Forward-Looking Statements

This presentation includes certain statements that may be deemed to be “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than historical financial information, may be deemed to be forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. Investors should carefully consider the risk factors and other information set forth in the Company’s Form 10-K in connection with an investment in the shares of the Company’s Common Stock. Important factors that could cause actual results to differ materially from those in the forward-looking statements herein include, but are not limited to, the timing and extent of changes in commodity prices for gas and oil, the timing and extent of the Company’s success in discovering, developing, producing, and estimating reserves, property acquisition or divestiture activities that may occur, the effects of weather and regulation on the Company’s gas distribution segment, increased competition, legal and economic factors, governmental regulation, the financial impact of accounting regulations and critical accounting policies, changing market conditions, the comparative cost of alternative fuels, conditions in capital markets and changes in interest rates, availability of oil field services, drilling rigs, and other equipment, as well as other factors beyond the Company’s control, and any other factors listed in the reports the Company has filed or may file with the SEC, which are incorporated by reference.

About Southwestern

- Focused on domestic production of natural gas.
 - ▶ 415.3 Bcfe of reserves; 90% natural gas; 10.4 R/P.
- Strategy built on organic growth through the drillbit.
 - ▶ Low-risk development balanced with high-potential exploration.
- Track record of adding significant reserves at low costs.
 - ▶ Since 1999, we've averaged production growth of 7% per year, 197% reserve replacement, F&D cost of \$1.07 per Mcfe.
- Recent successful follow-on equity offering to accelerate development drilling at Overton Field.
- Strategy built on the Formula:

$$\frac{R^2}{A} \rightarrow V^+$$

The **Right People** doing the **Right Things**, wisely investing the cash flow from the underlying **Assets** will create **Value +**.

Forward-Looking Statement

Gas Hedges in Place Through 2004

Note: Southwestern has approximately 340,000 barrels of oil hedged at a fixed WTI price of \$26.58 per barrel in 2003.

Summary of Follow-On Offering

- Captures Overton value in a high commodity price environment.
 - ▶ PVI = 1.9 @ \$4.00 gas price.
- Accelerates production and reserve growth.
- Improves balance sheet and financial flexibility.
 - ▶ Debt-to-capital ratio improves to 48.6% (pro forma) from 65.9% at 12/31/02.
- Improves liquidity - 42 new institutional holders added.
