Forward Looking Statements

This presentation may contain, and during this presentation our management may make statements that may constitute "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Forward-looking statements include, among other things, statements regarding our financial performance, business prospects, future growth and operating strategies, objectives and results. Actual results, performance or developments could differ materially from those expressed or implied by these forward-looking statements. Important factors that could cause actual results to differ from those in the forward-looking statements include, among others, those discussed in our Annual Report on Form 10-K and other reports filed with the Securities and Exchange Commission, copies of which will be made available upon request. With the exception of fiscal year end information previously included in our Annual report on Form 10-K, the information contained herein is unaudited. Except as required by law, we undertake no duty to update the contents of this presentation after the date of this presentation.

Non-GAAP Disclosure

The Company's accounting and reporting policies conform to U.S. generally accepted accounting principles ("GAAP") and general practice within the banking industry. As a supplement to GAAP, the Company has provided certain non-GAAP performance results. The Company believes that these non-GAAP financial measures are useful because they allow investors to assess, on a consistent basis, the Company's operating performance. Although these non-GAAP financial measures are intended to enhance investors' understanding of the Company's business and performance, they should not be considered an alternative to GAAP. Following at the end of the presentation is a reconciliation of GAAP to non-GAAP results.
