# What Distinguishes Goldman Sachs' Fixed Income Investing Process?

At Goldman Sachs Asset Management (GSAM), the goal of our fixed income investment process is to provide consistent, strong performance by actively managing our portfolios within a research-intensive, risk-managed framework.

A key element of our fixed income investment philosophy is to evaluate the broadest global opportunity set to capture relative value across sectors and instruments. Our globally integrated investment process involves managing dynamically along the risk/return spectrum, as we continue to develop value-added strategies through:

#### 1 RIGOROUS SECURITY SELECTION

- Assess relative value among sectors (such as mortgages and corporates) and sub-sectors
- Leverage the vast resources of Goldman Sachs in selecting securities for each portfolio

#### 2 PRECISE PORTFOLIO CONSTRUCTION

- Team approach to decision making
- Manage risk by avoiding significant sector and interest rate bets
- Careful management of yield curve strategies while closely managing portfolio duration

#### RESULT

#### Fixed Income portfolios that:

- Include domestic and global investment options, tax-free income opportunities, and access to areas of specialization such as high yield
- Capitalize on GSAM's industry-renowned credit research capabilities
- Use a risk-managed framework to seek total return, recognizing the importance of investors' capital accumulation goals as well as their need for income

1

# **Enhanced Income Fund**

## Dear Shareholder,

This report provides an overview on the performance of the Goldman Sachs Enhanced Income Fund during the six-month reporting period that ended April 30, 2004.

#### Performance Review

Over the six-month period that ended April 30, 2004, the Fund's Class A, Institutional, and Administration Shares generated cumulative total returns, without sales charges, of 0.36%, 0.56%, and 0.43%, respectively. These returns compare to the 0.56% and 0.48% cumulative total returns of the Fund's benchmarks, the Six-Month U.S. Treasury Bill Index and the One-Year U.S. Treasury Note Index, respectively, over the same time period.\*

Security selection strategies within the various sub-sectors of the market were the leading drivers of performance, while term structure and duration positioning modestly detracted from results.

## **Investment Objective**

The Fund seeks to generate return in excess of traditional money market products while maintaining an emphasis on preservation of capital and liquidity.

It is important to note that the Fund is not a money market fund and its net asset value will fluctuate.

## Portfolio Composition

The Fund targets a duration of nine months, with diversified holdings in high credit quality sectors including U.S. Treasuries, agency, corporate, asset-backed, and money market instruments. The Fund invests in securities with a minimum credit quality of "A" by a Nationally Recognized Statistical Rating Organization ("NRSRO") at the time of purchase or, if unrated, determined by the investment adviser to be of comparable quality. During the period, we tactically managed the Fund's duration position to reflect changing market conditions.

The Fund continues to emphasize shorter-term, higher credit securities that we believe have the potential to enhance results.

# Portfolio Highlights

- **Agencies** 39.1% on October 31, 2003 and 40.9% on April 30, 2004.
- Asset-Backed Securities 29.6% on October 31, 2003 and 22.3% on April 30, 2004.
- Corporate Bonds 28.9% on October 31, 2003 and 25.2% on April 30, 2004.
- Cash Equivalents 1.6% on October 31, 2003 and 10.7% on April 30, 2004.

<sup>\*</sup> Unlike the Fund's total return, the Indices' performance does not reflect any deduction for fees or expenses.

Security selection within the corporate sector was an important driver of performance over the reporting period. In particular, we concentrated on sectors that would benefit from a cyclical recovery. This strategy proved beneficial as credit spreads tightened due to a strengthened economy and improved quality trends. Security selection within the agency sector, which was concentrated in agency debentures, also contributed to returns. Conversely, duration and term structure strategies detracted from performance at the end of the period. We tactically adjusted the duration of the portfolio over the period. A longer duration exposure relative to the Index proved to be a drag on performance in periods such as April when rates rose. Additionally, from a term-structured perspective, the Fund's exposure to longer duration maturities detracted from results as stronger-than-expected economic data caused these issues to underperform their shorter maturity counterparts.

We thank you for your investment and look forward to your continued confidence.

Goldman Sachs U.S. Fixed Income Investment Management Team May 10, 2004

PERFORMANCE REVIEW				
November 1, 2003— April 30, 2004	Fund Total Return (based on NAV)¹	30-Day Standardized Yield²	Six-Month U.S. Treasury Bill Index <sup>3</sup>	One-Year U.S. Treasury Note Index <sup>3</sup>
Class A	0.36%	2.06%	0.56%	0.48%
Institutional	0.56	2.49	0.56	0.48
Administration	0.43	2.24	0.56	0.48

- <sup>1</sup> The net asset value (NAV) represents the net assets of the class of the Fund (ex-dividend) divided by the total number of shares of the class outstanding. The Fund's performance assumes the reinvestment of dividends and other distributions. The Fund's performance does not reflect the deduction of any applicable sales charges.
- <sup>2</sup> The 30-Day Standardized Yield of the Fund is calculated by dividing the net investment income per share (as defined by securities industry regulations) earned by the Fund over a 30-day period (ending on the stated month-end date) by the maximum public offering price per share of the Fund on the last day of the period. This number is then annualized. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders.
- <sup>3</sup> The Six-Month U.S. Treasury Bill Index and One-Year U.S. Treasury Note Index, as reported by Merrill Lynch, do not reflect any deduction for fees, expenses or taxes.

STANDARDIZED TOTAL RETURNS <sup>4</sup>				
For the period ended 3/31/04	Class A	Institutional	Administration	
One Year	-0.42%	1.46%	1.21%	
Since Inception	3.49 (8/2/00)	4.30 (8/2/00)	4.06 (8/2/00)	

4 The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. These returns reflect a maximum initial sales charge of 1.5% for Class A Shares. Because Institutional and Administration Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

Total return figures in the above charts represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the total return figures in the above charts. Please visit www.gs.com to obtain the most recent month-end returns. Performance reflects expense limitations in effect. In their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

# Ultra-Short Duration Government Fund

#### Dear Shareholder:

This report provides an overview on the performance of the Goldman Sachs Ultra-Short Duration Government Fund during the six-month reporting period that ended April 30, 2004.

#### Performance Review

Over the six-month period that ended April 30, 2004, the Fund's Class A, Institutional, and Service Shares generated cumulative total returns, without sales charges, of 1.04%, 1.24%, and 1.09%, respectively. These returns compare to the 0.56% and 0.48% cumulative total returns of the Fund's benchmarks, the Six-Month U.S. Treasury Bill Index and the One-Year U.S. Treasury Note Index, respectively, over the same time period.\*

The Fund outperformed its benchmarks during the period. This was primarily attributable to security selection and our positioning within the mortgage sector.

## **Investment Objective**

The Fund seeks to provide a high level of current income, consistent with low volatility of principal.

## Portfolio Composition

Over the period, the Fund continued to focus on security selection and sub-sector strategies within the mortgage sector. The portfolio management team modestly trimmed the Fund's allocation to the pass-through sub-sector in favor of collateralized mortgage obligations (CMOs), and adjustable rate mortgages (ARMs). The Fund's exposure to agency debentures was also decreased in favor of more attractive valuations within the mortgage sector.

During the period, we tactically managed the Fund's duration position. The Fund also held a curve flattening trade based on our view that the yield curve was steep and would likely flatten.

## Portfolio Highlights

- Adjustable Rate Mortgage Securities 29.3% on October 31, 2003 and 30.6% on April 30, 2004.
- Collateralized Mortgage Obligations 23.8% on October 31, 2003 and 19.8% on April 30, 2004.
- Fixed Rate Pass-Throughs 25.9% on October 31, 2003 and 21.0% on April 30, 2004.
- Agency Debentures 8.2% on October 31, 2003 and 0.8% on April 30, 2004.

<sup>\*</sup> Unlike the Fund's total return, the Indices' performance does not reflect any deduction for fees or expenses.

During the reporting period, our security selection of pass-throughs contributed significantly to the Fund's outperformance. Security selection strategies within ARMs and CMOs, and our use of mortgage-backed securities (MBS) derivatives also proved to be beneficial for performance. Finally, duration and term structure positioning also contributed positively to results.

We thank you for your investment and look forward to your continued confidence.

# Short Duration Government Fund

#### Dear Shareholder:

This report provides an overview on the performance of the Goldman Sachs Short Duration Government Fund during the six-month reporting period that ended April 30, 2004.

#### Performance Review

Over the six-month period that ended April 30, 2004, the Fund's Class A, B, C, Institutional, and Service Shares generated cumulative total returns, without sales charges, of 0.96%, 0.66%, 0.59%, 1.17%, and 0.92%, respectively. These returns compare to the 0.56% cumulative total return of the Fund's benchmark, the Two-Year U.S. Treasury Note Index, over the same time period.\*

The Fund outperformed its benchmark during the reporting period. This was primarily attributable to security selection and our positioning strategies within the mortgage sector.

## **Investment Objective**

The Fund seeks a high level of current income and secondarily, in seeking current income, may also consider the potential for capital appreciation.

## Portfolio Composition

Over the period, the Fund continued to focus on security selection and sub-sector strategies within the mortgage sector. The portfolio management team modestly trimmed the Fund's allocation to the pass-through sub-sector in favor of premium collateralized mortgage obligations (CMOs), and adjustable rate mortgages (ARMs). The Fund's exposure to agency debentures was also decreased in favor of more attractive valuations within the mortgage sector. During the period, we tactically managed the Fund's duration position to reflect changing market conditions.

# Portfolio Highlights

- Adjustable Rate Mortgage Securities 7.3% on October 31, 2003 and 18.5% on April 30, 2004.
- Agency Debentures 28.8% on October 31, 2003 and 14.3% on April 30, 2004.
- Collateralized Mortgage Obligations 23.5% on October 31, 2003 and 23.9% on April 30, 2004.
- Fixed Rate Pass-Throughs 28.6% on October 31, 2003 and 18.5% on April 30, 2004.
- U.S. Treasuries 6.7% on October 31, 2003 and 23.3% on April 30, 2004.

<sup>\*</sup> Unlike the Fund's total return, the Index's performance does not reflect any deduction for fees or expenses.

The Fund's continued emphasis on government-issued sectors contributed positively to returns over the period. Security selection among ARMs, CMOs, and fixed rate pass-throughs was a leading driver of performance.

We thank you for your investment and look forward to your continued confidence.

# Government Income Fund

#### Dear Shareholder:

This report provides an overview on the performance of the Goldman Sachs Government Income Fund during the six-month reporting period that ended April 30, 2004.

#### Performance Review

Over the six-month period that ended April 30, 2004, the Fund's Class A, B, C, Institutional, and Service Shares generated cumulative total returns, without sales charges, of 1.26%, 0.88%, 0.88%, 1.46%, and 1.28%, respectively. These returns compare to the 1.11% cumulative total return of the Fund's benchmark, the Lehman Brothers Government/Mortgage Index, over the same time period.\*

The Fund's performance was generally in line with its benchmark during the reporting period. The outperformance of the Fund's Class A, Institutional and Service Shares versus its benchmark was primarily due to subsector and security selection strategies within the mortgage sector. Class B and C Shares benefitted from the same strategies, but did not outperform the benchmark due to higher expenses.

## **Investment Objective**

The Fund seeks a high level of current income, consistent with safety of principal.

## Portfolio Composition

Over the period, the Fund's investment strategy continued to focus on sectors and securities that we believed would generate a competitive total rate of return relative to the benchmark. As such, the Fund increased its exposure to hybrid adjustable rate mortgages (ARMs) at attractive valuations and also added collateralized mortgage obligations (CMOs). The team also modestly trimmed the Fund's exposure to the pass-through sub-sector in favor of more attractive mortgage sub-sectors. The Fund's duration was also tactically managed over the reporting period to reflect changing market conditions. The outperformance of the Fund's Class A, Institutional and Service shares versus its benchmark was primarily due to subsector and security selection strategies within the mortgage sector. Class B and C shares benefitted from the same strategies, but did not outperform the benchmark due to higher expenses.

# Portfolio Highlights

- Agency Debentures 14.9% on October 31, 2003 and 14.4% on April 30, 2004.
- Asset-Backed Securities 2.2% on October 31, 2003 and 9.2% on April 30, 2004.
- Mortgage-Backed Securities 62.7% on October 31, 2003 and 52.6% on April 30, 2004.
- U.S.Treasuries 16.7% on October 31, 2003 and 22.3% on April 30, 2004.

<sup>\*</sup> Unlike the Fund's total return, the Index's performance does not reflect any deduction for fees or expenses.

During the reporting period, our security selection of pass-throughs contributed significantly to the Fund's performance. Security selection strategies within ARMs and CMOs, and our use of mortgage-backed securities (MBS) derivatives also contributed to positive performance over the six-month reporting period.

We thank you for your investment and look forward to your continued confidence.

# U.S. Mortgages Fund

## Dear Shareholder,

This report provides an overview on the performance of the Goldman Sachs U.S. Mortgages Fund for the period from its inception on November 3, 2003 through April 30, 2004.

## Performance Review

Over the period from its inception on November 3, 2003, through April 30, 2004, the Fund's Class A, Institutional, and Separate Account Institutional Shares generated cumulative total returns, without sales charges, of 1.59%, 1.93%, and 1.86%, respectively. These returns compare to the 1.37% cumulative total return of the Fund's benchmark, the Lehman Brothers Securitized Index, over the same time period.\*

The Fund outperformed its benchmark over the reporting period due primarily to mortgage-backed security (MBS) selection.

## Investment Objective

The Fund seeks a high level of total return consisting of income and capital appreciation.

## Portfolio Composition

As of April 30, 2004, the Fund's duration position was neutral relative to the benchmark. The Fund held approximately 80% in the fixed rate pass-through sector. In addition, the portfolio maintained an exposure to collateralized mortgage obligations (CMOs) and adjustable rate mortgages (ARMs), which we believed represented relative value.

# Portfolio Highlights

Since the Fund's inception, pass-through security selection has been the principal driver of portfolio outperformance. Holdings of ARMs, CMOs and mortgage derivatives had a modestly positive impact on returns.

We thank you for your investment and look forward to your continued confidence.

Goldman Sachs Fixed Income Investment Management Team

PERFORMANCE REVIEW				
November 3, 2003– April 30, 2004	Fund Total Return (based on NAV)¹	30-Day Standardized Yield²	Lehman Brothers Securitized Index <sup>3</sup>	
Class A	1.59%	2.37%	1.37%	
Institutional Class	1.93	3.07	1.37	
Separate Account Institutional Class	1.86	3.11	1.37	

- <sup>1</sup> The net asset value (NAV) represents the net assets of the class of the Fund (ex-dividend) divided by the total number of shares of the class outstanding. The Fund's performance assumes the reinvestment of dividends and other distributions. The Fund's performance does not reflect the deduction of any applicable sales charges.
- <sup>2</sup> The 30-Day Standardized Yield of the Fund is calculated by dividing the net investment income per share (as defined by securities industry regulations) earned by the Fund over a 30-day period (ending on the stated month-end date) by the maximum public offering price per share of the Fund on the last day of the period. This number is then annualized. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders.
- <sup>3</sup> The Lehman Brothers Securitized Index is an unmanaged composite of asset-backed securities, collateralized mortgage-backed securities (ERISA eligible) and fixed rate mortgage-backed securities. The Index figures do not reflect any deduction for fees, expenses or taxes.

STANDARDIZED TOTAL RETURNS				
For the period ended 3/31/04	Class A	Institutional	Separate Account Institutional	
Since Inception (11/3/03)	-1.62%	3.41%	3.34%	

<sup>&</sup>lt;sup>4</sup> The Standardized Total Returns are cumulative total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. These returns reflect a maximum initial sales charge of 4.5% for Class A Shares. Because Institutional and Separate Account Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

Total return figures in the above charts represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the total return figures in the above charts. Please visit www.gs.com to obtain the most recent month-end returns. Performance reflects expense limitations in effect. In their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

# Core Fixed Income Fund

## Dear Shareholder,

This report provides an overview on the performance of the Goldman Sachs Core Fixed Income Fund during the six-month reporting period that ended April 30, 2004.

#### Performance Review

Over the six-month period that ended April 30, 2004, the Fund's Class A, B, C, Institutional, and Service Shares generated cumulative total returns, without sales charges, of 1.93%, 1.44%, 1.55%, 2.03%, and 1.88%, respectively. These returns compare to the 1.25% cumulative total return of the Fund's benchmark, the Lehman Brothers Aggregate Bond Index, over the same time period.\*

The Fund outperformed its benchmark over the reporting period. This was primarily due to the Fund's security selection in the corporate and mortgage-backed sectors.

## Investment Objective

The Fund seeks a total return consisting of capital appreciation and income that exceeds the total return of the Lehman Brothers Aggregate Bond Index.

## Portfolio Composition

During the period, the Fund's portfolio management team tactically managed duration and term structure strategies to respond to changing market conditions. As of April 30, 2004, the Fund's duration position was neutral relative to the benchmark. We maintained a bias towards lower quality (BBB rated) credit securities. Within the mortgage sector, we held collateralized mortgage obligations (CMOs) and adjustable rate mortgages (ARMs) as substitutes for agency pass-throughs.

# Portfolio Highlights

- Agency Debentures 9.1% on October 31, 2003 and 8.6% on April 30, 2004.
- **Asset-Backed Securities (ABS)** 11.7% on October 31, 2003 and 11.9% on April 30, 2004.
- Corporate Bonds 19.7% on October 31, 2003 and 20.8% on April 30, 2004.
- Emerging Market Debt (EMD) and 1.0% on October 31, 2003 and 0.9% on April 30, 2004.
- Mortgage-Backed Securities (MBS) 52.2% on October 31, 2003 and 38.6% on April 30, 2004.
- U.S.Treasuries 9.4% on October 31, 2003 and 23.5% on April 30, 2004.

<sup>\*</sup> Unlike the Fund's total return, the Index's performance does not reflect any deduction for fees or expenses.

The Fund's corporate and mortgage-backed securities were the main drivers of outperformance over the period. Specifically, the Fund's lower quality bias (BBB rated securities) generated positive returns. Within mortgages, the Fund's CMOs, ARMs, and mortgage derivatives also enhanced results. Issue selection of asset-backed securities positively benefited returns as well.

We thank you for your investment and look forward to your continued confidence.

# Investment Grade Credit Fund

#### Dear Shareholder:

This report provides an overview on the performance of the Goldman Sachs Investment Grade Credit Fund for the period from its inception on November 3, 2003 through April 30, 2004.

## Performance Review

Over the period from its inception on November 3, 2003, through April 30, 2004, the Fund's Class A, Institutional and Separate Account Institutional Shares generated cumulative total returns, without sales charges, of 2.30, 2.63%, and 2.56%, respectively. These returns compare to the 1.59% cumulative total return of the Fund's benchmark, the Lehman Brothers U.S. Credit Index, over the same time period.\*

Since its inception, the Fund has outperformed its benchmark. An overweight exposure to higher risk credit securities, coupled with favorable security selection, was the primary driver of portfolio outperformance.

## **Investment Objective**

The Fund seeks a high level total return consisting of capital appreciation and income that exceeds the total return of the Lehman Brothers U.S. Credit Index.

# Portfolio Composition

The Fund's duration approximated that of the benchmark during much of the period. In terms of sectors, the Fund had overweights in Tobacco, Autos, and European Telecoms. The Fund also had an overweight to BBB rated securities. As of April 30, 2004, the portfolio targeted a short-duration position relative to the benchmark.

# Portfolio Highlights

Over the period, we maintained an overweight allocation to higher risk credit securities. An overweight exposure to lower quality credit securities (BBB rated) contributed to portfolio excess returns as lower quality securities outperformed their higher quality counterparts. The portfolio's overweight allocation to Auto and Tobacco credits also positively impacted overall performance.

We thank you for your investment and look forward to your continued confidence.

- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$118,842,211, which represents approximately 9.8% of net assets as of April 30, 2004
- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- § These securities are issued with a zero coupon which increases to the stated rate at a set date in the future.
- $\triangle$  Joint repurchase agreement was entered into on April 30, 2004.
- A portion of this security is segregated as collateral for initial margin requirement on futures transactions.
- Security issued with a zero coupon. Income is recognized through the accretion of discount.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- @ Represents security with notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate due to the amortization of related premiums or accretion of discounts.
- § These securities are issued with a zero coupon which increases to the stated rate at a set date in the future.
- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$83,729,710, which represents 4.5% of net assets as of April 30, 2004.
- $\wedge$  A portion of this security is segregated as collateral for initial margin requirement on futures transactions.
- △ Joint repurchase agreement was entered into on April 30, 2004.
- Security issued with a zero coupon. Income is recognized through the accretion of discount.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

# Statement of Investments (continued)

April 30, 2004 (Unaudited)

- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- @ Represents security with notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate due to the amortization of related premiums or accretion of discounts.
- $^{\propto}$  TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate (generally +/- 2.5%) principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned.
- $\wedge$  A portion of this security is segregated as collateral for initial margin requirement on futures transactions.
- $\triangle$  Joint repurchase agreement was entered into on April 30, 2004.
- Security issued with a zero coupon. Income is recognized through the accretion of discount.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and maybe resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$7,614,973, which represent 1.2% of net assets as of April 30, 2004.
- TBA (To Be Announced) securities are purchased on a forward commitment basis with an approximate (generally +/- 2.5%) principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned.
- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- Securities with "Put" features with resetting interest rates. Maturity dates disclosed are next interest reset date.
- $\wedge$  A portion of this security is segregated as collateral for initial margin requirement on futures transactions.
- @ Represents security with notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate due to the amortization of related premiums or accretion of discounts.
- △ Joint repurchase agreement was entered into on April 30, 2004.
- Security issued with a zero coupon. Income is recognized through the accretion of discount.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$1,460,154, which represents 0.7% of net assets as of April 30, 2004.
- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- $^{\propto}$  TBA (To Be Announced) securities are purchased on a forward commitment basis with an approximate (generally +/- 2.5%) principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned.
- @ Represents security with notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate due to the amortization of related premiums or accretion of discounts.
- △ Joint repurchase agreement was entered into on April 30, 2004.
- Security issued with a zero coupon. Income is recognized through the accretion of discount

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$70,395,579, which represent 5.9% of net assets as of April 30, 2004.
- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- $^{\propto}$  TBA (To Be Announced) securities are purchased on a forward commitment basis with an approximate (generally +/- 2.5%) principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned.
- @ Represents security with notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate due to the amortization of related premiums or accretion of discounts.
- A portion of this security is segregated as collateral for initial margin requirement on futures transactions.
- $\triangle\;$  Joint repurchase agreement was entered into on April 30, 2004.
- Security is issued with a zero coupon. Income is recognized through the accretion of discount.
- ± Perpetual Maturity. Maturity date presented represents the next call date.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- † Securities are exempt from registration under rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$6,691,783, which represents 20.4% of net assets as of April 30, 2004.
- # Variable rate security. Interest rate disclosed is that which is in effect at April 30, 2004.
- $\triangle$  Joint repurchase agreement was entered into on April 30, 2004.
- $\pm$  Perpetual Maturity. Maturity date presented represents the next call date.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

### Notes to Financial Statements

April 30, 2004 (Unaudited)

#### 1. ORGANIZATION

Goldman Sachs Trust (the "Trust") is a Delaware statutory trust registered under the Investment Company Act of 1940 (as amended) as an open-end management investment company. The Trust includes Goldman Sachs Enhanced Income Fund (Enhanced Income), Goldman Sachs Ultra-Short Duration Government Fund (Ultra-Short Duration Government), Goldman Sachs Government Income Fund (Government Income), Goldman Sachs U.S. Mortgages Fund (U.S. Mortgages), Goldman Sachs Core Fixed Income Fund (Core Fixed Income) and Goldman Sachs Investment Grade Credit Fund (Investment Grade Credit), (collectively, "the Funds" or individually a "Fund"). U.S. Mortgages and Investment Grade Credit Funds commenced operations in November 3, 2003. Each Fund is a are diversified portfolios of the Trust. Enhanced Income offers three classes of shares — Class A, Institutional and Administration. Ultra-Short Duration Government offers three classes of shares — Class A, Institutional and Service. U.S. Mortgages and Investment Grade Credit offers three classes of shares — Class A, Institutional Covernment Income, Short Duration Government and Core Fixed Income offer five classes of shares — Class A, Class B, Class C, Institutional and Service.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies consistently followed by the Funds. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that may affect the reported amounts. Actual results could differ from those estimates.

A. Investment Valuation — Portfolio securities for which accurate market quotations are readily available are valued on the basis of quotations furnished by a pricing service or provided by dealers in such securities. Short-term debt obligations maturing in sixty days or less are valued at amortized cost. Portfolio securities for which accurate market quotations are not readily available are valued based on yield equivalents, pricing matrices or other sources, under valuation procedures established by the Trust's Board of Trustees.

B. Security Transactions and Investment Income — Security transactions are recorded as of the trade date. Realized gains and losses on sales of portfolio securities are calculated using the identified cost basis. Interest income is recorded on the basis of interest accrued (net of foreign withholding taxes which are reduced by any amounts reclaimable by the Funds, where applicable), premium amortized and discount accreted. Net investment income (other than class specific expenses) and unrealized and realized gains or losses are allocated daily to each class of shares of the Fund based upon the relative proportion of net assets of each class.

Certain mortgage security paydown gains and losses are taxable as ordinary income (loss). Such paydown gains and losses increase or decrease taxable ordinary income available for distribution and are classified as interest income in the accompanying Statements of Operations. Original issue discounts (OID) on debt securities are amortized to interest income over the life of the security with a corresponding increase in the cost basis of that security. Market discounts and market premiums on debt securities are amortized to interest income over the expected life of the security with a corresponding adjustment in the cost basis of that security.

C. Federal Taxes — It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable and tax-exempt income and capital gains to its shareholders. Accordingly, no federal tax provisions are required. Dividends and distributions to shareholders are recorded on ex-dividend date. Income distributions are declared daily and paid monthly. Capital gain distributions, if any, are declared and paid annually.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with Federal income tax rules. Therefore, the source of a Fund's distributions may be shown in the accompanying financial statements as either from net investment income or net realized gain, or from paid-in-capital, depending on the type of book/tax differences that may exist.

#### 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Expenses — Expenses incurred by the Trust that do not specifically relate to an individual Fund of the Trust are allocated to the Funds on a straight-line or pro rata basis depending upon the nature of the expense.

Class A, Class B and Class C shareholders of the Funds bear all expenses and fees relating to their respective Distribution and Service Plans. Service Shares bear all expenses and fees relating to their Service and Shareholder Administration Plans. Administration Shares bear all expenses and fees relating to their Administration Plan. Each class of shares of the Funds separately bears its respective class-specific Transfer Agency fees. Class A and Institutional Shareholders of the U.S. Mortgages and Investment Grade Credit Funds bear their respective class-specific Account Service fees.

E. Foreign Currency Translations — The books and records of the Funds are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars on the following basis: (i) investment valuations, foreign currency and other assets and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates; (ii) purchases and sales of foreign investments, income and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions.

Net realized and unrealized gain (loss) on foreign currency transactions will represent: (i) foreign exchange gains and losses from the sale and holdings of foreign currencies and sale of investments; (ii) currency gains and losses between trade date and settlement date on investment securities transactions and forward exchange contracts; (iii) gains and losses from the difference between amounts of interest recorded and the amounts actually received. The effect of changes in foreign currency exchange rates on securities and derivative instruments are segregated in the Statements of Operations from the effects of changes in market prices of those securities and derivative instruments and are included as increases and decreases in unrealized appreciation/depreciation on foreign currency related transactions. Net unrealized foreign exchange gains and losses arising from changes in the value of other assets and liabilities as a result of changes in foreign exchange rates are included as increases and decreases in unrealized appreciation/depreciation on foreign currency related transactions.

- F. Mortgage Dollar Rolls The Funds may enter into mortgage "dollar rolls" in which the Funds sell securities in the current month for delivery and simultaneously contract with the same counterparty to repurchase similar (same type, coupon and maturity) but not identical securities on a specified future date. For financial reporting and tax reporting purposes, the Funds treat mortgage dollar rolls as two separate transactions; one involving the purchase of a security and a separate transaction involving a sale.
- G. Segregation Transactions Funds may enter into derivative transactions to seek to increase total return. Forward foreign currency exchange contracts, futures contracts, written options, swap contracts, mortgage dollar rolls, when-issued securities and forward commitments represent examples of such transactions. As a result of entering into those transactions, the Funds are required to segregate liquid assets on the accounting records equal to or greater than the market value of the corresponding transactions.
- H. Forward Sales Contracts The Funds may enter into forward security sales of mortgage-backed securities in which the Funds sell securities in the current month for delivery of securities defined by pool stipulated characteristics on a specified future date. The value of the contract is recorded as a liability on the Fund's records with the difference between its market value and cash proceeds received being recorded as an unrealized gain or loss. Gains or losses are realized upon delivery of the security sold.
- I. Repurchase Agreements Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. During the term of a repurchase agreement, the value of the underlying securities held as collateral on behalf of the Funds, including accrued interest, is required to equal or exceed the value of the repurchase agreement, including accrued interest. The underlying securities for all repurchase agreements are held in safekeeping at the Fund's custodian or designated subcustodians under triparty repurchase agreements.

### Notes to Financial Statements (continued)

April 30, 2004 (Unaudited)

#### 3. AGREEMENTS

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman, Sachs & Co. ("Goldman Sachs") serves as investment adviser pursuant to an Investment Management Agreement (the "Agreement") with the Trust on behalf of the Funds. Under the Agreement, GSAM, subject to the general supervision of the Trust's Board of Trustees, manages the Funds' portfolios.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administering the Funds' business affairs, including providing facilities, the adviser is entitled to a fee ("Management Fee") computed daily and payable monthly, equal to an annual percentage rate of each Funds average daily net assets.

For the six months ended April 30, 2004, the adviser for the Enhanced Income, Government Income, U.S. Mortgages and Investment Grade Credit Funds voluntarily agreed to waive a portion of its Management Fee, equal to an annual percentage rate of each Fund's average daily net assets, as set forth below. The adviser may discontinue or modify these waivers in the future at its discretion.

Additionally, the adviser has voluntarily agreed to limit "Other Expenses" (excluding Management fees, Distribution and Service fees, Transfer Agent fees, taxes, interest, brokerage, litigation, service share fees, indemnification, shareholder meeting and other extraordinary expenses) to the extent that such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of each Fund. Such expense reimbursements, if any, are computed daily and paid monthly. In addition, the Funds are not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any.

For the six months ended April 30, 2004, the Funds' Management fees, Management fee waivers and expense limitations as an annual percentage rate of average daily net assets are as follows:

		Management Fee	ement Fee		
Fund	Contractual Annual Rate	Waiver Annual Rate	Net Annual Rate	Other Expense Limit	
Enhanced Income	0.25%	0.05%	0.20%	0.014%	
Ultra-Short Duration Government	0.40	_	0.40	0.054	
Short Duration Government	0.50	_	0.50	0.004	
Government Income	0.65	0.11	0.54	0.004	
U.S. Mortgages	0.40	0.07	0.33	0.004	
Core Fixed Income	0.40	_	0.40	0.104	
Investment Grade Credit	0.40	0.07	0.33	0.004	

#### 3. AGREEMENTS (continued)

The Trust, on behalf of each Fund, has adopted Distribution and Service Plans. Under the Plans, Goldman Sachs and/or Authorized Dealers are entitled to a monthly fee for distribution services equal, on an annual basis, to 0.25% for Enhanced Income, Ultra-Short Duration Government, U.S. Mortgages and Investment Grade Credit Funds average daily net assets attributable to Class A shares and 0.25%, 0.75% and 0.75% for Government Income and Core Fixed Income Fund's average daily net assets attributable to Class A, Class B and Class C shares, respectively. Additionally, Goldman Sachs and/or Authorized Dealers are entitled to receive, under the Plans, a separate fee for personal and account maintenance services equal to, on an annual basis, 0.25% of the Short Duration Government, Government Income and Core Fixed Income Funds average daily net assets attributable to Class B or Class C Shares. For the six months ended April 30, 2004, Goldman Sachs has voluntarily agreed to waive a portion of the Distribution and Service fees equal to 0.15% of the average daily net assets attributable to the Class B shares of Short Duration Government.

Goldman Sachs serves as Distributor of the shares of the Funds pursuant to a Distribution Agreement. Goldman Sachs may receive a portion of the Class A sales load and Class B and Class C contingent deferred sales charges. During the six months ended April 30, 2004, Goldman Sachs advised the Funds that it retained approximately the following amounts:

	Sales Load	Contingent Deferred Sales Charge		
Fund	Class A	Class B	Class C	
Enhanced Income	\$ 400	N/A	N/A	
Ultra-Short Duration Government	18,200	N/A	N/A	
Short Duration Government	17,900	\$ —	\$ —	
Government Income	19,100	300	9,400	
U.S. Mortgages	5,300	N/A	N/A	
Core Fixed Income	80,500	_	800	
Investment Grade Credit	_	N/A	N/A	

### Notes to Financial Statements (continued)

April 30, 2004 (Unaudited)

#### 3. AGREEMENTS (continued)

Goldman Sachs also serves as Transfer Agent of the Funds for a fee. Fees charged for such transfer agency services are calculated daily and payable monthly at an annual rate as follows: 0.19% of the average daily net assets for Class A, Class B and Class C shares and 0.04% of the average daily net assets for Administration (Enhanced Income only), Separate Account Institutional (U.S. Mortgages and Investment Grade Credit), Institutional and Service shares. For the six months ended April 30, 2004, Goldman Sachs has voluntarily agreed to waive a portion of the Transfer Agent fees equal to 0.02% of the average daily net assets attributable to Institutional and Separate Account Institutional shares of U.S. Mortgages and Investment Grade Credit. Goldman Sachs may discontinue or modify this waiver in the future at its discretion.

The Trust, on behalf of the Funds, Ultra-Short Duration, Short Duration Government, Government Income and Core Fixed Income has adopted a Service Plan and Shareholder Administration Plan for Service Shares. In addition, the Trust on behalf of Enhanced Income Fund has adopted an Administration Plan for Administration shares. These Plans allow for Service and Administration Shares to compensate service organizations for providing varying levels of personal and account administration and shareholder administration services to their customers who are beneficial owners of such shares. The Service Plan, Shareholder Administration Plan and Administration Plan provide for compensation to the service organizations in an amount up to 0.25%, 0.25% and 0.25%, respectively, (on an annual basis) of the average daily net asset value of each share class. The Trust, on behalf of Class A and Institutional Class shares of U.S. Mortgages and Investment Grade Credit Funds, has adopted Account Service Plans. Under these Plans, Goldman Sachs and Authorized Dealers are entitled to receive a fee for account service and account maintenance equal to, on an annual basis, 0.05% of the average daily net asset value of U.S. Mortgages and Investment Grade Credit Funds attributable to Class A shares.

For the six months ended April 30, 2004, the advisors and distributor have voluntarily agreed to waive certain fees and reimburse other expenses. In addition, the Funds have entered into certain offset arrangements with the custodian resulting in a reduction of the Funds' expenses. For the six months ended April 30, 2004, expense reductions were as follows (in thousands):

		Waivers				
Fund	Management Fees	Class B Distribution and Service Fees	Transfer Agent Fees	Other Expense Reimbursement	Custody Credit	Total Expense Reductions
Enhanced Income	\$340	\$ —	\$ —	\$149	\$ 7	\$496

U.S. Mortgages	59	1	4	64
Core Fixed Income	398	144	104	646
Investment Grade Credit	8	_	1	9

### Notes to Financial Statements (continued)

April 30, 2004 (Unaudited)

#### 4. PORTFOLIO SECURITY TRANSACTIONS

Cost of purchases and proceeds of sales and maturities of long-term securities for the six months ended April 30, 2004, were as follows:

Fund	Purchases of U.S. Government and agency obligations	Purchases (excluding U.S. Government and agency obligations)	Sales and maturities of U.S. Government and agency obligations	Sales and maturities (excluding U.S. Government and agency obligations)
Enhanced Income	\$ 269,045,055	\$ 28,143,795	\$ 369,315,284	\$193,442,600
Ultra-Short Duration Government	506,779,622	113,979,921	1,225,691,558	131,982,852
Short Duration Government	985,632,011	_	958,477,474	285,297
Government Income	1,262,524,632	101,007,465	1,206,399,643	36,830,041
U.S. Mortgages	1,455,742,034	9,573,544	1,294,257,953	423,361
Core Fixed Income	3,040,506,908	343,737,611	2,790,506,761	280,433,677
Investment Grade Credit	3,873,929	36,784,046	3,832,772	5,648,848

Futures Contracts — The Funds may enter into futures transactions to hedge against changes in interest rates, securities prices, currency exchange rates (in the case of Core Fixed Income) or to seek to increase total return. Futures contracts are valued at the last settlement price at the end of each day on the board of trade or exchange upon which they are traded. Upon entering into a futures contract, the Funds are required to deposit with a broker or the Fund's custodian bank an amount of cash or securities equal to the minimum "initial margin" requirement of the associated futures exchange. Subsequent payments for futures contracts ("variation margin") are paid or received by the Funds daily, dependent on the daily fluctuations in the value of the contracts, and are recorded for financial reporting purposes as unrealized gains or losses. When contracts are closed, the Funds realizes a gain or loss which is reported in the Statements of Operations.

The use of futures contracts involve, to varying degrees, elements of market and counterparty risk which may exceed the amounts recognized in the Statements of Assets and Liabilities. Changes in the value of the futures contract may not directly correlate with changes in the value of the underlying securities. This risk may decrease the effectiveness of the Funds' strategies and potentially result in a loss.

For the six months ended April 30, 2004, Enhanced Income, Ultra-Short Duration Government, Short Duration Government, Government Income, U.S. Mortgages Fund, Core Fixed Income and Investment Grade Credit paid commissions of approximately \$90,000, \$175,000, \$104,000, \$33,000, \$3,000, \$221,000 and \$2,000, respectively, in connection with futures contracts entered into with Goldman Sachs.

Swap Contracts — The Funds may enter into swap transactions for hedging purposes or to seek to increase total return. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or notional principal amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Funds, and/or the termination value at the end of the contract. Therefore, the Funds consider the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index.

The Funds record unrealized gains or losses on a daily basis representing the value and the current net receivable or payable relating to open swap contracts. Net amounts received or paid on the swap contracts are recorded as realized gains or losses.

Fluctuations in the value of swap contracts are recorded for financial statement purposes as unrealized appreciation or depreciation on swap contracts. Realized gains and losses from terminated swaps are included in net realized gains/losses on swap contracts. At April 30, 2004, Core Fixed Income Fund had outstanding swap contracts with the following terms:

#### 5. JOINT REPURCHASE AGREEMENT ACCOUNT

Pursuant to exemptive relief granted by the SEC and the terms and conditions therein, the Funds, together with other registered investment companies having management agreements with GSAM or its affiliates, transfers uninvested cash into joint accounts, the daily aggregate balance of which is invested in one or more repurchase agreements.

At April 30, 2004, Enhanced Income, Ultra-Short Duration Government, Short Duration Government, Government Income, U.S. Mortgages, Core Fixed Income and Investment Grade Credit Funds had undivided interests in the following Joint Repurchase Agreement Account II which equaled \$130,600,000, \$307,300,000, \$47,200,000, \$76,000,000, \$115,300,000, \$94,200,000 and \$800,000, respectively, in principal amount. At April 30, 2004, the following repurchase agreements held in this joint account were fully collateralized by Federal Agency obligations.

Repurchase Agreements	Principal Amount	Interest Rate	Maturity Date	Maturity Value
ABN AMRO, Inc.	\$ 500,000,000	1.04%	05/03/2004	\$ 500,043,333

Westdeutsche Landesbank AG	600,000,000	1.04	05/03/2004	600,052,000
TOTAL JOINT REPURCHASE AGREEMENT ACCOUNT II	\$7,105,500,000			\$7,106,119,315

### Notes to Financial Statements (continued)

April 30, 2004 (Unaudited)

#### 6. LINE OF CREDIT FACILITY

The Funds participate in a \$350,000,000 committed, unsecured revolving line of credit facility. Under the most restrictive arrangement, each Fund must own securities having a market value in excess of 400% of the total bank borrowings. This facility is to be used solely for temporary or emergency purposes. The interest rate on borrowings is based on the federal funds rate. The committed facility also requires a fee to be paid by the Funds based on the amount of the commitment that has not been utilized. During the six months ended April 30, 2004, the Funds did not have any borrowings under this facility.

#### 7. OTHER MATTERS

As of April 30, 2004, Goldman, Sachs & Co. Profit Sharing Master Trust was the beneficial owner of approximately 38% of the outstanding shares of the Short Duration Government Fund.

Legal Proceedings — Purported class and derivative action lawsuits were filed April and May 2004 in the United States District Court for the Southern District of New York against GSAM and certain related parties, including certain Goldman Sachs Funds and the Trustees and Officers of the Trust. Since April 2nd several additional lawsuits have been filed against the same dependents. The actions allege violations of the Act, the Investment Advisers Act of 1940 and common law breach of fiduciary duty. The complaints allege, among other things, that between April 2, 1999 and January 9, 2004 (the "Class Period"), GSAM charged the Goldman Sachs Funds improper Rule 12b-1 fees; made improper brokerage commission and other payments to brokers that sold shares of the Goldman Sachs Funds; and made untrue statements of material fact in registration statements and reports filed pursuant to the Act. Based on currently available information, GSAM believes that the likelihood that the purported class action lawsuits will have a material adverse financial impact on the Funds is remote, and the pending actions are not likely to materially affect its ability to provide investment management services to its clients, including the Goldman Sachs Funds.

#### 8. ADDITIONAL TAX INFORMATION

As of the most recent fiscal year ended October 31, 2003, the Funds' capital loss carryforwards and certain timing differences on a tax basis were as follows:

	Enhanced Income	Duration Government	Short Duration Government	Government Income	Core Fixed Income
Timing differences (dividends payable, straddles)	\$ (290,091)	\$ (2,266,374)	\$ (548,843)	\$(147,665)	\$(1,365,552)
Capital loss carryforward:					
Expiring 2004	_	(1,145,861)	(871,596)		_
Expiring 2005	_	_	(136,643)	_	_

Expiring 2007	_	(1,739,320)	(3,752,449)	_	_
Expiring 2008	_	(2,563,050)	(2,289,664)	_	_
Expiring 2009	(8,296,566)	_	_	_	_
Expiring 2010	(65,331,932)	(55,038,717)	_	_	_
Expiring 2011		(55,738,584)	(2,359,021)	_	_
	_	_	_	_	_
Total capital loss carryforward:	\$(73,628,498)	\$(116,530,177)	\$(9,409,373)	\$ —	\$ —

#### 8. ADDITIONAL TAX INFORMATION (continued)

At April 30, 2004, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes was as follows:

	Enhanced Income	Ultra-Short Duration Government	Short Duration Government	Government Income	U.S. Mortgage	Core Fixed Income	Investment Grade Credit
Tax Cost	\$1,189,366,372	\$1,826,428,174	\$894,453,849	\$703,365,208	\$333,979,104	\$1,336,074,311	\$31,937,344
Gross unrealized gain Gross unrealized loss	12,529,383 (2,975,612)	6,147,628 (14,715,352)	5,818,305 (13,598,926)	(1,145,568) (3,227,581)	154,129 (2,215,664)	4,221,515 (3,871,575)	68,356 (525,637)
Net unrealized security gain (loss)	\$ 9,553,771	\$ (8,567,724)	\$ (7,780,621)	\$ (4,373,149)	\$ (2,061,535)	\$ 349,940	\$ (457,281)

The difference between book-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales, net mark-to-market gains on futures and foreign currency contracts recognized for tax purposes and differing treatment of amortization of market premium.

<sup>(</sup>a) Assumes investment at the net asset value at the beginning of the period, reinvestment of all dividends and distributions, a complete redemption of the investment at the net asset value at the end of the period and no sales or redemption charges. Total return would be reduced if a sales or redemption charge were taken into account. Total returns for periods less than one full year are not annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of Fund shares.

<sup>(</sup>b) Annualized.

<sup>(</sup>c) Calculated based on the average shares outstanding methodology.

				expense	reductions

<sup>(</sup>a) Assumes investment at the net asset value at the beginning of the period, reinvestment of all dividends and distributions, a complete redemption of the investment at the net asset value at the end of the period and no sales or redemption charges. Total return would be reduced if a sales or redemption charge were taken into account. Total returns for periods less than one full year are not annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of Fund shares.

<sup>(</sup>b) Annualized.

<sup>(</sup>c) Calculated based on the average shares outstanding methodology.

<sup>(</sup>d) Includes the effect of mortgage dollar roll transactions.

<sup>(</sup>e) Administration Class shares were liquidated on July 20,1999. Ending net asset value shown as of July 20, 1999.

<sup>(</sup>f) As required, effective November 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing all premiums and discounts on debt securities. The effect of this change for the year ended October 31, 2002 was to decrease net investment income per share by \$0.05, increase net realized and unrealized gains and losses per share by \$0.05, and decrease the ratio of net investment income to average net assets with and without expense reductions by 0.48%. Per share ratios and supplemental data for periods prior to November 1, 2001 have not been restated to reflect this change in presentation.

### Goldman Sachs Funds

Goldman Sachs is a premier financial services firm, known since 1869 for creating thoughtful and customized investment solutions in complex global markets.

Today, Goldman Sachs Asset Management, L.P. and other units of the Investment Management Division of Goldman Sachs serve a diverse set of clients worldwide, including private institutions, public entities and individuals. With portfolio management teams located around the world — and \$400.1 billion in assets under management as of March 31, 2004 — our investment professionals bring firsthand knowledge of local markets to every investment decision, making us one of the few truly global asset managers.

### THE GOLDMAN **SACHS ADVANTAGE**

Our goal is to deliver:

### Strong, Consistent **Investment Results**

- Global Resources and Global Research
- Team Approach
- Disciplined Processes

### Innovative, Value-Added **Investment Products**

- Thoughtful Solutions
- Risk Management

### Outstanding **Client Service**

- Dedicated Service **Teams**
- Excellence and Integrity

### **GOLDMAN SACHS FUNDS**

In building a globally diversified portfolio, you can select from more than 50 Goldman Sachs Funds and gain access to investment opportunities across borders, investment styles, asset classes and security capitalizations.

The reports concerning the Funds included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Funds in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Funds, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Funds. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request by calling 1-800-526-7384 (for Retail Shareholders) or 1-800-621-2550 (for Institutional Shareholders); and (ii) on the Securities and Exchange Commission Web site at http://www.sec.gov.

This material is not authorized for distribution to prospective investors unless preceded or accompanied by a current Prospectus. Please consider a fund's objectives, risks, and charges and expenses, and read the Prospectus carefully before investing.

The Goldman Sachs Government Income, Goldman Sachs Short Duration Government and Goldman Sachs Ultra-Short Duration Government Funds' net asset values and yields are not guaranteed by the U.S. government or by its agencies, instrumentalities or sponsored enterprises.

The Goldman Sachs Core Fixed Income and Investment Grade Credit Funds' foreign investments may be more volatile than an investment in U.S. securities and are subject to the risks of currency fluctuations and political developments.

The Goldman Sachs Enhanced Income Fund is not a money market fund. Investors in this Fund should understand that the net asset value of the Fund will fluctuate which may result in a loss of a portion of the principal amount invested.

The Goldman Sachs U.S. Mortgages Fund will be subject to prepayment risk, the risk that in a declining interest rate environment the Fund's underlying mortgages may be prepaid, causing the Fund to have to reinvest assets at lower interest rates.

The Fund will be subject to yield and total return fluctuations based on rising and falling interest rates. Longer-term bonds will normally have more price volatility.

Goldman, Sachs & Co. is the distributor of the Goldman Sachs Funds.

#### ITEM 2. CODE OF ETHICS.
