This report must be preceded or accompanied by a current Quant Funds prospectus for individuals who are not current shareholders of the Funds. You should read the prospectus carefully before investing because it contains more complete information on the Quant Funds' investment objectives, risks, charges and expenses. Please consider this information carefully. For a prospectus and other information, visit www.quantfunds.com or call (800) 326-2151.

NOT FDIC INSURED • MAY LOSE VALUE • NO BANK GUARANTEE

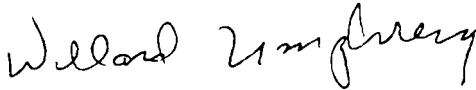

Neither the Quant Funds nor U.S. Boston Capital Corporation is a bank.

Dear Fellow Shareholder,

We are pleased to provide you with the Quantitative Group of Funds' Semi-Annual Report for the six months ended September 30, 2009 to update you on recent market conditions and the performance of the Quant Funds.

For current performance information, please visit our website at www.quantfunds.com. We thank you for your continued confidence in the Quant Funds. Please feel free to e-mail us at feedback@quantfunds.com or call us at 800-326-2151 with any questions or for assistance on your account.

Sincerely,

Willard Umphrey
President and Chairman

Any statements in this report regarding market or economic trends or the factors influencing the historical or future performance of the Quant Funds are the views of Fund management as of the date of this report. These views are subject to change at any time based upon market and other conditions, and Fund management disclaims any responsibility to update such views. These views may not be relied upon as investment advice or as an indication of trading intent on behalf of any Quant Fund. Any references to specific securities are not recommendations of such securities and may not be representative of any Quant Fund's current or future investments.

Past performance is no guarantee of future results, and there is no guarantee that market forecasts will be realized.

QUANT FUNDS

FUND EXPENSES

We believe it's important for Fund shareholders to have a clear understanding of fund expenses and the impact expenses have on investment returns. The following is important information about each Fund's Expense Example, which appears below.

Expense Example

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees, distribution (12b-1) fees (on Ordinary Shares) and other Fund expenses. The example is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. These examples are based on \$1,000 invested at the beginning of the period and held for the entire period from April 1, 2009 to September 30, 2009.

Actual Expenses and Returns

The example provides information about actual account returns and actual expenses. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000, then multiply the result by the number under the heading "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The example shows you hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return.

The hypothetical account values and hypothetical expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing expenses of investing in the Fund with the ongoing expenses of other funds. To do so, compare the Fund's 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs. They do not reflect any transactional costs. Thus, the "hypothetical" lines in the table are useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. See the Funds' prospectus for a complete description of these transactional costs.

Expense Example for the 6 months ended September 30, 2009

Quant Fund	Share Class	Total Return Description	Beginning	Ending	Annualized	Expenses Paid*
			Account Value 04/01/09	Account Value 09/30/09	Expense Ratio	04/01/09 09/30/09

		Hypothetical	\$1,000.00	\$1,016.44	1.72%	\$8.69
	Institutional	Actual	\$1,000.00	\$1,384.00	1.59%	\$9.50
		Hypothetical	\$1,000.00	\$1,017.10	1.59%	\$8.04
Long/Short	Ordinary	Actual	\$1,000.00	\$1,257.30	2.22%	\$12.56
		Hypothetical	\$1,000.00	\$1,013.94	2.22%	\$11.21
	Institutional	Actual	\$1,000.00	\$1,254.10	2.76%	\$15.60
		Hypothetical	\$1,000.00	\$1,011.23	2.76%	\$13.92
Emerging Markets	Ordinary	Actual	\$1,000.00	\$1,572.10	1.78%	\$11.48
		Hypothetical	\$1,000.00	\$1,016.14	1.78%	\$9.00
	Institutional	Actual	\$1,000.00	\$1,573.40	1.58%	\$10.19
		Hypothetical	\$1,000.00	\$1,017.15	1.58%	\$7.99
Foreign Value	Ordinary	Actual	\$1,000.00	\$1,734.60	1.67%	\$11.45
		Hypothetical	\$1,000.00	\$1,016.70	1.67%	\$8.44
	Institutional	Actual	\$1,000.00	\$1,733.50	1.43%	\$9.80
		Hypothetical	\$1,000.00	\$1,017.90	1.43%	\$7.23
Foreign Value Small Cap	Ordinary	Actual	\$1,000.00	\$1,927.40	1.71%	\$10.49
		Hypothetical	\$1,000.00	\$1,013.79	1.71%	\$7.22
	Institutional	Actual	\$1,000.00	\$1,929.50	1.57%	\$9.64
		Hypothetical	\$1,000.00	\$1,014.38	1.57%	\$6.63

* Expenses paid are equal to the Fund's annualized expense ratios, multiplied by the average account value over the period, multiplied by 183/365 (to reflect the one-half year period).

QUANT SMALL CAP FUND

INVESTMENT PROFILE

All Data as of September 30, 2009

Investment Commentary

For the semi-annual period ended September 30, 2009, the Quant Small Cap Fund's Ordinary Shares (the "Fund") underperformed its benchmark, the Russell 2000 Index (the "Index"). The Fund achieved a return of 38.26% at net asset value compared to 43.96% for the Index.

Fund Information

Ticker Symbol	USBNX	QBNAX

Market Conditions and Investment Strategies

The now historic stock market rally, which began in the depths of investor despair in mid-March, has propelled the equity market indices to one of their best six month periods ever. Our analysis of the market and relative performance over this period however, shows that much of the rally has been led by the smallest, lowest quality stocks, characterized by low price, high beta (higher risk) and no earnings. As we have discussed in the past, our small cap portfolios have a higher quality profile and a higher average market capitalization. Generally we avoid lower priced, higher beta issues and those with no earnings. As a result, when markets rallies are indiscriminate with little regard for quality or fundamentals, our performance tends to lag the Index. While performance in absolute terms has been positive, many active small cap managers have found it tough to beat the benchmark. According to Bank of America/ Merrill-Lynch research, approximately two-thirds of all small cap core fund managers failed to beat the Index in the third quarter.

Our Fund gave up 3.2% versus the Index in Materials, the best performing sector. Our holdings, such as Silgan Holdings Inc. and Compass Minerals International, failed to keep pace with the Index issues. We underperformed in Consumer Discretionary by 2.5%, due to stock selection, and by 2% in Consumer Staples. In staples, Dean Foods Co. and United Natural Foods Inc. both underperformed the Index return for the period as investors shifted away from the safety of defensive stocks. We lost nearly 2% relative to the Index in Industrials as FTI Consulting Inc. fell 19%.

Conversely, our best performance came from Financials, where we gained over 5% relative to the Index as our long time Real Estate Investment Trust (REIT) holdings rebounded strongly. Entertainment Properties Trust and Ventas Inc. gained over 115% and 70% respectively as investors rushed back into this industry, attracted by depressed prices and higher yields. We added nearly 1.4% in Health Care with Par Pharmaceutical Cos. Inc., the primary contributor, with a gain of over 70%. Our selections in Utilities also bested the Index by 1.2%, as Ormat Technologies Inc. rose nearly 50% during the period.

Portfolio Changes

The Industrials, Health Care, Consumer Staples and Telecommunications Services sectors declined over the past six months, while, Information Technology, Financials, Consumer Discretionary and Energy, rose in weighting. While we made changes to holdings and sector emphasis during the past six months, our strategy of buying high quality companies remains intact.

A Look Ahead

We anticipate that the market will begin to discriminate more based on fundamentals rather than on earnings surprises achieved by severe cost cutting and easy comparisons. Our approach is to buy individual companies with good fundamentals and not broad themes. However, an area of particular interest right now is health care. We would expect our Health Care sector weighting to increase going forward as this sector has underperformed and has a defined catalyst.

While the low quality nature of the recent rally has not played into our strengths, we believe that the market will become more discerning, and that we should generate relative outperformance in the coming quarters as individual company fundamentals take preference.

The Fund is co-managed by Robert von Pentz, CFA, and Rhys Williams, CFA of Columbia Partners, L.L.C. Investment Management.

1. Institutional Shares may only be purchased by certain investors and are not subject to distribution fees.

2. The Russell 2000 Index is a market capitalization-weighted index of 2,000 small company stocks. It is widely recognized as representative of the general market for small company stocks. Index returns assume the reinvestment of dividends and, unlike Fund returns, do not reflect any fees or expenses. You cannot invest directly in an Index. The beginning date for the Index is 08/31/92.

Small company stocks may trade less frequently and in a limited volume, and their prices may fluctuate more than stocks of other companies. Small company stocks may therefore be more vulnerable to adverse developments than those of larger companies. The Fund may invest in issuers in the real estate industry. Changes in real estate values or economic downturns can have a significant negative effect on these issuers.

Performance data quoted represents past performance and is no guarantee of future results and the information above does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of shares. Current Fund performance may be lower or higher than performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. For the most recent month-end performance, visit the Fund's website at www.quantfunds.com. **Before investing, carefully consider the Fund's investment objectives, risks, charges and expenses. For this and other information obtain the Fund's prospectus by calling (800) 326-2151 or visiting www.quantfunds.com. Please read the prospectus carefully before you invest.**

QUANT LONG/SHORT FUND

INVESTMENT PROFILE

All Data as of September 30, 2009

Investment Commentary

For the semi-annual period ended September 30, 2009, the Quant Long/Short Fund's Ordinary Shares (the "Fund") underperformed its benchmark, the S&P 500 Index (the "Index"). The Fund achieved a return of 25.73% at net asset value compared to 34.02% for the Index.

Fund Information

Number of Companies	170	
Price to Book Ratio	2.3	
Price to Earnings Ratio	14.1	
	<u>Ordinary</u>	<u>Institutional</u>
Total Expense Ratio (Net)	2.22%	2.76%
Ticker Symbol	USBOX	QGIAX

Market Conditions and Investment Strategies

The Quant Long/Short Fund seeks to add value through both long and short positions, maintaining approximately 100% net equity exposure and keeping size, style, sector and beta characteristics similar to the benchmark. The Fund employs a disciplined, yet adaptive quantitative process that analyzes over 70 characteristics that impact equity prices. Analytic's approach is systematic in the way the importance of these characteristics are measured, but is also able to recognize and adapt to changes based on both the business cycle and economic conditions. The goal of the strategy is primarily to add value by buying stocks with the most attractive factor profiles and shorting stocks with the least attractive factor profiles, within a set of risk constraints. Performance is therefore driven purely by the performance of the valuation model and is only minimally affected by market-wide factors.

The junk rally that began in March, persisted through the six-month period. Quality and efficiency factors, market leaders prior to the March 9th turning point, exhibited consistently negative returns during the last six months. Due to the dominance of these factors during most of 2008 and early 2009, the portfolios maintained above average exposure. This led to negative contribution to performance. The top performing Quality-oriented factors included: Interest Coverage Ratio, Return on Equity (ROE), Return on Assets (ROA), and Profit Margin. With riskier assets being rewarded, higher quality names dramatically lagged the market and their lower quality peers. Furthermore, valuation factors such as Cash Flow to Price and Historical Earnings to Price were penalized during the period. The bias towards higher cash flow yield and earnings yield stocks detracted from performance.

Positive factor performance during the period stemmed from factors commonly associated with risk. Leverage (Debt to Equity), a long time negative exposure in the model, delivered three straight months of positive returns. As such, it challenged any opportunity to add value during the period given the negative exposure.

The Fund was not without positive factor contribution, however. During the period, Price Momentum offered six months of negative factor returns. The Fund had a slight negative exposure to Price Momentum and therefore added value. In addition, Sales to Price and Dividend Yield, both with positive exposures, posted positive factor returns, leading to positive contribution.

Portfolio Changes

During the prior six months ending September 30, 2009, the Fund systematically, but slowly, decreased exposure to securities with above average quality exposure. The Fund increased exposure to companies with higher than average dividend yields and sales yields.

A Look Ahead

Looking ahead, we expect the model to reduce exposure to companies exhibiting above average momentum characteristics while continuing to slightly reduce the high quality bias in the Fund. Exposures to companies with high operating risk as measured by Cash Flow per Share Volatility and Sales per Share Volatility should also decrease.

The Fund's portfolio is managed by a team of portfolio managers at Analytic Investors, LLC. The lead portfolio managers are Harindra de Silva, Ph.D., CFA, Dennis Bein, CFA, and Steve Sapra, CFA.

QUANT EMERGING MARKETS FUND

INVESTMENT PROFILE

All Data as of September 30, 2009

Investment Commentary

For the semi-annual period ended September 30, 2009, Quant Emerging Markets Fund's Ordinary Shares (the "Fund") underperformed its benchmark, MSCI Emerging Markets (the "Index"). The Fund achieved a return of 57.21% at net asset value compared to 63.21% for the Index.

Fund Information

Net Assets Under Management	\$251.9 Million	
Number of Companies	181	
Price to Book Ratio	1.9	
Price to Earnings Ratio	13.3	
	Ordinary	Institutional
Total Expense Ratio (Net)	1.78%	1.58%
Ticker Symbol	QFFOX	QEMAX

Market Conditions and Investment Strategies

On a sector basis, the Fund's underperformance was primarily due to security selection in Financials (-1.47%), Industrials (-1.28%), and Telecommunication Services (-.81%). Sectors that contributed to relative portfolio value were Materials (1.50%) and Health Care (.27). On a country basis, positions held in South Korea (-1.71%), and India (-1.66%) were top detractors. Positions held in China (2.46%) and South Africa (1.28%) were top contributors to performance.

Portfolio Changes

As previously mentioned, an underweight position during a recent rally in India detracted from performance during the six month period. The Fund increased exposure to India in May, shortly after the Indian election that sparked the rally in country returns. The Fund will continue to maintain exposure in the Indian market based on benchmark weighting and the availability of attractive investment opportunities.

A Look Ahead

After 2008 in which the MSCI Emerging Markets Index fell by 53% as a result of the global financial meltdown that originated in the developed world's most sophisticated markets, we have now seen three consecutive quarters in 2009 in which the emerging markets have outperformed the developed markets. Concerns in the investment community earlier in the year that the global rally would be short lived and eventually succumb to a second decline have given way to investor confidence that the worst is over and that the emerging markets will indeed be at the front of the recovery. The widely held belief now is that the economic rebound will be sharper and last longer. Global forecasts are being revised upward by many economists for the remainder of 2009 and into 2010. With the combination of investors worrying less and the return of massive amounts of flow into the asset class, both of which are further enhanced by accommodative monetary policies from central banks around the globe, the expectation is that support for the emerging markets will continue. The end will likely come when the flow of funds into emerging markets push valuations to unsustainable levels or when central bankers feel confident enough in the recovery to reverse the currently supportive monetary policies. It is only natural to expect that central bankers, given their experience with the housing bubble, will not sit idle and allow another asset bubble to form without a monetary policy response. It seems unlikely, however, that any action to remove economic stimulus will be forthcoming in the near term as the recovery is not so solid that they would risk monetary intervention.

The Fund's portfolio is managed by a team of portfolio managers at PanAgora Asset Management, Inc.

QUANT FOREIGN VALUE FUND

INVESTMENT PROFILE

All Data as of September 30, 2009

Investment Commentary

For the semi-annual period ended September 30, 2009, the Quant Foreign Value Fund's Ordinary Shares (the "Fund") outperformed its benchmark, MSCI EAFE Index (the "Index"). The Fund achieved a return of 73.46% at net asset value compared to 50.41% for the Index.

Fund Information

Net Assets Under Management	\$481.7 Million	
Number of Companies	51	
Price to Book Ratio	1.3	
Price to Earnings Ratio	10.1	
	Ordinary	Institutional
Total Expense Ratio (Net)	1.67%	1.43%
Ticker Symbol	QFVOX	QFVIX

Market Conditions and Investment Strategies

For the sixth month period, the Fund posted double digit returns, outperforming the benchmark by more than 20%. The Fund's success stemmed from broad-based sector returns. We are pleased with this progress, but will not be satisfied until losses are recouped and our prior performance track record is restored.

Industrials' strong performance came from building/construction services and shipping that saw slowing decline rates and some improvement in sales/pricing. Positive contributions also came from materials (copper, coal, iron ore) investments, which experienced a tighter supply/demand balance. With an emphasis on purchasing lower-cost producers, which are gaining market share from high-cost producers, the Fund realized substantial gains.

Consumer discretionary sector performance was backed by the strength of British homebuilders. The industry experienced a rebound, as builders restructured and strengthened balance sheets in anticipation of a housing market recovery.

The Fund's financials responded favorably, with Bank of Ireland contributing substantially to returns. In fact, the Fund had four financial institutions that gained more than 100% during the six-month period. Holdings in reinsurance and banking holding companies remained in double-digit positive territory.

The sole detractors to performance were "defensive" holdings (namely utilities and telecommunications), which had positive absolute returns but didn't rebound as strongly as the cyclical companies. It is important to note, however, that defensive stocks provide a level of diversification and stability to the portfolio, evidenced by admirable sector performance in 2008.

Portfolio Changes

During the past six months, we initiated five new investments, and continued to commit additional assets to current holdings. We invested in one Indian bank, which may benefit from rising savings/borrowing trends within the country. A Swedish bank was also added, and investments were made in a German flavor/fragrance producer, a Swiss pharmaceutical/healthcare products company and a leading Indian global information technology company.

Holdings of a Spanish bank and a Japanese steel company were sold, due to continuing deterioration in the respective countries' economies and the relative weakness of the individual stocks.

A Look Ahead

The value of a contrarian investment style can't be overemphasized, especially when facing volatile macro-economic conditions. Even when markets worldwide tumbled in 2008, and many investors sought quick exits, we remained steadfast to our strict value discipline. Many fundamentally-strong companies were punished last year, purely impacted by irrational investor behavior. Those companies have since recovered, proving to be some of the top performers so far in 2009.

Looking ahead, the Fund's holdings are well positioned to benefit from even a slight rise in consumer demand. Over the past year, companies restructured dramatically; we believe many of the Fund's holdings can now produce strong cash flows and reach profitability with a much lower volume of business. We will continue to carefully analyze our portfolio, focusing on fundamentally strong companies that can generate strong free cash flows, manage debt services and provide sustainable returns.

The Fund's lead portfolio manager is Bernard R. Horn, Jr., of Polaris Capital Management, LLC

INVESTMENT PROFILE

All Data as of September 30, 2009

Investment Commentary

For the semi-annual period ended September 30, 2009, the Quant Foreign Value Small Cap Fund's Ordinary Shares (the "Fund") outperformed its benchmark, the S&P/Citigroup EPAC Small Cap Index (the "Index"). The Fund achieved a return of 92.74% at net asset value compared to 61.06% for the Index.

Market Conditions and Investment Strategies

We are pleased with the semi-annual performance of the Fund, as returns were more than 30% above the benchmark. Performance contributions were widespread, with outperformance in energy, materials, industrials, consumer discretionary, consumer staples, healthcare, financials and information technology. Financials offered the greatest contribution to the Fund's positive returns. Investments were geographically diverse, with Russian and Indian banks profiting substantially. Six of the seven banking holdings returned more than 100% during the sixth-month period, pointing to renewed confidence in the banking systems and, in particular, the fundamental strength of the individual holdings.

The Fund's consumer staples holdings returned triple the performance of the sector benchmark, with investments across all core food groups. Earlier investor hysteria was followed by the rational conclusion that consumers would indeed continue eating products such as rice, fish, milk, bread, vegetables and sandwiches. The Fund, which invests in several such food companies, capitalized on this inevitable trend. Consumer discretionary stocks also performed well including Character Group and Vitec Group. The sole holding in negative territory was Japan's Culture Convenience, which was a source of strong performance last year. For the better part of 2009, Japanese stocks have been negatively impacted by their economy's inability to sustain stimulus, in the form of either stable employment or wages.

The Fund's information technology companies achieved strong performance during the six-month period, with four of the five holdings returning more than 100%. IT is typically referred to as an early-cycle sector, whereby recovery occurs on the front end of an even modest growth cycle. Healthcare also had strong performance, with two of the three stocks returning more than 120%. The Fund's sole energy holding, China-based Sinopec Kantons, returned 119%.

Although in positive absolute territory, the Fund's telecommunications holdings underperformed their respective benchmark at 17% vs. the benchmark's 53% during the sixth-month period. It is important to note, however, that the Fund continues to invest in telecom on an opportunistic basis, as this "defensive" sector provides stability and diversification to the portfolio.

Portfolio Changes

During the six-month period, Fund management carefully assessed the portfolio, conducting critical analysis on the strength of current holdings. All current holdings were retained, and in some case, additional investments were made in these stocks.

One new investment was made in United Drug of Ireland. The company is a wholesaler of pharmaceutical products, and also markets and distributes over-the-counter brands and medical and lab equipment to wholesalers and hospitals in Ireland. They also operate Pharmanet, a pharmacy website. The company's stock offers an attractive valuation and dividend yield.

A Look Ahead

With expectations for modest economic growth over the next few years, Fund management is seeking undervalued stocks that can produce strong cash flows and reach profitability at lower volumes of business. Already, the portfolio is replete with such fundamentally-strong holdings; we continue to seek out new investment opportunities that reflect this investment strategy.

The Fund's lead portfolio manager is Bernard R. Horn, Jr., of Polaris Capital Management, LLC

NOTES TO FINANCIAL STATEMENTS

1. Organization of the Trust

The Quantitative Group of Funds d/b/a “Quant Funds” (the “Trust”) is organized as a Massachusetts business trust and is registered under the Investment Company Act of 1940, as amended, as a non-diversified, open-end management investment company. The Trust currently has five series (each a “Fund” and collectively the “Funds”) each with a distinct investment objective.

Quant Small Cap Fund (“Small Cap”) seeks maximum long-term capital appreciation.

Quant Long/Short Fund (“Long/Short”) seeks long-term growth of capital. Prior to November 1, 2006, Quant Long/Short Fund used a long only investment strategy and its investment objective was long-term growth of capital and income.

Quant Emerging Markets Fund (“Emerging Markets”) seeks long-term growth of capital.

Quant Foreign Value Fund (“Foreign Value”) seeks long-term capital growth and income.

Quant Foreign Value Small Cap Fund (“Foreign Value Small Cap”) seeks long-term capital growth and income.

Each Fund offers two classes of shares designated as Ordinary Shares and Institutional Shares. The classes differ principally in their respective expense structure and minimum investment requirements. Each class of shares represents an interest in the same portfolio of investments of the respective Fund and has equal rights to voting, redemptions, dividends and liquidation, except that only Ordinary Shares bear distribution (Rule 12b-1) fees and have exclusive voting rights with respect to the distribution plan that has been adopted by Ordinary Share shareholders. There is no distribution plan for Institutional Shares.

At times, a Fund’s investments may represent industries or industry sectors that are interrelated or have common risks, making it more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors. To the extent that a Fund is permitted to invest in foreign markets, emerging markets or countries with limited or developing markets such investments may subject the Fund to a greater degree of risk than in the U.S. market or a developed market. Risks associated with these foreign and developing markets include political, social or economic factors and may affect the price of a Fund’s investments and income generated by these investments, as well as a Fund’s ability to repatriate such amounts. Information regarding each Fund’s principal risks is contained in the Fund’s prospectus. Please refer to those documents when considering a Fund’s risks.

2. Significant Accounting Policies

Each Fund’s financial statements have been prepared in conformity with U.S. generally accepted accounting principles, that require the management of the Funds to, among other things, make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income, expenses and gains and losses on investments during the reporting year. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS (continued)

The following is a summary of significant accounting policies followed by each Fund in the preparation of its financial statements, which are consistent with those policies generally accepted in the investment company industry.

Security Valuation

Portfolio securities are valued each business day at the last reported sale price on the principal exchange or market on which they are traded. If there is no such reported sale, the securities generally are valued at the mean between the last reported bid and asked prices. For certain securities, where no such sales have been reported, a Fund may value such securities at the last reported bid price. In the event that there is information suggesting that valuation of such securities based upon bid and/or asked prices may not be accurate, a Fund may value such securities in good faith at fair value in accordance with procedures established by the Funds' Board of Trustees (the "Trustees"), which may include a determination to value such securities at the last reported sales price. Short-term investments that mature in 60 days or less are valued at amortized cost. Securities quoted in foreign currencies are translated into U.S. dollars based upon the prevailing exchange rate on each business day. Other assets and securities for which no quotations are readily available are valued at fair value as determined in good faith using procedures approved by the Trustees. As a result, changes in the value of those currencies in relation to the U.S. dollar may affect a Fund's NAV. Because foreign markets may be open at different times than the New York Stock Exchange, the value of a Fund's shares may change on days when shareholders are not able to buy or sell them. If events materially affecting the values of a Fund's foreign investments occur between the close of foreign markets and the close of regular trading on the New York Stock Exchange, these investments may be valued at their fair value as determined in good faith using procedures approved by the Trustees.

Financial Accounting Standards Board issued statement 157 (FAS 157) which establishes a framework for measuring fair value and expands disclosure in financial statement about fair value measurements. In accordance with FAS 157, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. For net asset value determination purposes, various inputs are summarized in the three broad levels listed below.

- Level 1 – quoted prices in active markets for identical investments.
- Level 2 – other significant observable inputs (which could include quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments.)

QUANT FUNDS

NOTES TO FINANCIAL STATEMENTS (continued)

The following is a summary of the inputs used as of September 30, 2009 in valuing the Funds' investments carried at value:

	Level 1	Level 2	Level 3	Total
Small Cap				
Investments in Securities	\$ 89,853,769	\$28,541,722	\$—	\$118,395,491
Long/Short				
Investments in Securities	68,090,408	8,243,546	—	76,333,954
Liabilities in Securities Sold				
Short	(15,702,836)	—	—	(15,702,836)
Emerging Markets				
Investments in Securities	251,229,068	4,244,135	—	255,473,203
Other Financial Instruments	2,802	—	—	2,802
Foreign Value				
Investments in Securities	449,192,136	45,762,075	—	494,954,211
Foreign Value Small Cap				
Investments in Securities	65,814,873	11,981,080	—	77,795,953
Other Financial Instruments	23,177	7,486,886	—	7,510,063

Security Transactions and Related Investment Income

Security transactions are accounted for on the trade date (the date the order to buy or sell is executed). Dividend income, less foreign taxes withheld, is recorded on the ex-dividend date, except that certain dividends from foreign securities where the ex-dividend date may have passed are recorded as soon as a Fund becomes aware of the ex-dividend data in the exercise of reasonable diligence. Distributions received on securities that represent a return of capital or a capital gain are recorded as a reduction of cost of investments and/or as a realized gain. Each Fund estimates the components of distributions that may be considered nontaxable distributions or capital gain distributions for tax purposes. Interest income is recorded on the accrual basis and includes accretion of discounts and amortization of premiums. In determining the net gain or loss on securities sold, the cost of securities is determined on the identified cost basis. Each Fund's investment income and realized and unrealized gains and losses are allocated among classes based upon the daily relative net assets.

Repurchase Agreements

The Funds' custodian takes possession through the federal book-entry system of securities collateralizing repurchase agreements. Collateral is marked-to-market daily to ensure that the market value of the underlying assets remains sufficient to protect the Funds. The Funds may experience costs and delays in liquidating the collateral if the issuer defaults or enters into bankruptcy.

Foreign Currency Transactions

All monetary items denominated in foreign currencies are translated into U.S. dollars based on the prevailing exchange rate at the close of each business day. Income and expenses denominated in foreign currencies are translated at the prevailing rates of exchange when accrued or incurred.

NOTES TO FINANCIAL STATEMENTS (continued)

Reported net realized gains and losses on foreign currency transactions represent net gains and losses from currency gains and losses realized between the trade and settlement dates on investment transactions, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are not segregated in the Statement of Operations from the effects of changes in market prices of those securities, but are included with the net realized and unrealized gain or loss on investments.

Forward Foreign Currency Contracts

The Funds may enter into forward foreign currency contracts to manage their exposure to fluctuations in certain foreign currencies. Foreign Value and Foreign Value Small Cap may enter into forward foreign currency contracts for investment purposes as well. A forward currency contract is a commitment to purchase or sell a foreign currency at a future date at a set price. The forward currency contracts are valued at the forward rate and are marked-to-market daily. The change in market value is recorded by the Fund as an unrealized gain or loss. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. In addition to the risks of financial investments mentioned above, risks arise from unanticipated movements in currency values.

Short Sales

Long/Short Fund may engage in short sales (selling securities it does not own) as part of its normal investment activities. Upon selling a security short, Long/Short Fund's Custodian will segregate cash, cash equivalents or other appropriate liquid securities in an amount equal to the current market value of the securities sold short and will maintain such collateral until Long/Short Fund replaces the borrowed security. Long/Short Fund is required to pay any dividends or interest due on securities sold short. Such dividends and interest are recorded as an expense. Liabilities for securities sold short are valued daily and recorded as unrealized appreciation (depreciation) on investments and securities sold short. Long/Short Fund records realized gain (loss) on a security sold short when a short position is terminated by Long/Short Fund. Long/Short Fund will incur a loss if the price of a security increases between the date of the short sale and the date on which Long/Short Fund replaces the borrowed security. Long/Short Fund will realize a gain if the price of borrowed security declines between the date of a short sale and the date Long/Short Fund replaces the borrowed security.

Securities Lending

To generate additional income, each Fund may lend up to 30% (with the exception of the Long/Short Fund which may lend up to 33⅓% of its assets pursuant to agreements ("borrower agreements") requiring that the loan be continuously secured by cash or securities. Securities are loaned by eSecLending, as lending agent to the Small Cap Fund, the Emerging Markets Fund and the Foreign Value Fund, to certain pre-approved brokers ("the borrowers"). The borrowers are required to provide cash or securities as collateral against loaned securities in the amount of 105% of the market value of borrowings for the Emerging Markets and Foreign Value Funds, and 102% of the borrowings for the Small Cap Fund. Collateral is marked-to-market

QUANT FUNDS

NOTES TO FINANCIAL STATEMENTS (continued)

daily. eSecLending provides indemnification insurance via highly rated third party insurers to cover these potential risks.

The Quant Long/Short Fund uses State Street Bank and Trust Company ("State Street") as lending agent for the Quant Long/Short Fund pursuant to a Securities Lending Authorization Agreement. The initial collateral received shall have (depending on the nature of the loaned securities and the collateral received) a value of 102% or 105% of the market value of the loaned securities, or such other value, but not less than 102% of the market value of the loaned securities, as may be applicable in the jurisdiction in which such loaned securities are customarily traded. Collateral is marked-to-market daily. State Street provides indemnification against borrower default.

Cash collateral is invested in a registered money market fund that may be managed by a Fund's securities lending agent or one of its affiliates.

Risks such as delay in recovery of securities may occur should the borrower of the securities fail financially or should the value of the securities loaned increase above the value of the collateral received.

At September 30, 2009, the following Funds had collateral and loans outstanding of:

	Value of Collateral	Value of Loaned Securities
Quant Small Cap Fund	\$27,564,722	26,985,226
Long/ Short Fund	8,243,546	8,011,166
Quant Emerging Markets Fund	4,052,135	3,770,755

Expenses and Class Allocations

All general Fund expenses are allocated among and charged to the assets of the respective Funds in accordance with the Funds' Multi Class Plan pursuant to Rule 18F-3 under the 1940 Act which may be based on the relative net assets of each Fund and Class. Expenses allocable to a Fund are borne pro rata by the holders of both classes of shares of such Fund, except that 12b-1 Plan expenses will not be borne by the holders of Institutional Shares.

Distribution fees on Ordinary Shares are calculated based on the average daily net asset value attributable to the Ordinary Shares of the respective Fund. Institutional Shares are not subject to a distribution plan. Shareholders of each class share all expenses and fees paid to the transfer agent, Quantitative Institutional Services, for its services, which are allocated based on the net assets in each class and the ratable allocation of related out-of-pocket expenses. Income, common expenses and realized and unrealized gains and losses are calculated at the Fund level and allocated daily to each class of shares based on their respective percentage of adjusted net assets at the beginning of the day. (See Note 3)

Distributions to Shareholders

Distributions to shareholders are recorded as of the ex-dividend date. Distributions paid by each Fund with respect to each class of shares are calculated in the same manner, at the same time, and in the same amount, except that Ordinary Shares incur 12b-1 distribution fees

NOTES TO FINANCIAL STATEMENTS (continued)

while Institutional Shares do not. Distributions from net investment income for each Fund, if any, are declared and paid annually. Distributions from net realized gains for each Fund, if any, are generally declared and paid annually.

New Accounting Pronouncements

In July 2006, Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement 109* (FIN 48) was issued and is effective for fiscal years beginning after December 15, 2006.

FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 required the evaluation of tax positions taken or expected to be taken in the course of preparing the Funds' tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would have to be recorded as a tax benefit or expense in the current year. Management has analyzed the Funds' tax positions taken on federal income tax returns for all open years (tax years ended March 31, 2006-2009) and has determined that there were no uncertain tax positions to be reflected in the Funds' financial statements at September 30, 2009.

In April 2009, the Financial Accounting Standards Board ("FASB") issued FASB Staff Position No. 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly" ("FSP 157-4"). FSP 157-4 provides additional guidance for estimating fair value in accordance with FASB Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. Management is currently evaluating the impact the adoption of FSP 157-4 will have on the Funds' financial statement disclosures.

3. Management Fee, Advisory Contracts and Other Affiliate Transactions

The Funds have entered into a management agreement (the "Management Agreement") with Quantitative Investment Advisors, Inc. d/b/a Quantitative Advisors (the "Manager"). Compensation of the Manager, for management and administration of the Funds, including selection and monitoring of the portfolio advisors, is paid monthly based on the average daily net asset value of each Fund for the month. The annual rate of such fees is 1.00% of the average daily total net assets of Small Cap, Long/Short, Emerging Markets, Foreign Value, and Foreign Value Small Cap Funds.

Under the Management Agreement, the Manager has agreed to reduce its compensation, and if necessary, assume expenses, with respect to Small Cap to the extent that the total expenses of this Fund individually exceeds 2% of average net assets for any fiscal year. Fund expenses subject to this limitation are exclusive of brokerage, interest, taxes and extraordinary

NOTES TO FINANCIAL STATEMENTS (continued)

expenses, which include incremental custody costs associated with international securities. Expenses are calculated gross of custody credits, if applicable.

For the six months ended September 30, 2009 aggregate management fees were \$3,840,228.

The Manager has entered into advisory contracts with the following subadvisors (collectively the "Advisors") to provide investment advisory services to the following Funds: Columbia Partners, L.L.C., Investment Management (Small Cap), Analytic Investors, LLC (Long/Short), PanAgora Asset Management, Inc. (Emerging Markets), and Polaris Capital Management, LLC (Foreign Value and Foreign Value Small Cap.)

For services rendered, the Manager pays to the Advisor of a Fund a fee based on a percentage of the average daily total net assets of the Fund. The fee for each Fund is determined separately. Currently, the fees paid by the Manager to the Advisors of the Funds are as follows:

Small Cap*	0.47% of average daily total net assets
Long/Short**	0.45% of the first \$100 million and 0.40% of amounts in excess of \$100 million;
Emerging Markets	0.40% of average daily total net assets;
Foreign Value	0.35% of the first \$35 million, 0.40% of amounts in excess of \$35 million but less than \$200 million and 0.50% of assets in excess of \$200 million of average daily total net assets
Foreign Value Small Cap	0.35% of the first \$35 million and 0.40% of amounts in excess of \$35 million but less than \$200 million and 0.50% of amounts in excess of \$200 million.

* Prior to January 1, 2009 the fee paid was 0.50% of average daily total net assets.

** Effective January 1, 2009 through December 31, 2009 the fee paid is 0.425% of the first \$100 million and 0.40% of amounts in excess of \$100 million.

The Funds have entered into a distribution agreement (the "Distribution Agreement") with U.S. Boston Capital Corporation (the "Distributor"). For its services under the Distribution Agreement, the Distributor received a monthly fee at the annual rate of 0.25% of the average daily net asset value of the Ordinary Shares of each Fund. During the six months ended September 30, 2009 the aggregate distribution fees of the Funds were \$833,521.

Holders of Institutional Shares pay no portion of the 12b-1 Plan expenses of the Funds and are not entitled to vote on matters involving the 12b-1 Plan.

Transfer agent functions are provided to the Funds by Quantitative Institutional Services, a division of the Manager (the "Transfer Agent") pursuant to a transfer agent agreement (the

NOTES TO FINANCIAL STATEMENTS (continued)

"Transfer Agent Agreement"). The Transfer Agent and Service Agreement provides for base fees that are payable to the Transfer Agent at an annual rate of 0.16% of the average daily total net asset value of each class of shares of the Funds and for reimbursement of out of pocket expenses. During the six months ended September 30, 2009, the aggregate fees of the Funds were \$647,294.

Pursuant to an Administration Agreement, the Manager provides certain administrative services to the Funds. For the period of April 1, 2009 through September 30, 2009, fees paid pursuant to this agreement were \$131,137.

The By-Laws of the Trust, as amended from time to time, permit the Board of Trustees of the Funds to approve reimbursement to the Manager for certain costs associated with providing regulatory and compliance services to the Funds. For the six months ended September 30, 2009, the Trustees have approved reimbursements that amounted to \$91,944.

Custody and fund accounting services are provided by State Street Kansas City. Custody credits generated by interest earned on un-invested cash balances maintained by the Funds are used to offset custodial expenses of the Funds.

For the six months ended September 30, 2009, each Trustee received an annual Trustee's fee of \$21,000, with the exception of the Chairman of the Audit Committee, who is paid \$24,000 annually. The fees are allocated to each Fund in proportion to its respective net assets.

4. Purchases and Sales

During the six months ended September 30, 2009, purchases of investment securities other than U.S. Government obligations and short-term investments, for Small Cap, Long/Short, Emerging Markets, Foreign Value, and Foreign Value Small Cap were \$21,471,838, \$68,354,313, \$183,554,714, \$72,361,158, and \$33,997,441, respectively. Sales of such securities for the Funds were \$23,191,440, \$76,767,269, \$219,750,722, \$29,517,870, and \$3,429,181, respectively. Securities sold short are excluded from the Long/Short Fund numbers as they are generally held for less than one year.

5. Contingent Liability

The Trust maintains a joint fidelity bond with the Funds' Transfer Agent through ICI Mutual Insurance Company ("ICI Mutual"). The annual premium is allocated among the Funds and the Transfer Agent. Additionally, the Funds have committed to ICI Mutual up to 300% of the annual premium, one third of which was provided in cash, with each Fund's pro rata portion recorded as an asset. The remainder is secured with an irrevocable letter of credit.

6. Concentration of Risk

The relatively large investments of Emerging Markets in countries with limited or developing capital markets may involve greater risks than investments in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of the

QUANT FUNDS

NOTES TO FINANCIAL STATEMENTS (continued)

Fund's investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

7. Federal Income Taxes

It is the policy of the Funds to distribute all of their taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code ("IRC") applicable to regulated investment companies. Therefore no Federal income tax provision is required.

Certain Funds had capital loss carryovers at March 31, 2009. The accumulated capital losses noted in the table may be available to offset future realized capital gains and thereby reduce future taxable gain distributions. Foreign Value acquired capital loss carryovers for federal income tax purposes of \$8,053,584 when the net assets of State Street Research International Equity Fund (SSR), a series of State Street Research Financial Trust ("SSR"), were acquired in a merger which occurred on May 2, 2003 pursuant to a Plan of Reorganization approved by the shareholders of SSR on April 25, 2003. Foreign Value is the surviving fund in the merger for purposes of maintaining the financial statements and performance history in the post-reorganization periods and the acquired capital loss carryovers may be subject to limitations on their use under the Internal Revenue Code, as amended, and may therefore expire unutilized. As of March 31, 2009 the capital loss carryovers were as follows:

Portfolio	Capital Loss	Capital Loss	Capital Loss	Capital Loss	Total
	Expires	Expires	Expires	Expires	
	March 31, 2010	March 31, 2011	March 31, 2016	March 31, 2017	Capital Loss
Small Cap Fund	\$ —	\$ —	\$ —	\$12,418,995	\$12,418,995
Long/Short Fund	—	—	—	2,671,166	2,671,166
Emerging Markets Fund	—	—	—	44,819,035	44,819,035
Foreign Value Fund	263,553	932,449	—	80,608,820	81,804,822
Foreign Value Small Cap Fund	—	—	—	—	—

The primary differences between book and tax appreciation or depreciation of investments consist of wash sale loss deferrals, return of capital distributions by real estate investment trusts ("REITs"), mark to market on passive foreign investment companies ("PFICs") held and foreign capital gains taxes accrued. The net tax appreciation/(depreciation) in the table below includes unrealized tax gain/(loss) on foreign currency and investments.

At September 30, 2009, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes was as follows:

Portfolio	Tax Cost	Gross	Gross	Net
		Unrealized	Unrealized	Unrealized
		Gain	Loss	Gain (Loss)
Small Cap	\$ 87,233,419	\$12,780,462	\$ (7,962,461)	\$ 4,818,001
Long/Short	64,636,398	9,563,809	(599,120)	8,964,689
Emerging Markets	206,414,857	53,615,366	(7,472,427)	46,142,939
Foreign Value	604,513,129	33,214,691	(142,771,286)	(109,556,595)
Foreign Value Small Cap	75,776,998	11,573,978	(2,068,136)	9,505,842

QUANT FUNDS

INFORMATION FOR SHAREHOLDERS

Quarterly Portfolio Disclosure

Each Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (Call 1-800-SEC-0330 for more information). For a complete list of a fund's portfolio holdings, you may also view the most recent monthly holdings report, semi-annual report or annual report on the Quant Funds' website at www.quantfunds.com.

Portfolio Proxy Voting Policies and Information

Information on the Funds' proxy voting policies and on how the Quant Funds voted proxies related to portfolio securities for the 12-month period ended June 30 is available without charge online at www.quantfunds.com and at www.sec.gov. You may also call 1-800-326-2151 to request a free copy of the proxy voting information or the proxy voting policies.

Household Delivery of Fund Documents

With your consent, the Trust may send a single proxy statement, prospectus and shareholder report to your residence for you and any other member of your household who has an account with the Funds. If you wish to revoke your consent to this practice, you may do so by notifying the Fund's transfer agent, by phone or in writing (see "For Account Information"). The mailing of separate proxy statements, prospectuses and shareholder reports will begin within 30 days after receiving your notice.

MANAGEMENT CONTRACT AND ADVISORY CONTRACT APPROVAL

On May 20, 2009, the Board of the Trust approved the Management Agreement with the Manager and the advisory contracts with each Advisor to the Funds. The following describes the Board's considerations.

Management Contract with Quantitative Investment Advisors, Inc.

Nature and Quality of Manager's Advisory Services. The Board reviewed the Managers' senior management and other personnel. Among other factors, the Board considered the size, education and experience of the Managers' staff and the Managers' approach to recruiting, training, compensating and retaining personnel. The Board considered the Managers' supervision of Sub-Advisers. The Board considered the benefit to shareholders of investing in a fund that is part of a small family of funds using a manager-of-managers approach and providing for a selection of shareholder services, including, in most cases, the ability of shareholders to exchange or transfer investments within the same class of shares among each of the Funds without incurring additional sales charges.

MANAGEMENT CONTRACT AND ADVISORY CONTRACT APPROVAL (continued)

Nature and Quality of Other Services. The Board considered the nature, quality, cost and extent of administrative and shareholder services performed by the Manager and affiliated companies under the existing Management Agreements and under separate agreements covering administrative services, transfer agency functions and other services. The Board, including the Independent Trustees, has also considered the nature and extent of the advisor's supervision of third party service providers, principally Fund accountants (pricing, recordkeeping), securities lending agents, custodians and subcustodians.

Fees and Expenses. The Board considered each Fund's advisory fee, subadvisory fee and expense ratio compared with the management fees, subadvisory fees and expense ratios of the Selected Peer Group. Fees and expenses for each Fund are discussed below under each Fund.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the existing advisory fee structure is fair and reasonable, and that the existing Management Agreement should be approved.

Quant Small Cap Fund — Columbia Partners, L.L.C. Investment Management

Investment Performance. The Board reviewed the Fund's investment performance as well as the performance of the Selected Peer Group, and the performance of an appropriate index or combination of indices. The Board noted that the Fund underperformed its Selected Peer Group for each of the one, three, five and ten year periods.

Fees and Expenses. The Board considered the Fund's management fee, subadvisory fee and expense ratio compared with fees and expense ratios of the Selected Peer Group. The Board noted that the Fund's management fee and expense ratio are above the average and the median of the funds in its Selected Peer Group. Additionally, the Board noted that the Fund's contractual management fee was competitive with the assets weighted average of the subsection of the Selected Peer Group comprised of funds managed via a similar adviser/sub-adviser structure (the "Sub-Advised Peer Group") at various asset levels.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the advisory fees for the Fund are fair and reasonable, and that the existing Sub-Advisory Agreement with this Sub-Adviser should be approved.

Quant Emerging Markets Fund — PanAgora Asset Management, Inc.

Investment Performance. The Board reviewed the Fund's investment performance as well as the performance of a Selected Peer Group of mutual funds, and the performance of an appropriate index or combination of indices. The Board noted that the Fund underperformed its Selected Peer Group for each of the one, three and five year periods, but has outperformed the Selected Peer Group for the ten year period.

Fees and Expenses. The Board considered the Fund's management fee, subadvisory fee and expense ratio compared with the fees and expense ratios of the Selected Peer Group. The Board noted that the Fund's management fee is below the average and the median of the

MANAGEMENT CONTRACT AND ADVISORY CONTRACT APPROVAL (continued)

funds in its Selected Peer Group, and that the Fund's total expense ratio was below the average and the median of the Fund's Sub-Advised Peer Group.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the advisory fees for the Fund are fair and reasonable, and that the existing Sub-Advisory Agreement with this Sub-Adviser should be approved.

Quant Long/Short Fund — Analytic Investors, LLC

Investment Performance. The Board reviewed the Fund's investment performance as well as the performance of the Selected Peer Group, and the performance of an appropriate index or combination of indices. The Board noted that Fund underperformed its Selected Peer Group for each of the one, three, five and ten year periods; however, the Board noted that the Fund changed its investment strategy in November of 2006 and that performance prior to that date reflects the prior strategy.

Fees and Expenses. The Board considered the Fund's management fee, subadvisory fee and expense ratio compared with the fees and expense ratios of the Selected Peer Group. The Board noted that the Fund's management fee and expense ratio are above the average and the median of the funds in its Selected Peer Group. The Board noted that the Fund's contractual management fee is lower than the asset-weighted average of its Selected Peer Group at all asset levels.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the advisory fees for the Fund are fair and reasonable, and that the existing Sub-Advisory Agreement with this Sub-Advisor should be approved.

Quant Foreign Value Fund — Polaris Capital Management, LLC

Investment Performance. The Board reviewed the Fund's investment performance as well as the performance of the Selected Peer Group, and the performance of an appropriate index or combination of indices. The Board noted that Fund underperformed its Selected Peer Group for each of the one, three and five year period but has outperformed the Selected Peer Group for the ten year periods.

Fees and Expenses. The Board considered the Fund's management fee, subadvisory fee and expense ratio compared with the fees and expense ratios of the Selected Peer Group. It also considered the amount and nature of fees paid by shareholders. The Board noted that Fund's management fee was below the average and the median of the Fund's Sub-Advised Peer Group and slightly above the average and the median for the Selected Peer Group. The Board noted that the expense ratio of the Fund was slightly above the average and the median of the Sub-Advised Peer Group.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the advisory fees for the Fund are fair and reasonable, and that the existing Sub-Advisory Agreement with this Sub-Adviser should be approved.

MANAGEMENT CONTRACT AND ADVISORY
CONTRACT APPROVAL (continued)

Quant Foreign Value Small Cap Fund — Polaris Capital Management, Inc.

Investment Performance. The Board reviewed the Fund's investment performance since inception in May of 2008, noting that the Fund underperformed the Selected Peer Group.

Fees and Expenses. The Board considered the Fund's management fee, subadvisory fee and expense ratio compared with the fees and expense ratios of the Selected Peer Group. It also considered the amount and nature of fees paid by shareholders. The Board noted that the Fund's management fee is slightly above the average and the median of the Fund's Sub-Advised Peer Group and above the average and the median for the entire Selected Peer Group. The Board noted that the expense ratio of the Fund was above the average and the median of the Sub-Advised Peer Group. The Board noted that the Fund commenced operations in May of 2008 and that the expense ratio reflects certain start-up expenses that will not be recurring expenses. Additionally, the Board noted that the contractual management fee was competitive with the assets-weighted average of the Selected Peer Group at various asset levels. The Board also noted that the Fund benefited from the waiver of certain fees for a portion of its initial fiscal year.

Conclusion. Based on its evaluation of all material factors, the Board, including the Independent Trustees, concluded that the advisory fees for the Fund are fair and reasonable, and that the proposed Sub-Advisory Agreement with this Sub-Adviser be approved.

QUANT FUNDS

TRUSTEES AND OFFICERS

The business address of each non-interested Trustee is c/o Quant Funds, 55 Old Bedford Road, Lincoln, MA 01773. Each Trustee and officer holds office until his or her successor is chosen and qualified or until his or her earlier death, resignation, retirement or removal. Messrs.
