FIRST MIDWEST FOURTH QUARTER
EPS UP 10.6% AND FULL YEAR EPS UP 5.9%

4TH QUARTER 2003 HIGHLIGHTS:

- **EPS Increased 10.6% to \$.52 from \$.47 Last Year**
- **ROAA of 1.54% vs. 1.49% Last Year**
- **Quarterly Cash Dividend Increased 16%**
- **Continued Sound Asset Quality**
- **Acquisition of CoVest Bancshares Completed**
- **Rural Streator, Illinois Branches Sold**

ITASCA, IL, JANUARY 21, 2004 – First Midwest Bancorp, Inc. (“First Midwest”) (**Nasdaq: FMBI**), the premier relationship-based franchise in the wealthy and growing suburbs of Chicago, today reported net income for the fourth quarter ended December 31, 2003 of \$24.2 million up from \$22.5 million in the comparable quarter of 2002. This represented an increase of 10.6% on a per diluted share basis to \$0.52, from \$0.47 in the fourth quarter 2002. First Midwest’s performance during the quarter resulted in an annualized return on average assets of 1.54% and an annualized return on average equity of 18.6%, up from 1.49% and 17.9%, respectively, in last year’s fourth quarter.

For the full year 2003, First Midwest’s net income increased 5.9% on a per diluted share basis to a record

\$92.8 million, or \$1.97 per diluted share, from \$90.2 million, or \$1.86 per diluted share, in 2002. First Midwest's annualized return on average assets and annualized return on average equity in 2003 was 1.50% and 18.3%, respectively, down marginally from 1.53% and 18.8%, respectively, in 2002.

"First Midwest experienced another year of record performance in 2003, despite challenging economic conditions," said John O'Meara, First Midwest's President and Chief Executive Officer. "First Midwest generated strong earnings while protecting future performance through continued sound credit quality and strategic balance sheet repositioning. During the year, we improved our market position in the important northwest Cook County corridor by acquiring CoVest Bancshares and the O'Hare Financial Center branch from Northern Trust."

2004 Outlook

"The coming year presents exciting opportunities and continued challenges as the banking environment looks to emerge from the economic downturn." O'Meara continued, "I am encouraged by the favorable trends experienced in loan outstandings and fee growth as well as our improved margins. We continue to focus on maintaining strict credit quality and expense management. With the acquisition of CoVest completed, First Midwest's banking franchise begins 2004 with approximately \$7 billion in total assets, roughly 90% of which are located in the highly dynamic suburban Chicago market place. First Midwest expects to grow diluted earnings per share to \$2.15 - \$2.20 in 2004."

Transactions Completed in Fourth Quarter

On December 31, 2003, First Midwest completed its acquisition of CoVest Bancshares ("CoVest"), which had total loans of \$531 million and total deposits of \$466 million. First Midwest paid cash for the acquisition, which was accounted for under the purchase method. First Midwest incurred \$4.4 million of direct, after-tax merger costs and recorded approximately \$63.6 million of intangible assets.

First Midwest also completed a \$125 million issuance of trust preferred securities in November 2003 to finance the acquisition of CoVest. These securities bear a coupon rate of 6.95% and mature in November 2033. In

conjunction with the issuance, First Midwest received investment grade ratings from Standard & Poor's, Moody's and Fitch rating services.

On November 13, 2003, First Midwest sold two branches in rural Streator, Illinois, representing \$69 million in deposits and \$11 million in loans. The consideration received from the sale resulted in a pre-tax gain of approximately \$4.6 million.

Balance Sheet Restructuring Activities

During the fourth quarter of 2003, First Midwest continued to pursue previously announced balance sheet restructuring strategies as a result of the continued low interest rate environment and its expectation for higher interest rates. During the quarter, First Midwest extinguished \$100 million of Federal Home Loan Bank advances with a weighted maturity of 18 months and a weighted cost of 3.78% at a pre-tax cost of approximately \$3 million. In a separate transaction, this funding was replaced with Federal Home Loan Bank advances having a weighted maturity of 24 months and a weighted cost of 1.96%.

Net Interest Margin

First Midwest's net interest income totaled \$53.0 million for the fourth quarter of 2003, in line with the prior year's fourth quarter of \$52.8 million. Net interest margin for the fourth quarter of 2003 was 4.01%, down from 4.10% a year ago, but up from 3.90% in the third quarter of 2003. As expected, First Midwest's margin improved from the prior quarter primarily due to improved yields on mortgage-backed securities and benefits realized from retiring and redeploying Federal Home Loan Bank advances at lower interest rates. First Midwest also incurred \$1.1 million in interest expense stemming from the \$125 million trust preferred issuance. The impact of this cost on net interest margin was increased as the proceeds from the issuance were held in liquid, lower yielding assets until the completion of the CoVest acquisition.

Loan Growth and Funding

Total loans at December 31, 2003 were 19.2% higher than at December 31, 2002, primarily due to loans

acquired as part of the CoVest acquisition. Excluding the \$531 million in loans First Midwest acquired from CoVest, total loans increased approximately 3.6% over 2002 as loans in all categories experienced growth, except 1-4 family real estate and indirect consumer lending. Total loans, excluding CoVest, increased 1.2% on a linked-quarter basis and represented 4.8% on an annualized basis. Excluding CoVest, commercial loan growth on a linked-quarter basis was 1.65% and 11.6% year-over-year for 2003.

Average deposits for the fourth quarter 2003 increased from the prior year's fourth quarter by 4.6%, primarily due to growth in core transactional accounts (demand, savings, NOW, and money market accounts). Compared to the fourth quarter of 2002, core transactional deposits increased 14.1%, largely due to targeted pricing and promotional efforts.

Noninterest Income and Expense

Noninterest income for the fourth quarter of 2003 totaled \$19.4 million, including the \$4.6 million gain realized from the sale of the Streator branches and \$3.0 million in losses created by the early retirement of Federal Home Loan Bank advances. Excluding these transactions, noninterest income was \$17.8 million, a slight increase from the \$17.6 million earned in the prior year's fourth quarter. Service charges on deposit accounts, commissions earned from the sale of third-party investment products and trust income all increased in fourth quarter 2003 when compared to the prior year's fourth quarter. This increase was partly offset by lower income from corporate owned life insurance, mortgage-related sales commissions and debit card revenues. Noninterest income was relatively stable on a linked-quarter basis after excluding debt retirement and securities gains and losses from both periods. For the full year of 2003, total noninterest income totaled \$74.2 million, an increase of 10.7% over 2002.

Total noninterest expense for the fourth quarter of 2003 increased 4.0% from the prior year's fourth quarter and increased 1.0% for full year 2003 from 2002. On a linked-quarter basis, noninterest expense was essentially unchanged.

First Midwest's combination of top line revenue performance and continued cost control resulted in solid efficiency ratios for both fourth quarter 2003 and full year 2003 of 45.7% and 48.3%, respectively.

Credit Quality

First Midwest's overall credit quality remains sound. Nonperforming loans at December 31, 2003 totaled \$23.1 million, representing 0.57% of total outstanding loans. This ratio is up from the September 30, 2003 level of 0.53% and a historically low level of 0.37% as of December 31, 2002. As anticipated in pre-acquisition due diligence, nonperforming loans include \$4.9 million of nonaccruing loans acquired from CoVest. Nonperforming loans also include \$7.1 million of loans restructured by First Midwest that are expected to return to performing status by the end of the first quarter of 2004 as the result of sustained borrower performance under the restructured terms.

Nonperforming assets totaled \$28.9 million at December 31, 2003. Loans past due 90 days decreased by 29.6% to \$3.4 million on a linked-quarter basis.

Net charge-offs for the fourth quarter and full year of 2003 were 0.35% and 0.28% of average loans, respectively, down from 0.49% and 0.45% for the fourth quarter and full year of 2002, respectively. Provisions for loan losses for both the fourth quarter and full year of 2003 fully covered net charge-offs, resulting in First Midwest maintaining its ratio of the reserve for loan losses to total loans at the close of the fourth quarter of 2003 at 1.39%. Loan loss reserves acquired as a part of the CoVest acquisition totaled \$7.2 million and represented 1.36% of the loans acquired. The reserve for loan losses at December 31, 2003 represented 245% of nonperforming loans as compared to the historically high level of 383% at year-end 2002.

Dividend Increase

On November 19, 2003, First Midwest increased its quarterly cash dividend by 15.8% from \$.19 to \$.22 per share. This represents the Company's 84th consecutive quarterly dividend payment since its formation in 1983. First Midwest has increased its annual dividend at a compound annual growth rate of 10% and 12% over the past five and ten years, respectively. Based on First Midwest's December 31, 2003 closing price of \$32.43 per share, the current dividend payment represents an annual yield of 2.71%.

Capital Management

First Midwest's Total Risk Based Capital and Tier 1 Risk Based Capital ratios at the year-end 2003 were 11.37% and 10.24%, respectively, exceeding the minimum "well capitalized" levels for regulatory purposes of 10.0% and 6.0%, respectively. First Midwest's Tier 1 Leverage Ratio of 8.43% also exceeded the "well capitalized" range of 3.0% - 5.0%. First Midwest's tangible capital ratio, which represents the ratio of stockholders' equity to total assets excluding intangible assets, declined from 7.97% as of December 31, 2002 to 6.22% as of December 31, 2003, due to the \$82.9 million of intangible assets created by the CoVest and O'Hare branch acquisitions.

First Midwest made no share repurchases during the fourth quarter of 2003 and repurchased 842 thousand shares at an average price of \$26.60 for the entire year 2003. As of December 31, 2003, approximately 1.6 million shares remained under First Midwest's existing repurchase authorization. First Midwest expects to continue to repurchase shares in 2004, the pace of which will continue to be influenced by the expected rate of return of alternate capital investment opportunities.

About the Company

First Midwest is the premier relationship-based banking franchise in the wealthy and growing suburban Chicago banking markets. As the largest independent bank holding company and one of the overall largest banking companies in the Chicago metropolitan area, First Midwest provides the full range of both business and retail banking, trust and investment management services through approximately 70 offices located in 49 communities, primarily in northeastern Illinois.
