NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the quarter and nine months ended March 31, 2001 are not necessarily indicative of the results that may be expected for the year ending June 30, 2001. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2000.

Note 2 New Accounting Standards

Effective July 1, 2000, the Company adopted Statement of Financial Accounting Standards Number 133 (SFAS 133), "Accounting for Derivative Instruments and Hedging Activities." SFAS 133 establishes standards for recognition and measurement of derivatives and hedging activities. As a result of this adoption, the Company recorded in the first quarter of fiscal 2001 the cumulative effect of change in accounting principle to other comprehensive income (loss) of \$(32 million), net of a \$19 million tax benefit, for derivatives which hedge the variable cash flows of certain forecasted transactions. The fair value of these derivative instruments was previously classified in inventory.

Effective July 1, 2000, the Company adopted Emerging Issues Task Force Issue 99-19, "Reporting Revenue Gross as a Principal Versus Net as an Agent". The adoption of this issue results in the Company reporting the total sales value of grain merchandised, in lieu of net margins from grain merchandised, in the "Net sales and operating income" category. The "Gross profit" category is unchanged as costs related to the grain merchandised are now reported in the "Cost of products sold" category. Prior year amounts have been reclassified to conform to this change.

Note 3. Inventory and Related Contracts

To reduce price risk caused by market fluctuations, the Company generally follows a policy of using exchange-traded futures contracts to minimize its net position of merchandisable agricultural commodity inventories and forward cash purchase and sales contracts. Inventories of merchandisable agricultural commodities, which include amounts acquired under deferred pricing contracts, are stated at market value. Exchange-traded futures contracts, forward cash purchase contracts and forward cash sales contracts are valued at market price. Changes in the market value of inventories of merchandisable agricultural commodities, forward cash purchase and sales contracts and exchange-traded futures contracts are recognized in earnings immediately, resulting in cost of goods sold approximating FIFO cost. Unrealized gains on forward cash purchase contracts, forward cash sales contracts and exchange-traded futures contracts are classified on the Company's balance sheet as receivables. Unrealized losses on forward cash purchase contracts, forward cash sales contracts and exchange-traded futures contracts are classified on the Company's balance sheet as accounts payable.

In addition, the Company from time to time will hedge portions of its production requirements. The instruments used are readily marketable exchange-traded futures contracts, which are designated as cash flow hedges. The changes in the market value of such futures contracts has historically been, and is expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed hedging transactions are deferred in other comprehensive income, net of applicable taxes, and recognized in the statement of earnings when the finished goods produced from the hedged item are sold.

The Company also values certain inventories using the last-in, first-out (LIFO) and first-in, first-out (FIFO) method.

Note 4. Per Share Data

All references to share and per share information have been adjusted for the 5 percent stock dividend paid September 25, 2000.

Note 5. Comprehensive Income

Comprehensive income (loss) was \$(138) million and \$(22) million for the quarters ended March 31, 2001 and 2000, respectively. Comprehensive income was \$223 million and \$39 million for the nine months ended March 31, 2001 and 2000, respectively.

Note 7. Antitrust Investigation and Related Litigation

The Company, along with other domestic and foreign companies, was named as a defendant in a number of putative class action antitrust suits and other proceedings involving the sale of lysine, citric acid, sodium gluconate, monosodium glutamate and high-fructose corn syrup. These actions and proceedings generally involve claims for unspecified compensatory damages, fines, costs, expenses and unspecified relief. The Company intends to vigorously defend these actions and proceedings unless they can be settled on terms deemed acceptable by the parties. These matters have resulted and could result in the Company being subject to monetary damages, other sanctions and expenses.

The Company has made provisions to cover the fines, litigation settlements and costs related to certain of the aforementioned suits and proceedings. However, the ultimate outcome and materiality of the other putative class actions and proceedings described above, including those related to high fructose corn syrup, cannot presently be determined. Accordingly, no provision for any liability that may result therefrom has been made in the consolidated financial statements.

ARCHER DANIELS MIDLAND COMPANY AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION OF OPERATIONS AND FINANCIAL CONDITION

OPERATIONS

The Company is in one business segment - procuring, transporting, storing, processing and merchandising agricultural commodities and products. A summary of net sales and other operating income by classes of products and services is as follows:

	THREE MONTHS ENDED		NINE MONTHS ENDED	
	MARCH 31,		MARCH 31,	
	2001	2000	2001	2000
	(in millions)		(in millions)	
Oilseed products	\$1,863	\$1,779	\$5,319	\$5,479
Grain Merchandised	1,745	1,423	5,075	4,137
Corn products	636	473	1,753	1,453
Wheat and other milled products	315	314	984	1,034
Other products and services	<u>571</u>	<u>485</u>	<u>1,575</u>	<u>1,597</u>
	<u>\$5,130</u>	<u>\$4,474</u>	<u>\$14,706</u>	<u>\$13,700</u>

Net sales and other operating income increased 15 percent to \$5.1 billion for the quarter and increased 7 percent to \$14.7 billion for the nine months due principally to increased average selling prices and increased volumes of grain merchandised. Sales of oilseed products increased 5 percent to \$1.9 billion for the quarter due primarily to increased average selling prices and, to a lesser extent, to increased sales volumes. These increases were principally a result of strong world-wide protein meal demand. For the nine months, sales of oilseed products decreased 3 percent to \$5.3 billion due primarily to decreased sales volumes. The decrease in sales volume is a result of permanently closing several oilseed crushing facilities as well as indefinitely closing several other facilities. Record vegetable oil stocks continue to put downward pressure on vegetable oil selling prices. Partially offsetting these decreases were strong world-wide protein meal demand due to meat and bone meal restrictions stemming from BSE concerns. Sales of merchandised grain increased 23 percent for the quarter to \$1.7 billion and increased 23 percent for the nine months to \$5.1 billion due principally to increased sales volumes attributable to South American operations and to newly-established Latin American merchandising offices. Sales of corn products increased 34 percent to \$636 million for the quarter and increased 21 percent to \$1.8 billion for the nine months due primarily to increased sales volumes and higher average selling prices of the Company's fuel alcohol arising from increased demand from existing sales markets, expansion into new markets and to higher gasoline prices. Average selling prices of the Company's amino acid products were also higher for the quarter and nine months due to the increase in competing protein meal prices. Sales of the Company's sweetener products were higher for the quarter due to higher average selling prices resulting from year over year sales price improvements from calendar year sales contracts. Sales of wheat and other milled products were virtually unchanged for the quarter at \$315 million and decreased 5 percent to \$984 million for the nine months. The decrease for the nine months was due to both decreased sales volumes and lower average selling prices relating to flat growth in the demand for the products, customer consolidations and industry production overcapacity. The increase in sales of other products and

services for the quarter was due primarily to increased sales volumes and higher average selling prices of the Company's cocoa products reflecting increased demand and the higher cost of raw materials.

Cost of products sold increased \$622 million to \$4.8 billion for the quarter and increased \$949 million to \$13.6 billion for the nine months due primarily to increased volumes of grain merchandised and to higher manufacturing costs due principally to increases in energy and fuel related costs.

Gross profit increased \$35 million to \$370 million for the quarter and increased \$56 million to \$1.1 billion for the nine months due primarily to increased average selling prices and increased grain merchandising margins. These increases in gross profit were partially offset by higher manufacturing costs due principally to increases in energy and fuel related costs.

Selling, general and administrative expenses increased \$2 million for the quarter to \$187 million and decreased \$12 million for the nine months to \$544 million. These changes reflect increased advertising and promotional expenses, decreased bad debt expense and decreased salary-related costs associated with prior year's facility closures and consolidations.

Other income (expense) decreased \$50 million to \$(45) million for the quarter due principally to decreased equity in earnings of unconsolidated affiliates resulting primarily from lower valuations of the Company's private equity fund investments. This decrease was partially offset by \$7 million of fee income received upon the breakup of the IBP, Inc. acquisition transaction. Other income (expense) decreased \$8 million for the nine months to \$(88) million due principally to realized losses on marketable securities transactions and to increased interest expense due to higher average borrowing rates and reduced capitalized interest. These decreases were partially offset by increased equity in earnings of unconsolidated affiliates and by increased investment income. The increase in earnings of unconsolidated affiliates resulted primarily from a gain of \$95 million representing the Company's equity share of the gain reported by the Company's unconsolidated affiliate, Compagnie Industrielle et Financiere des Produits Amylaces SA ("CIP"), upon the sale of its interests in wet corn milling and wheat starch production businesses. This increase was partially offset by decreased equity in earnings of unconsolidated affiliates resulting primarily from lower valuations of the Company's private equity fund investments. The increase in investment income was due primarily to an interest refund related to IRS settlements.

Income taxes decreased for the quarter primarily due to lower pretax earnings and, to a lesser extent, to a lower effective income tax rate. For the nine months, income taxes decreased due to lower pretax earnings, excluding the gain from the aforementioned CIP transaction, and to a lower effective income tax rate. No taxes have been provided on the gain related to the CIP transaction as CIP is a corporate joint venture and the intent is to permanently reinvest the proceeds from the sale. The Company's effective income tax rate for the quarter and nine months, excluding the effect of the CIP transaction, was 32.5% compared to an effective rate of 33.5% for the comparable periods of a year ago.

## LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2001, the Company continued to show substantial liquidity with working capital of \$2.5 billion. Capital resources remained strong as reflected in the Company's net worth of \$6.2 billion. During the quarter, the Company issued \$400 million of 7% debentures due in 2031. The Company's ratio of long-term debt to total capital at March 31, 2001 is approximately 35%.

As described in Note 7 to the consolidated financial statements, the Company has made provisions to cover fines, litigation settlements and costs related to certain putative class action antitrust suits and other proceedings. The ultimate outcome and materiality of the other putative class actions and proceedings described in Note 7, including those related to high fructose corn syrup, cannot presently be determined. Accordingly, no provision for any liability that may result therefrom has been made in the consolidated financial statements.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes during the quarter ended March 31, 2001.

## PART II – OTHER INFORMATION

### Item 1. LEGAL PROCEEDINGS

#### ENVIRONMENTAL MATTERS

In 1993, the State of Illinois Environmental Protection Agency (“Illinois EPA”) brought administrative enforcement proceedings arising out of the Company’s alleged failure to obtain proper permits for certain pollution control equipment at one of the Company’s processing facilities in Illinois. In 1998, the Illinois EPA filed an administrative enforcement proceeding arising out of certain alleged permit exceedances relating to the same facility. Also, in 1998 the Company voluntarily reported to the Illinois EPA certain other permit exceedances related to other processes at that same facility, and in 1999 Illinois EPA issued a Notice of Violation relating to those exceedances. In 2000 the Company voluntarily disclosed certain other permit exceedances at the same facility. In 1998, the State of Illinois filed a civil administrative action alleging violations of the Illinois Environmental Protection Act, and regulations promulgated thereunder, arising from a one time release of denatured ethanol at one of its Illinois distribution facilities. The Company is in discussions with the Illinois EPA to settle all of the pending matters with the State. In January 2000, U.S. EPA issued a Notice of Violation to the Company for another Illinois facility regarding alleged emissions violations and the failure to obtain proper permits for various equipment at that facility. That matter has been referred to the Department of Justice (“DOJ”), and the Company has met with the United States Environmental Protection Agency and Department of Justice regarding settlement of that matter. In management’s opinion, the settlements and the remaining proceedings, all seeking compliance with applicable environmental permits and regulations, will not, either individually or in the aggregate, have a material adverse affect on the Company’s financial condition or results of operations.

On July 31, 2000, the federal environmental authorities in Brazil (“IBAMA”) issued an Administrative Notice upon the Company requiring payment of approximately \$5.6 million for the discharge of an industrial wastewater from its facility located in Rondonopolis. The Company has appealed this penalty. The federal authorities recently indicated that they will reduce the fine to between \$250,000 and \$500,000. The Company is unwilling to pay a penalty within that range and will pursue the appeal. Also, in December 2000 the federal Brazilian authorities notified the Company that it had not fulfilled certain agreements its predecessor had entered into regarding tree farming required to allow the harvesting of wood for use as fuel. A penalty of approximately \$750,000 was proposed based on the wood growth shortfall. The Company submitted evidence that the growth shortfall was approximately one-third of that estimated by the government and IBAMA has generally accepted that figure. The Company is currently considering its settlement options and researching its predecessor’s liability for this matter.

The Company is involved in approximately 25 administrative and judicial proceedings in which it has been identified as a potentially responsible party (“PRP”) under the federal Superfund law and its state analogs for the study and clean-up of sites contaminated by material discharged into the environment. In all of these matters, there are numerous PRPs. Due to various factors such as the required level of remediation and participation in the clean-up effort by others, the Company’s future clean-up costs at these sites cannot

be reasonably estimated. However, in management's opinion, these proceedings will not, either individually or in the aggregate, have a material adverse affect on the Company's financial condition or results of operations.

#### LITIGATION REGARDING ALLEGED ANTICOMPETITIVE PRACTICES

The Company is currently a defendant in various lawsuits related to alleged anticompetitive practices by the Company as described in more detail below. The Company intends to vigorously defend the actions unless they can be settled on terms deemed acceptable to the parties.

#### GOVERNMENTAL INVESTIGATIONS

Federal grand juries in the Northern Districts of Illinois, California and Georgia, under the direction of the DOJ, have been investigating possible violations by the Company and others with respect to the sale of lysine, citric acid and high fructose corn syrup, respectively. In connection with an agreement with the DOJ in fiscal 1997, the Company paid the United States fines of \$100 million. This agreement constitutes a global resolution of all matters between the DOJ and the Company and brought to a close all DOJ investigations of the Company. The federal grand juries in the Northern Districts of Illinois (lysine) and Georgia (high fructose corn syrup) have been closed.

The Company has received notice that certain foreign governmental entities were commencing investigations to determine whether anticompetitive practices occurred in their jurisdictions. Except for the investigations being conducted by the Commission of the European Communities, the Mexican Federal Competition Commission and the Brazilian Department of Protection and Economic Defense as described below, all such matters have been resolved as previously reported. In June 1997, the Company and several of its European subsidiaries were notified that the Commission of the European Communities had initiated an investigation as to possible anticompetitive practices in the amino acid markets, in particular the lysine market, in the European Union. On October 29, 1998, the Commission of the European Communities initiated formal proceedings against the Company and others and adopted a Statement of Objections. The reply of the Company was filed on February 1, 1999 and the hearing was held on March 1, 1999. On August 8, 1999, the Commission of the European Communities adopted a supplementary Statement of Objections expanding the period of involvement as to certain other companies. On June 7, 2000, the Commission of the European Communities adopted a decision imposing a fine against the Company in the amount of EUR 47.3 million. The Company has appealed this decision. In September 1997, the Company received a request for information from the Commission of the European Communities with respect to an investigation being conducted by that Commission into the possible existence of certain agreements and/or concerted practices in the citric acid market in the European Union. On March 28, 2000, the Commission of European Communities initiated formal proceedings against the Company and others and adopted a Statement of Objections. The reply of the Company was filed on June 9, 2000. In November 1998, a European subsidiary of the Company received a request for information from the Commission of the European Communities with respect to an investigation being conducted by that Commission into the possible existence of certain agreements and/or concerted practices in the sodium gluconate market in the European Union. On May 17, 2000, the Commission of European Communities initiated formal proceedings against the

Company and others and adopted a Statement of Objections. The reply of Company was filed on September 1, 2000. On February 11, 1999 a Mexican subsidiary of the Company was notified that the Mexican Federal Competition Commission had initiated an investigation as to possible anticompetitive practices in the citric acid market in Mexico. On November 22, 2000, the Company received an Official Letter of Responsibility from the Mexican Federal Competition Commission relative to this investigation. The reply of the Company was filed on January 30, 2001. On May 8, 2000, a Brazilian subsidiary of the Company was notified of the commencement of an administrative proceeding by the Department of Protection and Economic Defense relative to possible anticompetitive practices in the lysine market in Brazil. The Company, along with other companies, has been named as a defendant in thirty-one antitrust suits involving the sale of high fructose corn syrup in the United States. Thirty of these actions have been brought as putative class actions.

FEDERAL ACTIONS. Twenty-two of these putative class actions allege violations of federal antitrust laws, including allegations that the defendants agreed to fix, stabilize and maintain at artificially high levels the prices of high fructose corn syrup, and seek injunctions against continued alleged illegal conduct, treble damages of an unspecified amount, attorneys fees and costs, and other unspecified relief. The putative classes in these cases comprise certain direct purchasers of high fructose corn syrup during certain periods in the 1990s. These twenty-two actions have been transferred to the United States District Court for the Central District of Illinois and consolidated under the caption *In Re High Fructose Corn Syrup Antitrust Litigation*, MDL No. 1087 and Master File No. 95-1477. On January 14, 1997, the Company, along with other companies, was named a defendant in a non-class action antitrust suit involving the sale of high fructose corn syrup and corn syrup. This action which is encaptioned *Gray & Co. v. Archer Daniels Midland Co., et al*, No. 97-69-AS, and was filed in federal court in Oregon, alleges violations of federal antitrust laws and Oregon and Michigan state antitrust laws, including allegations that defendants conspired to fix, raise, maintain and stabilize the price of corn syrup and high fructose corn syrup, and seeks treble damages, attorneys' fees and costs of an unspecified amount.
