McDONALD'S REPORTS GLOBAL COMPARABLE SALES FOR APRIL

OAK BROOK, IL - McDonald's Corporation today announced that global comparable sales decreased 0.6% in April. Performance by segment was as follows:

- **U.S. down 2.3%**
- **Europe up 1.0%**
- **Asia/Pacific, Middle East and Africa (APMEA) down 3.8%**

“Earlier this week, we announced the initial steps in McDonald’s business turnaround plan,” said Steve Easterbrook, President and Chief Executive Officer. “We are moving quickly to deliver a better experience to our customers and to realize our vision to become a modern, progressive burger company. While our current performance reflects the significant work ahead, I am confident that we’ve taken the first critical steps toward positioning the company for long-term profitable growth.”

U.S. comparable sales decreased 2.3% in April in the face of ongoing competitive activity and negative customer traffic. To improve sales, the U.S. is working to leverage its decentralized operating structure, simplified menu and consumer insights to deliver value initiatives and menu offerings that resonate with the local markets.

Europe’s comparable sales rose 1.0% in April as solid results in the U.K. and Germany were partly offset by negative performance in France and Russia. McDonald’s Europe continues to target opportunities to enhance its popular promotional menu options and build on its value, breakfast and family business amid ongoing macro-economic headwinds across much of the segment.

In APMEA, comparable sales declined 3.8% in April due to continued challenges in Japan partly offset by strong results in Australia and other markets. Strengthening McDonald’s quality and value perceptions remains a top priority for APMEA.

Strong comparable sales in McDonald's Other Countries & Corporate segment, which includes Latin America and Canada, contributed positively to the Company's global comparable sales performance for the month.

Systemwide sales for the month decreased 8.8%, or increased 1.5% in constant currencies.

Definitions

- **Comparable sales** represent sales at all restaurants, whether operated by the Company or by franchisees, in operation at least thirteen months including those temporarily closed. Some of the reasons restaurants may be temporarily closed include reimaging or remodeling, rebuilding, road construction and natural disasters. Comparable sales exclude the impact of currency translation. Comparable sales are driven by changes in guest counts and average check, which is affected by changes in pricing and product mix. Typically, pricing has a greater impact on average check than product mix. Management reviews the increase or decrease in comparable sales compared with the same period in the prior year to assess business trends.
- The number of weekdays and weekend days can impact our reported comparable sales. In April 2015, this calendar shift/trading day adjustment consisted of one less Tuesday and one more Thursday compared with April 2014. The resulting adjustment varied by area of the world, ranging from approximately 0.3% to 0.4%. In addition, the timing of holidays can impact comparable sales.
- Information in **constant currency** is calculated by translating current year results at prior year average exchange rates. Management reviews and analyzes business results excluding the effect of foreign currency translation and bases incentive compensation plans on these results because they believe this better represents the Company's underlying business trends.
- **Systemwide sales** include sales at all restaurants, whether operated by the Company or by franchisees. While franchised sales are not recorded as revenues by the Company, management believes the information is important in understanding the Company's financial performance because these sales are the basis on which the Company calculates and records franchised revenues and are indicative of the financial health of the franchisee base.
