PILLAR 1

PILLAR 2

PILLAR 3

Diversify and Expand Offerings to Local Advertisers

Amplified: Lee’s Omnichannel Marketing Solution

Amplified is a full-service digital marketing agency that offers omnichannel solutions for local advertisers (e.g., consulting, media buying, analytics) through its **Vision platform**

Competitive Advantages of Amplified:

- **Data driven ad tech** that efficiently feeds customized proposals to sales reps through Lee’s **Vision platform**
- **Specialized category expertise** – automotive and healthcare
- **Scalable custom video content** from **Brand Ave. Studios**
- **First party data** to drive **premium eCPMs** and create recurring revenue

Maximize Revenue on Lee’s Digital Platforms

Massive audiences on our **owned and operated websites (O&O)** provide a growing opportunity to drive **high margin** digital advertising revenue

Competitive Advantages of O&O:

- Sales organization to leverage Lee’s **Vision platform** in order to:
 - Deliver our hyper local, highly educated and higher-income digital audiences to advertisers
 - Increase local market penetration, thus increasing customer counts
 - Increase sell-thru rates and eCPMs to drive higher value digital advertising revenue
- Promote high impact **video** digital banner, sponsorships and **branded content**
 - Deliver more engagement for our advertisers
 - Limited local ad map creates scarcity; drives industry-leading rate yield

LEE EXPECTS TO BE SUSTAINABLE WITHOUT RELIANCE ON PRINT IN 5 YEARS

NON-GAAP RECONCILIATION

The Company uses non-GAAP financial performance measures to supplement the financial information presented on a U.S. GAAP basis. These non-GAAP financial measures, which may not be comparable to similarly titled measures reported by other companies, should not be considered in isolation from or as a substitute for the related U.S. GAAP measures and should be read together with financial information presented on a U.S. GAAP basis.

The Company defines its non-GAAP measures as follows:

Adjusted EBITDA is a non-GAAP financial performance measure that enhances financial statement users overall understanding of the operating performance of the Company. The measure isolates unusual, infrequent or non-cash transactions from the operating performance of the business. This allows users to easily compare operating performance among various fiscal periods and how management measures the performance of the business. This measure also provides users with a benchmark that can be used when forecasting future operating performance of the Company that excludes unusual, nonrecurring or one time transactions. Adjusted EBITDA is a component of the calculation used by stockholders and analysts to determine the value of our business when using the market approach, which applies a market multiple to financial metrics. It is also a measure used to calculate the leverage ratio of the Company, which is a key financial ratio monitored and used by the Company and its investors. Adjusted EBITDA is defined as net income (loss), plus non-operating expenses, income tax expense, depreciation and amortization, assets loss (gain) on sales, impairments and other, restructuring costs and other, stock compensation and our 50% share of EBITDA from TNI and MNI, minus equity in earnings of TNI and MNI.

Cash Costs represent a non-GAAP financial performance measure of operating expenses which are measured on an accrual basis and settled in cash. This measure is useful to investors in understanding the components of the Company's cash-settled operating costs. Periodically, the Company provides forward-looking guidance of Cash Costs, which can be used by financial statement users to assess the Company's ability to manage and control its operating cost structure. Cash Costs are defined as compensation, newsprint and ink and other operating expenses. Depreciation and amortization, assets loss (gain) on sales, impairments and other, other non-cash operating expenses and other expenses are excluded. Cash Costs also exclude restructuring costs and other, which are typically paid in cash.

Direct Costs is a non-GAAP financial performance measure that enhances financial statement users overall understanding of the operating performance of the Company. The measure isolates operating costs that directly support revenue. Depreciation and amortization, assets loss (gain) on sales, impairments and other, net, other non-cash operating expenses, Selling, General, and Administrative ("SG&A") compensation and SG&A other operating expenses are excluded.

Same-store revenues is a non-GAAP performance measure based on U.S. GAAP revenues for Lee for the current period, excluding exited operations.

TNI and MNI – TNI refers to TNI Partners publishing operations in Tucson, AZ. MNI refers to Madison Newspapers, Inc. publishing operations in Madison, WI.

Management's Use of Non-GAAP Measures

These Non-GAAP Measures are not measurements of financial performance under U.S. GAAP and should not be considered in isolation or as an alternative to income from operations, net income (loss), revenues, or any other measure of performance or liquidity derived in accordance with U.S. GAAP. We believe these non-GAAP financial measures, as we have defined them, are helpful in identifying trends in our day-to-day performance because the items excluded have little or no significance on our day-to-day operations. These measures provide an assessment of controllable expenses and afford management the ability to make decisions which are expected to facilitate meeting current financial goals as well as achieve optimal financial performance. We use these Non-GAAP measures of our day-to-day operating performance, which is evidenced by the publishing and delivery of news and other media and excludes certain expenses that may not be indicative of our day-to-day business operating results.

Limitations of Non-GAAP Measures

Each of our non-GAAP measures have limitations as analytical tools. They should not be viewed in isolation or as a substitute for U.S. GAAP measures of earnings. Material limitations in making the adjustments to our earnings to calculate Adjusted EBITDA using these non-GAAP financial measures as compared to U.S. GAAP net income (loss) include: the cash portion of interest / financing expense, income tax (benefit) provision, and charges related to asset impairments, which may significantly affect our financial results. Management believes these items are important in evaluating our performance, results of operations, and financial position. We use non-GAAP financial measures to supplement our U.S. GAAP results in order to provide a more complete understanding of the factors and trends affecting our business.
