%, on an annual basis, of the average daily net assets attributable to that class to compensate IFDI for, either directly or through third parties, distributing the Class Y shares of that Fund, providing personal service to Class Y shareholders and/or maintenance of Class Y shareholder accounts.

Under the Class R Plan, each Fund may pay IFDI a fee of up to 0.50%, on an annual basis, of the average daily net assets attributable to that class to compensate IFDI for, either directly or through third parties, distributing the Class R shares of that Fund, providing personal service to Class R shareholders and/or maintenance of Class R shareholder accounts.

For Ivy Cundill Global Value Fund, Ivy Global Natural Resources Fund, Ivy International Core Equity Fund and Ivy Pacific Opportunities Fund, IICO has contractually agreed to reimburse a Fund's expenses, for the calendar year ended December 31, 2006, and for the following five years, to the extent necessary to ensure that the Fund's annual operating expenses, when calculated at the Fund level, do not exceed 2.50% of the Fund's average net assets (excluding 12b–1 fees and certain other expenses). During the fiscal year ended March 31, 2007, IICO reimbursed the Fund's expenses as shown in the following table:

In addition, IFDI and WRSCO have voluntarily agreed to waive sufficient Fund expenses to ensure that the total annual fund operating expenses do not exceed the following levels for the specified funds/classes:

Fund and Class	Expense Limitation (as a percentage of average net assets of each Class)
Ivy Cundill Global Value Fund, Class A	. 1.90%
Ivy Cundill Global Value Fund, Class C	. 2.55%
Ivy Cundill Global Value Fund, Class Y	. 1.20%
Ivy Global Natural Resources Fund, Class A	. 1.70%
Ivy Global Natural Resources Fund, Class C	. 2.40%
Ivy Global Natural Resources Fund, Class Y	. 1.20%
During the fiscal year ended March 31, 2007, IFDI reimbursed the Fundameter $\overline{\mbox{\sc h}}$	l's service fees as shown:

\$319,841, which is included in other expenses.

\$ 32.943

Total carryover	\$648,553	\$471,660

Ivy Developing Markets Fund was merged into Ivy Pacific Opportunities Fund as of June 16, 2003. At the time of the merger, Ivy Developing Markets Fund had capital loss carryovers available to offset future gains of the Ivy Pacific Opportunities Fund. These carryovers are limited to \$157,220 for each period ending from March 31, 2008 through 2010 plus any unused limitations from prior years.

Ivy International Growth Fund was merged into Ivy International Fund (see Note 11) as of March 27, 2006. At the time of the merger, Ivy International Growth Fund had capital loss carryovers available to offset future gains of the Ivy International Fund. These carryovers are limited to \$7,403,026 for the period ending March 31, 2008 and \$3,234,412 for each period ending from March 31, 2009 through 2010 plus any unused limitations from prior years and the amount of certain built-in gains realized, if any.

Note 5 - Multiclass Operations

Each Fund within the Trust offers four classes of shares, Class A, Class B, Class C and Class Y, each of which have equal rights as to assets and voting privileges. In addition, Ivy Global Natural Resources Fund and Ivy Real Estate Securities Fund offer Class R shares, which also have equal rights as to assets and voting privileges. Ivy Cundill Global Value Fund, Ivy European Opportunities Fund, Ivy Global Natural Resources Fund, Ivy International Core Equity Fund, Ivy International Growth Fund and Ivy Pacific Opportunities Fund also offered Advisor Class shares and Ivy Cundill Global Value Fund and Ivy International Growth Fund also offered Class II shares. Advisor Class and Class II shares are no longer available for investment. A comprehensive discussion of the terms under which shares of each class are offered is contained in the Prospectuses and the Statement of Additional Information for the Trust.

Income, non-class specific expenses, and realized and unrealized gains and losses are allocated daily to each class of shares based on the value of their relative net assets as of the beginning of each day adjusted for the prior day's capital share activity.

Transactions in capital stock for the fiscal year ended March 31, 2007 are summarized below. Amounts are in thousands.

Annual Report 313

NOTE 6 - Options

Options purchased by a Fund are accounted for in the same manner as marketable portfolio securities. The cost of portfolio securities acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from securities sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current market value of the option written. The current market value of an option is the last sales price on the principal exchange on which the option is traded or, in the absence of transactions, the mean between the bid and asked prices or at a value supplied by a broker-dealer. When an option expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold) and the liability related to such option is extinguished. When a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the securities purchased by the Fund is reduced by the amount of the premium received.

For Ivy Value Fund, transactions in written call options were as follows:

	Number of Contracts	Premiums Received
Outstanding at March 31, 2006	420	\$ 24,522
Options written	4,102	201,315
Options terminated in closing purchase transactions	(331)	(27,620)
Options exercised	(650)	(32,775)
Options expired	(2,564)	(114,273)
Outstanding at March 31, 2007	977	\$ 51,169

For Ivy Value Fund, transactions in written put options were as follows:

	Number of Contracts	Premiums Received
Outstanding at March 31, 2006	367	\$ 29,642
Options written	2,685	190,538
Options terminated in closing purchase transactions	(—)	(—)
Options exercised	(430)	(36,280)
Options expired	(2,408)	(149,773)
Outstanding at March 31, 2007	214	\$ 34,127

NOTE 7 - Futures

The Trust may engage in buying and selling futures contracts. Upon entering into a futures contract, the Trust is required to deposit, in a segregated account, an amount of cash or United States Treasury Bills equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Trust each day, dependent on the daily fluctuations in the value of the underlying debt security or index. These changes in the variation margins are recorded by the Trust as unrealized gains or losses. Upon the closing of the contracts, the cumulative net change in the variation margin is recorded as realized gain or loss. The Trust uses futures to attempt to reduce the overall risk of its investments.

NOTE 8 - Swaps

Each Fund may invest in swap agreements, which are agreements to exchange the return generated by one instrument for the return generated by another instrument. The Fund may enter into credit default, total return, variance and other swap agreements to: 1) preserve a return or a spread on a particular investment or portion of its portfolio; 2) to protect against any increase in the price of securities the Fund anticipates purchasing at a later date; or 3) to attempt to enhance yield.

Credit default swaps involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy. Under a credit default swap one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs. Each Fund may enter into credit default swaps in which either it or its counterparty act as the guarantor.

Total return swaps involve a commitment to pay periodic interest payments in exchange for a market-linked return based on a security or a basket of securities representing a variety of securities or a particular index. To the extent the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Variance swaps involve a contract in which two parties agree to exchange cash flows based on the measured variance of a specified underlying security or index during a certain time period. On the trade date, the two parties agree on the strike price of the contract (the reference level against which cash flows are exchanged), as well as the number of units in the transaction and the length of the contract. Like an option contract, the value of a variance swap is influenced by both realized and implied volatility, as well as the passage of time. Each Fund may enter into variance swaps to manage volatility risk.

The creditworthiness of firms with which a Fund enters into a swap agreement is monitored by IICO. If a firm's creditworthiness declines, the value of the agreement would likely decline, potentially resulting in losses. If a default occurs by the counterparty to such a transaction, the Fund will have contractual remedies pursuant to the agreement related to the transaction.

Swaps are marked-to-market daily based on valuations provided by a pricing vendor of a broker-dealer. Changes in value are recorded as unrealized appreciation (depreciation) in the Statement of Operations. Collateral, in the form of cash or securities, may be required to be held in segregated accounts with the custodian or counterparty. Payments received or made at the beginning of the measurement period are reflected as such on the Statement of Assets and Liabilities. These upfront payments, as well as any periodic payments, are recorded as realized gain or loss in the Statement of Operations. Gains or losses may be realized upon termination of the swap agreement.

Entering into swap agreements involves certain risks. Among these are possible failure of the counterparty to fulfill its obligations, possible lack of liquidity, and unfavorable changes in interest rates or underlying investments.

NOTE 9 - Acquisition of Ivy International Growth Fund

On March 27, 2006, Ivy International Fund acquired all the net assets of Ivy International Growth Fund pursuant to a plan of reorganization approved by the shareholders of Ivy International Growth Fund on March 17, 2006. The acquisition was accomplished by a tax-free exchange of 2,671,036 shares of Ivy International Fund (valued at \$74,183,759) for the 5,422,375 shares of Ivy International Growth Fund outstanding on March 27, 2006. Ivy International Growth Fund had net assets of \$74,183,759, including \$17,373,263 of net unrealized appreciation in value of

investments and \$37,072,675 of accumulated net realized losses on investments, which were combined with those of Ivy International Fund. The aggregate net assets of Ivy International Fund and Ivy International Growth Fund immediately before the acquisition were \$155,403,615 and \$74,183,759, respectively. The aggregate net assets of Ivy International Fund and Ivy International Growth Fund immediately following the acquisition were \$229,587,374 and \$0, respectively.

NOTE 10 - Liquidation of Ivy Cash Reserves Fund

On September 29, 2006, Ivy Cash Reserves Fund was liquidated.

NOTE 11 – Name Changes

On December 6, 2006, Ivy International Fund and Ivy International Value Fund changed their names to Ivy International Growth Fund and Ivy International Core Equity Fund, respectively.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders of Ivy Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Balanced Fund, Bond Fund, Cundill Global Value Fund, Dividend Income Fund, European Opportunities Fund, Global Natural Resources Fund, International Balanced Fund, International Core Equity Fund (formerly International Value Fund), International Growth Fund (formerly International Fund), Mortgage Securities Fund, Pacific Opportunities Fund, Real Estate Securities Fund, Small Cap Value Fund and Value Fund (collectively the "Funds") comprising Ivy Funds, as of March 31, 2007, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two fiscal years in the period then ended, and the financial highlights for the periods presented (except as noted below). These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights of the Real Estate Securities Fund, Small Cap Value Fund and Value Fund for each of the periods ended July 31, 2003 and prior were audited by other auditors whose report, dated September 5, 2003, expressed an unqualified opinion on those financial highlights. The financial highlights of the Balanced Fund, Bond Fund, International Balanced Fund and Mortgage Securities Fund for each of the periods ended September 30, 2003 and prior were audited by other auditors whose report, dated November 7, 2003, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2007, by correspondence with the custodian and brokers; where replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the respective funds of Ivy Funds, as of March 31, 2007, the results of their operations for the year then ended, the changes in their net assets for each of the two fiscal years in the period then ended, and the financial highlights for the periods presented (except as noted above in reference to the reports of other auditors), in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP Kansas City, Missouri May 17, 2007

Income Tax Information

Dividends are declared and recorded by Ivy Cash Reserves Fund on each day the New York Stock Exchange is open for business. Dividends are paid monthly usually on the 27th of the month or on the preceding business day if the 27th is a weekend or holiday. Dividends paid during the period beginning April 1, 2006 through the date of liquidation of September 29, 2006 are not qualified dividend income for individuals and are not eligible for the dividends received deduction for corporations.

The tax status of dividends paid will be reported to you on Form 1099-DIV after the close of the applicable calendar year.

Income Tax Information

Total

\$ 0.2010 \$ 0.2010 \$

The amounts of the dividends and long-term capital gains below, multiplied by the number of shares owned by you in the Funds shown on the record dates, will give you the total amounts to be reported in your Federal income tax return for the years in which they were received or reinvested.

reinvested.

^{*}Includes gross up of pass-through foreign tax credit.

Dividends are declared and recorded by each of the following Funds on each day the New York Stock Exchange is open for business. Dividends are paid monthly usually on the 27th of the month or on the preceding business day if the 27th is a weekend or holiday.

The table below shows the taxability of dividends and long-term capital gains paid during the fiscal year ended March 31, 2007:

PER-SHARE AMOUNTS REPORTABLE AS:

		For Individuals		Fo	ıs

April 2006 through March 2007	100.0000%	100.0000%	%	 %	100.0000%	%
		Ivy Mortgag	ge Securities Fu	und		
April 2006 through March 2007	100.0000%	100.0000%	%	%	100.0000%	%

CORPORATION DEDUCTIONS – Under Federal tax law, the amounts reportable as Qualifying Dividends are eligible for the dividends received deduction in the year received as provided by Section 243 of the Internal Revenue Code.

Internal Revenue Code regulations permit each qualifying Fund to elect to pass through a foreign tax credit to shareholders with respect to foreign taxes paid by the Fund. Ivy Cundill Global Value Fund, Ivy European Opportunities Fund, Ivy Global Natural Resources Fund, Ivy International Balanced Fund, Ivy International Core Equity Fund, Ivy International Growth Fund and Ivy Pacific Opportunities Fund elected to pass through to their shareholders \$1,351,869, \$985,154, \$3,623,791, \$327,457, \$310,763, \$402,834 and \$722,668, respectively, of creditable foreign taxes paid on income derived from sources within any foreign country or possession of the United States in the amounts of \$14,467,469, \$10,508,372, \$39,471,284, \$5,089,160, \$3,294,286, \$4,671,362 and \$5,429,688, respectively.

The tax status of dividends paid and the pass-through of foreign taxes paid will be reported to you on Form 1099-DIV after the close of the applicable calendar year.

The Board of Trustees of Ivy Funds

The Waddell & Reed Fund Complex (Fund Complex) is comprised of the Ivy Family of Funds and the Advisors Fund Complex. The Ivy Family of Funds is comprised of the funds in Ivy Funds (16 portfolios) and Ivy Funds, Inc. (12 portfolios). The Advisors Fund Complex is comprised of each of the funds in the Waddell & Reed Advisors Funds (22 portfolios), Waddell & Reed InvestEd Portfolios, Inc. (three portfolios) and W&R Target Funds, Inc. (21 portfolios).

Each of the individuals listed below serves as a trustee or director for each of the funds within the Ivy Family of Funds. Eleanor B. Schwartz, Joseph Harroz, Jr. and Henry J. Herrmann also serve as directors of each of the funds in the Advisors Fund Complex. Each Trustee serves an indefinite term, until he or she dies, resigns, is removed or becomes disqualified.

A Trustee is considered by Ivy Funds and its counsel to be an "interested person" of the Funds or of their investment manager by virtue of his or her employment by Waddell & Reed Financial, Inc. (WDR) or its wholly-owned subsidiaries. The other Trustees (more than a majority of the total number) are independent; that is, they are not employees or officers of, and have no financial interest in, WDR or any of its wholly-owned subsidiaries, including Ivy Funds Distributor, Inc. (IFDI), Ivy Investment Management Company (IICO) (formerly, Waddell & Reed Ivy Investment Company), and Waddell & Reed Services Company (WRSCO).

Additional Information about Trustees

The Statement of Additional Information (SAI) for Ivy Funds includes additional information about Fund Trustees. The SAI is available without charge, upon request, by calling 1.800.777.6472. It is also available on the Ivy Funds website, www.ivyfunds.com.

Shareholder Meeting Results:

On December 7, 2006, a special shareholder meeting (the "Meeting") for Ivy Cundill Global Value Fund (Fund), a series of Ivy Funds, was held at the offices of Waddell & Reed Financial, Inc., 6300 Lamar Avenue, Overland Park, Kansas, 66202. The meeting was held for the following purpose (and with the following results):

Proposal 1: To approve a sub-advisory agreement between Ivy Investment Management Company and Mackenzie Financial Corporation with respect to the Fund.

For	Against	Abstain	Broker Non-vote
25,585,363.62	694,254.99	1,442,856.67	4,989,572.00

On February 2, 2007, a special shareholder meeting (the "Meeting") for Ivy Small Cap Value Fund (Fund), a series of Ivy Funds, was held at the offices of Waddell & Reed Financial, Inc., 6300 Lamar Avenue, Overland Park, Kansas, 66202. The meeting was held for the following purpose (and with the following results):

Proposal 1: To approve a sub-advisory agreement between Ivy Investment Management Company and BlackRock Capital Management, Inc. with respect to the Fund.

For	Against	Abstain
3,963,844.17	123,811.93	251,510.73

Proposal 2: To authorize a "manager of managers" structure for the Fund whereby Ivy Investment Management Company will be able to make changes to the Fund's sub-advisors and materially amend investment sub-advisory agreements related to the Fund without obtaining shareholder approval.

For	Against	Abstain
3,843,371.70	238,904.60	256,890.52

Ivv Funds Annual Privacy Notice

The following privacy notice is issued by Ivy Funds (the Funds), Ivy Investment Management Company ("IICO") and Ivy Funds Distributor, Inc. (IFDI).

Information Collected

We collect nonpublic personal information about you from your account application and other forms that you may deliver to us, and from your transactions with us and our affiliates. This is information that regulators consider necessary for the proper servicing of your account. In order to effect your transactions and service your account properly, we may disclose all of the information that we collect, as described above, to firms that assist us in servicing your account, such as our transfer agent.

Confidentiality of Information Collected

All records containing your nonpublic personal information are kept at our various service providers. These entities include IICO, IFDI and our transfer agent and administrative services provider. We require these affiliates, and any non-affiliated service providers, to protect the confidentiality of your information and to use the information only for the purposes for which disclosure to them is made. The Funds, IICO, IFDI and other service providers restrict access to nonpublic personal information about you to those employees who need to know that information to provide products and services to you and maintain physical, electronic, and procedural safeguards that comply with federal standards to maintain the security of your nonpublic personal information.

Disclosure of Information in Limited Circumstances

We do not disclose nonpublic personal information about present or former customers to nonaffiliated third parties, except as permitted or required by law. In connection with servicing your account, your nonpublic personal information may be shared among the entities named in this notice, their affiliates, and non-affiliates, including a transfer agent or other service companies. We will adhere to the policies and practices above for both current and former customers.

Proxy Voting Information

Proxy Voting Guidelines

A description of the policies and procedures Ivy Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800.777.6472 and (ii) on the Securities and Exchange Commission's (SEC) website at www.sec.gov.

Proxy Voting Records

Information regarding how Ivy Funds voted proxies relating to portfolio securities during the most recent 12 month period ending June 30 is available on Form N-PX through the Ivy Funds' website at www.ivyfunds.com and on the SEC's website at www.sec.gov.

Quarterly Portfolio Schedule Information

A complete schedule of portfolio holdings for the first and third quarters of each fiscal year is filed with the Securities and Exchange Commission (SEC) on the Fund's Form N-Q. This form may be obtained in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.
- On the Ivy Funds' website at www.ivyfunds.com.

Householding Notice

If you currently receive one copy of the shareholder reports and prospectus for your household (even if more than one person in your household owns shares of the Fund) and you would prefer to receive separate shareholder reports and prospectuses for each account holder living at your address, you can do either of the following:

Fax your request to 800.532.2749.

Write to us at the address listed on the back cover.

Please list each account for which you would like to receive separate shareholder reports and prospectus mailings. We will resume sending separate documents within 30 days of receiving your request.

To All Traditional IRA Planholders:

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W–4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.
