- (A) The unaudited condensed consolidated financial statements (the "Unaudited Financial Statements") presented have been prepared by Nortek, Inc. and include the accounts of Nortek, Inc., and all of its significant wholly-owned subsidiaries (the "Company") after elimination of intercompany accounts and transactions, without audit and, in the opinion of management, reflect all adjustments of a normal recurring nature necessary for a fair statement of the interim periods presented. Although certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted, the Company believes that the disclosures included are adequate to make the information presented not misleading. It is suggested that these Unaudited Financial Statements be read in conjunction with the financial statements and the notes included in the Company's latest Annual Report on Form 10-K as filed with the Securities and Exchange Commission.
- (B) The Financial Accounting Standards Board's Emerging Issues Task Force reached final consensus in 2000 with respect to the accounting for shipping and handling fees and costs and the accounting for certain sales incentives. As a result, the Company has reclassified certain amounts among net sales, cost of products sold and selling, general and administrative expenses in accordance with these pronouncements for all periods presented in the accompanying unaudited condensed consolidated statement of operations. These reclassifications did not have any effect on operating earnings, net earnings or net earnings per share for any period presented.
- (C) In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 141, "Business Combinations" ("SFAS No. 141"). SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. This statement is effective for all business combinations initiated after June 30, 2001.

In July 2001, the FASB issued SFAS No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"). SFAS No. 142 applies to goodwill and intangible assets acquired after June 30, 2001, as well as previously acquired goodwill and intangible assets. Under SFAS No. 142 goodwill, as well as certain other intangible assets, determined to have an infinite life will no longer be amortized, instead these assets will be reviewed for impairment on a periodic basis. SFAS No. 142 is effective beginning January 1, 2002. Management is evaluating the impact that this statement will have on the Company's consolidated financial statements. Goodwill amortization was approximately \$8,300,000 and \$4,100,000 in the first half and second quarter of 2001, respectively, and was approximately \$8,100,000 and \$4,100,000 in the first half and second quarter of 2000, respectively, as determined under accounting principles generally accepted in the United States currently in effect.

- (D) In the first quarter of 2001, the Company adopted Statement of Financial Accounting Standards SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities", as amended ("SFAS No. 133") by recording an approximate \$800,000 liability in its balance sheet at March 31, 2001, representing the fair value of the Company's interest rate collar agreement. The cumulative affect of adopting this accounting method as of December 31, 2000 was not material. As a result, interest expense includes an approximate non-cash charge of \$875,000 (\$.05 per share, net of tax) and \$75,000 in the first half and second quarter of 2001, respectively.
- (E) The Securities and Exchange Commission released Staff Accounting Bulletin No. 101, "Revenue Recognition in Financial Statements" ("SAB No. 101"), on December 3, 1999. This SAB provides additional guidance on the accounting for revenue recognition including both broad conceptual discussions as well as certain industry-specific guidance. The application of this guidance, for all periods presented, was not material to the consolidated financial statements.
- (F) Acquisitions are accounted for as purchases and, accordingly, have been included in the Company's consolidated results of operations since the acquisition date. Purchase price allocations are subject to refinement until all pertinent information regarding the acquisitions is obtained. On July 3, 2000, the Company acquired Eaton-Williams Holdings Limited ("Eaton-Williams"), of Edenbridge, England. Eaton-Williams designs, manufactures, installs and services custom-made and standard air conditioning and humidification equipment. On June 15, 2001, the Company acquired Senior Air Systems ("SAS") from a wholly-owned subsidiary of Senior Plc. SAS, of Stoke-on-Trent, England, manufactures and sells air conditioning equipment and will be integrated into the operations of Eaton-Williams. After the SAS acquisition, annual sales of Eaton-Williams are estimated to be approximately £50,000,000.
- (G) In the first half and second quarter of 2001, the Company expensed approximately \$2,200,000 and approximately \$1,500,000, respectively, of manufacturing costs incurred in connection with the start up of a residential air conditioning facility and a vinyl fence and decking facility. Also, in the first half and second quarter of 2001 the Company expensed approximately \$3,000,000 and \$2,200,000, respectively, of fees and expenses associated with the Company's material procurement strategy without realizing any benefit to date. The Company does not expect to begin to realize any benefits from the implementation of this initiative until later in the year 2001. In 2001, the Company recorded in operating earnings, a non-taxable gain of approximately \$3,200,000 (\$.29 per share) and \$2,400,000 (\$.22 per share) in the first half and second quarter, respectively, from net death benefit insurance proceeds related to life insurance maintained on former managers. In the second quarter of 2001, the Company also incurred certain duplicative net interest expense as discussed in Note I below. In the second quarter of 2000, the Company sold a parcel of land resulting in a pre-tax gain of approximately \$1,700,000 (\$.10 per share, net of tax) which is included in operating earnings.

(H) The Company's Board of Directors has authorized a number of programs to purchase shares of the Company's Common and Special Common Stock. The most recent of these programs was announced on May 4, 2000, to purchase up to 1,000,000 shares of the Company's Common and Special Common Stock in open market or negotiated transactions, subject to market conditions, cash availability and provisions of the Company's outstanding debt instruments. As of August 3, 2001, the Company had purchased approximately 461,000 shares of its Common and Special Common stock for approximately \$9,200,000 under this program and accounted for such purchases as treasury stock.

At August 3, 2001, approximately \$109,000,000 was available for the payment of cash dividends, stock purchases or other restricted payments as defined under the terms of the Company's most restrictive debt covenant related to such payments.

- (I) In June 2001, the Company sold \$250,000,000 principal amount of its 9 7/8% Senior Subordinated Notes due 2011 ("9 7/8% Notes") at a slight discount. Net proceeds from the sale of the 9 7/8% Notes, after deducting underwriting commissions and expenses amounted to approximately \$241,800,000 and a portion of such proceeds was used to redeem, on July 12, 2001, \$204,822,000 principal amount of the Company's 9 7/8% Senior Subordinated Notes due 2004 (which notes were called for redemption on June 13, 2001), and pay approximately \$2,900,000 of redemption premium and approximately \$7,400,000 of accrued interest. As a result of this redemption, the Company will record an extraordinary loss of approximately \$5,500,000 (\$.32 per share, net of tax) in the third quarter of 2001. In the second quarter of 2001, the Company incurred approximately \$800,000 (\$.05 per share, net of tax) of duplicative interest expense, net of interest income, since the redemption of the 9 7/8% Senior Subordinated Notes due 2004 did not occur on the same day as the financing.
- (J) During the second quarter of 2001, one of the trusts related to the Company's supplemental retirement plans loaned funds to certain officers of the Company who have fully vested retirement benefits in such plans. At June 30, 2001, approximately \$17,100,000 of notes receivable bearing interest at 5.43% and maturing in 2016 and approximately \$13,400,000 of notes receivable, bearing interest at 6.75% and maturing in 2015, are due from such officers of the Company and are included in restricted investments and marketable securities held by pension trusts in the accompanying unaudited condensed consolidated balance sheet.
- (K) Basic earnings per share amounts have been computed using the weighted average number of common and common equivalent shares outstanding during each period. Special Common Stock is treated as the equivalent of Common Stock in determining earnings per share results. Diluted earnings per share amounts have been computed using the weighted average number of common and common equivalent shares and the dilutive potential common and special common shares outstanding during each period.

A reconciliation between basic and diluted earnings per share from continuing operations is as follows:

(L) The Company has three reportable segments: the Residential Building Products Segment; the Air Conditioning and Heating Products Segment; and the Windows, Doors and Siding Products Segment. In the tables below, Other includes corporate related items, results of insignificant operations, intersegment eliminations and certain income and expense items not allocated to reportable segments.

The Company evaluates segment performance based on operating earnings before allocations of corporate overhead costs. The income statement impact of all purchase accounting adjustments, including goodwill and intangible asset amortization, is included in the operating earnings of the applicable segment. Intersegment net sales and eliminations were not material for any of the periods presented.

Summarized financial information for the Company's reportable segments is presented in the tables that follow for the three months and six months ended June 30, 2001 and July 1, 2000.

	Thre Months I		Six Months Ended

- (M) The Company has recorded liabilities in connection with acquisitions related to employee terminations and other exit costs associated with management's plans to eliminate certain activities of acquired entities. The Company recorded no additional liabilities in the first half or second quarter ended June 30, 2001. As of June 30, 2001, plans for eliminating certain activities have been finalized for all significant acquisitions. Charges to these liabilities for employee termination costs include payroll, payroll taxes and insurance benefits related to severance arrangements and were approximately \$600,000 and \$300,000 for the first half and second quarter ended June 30, 2001, respectively. At June 30, 2001, liabilities in connection with acquisitions related to employee terminations and other exit costs totaled approximately \$900,000.
- (N) The Company provides income taxes on an interim basis based upon the estimated annual effective income tax rate. Based on this method, the following reconciles the federal statutory income tax rate to the estimated effective tax rate of approximately 42.5% and 44.9% in the six months of 2001 and 2000, respectively.

	Six	
	Months	Ended

The Company is a diversified manufacturer of residential and commercial building products, operating within three principal segments: the Residential Building Products Segment, the Air Conditioning and Heating Products Segment, and the Windows, Doors and Siding Products Segment. In the results of operations presented below, Other includes corporate related items, results of insignificant operations and certain income and expenses not allocable to reportable segments. Through its principal segments, the Company manufactures and sells, primarily in the United States, Canada and Europe, a wide variety of products for the residential and commercial construction, manufactured housing, the do-it-yourself ("DIY") and professional remodeling and renovation markets. (As used in this report, the terms "Company" and "Nortek" refer to Nortek, Inc., together with its subsidiaries, unless the context indicates otherwise. Such terms as "Company" and "Nortek" are used for convenience only and are not intended as a precise description of any of the separate corporations, each of which manages its own affairs.)

The Residential Building Products Segment manufactures and distributes built-in products primarily for the residential new construction, DIY and professional remodeling and renovation markets. The principal products sold by the segment include, kitchen range hoods, built-in exhaust fans (such as bath fans and fan, heater and light combination units) and indoor air quality products. The Air Conditioning and Heating Products Segment manufactures and sells heating, ventilating, and air conditioning systems ("HVAC") for custom-designed commercial applications and for residential, light commercial and manufactured structures. The Windows, Doors and Siding Products Segment principally manufactures and distributes vinyl, wood and composite windows, vinyl, wood, steel and composite patio and entry doors, vinyl siding, skirting, soffit and accessories, aluminum trim coil, blocks, vents, shutters, sunrooms, fencing, railing and decking for use in the residential construction, DIY and professional renovation markets.

The Company acquired Eaton-Williams Holdings Limited ("Eaton-Williams") on July 3, 2000 and Senior Air Systems ("SAS") on June 15, 2001. These acquisitions have been accounted for under the purchase method of accounting. Accordingly, the results of Eaton-Williams and SAS, which are part of the Air Conditioning and Heating Products Segment, are included in the Company's consolidated results since the dates of their acquisitions.

The Financial Accounting Standards Board's Emerging Issues Task Force reached final consensus in 2000 with respect to the accounting for shipping and handling fees and costs and the accounting for certain sales incentives. As a result, the Company has reclassified certain amounts among net sales, cost of products sold and selling, general and administrative expenses in accordance with these pronouncements for all periods presented in Management's Discussion and Analysis of the Unaudited Financial Statements. See Note B of the Notes to the unaudited condensed consolidated financial statements (the "Unaudited Financial Statements). These reclassifications did not have any effect on operating earnings, net earnings or net earnings per share for any period.

Net sales decreased approximately \$1,900,000 or approximately 0.3% for the second quarter of 2001, as compared to the second quarter of 2000 (or increased approximately \$800,000 or approximately 0.1% excluding the effect of changes in foreign currency exchange rates) and decreased approximately \$26,200,000 or approximately 2.4% for the first six months of 2001 compared to the first six months of 2000 (or decreased approximately \$20,500,000 or approximately 1.9% excluding the effect of changes in foreign currency exchange rates). The acquisition in July 2000 of Eaton-Williams in the Air Conditioning and Heating Products Segment contributed approximately \$11,500,000 to net sales in the second quarter of 2001 as compared to 2000 and approximately \$24,100,000 to net sales in the first six months of 2001 as compared to 2000. Excluding the effect of this acquisition, consolidated net sales decreased approximately \$13,400,000 or approximately 2.2% for the second quarter of 2001 as compared to the second quarter of 2000 and approximately \$50,300,000 or approximately 4.6% for the first six months of 2001 as compared to the first six months of 2000. Sales levels in the first six months were adversely affected by the general economic slowdown and a prolonged period of cold and wet weather, which hampered building and remodeling activity in the first quarter of In the Residential Building Products Segment, net sales decreased approximately 2001. \$5,200,000 or 3.1% (approximately \$3,100,000 or approximately 1.9% excluding the effect of foreign currency exchange rates) and approximately \$13,900,000 or approximately 4.1% (approximately \$9,600,000 or approximately 2.8% excluding the effect of foreign currency exchange rates), in the second quarter and first six months of 2001, respectively. In the Windows, Doors and Siding Products Segment net sales decreased approximately \$6,200,000 or approximately 2.6% and approximately \$27,200,000 or approximately 6.7% in the second quarter and first six months of 2001 as compared to 2000, respectively. The decline in sales in the Windows, Doors and Siding Products Segment was principally due to lower sales volume of siding and related accessories and certain window and door product lines, predominately occurring in the first quarter, (including the effect of the discontinuance of a line of interior door products) and was partially offset by higher sales prices of siding and related products and increased sales prices of certain window product lines. Excluding the effect of the acquisition of Eaton-Williams, net sales decreased approximately \$700,000, or approximately 0.4%, in the second quarter of 2001 as compared to 2000, and approximately \$4,700,000, or approximately 1.5%, in the first six months of 2001 as compared to 2000, in the Air Conditioning and Heating Products Segment, principally as a result of a decline in sales to customers serving the manufactured housing industry, in line with the overall softness being experienced in this industry, and due to unusually cool weather in the spring season in the United States. It is anticipated that the weakness in the manufactured housing industry will continue throughout 2001 and is expected to continue to have an adverse effect on this Segment's sales as compared to 2000. The decrease in sales in the Air Conditioning and Heating Products Segment was partially offset by increased sales volume of products sold to customers serving the residential site-built and commercial markets.

Cost of products sold, as a percentage of net sales, decreased from approximately 75.8% in the second quarter of 2000 to approximately 74.8% in the second quarter of 2001, and remained unchanged at approximately 75.9% in the first six months of 2001 and 2000. The effect of the acquisition of Eaton-Williams, which has a higher cost of products sold as a percentage of net sales than the overall group of businesses owned prior to the acquisition, was to contribute to the increase in the consolidated percentages of cost of products sold as a percentage of net sales. Included in cost of products sold was approximately \$1,500,000 in the second quarter of 2001 and \$2,200,000 in the first half of 2001 of costs incurred in the start-up of a residential HVAC manufacturing facility and a vinyl fence and decking facility. Excluding the effect of the Eaton-Williams acquisition and the costs incurred in the start-up of facilities in the second guarter and first half of 2001, cost of products sold as a percentage of net sales decreased from approximately 75.8% in the second quarter of 2000 to approximately 74.4% in the second quarter of 2001 and decreased from approximately 75.9% in the first half of 2000 to approximately 75.4% in the first half of 2001. These decreases in the percentages in the second quarter and first half of 2001 principally resulted from cost reduction measures, lower PVC resin costs, improved sales prices of vinyl siding and related products and increased sales prices of certain window product lines in the Windows, Doors and Siding Products Segment, partially offset by the effect of lower sales volume in the Residential Building Products Segment, higher cost levels of commercial HVAC products and lower sales volume to customers serving the manufactured housing industry without a proportionate decrease in costs in the Air Conditioning and Heating Products Segment. Overall, changes in the cost of products sold as a percentage of net sales for one period as compared to another period may reflect a number of factors including changes in the relative mix of products sold, the effect of changes in sales prices, material costs and changes in productivity levels.

Selling, general and administrative expense, net as a percentage of net sales, increased from approximately 13.8% in the second quarter of 2000 to approximately 14.5% in the second quarter of 2001 and from approximately 15.1% in the first six months of 2000 to approximately 15.8% in the first six months of 2001. The effect of the acquisition of Eaton-Williams, which has a higher level of selling, general and administrative expense, net as a percentage of net sales than the overall group of businesses owned prior to the acquisition, was to contribute to the increase in the consolidated percentages of selling, general and administrative expense, net to net sales. Selling, general and administrative expense, net was reduced by approximately \$2,400,000 in the second quarter of 2001 and approximately \$3,200,000 for the first six months of 2001 related to a non-taxable gain from net death benefit insurance proceeds related to life insurance maintained on former managers. Selling, general and administrative expense, net included approximately \$2,200,000 in the second quarter of 2001 and approximately \$3,000,000 in the first six months of 2001 related to the Company's material procurement strategy for which no benefits have been realized. This strategy is expected to result in approximately \$20,000,000 in annualized savings when fully implemented. Selling, general and administrative expense in the second quarter and first six months of 2000 was reduced by approximately \$1,700,000 from the gain on the sale of land. Excluding the effect of the Eaton-Williams acquisition, the net life insurance proceeds, costs related to the Company's material procurement strategy and the sale of land in 2000, selling, general and administrative expense increased from approximately 14.1% in the second

quarter of 2000 to approximately 14.4% in the second quarter of 2001 and increased from approximately 15.2% in the first six months of 2000 to approximately 15.8% in the first six months of 2001. These increases in the percentages are principally as a result of lower sales volume of siding and related products and certain window and door product lines without a proportionate decrease in expense in the Windows, Doors and Siding Products Segment and lower sales volume of HVAC products to customers serving the manufactured housing industry without a proportionate decrease in expense in the Air Conditioning and Heating Products Segment.

Amortization of goodwill and intangible assets, as a percentage of net sales, increased slightly from approximately 0.9% in the second quarter of 2000 to approximately 1.0% in the second quarter of 2001 and from approximately 1.0% in the first six months of 2000 to approximately 1.1% in the first six months of 2001 principally as a result of the acquisition in July, 2000 of Eaton-Williams.

Consolidated operating earnings increased approximately \$1,000,000 from approximately \$57,300,000 in the second quarter of 2000 to approximately \$58,300,000 in the second quarter of 2001 and decreased approximately \$10,200,000 from approximately \$87,100,000 in the first six months of 2000 to approximately \$76,900,000 in the first six months of 2001 as a result of the factors discussed above. The acquisition of Eaton-Williams contributed approximately \$700,000 and \$1,000,000 for the second quarter and first six months of 2001, respectively, to the decrease in operating earnings in the Air Conditioning and Heating Products Segment.

Consolidated operating earnings have been reduced by depreciation and amortization expense (other than amortization of deferred debt expense and debt discount) of approximately \$15,900,000 and \$15,400,000 for the second quarter ended June 30, 2001 and July 1, 2000, respectively, and approximately \$31,600,000 and \$31,000,000 for the first six months ended June 30, 2001 and July 1, 2000, respectively.

Operating earnings decreased approximately \$2,300,000 and \$1,100,000 in the second quarter of 2001 as compared to the second quarter of 2000 in the Residential Building Products Segment and the Air Conditioning and Heating Products Segment, respectively, and increased approximately \$3,100,000 in the Windows, Doors and Siding Products Segment. In the first six months of 2001 operating earnings decreased approximately \$6,600,000 and \$4,700,000 as compared to the first six months of 2000 in the Residential Building Products Segment and the Air Conditioning and Heating Products Segment, respectively, and increased approximately \$1,500,000 in the Windows, Doors and Siding Products Segment. The decrease in the Residential Building Products Segment was principally due, in part, to decreased sales volume without a proportionate decrease in costs and expenses. The decrease in operating earnings in the Air Conditioning and Heating Products Segment, was principally due to a decline in the sales level of products sold to customers serving the manufactured housing industry due to the overall softness being experienced in this industry and costs incurred in the start up of a residential HVAC manufacturing facility as noted above, partially offset by increased earnings from higher sales levels of residential site-built products. The slowdown in the manufactured housing industry is expected to continue to adversely effect this Segment's operating earnings during the

next several quarters as compared to 2000. The increase in operating earnings in the Windows, Doors and Siding Products Segment was principally due to an increase in earnings in vinyl siding and related products, partially offset by the effect of lower sales volume and higher costs and expenses of certain window, door, fencing and other non-siding products.

Operating earnings of foreign operations, consisting primarily of the results of operations of the Company's Canadian and European subsidiaries, were approximately 6.1% and 5.3% of operating earnings (before corporate overhead) in the second quarter of 2001 and 2000, respectively and approximately 5.4% and 5.6% of operating earnings (before corporate overhead) in the first six months of 2001 and 2000, respectively. Sales and earnings derived from international markets are subject to the risks of currency fluctuations.

Interest expense in the second quarter of 2001 increased approximately \$1,400,000 or approximately 5.8% as compared to the second quarter of 2000 and approximately \$2,400,000 or approximately 4.9% in the first six months of 2001 as compared to the first six months of 2000, primarily as a result of duplicative interest expense of approximately \$1,100,000 in the second quarter and first six months of 2001 associated with the redemption of the Company's 9 7/8% Senior Subordinated Notes due 2004. See Note I of the Notes to the Unaudited Financial Statements. The adoption of SFAS No. 133 which resulted in an approximate \$75,000 non-cash charge to interest expense in the second quarter of 2001 and an approximate \$875,000 non-cash charge to interest expense for the first six months of 2001 (see Note D of the Notes to the Unaudited Financial Statements) and increased borrowings associated with plant expansion during the second quarter and first six months ended June 30, 2001 also contributed to the increase in interest expense (see Note G of the Notes to the Unaudited Financial Statements).

Investment income increased approximately \$500,000 or approximately 33.3% and approximately \$800,000 or approximately 23.5% in the second quarter and first six months of 2001, respectively, as compared to the second quarter and first six months of 2000, as a result of additional interest income of approximately \$300,000 earned during the second quarter of 2001 on the funds held in escrow for the redemption of the 9 7/8% Senior Subordinated Notes, due 2004 and due to higher average invested balances.

The provision for income taxes for the second quarter of 2001 was approximately \$14,900,000, as compared to approximately \$15,400,000 for the second quarter of 2000 and approximately \$12,800,000 for the first six months of 2001 compared to approximately \$18,800,000 for the first six months of 2001 compared to approximately \$18,800,000 for the first six months of 2000. The income tax rates differed from the United States Federal statutory rate of 35% principally as a result of non-deductible amortization expense (for tax purposes), non-taxable gain on life insurance policies (for tax purposes), state income tax provisions and the effect of foreign income tax on foreign source income.

In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 141, "Business Combinations" ("SFAS No. 141"). SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. This statement is effective for all business combinations initiated after June 30, 2001.

In July 2001, the FASB issued SFAS No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"). SFAS No. 142 applies to goodwill and intangible assets acquired after June 30, 2001, as well as previously acquired goodwill and intangible assets. Under SFAS No. 142 goodwill, as well as certain other intangible assets, determined to have an infinite life will no longer be amortized, instead these assets will be reviewed for impairment on a periodic basis. SFAS No. 142 is effective beginning January 1, 2002. Management is evaluating the impact that this statement will have on the Company's consolidated financial statements. Goodwill amortization was approximately \$8,300,000 and \$4,100,000 in the first half and second quarter of 2001, respectively, and was approximately \$8,100,000 and \$4,100,000 in the first half and second quarter of 2000, respectively, as determined under accounting principles generally accepted in the United States currently in effect.

Liquidity and Capital Resources

In June 2001, the Company sold \$250,000,000 principal amount of its 9 7/8% Senior Subordinated Notes due 2011 ("9 7/8% Notes") at a slight discount. Net proceeds from the sale of the 9 7/8% Notes, after deducting underwriting commissions and expenses amounted to approximately \$241,800,000. A portion of such proceeds, approximately \$215,000,000 at June 30, 2001 (the "Redemption Fund") was held in escrow and was used to redeem on July 12, 2001, \$204,822,000 principal amount of the Company's 9 7/8% Senior Subordinated Notes due 2004 (the "Redeemed Notes"), and pay approximately \$2,900,000 and \$7,400,000 of redemption premium and accrued interest, respectively. At June 30, 2001, the Redemption Fund was classified as restricted short-term investments in the accompanying unaudited condensed consolidated balance sheet. (See Note I of the Notes to the Unaudited Financial Statements included elsewhere herein.)

The Company is highly leveraged and expects to continue to be highly leveraged for the foreseeable future. After giving effect to the refinancing of the 9 7/8% Senior Subordinated Notes due 2004, ("Redeemed Notes") on July 12, 2001 the Company had consolidated debt at June 30, 2001, of approximately \$1,080,174,000 consisting of (i) \$13,685,000 of short-term borrowings and current maturities of long-term debt, (ii) \$127,290,000 of notes, mortgage notes and other indebtedness, (iii) \$209,402,000 of the 8 7/8% Senior Notes due 2008 ("8 7/8% Notes"), (iv) \$308,203,000 of the 9 1/8% Senior Notes due 2007 ("9 1/8% Notes"), (v) \$174,313,000 of the 9 1/4% Senior Notes due 2007 ("9 1/4% Notes") and (vi) \$247,281,000 of the 9 7/8% Senior Subordinated Notes due 2011 ("9 7/8% Notes"). After giving effect to the refinancing of the Redeemed Notes, the Company had consolidated unrestricted cash, cash equivalents and marketable securities of approximately \$147,600,000 at June 30, 2001 as compared to approximately \$140,550,000 at December 31, 2000 and the Company's debt to equity ratio remained unchanged at approximately 3.7:1 at June 30, 2001 as compared to December 31, 2000.

The Company's ability to pay interest on or to refinance its indebtedness depends on the successful integration of the operations of recent acquisitions and the Company's future performance, which is subject to general economic, financial, competitive, legislative, regulatory and other factors beyond its control. There can be no assurance that the Company will generate

sufficient cash flow from the operation of its subsidiaries or that future financings will be available on acceptable terms or in amounts sufficient to enable the Company to service or refinance its indebtedness, or to make necessary capital expenditures.

The Company has evaluated and expects to continue to evaluate possible acquisition transactions and possible dispositions of certain of its businesses on an ongoing basis and at any given time may be engaged in discussions or negotiations with respect to possible acquisitions or dispositions.

The indentures and other agreements governing the Company and its subsidiaries' indebtedness (including the indentures for the 8 7/8% Notes, the 9 1/8% Notes, the 9 1/4% Notes and the 9 7/8% Notes and a credit agreement for the Ply Gem credit facility) contain restrictive financial and operating covenants including covenants that restrict the ability of the Company and its subsidiaries to complete acquisitions, pay dividends, incur indebtedness, make investments, sell assets and take certain other corporate actions.

The Company expects to meet its cash flow requirements through fiscal 2001 from cash generated from operations, existing cash, cash equivalents and marketable securities, and financings, which may include securitization of accounts receivable and mortgage or capital lease financings.

Unrestricted cash and cash equivalents decreased from approximately \$132,508,000 at December 31, 2000 to approximately \$92,936,000 at June 30, 2001. Marketable securities available for sale increased from approximately \$8,042,000 at December 31, 2000 to approximately \$54,664,000 at June 30, 2001. The Company's investment in marketable securities at June 30, 2001 consisted of commercial paper. The Company has classified as restricted, in the accompanying unaudited condensed consolidated balance sheet, certain investments and marketable securities that are not fully available for use in its operations including the Redemption Fund of approximately \$215,000,000. At June 30, 2001, approximately \$47,964,000 (of which approximately \$7,595,000 is included in current assets) of the Company's cash, investments and marketable securities has been pledged as collateral or are held in pension trusts for insurance, employee benefit and other requirements.

Capital expenditures were approximately \$26,894,000 in the first six months of 2001 compared to approximately \$14,300,000 in the first six months of 2000. Capital expenditures were approximately \$41,334,000 (including capital leases of approximately \$5,701,000), for the year ended December 31, 2000 and are expected to range between approximately \$50,000,000 and \$55,000,000 in 2001.

The Company's Board of Directors has authorized a number of programs to purchase shares of the Company's Common and Special Common Stock. The most recent of these programs was announced on May 4, 2000, and allows the Company to purchase up to 1,000,0000 shares of the Company's Common and Special Common Stock in open market or negotiated transactions, subject to market conditions, cash availability and provisions of the Company's outstanding debt instruments. As of August 3, 2001, the Company has purchased approximately 461,000 shares

of its Common and Special Common Stock under this program for approximately \$9,200,000 and accounted for such share purchases as Treasury Stock.

At August 3, 2001, approximately \$109,000,000 was available for the payment of cash dividends, stock purchases or other restricted payments as defined under the terms of the Company's most restrictive Indenture. (See Note H of the Notes to the Unaudited Financial Statements included elsewhere herein.)

After giving effect to the refinancing of the Redeemed Notes, which occurred on July 12, 2001, the Company's working capital increased from approximately \$362,497,000 at December 31, 2000 to approximately \$414,955,000 at June 30, 2001 and its current ratio remained unchanged at approximately 2.1:1 at June 30, 2001 compared to December 31, 2000. Changes in the components of working capital are impacted by the seasonal nature of demand for the Company's products. (See Inflation, Trends and General Considerations included elsewhere herein.)

Accounts receivable increased approximately \$57,978,000 or approximately 23.1%, between December 31, 2000 and June 30, 2001, while net sales increased approximately \$86,317,000 or approximately 16.8% in the second quarter of 2001 as compared to the fourth quarter of 2000. The rate of change in accounts receivable in certain periods may be different than the rate of change in sales in such periods principally due to the timing of net sales. Increases or decreases in net sales near the end of any period generally result in significant changes in the amount of accounts receivable on the date of the balance sheet at the end of such period, as was the situation on June 30, 2001 as compared to December 31, 2000. The Company has not experienced any significant overall changes in credit terms, collection efforts, credit utilization or delinquency in accounts receivable in 2001.

Inventories increased approximately \$31,005,000 or approximately 13.8%, between December 31, 2000 and June 30, 2001.

Accounts payable increased approximately \$49,234,000 or approximately 31.7%, between December 31, 2000 and June 30, 2001.

Unrestricted cash and cash equivalents decreased approximately \$39,572,000 from December 31, 2000 to June 30, 2001, principally as a result of the following:

	Condensed
	Consolidated
	Cash Flows (*)
Operating Activities	
Cash flow from operations, net	\$ 49,387,000
Increase in accounts receivable, net	(60,623,000)

	<u>\$ (39,572,000)</u>

(*) Prepared from the Company's Condensed Consolidated Statement of Cash Flows for the six months ended June 30, 2001. (See Nortek, Inc. and Subsidiaries Unaudited Condensed Consolidated Financial Statements included elsewhere herein.)

The impact of changes in foreign currency exchange rates on cash was not material and has been included in other, net.

Inflation, Trends and General Considerations

The Company has evaluated and expects to continue to evaluate possible acquisition transactions and the possible dispositions of certain of its businesses on an ongoing basis and at any given time may be engaged in discussions or negotiations with respect to possible acquisitions or dispositions.

The demand for the Company's products is seasonal, particularly in the Northeast and Midwest regions of the United States where inclement weather during the winter months usually reduces the level of building and remodeling activity in both the home improvement and new construction markets. The Company's lower sales levels usually occur during the first and fourth quarters. Since a high percentage of the Company's manufacturing overhead and operating expenses are relatively

fixed throughout the year, operating income and net earnings tend to be lower in quarters with lower sales levels. In addition, the demand for cash to fund the working capital of the Company's subsidiaries is greater from late in the first quarter until early in the fourth quarter.

Market Risk

As discussed more specifically below, the Company is exposed to market risks related to changes in interest rates, foreign currencies and commodity pricing. The Company does not use derivative financial instruments, except on a limited basis, to hedge certain economic exposures. The Company does not enter into derivative financial instruments or other financial instruments for trading purposes.

There have been no significant changes in market risk from the December 31, 2000 disclosures included in the Company's Annual Report on Form 10-K.

A. Interest Rate Risk

The Company is exposed to market risk from changes in interest rates primarily through its investing and borrowing activities. In addition, the Company's ability to finance future acquisition transactions may be impacted if the Company is unable to obtain appropriate financing at acceptable interest rates.

The Company's investing strategy, to manage interest rate exposure, is to invest in short-term, highly liquid investments and marketable securities. Short-term investments primarily consist of money market accounts and corporate commercial paper with original maturities of 90 days or less.

The Company manages its borrowing exposure to changes in interest rates by optimizing the use of fixed rate debt with extended maturities. In addition, the Company has set a substantial portion of its variable rate debt by entering into an interest rate collar transaction to lock in the interest rate between a floor of 5.76% and a cap of 7%.

B. Foreign Currency Risk

The Company's results of operations are affected by fluctuations in the value of the U.S. dollar as compared to the value of currencies in foreign markets primarily related to changes in the Italian Lira, British Pound and the Canadian Dollar. In the first half and second quarter of 2001, the net impact of foreign currency changes related to transactions was not material to the Company's financial condition or results of operations. The impact of foreign currency changes related to translation resulted in an increase in stockholders' investment of approximately \$1,202,000 in the second quarter of 2001 and a decrease in stockholders' investment of approximately \$3,306,000 in the first six months of 2001. The Company manages its exposure to foreign currency exchange risk principally by trying to minimize the Company's net investment in foreign assets through the use of strategic short and long-term borrowings at the foreign subsidiary level. The Company generally does not enter into derivative financial instruments to manage foreign currency exposure. At June 30, 2001, the Company did not have any outstanding foreign currency hedging contracts.

C. Commodity Pricing Risk

The Company is subject to significant market risk with respect to the pricing of its principal raw materials, which include, among others, steel, copper, packaging material, plastics, resins, glass, wood and aluminum. If prices of these raw materials were to increase dramatically, the Company may not be able to pass such increases on to its customers and, as a result, gross margins could decline significantly. The Company manages its exposure to commodity pricing risk by continuing to diversify its product mix, strategic buying programs and vendor partnering. The Company generally does not enter into derivative financial instruments to manage commodity-pricing exposure. At June 30, 2001, the Company did not have any outstanding commodity forward contracts.

Forward-Looking Statements

This document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this discussion and throughout this document, words, such as "intends," "plans," "estimates," "believes," "anticipates" and "expects" or similar expressions are intended to identify forward-looking statements. These statements are based on the Company's current plans and expectations and involve risks and uncertainties, over which the Company has no control, that could cause actual future activities and results of operations to be materially different from those set forth in the forward-looking statements. Important factors that could cause actual future activities and operating results to differ include the availability and cost of certain raw materials, (including, among others, steel, copper, packaging materials, plastics resins, glass, wood and aluminum) and purchased components, the level of domestic and foreign construction and remodeling activity affecting residential and commercial markets, interest rates, employment, inflation, currency translation, consumer spending levels, operating in international economies, the rate of sales growth, price, and product and warranty liability claims. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no obligation to update publicly any forwardlooking statements, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by these cautionary statements. Readers are also urged to carefully review and consider the various disclosures made by the Company, in this document, as well as the Company's periodic reports on Forms 10-K, 10-Q and 8-K, filed with the Securities and Exchange Commission.

PART II. OTHER INFORMATION

Item 4. <u>Submission of Matters to a Vote of Security Holders</u>

At the Annual Meeting of Stockholders held on May 3, 2001 the following actions were taken by the following votes:

Proposal 1: Election of Director
