Letter to Shareholders

Michael I. Peters

The semi-annual period ended March 31, 2009 saw solid positive total returns for Madison Mosaic Virginia Tax-Free and Tax-Free National during one of the most disruptive economic and market environments of our times. Total returns for the six-month period were: 7.34% for Virginia

Tax-Free and 6.60% for Tax-Free National. Madison's high-quality mandate and relatively conservative positioning meant that your funds did considerably better than their peers. Virginia Tax-Free's Lipper Municipal Debt Virginia Index peer group returned 2.42%, while Tax-Free National's peer group of the Lipper General Municipal Debt Index was barely positive with a 0.63% return. This performance gap was to a large degree a quality story. Over the same six-month period, the Lipper High Yield Municipal Debt Fund Index dropped a dramatic -14.60%. This is an indication of the overall investment theme for the period, which was a wholesale retreat away from risk into the most secure investments available. We also benefitted from our intermediate duration stance, as intermediate tax-frees outperformed, as seen by the pertinent Lipper indices, both shortterm and short-intermediate term bond funds.

Economic Overview

The six-month period saw continued unrest in the financial sector and a realization that these problems would not be confined. By the end of the period it was clear that we were in the midst of what could prove to be the worst recession of our times. In response, the Treasury & Federal Reserve enacted unprecedented monetary and fiscal measures to combat the deepening recession. While much of the period was characterized by fear and pessimism, by the end of March the stock market had recovered much of its double-digit losses of January and February, and there was a sense that the worst might be behind us.

Expanded fiscal and monetary stimuli were the biggest stories of the period and still had legs as March came to a close. As the period ended, a new budget bill was under consideration which would invest significantly in infrastructure, education, alternative energy, and health care. The Treasury had recently announced new initiatives for reviving the credit markets and the Fed had just expanded its balance sheet through outright open market purchases of up to \$1.05 trillion worth of Treasury, Agency, and Agency Mortgage securities. The Fed indicated hope that by lowering returns on "less risky" assets, market participants would re-enter risk markets, freeing up the flow of credit. While these massive efforts have yet to bring the credit markets to full health, they seemed to have stabilized the situation and given many observers cause for guarded optimism.

Outlook

In spite of the massive fiscal and monetary stimulus being brought to bear, both here in the U.S. and globally, the economy appears to be a few quarters away from growth. We estimate that 2009 may end up being a negative year for GDP - both real (inflation adjusted) and nominal. But in the early part of 2010, the year-over-year comparisons will become easier, and recent stimuli should kick in. Economic growth should return, but we don't expect it to be robust.

Inflation, for now, appears minimal. Commodity input prices remain weak. The rate of capacity utilization has fallen over 12 percentage points since its most recent high in the summer of 2006 and the job market is bleak, giving labor little leverage in seeking higher compensation. However, once the economy is firmly on the upswing, inflation issues may re-emerge, as many of the Government's stimulus plans are pro-cyclical, and some downright inflationary. This could become a big issue at some point, most likely by mid-2010. In terms of the municipal bond market, we continue to see value in high-quality municipals, and believe that they

Letter to Shareholders • March 31, 2009 (concluded)

should provide dependable, tax-advantaged income for investors who currently have few competitively yielding alternatives.

VIRGINIA FUND

The Commonwealth of Virginia maintains an AAA general obligation bond rating based on a well-diversified economy that emphasizes services and government. The fund had a total return of 7.34% for the semi-annual period and the 30-day SEC yield was 2.54% as of March 31, 2009, which equates to a tax-equivalent yield of 4.14%. The duration of the portfolio was 6.94 years while the average credit quality was maintained at AA. Purchases during the period included Spotsylvania School District general obligation bonds and Northwestern Regional Jail Authority revenue bonds. Virginia ranked 11th in the country in terms of issuance on a year-to-date basis.

NATIONAL FUND

The National Fund had a total return of 6.60% for the semi-annual period and the 30-day SEC yield

was 2.56% as of March 31, 2009, which equates to a tax-equivalent yield of 3.94%. The duration of the portfolio was 6.71 years while 37% of the portfolio held S&P's top AAA rating. Purchases made during the period include Fort Smith, Arkansas Water and Sewer revenue bonds and Wisconsin State general obligation bonds. The United States and its territories have issued \$84 billion in muni bonds during the three months ending March 31, 2009, which represents a 1.9% decrease in volume over the same period last year.

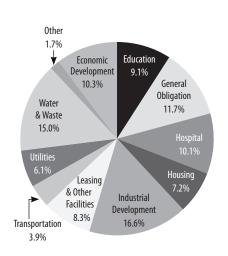

We appreciate your confidence in Madison Mosaic Funds and reaffirm our commitment to provide you with competitive returns to meet your investment objectives.

Sincerely,

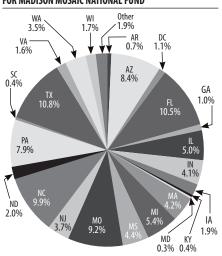

Michael I. Peters, CFA Vice-President

Milael Stotors

Notes to Financial Statements

1. Summary of Significant Accounting Policies. Madison Mosaic Tax-Free Trust (the "Trust") is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 as an open-end, diversified investment management company. The Trust maintains two separate funds, the Virginia Tax-Free Fund ("Virginia Fund") and the Tax-Free National Fund (the "National Fund") (each a "Fund" and together the "Funds") which invest principally in securities exempt from federal income taxes, commonly known as "municipal" securities. The Virginia Fund invests solely in securities exempt from both federal and state income taxes. The National Fund invests in securities exempt from federal taxes. Both Funds invest in intermediate and long-term securities. Because the Trust is 100% no-load, the shares of each Fund are offered and redeemed at the net asset value per share.

Securities Valuation: The Funds value securities having maturities of 60 days or less at amortized cost, which approximates fair market value. Securities having longer maturities, for which market quotations are readily available, are valued at the mean between their bid and ask prices. Securities for which market quotations are not readily available are valued at their fair value as determined in good faith under procedures approved by the Board of Trustees.

The Fund adopted Financial Accounting Standards Board Statement No. 157, Fair Value Measurements (FAS 157) effective October 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. FAS 157 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and

(2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes.

Various inputs as noted above are used in determining the value of each Fund's investments and other financial instruments. These inputs are summarized in the three broad levels listed below.

- · Level 1: Quoted prices in active markets for identical securities
- · Level 2: Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3: Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value each Fund's assets as of March 31, 2009:

	Investments in Securi		
Valuation Inputs	Virginia <u>Fund</u>	National <u>Fund</u>	
Level 1: Quoted prices			
Level 2: Other significant observable inputs	\$22,744,584	\$27,395,274	
Level 3: Significant unobservable			
inputs			
Total	\$22,744,584	\$27,395,274	

Investment Transactions: Investment transactions are recorded on a trade date basis. The cost of investments sold is determined on the identified cost basis for financial statement and Federal income tax purposes.

Investment Income: Interest income is recorded on an accrual basis. Bond premium is amortized and

Notes to Financial Statements (continued)

original issue discount and market discount are accreted over the expected life of each applicable security using the effective interest method.

Distribution of Income and Gains: Distributions are recorded on the ex-dividend date. Net investment income, determined as gross investment income less total expenses, is declared as a regular dividend and distributed to shareholders monthly. Capital gain distributions, if any, are declared and paid annually at calendar year-end. Additional distributions may be made if necessary. Distributions paid during the years ended September 30, 2008 and 2007 were identical for book purposes and tax purposes.

The tax character of distributions paid for the Virginia Fund was \$69,995 long-term for the year ended September 30, 2008 and \$118,708 long-term for the year ended September 30, 2007. The tax character of distributions paid for the National Fund was \$1,382 short-term and \$72,245 long-term for the year ended September 30, 2008 and \$131,426 long-term for the year ended September 30, 2007. There were no short-term capital gain distributions for the Virginia Fund for the years ended September 30, 2008 or 2007 and the National Fund for the year ended September 30, 2007.

As of March 31, 2009 the components of distributable earnings on a tax basis were as follows:

\$ 71.677

688,622

Virginia Fund:

Accumulated net realized gains

Net unrealized appreciation on investments

	<u>\$760,299</u>
National Fund:	
A	£ 20 FF2

Accumulated net realized gains	\$ 20,552
Net unrealized appreciation on investments	850,361
	\$870.913

Net realized gains or losses may differ for financial and tax reporting purposes as a result of loss deferrals related to wash sales and post-October transactions.

Income Tax: No provision is made for Federal income taxes since it is the intention of the Funds to comply with the provisions of the Internal Revenue Code available to investment companies and to

make the requisite distribution to shareholders of taxable income which will be sufficient to relieve it from all or substantially all Federal income taxes.

The Funds adopted the provisions of Financial Accounting Standards Board Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes," on June 29, 2007. The implementation of FIN 48 resulted in no material liability for unrecognized tax benefits and no material change to the beginning net asset value of the fund.

As of and during the period ended March 31, 2009, the Funds did not have a liability for any unrecognized tax benefits. The fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the statement of operations. During the period, the Funds did not incur any interest or penalties.

Use of Estimates: The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. Such estimates affect the reported amounts of assets and liabilities and reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

- 2. Investment Advisory Fees and Other Transactions with Affiliates. The investment advisor to the Trust, Madison Mosaic, LLC, a wholly owned subsidiary of Madison Investment Advisors, Inc. (the "Advisor"), earns an advisory fee equal to 0.625% per annum of the average net assets of the Funds. The fees are accrued daily and are paid monthly.
- **3. Other Expenses.** Under a separate Services Agreement, the Advisor will provide or arrange for each Fund to have all necessary operational and support services for a fee based on a percentage of average net assets, other than the expenses of the Trust's Independent Trustees and auditor ("Independent Service Providers") which are paid directly based on cost and any costs associated with the Lines of Credit described in Note 7. For the six-months ended March 31, 2009, the services fee was based on the following percentage of average net assets: 0.36% for the Virginia Fund and

Notes to Financial Statements (continued)

0.40% for the National Fund on assets less than \$25 million and 0.36% for all assets greater than \$25 million. The amount accrued by each Fund directly for Independent Service Providers fees for the six-months ended was \$4,987. The Funds use US Bancorp Fund Services LLC as their transfer agent and US Bank as their custodian. The transfer agent and custodian fees are paid by the Advisor and allocated to the Funds pursuant to a services agreement and are included in other expenses.

4. Aggregate Cost and Unrealized Appreciation. The aggregate cost for federal income tax purposes and the net unrealized appreciation (depreciation) are stated as follows as of March 31, 2009:

	Virginia	National
	Fund	Fund
Aggregate Cost	\$ 22,055,962	\$26,544,913
Gross unrealized appreciation	869,640	1,223,146
Gross unrealized depreciation	(181,018)	(372,785)
Net unrealized appreciation	688,622	850,361

5. Investment Transactions. Purchases and sales of securities (excluding short-term securities) for the six-months ended March 31, 2009, were as follows:

	Purchases	Sales
Virginia Fund	\$ 2,012,092	\$ 2,505,401
National Fund	\$ 1,753,422	\$ 1,505,987

6. Capital Share Transactions. An unlimited number of capital shares, without par value, are authorized. Transactions in capital shares were as follows:

Virginia Fund	(unaudited) Six-Months Ended March 31, 2009	Year Ended September 30 2008
In Dollars

Shares redeemed	_(145,296)	(277,216)
Net increase (decrease)	22,311	(86,448)

7. Lines of Credit. The Virginia Fund has a \$7.5 million and the National Fund has an \$8 million revolving credit facility with a bank for temporary emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. The interest rate on the outstanding principal amount is equal to the prime rate less 0.5% (effective rate of 2.75% at March 31, 2009). The lines of credit contain loan covenants with respect to certain financial ratios and operating matters. Both Funds were in compliance with these covenants as of September

Notes to Financial Statements (concluded)

30, 2008 and 2007. During the six-months ended March 31, 2009, neither Fund borrowed on their lines of credit.

8. Accounting Pronouncement. On March 19, 2008, Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (FAS 161). FAS 161 requires qualitative disclosures about objectives an strategies for using derivatives, quantitative disclosures

about fair value amounts of and gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years and interim periods beginning after November 15, 2008. At this time, management is evaluating the implications of FAS 161 and its impact on the financial statements has not yet been determined.

Fund Expenses (unaudited)

Example: This Example is intended to help you understand your costs (in dollars) of investing in a Fund and to compare these costs with the costs of investing in other mutual funds. See footnotes 2 and 3 above for an explanation of the types of costs charged by the funds. This Example is based on an investment of \$1,000 invested on October 1,2008 and held for the six-months ended March 31, 2009.

Actual Expenses

The table below titled "Based on Actual Total Return" provides information about actual account values and actual expenses. You may use the information provided in this table, together with the amount you invested, to estimate the expenses that you paid over the period. To estimate the expenses you paid on your account, divide your ending account value by \$1,000 (for example, an \$8,500 ending account valued divided by \$1,000 = 8.5), then multiply the result by the number under the heading entitled "Expenses Paid During the Period."

Based on Actual Total Return ¹					
	Actual Total Return²	Beginning Account Value	Ending Account Value	Annualized Expense Ratio ³	Expenses Paid During the Period ³
Virginia Fund	7.34%	\$1,000.00	\$1,073.40	1.03%	\$5.30
National Fund	6.60%	\$1,000.00	\$1,065.96	1.06%	\$5.44

¹For the six months ended March 31, 2009.

Hypothetical Example for Comparison Purposes

The table below titled "Based on Hypothetical Total Return" provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio and an assumed rate of return of 5.00% per year before expenses, which

is not any fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use the information provided in this table to compare the ongoing costs of investing in a Mosaic Tax-Free

²Assumes reinvestment of all dividends and capital gains distributions, if any, at net asset value.

³Expenses are equal to the respective Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half-year, then divided by 365.

Fund Expenses (concluded)

Trust Fund and other funds. To do so, compare the 5.00% hypothetical example relating to the Mosaic Fund with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Based on	Hypothetical	Total Return ¹
----------	--------------	---------------------------

	Hypothetical Annualized Total Return	Beginning Account Value	Ending Account Value	Annualized Expense Ratio ²	Expenses Paid During the Period ²
Virginia Fund	5.00%	\$1,000.00	\$1,025.19	1.03%	\$5.18
National Fund	5.00%	\$1,000.00	\$1,025.19	1.06%	\$5.33

¹For the six months ended March 31, 2009.

Forward-Looking Statement Disclosure. One of our most important responsibilities as mutual fund managers is to communicate with shareholders in an open and direct manner. Some of our comments in our letters to shareholders are based on current management expectations and are considered "forward-looking statements." Actual future results, however, may prove to be different from our expectations. You can identify forward-looking statements by words such as "estimate," "may," "will," "expect," "believe," "plan" and other similar terms. We cannot promise future returns. Our opinions are a reflection of our best judgment at the time this report is compiled, and we disclaim any obligation to update or alter forward-looking statements as a result of new information, future events, or otherwise.

Proxy Voting Information. The Trust only invests in non-voting securities. Nevertheless, the Trust adopted policies that provide guidance and set forth parameters for the voting of proxies relating to securities held in the Trust's portfolios. These policies are available to you upon request and free of charge by writing to Madison Mosaic Funds, 550 Science Drive, Madison, WI 53711 or by calling toll-free at 1-800-368-3195. The Trust's proxy voting policies may also be obtained by visiting the Securities and Exchange Commission web site at www.sec.gov. The Trust will respond to shareholder requests for copies of our policies within two business days of request by first-class mail or other means designed to ensure prompt delivery.

N-Q Disclosure. The Trust files its complete schedule of portfolio holdings with the U.S. Securities and Exchange Commission (the "Commission") for the first and third quarters of each fiscal year on Form N-Q. The Trust's Forms N-Q are available on the Commission's website. The Trust's Forms N-Q may be reviewed and copied at the Commission's Public Reference Room in Washington, DC. Information about the operation of the Public Reference Room may be obtained by calling the Commission at 1-202-942-8090. Form N-O and other information about the Trust are available on the EDGAR Database on the Commission's Internet site at http:// www.sec.gov. Copies of this information may also be obtained, upon payment of a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the Commission's Public Reference Section, Washington, DC 20549-0102. Finally, you may call us at 800-368-3195 if you would like a copy of Form N-Q and we will mail one to you at no charge.

²Expenses are equal to the respective Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half-year, then divided by 365.
