GOAL/APPROACH

The fund seeks as high a level of current income exempt from federal income tax as is consistent with the preservation of capital. To pursue this goal, the fund normally invests at least 80% of its assets in municipal bonds issued by the state of Florida, its political subdivisions, authorities and corporations, and certain other securities that provide income exempt from federal income tax. The fund is intended for Florida residents only. The fund generally maintains a dollar-weighted average portfolio maturity between three and ten years. While the fund generally intends to invest only in securities rated investment grade or the unrated equivalent as determined by Dreyfus, it does have the ability to invest up to 20% of its net assets in bonds rated below investment grade (“high yield” or “junk” bonds) or the unrated equivalent as determined by Dreyfus.

The portfolio manager may buy and sell bonds based on credit quality, market outlook and yield potential. In selecting municipal bonds for investment, the portfolio manager may assess the current interest rate environment and the municipal bond’s potential volatility in different rate environments. The portfolio manager focuses on bonds with the potential to offer attractive current income, typically looking for bonds that can provide consistently attractive current yields or that are trading at competitive market prices. A portion of the fund’s assets may be allocated to “discount” bonds, which are bonds that sell at a price below their face value, or to “premium” bonds, which are bonds that sell at a price above their face value. The fund’s allocation to either discount bonds or to premium bonds will change along with the portfolio manager’s changing views of the current interest rate and market environment. The portfolio manager also may look to select bonds that are most likely to obtain attractive prices when sold.

Although the fund’s seeks to provide income exempt from federal income tax, interest from some of its holdings may be subject to the federal alternative minimum tax. In addition, the fund temporarily may invest in taxable bonds and/or municipal bonds issued by states other than Florida, including when the portfolio manager believes that acceptable Florida municipal bonds are unavailable for investment.

The fund may, but is not required to, use derivatives, such as options, futures and swap agreements, as a substitute for taking a position in an underlying asset, to increase returns, to manage credit or interest rate risk, or as part of a hedging strategy. The fund may buy securities that pay interest at rates that float inversely with changes in prevailing interest rates (“inverse floaters”) and may make forward commitments in which the fund agrees to buy or sell a security in the future at a price agreed upon today. Inverse floaters are created by depositing municipal bonds in a trust which divides the bond’s income stream into two parts: a short-term variable rate demand note and a residual interest bond (the inverse floater) which receives interest based on the remaining cash flow of the trust after payment of interest on the note and various trust expenses. Interest on the inverse floater usually moves in the opposite direction as the interest on the variable rate demand note.

Concepts to understand

Municipal bonds: debt securities that provide income free from federal income tax, and state income tax if you live in the issuing state. Municipal bonds are typically of two types:

- **general obligation bonds**, which are secured by the full faith and credit of the issuer and its taxing power
- **revenue bonds**, which are payable from the revenues derived from a specific revenue source, such as charges for water and sewer service or highway tolls

Dollar-weighted average maturity: an average of the stated maturities of the bonds held by the fund, based on their dollar-weighted proportions in the fund.

Investment grade bonds: independent rating organizations analyze and evaluate a bond issuer’s, and/or any credit enhancer’s, credit profile and ability to repay debts. Based on their assessment, these rating organizations assign letter grades that reflect the issuer’s, and/or any credit enhancer’s, creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, which means you could lose money.

- *Interest rate risk.* Prices of municipal bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the fund's portfolio, the more the fund's share price is likely to react to interest rates.
- *Call risk.* Some municipal bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield. During periods of market illiquidity or rising interest rates, prices of a fund's "callable" issues are subject to increased price fluctuation.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a municipal bond, can cause the bond's price to fall, potentially lowering the fund's share price. Although the fund invests principally in investment grade bonds, it may invest to a limited extent in high yield ("junk") bonds, which involve greater credit risk, including the risk of default, than investment grade bonds, and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Liquidity risk.* The secondary market for certain municipal bonds tends to be less well developed or liquid than many other securities markets, which may adversely affect a fund's ability to sell such municipal bonds at attractive prices. When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.
- *State-specific risk.* The fund is subject to the risk that Florida's economy, and the revenues underlying its municipal bonds, may decline. Investing primarily in a single state makes the fund more sensitive to risks specific to the state and may magnify other risks.
- *Market sector risk.* The fund's overall risk level will depend on the market sectors in which the fund is invested and the current interest rate, liquidity and credit quality of such sectors. The fund may significantly overweight or underweight certain industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those industries or sectors.
- *Tax risk.* To be tax-exempt, municipal bonds generally must meet certain regulatory requirements. Although the fund will invest in municipal bonds that pay interest that is exempt, in the opinion of counsel to the issuer (or on the basis of other authority believed by Dreyfus to be reliable), from federal income tax, if any such municipal bond fails to meet these regulatory requirements, the interest received by the fund from its investment in such bonds and distributed to fund shareholders will be taxable.

- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to securities, indexes and interest rates), swaps, and inverse floaters. Certain derivatives may cause taxable income. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Leveraging risk.* The use of leverage, such as lending portfolio securities, engaging in forward commitment transactions and investing in inverse floating rate securities, may cause taxable income and may magnify the fund's gains or losses.
- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities or money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Lehman Brothers 7-Year Municipal Bond Index, an unmanaged benchmark of total return performance for intermediate municipal bonds. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Best Quarter: Q3 '02 **+4.42%**
Worst Quarter: Q2 '04 **-2.48%**

Average annual total returns as of 12/31/06

	1 Year	5 Years	10 Years
Fund <i>returns before taxes</i>	3.24%	3.94%	4.16%
Fund <i>returns after taxes on distributions</i>	3.23%	3.88%	4.09%
Fund <i>returns after taxes on distributions and sale of fund shares</i>	3.47%	3.92%	4.15%
Lehman Brothers 7-Year Municipal Bond Index <i>reflects no deduction for fees, expenses or taxes</i>	3.98%	4.89%	5.22%

Unlike the fund, the index is not geographically limited (it is not composed of bonds of a single state).

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Shareholder transaction fees are paid from your account. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

Fee table

Shareholder transaction fees	
<i>% of transaction amount</i>	
Maximum redemption fee <i>charged only when selling shares you have owned for less than 30 days</i>	1.00%
Annual fund operating expenses	
<i>% of average daily net assets</i>	
Management fees	0.60%
Shareholder services fee	0.06%
Other expenses	0.13%
Total	0.79%

Expense example

1 Year	3 Years	5 Years	10 Years
\$81	\$252	\$439	\$978

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

Shareholder services fee: a fee of up to 0.25% used to reimburse the fund's distributor for shareholder account service and maintenance.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$192 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.60% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's semiannual report for the six month period ended June 30, 2006. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.8 trillion in assets under management, administration or custody, including \$1.034 trillion under management.

On December 4, 2006, Mellon Financial and The Bank of New York Company, Inc. (BNY) announced that they had entered into a definitive agreement to merge. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals and the approval of BNY's and Mellon Financial's shareholders, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Douglas J. Gaylor has been the fund's primary portfolio manager since August 2006. Mr. Gaylor joined Dreyfus as a portfolio manager in 1996. The fund's Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Your Investment

ACCOUNT POLICIES

Buying shares

You pay **no sales charges** to invest in this fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time) on days the exchange is open for regular business.

Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Because the fund seeks tax-exempt income, it is not recommended for purchase in IRAs or other qualified retirement plans.

When calculating its NAV, the fund's investments generally are valued by an independent pricing service approved by the fund's board. The pricing service's procedures are reviewed under the general supervision of the board. If valuations for investments (received from the pricing service or otherwise) are not readily available, or are determined not to reflect accurately fair value, the fund may value those investments at fair value as determined in accordance with the procedures approved by the fund's board. Fair value of investments may be done by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price investments may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values.

Investments in certain municipal bonds and thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Third-party investments

If you invest through a third party (rather than directly with Dreyfus), the policies and fees may be different than those described herein. Banks, brokers, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your financial institution for further information.

Concepts to understand

Net asset value (NAV): a mutual fund's share price on a given day. A fund's NAV is calculated by dividing the value of its net assets by the number of its existing shares outstanding.

Minimum investments

	Initial	Additional
Regular accounts	\$2,500	\$100
Dreyfus automatic investment plans	\$100	\$100

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling or writing a check against shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not honor redemption checks, or process wire, telephone, online or Dreyfus TeleTransfer redemption requests, for up to eight business days following the purchase of those shares

Short-term trading can disrupt the fund's investment program and create additional costs for long-term shareholders. For these reasons, if you are selling or exchanging shares you have owned for less than 30 days, the fund may deduct a 1% redemption fee.

Subject to the exceptions described below, you will be subject to the fund's redemption fee, whether you are holding shares directly in your name or indirectly through an intermediary, such as a broker, bank, investment adviser, recordkeeper for retirement plan participants, or any other third party. If you hold your shares through an intermediary's omnibus account, the intermediary is responsible for imposing the fee and remitting the fee to the fund.

The redemption fee will be charged and retained by the fund on shares sold before the end of the required holding period. Dreyfus will use the "first-in, first-out" method to determine the holding period for the shares sold. Under this method, shares held the longest will be redeemed or exchanged first. The holding period commences on the day after your purchase order is effective.

The fund will not assess a redemption fee on fund shares (1) redeemed through automatic withdrawal plans or automatic exchange plans; (2) redeemed through certain comprehensive fee programs, such as wrap fee accounts and automated rebalancing or asset allocation programs offered by financial intermediaries (including those sponsored by Dreyfus or its affiliates); (3) acquired by the reinvestment of fund dividends or capital gain distributions; (4) redeemed by the fund (e.g., for failure to meet account minimums or to cover various fees); (5) purchased or redeemed by rollover, transfers and changes of account registration, provided that the investment remains in the fund; (6) purchased by other mutual funds, if approved by Dreyfus; (7) held in accounts in which there are legal or contractual restrictions on the imposition of a redemption fee as determined by the fund in its sole discretion; (8) redeemed as a result of death, disability or a Qualified Domestic Relations Order; (9) redeemed through the check-writing privilege, if any, and (10) converted from one share class to another in the fund.

In addition, the fund will not impose redemption fees on certain types of retirement plan transactions processed through a participant recordkeeping system supported by Dreyfus or through third party recordkeepers. These transactions include: (1) redemptions of shares purchased with new contributions to the plan, such as payroll contributions, excess contributions, and loan repayments; (2) shares redeemed for withdrawals and distributions, such as minimum required distributions, systematic withdrawal programs, and lump sum distributions; (3) shares redeemed by participation in automated account rebalancing programs or other systematic participant investment advice programs approved by the plan sponsor; (4) shares purchased or redeemed as a result of plan sponsor decisions, such as changes in investment options, automated account rebalancing programs, and plan termination or merger; (5) shares redeemed for loans, or following a hardship specified in the retirement plan documents; and (6) forfeitures or redemptions in connection with a participant's termination of employment.

If you hold your shares through a financial intermediary that does not process your share transactions in an omnibus account, the intermediary is responsible for providing Dreyfus with the information necessary to enable you to receive any redemption fee waivers to which you may be entitled. The fund reserves the right to withdraw waivers in its sole discretion without notice if the fund determines that an account is engaging in frequent trading or other activities detrimental to the fund.

Due to operational limitations or restrictions, retirement plans and intermediaries that maintain omnibus accounts with the fund may calculate redemption fees differently than the fund. However, redemptions made through a participant-initiated balance transfer will be subject to the fund's redemption fee if such shares were purchased through a participant-initiated balance transfer. If

you are investing in fund shares through an intermediary please contact the intermediary for more information on any differences in how the redemption fee may be applied to your investment in the fund.

Limitations on selling shares by phone or online through www.dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Moreover, the intermediaries agree that the fund's procedures relating to all orders and the handling thereof will be subject to the terms of the prospectus and the distributor's written instructions. In order to seek assurances that such intermediaries comply with rules and regulations, all intermediaries, including those whose trades occur through omnibus accounts, have been sent written reminders of their obligations under the selling agreements, specifically highlighting rules relating to late trading. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in thinly traded municipal bonds, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's redemption fee and frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends once a month and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

The fund anticipates that virtually all dividends paid to you will be exempt from federal personal income tax. However, for federal tax purposes, certain distributions, such as distributions of short-term capital gains, are taxable to you as ordinary income, while long-term capital gains are taxable to you as capital gains.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

For investing

Dreyfus Automatic Asset Builder®	For making automatic investments from a designated bank account.
Dreyfus Payroll Savings Plan	For making automatic investments through a payroll deduction.
Dreyfus Government Direct Deposit Privilege	For making automatic investments from your federal employment, Social Security or other regular federal government check.
Dreyfus Dividend Sweep	For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege	For making regular exchanges from one Dreyfus fund into another.
--	--

For selling shares

Dreyfus Automatic Withdrawal Plan	For making regular withdrawals from most Dreyfus funds.
--	---

Dreyfus Financial Centers

Dreyfus offers a full array of investment services and products through Dreyfus Financial Centers. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial advisors can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find out whether a Financial Center is near you, call **1-800-645-6561**.

Checkwriting privilege

You may write redemption checks against your account in amounts of \$500 or more. These checks are free; however, a fee may be charged if you request a stop payment or if the transfer agent cannot honor a redemption check due to insufficient funds or another valid reason. Please do not post-date your checks or use them to close your account.

Exchange privilege

You can exchange shares worth \$500 or more from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). Although there is currently no fee for exchanges, the fund may deduct a 1% redemption fee if you are selling or exchanging shares you have owned for less than 30 days, and you also may be charged a sales load when exchanging into any fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

In Writing

Complete the application.

Mail your application and a check to:
The Dreyfus Family of Funds
P.O. Box 55299, Boston, MA 02205-8553

TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:

DESCRIPTION OF THE FUND

The Fund is a Massachusetts business trust that commenced operations on January 21, 1992. The Fund is an open-end management investment company, known as a municipal bond fund. As a municipal bond fund, the Fund invests in debt obligations issued by states, territories, and possessions of the United States and the District of Columbia and their political subdivisions, agencies and instrumentalities, or multistate agencies or authorities, and certain other specified securities, the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal income tax (“Municipal Bonds”).

The Dreyfus Corporation (the “Manager” or “Dreyfus”) serves as the Fund’s investment adviser.

Dreyfus Service Corporation (the “Distributor”) is the distributor of the Fund’s shares.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund’s Prospectus.

Florida Municipal Bonds. As a fundamental policy, the Fund normally invests at least 80% of the value of its net assets (including any borrowings for investment purposes) in Municipal Bonds of the State of Florida, its political subdivisions, authorities and corporations, and certain other specified securities, that provide income exempt from Federal income tax and which enable the Fund’s shares to be exempt from the Florida intangible personal property tax (collectively, “Florida Municipal Bonds”). To the extent acceptable Florida Municipal Bonds are at any time unavailable for investment by the Fund, the Fund will invest temporarily in other Municipal Bonds the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal income tax. Municipal Bonds generally include debt obligations issued to obtain funds for various public purposes as well as certain industrial development bonds issued by or on behalf of public authorities. Municipal Bonds are classified as general obligation bonds, revenue bonds and notes. General obligation bonds are secured by the issuer’s pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenue derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Tax exempt industrial development bonds, in most cases, are revenue bonds that do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. Notes are short-term instruments which are obligations of the issuing municipalities or agencies and are sold in anticipation of a bond sale, collection of taxes or receipt of other revenues. Municipal Bonds include municipal lease/purchase agreements which are similar to installment purchase contracts for property or equipment issued by municipalities. Municipal Bonds bear fixed, floating or variable rates of interest, which are determined in some instances by formulas under which the securities’ interest rate will change directly or inversely to changes in interest rates or an index, or multiples thereof, in many cases subject to a maximum and minimum. Certain Municipal Bonds are subject to

redemption at a date earlier than their stated maturity pursuant to call options, which may be separated from the related Municipal Bond and purchased and sold separately.

The yields on Municipal Bonds are dependent on a variety of factors, including general economic and monetary conditions, money market factors, conditions in the Municipal Bond market, size of a particular offering, maturity of the obligation and rating of the issue.

Municipal Bonds include certain private activity bonds (a type of revenue bond), the income from which is subject to the alternative minimum tax (AMT). The Fund may invest without limitation in such Municipal Bonds if the Manager determines that their purchase is consistent with the Fund's investment objective.

Certain Tax Exempt Obligations. The Fund may purchase floating and variable rate demand notes and bonds, which are tax exempt obligations ordinarily having stated maturities in excess of one year, but which permit the holder to demand payment of principal at any time or at specified intervals. Variable rate demand notes include master demand notes which are obligations that permit the Fund to invest fluctuating amounts, at varying rates of interest, pursuant to direct arrangements between the Fund, as lender, and the borrower. These obligations permit daily changes in the amount borrowed. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded, and there generally is no established secondary market for these obligations, although they are redeemable at face value, plus accrued interest. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund's right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Each obligation purchased by the Fund will meet the quality criteria established for the purchase of Municipal Bonds.

Tax Exempt Participation Interests. The Fund may purchase from financial institutions participation interests in Municipal Bonds (such as industrial development bonds and municipal lease/purchase agreements). A participation interest gives the Fund an undivided interest in the obligation in the proportion that the Fund's participation interest bears to the total principal amount of the obligation. These instruments may have fixed, floating or variable rates of interest. If the participation interest is unrated, it will be backed by an irrevocable letter of credit or guarantee of a bank that the Fund's Board has determined meets prescribed quality standards for banks, or the payment obligation otherwise will be collateralized by U.S. Government securities. For certain participation interests, the Fund will have the right to demand payment, on not more than seven days' notice, for all or any part of the Fund's participation interest in the obligation, plus accrued interest. As to these instruments, the Fund intends to exercise its right to demand payment only upon a default under the terms of the obligation, as needed to provide liquidity to meet redemptions, or to maintain or improve the quality of its investment portfolio.

Municipal lease obligations or installment purchase contract obligations (collectively, "lease obligations") have special risks not ordinarily associated with Municipal Bonds. Although lease obligations do not constitute general obligations of the municipality for which the municipality's taxing power is pledged, a lease obligation ordinarily is backed by the municipality's covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations in which the Fund may invest contain

“non-appropriation” clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although “non-appropriation” lease obligations are secured by the leased property, disposition of the property in the event of foreclosure might prove difficult. Certain lease obligations may be considered illiquid. Determination as to the liquidity of such securities is made in accordance with guidelines established by the Fund’s Board of Trustees. Pursuant to such guidelines, the Board has directed the Manager to monitor carefully the Fund’s investment in such securities with particular regard to: (1) the frequency of trades and quotes for the lease obligation; (2) the number of dealers willing to purchase or sell the lease obligation and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the lease obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the lease obligation, the method of soliciting offers and the mechanics of transfer; and (5) such other factors concerning the trading market for the lease obligation as the Manager may deem relevant. In addition, in evaluating the liquidity and credit quality of a lease obligation that is unrated, the Fund’s Board of Trustees has directed the Manager to consider: (a) whether the lease can be canceled; (b) what assurance there is that the assets represented by the lease can be sold; (c) the strength of the lessee’s general credit (e.g., its debt, administrative, economic, and financial characteristics); (d) the likelihood that the municipality will discontinue appropriating funding for the leased property because the property is no longer deemed essential to the operations of the municipality (e.g., the potential for an “event of nonappropriation”); (e) the legal recourse in the event of failure to appropriate; and (f) such other factors concerning credit quality as the Manager may deem relevant. The Fund will not invest more than 15% of the value of its net assets in lease obligations that are illiquid and in other illiquid securities.

Tender Option Bonds. The Fund may purchase tender option bonds. A tender option bond is a Municipal Bond or other debt obligation (generally held pursuant to a custodial arrangement) having a relatively long maturity and bearing interest at a fixed rate substantially higher than prevailing short-term tax exempt rates, that has been coupled with the agreement of a third party, such as a bank, broker-dealer or other financial institution, pursuant to which such institution grants the security holders the option, at periodic intervals, to tender their securities to the institution and receive the face value thereof. As consideration for providing the option, the financial institution receives periodic fees equal to the difference between the obligation’s fixed coupon rate and the rate, as determined by a remarketing or similar agent at or near the commencement of such period, that would cause the securities, coupled with the tender option, to trade at par on the date of such determination. Thus, after payment of this fee, the security holder effectively holds a demand obligation that bears interest at the prevailing short-term tax exempt rate. The Manager, on behalf of the Fund, will consider on an ongoing basis the creditworthiness of the issuer of the underlying obligation, of any custodian and of the third party provider of the tender option. In certain instances and for certain tender option bonds, the option may be terminable in the event of a default in payment of principal or interest on the underlying obligation and for other reasons.

The Fund will purchase tender option bonds only when the Manager is satisfied that the custodial and tender option arrangements, including the fee payment arrangements, will not adversely affect the tax exempt status of the underlying obligations and that payment of any tender fees will not have the effect of creating taxable income for the Fund. Based on the tender

option bond agreement, the Fund expects to be able to value the tender option bond at par; however, the value of the instrument will be monitored to assure that it is valued at fair value.

Custodial Receipts. The Fund may purchase custodial receipts representing the right to receive certain future principal and interest payments on Municipal Bonds or other debt obligations which underlie the custodial receipts. A number of different arrangements are possible. In a typical custodial receipt arrangement, an issuer or a third party owner of obligations deposits such obligations with a custodian in exchange for two classes of custodial receipts. The two classes have different characteristics, but, in each case, payments on the two classes are based on payments received on the underlying obligations. One class has the characteristics of a typical auction rate security, where at specified intervals its interest rate is adjusted, and ownership changes, based on an auction mechanism. This class's interest rate generally is expected to be below the coupon rate of the underlying obligations and generally is at a level comparable to that of an obligation of similar quality and having a maturity equal to the period between interest rate adjustments. The second class bears interest at a rate that exceeds the interest rate typically borne by a security of comparable quality and maturity; this rate also is adjusted, but in this case inversely to changes in the rate of interest of the first class. The aggregate interest paid with respect to the two classes will not exceed the interest paid by the underlying obligations. The value of the second class and similar securities typically fluctuates more than the value of an obligation of comparable quality and maturity, which would increase the volatility of the Fund's net asset value. These custodial receipts are sold in private placements. The Fund also may purchase directly from issuers, and not in a private placement, obligations having characteristics similar to custodial receipts. These securities may be issued as part of a multi-class offering and the interest rate on certain classes may be subject to a cap or floor.

Inverse Floaters. The Fund may invest in residual interest Municipal Bonds whose interest rates bear an inverse relationship to the interest rate on another security or the value of an index ("inverse floaters"). An investment in inverse floaters may involve greater risk than an investment in a fixed-rate Municipal Bond. Because changes in the interest rate on the other security or index inversely affect the residual interest paid on the inverse floater, the value of an inverse floater is generally more volatile than that of a fixed-rate Municipal Bond. Inverse floaters have interest rate adjustment formulas which generally reduce or, in the extreme, eliminate the interest paid to the Fund when short-term interest rates rise, and increase the interest paid to the Fund when short-term interest rates fall. Although volatile, inverse floaters typically offer the potential for yields exceeding the yields available on fixed-rate Municipal Bonds with comparable credit quality, coupon, call provisions and maturity. These securities usually permit the investor to convert the floating rate to a fixed rate (normally adjusted downward), and this optional conversion feature may provide a partial hedge against rising rates if exercised at an opportune time.

Inverse floaters typically are derivative instruments created by depositing Municipal Bonds in a trust which divides the bond's income stream into two parts: a short-term variable rate demand note and a residual interest bond (the inverse floater) which receives interest based on the remaining cash flow of the trust after payment of interest on the note and various trust expenses. Interest on the inverse floater usually moves in the opposite direction as the interest on the variable rate demand note. The Fund may either participate in structuring an inverse

floater or purchase an inverse floater in the secondary market. When structuring an inverse floater, the Fund will transfer to a trust fixed rate Municipal Bonds held in the Fund's portfolio. The trust then typically issues the inverse floaters and the variable rate demand notes that are collateralized by the cash flows of the fixed rate Municipal Bonds. In return for the transfer of the Municipal Bonds to the trust, the Fund receives the inverse floaters and cash associated with the sale of the notes from the trust. Historically, for accounting purposes the Fund has treated these transfers as sales of the Municipal Bonds (which yielded a gain or loss) and a purchase of the inverse floaters. However, as a result of recent changes in the Fund's accounting treatment of these transactions, the Fund now treats these transfers as part of a secured borrowing or financing transaction (not a sale), and the interest payments and related expenses due on the notes issued by the trusts and sold to third parties as liabilities of the Fund. The financial statements of the Fund have been restated for certain periods to reflect these changes. These changes did not impact the net asset value, total return or net investment income of the Fund. Inverse floaters purchased in the secondary market are treated as the purchase of a security and not as a secured borrowing or financing transaction.

Zero Coupon, Pay-In-Kind and Step-Up Municipal Bonds. The Fund may invest in zero coupon securities, which are Municipal Bonds issued or sold at a discount from their face value that do not entitle the holder to any periodic payment of interest prior to maturity or a specified redemption date or cash payment date; pay-in-kind bonds, which are Municipal Bonds that pay interest through the issuance of additional bonds; and step-up coupon bonds, which are Municipal Bonds that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. For zero coupon securities, the amount of any discount varies depending on the time remaining until maturity or cash payment date, prevailing interest rates, liquidity of the security and perceived credit quality of the issuer. Zero coupon securities also may take the form of Municipal Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interest in such stripped debt obligations and coupons. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of Municipal Bonds that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike Municipal Bonds which pay cash interest throughout the period to maturity, the Fund will realize no cash until the cash payment date unless a portion of such securities is sold and, if the issuer defaults, the Fund may obtain no return at all on its investments.

Ratings of Municipal Bonds. The Fund will invest at least 80% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated no lower than Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and, together with Moody's and S&P, the "Rating Agencies"). The Fund may invest up to 20% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated lower than Baa by Moody's and BBB by S&P and Fitch and as low as the lowest ratings assigned by the Rating Agencies. The Fund also may invest in securities which, while not rated, are determined by the Manager to be of comparable quality to the rated securities in which the Fund may invest; for purposes of the 80% requirement described in this paragraph, such unrated securities will be considered to have the rating so determined.

The average distribution of Fund investments (at value) in Municipal Bonds (including notes) and other securities by ratings for the fiscal year ended December 31, 2006, computed on a monthly basis, was as follows:

<u>Fitch</u>	or	<u>Moody's</u>	or	<u>S&P</u>	Percentage of <u>Value</u>
AAA		Aaa		AAA	86.5%
AA		Aa		AA	7.5
A		A		A	1.8
BBB		Baa		BBB	1.7
F-1+/F-1		VMIG1/MIG1, P-1		SP-1+/SP-1, A-1	0.6
Not Rated		Not Rated		Not Rated	<u>1.9*</u>
					<u>100.0%</u>

Subsequent to its purchase by the Fund, an issue of rated Municipal Bonds may cease to be rated or its rating may be reduced below the minimum required for purchase by the Fund. Neither event will require the sale of such Municipal Bonds by the Fund, but the Manager will consider such event in determining whether the Fund should continue to hold the obligations. To the extent that the ratings given by the Rating Agencies for Municipal Bonds may change as a result of changes in such organizations or their rating systems, the Fund will attempt to use comparable ratings as standards for its investments in accordance with the investment policies described in the Prospectus and this Statement of Additional Information. The ratings of the Rating Agencies represent their opinions as to the quality of the Municipal Bonds which they undertake to rate. It should be emphasized, however, that ratings are relative and subjective and are not absolute standards of quality. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the creditworthiness of the issuers of such securities.

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, and repurchase agreements providing for settlement in more than seven days after notice. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price that the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Investment Companies. The Fund may invest in securities issued by other investment companies. Under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory

* Included in the Not Rated category are securities comprising 1.9% of the Fund's market value which, while not rated, have been determined by the Manager to be of comparable quality to securities in the following rating categories: Baa/BBB (0.6%), Ba/BB (0.9%) and B/B (0.4%).

fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves, or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program, in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above. See "Lending Portfolio Securities."

Taxable Investments. From time to time, on a temporary basis other than for temporary defensive purposes (but not to exceed 20% of the value of the Fund's net assets) or for temporary defensive purposes, the Fund may invest in taxable short-term investments ("Taxable Investments") consisting of: notes of issuers having, at the time of purchase, a quality rating within the two highest grades of a Rating Agency; obligations of the U.S. Government, its agencies or instrumentalities; commercial paper rated not lower than P-2 by Moody's, A-2 by S&P or F-2 by Fitch; certificates of deposit of U.S. domestic banks, including foreign branches of domestic banks, with assets of \$1 billion or more; time deposits; bankers' acceptances and other short-term bank obligations; and repurchase agreements in respect of any of the foregoing. Dividends paid by the Fund that are attributable to income earned by the Fund from Taxable Investments will be taxable to investors. See "Dividends, Distributions and Taxes." Except for temporary defensive purposes, at no time will more than 20% of the value of the Fund's net assets be invested in Taxable Investments. When the Fund has adopted a temporary defensive position, including when acceptable Florida Municipal Bonds are unavailable for investment by the Fund, more than 20% of the Fund's net assets may be invested in securities other than Florida Municipal Bonds. Under normal market conditions, the Fund anticipates that not more than 5% of the value of its total assets will be invested in any one category of Taxable Investments.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund's Prospectus. The Fund's use of certain of the investment techniques described below may give rise to taxable income.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The may make short-sales to hedge positions, for duration and risk management, to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively.

The Fund will not sell securities short if, after such short sale, the total market value of all securities sold short would exceed 25% of the value of the Fund's net assets. The Fund may not make a short sale which results in the Fund having sold short in the aggregate more than 5% of the outstanding securities of any class of an issuer.

The Fund also may make short sales “against the box,” in which the Fund enters into a short sale of a security it owns. At no time will more than 15% of the value of the Fund’s net assets be in deposits on short sales against the box.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund’s investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund’s total assets (including the value of assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or “rebate” from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the “Lending Agent”). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. The Fund may invest in, or enter into, derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than “traditional” securities would. Examples of derivative instruments the Fund may use include options contracts, futures contracts, and swap agreements. The portfolio manager may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its

portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Manager will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the Fund use involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the SEC, the Fund may be required to segregate permissible liquid assets, or engage in other measures approved by the SEC or its staff, to "cover" the Fund's obligations relating to its transactions in derivatives. For example, in the case of futures contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts' full notional value (generally, the total numerical value of the asset underlying a future contract at the time of valuation) while the positions are open. With respect to futures contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligation (*i.e.*, the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. By setting aside assets equal to only its net obligations under cash-settled futures contracts, the Fund may employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts.

The Fund will not be a commodity pool. The Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility, as a registered

investment company for an exclusion from the definition of commodity pool operator and that the Fund is not subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price in or before a specified expiration date.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets. Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures by the Fund also is subject to the Manager's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

Options--In General. The Fund may invest up to 5% of its assets, represented by the premium paid, in the purchase of call and put options. The Fund may write (i.e., sell) covered call and put option contracts to the extent of 20% of the value of its net assets at the time such option contracts are written. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise covers the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or indices listed on national securities exchanges or traded in the over-the-counter market. An option on an index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing stock index options will depend upon price movements in the level of the index rather than the price of a particular security.

The Fund may purchase cash-settled options on interest rate swaps in pursuit of its investment objectives. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange of floating-rate payments for fixed-rate payments) denominated in U.S. dollars. A cash-settled option on a

swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by the Fund of options will be subject to the Manager's ability to predict correctly movements in interest rates. To the extent the Manager's predictions are incorrect, the Fund may incur losses.

Swap Transactions. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, to mitigate risk, manage duration and reduce portfolio turnover. Swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, may be individually negotiated and include exposure to a variety of different interest rates. Swaps involve two parties exchanging a series of cash flows at specified intervals. In the case of an interest rate swap, the parties exchange interest payments based upon an agreed upon principal amount (referred to as the "notional principal amount"). Under the most basic scenario, Party A would pay a fixed rate on the notional principal amount to Party B, which would pay a floating rate on the same notional principal amount to Party A. Swap agreements can take many forms and are known by a variety of names.

In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level, while the seller of an interest rate floor is obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

In a typical interest rate lock transaction, if Party A desires to lock in a particular interest rate on a given date it may enter into an agreement to pay, or receive a payment from, Party B based on the yield of a reference index or security, such as a Municipal Bond or U.S. Treasury security. At the maturity of the term of the agreement, one party makes a payment to the other party as determined by the relative change in the yield of the reference security or index. An interest rate lock transaction may be terminated prior to its stated maturity date by calculating the payment due as of the termination date, which generally differs from the make-whole provisions for an early termination of an interest rate swap transaction in which the party terminating the swap early is required to give its counterparty the economic benefit of the transaction.

The Fund will set aside cash or permissible liquid assets to cover its current obligations under swap transactions. If the Fund enters into a swap agreement on a net basis (that is, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments), the Fund will maintain cash or permissible liquid assets with a daily value at least equal to the excess, if any, of the Fund's accrued obligations under the swap agreement over the accrued amount the Fund is entitled to receive under the agreement.

The most important factor in the performance of a swap agreement is the change in the specific interest rate or other factor(s) that determine the amounts of payments due to and from the Fund. If a swap agreement called for payments by the Fund, the Fund must be prepared to

make such payments when due. In addition, if the counterparty's creditworthiness declines, the value of a swap agreement would likely decline, potentially resulting in losses.

The Fund will enter into swaps, interest rate locks, caps, collars and floors only with banks and recognized securities dealers believed by the Manager to present minimal credit risks. If there were a default by the other party to such transaction, the Fund will have to rely on its contractual remedies (which may be limited by bankruptcy, insolvency or similar laws) pursuant to the agreement relating to the transaction.

The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these investment techniques were not used. Moreover, even if the Manager is correct in its forecasts, there is a risk that the swap position may correlate imperfectly with the price of the asset or liability being hedged. The Fund will enter into swap transactions only when the Manager believes it would be in the best interests of the Fund's shareholders to do so. Depending on the circumstances, gains from a swap transaction can be treated either as taxable ordinary income or as short- or long-term capital gains.

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or this Statement of Additional Information.

Borrowing Money. The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. The Fund currently intends to borrow money only for temporary or emergency (not leveraging) purposes, in an amount up to 15% of the value of its total assets (including the amount borrowed) valued at the lesser of cost or market, less liabilities (not including the amount borrowed) at the time the borrowing is made. While such borrowings exceed 5% of the Fund's total assets, the Fund will not make any additional investments.

Stand-By Commitments. The Fund may acquire "stand-by commitments" with respect to Municipal Bonds held in its portfolio. Under a stand-by commitment, the Fund obligates a broker, dealer or bank to repurchase, at the Fund's option, specified securities at a specified price and, in this respect, stand-by commitments are comparable to put options. The exercise of a stand-by commitment, therefore, is subject to the ability of the seller to make payment on demand. The Fund will acquire stand-by commitments solely to facilitate its portfolio liquidity and does not intend to exercise its rights thereunder for trading purposes. The Fund may pay for stand-by commitments if such action is deemed necessary, thus increasing to a degree the cost of the underlying Municipal Bond and similarly decreasing such security's yield to investors. Gains realized in connection with stand-by commitments will be taxable. The Fund also may acquire call options on specific Municipal Bonds. The Fund generally would purchase these call

options to protect the Fund from the issuer of the related Municipal Bond redeeming, or other holder of the call option from calling away, the Municipal Bond before maturity. The sale by the Fund of a call option that it owns on a specific Municipal Bond could result in the receipt of taxable income by the Fund.

Forward Commitments. The Fund may purchase and sell Municipal Bonds and other securities on a forward commitment, when-issued or delayed delivery basis, which means that delivery and payment take place in the future after the date of the commitment to purchase. The payment obligation and the interest rate receivable on a forward commitment, when-issued or delayed delivery security are fixed when the Fund enters into the commitment, but the Fund does not make payment until it receives delivery from the counterparty. The Fund will commit to purchase such securities only with the intention of actually acquiring the securities, but the Fund may sell these securities before the settlement date if it is deemed advisable. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Municipal Bonds or other securities purchased on a forward commitment, when-issued or delayed delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment, when-issued or delayed delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment, when-issued or delayed delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

Certain Investment Considerations and Risks

Investing in Municipal Bonds. The Fund may invest more than 25% of the value of its total assets in Municipal Bonds which are related in such a way that an economic, business or political development or change affecting one such security also would affect the other securities; for example, securities the interest upon which is paid from revenues of similar types of projects. As a result, the Fund may be subject to greater risk as compared to a municipal bond fund that does not follow this practice.

Certain provisions in the Internal Revenue Code of 1986, as amended (the "Code"), relating to the issuance of Municipal Bonds may reduce the volume of Municipal Bonds qualifying for Federal tax exemption. One effect of these provisions could be to increase the cost of the Municipal Bonds available for purchase by the Fund and thus reduce available yield. Shareholders should consult their tax advisers concerning the effect of these provisions on an investment in the Fund. Proposals that may restrict or eliminate the income tax exemption for interest on Municipal Bonds may be introduced in the future. If any such proposal were enacted that would reduce the availability of Florida Municipal Bonds for investment by the Fund so as to adversely affect Fund shareholders, the Fund would reevaluate its investment objective and

policies and submit possible changes in the Fund's structure to shareholders for their consideration. If legislation were enacted that would treat a type of Florida Municipal Bonds as taxable, the Fund would treat such security as a permissible Taxable Investment within the applicable limits set forth herein.

Investing in Florida Municipal Bonds. Because the Fund is concentrated in securities issued by Florida or entities within Florida, an investment in the Fund may involve greater risk than investments in certain other types of municipal bond funds. You should consider carefully the special risks inherent in the Fund's investment in Florida Municipal Bonds. You should review "Appendix A" which provides a brief summary of special investment considerations and risk factors relating to investing in Florida Municipal Bonds.

Lower Rated Bonds. The Fund may invest up to 20% of the value of its net assets in higher yielding (and, therefore, higher risk) debt securities such as those rated below investment grade by the Rating Agencies (commonly known as "high yield" or "junk" bonds). They may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated debt securities. See "Appendix B" for a general description of the Rating Agencies' ratings of Municipal Bonds. Although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of these bonds. The Fund will rely on the Manager's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

The market values of many of these bonds tend to be more sensitive to economic conditions than are higher rated securities and will fluctuate over time. These bonds generally are considered by the Rating Agencies to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and generally will involve more credit risk than securities in the higher rating categories.

Because there is no established retail secondary market for many of these securities, the Fund anticipates that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these bonds does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, the Manager's judgment may play a greater role in valuation because less reliable, objective data may be available.

These bonds may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of such securities to repay principal and pay interest thereon which would increase the incidence of default for such securities. It is likely that any economic recession also would disrupt severely the market for such securities and may have an adverse impact on their value.

The Fund may acquire these bonds during an initial offering. Such securities may involve special risks because they are new issues. The Fund has no arrangement with any person concerning the acquisition of such securities, and the Manager will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon bonds, pay-in-kind bonds and step-up bonds, in which the Fund may invest up to 5% of its total net assets. In addition to the risks associated with the credit rating of the issuers, the market prices of these securities may be very volatile during the period no interest is paid.

Investment Restrictions

The Fund's investment objective, and its policy to invest normally at least 80% of its net assets (plus any borrowings for investment purposes) in Florida Municipal Bonds (or other instruments with similar economic characteristics) are fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 7 as fundamental policies. Investment restrictions numbered 8 through 11 are not fundamental policies and may be changed by a vote of a majority of the Fund's Board members at any time. The Fund may not:

1. Invest more than 25% of its assets in the securities of issuers in any single industry; provided that there shall be no limitation on the purchase of Municipal Bonds and, for defensive purposes, securities issued by banks and obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.
2. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowings to no more than 33-1/3% of the value of the Fund's total assets). For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
3. Purchase or sell real estate, commodities or commodity contracts, or oil and gas interests, but this shall not prevent the Fund from investing in Municipal Bonds secured by real estate or interests therein, or prevent the Fund from purchasing and selling options, forward contracts, futures contracts, including those relating to indices, and options on futures contract or indices.
4. Underwrite the securities of other issuers, except that the Fund may bid separately or as part of a group for the purchase of Municipal Bonds directly from an issuer for its own portfolio to take advantage of the lower purchase price available, and except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.
5. Make loans to others, except through the purchase of debt obligations and the entry into repurchase agreements; however, the Fund may lend its portfolio securities in an

amount not to exceed 33-1/3% of the value of its total assets. Any loans of portfolio securities will be made according to guidelines established by the SEC and the Fund's Board.

6. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent that the activities permitted in Investment Restriction Nos. 2, 3 and 10 may be deemed to give rise to a senior security.

7. Purchase securities on margin, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.

8. Purchase securities other than Municipal Bonds and Taxable Investments and those arising out of transactions in futures and options or as otherwise provided in the Fund's Prospectus.

9. Invest in securities of other investment companies, except to the extent permitted under the 1940 Act.

10. Pledge, hypothecate, mortgage or otherwise encumber its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the deposit of assets in escrow in connection with the purchase of securities on a when-issued or delayed delivery basis and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.

11. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid (which securities could include participation interests (including municipal lease/purchase agreements) that are not subject to the demand feature described in the Fund's Prospectus, and floating and variable rate demand obligations as to which the Fund cannot exercise the demand feature described in the Fund's Prospectus on less than seven days' notice and as to which there is no secondary market) if, in the aggregate, more than 15% of its net assets would be so invested.

For purposes of Investment Restriction No. 1, industrial development bonds, where the payment of principal and interest is the ultimate responsibility of companies within the same industry, are grouped together as an "industry."

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 2, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of a change in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

MANAGEMENT OF THE FUND

The Fund’s Board is responsible for the management and supervision of the Fund, and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
Dreyfus Service Corporation.	Distributor
Dreyfus Transfer, Inc.	Transfer Agent
The Bank of New York	Custodian

Board Members of the Fund¹

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

<u>Name (Age)</u> <u>Position with the Fund (Since)</u>	<u>Principal Occupation</u> <u>During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Joseph S. DiMartino (63) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, a provider of certain outdoor-related services to homes and businesses, <i>Director</i>
Gordon J. Davis (65) Board Member (1993)	Partner in the law firm of LeBoeuf, Lamb, Greene & MacRae, LLP President, Lincoln Center for the Performing Arts, Inc. (2001)	Consolidated Edison, Inc., a utility company, <i>Director</i> Phoenix Companies, Inc., a life insurance company, <i>Director</i> Board Member/Trustee for several not-for-profit groups

Philip L. Toia (73) Board Member (1997)	Private Investor	None
Sander Vanocur (78) Board Member (1992)	President of Old Owl Communications	None
Anne Wexler (77) Board Member (1994)	Chairman of the Wexler & Walker Public Policy Associates, consultants specializing in government relations and public affairs	Wilshire Mutual Funds (5 funds), <i>Director</i> Methanex Corporation, a methanol producing company, <i>Director</i> Member of the Council of Foreign Relations Member of the National Park Foundation

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not “interested persons” of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund’s accounting and financial reporting processes and the audits of the Fund’s financial statements and (ii) to assist in the Board’s oversight of the integrity of the Fund’s financial statements, the Fund’s compliance with legal and regulatory requirements and the independent registered public accounting firm’s qualifications, independence and performance. The Fund’s nominating committee, among other things, is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the nominating committee charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee

comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments. The Fund's audit committee met four times during the fiscal year ended December 31, 2006. The compensation, nominating and pricing committees did not meet during the last fiscal year.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2006.

<u>Name of Board Member</u>	<u>Fund</u>	<u>Aggregate Holding of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member</u>
Joseph S. DiMartino	None	Over \$100,000
Gordon J. Davis	None	\$10,001 - \$50,000
David P. Feldman	None	Over \$100,000
Lynn Martin	None	None
Daniel Rose	None	\$50,001 - \$100,000
Sander Vanocur	None	\$1-\$10,000
Philip L. Toia	None	\$1 - \$10,000
Anne Wexler	None	None

As of December 31, 2006, none of the Board members or their immediate family members owned securities of the Manager, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager or the Distributor.

The Fund currently pays its Board members its allocated portion of an annual retainer of \$30,000 and a fee of \$4,000 per meeting (with a minimum fee of \$500 per meeting and per telephone meeting) attended for the Fund and eight other funds (comprised of nine portfolios) in the Dreyfus Family of Funds, and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members, if any, are entitled to receive an annual retainer and a per meeting fee of one-half the amount paid to them as Board members. The aggregate amount of compensation paid to each Board member by the Fund and by all funds in the Dreyfus Family of Funds for which such person was a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2006, was as follows:

<u>Name of Board Member</u>	<u>Aggregate Compensation from the Fund*</u>	<u>Total Compensation from the Fund and Fund Complex Paid to Board Member(**)</u>
Joseph S. DiMartino	\$4,901	\$857,400 (193)
Gordon J. Davis	\$3,920	\$102,500 (39)
David P. Feldman	\$3,920	\$217,000 (58)
Lynn Martin	\$3,591	\$46,500 (9)
Daniel Rose	\$3,920	\$88,500 (18)
Philip L. Toia	\$3,920	\$50,500 (9)
Sander Vanocur	\$3,920	\$93,000 (18)
Anne Wexler	\$3,920	\$134,250 (58)

* Amount does not include cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$3,079.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

Officers of the Fund

J. DAVID OFFICER, President since December 2006. Chief Operating Officer, Vice Chairman and Director of the Manager, and an officer of 89 investment companies (comprised of 186 portfolios) managed by the Manager. He is 58 years old and has been an employee of the Manager since April 1998.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since June 1977.

JAMES WINDELS, Treasurer since November 2001. Director-Mutual Fund Accounting of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since April 1985.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Associate General Counsel and Assistant Secretary of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. She is 51 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. She is 44 years old and has been an employee of the Manager since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 55 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since October 1990.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since April 1991.

ROBERT S. ROBOL, Assistant Treasurer since December 2002. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 90 investment companies (comprised of 202 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1988.

ROBERT SVAGNA, Assistant Treasurer since December 2002. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 90 investment companies (comprised of

202 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since July 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 86 investment companies (comprised of 198 portfolios) managed by the Manager. He is 36 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (90 investment companies, comprised of 202 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 49 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of the Fund's shares outstanding on April 20, 2007.

The following shareholder was known by the Fund to own of record 5% or more of the Fund's shares outstanding on April 20, 2007. A shareholder who beneficially owns, directly or indirectly, more than 25% of the Fund's voting securities may be deemed a "control person" (as defined in the 1940 Act) of the Fund.

MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

The Manager provides management services pursuant to a Management Agreement (the “Agreement”) between the Fund and the Manager. The Agreement is subject to annual approval by (i) the Fund’s Board or (ii) vote of a majority (as defined in the 1940 Act) of the outstanding voting securities of the Fund, provided that in either event the continuance also is approved by a majority of the Board members who are not “interested persons” (as defined in the 1940 Act) of the Fund or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Agreement is terminable without penalty, on 60 days’ notice, by the Fund’s Board or by vote of the holders of a majority of the Fund’s shares, or, on not less than 90 days’ notice, by the Manager. The Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Jonathan Little, Chair of the Board; Thomas F. Eggers, President, Chief Executive Officer and a director; Jonathan Baum, Vice Chair-Distribution and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Jill Gill, Vice President-Human Resources; Anthony Mayo, Vice President-Information Systems; Theodore A. Schachar, Vice President-Tax; Alex G. Sciulli, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Ronald P. O’Hanley III, director.

The Fund, the Manager and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities, including securities that may be purchased or held by the Fund. The Manager’s Code of Ethics subjects its employees’ personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics, and are also subject to the oversight of Mellon’s Investment Ethics Committee (the “Committee”). Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. The Manager also maintains a research department with a professional staff of portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by the Manager. The Manager may pay the Distributor for shareholder services from the Manager’s own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay certain financial institutions (which may include banks), securities dealers and other industry professionals (collectively, “Service Agents”) in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Portfolio Management. The Manager provides day-to-day management of the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Fund's Board. The Manager is responsible for investment decisions, and provides the Fund with portfolio managers who are authorized by the Fund's Board to execute purchases and sales of securities. The Fund's portfolio managers are Joseph P. Darcy, A. Paul Disdier, Douglas Gaylor, Joseph Irace, Colleen Meehan, W. Michael Petty, Bill Vasiliou, James Welch, and Monica S. Wieboldt. The Manager also maintains a research department with a professional staff of portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by the Manager.

Portfolio Manager Compensation. Portfolio manager compensation is comprised primarily of a market-based salary and an incentive compensation plan. The Fund's portfolio managers are compensated by Dreyfus or its affiliates and not by the Fund. The incentive compensation plan is comprised of three components: portfolio performance (approximately 60%), individual qualitative performance (approximately 20%) and Dreyfus financial performance as measured by Dreyfus' pre-tax net income (approximately 20%). Up to 10% of the incentive plan compensation may be paid in Mellon Financial Corporation restricted stock.

Portfolio performance is measured by a combination of yield (35%) and total return (65%) relative to the appropriate Lipper peer group. 1-year performance in each category is weighted at 40% and 3-year performance at 60%. The portfolio manager's performance is measured on either a straight average (each account weighted equally) or a combination of straight average and asset-weighted average. Generally, if the asset-weighted average is higher, then that is used to measure performance. If the straight average is higher, then typically an average of the two is used to measure performance.

Individual qualitative performance is based on Dreyfus' Chief Investment Officer's evaluation of portfolio manager's performance based on any combination of the following: marketing contributions; new product development; performance on special assignments; people development; methodology enhancements; fund growth/gain in market; and support to colleagues. The Chief Investment Officer may consider additional factors at his discretion.

Portfolio managers are also eligible for Dreyfus' Long Term Incentive Plan. Under that plan, cash and/or Mellon restricted stock is awarded at the discretion of the Chief Investment Officer based on individual performance and contributions to the Investment Management Department and the Mellon organization.

Additional Information About the Portfolio Manager. The following table lists the number and types of other accounts advised by the Fund's primary portfolio manager and assets under management in those accounts as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Registered Investment Company Accounts</u>	<u>Assets Managed</u>	<u>Pooled Accounts</u>	<u>Assets Managed</u>	<u>Other Accounts</u>	<u>Assets Managed</u>
Douglas Gaylor	8	\$1 billion	0	\$0	0	\$0

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager are as follows as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Dollar Range of Fund Shares Beneficially Owned</u>
Douglas Gaylor	None

Portfolio managers at Dreyfus may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of Dreyfus' management of the Fund and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' overall allocation of securities in that offering, or to increase Dreyfus' ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio manager may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio manager may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Conflicts of interest similar to those described above arise when portfolio managers are employed by a sub-investment adviser or are dual employees of the Manager and an affiliated entity and such portfolio managers also manage Other Accounts.

Dreyfus' goal is to provide high quality investment services to all of its clients, while meeting Dreyfus' fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of initial public offering, and compliance with the firm's Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of the portfolio managers for Dreyfus-managed funds.

Expenses. All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by the Manager. The expenses borne by the Fund include: taxes, interest, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager, SEC fees, state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of maintaining the Fund's existence, costs of independent pricing services, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of shareholders' reports and meetings, costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, and any extraordinary expenses.

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.60% of the value of the Fund's average daily net assets. All fees and expenses are accrued daily and deducted before declaration of dividends to investors. For the fiscal years ended December 31, 2004, 2005 and 2006, the management fees paid by the Fund amounted to \$1,378,520, \$1,224,515 and \$1,076,129, respectively.

The Manager has agreed that if in any fiscal year the aggregate expenses of the Fund, exclusive of taxes, brokerage, interest on borrowings and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed the expense limitation of any state having jurisdiction over the Fund, the Fund may deduct from the payment to be made to the Manager under the Agreement, or the Manager will bear, such excess expense to the extent required by state law. Such deduction or payment, if any, will be estimated daily, and reconciled and effected or paid, as the case may be, on a monthly basis.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually.

The Manager or the Distributor may provide cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such payments are separate from any shareholder services fee or other expenses paid by the Fund to those

intermediaries. Because those payments are not made by you or the Fund, the Fund's total expense ratio will not be affected by any such payments. These additional payments may be made to certain Service Agents, including affiliates, that provide shareholder servicing, sub-administration recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid from the Manager's or Distributor's own resources to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing". From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

The Bank of New York (the "Custodian"), One Wall Street, New York, New York 10286, is the Fund's custodian. The Custodian has no part in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. Under a custody agreement with the Fund, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transactions charges.

HOW TO BUY SHARES

General. Fund shares are sold without a sales charge. You may be charged a fee if you effect transactions in Fund shares through a Service Agent. You will be charged a fee if an investment check is returned unpayable. Share certificates are issued only upon your written request. It is not recommended that the Fund be used as a vehicle for Keogh, IRA or other qualified plans. No certificates are issued for fractional shares.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions);

foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealers or exchanger or a money transmitter.

The minimum initial investment is \$2,500 or \$1,000 if you are a client of a Service Agent which maintains an omnibus account in the Fund and has made an aggregate minimum initial purchase for its customers of \$2,500. Subsequent investments must be at least \$100. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund's Board, or the spouse or minor child of any of the foregoing, the minimum initial investment is \$1,000. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Fund's Board, who elect to have all or a portion of their compensation for servicing in that capacity automatically invested in the Fund. The Fund reserves the right to vary the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered without regard to the minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan pursuant to the Dreyfus Step Program described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under "Management Arrangements-Distributor," Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of the Fund instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund. Net asset value per share is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for regular business. For purposes of computing net asset value per share, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share is computed by dividing the value of the Fund's net assets (i.e., the value of its assets less

liabilities) by the total number of shares outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern Time, on any day that the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the share price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the share price determined on the next business day following such purchase order. To qualify to use Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares--Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

SHAREHOLDER SERVICES PLAN

The Fund has adopted a Shareholder Services Plan (the "Plan"), pursuant to which the Fund reimburses the Distributor an amount not to exceed the annual rate of 0.25% of the value of the Fund's average daily net assets for certain allocated expenses of providing personal services and/or maintaining shareholder accounts. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of shareholder accounts.

A quarterly report of the amounts expended under the Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board for its review. In addition, the Plan provides that material amendments of the Plan must be approved by the Fund's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the

purpose of voting on the Plan. The Plan is terminable at any time by vote of a majority of the Board members who are not “interested persons” and who have no direct or indirect financial interest in the operation of the Plan.

During the fiscal year ended December 31, 2006, the Fund reimbursed the Distributor \$103,891 pursuant to the Plan.

HOW TO REDEEM SHARES

General. The Fund ordinarily will make a payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased Fund shares by check or by Dreyfus TeleTransfer Privilege and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will not honor redemption checks under the Checkwriting Privilege, and will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege, for a period of up to eight business days after receipt by the Transfer Agent of the purchase check or the Dreyfus TeleTransfer purchase against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

Redemption Fee. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares redeemed (including redemptions through the use of the Fund Exchanges service) less than 30 days following the issuance of such shares. The redemption fee will be deducted from the redemption proceeds and retained by the Fund. For the fiscal year ended December 31, 2005, the Fund retained \$276 in redemption fees.

No redemption fee will be charged on the redemption or exchange of shares (1) through the Fund’s Checkwriting Privilege, Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, (2) through accounts that are reflected on the records of the Transfer Agent as omnibus accounts approved by the Distributor, (3) through accounts established by securities dealers, banks or other financial institutions approved by the Distributor that utilize the National Securities Clearing Corporation’s networking system, or (4) acquired through the reinvestment of dividends or distributions. The redemption fee may be waived, modified or terminated at any time.

Subject to the exceptions described in the Prospectus, shares purchased on or after March 1, 2007, and held for less than 30 days will be subject to the fund’s redemption fee, whether held directly in your name or indirectly through an intermediary, such as a broker, bank, investment adviser, recordkeeper for retirement plan participants, or any other third party. If you hold your shares through an intermediary’s omnibus account, the intermediary is responsible for imposing the fee and remitting the fee to the Fund.

The redemption fee will be charged and retained by the Fund on shares sold before the end of the required holding period. The Fund will use the “first-in, first-out” method to determine the

holding period for the shares sold. Under this method, shares held the longest will be redeemed or exchanged first. The holding period commences on the day after your purchase order is effective. For example, the holding period for Fund shares purchased on April 10 (trade date) begins on April 11 and ends 29 days later on May 9. Thus, if you redeemed these shares on May 9, you would be assessed the fee, but you would not be assessed the fee if you redeemed on or after May 10.

The redemption fee generally is collected by deduction from the redemption proceeds, but may be imposed by billing you if the fee is not imposed as part of the redemption transaction.

The Fund may postpone the effective date of the assessment of the redemption fee on the underlying shareholder accounts within an omnibus account if an intermediary is unable to collect the Fund's redemption fee.

The Fund may impose the redemption fee at the plan level for employee benefit plans that hold shares on behalf of a limited number of employees. Plan sponsors of such benefit plans that opt to impose redemption fees at the employee account level, rather than the plan level, must enter into agreements with Dreyfus that obligate the sponsor to collect and remit redemption fees at the employee level and to provide to the Fund, at its request, shareholder identity and transaction information.

The Prospectus contains information on transactions for which the redemption fee is waived. The Fund reserves the right to exempt additional transactions from the fee.

Checkwriting Privilege. The Fund provides redemption checks ("Checks") to investors automatically upon opening an account, unless you specifically refuse the Checkwriting Privilege by checking the applicable "No" box on the Account Application. The Checkwriting Privilege may be established for an existing account by a separate signed Shareholder Services Form. Checks will be sent only to the registered owner(s) of the account and only to the address of record. The Account Application or Shareholder Services Form must be manually signed by the registered owner(s). Checks may be made payable to the order of any person in an amount of \$500 or more. When a Check is presented to the Transfer Agent for payment, the Transfer Agent, as your agent, will cause the Fund to redeem a sufficient number of shares in your account to cover the amount of the Check. Dividends are earned until the Check clears. After clearance, a copy of the Check will be returned to you. You generally will be subject to the same rules and regulations that apply to checking accounts, although the election of this Privilege creates only a shareholder-transfer agent relationship with the Transfer Agent.

You should date your Checks with the current date when you write them. Please do not postdate your Checks. If you do, the Transfer Agent will honor, upon presentment, even if presented before the date of the Check, all postdated Checks which are dated within six months of presentment for payment, if they are otherwise in good order.

Checks are free, but the Transfer Agent will impose a fee for stopping payment of a Check upon your request or if the Transfer Agent cannot honor a Check due to insufficient funds or other valid reason. If the amount of the Check is greater than the value of the shares in your

account, the Check will be returned marked insufficient funds. Checks should not be used to close an account.

The Checkwriting Privilege will be terminated immediately, without notice, with respect to any account which is, or becomes, subject to backup withholding on redemptions. Any Check written on an account which has become subject to backup withholding on redemptions will not be honored by the Transfer Agent.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under “Share Certificates; Signatures.”

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in the your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See “How to Buy Shares--Dreyfus TeleTransfer Privilege.”

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be charged to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program (“STAMP”) and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and “Signature-Guaranteed” must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors,

administrators, trustees or guardians and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Redemption Commitment. The Fund has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Board reserves the right to make payments in whole or in part in securities or other assets of the Fund in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the SEC that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the SEC by order may permit to protect the Fund's shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. You may purchase, in exchange for shares of the Fund, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders Asset Management LLC ("Founders"), an indirect subsidiary of the Manager, to the extent such shares are offered for sale in your state of residence. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares exchanged where the exchange is made less than 30 days after the issuance of such shares. Shares of other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the

maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.

To accomplish an exchange under item D above, you must notify the Transfer Agent of your prior ownership of fund shares and your account number.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable “No” box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express® voice response telephone system) from any person representing himself or herself to be you, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days’ written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the SEC.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment required for the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components--redemption orders with a simultaneous request to purchase the other fund’s shares. In such a case, the redemption request would be processed at the Fund’s next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under “Fund Exchanges.” Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by the investor. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting www.dreyfus.com. The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Fund shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Step Program. Dreyfus Step Program enables you to purchase Fund shares without regard to the Fund's minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan. To establish a Dreyfus Step Program account, you must supply the necessary information on the Account Application and file the required authorization form(s) with the Transfer Agent. For more information concerning this Program, or to request the necessary authorization form(s), please call toll free 1-800-782-6620. You may terminate your participation in this Program at any time by discontinuing your participation in Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, as the case may be, as provided under the terms of such Privilege(s). The Fund may modify or terminate this Program at any time.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.

- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as “Offered Shares”), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a contingent deferred sales charge (“CDSC”) and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund’s investments are valued each business day by an independent pricing service (the “Service”) approved by the Fund’s Board. When, in the judgment of the Service, quoted bid prices for investments are readily available and are representative of the bid side of the market, these investments are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other investments (which may constitute a majority of the portfolio securities) is determined by the Service based on methods which include consideration of: yields or prices of municipal bonds of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. The Service may employ electronic data processing techniques and/or a matrix system to determine valuations. The Service’s procedures are reviewed under the general supervision of the Fund’s Board. If valuations for investments (received from the Service or otherwise) are not readily available, or are determined not to reflect accurately fair value, the Fund may value those investments at fair value as determined in accordance with the procedures approved by the Fund’s Board. Fair value of investments may be done by the Fund’s Board, its pricing committee or its valuation committee in good faith using

such information as it deems appropriate under the circumstances. The factors that may be considered in fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading of similar securities of the issuer or comparable issuers. Using fair value to price investments may result in a value that is different from a security's most recent price and from prices used by other mutual funds to calculate their net asset values. Expenses and fees, including the management fee (reduced by the expense limitation, if any), are accrued daily and are taken into account for the purpose of determining the net asset value of Fund shares.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management believes that the Fund has qualified for treatment as a "regulated investment company" under the Code for the fiscal year ended December 31, 2006. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized capital gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute out to its shareholders at least 90% of its net income (consisting of net investment income from tax exempt obligations and taxable obligations, if any, and net short-term capital gains), and must meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

The Fund ordinarily declares dividends from its net investment income on each day the New York Stock Exchange is open for regular business. Fund shares begin earning income dividends on the day following the date of purchase. Dividends usually are paid on the last business day of each month and are automatically reinvested in additional Fund shares at net asset value or, at your option, paid in cash. The Fund's earnings for Saturdays, Sundays and holidays are declared as dividends on the next business day. If you redeem all shares in your account at any time during the month, all dividends to which you are entitled will be paid to you along with the proceeds of the redemption. If you are an omnibus accountholder and indicate in a partial redemption request that a portion of any accrued dividends to which such account is entitled belongs to an underlying accountholder who has redeemed all shares in his or her account, such portion of the accrued dividends will be paid to you along with the proceeds of the redemption.

If you elect to receive dividends and distributions in cash, and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividend or distribution and all future dividends and

distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of his or her investment. Such a dividend or distribution would be a return of capital taxable as described in "Distributions and Taxes" in the Prospectus. In addition, the Code provides that if a shareholder holds Fund shares for six months or less and has received an exempt-interest dividend with respect to such shares, any loss incurred on the sale of such shares will be disallowed to the extent of the exempt-interest dividend received.

If, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's total assets consists of Federal tax exempt obligations, the Fund may designate and pay Federal exempt-interest dividends from interest earned on all such tax exempt obligations. Such exempt-interest dividends may be excluded by shareholders of the Fund from their gross income for Federal income tax purposes. Dividends derived from taxable investments, together with distributions from any net realized short-term securities gains, generally are taxable as ordinary income for Federal income tax purposes whether or not reinvested. Distributions from net realized long-term securities gains generally are taxable as long-term capital gains to a shareholder who is a citizen or resident of the United States, whether or not reinvested and regardless of the length of time the shareholder has held his shares.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains or losses. However, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. In addition, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain financial futures and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any such Section 1256 contracts remaining unexercised at the end of the fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund as described above.

Offsetting positions held by the Fund involving certain financial futures contracts or options transactions may be considered, for tax purposes, to constitute "straddles." "Straddles" are defined to include "offsetting positions" in actively traded personal property. To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests (“appreciated financial position”) and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a “Contract”) with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

Investment by the Fund in securities issued at a discount or providing for deferred interest or for payment of interest in the form of additional obligations could, under special tax rules, affect the amount, timing and character of distributions to shareholders. For example, the Fund could be required to take into account annually a portion of the discount (or deemed discount) at which such securities were issued and to distribute such portion in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number (“TIN”) upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. In cases where the Manager or fund employs a sub-adviser, the sub-adviser, under the supervision of the Manager, places orders on behalf of the applicable fund(s) for the purchase and sale of portfolio securities.

Certain funds are managed by dual employees of the Manager and an affiliated entity in the Mellon organization. Funds managed by dual employees use the research and trading facilities, and are subject to the internal policies and procedures, of the affiliated entity. In this regard, the Manager places orders on behalf of those funds for the purchase and sale of securities through the trading desk of the affiliated entity, applying the written trade allocation procedures of such affiliate.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions, including their frequency, is made in the best judgment of the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) and in a manner deemed fair and reasonable to shareholders. The primary consideration in placing portfolio transactions is prompt execution of orders at the most favorable net price. In choosing brokers or dealers, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) evaluates the ability of the broker or dealer to execute the particular transaction (taking into account the market for the security and the size of the order) at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) the availability of natural liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the measured quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (*i.e.*, the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

With respect to the receipt of research, the brokers or dealers selected may include those that supplement the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) research facilities with statistical data, investment information, economic facts and opinions. Such information may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in serving funds or accounts that it advises and, conversely, supplemental information obtained by the placement of business of other clients may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in carrying out its obligations to the funds. Information so received is in addition to, and not in lieu of, services required to be performed by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate), and the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) normal independent research activities, it enables it to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

Under the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) procedures, portfolio managers and their corresponding trading desks may seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will not be deterred from changing a fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of a fund's transactions in those securities may not benefit from the negotiated commission rates available to a fund for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may deem it appropriate for one of its accounts to sell a security while another of its accounts is purchasing the same security. Under such circumstances, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may arrange to have the purchase and sale transactions effected directly between its accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Portfolio securities ordinarily are purchased from and sold to parties acting either as principal or agent. Newly-issued securities ordinarily are purchased directly from the issuer or from an underwriter; other purchases and sales usually are placed with those dealers from which it appears that the best price or execution will be obtained. Usually no brokerage commissions, as such, are paid by the fund for such purchases and sales, although the price paid usually includes an undisclosed compensation to the dealer acting as agent. The prices paid to underwriters of newly-issued securities usually include a concession paid by the issuer to the underwriter, and purchases of after-market securities from dealers ordinarily are executed at a price between the bid and asked price.

When transactions are executed in the over-the-counter market (*i.e.*, with dealers), the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will typically deal with the primary market makers unless a more favorable price or execution otherwise is obtainable.

No brokerage commissions were paid by the Fund for the fiscal years ended December 31, 2004, 2005 and 2006.

Disclosure of Portfolio Holdings. It is the policy of the Fund to protect the confidentiality of the Fund's portfolio holdings and prevent the selective disclosure of non-public information about such holdings. The Fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the SEC. The Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com. The information will be posted with a

one-month lag and will remain accessible until the Fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If the Fund's portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor Dreyfus or its affiliates, may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Fund may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Fund, for the purpose of efficient trading and receipt of relevant research, provided that: (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodians, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Fund's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Fund's Board.

INFORMATION ABOUT THE FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Fund shares are of one class and have equal rights as to dividends and in liquidation. Shares have no preemptive, subscription or conversion rights and are freely transferable.

Under Massachusetts law, shareholders, under certain circumstances, could be held personally liable for the obligations of the Fund. However, the Fund's Agreement and Declaration of Trust ("Trust Agreement") disclaims shareholder liability for acts or obligations of the Fund and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Fund or a Trustee. The Trust Agreement provides for indemnification from the Fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by the Fund, the shareholder paying such

liability will be entitled to reimbursement from the general assets of the Fund. The Fund intends to conduct its operations in such a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the Fund.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of two-thirds of the Fund's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing shares of other funds in the Dreyfus Family of Funds. Accounts under common ownership or control will be considered as one account for purposes of determining a pattern of excessive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short-term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

To offset the relatively higher costs of servicing smaller accounts, the Fund will charge regular accounts with balances below \$2,000 an annual fee of \$12. The valuation of accounts and the deductions are expected to take place during the last four months of each year. The fee will be waived for any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000, and will not apply to IRA accounts or to accounts participating in automatic investment programs or opened through a securities dealer, bank or other financial institution, or to other fiduciary accounts.

The Fund will send annual and semi-annual financial statements to all its shareholders.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, has been selected to serve as the independent registered public accounting firm for the Fund.

APPENDIX A

RISK FACTORS—INVESTING IN FLORIDA MUNICIPAL BONDS

The following information is a summary of special factors affecting investments in Florida Municipal bonds. It does not purport to be a complete description and is based on information drawn from official statements relating to securities offerings of the State of Florida (the “State”) available as of the date of this Statement of Additional Information. While the Fund has not independently verified this information, it has no reason to believe that such information is not correct in all material respects.

Demographic and Economic Information

Juan Ponce de Leon made the first recorded landing in the State in 1513 and subsequently claimed the territory for Spain. The Spaniards founded the first permanent settlement, St. Augustine, in 1565. The State was acquired by the United States from Spain in 1821, became a territory of the United States in 1822, and was admitted to statehood in 1845 as the 27th state. The State is the 26th largest state with land area of 54,252 square miles and a water area of 4,308 square miles, with tidal shoreline in excess of 2,200 miles.

As of April 1, 2006, Florida ranked as the fourth most populous state, with a population of 18.349 million. From 1996 to 2006, the U.S. population increased about 1% annually, while Florida’s population averaged a 2.5% annual increase, with a majority of that increase due to migration into the State. During the 1990’s, the elderly population (aged 65 or older) grew by 16.1% and constituted 17.1% of the State’s total population on April 1, 2005. The elderly age group is projected to be 17.5% of the State’s population in 2010 and 21.2% by 2020. The working age population (ages 18-64) grew by approximately 26% from 1995-2005, representing 77% of the total population in 2005. This age group is projected to become 76.6% of total population by 2010 and 73.2% by 2020.

During the latter half of the twentieth century, growth in the State’s Gross State Product (“GSP”) outpaced both the Southeast and the nation. During the same period, the manufacturing base of the State’s economy declined and the service and trade bases increased. The State’s GSP for 2005 is estimated at \$595.4 billion, a 7.8% increase over 2004. Over the last ten years, Florida’s GSP increased 53.6%.

In 2005, services constituted 48.6% of the State’s total non-farm jobs, compared to 43.3% five years earlier. The total number of non-farm jobs increased 8.9% while jobs in the services sector increased 12.3% over the same period. The 1990’s also saw Florida emerge as a leader in high-tech industrial employment, ranking first in the Southeast and fifth in the nation by 1999, with the number of high-tech jobs increasing nearly 36% over that decade. Computer and electronic products accounted for approximately one-third of Florida’s export sales in 2004.

The State’s total international merchandise trade totaled \$93.5 billion in 2005, with exports increased by 17.6% compared to 10.8% nationally, and imports increasing by 16.6% compared to 13.9% for the nation.

Private industry accounted for 89.7% of the State's GSP in 2005. Services constituted the largest sector of the GSP, with health services and professional and technical services contributing the most within the industry (24.4% and 22.3%, respectively). Real estate was the largest industry, accounting for 16.2% of the State's 2005 GSP.

Tourism is not treated as a separate industry sector, but remains an important aspect of the Florida economy. Its financial impact is reflected in a broad range of market sectors, such as transportation, communications, retail trade and services, and in State tax revenues generated by business activities that cater to visitors, such as hotels, restaurants, admissions and gift shops. According to State estimates, approximately 85.8 million people visited the State in 2005, a 7.6% increase over 2004. In 2005, accommodation and food services contributed 13.1% of the services component of the GSP, and amusement and recreation contributed 5.6%.

Economic Outlook. The State's economy grew 7.5% in Fiscal Year 2005-06, still a strong growth rate considering the slowdown in the housing market. Although the economy was slightly slower than a year ago, it still outperformed the U.S. economy as a whole. This strength can be attributed to favorable natural, economic and tax environments and increasing demand for goods and services fueled by a rapidly growing population. Florida remains top-ranked in the nation in total job growth and generated the fastest job growth rate among the ten most populous states. Florida's non-farm employment grew 3.8% in Fiscal Year 2005-06 adding 293,700 jobs. With the current slowdown in the housing market, Florida's economy is projected to slow even further in Fiscal Year 2006-07.

Population growth continues to be a major driver of economic activity in the State. Increases in jobs were led by gains in professional and business services, construction, educational and health services, leisure and hospitality, wholesale and retail trade, financial services and government. With a slower economy in Fiscal Year 2006-07, non-farm employment is anticipated to add 186,500 jobs, lower than the prior fiscal year. Wages and salaries are anticipated to rise 7.5% and the unemployment rate is expected to be 3.4% for Fiscal Year 2006-07.

Florida was battered by four major hurricanes in 2004 and 2005, which brought destruction to thousands of homes and businesses. Reconstruction activities that began in 2004 were extended through 2006. New home construction increased in Fiscal Year 2005-06 as the housing market peaked, adding 271,300 homes. Since that time, the housing market has softened, a trend that is expected to continue through Fiscal Year 2006-07. Approximately, 174,000 new homes are expected to be added during the current fiscal year, down 35% from the prior year. Total construction employment, which added 53,900 jobs the prior fiscal year, is expected to lose 8,200 jobs in fiscal year 2006-07.

The State's economy should improve as the housing market downturn eases by the third quarter of 2007. With the strength of its labor market, rising personal income and a growing population fueling the demand for goods and services, Florida's economy is expected to continue to expand steadily in the long-run.

State Budgeting and Finances

Fiscal Year 2003-2004 Budget. Total combined General Fund revenue and Working Capital Funds revenues for Fiscal Year 2003-2004 were \$23.88 billion. Total expenditures for Fiscal Year 2003-2004 were approximately \$21.43 billion, and were funded from general revenue collections of \$21.824 billion, \$1.3 billion in trust fund transfers, and approximately \$89.8 million in unused appropriations, cancellations of warrants, reversions and miscellaneous adjustments from the prior fiscal year. The Working Capital Fund year-end balance was \$2.46 billion, or 11.4% of expenditures. The State's constitutionally required Budget Stabilization Fund (the "BSF") reserves were not used to fund the 2003-04 budget. At the end of Fiscal Year 2003-2004, the BSF balance was \$966.4 million.

Fiscal Year 2004-2005 Budget. Florida was hit by four hurricanes affecting many areas within the State during August and September 2004. The total government cost of disaster recovery and relief efforts for public and individual assistance was estimated to be \$4.3 billion as of November 10, 2004. The State's non-reimbursable share of the total cost of such efforts was estimated to be \$387.7 million.

Total combined General Fund revenue and Working Capital Funds revenues for Fiscal Year 2004-2005 were \$28.01 billion. Total effective appropriations for Fiscal Year 2004-2005 were approximately \$24.44 billion, and were funded from general revenue collections of \$25 billion, \$465 million in trust fund transfers, and approximately \$118.5 million in unused appropriations, repayment of bridge loans, cancellations of warrants, reversions and miscellaneous adjustments from the prior fiscal year. The Working Capital Fund year-end balance was \$3.57 billion. At the end of Fiscal Year 2004-2005, the BSF balance was \$999.2 million. Hurricane related budget amendments transferred \$11 million to the Casualty Insurance Risk Management Trust Fund in Fiscal Year 2004-2005.

Fiscal Year 2005-2006 Budget. General revenue collections for Fiscal Year 2005-2006 were approximately \$27.1 billion, \$2.1 billion (8.4%) over the prior fiscal year. General revenue fund expenditures for Fiscal Year 2005-06 totaled approximately \$26 billion, including a deposit to the BSF of \$92 million, \$264.8 million in hurricane disaster bridge loans and appropriations made in special legislative session. Reserves at June 30, 2006 totaled \$6.09 billion, consisting of the unallocated general fund balance of \$4.99 billion and the BSF balance of \$1.1 billion. Year-end reserves increased to \$6.09 billion, or 23.4% of general revenue fund expenditures, due to actual revenues exceeding estimates by \$275 million and expenditures were \$1.13 billion less than anticipated.

Fiscal Year 2006-2007 Budget. The State began Fiscal Year 2006-07 with total reserves of \$4.57 billion, consisting of approximately \$3.57 billion beginning fund balance and \$999.2 million in the BSF. Projected general revenues collections are currently estimated at \$27.12 billion. Overall collections are forecasted to exceed the prior fiscal year's receipts by \$44.4 million (0.2%). Through December 31, 2006, general revenue collections totaled \$12.61 billion, slightly down from prior forecasts due to lower than expected sales taxes. Estimated expenditures for Fiscal Year 2006-07 total approximately \$29.34 billion, including an additional deposit to the BSF of \$157.3 million. The year-end unallocated general fund balance is now projected to be approximately \$3.1 billion in addition to the \$1.25 billion required balance in the

BSF at year-end, bringing total expected reserves to \$4.27 billion, or 14.5% of estimated general fund expenditures.

State Revenue Sources

General. Financial operations of the State are maintained through the General Revenue Fund, trust funds, the Working Capital Fund and the BSF. The General Revenue Fund receives the majority of State tax revenues. Trust funds consist of monies which under law or trust agreement are segregated for a specified purpose. Revenues in the General Revenue Fund which exceed the amount needed for appropriations may be transferred to the Working Capital Fund. State monies are expended pursuant to appropriations acts. The Governor and Chief Financial Officer are responsible for insuring that sufficient revenues are collected to meet appropriations and that no deficits occur in State funds.

The State budget must be kept in balance from current revenues each fiscal year (July 1-June 30), and the State may not borrow to fund governmental operations. The State Constitution mandates the creation and maintenance of a BSF in an amount not less than 5% nor more than 10% of the last complete fiscal year's net revenue collections for the General Revenue Fund. Monies in the BSF may be transferred to the General Revenue Fund to offset a deficit therein or to provide emergency funding, including payment of up to \$38 million with respect to certain uninsured losses to State property. Monies in this Fund are constitutionally prohibited from being obligated or otherwise committed for any other purpose. Any withdrawals from the BSF must be restored from general revenues in five equal annual installments, unless the Legislature establishes a different restoration schedule.

The rate of growth in State revenues in a given fiscal year is limited to no more than the average annual growth rate in personal income over the previous five years. Revenues have never exceeded the limitation. Revenues collected in excess of the limitation are to be deposited into the BSF unless two-thirds of the members of both houses of the Legislature vote to raise the limit. The actual general revenue collections were \$21.82 billion, \$25 billion (an increase of 14.4%), and \$27.07 billion (an increase of 8.4%) for Fiscal Years 2003-2004, 2004-2005 and 2005-2006, respectively. General Revenues are estimated to increase by 0.2% to \$27.12 billion in Fiscal Year 2006-2007, and by another 3.8% to \$28.16 billion in Fiscal Year 2007-2008.

Sales and Use Tax. The largest single source of tax receipts in the State is the sales and use tax. It is a uniform tax upon either the sale of tangible personal property at retail or its use irrespective of where it may have been purchased. The sales tax is 6% of the sales price of tangible property sold at retail in the State, and the use tax is 6% of the cost price of tangible personal property used or stored for use in the State. In addition, local governments may (by referendum) assess a 0.5% or 1% discretionary sales surtax within their county.

The sales tax is also levied on the following: (1) rental of tangible personal property; (2) rental of transient lodging and non-residential real property; (3) admissions to places of amusement, most sports and recreation events; (4) non-residential utilities (at a 7% rate); and (5) restaurant meals. A number of legislative exemptions exist, and the Legislature may waive the tax from time to time in certain instances.

Receipts of the sales and use tax, with the exception of the tax on gasoline and special fuels, are credited to the General Revenue Fund, the Solid Waste Management Trust Fund, or counties and cities. Legislation was enacted in 2000 that provides that 2.25% of sales tax receipts are to be deposited in the Revenue Sharing Trust Fund for Counties in lieu of intangible personal property taxes that were so distributed under prior law. Sales tax receipts credited to the General Fund were \$15.8 billion for Fiscal Year 2003-2004, \$17.6 billion (an increase of 11.6%) for Fiscal Year 2004-2005, and \$19.4 billion (an increase of 10.1%) for Fiscal Year 2005-2006. Sales tax receipts are estimated at \$20 billion (an increase of 3.1%) and \$20.93 billion (an increase of 4.8%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

Motor Fuel Tax. The second largest source of State tax receipts is the tax on motor fuels. However, these revenues are almost entirely dedicated trust funds for specific purposes and are not included in the State General Revenue Fund. Taxes on motor fuels (gasoline and diesel fuel) include several distinct fuel taxes: (1) the State sales tax on motor fuels, levied at 6% of the average retail price per gallon of fuel, not to fall below 6.9¢ per gallon; (2) the State excise tax of 4¢ per gallon of motor fuel, with proceeds distributed to local governments; (3) the State Comprehensive Enhanced Transportation System tax, which is levied at a rate in each county equal to two-thirds of the sum of the county's local option motor fuel taxes; (4) aviation fuel, which air carriers may choose to be taxed at 6.9¢ per gallon or 8% of the retail price of fuel, not to be less than 4.4¢ per gallon; and (5) local option motor fuel taxes, which may range between 1¢ to 12¢ per gallon. Most of the proceeds of the sales tax on motor fuels are deposited into the State Transportation Trust Fund for road maintenance and construction. The 2004 Legislature enacted a measure reducing the sales tax on motor fuels by 8¢ per gallon during the month of August 2004. An appropriation of \$58 million was made from the General Revenue Fund to compensate for the revenue reduction. Revenue from motor fuel tax collections in Fiscal Year 2005-2006 was \$1.82 billion.

Alcoholic Beverage Tax. The State's alcoholic beverage tax is an excise tax on beer, wine and liquor. Two percent of collections are deposited into the Alcoholic Beverage and Tobacco Trust Fund, and the Children and Adolescent Substance Abuse Trust Fund receives 9.8%, while the remainder of revenues is deposited into the General Revenue Fund. Receipts from the beverage tax and licenses were \$572.5 million for Fiscal Year 2003-2004, \$575.7 million (an increase of 0.6%) for Fiscal Year 2004-2005, and \$590.4 million (an increase of 2.6%) for Fiscal Year 2005-06. Receipts from the beverage tax and licenses are estimated at \$638.9 million (an increase of 8.2%) and \$621.6 million (a decrease of 2.7%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

Corporate Income Tax. The State collects a tax on the net income of corporations, organizations, associations and other artificial entities for the privilege of conducting business, deriving income or existing within the State. The tax is levied at a rate of 5.5% of net corporate income, less a \$5,000 exemption. Net income is defined as that share of adjusted Federal income that is apportioned to the State. All receipts of the corporate income tax are credited to the General Revenue Fund. Receipts from this source were \$1.34 billion for Fiscal Year 2003-2004, \$1.73 billion (an increase of 28.6%) for Fiscal Year 2004-2005, \$2.41 billion (an increase of 39.1%) for Fiscal Year 2005-06, and are estimated at \$2.62 billion (an increase of 9%) and \$2.68 billion (an increase of 2.1%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

Documentary Stamp Tax. Deeds and other documents relating to realty are taxed upon execution or recording at 70¢ per \$100 of consideration. Corporate shares, bonds, certificates of indebtedness, promissory notes, wage assignments and retail charge accounts are taxed upon issuance or renewal at 35¢ per \$100 of face value, or actual value if issued without face value. The 2005 Legislature enacted growth management legislation which redirects to trust funds \$750 million of Documentary Stamp Tax Collections which otherwise would have gone into the General Revenue Fund. Additionally, a measure was approved, effective July 1, 2007, which will restrict the amount of money distributed to certain funds, subject to adjustment, beginning July 1, 2008, if collections surpass the former year's receipts. Documentary stamp tax receipts were \$1.18 billion for Fiscal Year 2003-2004, \$1.6 billion (an increase of 35.6%) for Fiscal Year 2004-2005, \$1.24 billion (a decrease of 22.4%) for Fiscal Year 2005-2006, and are estimated at \$660.1 million (a decrease of 46.8%) and \$920.4 (an increase of 39.4%) for Fiscal Years 2006-2007 and 2007-2008

The Department of Revenue uses part of the proceeds for administrative costs. Of the remaining tax proceeds, 33.5% is distributed to the County Revenue Sharing Trust Fund and 66.5% is distributed to the General Revenue Fund. Receipts from this source were \$795 million for Fiscal Year 2003-2004, \$981.1 million (an increase of 23.4%) for Fiscal Year 2004-2005, and \$1.09 billion (an increase of 10.6%) for Fiscal Year 2005-2006. Estimates are \$741.7 million (a decrease of 31.6%) and \$624.5 million (a decrease of 15.8%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

Estate Tax. A tax was imposed on decedents' estates for the privilege of transferring property at death. The State Constitution limited the tax on estates of resident decedents to the aggregate amount allowable as a credit against or a deduction from any similar tax levied by the United States or any other state. Thus, the State estate tax on resident decedents did not increase the total tax liability of the estate. Reduction or elimination of the Federal estate tax could reduce the amount of such taxes collected at the State level. The tax on estates of nonresident decedents was equal to the amount allowable as a credit against Federal estate tax for State death taxes paid multiplied by the ratio of the value of the property taxable in the State over the value of the entire gross estate.

All receipts of the estate tax used to be credited to the General Revenue Fund. Estate tax receipts were \$382.7 million for Fiscal Year 2003-2004, \$324.4 million (a decrease of 15.2%) for Fiscal Year 2004-2005, and \$71.4 million (a decrease of 78%) for Fiscal Year 2005-2006. Estimates are at \$12.5 million (a decrease of 82.5%) and \$3.0 million (a decrease of 76%) for Fiscal Years 2006-2007 and 2007-08, respectively.

Gross Receipts Tax. The gross receipts tax is currently imposed at a rate of 2.5% of the gross receipts of providers of electricity, natural gas and telecommunications services. Telecommunications services are subject to a unified Telecommunications Services Tax, a portion of which is collected with the gross receipts tax at revenue-neutral rates. All gross receipts tax collections are credited to the Public Education Capital Outlay and Debt Service Trust Fund. The potential impact of electric utility deregulation on gross receipts tax collections cannot be determined at this time.

Communications Services Tax. The communications services tax is imposed on retail sales of communications services that originate and terminate in the State, or originate or terminate in the State and are billed to a State address. Communications services include all forms of telecommunications previously taxed by the gross receipts tax plus cable television and direct-to-home satellite service. The communications services tax replaced certain sales and use taxes and gross receipts taxes, at revenue-neutral rates. Communications services tax receipts are included in sales tax and gross receipts tax collections, as appropriate.

Other State Taxes. To the extent not pre-exempted to the Federal government, the State levies a one-time excise tax on cigarettes, at rates based on their weight and package quantity, and on other tobacco products at the rate of 25% of the wholesale price. The State also imposes a tax on racing and jai-alai admissions, and on contributions to pari-mutuel pools, or “handle.” Tobacco tax receipts were \$276.2 million for Fiscal Year 2003-2004, \$287.4 million (an increase of 4.1%) for Fiscal Year 2004-2005, and \$277.6 million (a decrease of 3.4%) for Fiscal Year 2005-2006. Estimates are at \$278.8 million (an increase of 0.4%) and \$282.5 million (an increase of 1.3%) for Fiscal Years 2006-2007 and 2007-2008, respectively. Pari-mutuels tax receipts were \$23.7 million for Fiscal Year 2003-2004, \$18.4 million (a decrease of 22.4%) for Fiscal Year 2004-2005, and \$16.0 million (a decrease of 13%) for Fiscal Year 2005-2006. Estimates are at \$33.4 million (an increase of 108.8%) and \$23.0 million (a decrease of 31.1%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

Insurance premiums received by insurers are generally taxed at 1.75% of such receipts, adjusted for return premiums and subject to credits for certain other taxes paid by the insurers. Insurance premium tax receipts were \$492.1 million for Fiscal Year 2003-2004, \$545.7 million (an increase of 10.9%) for Fiscal Year 2004-2005, and \$611.7 million (an increase of 12.1%) for Fiscal Year 2005-2006. Estimates are at \$682.0 million (an increase of 11.5%) and \$749.2 million (an increase of 9.9%) for Fiscal Years 2006-2007 and 2007-2008, respectively.

State Non-Tax Revenue Sources.

Tobacco Litigation Settlement. As a result of settling litigation by the State against the tobacco industry in 1997, the State expects to receive more than \$11 billion over 25 years. Payments are subject to adjustment for various factors, including inflation and tobacco product sales volume. Proceeds of the settlement are expected to be used for children’s health care coverage and other health-related services to reimburse the State for medical expenses, for improvements in State efforts to reduce sales of tobacco products to minors, and to promote production of reduced risk tobacco products.

As of June 30, 2005, the State had received approximately \$4.6 billion from the settlement. A portion of the tobacco settlement revenues have been deposited in the Lawton Chiles Endowment Fund to provide a perpetual source of funding for health and human services for children and elders, and for biomedical research activities. As of June 30, 2005, the value of the endowment was approximately \$1.87 billion.

Lottery. In order to provide additional funding for education, the 1987 State Legislature created the Department of the Lottery to operate a State Lottery. Revenues generated by the State Lottery are used to pay prizes, fund the Educational Enhancement Trust Fund and pay for

the administrative cost of operating the lottery. As of June 30, 2006, net assets totaled \$100 million.

State Indebtedness

As a general rule, bonds of the State or its agencies are issued by the Division of Bond Finance. The State debt fiscal responsibility policy establishes debt service to revenues as the benchmark debt ratio to estimate future debt capacity, using a target ratio of 6% and a cap of 7%. Total State debt outstanding is separated into net tax-supported debt and self-supporting debt. Net tax-supported debt is repaid by the State from a specified tax revenue source or general appropriation of the State. Self-supporting debt is reasonably expected to be repaid from project revenue or loan repayments. Some, but not all, of State debt is additionally secured by the full faith and credit of the State. As of June 30, 2006 the State had approximately \$17.87 billion in net tax-supported debt outstanding and approximately \$5.16 billion in self-supporting debt outstanding, for a total of approximately \$23.03 billion of outstanding State debt obligations.

State Full Faith and Credit Debt. The State Constitution authorizes the issuance of bonds pledging the full faith and credit of the State to finance or refinance State capital outlay projects upon approval by vote of the electors, provided that the outstanding principal amount may not exceed 50% of total State tax revenues for the two preceding fiscal years. There are currently no bonds outstanding under this authorization.

All of the State's full faith and credit debt that is outstanding has been issued under separate constitutional authority, which also authorizes the pledge of a dedicated tax or other revenue source as well. Such debt includes bonds for pollution control and abatement and solid waste disposal (operating revenues, assessments); right-of-way acquisition and bridge construction (motor fuel or special fuel taxes); public education capital outlay (gross receipts tax); roads within a county (second gas tax); and school districts or community colleges (motor vehicle license revenues). Although these bonds are not subject to the above-referenced debt limitation, each program has debt service coverage tests that must be met prior to issuance.

State Revenue Bonds. The State Constitution authorizes the issuance of bonds to finance or refinance State capital outlay projects that are payable from funds derived directly from sources other than State tax revenues. Bonds outstanding under this authorization include financings for the State University System, individual universities, public schools, State owned office facilities and toll roads. The State Constitution specifically authorizes the issuance of bonds to fund student loans; to finance housing; to refund outstanding bonds at a lower net interest cost; and for the purposes of conservation, outdoor recreation, water resource development, restoration of natural systems or historic preservation. Bonds are also outstanding which are payable from documentary stamp tax receipts for conservation and recreation purposes.

Other Obligations. Although most debt of the State or its agencies is issued through the Division of Bond Finance, there are other entities that issue bonds or incur other long-term obligations that are secured by State revenues. These include the Florida Housing Finance Corporation, the Florida Ports Financing Commission, the Correctional Privatization

Commission, the Department of Corrections, the Department of Juvenile Justice, the Department of Children and Families, the Florida Hurricane Catastrophe Fund Finance Corporation, the Inland Protection Financing Corporation and the Investment Fraud Restoration Financing Corporation. The Legislature has also dedicated 2.59% of tobacco tax receipts to be pledged to secure bonds issued by the City of Tampa. The City of Tallahassee has recently issued bonds to finance relocation a school of Florida State University. The State Comptroller has also entered into a consolidated equipment financing program for State agencies, which is subject to annual appropriation.

In 2000, the Legislature authorized the creation of the Tobacco Settlement Financing Corporation, with the power to issue up to \$3 billion in revenue bonds (not to exceed \$1.5 billion annually) in order to purchase the State's interest in the tobacco litigation settlement agreement, but no bonds have been approved by the Legislature or issued by the corporation. The Legislature also created the Florida Water Pollution Control Financing Corporation to finance State projects authorized under the Federal Clean Water Act. The principal amount of such bonds that may be issued may not exceed \$300 million in any fiscal year.

Ratings. As of June 30, 2005, Florida maintained a high bond rating from Moody's (Aa1), S&P (AAA), and Fitch (AA+) on all state general obligation bonds.

State Retirement System. The Florida Retirement System ("FRS") provides retirement, disability and death benefits for participating public employees. The FRS is a cost-sharing, multiple employer, pension plan. There are two primary programs: FRS Defined Benefit Program and Public Employee Optional Retirement Program. In addition to these two primary, integrated programs there are non-integrated plan alternatives available. As of June 30, 2006, there were 910 participating employers, and 1,027,019 individual participants.

The FRS Trust Funds are invested by the State Board of Administration. The assumed rate of investment return for Fiscal Year 2005-2006 was 7.75%, with an actual return calculated on a fair value basis of 10.56%. As of June 30, 2006, the FRS Trust Funds were valued at \$118.35 billion (market value).

The State contributed to the FRS as part of a cost-sharing multiple-employer public-employee defined benefit pension plan. For Fiscal Year 2004-2005, the State's total covered payroll amounted to approximately \$5.33 billion with actual and required employer contributions totaling \$518.49 million. The State's contribution to the FRS for Fiscal Years 2002-2003 and 2003-2004 was approximately \$371.7 million and \$436.3 million, respectively. These amounts were also equal to the required contributions for each year. Covered payroll refers to all compensation paid by the State to active employees covered by the FRS on which contributions to the defined benefit pension plan are based. The State's contribution represented 24.65% of the total contributions required of all participating employers.

Litigation

Due to its size and broad range of activities, the State is involved in numerous routine legal actions. The departments involved believe that the results of such litigation, pending or anticipated, will not materially affect the State's financial position.

Rendon v. Florida Department of Highway Safety and Motor Vehicles, etc., et al. The plaintiffs (persons covered by the Americans with Disabilities Act (“ADA”)), in a certified class action suit, seek a declaratory judgment that State statutes violate the ADA in that the surtax charged for a disabled parking permit is illegal. Issues include the right to proceed with refund claims when no one has applied for a refund claim. The trial court held that the State statute violated the ADA. The State appealed to the Federal district court, which reversed the trial court’s decision and remanded with direction to grant the DOT’s motion for summary judgment based on the sovereign immunity afforded the State. The plaintiffs petitioned the State Supreme Court for review, which was subsequently denied in 2003. The plaintiffs then petitioned the U.S. Supreme Court for review, which was granted. The Court vacated the lower court ruling and remanded the case back to the district court for further consideration in light of other recent related rulings in 2004. Oral argument was held in January 2005 and a decision is still pending. Estimated potential loss to the State is in excess of \$35 million.

AT&T Corporation v. Florida Department of Transportation. This is an inverse condemnation suit regarding an easement granted to AT&T Corporation by the DOT. A settlement agreement was reached on November 12, 2006. The DOT is not paying any monetary damages under the settlement.

Florida Gas Transmission Company v. Florida Department of Transportation. Plaintiff has filed a breach of contract suit for alleged failure and refusal of reimbursement for the relocation of its natural gas pipelines. On January 1, 2006, the plaintiff filed a notice of voluntary dismissal of the lawsuit.

Modern, Inc. and First Omni Service Corporation v. Florida Department of Transportation, U.S. Fish and Wildlife Services, and St. Johns River Water Management District. This is a suit for inverse condemnation by flooding. Mediation efforts have not been successful and a trial date is set for April 9, 2007. The plaintiff seeks \$34 million in damages.

Florida Department of Transportation v. Smith & Company, Inc. This breach of contract suit had been dismissed. The DOT, however, filed suit on January 21, 2004 for liquidating damages of \$1.6 million. The plaintiff filed a counterclaim for \$50 million raising the same issues as those in the dismissed case. Both parties have pending motions for summary judgment. The potential liability to the State is \$33 million.

Gulf Services, Inc., and Nature Quest, Inc., v. Florida Department of Environmental Protection. This breach of contract case was filed in 2004 for breach of contract, wrongful termination and civil conspiracy against the DEP and ten of its employees. In 2005, the court dismissed the complaint and the defendants seek attorney’s fees and costs as prevailing parties. The plaintiffs filed an amended complaint for breach of contract against the DEP, which was dismissed on January 19, 2006. A second amended complaint was filed on January 30, 2006. Trial was set for March 2007. Plaintiffs originally alleged monetary damages of \$80 million, but recent claims have been below \$10 million.

Kevin Rabin, et al v. Department of Revenue. Plaintiffs assert that the State sales and use taxes are facially unconstitutional when attempting to impose tax liabilities on transactions involving communication of information or on businesses and individuals who are recipients of

information as an infringement on free speech. Final judgment was issued in August 2006 in favor of the Department of Revenue. Plaintiffs filed an appeal that was dismissed in December 2006.

DirecTV, Inc., v. Florida Department of Revenue and Ogborn v. Florida Department of Revenue. These related cases seek to determine whether differences in State tax rates on cable and satellite television constitute Constitutional violations of the commerce clause and equal protection clause. DirecTV challenged the statute as a cable/satellite provided and Ogborn challenged it on behalf of subscribers. The total refund claim exceeds \$107 million. Litigation is in the early stages and limited discovery is ongoing.

SunTrust Bank v. Florida Department of Revenue, Chrysler Financial Co., LLC v. Florida Department of Revenue, Wells Fargo Financial Acceptance Florida, Inc., v. Florida Department of Revenue, Arcadia Financial Ltd., v. Florida Department of Revenue, Wells Fargo Financial America, Inc., v. Florida Department of Revenue, WFS Financial, Inc., v. Florida Department of Revenue. The DOR denied requests by the plaintiffs for refunds on sales tax paid. Plaintiffs' refund claims exceed \$30 million. On December 6, 2005, the court issued an order of final summary judgment in favor of the DOR against SunTrust. The DOR received SunTrust's notice of appeal on December 28, 2005. Oral arguments were heard on January 16, 2007. Potential liability to the State is in excess of \$30 million.

American Habilitations Services, Inc. et. al. v. Agency for Health Care Administration. The plaintiffs, 28 providers of services for developmentally disabled Medicaid recipients, sought declaratory and injunctive relief concerning unilaterally imposed rate reductions. The parties signed a settlement agreement in April 2006, pursuant to which the State paid \$10 million in damages to be distributed to the class.

Kindred Pharmacy Services East, LLC, et. al. v. Agency for Health Care Administration. The plaintiffs, eight pharmacies, filed a breach of contract claim and seek a declaratory judgment against the Agency, alleging that the Agency did not properly reimburse providers for prescription drugs provided under the Medicaid program. Plaintiffs seek compensatory damages, declaratory relief and attorneys' fees. The lawsuit was filed in June 2004, and discovery is ongoing. The estimated exposure of the claim is up to \$50 million.

Collier v. State of Florida. This is a challenge to Florida's former practice of releasing driver's license information to bulk mailers. Until October 2004, this information was public record. The plaintiffs contend that Federal law prohibits the disclosure of such information, even though State law required its disclosure. The plaintiffs sought class certification and damages. In October 2004, the State filed a motion to dismiss the case, which was recently granted on the inverse condemnation, declaratory judgment, and injunctive relief claims. The plaintiff was allowed to file an amended complaint on the privacy claim. On September 19, 2005, the State's motion to dismiss was granted. This decision was appealed by the plaintiffs, and the appellate court dismissed the appeal in December 2006.

Collier v. Dickenson. This is the Federal companion case to *Collier v. State of Florida*. In this action, the plaintiffs proceeded under Federal causes of action under the Federal Driver Privacy Protection Act, and are seeking damages from several State officials and

employees. A motion to dismiss was filed, which the court dismissed without prejudice to refile in April 2005 after limited discovery on the State's claim of qualified immunity. On March 30, 2006, the case was dismissed. Plaintiffs appealed on May 11, 2006, and seek damages in excess of \$25 million.

Boccia, et al. v. UB Vehicle Leasing Inc., Florida Department of Revenue, et al., and Penzer, et al. v. Ford Motor Credit Company, Florida Department of Revenue, et al. Both cases are class action refund cases that involve charges by automobile leasing companies for excess mileage, wear and tear, and taxation. No trial date has been set in the *Boccia* case. An amended complaint in the *Penzer* case was filed on October 11, 2006. The potential loss to the State could exceed \$25 million.

Anderson, et al v. Florida Department of Juvenile Justice, et al. The nature of the claim is wrongful death of a youth in a program funded by the Department of Juvenile Justice and operated under contract by the Sheriff of Bay County. The trial date is uncertain. An estimate of potential loss cannot be made.

APPENDIX B

Rating Categories

Description of certain ratings assigned by Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's"), and Fitch Ratings ("Fitch"):

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus sign (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

Commercial paper

A-1

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2

Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated 'A-1'.

A-3

Issues carrying this designation have an adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.

B

Issues rated B are regarded as having only speculative capacity for timely payment.

C

This rating is assigned to short-term debt obligations with a doubtful capacity for payment.

D

Debt rated 'D' is payment default. The 'D' rating category is used when interest payments or principal payments are not made on the due date, even if the applicable grace period has not expired, unless S&P believes such payments will be made during such grace period.

Moody's

Long-term

Aaa

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

MIG/VMIG--U.S. short-term

Municipal debt issuance ratings are designated as Moody's Investment Grade (MIG) and are divided into three levels -- MIG 1 through MIG 3.

The short-term rating assigned to the demand feature of variable rate demand obligations (VRDOs) is designated as VMIG. When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

MIG 1/VMIG1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2/VMIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3/VMIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. ‘BBB’ ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. ‘BB’ ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. ‘B’ ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. ‘CC’ ratings indicate that default of some kind appears probable. ‘C’ ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. ‘DDD’ obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. ‘DD’ ratings indicate potential recoveries in the range of 50% - 90% and ‘D’ the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated ‘DDD’ have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated ‘DD’ and ‘D’ are generally undergoing a formal reorganization or liquidation process; those rated ‘DD’ are likely to satisfy a higher portion of their outstanding obligations, while entities rated ‘D’ have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitment is adequate; however, near-term adverse changes could result in a reduction non-investment grade.

B

Speculative. Minimal capacity for timely payment of financial commitments plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

‘NR’ indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ long-term rating category, to categories below ‘CCC’, or to short-term ratings other than ‘F1.’
