Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Summary of Accounting Policies

General Anadarko Petroleum Corporation is engaged in the exploration, development, production and marketing of natural gas, crude oil, condensate and natural gas liquids (NGLs). The terms "Anadarko" and "Company" refer to Anadarko Petroleum Corporation and its subsidiaries. The principal subsidiaries of Anadarko are: RME Petroleum Company; Anadarko Canada Corporation; and, Anadarko Algeria Company LLC. Certain amounts for the prior year have been reclassified to conform to the current presentation.

Change in Accounting Principles In 2001, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities", as amended, which provides guidance for accounting for derivative instruments and hedging activities. The change was effective January 2001 and the related adjustment to net income was a decrease of \$8 million (\$5 million after taxes, or \$0.02 per share) and the adjustment to accumulated other comprehensive income was a decrease of \$8 million (\$5 million after taxes).

During 2000, the Company changed its method of accounting for the carrying value of foreign crude oil inventories from market to cost. This change was made as a result of a change in position on the carrying value of inventories communicated by the Securities and Exchange Commission (SEC). The change was effective January 2000 and the related adjustment to foreign crude oil inventories was a decrease of \$19 million (\$17 million after taxes, or \$0.10 per share). The three and nine months ended September 30, 2000 results have been restated to reflect this accounting change.

Derivative Financial Instruments In 2001, derivative financial instruments utilized to manage or reduce commodity price risk related to the Company's equity production are accounted for under the provisions of SFAS No. 133. Under this statement, all derivatives are carried on the balance sheet at fair value. Realized gains/losses and option premiums are recognized in the statement of income when the underlying physical gas and oil production is sold. Accordingly, realized derivative gains/losses are generally offset by similar changes in the realized prices of the underlying physical gas and oil production. Realized derivative gains/losses are reflected in the average sales price of the physical gas and oil production.

Accounting for unrealized gains/losses is dependent on whether the derivative financial instruments have been designated and qualify as part of a hedging relationship. Derivative financial instruments may be designated as a hedge of exposure to changes in fair values, cash flows, or foreign currencies, if certain conditions are met. If the hedged exposure is a fair value exposure, the gains/losses on the derivative financial instrument, as well as the offsetting losses/gains on the hedged item, are recognized currently in earnings. Consequently, if gains/losses on the derivative financial instrument and the related hedge item do not completely offset, the difference (i.e., ineffective portion of the hedge) is recognized currently in earnings. If the hedged exposure is a cash flow exposure, the effective portion of the gains/losses on the derivative financial instrument is reported as a component of accumulated other comprehensive income and reclassified into earnings in the same period or periods during which the hedged forecasted transaction affects earnings. The ineffective portion of the gains/losses from the derivative financial instrument, if any, as well as any amounts excluded from the assessment of the cash flow hedges' effectiveness are recognized currently in other (income) expense. Effective July 2001, the Company implemented Derivatives Implementation Group (DIG) Issue G20, "Cash Flow Hedges: Assessing and Measuring the Effectiveness of a Purchased Option Used in a Cash Flow Hedge", which provides guidance for assessing the effectiveness on total changes in an option's cash flows rather than only on changes in the option's intrinsic value. Implementation of this DIG issue will reduce earnings volatility since it allows the Company to account for changes in the time value of its purchased options and costless collars as effective when hedging forecasted cash flows. Time value changes were previously being recognized in current earnings since the Company excluded time value changes from its assessment of hedge effectiveness. If the hedged exposure is a foreign currency exposure, the accounting is similar to the accounting for fair value and cash flow hedges. Unrealized gains/losses on derivative financial instruments that do not meet the conditions to qualify for hedge accounting are recognized currently in earnings.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Summary of Accounting Policies (continued)

Derivative financial instruments utilized in the Company's energy trading activities and in the management of price risk associated with the Company's firm transportation keep-whole commitment are accounted for under the mark-to-market accounting method pursuant to Emerging Issues Task Force Issue 98-10, "Accounting for Contracts Involved in Energy Trading and Risk Management Activities". Under this method, the derivatives are revalued in each accounting period and premium receipts/payments and unrealized gains/losses are recorded in the statement of income and carried as assets or liabilities on the balance sheet.

Realized gains and losses resulting from the Company's interest rate swap agreements are included in interest expense on a current basis. The swap agreements effectively convert a portion of the Company's fixed interest rate debt to variable interest rate debt. The Company's interest rate swap agreements in place at December 31, 2000 do not qualify for hedge accounting. Therefore, unrealized gains/losses are recognized currently in earnings and are reflected in other (income) expense. At September 30, 2001, the Company did not have any outstanding interest rate swaps.

New Accounting Principles In July 2001, the Financial Accounting Standards Board issued SFAS No. 141, "Business Combinations," SFAS No. 142, "Goodwill and Other Intangible Assets" and SFAS No. 143, "Accounting for Asset Retirement Obligations". SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated or completed after June 2001. SFAS No. 141 also specifies criteria that intangible assets acquired in a purchase method business combination must meet to be recognized and reported apart from goodwill. The adoption of SFAS No. 141 as of July 2001 had no impact on the Company's financial statements.

SFAS No. 142 requires that goodwill no longer be amortized, but instead tested for impairment at least annually in accordance with the provisions of SFAS No. 142. Any goodwill and any intangible asset determined to have an indefinite useful life that are acquired in a purchase business combination completed after June 2001 will not be amortized, but will be evaluated for impairment in accordance with the appropriate existing accounting literature. Goodwill and intangible assets acquired in business combinations completed before July 2001 will continue to be amortized prior to the adoption of SFAS No. 142. Implementation of SFAS No. 142 is required as of January 2002. Because of the extensive effort needed to comply with adopting SFAS No. 142, the impact of adoption on the Company's financial statements has not been determined, including whether any transitional impairment losses will be required to be recognized as the effect of a change in accounting principle. As of January 2002, the Company expects to have unamortized goodwill in the amount of \$1.4 billion, which will be subject to the transition provisions of SFAS No. 142. Amortization expense related to goodwill was \$57 million and \$31 million for the nine months ended September 30, 2001 and the year ended December 31, 2000, respectively.

SFAS No. 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred and a corresponding increase in the carrying amount of the related long-lived asset and will be effective for the Company in January 2003. The Company is evaluating the impact of SFAS No. 143.

In August 2001, SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" was issued addressing financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 requires that one accounting model be used for long-lived assets to be disposed of by sale, whether previously held and used or newly acquired, and broadens the presentation of discontinued operations to include more disposal transactions. Implementation will be effective for the Company in January 2002. The Company is evaluating the impact of SFAS No. 144.

2. Merger and Acquisitions On July 14, 2000, the Company merged with Union Pacific Resources Group Inc., subsequently renamed RME Holding Company (RME). Each share of common stock of RME issued and outstanding was converted into 0.455 shares of Anadarko common stock. The merger was treated as a tax-free reorganization and

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

2. Merger and Acquisitions (continued)

accounted for as a purchase business combination under generally accepted accounting principles. Under this method of accounting, the Company's historical operating results for periods prior to the merger are the same as Anadarko's historical operating results. At the date of the merger, the assets and liabilities of Anadarko remain based upon their historical costs and the assets and liabilities of RME were recorded at their estimated fair market values. As of September 30, 2001 a total purchase price of \$4.3 billion had been allocated to assets and liabilities.

Merger costs of \$9 million and \$33 million for the three and nine months ended September 30, 2001, respectively, were expensed related to the RME merger. For the three and nine months ended September 30, 2000, merger costs of \$64 million were expensed related to the RME merger. These merger costs relate primarily to the issuance of stock for retention of employees, deferred compensation, transition, integration, hiring and relocation costs, vesting of restricted stock and stock options and retention bonuses.

The pro forma results for 2000 are a result of combining the three and nine months income statements of Anadarko with the three and nine months income statements of RME adjusted for 1) certain costs that RME had expensed under the successful efforts method of accounting that are capitalized under the full cost method of accounting; 2) depreciation, depletion and amortization (DD&A) expense of RME calculated in accordance with the full cost method of accounting applied to the adjusted basis of the properties acquired using the purchase method of accounting; 3) decreases to interest expense for the capitalization of interest on significant investments in unevaluated properties and major development projects and partly offset by the revaluation of RME debt under the purchase method of accounting, including the elimination of historical debt issuance amortization costs; 4) issuance of Anadarko common stock and stock options pursuant to the merger agreement; and 5) the related income tax effects of these adjustments based on the applicable statutory tax rates. It should be noted that the pro forma results do not include any merger expenses.

The following table presents the unaudited pro forma results of the Company as though the merger had occurred on January 1, 2000. Pro forma results are not necessarily indicative of actual results.

<i>millions except per share amounts</i>	Three Months Ended September 30, 2000	Nine Months Ended September 30, 2000
Revenues	\$ 1,925	\$ 5,034
Net income available to common stockholders before cumulative effect of change in accounting principle	\$ 273	\$ 635
Earnings per share - basic	\$ 1.11	\$ 2.61
Earnings per share - diluted	\$ 1.07	\$ 2.53

On March 16, 2001, Anadarko acquired Canadian based Berkley Petroleum Corp. (Berkley) for C\$11.40 per share for an aggregate equity value of US\$779 million plus the assumption of US\$236 million of debt. Merger costs of \$3 million were expensed for the nine months ended September 30, 2001 related to the Berkley acquisition.

3. Inventories The major classes of inventories, which are included in other current assets, are as follows:

<i>millions</i>	September 30, 2001	December 31, 2000
Materials and supplies	\$ 45	\$ 44
Crude oil	20	20
Natural gas	20	15
Total	\$ 85	\$ 79

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

4. Properties and Equipment Oil and gas properties include costs of \$3.6 billion and \$2.9 billion at September 30, 2001 and December 31, 2000, respectively, which were excluded from capitalized costs being amortized. These amounts represent costs associated with unevaluated properties and major development projects.

The Company limits, on a country-by-country basis, the capitalized costs of proved oil and gas properties, net of accumulated DD&A and deferred income taxes, to the estimated future net cash flows from proved oil and gas reserves generally based on period end prices discounted at 10%, net of related tax effects, plus the cost of unevaluated properties and major development projects excluded from the costs being amortized. If capitalized costs exceed this limit, the excess is charged to expense.

As a result of low natural gas prices and unusually high differentials for heavy oil at September 30, 2001, Anadarko's capitalized costs of certain countries' international oil and gas properties, primarily Canadian properties, exceeded the ceiling limitation and the Company recorded an \$827 million (\$483 million after taxes) non-cash write-down in the third quarter of 2001. The pre-tax write-down is reflected as additional accumulated DD&A in the accompanying balance sheet.

5. Debt A summary of debt follows:

<i>millions</i>	September 30, 2001	December 31, 2000

ANADARKO PETROLEUM CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

5. Debt (continued)

At September 30, 2001, \$859 million of notes, debentures and securities mature or may be put to Anadarko within the next twelve months. In accordance with SFAS No. 6, "Classification of Short-term Obligations Expected to be Refinanced", \$750 million of this amount is classified as long-term debt, under the terms of Anadarko's Bank Credit Agreements. The remaining \$109 million is classified as short-term debt. At December 31, 2000, notes payable to banks were classified as long-term debt in accordance with SFAS No. 6, under the terms of Anadarko's Bank Credit Agreements.

In February 2001, Anadarko, Anadarko Capital Trust I, Anadarko Capital Trust II and Anadarko Capital Trust III filed a shelf registration statement with the SEC that permits the issuance of up to \$1 billion in debt securities, preferred stock, depository shares, common stock, warrants, purchase price adjustments and purchase units. In addition, the Trusts may issue preferred securities. Net proceeds, terms and pricing of the offerings of securities issued under the shelf registration statement will be determined at the time of the offerings.

In March 2001, Anadarko issued \$650 million of ZYP-CODES due 2021 to qualified institutional buyers under Rule 144A and non-U.S. persons under Regulation S. The debt securities were priced with a zero coupon, zero yield to maturity and a conversion premium of 38%. The proceeds from the debt securities were used initially to finance costs associated with the acquisition of Berkley. Holders of the ZYP-CODES may require Anadarko to purchase all or a portion of their ZYP-CODES on March 13th of 2002, 2004, 2006, 2011, or 2016, at \$1,000 per ZYP-CODES. Anadarko will pay the purchase price in cash, except that with respect to the ZYP-CODES that may be put to Anadarko for purchase on March 13, 2002, Anadarko may choose to pay the purchase price for those ZYP-CODES in cash, common stock or a combination of cash and common stock.

In April 2001, Anadarko Finance Company, a wholly owned finance subsidiary of Anadarko, issued \$1.3 billion in notes as part of the Company's financial restructuring plan following the Berkley acquisition. This issuance was made up of \$400 million of 6 3/4% Notes due 2011 and \$900 million of 7 1/2% Notes due 2031. In May 2001, Anadarko Finance Company issued an additional \$550 million of 6 3/4% Notes due 2011, bringing the 6 3/4% Notes to an aggregate total of \$950 million. The notes are fully and unconditionally guaranteed by Anadarko. The notes were issued as part of an exchange of securities for other Anadarko debt and preferred stock. The intercompany debt resulting from these transactions is of a long-term investment nature; therefore, foreign currency translation gains and losses are recorded as a component of accumulated other comprehensive income.

In October 2001, the Company entered into a Revolving Credit Agreement and a 364-Day Revolving Credit Agreement. Each agreement provides for \$225 million principal amount and expires in 2004 and 2002, respectively. In October 2001, Anadarko Canada Corporation, a wholly owned subsidiary of Anadarko, entered into a 364-Day Canadian Credit Agreement. The agreement provides for US\$300 million principal amount and expires in 2002. The agreement is fully and unconditionally guaranteed by Anadarko.

6. Financial Instruments The Company is exposed to price risk from changing commodity prices. Management believes it is prudent to minimize the variability in cash flows on a portion of its production. To meet this objective, the Company enters into various types of commodity derivative financial instruments to manage fluctuations in cash flows resulting from changing commodity prices. These instruments may include futures, swaps and options.

Anadarko also enters into commodity derivative financial instruments (options, futures and swaps) for trading purposes with the objective of generating profits on or from exposure to shifts or changes in the market price of natural gas and crude oil. Commodity derivative financial instruments also provide methods to meet customers' pricing requirements while achieving a price structure consistent with the Company's overall pricing strategy. In addition, the Company had swap agreements in place to lock in mark-to-market gains of its firm transportation keep-whole commitment with Duke Energy Field Services, Inc.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

6. Financial Instruments (continued)

Cash Flow Hedges At September 30, 2001, the Company had option and swap contracts in place to fix floor and/or ceiling prices on a portion of expected future sales of equity gas and oil production. The Company has option contracts to hedge its exposure to the variability in future cash flows associated with sales of equity oil production that extend through December 2002 and associated with sales of gas production that extend through December 2005. Swap agreements to hedge the Company's exposure to the variability in future cash flows associated with sales of equity oil production extend through December 2002. Other income for the three and nine months ended September 30, 2001, includes \$1 million net losses and \$26 million net gains, respectively, primarily due to the change in the time value of the option contracts that was excluded from the assessment of hedge effectiveness. Approximately \$20 million of net gains in the accumulated other comprehensive income balance as of September 30, 2001 is expected to be reclassified into gas and oil sales during the remainder of 2001.

Fair Value Hedge The Company also had a swap agreement in place to convert a gas contract from a fixed price to a market sensitive price. Operating income for the three months ended September 30, 2001 includes \$1 million of net gains. This amount represents the ineffective portion of this swap agreement.

Interest Rate Swaps In 1999, Anadarko entered into a 29.5 year swap agreement with a notional value of \$200 million whereby the Company received a fixed interest rate and paid a floating interest rate indexed to the 3-month London Interbank Offered Rate (LIBOR). The swap agreement was cancelled in March 2001 at no cost to the Company. During 1996, Anadarko entered into a 10-year swap agreement with a notional value of \$100 million whereby the Company received a fixed interest rate and paid a floating interest rate indexed to the 3-month LIBOR. This agreement was terminated in April 2001 at no cost to the Company. These agreements were entered into to offset a portion of the effect of the Company's fixed rate long-term debt.

7. Preferred Stock For the first, second and third quarters of 2001 and 2000, dividends of \$13.65 per share (equivalent to \$1.365 per Depositary Share) were paid to holders of preferred stock. In April 2001, Anadarko repurchased \$85 million of preferred stock as part of the exchange of securities under the restructuring plan discussed in [Note 5](#). In July 2001, Anadarko repurchased \$4 million of preferred stock.

8. Common Stock Under the most restrictive provisions of the Company's credit agreements, retained earnings were not restricted as to the payment of dividends at September 30, 2001 and December 31, 2000.

In October 2001, the Board of Directors of Anadarko increased the quarterly dividend on the Company's common stock. An increase from 5 cents to 7.5 cents per share was declared and is payable in the fourth quarter of 2001.

The Company's basic earnings per share (EPS) amounts have been computed based on the average number of common shares outstanding. Diluted EPS amounts include the effect of the Company's outstanding stock options under the treasury stock method and the net effect of the assumed conversion of the convertible debentures and ZYP-CODES.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

8. Common Stock (continued)

The reconciliation between basic and diluted EPS is as follows:

<i>millions except per share amounts</i>	Three Months Ended September 30, 2001			Three Months Ended September 30, 2000		
	<u>Loss</u>	<u>Shares</u>	<u>Per Share Amount</u>	<u>Income</u>	<u>Shares</u>	<u>Per Share Amount</u>
Basic EPS						
Net income (loss) available to common stockholders before change in accounting principle	\$ (270)	250	\$ (1.08)	\$ 247	230	\$ 1.07
Effect of convertible debentures and ZYP-CODES	--	--		2	8	
Effect of dilutive stock options and performance-based stock awards	<u>--</u>	<u>--</u>		<u>--</u>	<u>3</u>	
Diluted EPS						
Net income (loss) available to common stockholders plus assumed conversion	\$ (270)	250	\$ (1.08)	\$ 249	241	\$ 1.03
	Nine Months Ended September 30, 2001			Nine Months Ended September 30, 2000		
	<u>Income</u>	<u>Shares</u>	<u>Per Share Amount</u>	<u>Income</u>	<u>Shares</u>	<u>Per Share Amount</u>
Basic EPS						
Net income available to common stockholders before change in accounting principle	\$ 792	250	\$ 3.16	\$ 359	162	\$ 2.21
Effect of convertible debentures and ZYP-CODES	6	13		4	6	
Effect of dilutive stock options and performance-based stock awards	<u>--</u>	<u>3</u>		<u>--</u>	<u>2</u>	
Diluted EPS						
Net income available to common stockholders plus assumed conversion	\$ 798	266	\$ 3.00	\$ 363	170	\$ 2.13

For the three and nine months ended September 30, 2001, options for 0.9 million shares of common stock and 3 million put options were excluded from the diluted EPS calculation because their exercise price was greater than the average market price of common stock for the period. For the three months ended September 30, 2001, there were 16.7 million potential common shares related to outstanding stock options and convertible debentures and ZYP-CODES that were excluded from the computation of diluted EPS since they had an anti-dilutive effect. For the three and nine months ended September 30, 2000, options for 0.7 million shares of common stock were excluded from the diluted EPS calculation because their exercise price was greater than the average market price of common stock for the period.

In July 2001, the Board of Directors authorized the Company to purchase as much as \$1 billion in shares of Anadarko common stock. The share purchases may be made from time to time, depending on market conditions. Shares may be purchased either in the open market or through privately negotiated transactions. The repurchase program does not obligate Anadarko to acquire any specific number of shares and may be discontinued at any time. During the third quarter of 2001, the Company repurchased 2.2 million shares of common stock for \$116 million.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

8. Common Stock (continued)

To enhance the share repurchase program, Anadarko has sold put options to independent third parties. These put options entitle the holder to sell shares of Anadarko common stock to the Company on certain dates at specified prices. Through September 2001, Anadarko has written a series of put options for the purchase of a total of 5 million shares of Anadarko common stock with a notional amount of about \$240 million. Put options for 1 million shares were exercised and 1 million shares expired unexercised in the third quarter 2001. Put options for an additional 1 million shares expired unexercised in October 2001. The remaining put options for 2 million shares will expire between January 2002 and March 2002. The outstanding put options permit a net-share settlement at the Company's option and do not result in a put option liability on the consolidated balance sheet. For the nine months ended September 30, 2001, premiums of \$15 million were received related to these put options and recorded as an increase to paid-in capital.

9. Statement of Cash Flows Supplemental Information The amounts of cash paid for interest (net of amounts capitalized) and income taxes are as follows:

<i>millions</i>	Nine Months Ended September 30	
	2001	2000

12. Contingencies

General The Company is a defendant in a number of lawsuits and is involved in governmental proceedings arising in the ordinary course of business, including, but not limited to, royalty claims, contract claims and environmental claims. The Company has also been named as a defendant in various personal injury claims, including numerous claims by employees of third-party contractors alleging exposure to asbestos and benzene while working at a refinery in Corpus Christi, which the Company sold in segments in 1987 and 1989. While the ultimate outcome and impact on the Company cannot be predicted with certainty, management believes that the resolution of these proceedings will not have a material adverse effect on the consolidated financial position of the Company, although results of operations and cash flow could be significantly impacted in the reporting periods in which such matters are resolved. Discussed below are several specific proceedings.

Superfund Presently, six Superfund sites (five Federal and one State) are included in the Superfund Reserve. Liabilities associated with the Superfund sites continue to evolve due to unexpected lawsuits and agency actions.

Operating Industries, Inc. (Federal) - The former municipal industrial landfill (Monterey Park, California) was operational between 1948 and 1984. RME was noticed as a Potentially Responsible Party (PRP) in June 1986 for its Wilmington Production Field's (approximately 50,500 barrels of E&P waste) and Wilmington Refinery's (approximately 23,500 barrels of liquid waste) contributions. The Company believes its share of the costs will be about \$4 million, not including settlement of two pending lawsuits.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

12. Contingencies (continued)

Ekotek (Federal) - The facility (Salt Lake City, Utah) operated as a refinery from 1953 until 1978, at which time it was converted to a hazardous waste storage/treatment and petroleum recycling facility. The Utah Department of Environmental Quality issued multiple Notices of Violation to the facility in 1988, resulting in the facility's closing. Bear Creek Uranium Company, an affiliate, was named as a PRP for its contributions of approximately 117,000 gallons of used/waste oils. Remediation of the Ekotek site is nearing completion and no additional funding requests are expected.

Casmalia (Federal) - The Casmalia facility (Santa Barbara County, California) is a former Resource Conservation and Recovery Act hazardous waste disposal site. RME was noticed as a PRP in March 1993. RME's waste contribution is attributed to the Wilmington Refinery. Environmental Protection Agency (EPA) has recently forwarded a request for payment in the amount of \$22 million to the PRP group for reimbursement of previous remedial expenditures. Negotiations with EPA are ongoing. The Company believes its share of the costs will be about \$100,000.

Geothermal Inc. (State) - The site (Middletown, California) was permitted as a Class II surface impoundment facility for geothermal wastes. Sludge from drilling operations and power plant wastes generated at the Geysers Geothermal Field between 1976 and 1987 were transported to the facility for treatment/disposal. The waste material was placed in evaporation ponds and allowed to dry. The resultant solids were buried onsite. Site remediation began in 1984. Anadarko was noticed as a PRP in December 1993. Several remedial methods are currently being evaluated to determine the most effective for addressing site groundwater impacts. The Company believes its share of the costs will be about \$100,000.

PCB Treatment, Inc. (Federal) - The PCB treatment/disposal site (Kansas City, Kansas and Kansas City, Missouri) operated from 1982 until 1986 when regulatory violations forced its closure. RME was noticed as a PRP in October 1998. Approximately 56,000 pounds of PCB contaminated materials were attributed to Wilmington Refinery operations. PCB impacts are currently limited to the facility structures and surrounding soils. Remedial alternatives are under review. The Company believes its share of the costs will be about \$100,000.

Summitville Mine (Federal) - RME and Cleveland Cliffs Iron Company conducted exploration activities at the site (Summitville, Colorado) between 1967 and 1969. The exploration efforts ceased after the companies determined operations were not commercially viable. Several other companies initiated various exploration efforts at the site until 1984 when Galactic Resources permitted a heap leach gold mine at the site. Galactic filed for bankruptcy in 1992 and EPA implemented a cleanup response in 1993. RME and Cleveland Cliffs negotiated a settlement with EPA regarding Federal liability at the site that excluded claims for natural resource damages. Recently, RME and Cleveland Cliffs reached a settlement with the State of Colorado regarding State liability at the site that includes natural resource damages. This agreement calls for the payment of \$835,000 (RME's share \$417,500). This agreement became final upon entry of the Settlement Agreement and Consent Decree by the United States District Court for the District of Colorado on September 30, 2001. RME fulfilled its obligations in October 2001 by payment of \$417,500 to the State of Colorado.

Royalty Litigation During September of 2000, the Company was named as a defendant in a case styled *U.S. of America ex rel. Harold E. Wright v. AGIP Company, et al.* (the "Gas Qui Tam case") filed in the U.S. District Court for the Eastern District of Texas, Lufkin Division. This lawsuit generally alleges that the Company and 118 other defendants improperly measured and otherwise undervalued natural gas in connection with a payment of royalties on production from federal and Indian lands. The case has been transferred to the U.S. District Court, Multi-District Litigation Docket pending in Wyoming. Based on the Company's present understanding of the various governmental and False Claims Act proceedings described above, the Company believes that it has substantial defenses to these claims and intends to vigorously assert such defenses. However, if the Company is found to have violated the Civil False Claims Act, the Company could be subject to a variety of sanctions, including treble damages and substantial monetary fines.

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

12. Contingencies (continued)

A group of royalty owners purporting to represent RME's gas royalty owners in Texas (*Neinast, et al.*) was granted class action certification in December 1999, by the 21st Judicial District Court of Washington County, Texas, in connection with a gas royalty underpayment case against the Company. This certification did not constitute a review by the Court of the merits of the claims being asserted. The royalty owners' pleadings did not specify the damages being claimed, although most recently a demand for damages in the amount of \$100 million has been asserted. The Company is of the opinion that the amount of damages at risk is substantially less than the amount demanded by the class action counsel and the Company intends to vigorously assert its defenses. The Company appealed the class certification order. In September 2001, a favorable decision from the Houston Court of Appeals decertifying the class was rendered. It is anticipated that the royalty owners will now appeal this matter to the Texas Supreme Court.

A class action lawsuit entitled *Gilbert H. Coulter, et al. v. Anadarko Petroleum Corporation* has been certified in the 26th Judicial District Court, Stevens County, Kansas. In this action, the royalty owners contend that royalty was underpaid as a result of the deduction for certain post-production costs in the calculation of royalty. The Company believes that its method of calculating royalty was proper and that its gas was marketable in the condition produced, and thus plaintiffs' claims are without merit. This case was certified as a class action in August 2000. This matter is set for trial in February 2002.

CITGO Litigation CITGO Petroleum Corporation's claims arise out of an Asset Purchase and Contribution Agreement dated March 17, 1987 whereby RME's predecessor sold a refinery located in Corpus Christi to CITGO's predecessor. After the sale of the refinery, numerous individuals living near the refinery sued CITGO (the "Neighborhood Litigation") thereby implicating the Asset Purchase and Contribution Agreement indemnity provision. CITGO and RME eventually entered into a settlement agreement ("the 1995 Settlement Agreement") to allocate, on an interim basis, each parties' liability for defense and liability cost in that and related litigation. That agreement provides that once the Neighborhood Litigation and certain related claims are resolved, then the parties will determine their final indemnity obligations to each other through binding arbitration. At the present time, RME and CITGO have agreed to defer arbitrating the allocation of responsibility for this liability in order to focus their efforts on a global settlement. Arbitration will resume upon request of either CITGO or RME. In conjunction with this matter, RME is suing Continental Insurance for denial of coverage for claims related to this dispute. Negotiations and discussions with CITGO and legal actions against Continental Insurance continue.

Kansas Ad Valorem Tax

General The Natural Gas Policy Act of 1978 allowed a "severance, production or similar" tax to be included as an add-on, over and above the maximum lawful price for natural gas. Based on the Federal Energy Regulatory Commission (FERC) ruling that the Kansas ad valorem tax was such a tax, the Company collected the Kansas ad valorem tax.

Background of PanEnergy Litigation FERC's ruling regarding the ability of producers to collect the Kansas ad valorem tax was appealed to the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit). The Court held in June 1988 that FERC failed to provide a reasoned basis for its findings and remanded the case to FERC.

Ultimately, the D.C. Circuit issued a decision on August 2, 1996 ruling that producers must refund all Kansas ad valorem taxes collected relating to production since October 1983. The Company filed a petition for writ of certiorari with the Supreme Court. That petition was denied on May 12, 1997.

PanEnergy Litigation On May 13, 1997, the Company filed a lawsuit in the Federal District Court for the Southern District of Texas against PanEnergy seeking declaration that pursuant to prior agreements Anadarko is not required to issue refunds to PanEnergy for the principal amount of \$14 million (before taxes) and, if the petition for adjustment is denied in its entirety by FERC with respect to PanEnergy refunds, interest in an amount of \$38 million (before taxes) as of September 30, 2001. The Company also sought from PanEnergy the return of the \$1 million (before taxes) charged

Item 1. Financial Statements (continued)

ANADARKO PETROLEUM CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

12. Contingencies (continued)

against income in 1993 and 1994. In October 2000, the U.S. Magistrate issued recommendations concerning motions for summary judgment previously filed by both parties. In essence, the Magistrate's recommendation finds that the Company should be responsible for refunds attributable to the time period following August 1, 1985 while Duke Energy (as the successor company to Anadarko Production Company) should be responsible for refunds attributable to the time period before August 1, 1985.

The Company has reached a settlement agreement with PanEnergy that requires the Company to pay \$15 million for settlement in full of all matters relating to the refunds of Kansas ad valorem tax reimbursements collected by the Company as first seller from August 1, 1985 through 1988. The settlement agreement was approved by the FERC during the third quarter 2001. The settlement agreement does not have any impact on the outstanding dispute between the Company and PanEnergy in connection with the refunds that relate to the Cimmaron River System. Anadarko's net income for the nine months ended September 30, 2001, included a \$15 million charge (before taxes) related to the settlement agreement.

Other Litigation Anadarko's net income for 1997 included a \$2 million charge (before taxes) related to the Kansas ad valorem tax refunds. This charge reflects all principal and interest which may be due at the conclusion of all regulatory proceedings and litigation to parties other than PanEnergy. The Company is currently unable to predict the final outcome of this matter and no additional provision for liability has been made in the accompanying financial statements.

Other Contingencies In conjunction with the sale of properties, the Company has indemnified a purchaser for the use of certain losses that are currently being evaluated. The Company is unable to confirm that it will not be called upon to make a payment under the indemnity. Therefore, the Company accrued \$20 million for this contingency.

13. The information, as furnished herein, reflects all normal recurring adjustments that are, in the opinion of management, necessary to a fair statement of financial position as of September 30, 2001 and December 31, 2000, the results of operations for the three and nine months ended September 30, 2001 and 2000 and cash flows for the nine months ended September 30, 2001 and 2000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company has made in this report, and may from time to time otherwise make in other public filings, press releases and discussions with Company management, forward looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 concerning the Company's operations, economic performance and financial condition. These forward looking statements include information concerning future production and reserves, schedules, plans, timing of development, contributions from oil and gas properties, and those statements preceded by, followed by or that otherwise include the words "believes", "expects", "anticipates", "intends", "estimates", "projects", "target", "goal", "plans", "objective", "should" or similar expressions or variations on such expressions. For such statements, the Company claims the protection of the safe harbor for forward looking statements contained in the Private Securities Litigation Reform Act of 1995. Such statements are subject to various risks and uncertainties, and actual results could differ materially from those expressed or implied by such statements due to a number of factors in addition to those discussed elsewhere in this Form 10-Q and in the Company's other public filings, press releases and discussions with Company management. Anadarko undertakes no obligation to publicly update or revise any forward-looking statements. See Additional Factors Affecting Business in the Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's 2000 Annual Report on Form 10-K.

Net income (loss) available to common stockholders	\$ (270)	\$ 247	\$ 787	\$ 342
Per share - basic	\$ (1.08)	\$ 1.07	\$ 3.14	\$ 2.10
Per share - diluted	\$ (1.08)	\$ 1.03	\$ 2.98	\$ 2.03

Net Income (Loss) Anadarko's net loss available to common stockholders in the third quarter of 2001 totaled \$270 million, or \$1.08 per share (diluted) compared to net income of \$247 million, or \$1.03 per share (diluted) for the third quarter of 2000. The net loss for the third quarter 2001 includes a charge of \$827 million (\$483 million after taxes) for impairments of the carrying value of proved oil and gas properties in Canada and South America as a result of low natural gas prices and unusually high differentials for heavy oil at the end of the quarter. The Company's net income available to common stockholders excluding the impairments was \$213 million, or 81 cents per share (diluted).

For the nine month period ended September 30, 2001, Anadarko's net income available to common stockholders was \$787 million, or \$2.98 per share (diluted). By comparison, for the nine months ended September 30, 2000, Anadarko's net income available to common stockholders was \$342 million, or \$2.03 per share (diluted). Excluding the impairments, Anadarko had net income available to common stockholders of \$1,279 million, or \$4.83 per share (diluted) for the nine months ended September 30, 2001. Anadarko's results for 2001 include the effect of the merger with Union Pacific Resources Group Inc., subsequently renamed RME Holding Company (RME), which closed in July 2000, and the acquisition of Berkley Petroleum Corp. (Berkley), which closed in March 2001.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Revenues

<i>millions</i>	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Gas sales	\$ 509	\$ 527	\$ 2,448	\$ 792
Oil and condensate sales	381	359	1,117	570
Natural gas liquids sales	65	85	209	165
Marketing sales	770	821	3,178	1,592
Minerals and other	18	28	38	30
Total	\$ 1,743	\$ 1,820	\$ 6,990	\$ 3,149

Revenues for the third quarter 2001 decreased 4% to \$1,743 million compared to revenues of \$1,820 million for the same period of 2000. For the nine months ended September 30, 2001, revenues were \$6,990 million, an increase of 122%, compared to \$3,149 million for the same period of 2000. Sales volumes were significantly higher for both periods. These increases were offset by lower prices in the third quarter of 2001.

Analysis of Sales Volumes

Barrels of oil equivalent (MMBOE)	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
United States	37	28	109	50
Canada	8	6	25	6
Algeria	3	2	6	7
Other International	3	4	11	4
Total	51	40	151	67

MMBOE - million barrels of oil equivalent

During the third quarter of 2001, Anadarko sold 51 million barrels of oil equivalent (BOE), up 28% from 40 million BOE in the third quarter of 2000. During the first nine months of 2001, Anadarko sold 151 million BOE, up 125% from 67 million BOE for the same period of 2000. The increased volumes are a result of the merger with RME and the acquisition of Berkley as well as from the Company's operations in the Gulf of Mexico, Alaska and Texas. Anadarko employs marketing strategies to help manage production and sales volumes and mitigate the effect of the price volatility, which is likely to continue in the future. See [Derivative Financial Instruments](#) under Item 3 of this Form 10-Q.

Natural Gas Sales Volumes and Average Wellhead Prices

Natural gas	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000

Bcf - billion cubic feet

Mcf - thousand cubic feet

MMcf/d - million cubic feet per day

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Natural gas sales volumes in the third quarter of 2001 were 1,913 MMcf/d, an increase of 28% over the 1,498 MMcf/d in the same period last year. Natural gas prices at the wellhead averaged \$2.89 per Mcf during the third quarter of 2001 compared to \$3.83 per Mcf in the third quarter of 2000. In the first nine months of 2001, Anadarko's natural gas sales volumes were 1,918 MMcf/d, up 128% from 843 MMcf/d in the same period of 2000. The wellhead price for natural gas in the first nine months of 2001 averaged \$4.68 per Mcf, compared to \$3.43 per Mcf in the same period last year. The increase in gas volumes for both periods are a result of the merger with RME and the acquisition of Berkley as well as from the Company's operations in the Gulf of Mexico and Texas.

Crude Oil and Condensate Sales Volumes and Average Wellhead Prices

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Crude oil and condensate				
United States (MMBbls)	9	5	26	8

Other International (MMBbls)	3	4	11	4
MBbls/d	32	38	39	13
Price per barrel	\$ 14.50	\$ 20.09	\$ 14.69	\$ 20.09
Total (MMBbls)	18	13	52	21
MBbls/d	192	141	190	76
Price per barrel	\$ 21.66	\$ 27.68	\$ 21.54	\$ 27.22

MMBbls - million barrels

MBbls/d - thousand barrels per day

Total sales volumes of crude oil and condensate in the third quarter 2001 were 192 MBbls/d, up 36% from 141 MBbls/d in the third quarter of 2000. Oil prices in the third quarter of 2001 averaged \$21.66 per barrel compared to \$27.68 per barrel in the third quarter last year. Anadarko's sales volumes of crude oil and condensate for the first nine months of 2001 averaged 190 MBbls/d, up 150% from 76 MBbls/d in the comparable 2000 period. Anadarko's average oil price for the first nine months of 2001 was \$21.54 per barrel compared with \$27.22 per barrel in the same period last year. The increase in oil and condensate volumes for both periods are a result of the merger with RME and the acquisition of Berkley as well as the Company's operations in the Gulf of Mexico, Alaska and Texas.

Natural Gas Liquids Sales Volumes and Average Prices

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Natural gas liquids (MMBbls)	4	4	11	8
MBbls/d	48	43	42	29
Price per barrel	\$ 14.79	\$ 21.19	\$ 18.31	\$ 20.81

Sales volumes of natural gas liquids (NGLs) during the third quarter of 2001 were 48 MBbls/d, up 12% from 43 MBbls/d in the third quarter of 2000. Prices during the third quarter of 2001 for Anadarko's NGLs averaged \$14.79 per barrel compared to \$21.19 per barrel in the third quarter last year. Anadarko's NGL volumes during the first nine months of 2001 were 42 MBbls/d, an increase of 45% over the 29 MBbls/d in the same period of 2000. This increase is a result of the merger with RME. The average price per barrel for NGLs for the first nine months of 2001 was \$18.31 per barrel compared with \$20.81 per barrel a year earlier.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**Costs and Expenses**

<i>millions</i>	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Marketing purchases and transportation	\$ 745	\$ 833	\$ 3,109	\$ 1,580
Operating expenses	183	147	533	270
Administrative and general	67	43	180	103
Depreciation, depletion and amortization	305	217	899	336
Other taxes	54	53	203	77
Provision for doubtful accounts	--	23	--	23
Impairments related to international properties	827	--	842	--
Amortization of goodwill	21	11	57	11
Total	\$ <u>2,202</u>	\$ <u>1,327</u>	\$ <u>5,823</u>	\$ <u>2,400</u>

Costs and expenses during the third quarter of 2001 increased 66% compared to the third quarter of 2000. The increase in 2001 is primarily due to:

- 1) Marketing purchases and transportation decreased 11% primarily due to a decrease in natural gas purchase prices.
- 2) Operating expenses, depreciation, depletion and amortization (DD&A) expense and other taxes increased 30% primarily due to the increase in sales volumes.
- 3) Administrative and general expenses increased 56% primarily due to the Company's expanded workforce resulting from the RME merger and higher costs associated with the Company's growing workforce.
- 4) Impairments related to international properties in Canada and South America were \$827 million in 2001.
- 5) Amortization of goodwill increased \$10 million related to the RME merger and the Berkley acquisition.

For the nine month period ended September 30, 2001 costs and expenses increased 143% compared to the same period of 2000. The increase in 2001 is primarily due to:

- 1) Marketing purchases and transportation increased 97% primarily due to an increase in natural gas purchase volumes and prices.
- 2) Operating expenses, DD&A expense and other taxes increased 139% primarily due to the increase in sales volumes.
- 3) Administrative and general expenses increased 75% primarily due to the Company's expanded workforce resulting from the RME merger and higher costs associated with the Company's growing workforce.
- 4) Impairments related to international properties in Canada, South America, the North Atlantic and Ghana were \$842 million in 2001.
- 5) Amortization of goodwill increased \$46 million due to the RME merger and the Berkley acquisition.

Merger Expenses

For the three months ended September 30, 2001, merger costs related to the RME merger decreased 86% to \$9 million compared to \$64 million for the same period of 2000. For the first nine months of 2001, merger costs associated with the RME merger decreased 48% to \$33 million compared to \$64 million for the same period of 2000. These costs relate primarily to transition, integration, hiring and relocation costs, deferred compensation, vesting of restricted stock and stock options and retention bonuses. For the nine months ended September 30, 2001, merger costs of \$3 million were expensed related to the Berkley acquisition.

Interest Expense

<i>millions</i>	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Gross interest expense	\$ 73	\$ 69	\$ 222	\$ 120
Capitalized interest	(55)	(41)	(157)	(51)
Net interest expense	\$ <u>18</u>	\$ <u>28</u>	\$ <u>65</u>	\$ <u>69</u>

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

For the third quarter of 2001, Anadarko's interest expense decreased 36% to \$18 million compared to \$28 million for the third quarter of 2000 primarily due to an increase in capitalized interest. For the first nine months of 2001, interest expense was \$65 million, a decrease of 6% compared to \$69 million for the same period of 2000. The decrease in interest expense in 2001 is primarily due to an increase in capitalized interest, partially offset by higher average levels of debt in 2001 compared to 2000 as a result of the merger and acquisitions.

Other (Income) Expense

<i>millions</i>	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Firm transportation keep-whole contract valuation	\$ (10)	\$ (39)	\$ (108)	\$ (39)
Foreign currency exchange	9	11	26	11
Corporate hedge	1	--	(26)	--
Other	9	(1)	17	(1)
Total	\$ 9	\$ (29)	\$ (91)	\$ (29)

Other expense for the third quarter 2001 increased \$38 million compared to the same period of 2000 due primarily to a decrease of \$29 million related to the effect of lower value for firm transportation subject to a keep-whole agreement. For the nine months ended September 30, 2001, other income increased \$62 million compared to the same period of 2000 due primarily to a \$69 million increase related to the effect of significantly higher value for firm transportation subject to a keep-whole agreement and \$26 million of income related to corporate hedges, partially offset by a \$15 million increase in foreign currency exchange losses.

Income Taxes

<i>millions</i>	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2001	2000	2001	2000
Income taxes	\$ (227)	\$ 180	\$ 359	\$ 278

For the third quarter of 2001, income taxes decreased \$407 million to \$(227) million compared to \$180 million for the third quarter of 2000. The decrease was due primarily to a \$344 million tax benefit related to the impairments of international properties and the slight decrease in earnings excluding the impairments. For the first nine months of 2001, income taxes were \$359 million, an increase of 29% compared to \$278 million for the same period of 2000. The increase is due to the significant increase in earnings, partially offset by a \$350 million tax benefit for impairments of international properties and a decrease in income taxes of \$31 million during 2001 related to a deferred tax adjustment resulting from the 2% decrease in Canada's tax rate.

Capital Expenditures, Liquidity and Dividends

During the first nine months of 2001, Anadarko's capital spending (including capitalized interest and overhead) was \$2,253 million compared to \$977 million for the same period of 2000. This increase is primarily due to a \$628 million increase in development spending and a \$440 million increase in exploration spending. The increase in exploration and development activity is due primarily to the higher level of activity in the U.S. and Canada.

In February 2001, Anadarko, Anadarko Capital Trust I, Anadarko Capital Trust II and Anadarko Capital Trust III filed a shelf registration statement with the Securities and Exchange Commission that permits the issuance of up to \$1 billion in debt securities, preferred stock, depository shares, common stock, warrants, purchase price adjustments and purchase units. In addition, the Trusts may issue preferred securities. Net proceeds, terms and pricing of the offerings of securities issued under the shelf registration statement will be determined at the time of the offerings.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

In March 2001, Anadarko issued \$650 million of Zero Yield Puttable Contingent Debt Securities (ZYP-CODES) due 2021 to qualified institutional buyers under Rule 144A and non-U.S. persons under Regulation S. The debt securities were priced with a zero coupon, zero yield to maturity and a conversion premium of 38%. The proceeds from the debt securities were used initially to finance costs associated with the acquisition of Berkley. Holders of the ZYP-CODES may require Anadarko to purchase all or a portion of their ZYP-CODES on March 13th of 2002, 2004, 2006, 2011, or 2016, at \$1,000 per ZYP-CODES. Anadarko will pay the purchase price in cash, except that with respect to the ZYP-CODES that may be put to Anadarko for purchase on March 13, 2002, Anadarko may choose to pay the purchase price for those ZYP-CODES in cash, common stock or a combination of cash and common stock.

In April 2001, Anadarko Finance Company, a wholly owned finance subsidiary of Anadarko, issued \$1.3 billion in notes as part of the Company's financial restructuring plan following the Berkley acquisition. This issuance was made up of \$400 million of 6 3/4% Notes due 2011 and \$900 million of 7 1/2% Notes due 2031. In May 2001, Anadarko Finance Company issued an additional \$550 million of 6 3/4% Notes due 2011, bringing the 6 3/4% Notes to an aggregate total of \$950 million. The notes are fully and unconditionally guaranteed by Anadarko. The notes were issued as part of an exchange of securities for other Anadarko debt and preferred stock.

In April 2001, Anadarko repurchased \$85 million of preferred stock as part of the exchange of securities discussed above. In July 2001, Anadarko repurchased \$4 million of preferred stock.

In July 2001, the Board of Directors authorized the Company to purchase as much as \$1 billion in shares of Anadarko common stock. The share purchases may be made from time to time, depending on market conditions. Shares may be purchased either in the open market or through privately negotiated transactions. The repurchase program does not obligate Anadarko to acquire any specific number of shares and may be discontinued at any time. During the third quarter of 2001, the Company repurchased 2.2 million shares of common stock for \$116 million.

To enhance the share repurchase program, Anadarko has sold put options to independent third parties. These put options entitle the holder to sell shares of Anadarko common stock to the Company on certain dates at specified prices. Through September 2001, Anadarko has written a series of put options for the purchase of a total of 5 million shares of Anadarko common stock with a notional amount of about \$240 million. Put options for 1 million shares were exercised and 1 million shares expired unexercised in the third quarter 2001. Put options for an additional 1 million shares expired unexercised in October 2001. The remaining put options for 2 million shares will expire between January 2002 and March 2002. The outstanding put options permit a net-share settlement at the Company's option and do not result in a put option liability on the consolidated balance sheet. For the nine months ended September 30, 2001, premiums of \$15 million were received related to these put options and recorded as an increase to paid-in capital.

In October 2001, the Company entered into a Revolving Credit Agreement and a 364-Day Revolving Credit Agreement. Each agreement provides for \$225 million principal amount and expires in 2004 and 2002, respectively. In October 2001, Anadarko Canada Corporation, a wholly owned subsidiary of Anadarko, entered into a 364-Day Canadian Credit Agreement. The agreement provides for US\$300 million principal amount and expires in 2002. The agreement is fully and unconditionally guaranteed by Anadarko.

In October 2001, the Board of Directors of Anadarko increased the quarterly dividend on the Company's common stock. An increase from 5 cents to 7.5 cents per share was declared and is payable in the fourth quarter of 2001.

The Company believes that cash flows and existing or available credit facilities will provide the majority of funds to meet its capital and operating requirements for 2001. The Company will continue to evaluate funding alternatives, including property sales and additional borrowings, to secure other funds for capital development. At this time, Anadarko has no plans to issue common stock other than through its Dividend Reinvestment and Stock Purchase Plan.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Exploration and Development Activities

During the third quarter of 2001, Anadarko participated in a total of 255 wells, including 146 gas wells, 96 oil wells and 13 dry holes. This compares to a total of 276 wells, including 163 gas wells, 91 oil wells and 22 dry holes during the third quarter of 2000.

For the first nine months of 2001, Anadarko participated in a total of 826 wells, including 544 gas wells, 246 oil wells and 36 dry holes. This compares to a total of 492 wells, including 292 gas wells, 170 oil wells and 30 dry holes during the first nine months of 2000.

In response to relatively weak natural gas prices and rising costs since mid-year, Anadarko has slowed the pace of U.S. natural gas development drilling and shifted capital toward high-potential exploratory and oil-prone drilling prospects, as well as to the repurchase of Anadarko common stock. As a result, the Company-operated rig count in North America declined from 94 rigs in July to 74 rigs in October 2001. The reduced drilling activity is expected to result in flat overall oil and gas production volumes in the fourth quarter compared with third quarter 2001 volumes.

Onshore - Lower 48 States

Although reduced, drilling activity continued within Anadarko's key basins, including the Bossier play in east Texas and northwest Louisiana, the Georgetown, Buda and Austin Chalk plays in central Texas and in multiple conventional and unconventional plays in the Rocky Mountain region.

Bossier Play Average gas production from Anadarko's Bossier play in both Texas and Louisiana during the third quarter of 2001 was 346 MMcf/d of gas (258 MMcf/d of gas net), essentially flat from the second quarter as drilling activity slowed. Drilling in the Bossier declined from 33 active rigs in the second quarter to 21 rigs entering the fourth quarter.

East Texas Anadarko spud its 400th Bossier well in the East Texas portion of the play in August. A total of 35 wells were completed in the third quarter, giving the Company a total of 404 producing wells. The Company has 13 operated rigs in the area.

While development drilling slowed, exploration efforts continued to extend the boundaries of the Bossier play. In the third quarter of 2001, seven exploration wells were drilled, five of which were discoveries. During the fourth quarter, four more exploration wells are expected to be drilled.

Louisiana Anadarko has pushed the Bossier play into northwest Louisiana with development of the Vernon field in Jackson Parish, Louisiana, and is now actively exploring, with two wildcat wells spudded in the third quarter. Anadarko completed four wells and acquired two more during the third quarter, bringing the total well count to 38. Initial production in the southwestern part of Vernon indicates there is opportunity to extend the field limits.

During the third quarter, dehydration capacity in the Vernon field was doubled to 100 MMcf/d of gas. The field is currently producing 59 MMcf/d of gas (43 MMcf/d of gas net).

Central Texas Anadarko continued to exploit the multiple pay zones present in Central Texas utilizing horizontal drilling technology. Anadarko has eight rigs operating throughout its Central Texas play; one in the Georgetown, six in the Buda/Austin Chalk and one in the Glen Rose formations. Anadarko's net volumes in Central Texas averaged 210 MMcf/d of gas and 13 MBbls/d of oil for the third quarter of 2001, down slightly from the second quarter because of normal production declines inherent with fractured carbonate reservoirs.

Georgetown Play Anadarko completed four wells in the deep Giddings over-pressured area, including the Holle #2 well (100% working interest (WI)), which tested 30.2 MMcf/d of gas. Peak production from this area recently reached 95 MMcf/d of gas (66 MMcf/d of gas net) from nine wells.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Buda and Austin Chalk Play The Company continued its successful redevelopment program of the Buda and Austin Chalk formations in the Giddings field located in Lee, Fayette, Washington, Brazos and Burleson Counties of Texas. During the third quarter, four wells were successfully re-entered and deepened to the Buda formation, testing at an average 518 barrels per day (Bbls/d) of oil and 1.1 MMcf/d of gas.

Within the Austin Chalk formation, Anadarko has had very encouraging results. For example, the Coffield-Osage #2 well (82% WI) tested 1,100 Bbls/d of oil and 1.2 MMcf/d of gas and the Dodie #1 RE well (99% WI) flowed 89 Bbls/d of oil and 1.5 MMcf/d of gas. The cost to re-enter a well is about half the cost of drilling a well. The future potential for testing additional zones with horizontal laterals could extend throughout Anadarko's Austin Chalk holdings of over 750,000 net acres and 1,200 existing operated wellbores.

Gulf Coast

South Louisiana Development of the Kent Bayou field in Terrebonne Parish, Louisiana, continued during the third quarter of 2001, as the production facility was upgraded to handle a maximum capacity of 110 MMcf/d of gas and 24 MBbls/d of condensate. The field is currently producing 63 MMcf/d of gas and 13 MBbls/d of condensate. In addition, a salt-water disposal well was drilled to improve water-handling capabilities and to reduce disposal costs.

The Beignet prospect (67% WI), about six miles south of Kent Bayou, was spud in October. The proposed depth is 20,500 feet, targeting the Rob L sands in an upthrown fault closure syncline separated from Kent Bayou. The well is expected to reach total depth early next year.

Brookeland Field The Company's development program in the Brookeland field of Jasper and Newton Counties, Texas resulted in two significant Austin Chalk completions in the third quarter, which produced at a combined 17 MMcf/d of gas and 1,150 Bbls/d of condensate.

Carthage During the third quarter, a total of 10 Cotton Valley wells were completed in the Carthage area as Anadarko continued a multi-rig infill program. The application of a new fracture stimulation technique has resulted in significantly better performance and economics from these tight-sand wells, with initial production rates averaging nearly 5 MMcf/d of gas from three recent completions.

Permian Basin In the Ozona field of Crockett County, Texas, development within the Canyon and Strawn sands continued. The Company drilled 30 development wells during the third quarter of 2001, bringing the year-to-date total to 80 wells. Additionally, a Strawn and Ellenburger exploration program commenced with the shooting of 131 miles of 2D swath seismic south of the Ozona field.

In New Mexico, the first of five Paddock development wells was spudded in late September. Successful completion could lead to additional well locations in the Loco Hills field.

Rocky Mountains Anadarko, during the third quarter of 2001, advanced plans to double its exploration and development activity in the Rocky Mountains area. Net production in the third quarter averaged 286 MMcf/d of gas, 12 MBbls/d of oil and 18 MBbls/d of NGLs. Volumes were down 6% from the second quarter of 2001 due to pipeline constraints for facilities upgrades, third-party gathering problems and maintenance turnaround at a gas processing plant.

Coalbed Methane Anadarko has a strong coalbed methane (CBM) acreage position in key areas of Utah and Wyoming and overlying the Austin Chalk trend in Texas, with three Company-operated projects in various stages of development. This includes the first commercial production established from the Big George coal at the County Line project. Anadarko has been actively acquiring exploration core data to evaluate new CBM exploratory areas in Wyoming, as well as evaluating activity in six CBM non-operated pilot projects on the Land Grant.

The County Line CBM project (50% WI), located in the Powder River Basin of Wyoming, came online in August with gas sales from 21 wells. Another 64 wells have been drilled and should begin producing in the fourth quarter of 2001. The field is currently producing 3.4 MMcf/d of gas. Additional completion and facilities work is in progress. Gas production from this first phase of development is expected to reach about 35 MMcf/d of gas. A second phase of development is scheduled to begin in late 2002, following an environmental impact study, and should result in the drilling of 200 or more wells.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Exploration Anadarko began a significant new exploration push in the Rocky Mountains during the third quarter. Two regional 2D seismic programs were approved and acquisition is currently underway. One program, located in the Hanna and Laramie basins of southeast Wyoming, covers about 300 linear miles. The other is a 250-mile program located in the Overthrust Belt of southwestern Wyoming. These proprietary regional programs feature acquisition technology that has been used sparingly in the Rocky Mountains and should improve data quality over existing seismic data. The Company plans to use its expertise in seismic pre-stack depth migration to more accurately image complex structural targets. Two non-exclusive 3D seismic programs are also being acquired. The 125 square mile Haystacks program is designed to identify potential basin center gas plays and should begin shooting in the fourth quarter of 2001. The 290 square mile Patrick Draw 3D program, which will support stratigraphically trapped sandstone plays, began acquisition in early September.

Wamsutter Area Anadarko participated in 30 Wamsutter area wells in the third quarter, which brings the year-to-date total for that program to 87 wells, with a 98% success rate. Anadarko has an average of 25% WI in these wells. Drilling also continued in the Red Desert area, a western extension of the Wamsutter area. The third quarter was highlighted by the successful drilling of two Red Desert wells that further extended the productive limits of the field. A total of 11 wells have been drilled in the Red Desert area to date, with another 15 wells authorized and awaiting federal drilling permits. A total of five Red Desert wells were completed during the third quarter.

Mid-Continent

Hugoton Embayment Using 1,300 square miles of 3D seismic data in the Hugoton Embayment, the Company has been able to identify high-graded prospects in deeper zones. Six discoveries were drilled during the third quarter of 2001 in Stevens and Morton Counties of southwestern Kansas, each having potential development offsets.

Central Oklahoma During the third quarter, drilling activity was reduced from six rigs to two in this area as the Company re-evaluated play economics in light of falling gas prices and rising well costs. The abundant inventory of development drilling locations will be revisited when market factors improve.

Anadarko drilled and completed six wells in the Golden Trend. The play, located in Grady, Garvin and McClain Counties of Oklahoma, targets several different formations including deeper Sycamore, Woodford, Hunton, Viola and Bromide.

Offshore - Gulf of Mexico

During the third quarter of 2001, net production from Anadarko's Gulf of Mexico properties averaged 347 MMcf/d of gas and 24 MBbls/d of oil compared to 373 MMcf/d of gas and 29 MBbls/d of oil during the second quarter of 2001. The lower volumes were due to scheduled maintenance downtime, normal production declines and some minor disruptions resulting from storms in the Gulf of Mexico. Currently, 11 rigs are drilling in the Gulf of Mexico; six shallow-water, three sub-salt and two deepwater wells.

Sub-salt The Sazerac well (100% WI), a prospect located on Green Canyon 99, was spud at the end of July. The proposed well depth is 23,000 feet, which should be reached during the fourth quarter.

The Eiger Sanction well (100% WI), located on Mississippi Canyon Block 667, is in 2,950 feet of water, at the north end of an earlier deepwater Gomez discovery. The well, with a targeted well depth of 29,000 feet, has been difficult and expensive to drill. It is anticipated to reach total depth in the fourth quarter.

Anadarko is drilling the first offset well to its most recent sub-salt discovery, the Tarantula prospect, located on South Timbalier 308. The #2 well (100% WI) spud in the fourth quarter of 2001. Results will be used to evaluate a commercial development plan for the field. In addition, the well will test deeper potential on the proven trap.

Continental Shelf Shallow-water projects in the Gulf of Mexico continue as the Company exploits the potential around several of its larger and more mature fields. Ongoing re-mapping and re-processing have generated numerous prospects, adding to the Company's large inventory of projects identified from extensive field studies. During the third quarter of 2001, four discoveries were made. Workovers and recompletions also were performed on several wells at the South Marsh Island 281, Eugene Island 87 and South Marsh Island 268 fields.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Deepwater The Blues Image prospect (50% WI), located on Mississippi Canyon 587, was spud at the end of September. The well, located in 2,250 feet of water, will be drilled to a depth of 24,000 feet and is expected to reach total depth early next year.

The White Ash prospect (100% WI) is located on Mississippi Canyon 392, bordering the Sale 181 leasing area in nearly 7,300 feet of water. The well, spud in late September, is being drilled to a proposed depth of 18,000 feet and should reach total depth in the fourth quarter.

Joint Venture Anadarko has entered into a joint venture with BP to explore 95 deepwater blocks held by BP in the Garden Banks and Keathley Canyon areas of the western Gulf of Mexico. The 95 blocks, held 100% by BP, are within a larger 640-block area of mutual interest where the two companies will license and reprocess 3D seismic data. These blocks are in water depths ranging from 3,000 to 6,000 feet. The agreement gives Anadarko the option to earn a 33% to 66% working interest in the blocks. Anadarko will fund 100% of the licensing and re-processing costs and pay a disproportionately larger share of the first four wells drilled. Also as part of the agreement, BP will assign Anadarko its rights in eight blocks in the Green Canyon area near the Company's Marco Polo discovery. The Company is currently working on the development plan and options to commercialize the Marco Polo discovery (100% WI).

OCS Lease Sale Anadarko, during the third quarter, was apparent high bidder on 26 tracts in the Western Gulf of Mexico Lease Sale 180. The Company's high bids represent a total investment of about \$5.5 million. The tracts cover more than 133,000 acres in deep water, mainly around the Port Isabel and Alaminos Canyon areas. All of the bids were for a 100% working interest. Anadarko holds a total of 300 leases in the Gulf of Mexico. Including the BP joint venture, Anadarko now has access to 164 deepwater blocks.

Alaska

Alpine Field The Alpine field produced an average of 94 MBbls/d of oil in the third quarter. Alpine continued to set field production records, producing more than 103 MBbls/d of oil during a single day in the third quarter and averaging over 97 MBbls/d of oil in July. With Alpine's higher-than-expected production and new production anticipated from the satellite fields, Alpine's facility is expected to be further expanded to 135 MBbls/d of capacity. The expansion should be completed mid to late 2003.

The drilling rig was moved to pad 2 and began development of the western part of the field in the third quarter. One of the first wells to be drilled was Alpine West (22% WI), a step-out well to identify the western boundary of the field.

Satellite Fields In July 2001, Anadarko and its partner announced the Nanuq discovery, a satellite oil field about four miles south of the Alpine field. The Nanuq accumulation is the second satellite field to be discovered near Alpine. Both of the Alpine satellites will be developed and produced through the expanded Alpine facility beginning in the 2005-2006 time frame. Construction is expected to begin in 2002. Each project will consist of separate drilling pads and infrastructure. Anadarko has a 22% WI in the Alpine satellites.

Exploration Plans are being finalized for this coming winter drilling season. Anadarko expects to drill its first operated wildcat on the North Slope. The exploration well will be the Altamura #1 (100% WI), located in the National Petroleum Reserve - Alaska just south of the Moose's Tooth discovery. The Company plans to participate this winter in the acquisition of 1,900 square miles of 3D and 600 square miles of 2D seismic and continue the Company-operated Foothills exploration program.

The Company also expects to participate in up to 11 additional exploration wells with partners, including delineation of last year's announced discoveries at Moose's Tooth.

Canada

Canada benefited from the modest shift in the Company's capital program during the third quarter. Drilling activity increased to 22 operated rigs, resulting in 110 wells being spud. Activity was focused primarily in Alberta, British Columbia and Saskatchewan.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Anadarko has completed a deal to explore on several exploration licenses in the Fort Liard sub basin in British Columbia. Under the deal, Anadarko will acquire 3D and 2D seismic this winter season and drill a Devonian Nahanni formation test well the following year with the potential to earn interest, via rolling options, in up to 71,000 acres.

The Company will evaluate seismic over 24 sections (15,300 acres) in northeast British Columbia and then drill a Mississippi Debolt test well to earn an interest in eight sections and a similar option on the remaining acreage. This acreage is near the Company's recent Altares discovery (100% WI), which came online in early October at a rate of 5.3 MMcf/d of gas.

During the third quarter, Anadarko successfully drilled and completed numerous wells within its target Canadian basins, including its Jean Marie horizontal program in northeast British Columbia, the Dawson and Wild Hay areas in northern Alberta, various formations in a multi-play area of central Alberta, and shallow-oil exploitation plays in Saskatchewan.

Algeria

Development Another milestone in the development plan was reached when production from the second processing unit for the HBNS field began in late August. The Hassi Berkine central processing facility (CPF) achieved a monthly average production rate of 108 MBbls/d of oil in September and a peak one-day production rate of 136 MBbls/d of oil on October 1.

Construction continued on two other 75 MBbls/d processing units at the Hassi Berkine CPF, located in the northern end of Block 404. These units will process oil produced from the HBN and five smaller satellite fields to the south and east. Both units are on schedule for completion and first oil production in 2002. Additionally, a CPF with three processing units is under construction at the ORD field. Full production of 230 MBbls/d of oil is expected in 2003.

During the third quarter, Anadarko and partners continued its six-rig development drilling program in Algeria, completing three wells in the HBN field, three wells in the HBNS field, one well in the HBNSE field and four wells in the ORD field.

Exploration The Company is moving ahead with its new exploration program in Algeria under the successor exploration license for Blocks 404, 211 and 208. Work has commenced on reprocessing the existing 2D seismic database and planning is underway for 1,100 kilometers of new 2D seismic. Exploration drilling is expected to begin during 2002.

Anadarko signed a new exploration contract for Block 406b in Algeria's recent licensing round. The license has a three-year initial term. A work program commitment includes seismic acquisition and an exploration well, initially planned for 2003. Anadarko has a 100% interest in this 687,000 acre block. The Company now controls a total of 3.6 million acres in this region of the Sahara.

Other International

Gulfstream Acquisition In August 2001, the Company completed the acquisition of Gulfstream Resources Canada Limited (Gulfstream). The Gulfstream shares were purchased for C\$2.65 per share, for a total value of US\$118 million plus the assumption of US\$10 million of debt. Gulfstream's assets, concentrated in Qatar and Oman, have production growth opportunities and exploration upside.

Qatar Production from the Al Rayyan field, located on offshore Block 12, averaged about 12 MBbls/d of oil in September. A redevelopment program, which includes increasing existing facility capacity and drilling horizontal wells, is underway and is expected to more than double the production rate by late 2002. Anadarko has a 65% interest in the field.

Two exploratory wells drilled on Block 11 since mid-year found the objective wet and have been plugged and abandoned. Evaluation is underway to determine the potential for any further exploratory work on Block 11, in which Anadarko has a 49% interest.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

On Block 13, Anadarko is reviewing existing seismic data and developing an exploration plan. Anadarko has a 65% interest in the block.

Oman Anadarko, the operator, drilled a horizontal step-out well in the Hafar field in Block 30 during the third quarter. Testing is currently being conducted. One existing well on the block will be re-entered and flow tested during the fourth quarter of 2001. The development plan will be finalized based on the results of the well tests. Anadarko has a 100% interest in the field. Gas production will be sold to the Oman government under a long-term sale agreement priced initially at \$1.20 per Mcf.

Guatemala In July 2001, Anadarko sold its interest in Guatemala for \$120 million. The Company expects to realize about \$206 million in cash, including tax benefits, from the sale. Production at the time of the sale averaged about 20 MBbls/d of oil and proved reserves at year-end 2000 were about 40 MMBOE. The sale is part of the Company's ongoing strategy to divest low-margin, low-growth projects in its portfolio.

New Accounting Principles

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 141, "Business Combinations," SFAS No. 142, "Goodwill and Other Intangible Assets" and SFAS No. 143, "Accounting for Asset Retirement Obligations". SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated or completed after June 2001. SFAS No. 141 also specifies criteria that intangible assets acquired in a purchase method business combination must meet to be recognized and reported apart from goodwill. The adoption of SFAS No. 141 as of July 2001 had no impact on the Company's financial statements.

SFAS No. 142 requires that goodwill no longer be amortized, but instead tested for impairment at least annually in accordance with the provisions of SFAS No. 142. Any goodwill and any intangible asset determined to have an indefinite useful life that are acquired in a purchase business combination completed after June 2001 will not be amortized, but will be evaluated for impairment in accordance with the appropriate existing accounting literature. Goodwill and intangible assets acquired in business combinations completed before July 2001 will continue to be amortized prior to the adoption of SFAS No. 142. Implementation of SFAS No. 142 is required as of January 2002. Because of the extensive effort needed to comply with adopting SFAS No. 142, the impact of adoption on the Company's financial statements has not been determined, including whether any transitional impairment losses will be required to be recognized as the effect of a change in accounting principle. As of January 2002, the Company expects to have unamortized goodwill in the amount of \$1.4 billion, which will be subject to the transition provisions of SFAS No. 142. Amortization expense related to goodwill was \$57 million and \$31 million for the nine months ended September 30, 2001 and the year ended December 31, 2000, respectively.

SFAS No. 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred and a corresponding increase in the carrying amount of the related long-lived asset and will be effective for the Company in January 2003. The Company is evaluating the impact of SFAS No. 143.

In August 2001, SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" was issued addressing financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 requires that one accounting model be used for long-lived assets to be disposed of by sale, whether previously held and used or newly acquired, and broadens the presentation of discontinued operations to include more disposal transactions. Implementation will be effective for the Company in January 2002. The Company is evaluating the impact of SFAS No. 144.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Derivative Financial Instruments Anadarko's derivative commodity instruments currently are comprised of futures, swaps and options contracts. The volume of derivative commodity instruments utilized by the Company to hedge its market price risk and in its energy trading operation can vary during the year within the boundaries of its established policy guidelines.

Derivative financial instruments utilized to manage or reduce commodity price risk related to the Company's equity production are accounted for under the provisions of Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities", as amended. Under this statement, all derivatives are carried on the balance sheet at fair value. Realized gains/losses and option premiums are recognized in the statement of income when the underlying physical gas and oil production is sold. Accordingly, realized derivative gains/losses are generally offset by similar changes in the realized prices of the underlying physical gas and oil production. Realized derivative gains/losses are reflected in the average sales price of the physical gas and oil production.

Accounting for unrealized gains/losses is dependent on whether the derivative financial instruments have been designated and qualify as part of a hedging relationship. Derivative financial instruments may be designated as a hedge of exposure to changes in fair values, cash flows, or foreign currencies, if certain conditions are met. If the hedged exposure is a fair value exposure, the gains/losses on the derivative financial instrument, as well as the offsetting losses/gains on the hedged item, are recognized currently in earnings. Consequently, if gains/losses on the derivative financial instrument and the related hedge item do not completely offset, the difference (i.e., ineffective portion of the hedge) is recognized currently in earnings. If the hedged exposure is a cash flow exposure, the effective portion of the gains/losses on the derivative financial instrument is reported as a component of accumulated other comprehensive income and reclassified into earnings in the same period or periods during which the hedged forecasted transaction affects earnings. The ineffective portion of the gains/losses from the derivative financial instrument, if any, as well as any amounts excluded from the assessment of the cash flow hedges' effectiveness are recognized currently in other (income) expense. Effective July 2001, the Company implemented Derivatives Implementation Group (DIG) Issue G20, "Cash Flow Hedges: Assessing and Measuring the Effectiveness of a Purchased Option Used in a Cash Flow Hedge", which provides guidance for assessing the effectiveness on total changes in an option's cash flows rather than only on changes in the option's intrinsic value. Implementation of this DIG issue will reduce earnings volatility since it allows the Company to account for changes in the time value of its purchased options and costless collars as effective when hedging forecasted cash flows. Time value changes were previously being recognized in current earnings since the Company excluded time value changes from its assessment of hedge effectiveness. Unrealized gains/losses on derivative financial instruments that do not meet the conditions to qualify for hedge accounting are recognized currently in earnings.

The majority of the derivatives into which the Company enters have terms of less than 12 months. As of September 30, 2001, the Company had a net unrealized gain of \$29 million before taxes (gains of \$37 million and losses of \$8 million), or \$19 million after taxes, on derivative commodity instruments entered into to hedge equity production recorded in accumulated other comprehensive income. Other income for the three and nine months ended September 30, 2001, includes \$1 million net losses and \$26 million net gains, respectively, related to derivative instruments designated as cash flow hedges. These gains are primarily due to the change in the time value of the option contracts that were excluded from the assessment of hedge effectiveness. Operating income for the three months ended September 30, 2001, includes \$1 million of net gains related to the ineffective portion of a swap agreement designated as a fair value hedge. Based upon an analysis utilizing the actual derivative contractual volumes and assuming a 10% increase in commodity prices, the potential additional loss on these derivative commodity instruments would be approximately \$16 million.

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

As of September 30, 2001, the Company had the following volumes under derivative contracts related to non-trading activity:

<u>Production Period</u>	<u>Instrument Type</u>	<u>Volumes (million MMBtu)</u>	<u>Average Price (per MMBtu)</u>	<u>Fair Value Asset/(Liability) millions</u>

MMBtu - million British thermal units
MMBbls - million barrels

Derivative financial instruments utilized in the Company's energy trading activities and in the management of price risk associated with the Company's firm transportation keep-whole commitment, are accounted for under the mark-to-market accounting method pursuant to Emerging Issues Task Force Issue 98-10, "Accounting for Contracts Involved in Energy Trading and Risk Management Activities". Under this method, the derivatives are revalued in each accounting period and premium receipts/payments and unrealized gains/losses are immediately recorded in the statement of income and carried as current assets or liabilities on the balance sheet. The derivative contracts entered into for trading purposes are typically for terms of less than 12 months. As of September 30, 2001 the Company had a net unrealized loss of \$78 million (gains of \$99 million and losses of \$177 million) on derivative commodity instruments entered into

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

for trading purposes. Losses on derivative commodity instruments are offset by a net unrealized gain of \$91 million (gains of \$112 million and losses of \$21 million) on physical contracts entered into for trading purposes. Based upon an analysis utilizing the actual derivative contractual volumes and assuming a 10% increase in underlying commodity prices, the potential loss on the derivative instruments would be decreased by approximately \$13 million.

As of September 30, 2001, the Company had the following volumes under derivative contracts related to trading activity:

<u>Production Period</u>	<u>Instrument Type</u>	<u>Volumes (million MMBtu)</u>	<u>Average Price (per MMBtu)</u>	<u>Fair Value Asset/(Liability) millions</u>
Natural Gas

RME was a party to several long-term firm gas transportation agreements that supported the gas marketing program within the gathering, processing and marketing (GPM) business segment, which was sold in 1999 to Duke Energy Field Services, Inc. (Duke). Most of the GPM business segment's firm long-term transportation contracts were transferred to Duke in the GPM disposition. One contract was retained, but is managed and operated by Duke. Anadarko is not responsible for the operations of the contracts and does not utilize the associated transportation assets to transport the Company's natural gas. As part of the GPM disposition, RME and Duke agreed RME will pay Duke if transportation market values fall below the fixed contract transportation rates, while Duke will pay RME if the transportation market values exceed the contract transportation rates (keep-whole agreement). Net payments from Duke in the three and nine months ended September 30, 2001 were \$25 million and \$166 million, respectively. Transportation contracts transferred to Duke in the GPM disposition, and the contract not transferred, all of which are included in the keep-whole agreement with Duke, relate to various pipelines. This keep-whole agreement is accounted for on a mark-to-market basis. This keep-whole agreement will be in effect until the earlier of each contract's expiration date or March

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

2009. The Company recognized other income for the three and nine months ended September 30, 2001 of \$1 million and \$47 million, respectively. As of September 30, 2001, other current liabilities included \$9 million and other long-term liabilities included \$82 million related to this agreement.

From time to time, the Company uses derivative financial instruments to reduce its exposure to potential decreases in future transportation market values. While the derivatives are intended to reduce the Company's exposure to declines in transportation market values, they also limit the potential to benefit from market value increases. For the three and nine months ended September 30, 2001, the Company recognized other income of \$9 million and \$61 million, respectively, on derivative financial instruments related to transportation rates. At September 30, 2001, other current assets included \$29 million of unrealized gains related to this agreement. Based upon an analysis utilizing the actual derivative contractual volumes and assuming a 10% increase in underlying commodity prices, the potential additional loss would be approximately \$1 million.

Stock Repurchase Program In July 2001, the Board of Directors authorized the Company to purchase as much as \$1 billion in shares of Anadarko common stock. The share purchases may be made from time to time, depending on market conditions. Shares may be purchased either in the open market or through privately negotiated transactions. The repurchase program does not obligate Anadarko to acquire any specific number of shares and may be discontinued at any time. During the third quarter of 2001, the Company repurchased 2.2 million shares of common stock for \$116 million.

To enhance the share repurchase program, Anadarko has sold put options to independent third parties. These put options entitle the holder to sell shares of Anadarko common stock to the Company on certain dates at specified prices. Through September 2001, Anadarko has written a series of put options for the purchase of a total of 5 million shares of Anadarko common stock with a notional amount of about \$240 million. Put options for 1 million shares were exercised and 1 million shares expired unexercised in the third quarter 2001. Put options for an additional 1 million shares expired unexercised in October 2001. The remaining put options for 2 million shares will expire between January 2002 and March 2002. The outstanding put options permit a net-share settlement at the Company's option and do not result in a put option liability on the consolidated balance sheet. For the nine months ended September 30, 2001, premiums of \$15 million were received related to these put options and recorded as an increase to paid-in capital.

Interest Rate Risk Anadarko is also exposed to risk resulting from changes in interest rates as a result of the Company's variable and fixed interest rate debt. The Company has evaluated the potential effect that reasonably possible near term changes in interest rates may have on the fair value of the Company's various debt instruments.

Foreign Currency Risk The Company's Canadian subsidiary uses the Canadian dollar as its functional currency. The Company's Algerian subsidiary and the other international subsidiaries use the U.S. dollar as their functional currency. To the extent that business transactions in these countries are not denominated in the respective country's functional currency, the Company is exposed to foreign currency exchange rate risk. In addition, in these subsidiaries, certain asset and liability balances are denominated in currencies other than the subsidiary's functional currency. These asset and liability balances are remeasured in the preparation of the subsidiary's financial statements using a combination of current and historical exchange rates, with any resulting remeasurement adjustments included in net income.

At September 30, 2001, Anadarko Canada Corporation had \$191 million outstanding of fixed-rate notes and debentures denominated in U.S. dollars. For the three and nine months ended September 30, 2001, the Company recognized a \$9 million and \$25 million non-cash loss before taxes, respectively, associated with the remeasurement of Anadarko Canada's U.S. denominated debt outstanding during the period. The potential foreign currency remeasurement impact on earnings from a 10% change in the September 30, 2001 Canadian exchange rate would be about \$19 million based on the outstanding debt at September 30, 2001.

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

The Company periodically enters into foreign currency contracts to hedge specific currency exposures from commercial transactions. The following table summarizes the Company's open foreign currency positions at September 30, 2001:

<i>U.S. \$ in millions, except foreign currency rates</i>	Maturity Year <u>2004</u>
Notional amount	\$ <u>70</u>
Forward rate	<u>1.36</u>
Market rate	<u>1.56</u>
Decrease in rate	<u>(0.20)</u>
Fair value - loss	\$ <u>(14)</u>

At September 30, 2001, the Company's South American subsidiaries had foreign deferred tax liabilities denominated in the local currency equivalent totaling \$97 million. The potential foreign currency remeasurement impact on net earnings from a 10% change in the year-end South American exchange rates would be approximately \$10 million.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

See [Note 12](#) of the Notes to Consolidated Financial Statements under Part I - Item 1 of this Form 10-Q.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

Exhibits not incorporated by reference to a prior filing are designated by an asterisk (*) and are filed herewith; all exhibits not so designated are incorporated herein by reference to a prior filing as indicated.
