It is not authorized for distribution to prospective investors in the Funds unless preceded or accompanied by a current Ivy Funds prospectus, or summary prospectus, and current performance information, including current Lipper ranking information.

### **Ivy Funds**

Henry J. Herrmann, CFA

#### Dear Shareholder,

Since our last report to you six months ago, the financial markets experienced further volatility, despite moderate economic growth in the U.S. What's causing the fluctuations?

The simple answer is financial markets dislike uncertainty. In recent months we've been faced with significant uncertainty around numerous issues, including:

- · central bank actions;
- politics in the U.S., specifically surrounding the presidential election;
- credit concerns in the energy sector;
- very slow growth in Europe and Japan;
- credit quality issues in important emerging economies, including China;
- the U.K.'s June vote on exiting the European Union; and
- fluctuations in currencies.

Amid the uncertain backdrop, the U.S. economic expansion has remained relatively good. Our investment team believes the U.S. is the bright spot, supported primarily by the U.S. consumer, who is benefitting from lower energy prices and lower inflation in general. The improved labor market allows for better demand for cars, homes, furnishings and various consumer goods.

When interest rates in the U.S. will rise, and by how much, remains an area of focus for the financial markets. Markets reacted negatively when the Federal Reserve raised rates slightly in December 2015 and seemed to imply more increases were likely. Since then, the Fed seems to have moderated its tightening plans. It's clear the Fed has become attuned to very sluggish global growth. Future rate increases in the U.S. will be very slow to develop, with job growth and inflation being the most important determinants of central bank policy.

Overseas, the European Central Bank and Bank of Japan are actively engaged in aggressive easing. As of yet, these steps are not leading to strengthening economic activity.

China, in the face of economic softening, has turned toward more aggressive stimulus. We believe moderate economic acceleration is likely in China in 2016, which should be beneficial to broader global growth.

While challenges remain, we do see potential catalysts for growth in several areas and industries, and our team continues to seek investment opportunities around the globe.

#### **Economic Snapshot**

	:	3/31/16		9/30/15
S&P 500 Index	2,	059.74	1	,920.03
MSCI EAFE Index	1,	652.04	1	,644.40
10-Year Treasury Yield		1.78%		2.06%
U.S. unemployment rate		5.0%		5.1%
30-year fixed mortgage rate		3.71%		3.86%
Oil price per barrel	\$	38.34	\$	45.09

Sources: Bloomberg, U.S. Department of Labor, MBA, CME

All government statistics shown are subject to periodic revision. The S&P 500 Index is an unmanaged index that tracks the stocks of 500 primarily large-cap U.S. companies. MSCI EAFE Index is an unmanaged index comprised of securities that represent the securities markets in Europe, Australasia and the Far East. It is not possible to invest directly in any of these indexes. Mortgage rates are from BankRate and reflect the overnight national average rate on a conventional 30-year fixed loan. Oil prices reflect the market price of West Texas intermediate grade crude.

to change at any time, based on market and other conditions, and

Respectfully

Henry J. Herrmann, CFA President

no forecasts can be guaranteed.

2016 SEMIANNUAL REPORT 3

#### **Expense Example**

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, exchange fees and account fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The following table is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended March 31, 2016.

#### **Actual Expenses**

The first section in the following table provides information about actual account values and actual expenses for each share class. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first section under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the table. Fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Savings Incentive Match Plan for Employees (SIMPLE) IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the table, a customer is charged an annual fee of \$18 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. With limited exceptions, for Class A and Class C shares, if your Fund account

balance is below \$650 on the Friday prior to the last full week of September of each year, the account will be assessed an account fee of \$20. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the following table. Additional fees have the effect of reducing investment returns.

### Hypothetical Example for Comparison Purposes

The second section in the following table provides information about hypothetical account values and hypothetical expenses for each share class based on the Fund's actual expense ratio and an assumed rate of return of five percent per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this five percent hypothetical example with the five percent hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), exchange fees or account fees. Therefore, the second section in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses paid may be impacted by expense reduction arrangements. If those arrangements had not been in place, expenses paid would have been higher. See Note 6 to the Financial Statements for further information.

<sup>\*</sup>Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 183 days in the six-month period ended March 31, 2016, and divided by 366.

- (1)This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column of this section.
- (2)This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.
- (3)Annualized expense ratio based on the period excluding offering cost was 1.21%.
- (4)Annualized expense ratio based on the period excluding offering cost was 2.04%.
- (5)Annualized expense ratio based on the period excluding offering cost was 0.91%.
- (6)Annualized expense ratio based on the period excluding offering cost was 0.91%.
- (7)Annualized expense ratio based on the period excluding offering cost was 1.16%.
- (8)Annualized expense ratio based on the period excluding offering cost was 1.07%.
- (9) Annualized expense ratio based on the period excluding offering cost was 1.77%.
- (10) Annualized expense ratio based on the period excluding offering cost was 0.77%.
- (11) Annualized expense ratio based on the period excluding offering cost was 0.77%.
- (12) Annualized expense ratio based on the period excluding offering cost was 1.02%.
- (13) Annualized expense ratio based on the period excluding offering cost was 1.25%.
- (14) Annualized expense ratio based on the period excluding offering cost was 1.95%.
- (15) Annualized expense ratio based on the period excluding offering cost was 0.88%.
- (16) Annualized expense ratio based on the period excluding offering cost was 0.75%.
- (17) Annualized expense ratio based on the period excluding offering cost was 1.13%.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads or exchange fees.

(UNAUDITED)

<sup>\*\*</sup>Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 88 days in the six-month period ended March 31, 2016, and divided by 366. Actual inception date of the Fund is 1-4-16 (the date on which shares were first acquired by shareholders).

Notes to Schedule of Investments

- (A)No dividends were paid during the preceding 12 months.
- (B)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$25,383 or 15.4% of net assets.
- (C)Principal amounts are denominated in the indicated foreign currency, where applicable (CAD Canadian Dollar, EUR Euro and GBP British Pound).
- (D)Payment-in-kind bonds.
- (E)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.
- (F)Other Government Securities may include emerging markets sovereign, quasi-sovereign, corporate and supranational agency and organization debt securities.
- (G)All or a portion of this position has not settled. Full contract rates do not take effect until settlement date.
- (H)Interest-only security. Amount shown as principal represents notional amount for computation of interest.
- (I)Rate shown is the yield to maturity at March 31, 2016.
- (J)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

<sup>\*</sup>Not shown due to rounding.

#### MARCH 31, 2016 (UNAUDITED)

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered		to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation
Australian Dollar	1,474	U.S. Dollar	1,122	4-26-16	Citibank N.A.	\$—	\$ 6
British Pound	3,606	U.S. Dollar	5,217	4-26-16	Citibank N.A.	37	_
Euro	6,948	U.S. Dollar	7,864	4-26-16	Citibank N.A.	_	47
Canadian Dollar	192	U.S. Dollar	148	4-26-16	Morgan Stanley International	_	*
British Pound	450	U.S. Dollar	642	6-30-16	JPMorgan Securities LLC	_	4
Euro	710	U.S. Dollar	786	6-30-16	JPMorgan Securities LLC	_	25
						\$37	\$82

The following total return swap agreements were outstanding at March 31, 2016:

		Termination	Notional		Unrealized
Counterparty	Underlying Security	Date	Amount <sup>(1)</sup>	Financing Fee <sup>(2)(3)</sup>	Appreciation
Morgan Stanley & Co., Inc.	iBoxx \$ Liquid High Yield Index	06/20/2016	\$151	3M LIBOR less 0.41528%	\$1

- (1)Notional amount changes by the percentage change of the price of the index applied to the notional amount.
- (2)The Fund receives the financing fee multiplied by the notional amount each quarter.
- (3)At the termination date, a net cash flow is exchanged where the market-linked total return is equivalent to the return of the underlying index less a financing rate, if any. As the receiver, a Fund would owe payments on any net positive total return, and would receive payments in the event of a negative total return.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	ı	evel 2	Le	evel 3

Notes to Schedule of Investments

- (A)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$62,826 or 34.5% of net assets.
- (B)Principal amounts are denominated in the indicated foreign currency, where applicable (CAD Canadian Dollar, EUR Euro and GBP British Pound).
- (C)Payment-in-kind bonds.
- (D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.
- (E)Other Government Securities may include emerging markets sovereign, quasi-sovereign, corporate and supranational agency and organization debt securities.
- (F)All or a portion of this position has not settled. Full contract rates do not take effect until settlement date.
- $(G) Interest-only\ security.\ Amount\ shown\ as\ principal\ represents\ notional\ amount\ for\ computation\ of\ interest.$
- (H)Rate shown is the yield to maturity at March 31, 2016.

<sup>\*</sup>Not shown due to rounding.

(I)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered		Currency to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation
British Pound	660	U.S. Dollar	940	6-30-16	JPMorgan Securities LLC	\$—	\$ 8
Euro	840	U.S. Dollar	929	6-30-16	JPMorgan Securities LLC	_	30
Canadian Dollar	384	U.S. Dollar	295	4-26-16	Morgan Stanley International	_	*
						\$—	\$38

The following total return swap agreements were outstanding at March 31, 2016:

	Underlying	Termination	Notional	Financing	Unrealized
Counterparty	Security	Date	Amount <sup>(1)</sup>	Fee <sup>(2)(3)</sup>	Appreciation
Morgan Stanley & Co., Inc.	iBoxx \$ Liquid High Yield Index	06/20/2016	\$227	3M LIBOR less 0.41528%	\$1

- (1)Notional amount changes by the percentage change of the price of the index applied to the notional amount.
- (2) The Fund receives the financing fee multiplied by the notional amount each quarter.
- (3)At the termination date, a net cash flow is exchanged where the market-linked total return is equivalent to the return of the underlying index less a financing rate, if any. As the receiver, a Fund would owe payments on any net positive total return, and would receive payments in the event of a negative total return.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

Notes to Schedule of Investments

<sup>\*</sup>Not shown due to rounding.

<sup>(</sup>A)Principal amounts are denominated in the indicated foreign currency, where applicable (AUD - Australian Dollar, CNH - Chinese Yuan Renminbi, EUR - Euro, GBP - British Pound, JPY - Japanese Yen, MXN - Mexican Peso and NOK - Norwegian Krone).

<sup>(</sup>B)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$354 or 0.6% of net assets.

<sup>(</sup>C)Other Government Securities may include emerging markets sovereign, quasi-sovereign, corporate and supranational agency and organization debt securities.

<sup>(</sup>D)All or a portion of securities with an aggregate value of \$269 are held in collateralized accounts for OTC derivatives collateral as governed by International Swaps and Derivatives Association, Inc. Master Agreements.

<sup>(</sup>E)All or a portion of securities with an aggregate value of \$284 have been pledged as collateral on open futures contracts.

<sup>(</sup>F)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

### SCHEDULE OF INVESTMENTS Ivy Targeted Return Bond Fund (in thousands)

The following centrally cleared credit default swaps – sold protection<sup>(1)</sup> were outstanding at March 31, 2016:

Index	Receive Fixed Rate	Maturity Date	Notional Amount <sup>(2)</sup>	Value	Unrealized Appreciation (Depreciation)

#### 1. ORGANIZATION

Ivy Funds, a Delaware statutory trust (the "Trust"), is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. Ivy Apollo Multi-Asset Income Fund, Ivy Apollo Strategic Income Fund, Ivy Emerging Markets Local Currency Debt Fund and Ivy Targeted Return Bond Fund (each, a "Fund") are four series of the Trust and are the only series of the Trust included in these financial statements. The investment objective(s), policies and risk factors of each Fund are described more fully in the Funds' Prospectus and Statement of Additional Information ("SAI"). Each Fund's investment manager is Ivy Investment Management Company ("IICO" or the "Manager").

Each Fund offers Class A, Class C, Class I, Class R6 and Class Y shares. Ivy Emerging Markets Local Currency Debt Fund also offers Class E and Class R shares. Class A and Class E shares are sold at their offering price, which is normally net asset value ("NAV") plus a front-end sales charge. For Class A shares, a 1% contingent deferred sales charge ("CDSC") is only imposed on shares purchased at NAV for \$1 million or more that are subsequently redeemed within 12 months of purchase. Class C shares are sold without a front-end sales charge, but may be subject to a CDSC. Class I, Class R, Class R6 and Class Y shares are sold without either a front-end sales charge or a CDSC. All classes of shares have identical rights and voting privileges with respect to the Fund in general and exclusive voting rights on matters that affect that class alone. Net investment income, net assets and NAV per share may differ due to each class having its own expenses, such as transfer agent and shareholder servicing fees, directly attributable to that class. Class A, C, E, R and Y have a distribution and service plan. Class I and Class R6 shares are not included in the plan.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by each Fund.

Security Transactions and Related Investment Income. Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and includes paydown gain (loss) and accretion of discounts and amortization of premiums. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. All or a portion of the distributions received from a real estate investment trust or publicly traded partnership may be designated as a reduction of cost of the related investment and/or realized gain.

Foreign Currency Translation. Each Fund's accounting records are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars daily, using foreign exchange rates obtained from an independent pricing service authorized by the Board of Trustees of the Trust (the "Board"). Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. Each Fund combines fluctuations from currency exchange rates and fluctuations in value when computing net realized gain (loss) and net change in unrealized appreciation (depreciation) on investments. Foreign exchange rates are typically valued as of the close of the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

**Allocation of Income, Expenses, Gains and Losses**. Income, expenses (other than those attributable to a specific class), gains and losses are allocated on a daily basis to each class of shares based upon the relative proportion of net assets represented by such class. Operating expenses directly attributable to a specific class are charged against the operations of that class.

**Income Taxes**. It is the policy of each Fund to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, each Fund intends to pay distributions as required to avoid imposition of excise tax. Accordingly, no provision has been made for Federal income taxes. The Funds file income tax returns in U.S. federal and applicable state jurisdictions. The Funds' tax returns are subject to examination by the relevant taxing authority until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax returns. Management of the Trust periodically reviews all tax positions to assess that it is more likely than not that the position would be sustained upon examination by the relevant tax authority based on the technical merits of each position. As of the date of these financial statements, management believes that no liability for unrecognized tax positions is required.

**Dividends and Distributions to Shareholders**. Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America ("U.S. GAAP"). If the total dividends and distributions made in any tax year exceeds net investment income and accumulated realized capital gains, a portion of the total distribution may be treated as a tax return of capital.

Segregation and Collateralization. In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission ("SEC"), the Dodd Frank Wall Street Reform and Consumer Protection Act, or the interpretive rules and regulations of the U.S. Commodities Futures Trading Commission require that a Fund either deliver collateral or segregate assets in connection with certain investments (e.g., dollar rolls, financial futures contracts, foreign currency exchange contracts, options written, securities with extended settlement periods and swaps), the Fund will segregate collateral or designate on its books and records cash or other liquid securities having a value at least equal to the amount that is required to be physically segregated for the benefit of the counterparty. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit cash or securities as collateral for certain investments. Certain countries require that cash reserves be held while investing in companies incorporated in that country. These cash reserves and cash collateral that has been pledged to cover obligations of the Funds under derivative contracts, if any, will be reported separately on the Statement of Assets and Liabilities as "Restricted cash." Securities collateral pledged for the same purpose, if any, is noted on the Schedule of Investments.

Concentration of Market and Credit Risk. In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (issuer credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to issuer credit risk, the Funds may be exposed to counterparty credit risk, or the risk that an entity with which the Funds have unsettled or open transactions may fail to or be unable to perform on its commitments. The Funds manage counterparty credit risk by entering into transactions only with counterparties that they believe have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is generally approximated by their value recorded on the Funds' Statement of Assets and Liabilities, less any collateral held by the Funds.

Certain Funds may hold high-yield and/or non-investment-grade bonds, which may be subject to a greater degree of credit risk. Credit risk relates to the ability of the issuer to meet interest or principal payments or both as they become due. The Funds may acquire securities in default and are not obligated to dispose of securities whose issuers subsequently default.

Certain Funds may enter into financial instrument transactions (such as swaps, futures, options and other derivatives) that may have off-balance sheet market risk. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the value of such financial instrument, as reflected on the Statement of Assets and Liabilities.

If a Fund invests directly in foreign currencies or in securities that trade in, and receive revenues in, foreign currencies, or in financial derivatives that provide exposure to foreign currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Fund, or, in the case of hedging positions, that the Fund's base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad.

**Inflation-Indexed Bonds**. Certain Funds may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity.

**Interest Only Obligations**. These securities entitle the owner to receive only the interest portion from a bond, Treasury note or pool of mortgages. These securities are generally created by a third party separating a bond or pool of mortgages into distinct interest-only and principal-only securities. As the principal (par) amount of a bond or pool of mortgages is paid down, the amount of interest income earned by the owner will decline as well.

Loans. Certain Funds may invest in loans, the interest rates of which float or adjust periodically based upon a specified adjustment schedule, benchmark indicator, or prevailing interest rates, the debtor of which may be a domestic or foreign corporation, partnership or other entity ("Borrower"). Loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates generally include prime rates of one or more major U.S. banks, London Interbank Offered Rate ("LIBOR") rates or certificates of deposit rates. Loans often require prepayments from excess cash flow or permit the Borrower to repay at its election. The degree to which Borrowers repay cannot be predicted with accuracy. As a result, the actual maturity may be substantially less than the stated maturities. Loans are exempt from registration under the Securities Act of 1933, as amended, may contain certain restrictions on resale, and cannot be sold publicly. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties.

When a Fund purchases assignments, it acquires all the rights and obligations under the loan agreement of the assigning lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than those held by the assigning lender. When a Fund purchases a participation of a loan interest, the Fund typically enters into a contractual agreement with the lender or other third party selling the participation. A participation interest in loans includes the right to receive payments of principal, interest and any fees to which it is entitled from the lender and only upon receipt by the lender of payments from the Borrower, but not from the Borrower directly. When investing in a participation interest, if a Borrower is unable to meet its obligations under a loan agreement, a Fund generally has no right to enforce compliance with the terms of the loan agreement. As a result, the Fund assumes the credit risk of the Borrower, the selling participant, and any other persons that are interpositioned between the Fund and the Borrower. If the lead lender in a typical lending syndicate becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy, the Fund may incur certain costs and delays in receiving payment or may suffer a loss of principal and/or interest.

**Payment In-Kind Securities**. Certain Funds may invest in payment in-kind securities ("PIKs"). PIKs give the issuer the option at each interest payment date of making interest payments in either cash or additional debt securities. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a dirty price) and require a pro-rata adjustment from the unrealized appreciation or depreciation on investments to interest receivable on the Statement of Assets and Liabilities.

Securities on a When-Issued or Delayed Delivery Basis. Certain Funds may purchase securities on a "when-issued" basis, and may purchase or sell securities on a "delayed delivery" basis. "When-issued" or "delayed delivery" refers to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery. Delivery and payment for securities that have been purchased by a Fund on a when-issued basis normally take place within six months and possibly as long as two years or more after the trade date. During this period, such securities do not earn interest, are subject to market fluctuation and may increase or decrease in value prior to their delivery. The purchase of securities on a when-issued basis may increase the volatility of a Fund's NAV to the extent the Fund executes such transactions while remaining substantially fully invested. When a Fund engages in when-issued or delayed delivery transactions, it relies on the buyer or seller, as the case may be, to complete the transaction. Their failure to do so may cause the Fund to lose the opportunity to obtain or dispose of the security at a price and yield IICO, or the Fund's investment subadviser, as applicable, consider advantageous. The Fund maintains internally designated assets with a value equal to or greater than the amount of its purchase commitments. The Fund may also sell securities that it purchased on a when-issued or delayed delivery basis prior to settlement of the original purchase.

**Custodian Fees.** "Custodian fees" on the Statement of Operations may include interest expense incurred by a Fund on any cash overdrafts of its custodian account during the period. Such cash overdrafts may result from the effects of failed trades in portfolio securities and from cash outflows resulting from unanticipated shareholder redemption activity. A Fund pays interest to its custodian on such cash overdrafts, to the extent they are not offset by positive cash balances maintained by that Fund. The "Earnings credit" line item, if shown, represents earnings on cash balances maintained by that Fund during the period. Such interest expense and other custodian fees may be paid with these earnings.

**Offering costs**. Each Fund bears all costs associated with the offering expenses of the Fund including legal, printing and support services. All such costs are amortized as an expense of the new Fund on a straight-line basis over twelve months from commencement of operations.

**Independent Trustees and Chief Compliance Officer Fees**. Fees paid to the Independent Trustees can be paid in cash or deferred to a later date, at the election of the Trustee according to the Deferred Fee Agreement entered into between the Trust and the Trustee(s). Each Fund records its portion of the deferred fees as a liability on the Statement of Assets and Liabilities. All fees paid in cash plus any appreciation (depreciation) in the underlying deferred plan are shown on the Statement of Operations. Additionally, fees paid to the Chief Compliance Officer of the Funds are shown on the Statement of Operations.

**Indemnifications**. The Trust's organizational documents provide current and former Trustees and Officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Trust. In the normal course of business, the Trust may also enter into contracts that provide general indemnification. The Trust's maximum exposure under these arrangements is unknown and is dependent on future claims that may be made against the Trust. The risk of material loss from such claims is considered remote.

**Basis of Preparation**. Each Fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 ("ASC 946"). The accompanying financial statements were prepared in accordance with U.S. GAAP, including but not limited to ASC 946. U.S. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

Subsequent Events. Management has performed a review for subsequent events through the date this report was issued.

#### 3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

Each Fund's investments are reported at fair value. Fair value is defined as the price that each Fund would receive upon selling an asset or would pay upon satisfying a liability in an orderly transaction between market participants at the measurement date. Each Fund calculates the NAV of its shares as of the close of the NYSE, normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

For purposes of calculating the NAV, the portfolio securities and other assets are valued on each business day using pricing and valuation methods as adopted by the Board. Where market quotes are readily available, fair value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Prices for fixed-income securities are typically based on quotes that are obtained from an independent pricing service authorized by the Board. To determine values of fixed-income securities, the independent pricing service utilizes such factors as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, and other yield and risk factors it deems relevant in determining valuations. Securities that cannot be valued by the independent pricing service may be valued using quotes obtained from dealers that make markets in the securities.

Short-term securities with maturities of 60 days or less are valued based on quotes that are obtained from an independent pricing service authorized by the Board as described in the preceding paragraph above.

Because many foreign markets close before the NYSE, events may occur between the close of the foreign market and the close of the NYSE that could have a material impact on the valuation of foreign securities. Waddell & Reed Services Company ("WRSCO"), pursuant to procedures adopted by the Board, evaluates the impact of these events and may adjust the valuation of foreign securities to reflect the fair value as of the close of the NYSE. In addition, all securities for which values are not readily available or are deemed unreliable are appraised at fair value as determined in good faith under the supervision of the Board.

Where market quotes are not readily available, portfolio securities or assets are valued at fair value, as determined in good faith by the Board or Valuation Committee pursuant to procedures approved by the Board.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE close, that materially affect the values of a Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available.

The Board has delegated to WRSCO the responsibility for monitoring significant events that may materially affect the values of a Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events. The Board has established a Valuation Committee to administer and oversee the valuation process, including the use of third party pricing vendors.

The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available. For instances in which daily market quotes are not readily available, investments may be valued, pursuant to procedures established by the Board, with reference to other securities or indices. In the event that the security or asset cannot be valued pursuant to one of the valuation methods established by the Board, the value of the security or asset will be determined in good faith by the Valuation Committee in accordance with the procedures adopted by the Board.

When a Fund uses these fair valuation methods applied by WRSCO that use significant unobservable inputs to determine its NAV, securities will be priced by a method that the Board or persons acting at their direction believe accurately reflects fair value and are categorized as Level 3 of the fair value hierarchy. These methods may require subjective determinations about the value of a security. The prices used by a Fund may differ from the value that will ultimately be realized at the time the securities are sold.

WRSCO is responsible for monitoring the implementation of the pricing and valuation policies through a series of activities to provide reasonable comfort of the accuracy of prices including: 1) periodic vendor due diligence meetings to review methodologies, new developments, and process at vendors, 2) daily and monthly multi-source pricing comparisons reviewed and submitted to the Valuation Committee, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by management and the Valuation Committee.

Accounting standards establish a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the factors that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

An individual investment's fair value measurement is assigned a level based upon the observability of the inputs which are significant to the overall valuation.

The three-tier hierarchy of inputs is summarized as follows:

Level 1 - Observable input such as quoted prices, available in active markets, for identical assets or liabilities.

Level 2 – Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.

Level 3 – Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

A description of the valuation techniques applied to the Funds' major classes of assets and liabilities measured at fair value on a recurring basis follows:

**Asset-Backed Securities and Mortgage-Backed Securities**. The fair value of asset-backed securities and mortgage-backed securities are estimated using recently executed transactions and based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy, and otherwise they would be categorized as Level 3.

**Corporate Bonds**. The fair value of corporate bonds, as obtained from an independent pricing service, is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3 of the fair value hierarchy.

**Derivative Instruments**. Forward foreign currency contracts are valued based upon the closing prices of the forward currency rates determined at the close of the NYSE provided by an independent pricing service. Swaps derive their value from underlying asset prices, indices, reference rates and other inputs or a combination of these factors. Swaps are valued by an independent pricing service unless the price is unavailable, in which case they are valued at the price provided by a dealer in that security. Futures contracts traded on an exchange are generally valued at the settlement price. Listed options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service unless the price is

unavailable, in which case they are valued at a quotation obtained from a broker-dealer. Over-the-counter ("OTC") options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service for a comparable listed option unless such a price is unavailable, in which case they are valued at a quotation obtained from a broker-dealer. If no comparable listed option exists from which to obtain a price from an independent pricing service and a quotation cannot be obtained from a broker-dealer, the OTC option will be valued using a model reasonably designed to provide a current market price.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. OTC derivative contracts include forward foreign currency contracts, swap agreements, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case with interest rate swap and option contracts. OTC derivative products valued using pricing models with significant observable inputs are categorized within Level 2 of the fair value hierarchy.

**Equity Securities**. Equity securities traded on U.S. or foreign securities exchanges or included in a national market system are valued at the official closing price at the close of each business day unless otherwise stated below. OTC equity securities and listed securities for which no price is readily available are valued at the average of the last bid and asked prices.

Mutual funds, including investment funds, typically are valued at the NAV reported as of the valuation date.

Securities that are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded and to the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, for which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intra-day trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Preferred stock, repurchase agreements, and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2.

**Loans**. Loans are valued using a price or composite price from one or more brokers or dealers as obtained from an independent pricing service. The fair value of loans is estimated using recently executed transactions, market price quotations, credit/market events, and cross-asset pricing. Inputs are generally observable market inputs obtained from independent sources. Loans are generally categorized in Level 2 of the fair value hierarchy, unless key inputs are unobservable in which case they would be categorized as Level 3.

**Municipal Bonds**. Municipal bonds are fair valued based on pricing models used by and obtained from an independent pricing service that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-wants lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable and timely, the fair values of municipal bonds would be categorized as Level 2; otherwise the fair values would be categorized as Level 3.

**Other Government Securities**. Other government securities include emerging market sovereign, quasi-sovereign, corporate and supranational agency and organization debt securities. The fair value of other government securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most other government securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3 of the fair value hierarchy.

**Restricted Securities**. Restricted securities that are deemed to be both Rule 144A securities and illiquid, as well as restricted securities held in non-public entities, are included in Level 3 of the fair value hierarchy to the extent that significant inputs to valuation are unobservable, because they trade infrequently, and, therefore, the inputs are unobservable. Restricted securities that are valued at a discount to similar publicly traded securities may be categorized as Level 2 of the fair value hierarchy to the extent that the discount is considered to be insignificant to the fair value measurement in its entirety; otherwise they may be categorized as Level 3.

**U.S. Government and Agency Securities**. U.S. government and agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, quoted market prices, and reference data. Accordingly, U.S. government and agency securities are normally categorized in Level 1 or 2 of the fair value hierarchy depending on the liquidity and transparency of the market.

Transfers from Level 2 to Level 3 occurred primarily due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred primarily due to the increased availability of observable market data due to increased market activity or information. Transfers between levels represent the values as of the beginning of the reporting period.

For fair valuations using unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. In accordance with the requirements of U.S. GAAP, a fair value hierarchy and Level 3 reconciliation, if any, have been included in the Notes to the Schedule of Investments for each respective Fund.

Net realized gain (loss) and net unrealized appreciation (depreciation), shown on the reconciliation of Level 3 investments if applicable, are included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated and/or affiliated securities and in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities, respectively. Additionally, the net change in unrealized appreciation (depreciation) for all Level 3 investments still held as of March 31, 2016, if applicable, is included on the Statement of Operations in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities.

#### 4. DERIVATIVE INSTRUMENTS (\$ amounts in thousands unless indicated otherwise)

The following disclosures contain information on why and how the Funds use derivative instruments, the associated risks of investing in derivative instruments, and how derivative instruments affect the Funds' financial positions and results of operations when presented by primary underlying risk exposure.

**Forward Foreign Currency Contracts**. Certain Funds may enter into forward foreign currency contracts ("forward contracts") for the purchase or sale of a foreign currency at a negotiated rate at a future date. Forward contracts are reported on a schedule following the Schedule of Investments. Forward contracts will be valued daily based upon the closing prices of the forward currency rates provided by an independent pricing service determined at the close of the NYSE as provided by a bank, dealer or independent pricing service. The resulting unrealized appreciation and depreciation is reported on the Statement of Assets and Liabilities as a receivable or payable and on the Statement of Operations within the change in unrealized appreciation (depreciation). At contract close, the difference between the original cost of the contract and the value at the close date is recorded as a realized gain (loss) on the Statement of Operations.

Risks to a Fund related to the use of such contracts include both market and credit risk. Market risk is the risk that the value of the forward contract will depreciate due to unfavorable changes in the exchange rates. Credit risk arises from the possibility that the counterparty will default. If the counterparty defaults, a Fund's maximum loss will consist of the aggregate unrealized gain on appreciated contracts that is not collateralized.

Ivy Apollo Multi-Asset Income Fund, Ivy Apollo Strategic Income Fund, Ivy Emerging Markets Local Currency Debt Fund and Ivy Targeted Return Bond Fund enter into forward foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to, or hedge exposure away from foreign currencies (foreign currency exchange rate risk).

**Futures Contracts**. Certain Funds may engage in buying and selling futures contracts. Upon entering into a futures contract, the Fund is required to deposit, in a segregated account, an amount equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Fund each day, dependent on the daily fluctuations in the value of the underlying debt security or index.

Futures contracts are reported on a schedule following the Schedule of Investments. Securities held in collateralized accounts to cover initial margin requirements on open futures contracts are identified on the Schedule of Investments. Cash held by the broker to cover initial margin requirements on open futures contracts and the receivable and/or payable for the daily mark to market for the variation margin are noted on the Statement of Assets and Liabilities. The net change in unrealized appreciation (depreciation) is reported on the Statement of Operations. Realized gains (losses) are reported on the Statement of Operations at the closing or expiration of futures contracts.

Risks of entering into futures contracts include the possibility of loss of securities or cash held as collateral, that there may be an illiquid market where the Fund is unable to close the contract or enter into an offsetting position and, if used for hedging purposes, the risk that the price of the contract will correlate imperfectly with the prices of the Fund's securities.

Ivy Emerging Markets Local Currency Debt Fund and Ivy Targeted Return Bond Fund invest in long and/or short positions in futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk), changes in the value of equity securities (equity risk) or foreign currencies (foreign currency exchange rate risk).

**Option Contracts**. Options purchased by a Fund are accounted for in the same manner as portfolio securities. The cost of instruments acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from instruments sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current value of the option written. When an option expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold), and the liability related to such option is extinguished. When a written call option is exercised, the premium is added to the proceeds from the sale of the underlying instrument in determining whether a Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the instruments purchased by a Fund is reduced by the amount of the premium received.

Investments in options, whether purchased or written, involve certain risks. Writing put options and purchasing call options may increase a Fund's exposure to the underlying instrument. With written options, there may be times when a Fund will be required to purchase or sell instruments to

meet its obligation under the option contract where the required action is not beneficial to the Fund, due to unfavorable movement of the market price of the underlying instrument. Additionally, to the extent a Fund enters into OTC option transactions with counterparties, the Fund will be exposed to the risk that counterparties to these OTC transactions will be unable to meet their obligations under the terms of the transaction.

Ivy Emerging Markets Local Currency Debt Fund and Ivy Targeted Return Bond Fund may purchase and write call and put options to increase or decrease hedging exposure to underlying instruments (which may include credit risk, equity risk, foreign currency exchange rate risk, event risk and/or interest rate risk), increase exposure to various equity markets or certain sectors, gain exposure to or facilitate trading in certain securities and/or, in the case of options written, to generate returns from options premiums.

**Swap Agreements**. Certain Funds may invest in swap agreements. Swap agreements are bilaterally negotiated agreements between a Fund and counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. Swap agreements may be privately negotiated in the over the counter market ("OTC swaps") or may be cleared through a third party, known as a central counterparty or derivatives clearing organization ("centrally cleared swaps").

Swaps are marked to market daily and changes in value are recorded as unrealized appreciation (depreciation) on the Statement of Operations. Daily changes in valuation of centrally cleared swaps, if any, are recorded as variation margin receivable or variation margin payable on the Statement of Assets and Liabilities. Payments received or made by the Fund are recorded as realized gain or loss on the Statement of Operations. Any upfront premiums paid are recorded as assets and any upfront fees received are recorded as liabilities and are shown as swap premiums paid and swap premiums received, respectively, if any, on the Statement of Assets and Liabilities and amortized over the term of the swap. A liquidation payment received or made at the termination or maturity of the swap is recorded as realized gain or loss on the Statement of Operations.

Upon entering into a centrally cleared swap, a Fund is required to deposit initial margin with the broker in the form of cash or securities. Securities deposited as initial margin, if any, are designated on the Schedule of Investments. Cash deposited as initial margin is identified on the Schedule of Investments and is recorded as restricted cash on the Statement of Assets and Liabilities.

Credit default swap agreements on corporate issuers or credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of the corporate issuer or all or part of the referenced entities comprising the credit index. As a buyer, if an underlying credit event occurs, a Fund will either (i) receive from the seller an amount equal to the notional amount of the swap and deliver the corporate issuer security or underlying securities comprising the index, or (ii) receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the corporate issuer security or underlying securities comprising the index. As a seller (writer), if an underlying credit event occurs, a Fund will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the corporate issuer security or underlying securities comprising the index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the corporate issuer security or underlying securities comprising the index.

Ivy Targeted Return Bond Fund enters into credit default swaps to protect bonds owned by a Fund against default.

Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating, for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time.

Ivy Emerging Markets Local Currency Debt Fund enters into interest rate swaps to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds, which may decrease when interest rates rise (interest rate risk).

Total return swaps involve a commitment to pay or receive periodic interest payments in exchange for a market-linked return based on a security or a basket of securities representing a variety of securities or a particular index. To the extent the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Ivy Apollo Multi-Asset Income Fund and Ivy Apollo Strategic Income Fund enter into total return swaps to hedge exposure to a security or market.

The creditworthiness of the counterparty with which a Fund enters into a swap agreement is monitored by IICO. If a firm's creditworthiness declines, the value of the agreement would likely decline, potentially resulting in losses. If a default occurs by the counterparty to such a transaction, the Fund will have contractual remedies pursuant to the agreement related to the transaction. The maximum loss a Fund may incur consists of the aggregate unrealized gain on appreciated contracts that is not collateralized.

**Collateral and rights of offset**. A Fund may mitigate credit risk with respect to OTC derivative counterparties through credit support annexes ("CSA") included with an International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreement which is the standard contract governing most derivative transactions between the Fund and each of its counterparties. The CSA allows the Fund and its counterparty to offset certain derivative financial instruments' payables and/or receivables against each other and/or with collateral, which is generally held by the Fund's custodian. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts specified in the CSA. To the extent amounts due to the Fund from its counterparties are not fully collateralized contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. See Note 2 "Segregation and Collateralization" for additional information with respect to collateral practices.

**Offsetting of Assets and Liabilities**. The following tables present financial instruments that are either (1) offset or (2) subject to an enforceable master netting arrangement or similar agreement as of March 31, 2016:

#### **Assets**

Gross Amounts Not Offset on the

### 6. INVESTMENT MANAGEMENT AND PAYMENTS TO AFFILIATED PERSONS (\$ amounts in thousands unless indicated otherwise)

**Management Fees**. IICO, a wholly owned subsidiary of Waddell & Reed Financial, Inc. ("WDR"), serves as each Fund's investment manager. The management fee is accrued daily by each Fund at the following annual rates as a percentage of average daily net assets:

Fund (M - Millions)	\$0 to \$1,000M	\$1,000 to \$2,000M	\$2,000 to \$3,000M	\$3,000 to \$5,000M	\$5,000 to \$10,000M	Over \$10,000M
Ivy Apollo Multi-Asset Income Fund	0.700%	0.650%	0.610%	0.580%	0.580%	0.580%
Ivy Apollo Strategic Income Fund	0.680	0.620	0.580	0.570	0.570	0.570
lvy Emerging Markets Local Currency Debt Fund	0.900	0.850	0.800	0.800	0.750	0.720
Ivy Targeted Return Bond Fund	0.900	0.850	0.800	0.800	0.750	0.750

IICO has entered into Subadvisory Agreements with the following entities on behalf of the Funds:

Under an agreement between IICO and Apollo Credit Management, LLC ("Apollo"), Apollo serves as subadviser for the total return strategy of each of the Ivy Apollo Multi-Asset Income Fund and Ivy Apollo Strategic Income Fund. Under an agreement between IICO and LaSalle Investment Management Securities, LLC ("LaSalle"), LaSalle serves as subadviser for the global real estate strategy of the Ivy Apollo Multi-Asset Income Fund. Under an agreement between IICO and Pictet Asset Management Limited ("Pictet UK") and Pictet Asset Management (Singapore) PTE Ltd. ("Pictet Singapore", and collectively with Pictet UK, "Pictet"), Pictet serves as subadvisors to Ivy Emerging Markets Local Currency Debt Fund. Under an agreement between IICO and Pictet Asset Management SA ("Pictet AM CH"), Pictet AM CH serves as subadvisor to Ivy Targeted Return Bond Fund. Each subadviser makes investment decisions in accordance with the Fund's investment objectives, policies and restrictions under the supervision of IICO and the oversight of the Board. IICO pays all applicable costs of the subadvisers.

**Accounting Services Fees**. The Trust has an Accounting and Administrative Services Agreement with WRSCO, doing business as WI Services Company ("WISC"), an indirect subsidiary of WDR. Under the agreement, WISC acts as the agent in providing bookkeeping and accounting services and assistance to the Trust, including maintenance of Fund records, pricing of Fund shares and preparation of certain shareholder reports. For these services, each Fund pays WISC a monthly fee of one-twelfth of the annual fee based on the average net asset levels shown in the following table:

(M - Millions)		· ·	5.					*	\$750 to \$1,000M	
Annual Fee Rate	\$0.00	\$11.50	\$23.10	\$35.50	\$48.40	\$63.20	\$82.50	\$96.30	\$121.60	\$148.50

In addition, for each class of shares in excess of one, each Fund pays WISC a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Each Fund also pays WISC a monthly administrative fee at the annual rate of 0.01%, or one basis point, for the first \$1 billion of net assets with no fee charged for net assets in excess of \$1 billion. This fee is voluntarily waived by WISC until a Fund's net assets are at least \$10 million and is included in "Accounting services fee" on the Statement of Operations.

**Shareholder Servicing. General.** Under the Shareholder Servicing Agreement between the Trust and WISC, with respect to Class A, Class C and Class E shares, for each shareholder account that was in existence at any time during the prior month, each Fund pays a monthly fee that ranges from \$1.5042 to \$1.6958 per account; however, WISC has agreed to reduce that fee if the number of total shareholder accounts within the Complex (Waddell & Reed Advisors Funds, InvestEd Portfolios and Ivy Funds) reaches certain levels. Effective June 6, 2011 for Class R shares, each Fund pays a monthly fee equal to one-twelfth of 0.25 of 1% of the average daily net assets of the class for the preceding month. Prior to June 6, 2011 the fee was 0.20 of 1%. For Class I and Class Y shares, each Fund pays a monthly fee equal to one-twelfth of 0.15 of 1% of the average daily net assets of the preceding month. For Class R6 shares, each Fund pays WISC a monthly fee equal to one-twelfth of 0.01 of 1% of the average daily net assets of the class for the preceding month. Each Fund also reimburses WISC for certain out-of-pocket costs for all classes.

**Networked accounts**. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain financial intermediaries), WISC has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries. The Fund will reimburse WISC for such costs if the annual rate of the third-party per account charges for a Fund are less than or equal to \$12.00 per account or an annual fee of 0.14 of 1% that is based on average daily net assets.

Broker accounts. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WISC if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. Each Fund may pay such broker-dealers a per account fee for each open account within the omnibus account (up to \$18.00 per account), or a fixed rate fee (up to an annual fee of 0.20 of 1% that is based on average daily net assets), based on the average daily NAV of the omnibus account (or a combination thereof).

Distribution and Service Plan. Class A and Class E Shares. Under a Distribution and Service Plan adopted by the Trust pursuant to Rule 12b-1 under the 1940 Act (the "Distribution and Service Plan"), each Fund may pay a distribution and/or service fee to Ivy Funds Distributors, Inc. ("IFDI") for Class A and Class E shares in an amount not to exceed 0.25% of the Fund's average annual net assets. The fee is to be paid to compensate IFDI for amounts it expends in connection with the distribution of the Class A and Class E shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts of that class.

Class C Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a service fee not to exceed 0.25% and a distribution fee not to exceed 0.75% of the Fund's average annual net assets for Class C shares to compensate IFDI for its services in connection with the distribution of shares of that class and/or provision of personal services to Class C shareholders and/or maintenance of shareholder accounts of that class.

Class R Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.50%, on an annual basis, of the average daily net assets of the Fund's Class R shares to compensate IFDI for, either directly or through third parties, distributing the Class R shares of that Fund, providing personal services to Class R shareholders and/or maintaining Class R shareholder accounts.

Class Y Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.25%, on an annual basis, of the average daily net assets of the Fund's Class Y shares to compensate IFDI for, either directly or through third parties, distributing the Class Y shares of that Fund, providing personal services to Class Y shareholders and/or maintaining Class Y shareholder accounts.

Sales Charges. As principal underwriter for the Trust's shares, IFDI receives sales commissions (which are not an expense of the Trust) for sales of Class A and Class E shares. A CDSC may be assessed against a shareholder's redemption amount of Class C or certain Class A and Class E shares and is paid to IFDI. During the period ended March 31, 2016, IFDI received the following amounts in sales commissions and CDSCs:

	Gross Sales	CDSC			Commissions
	Commissions	Class A	Class C	Class E	Paid <sup>(1)</sup>
Ivy Apollo Multi-Asset Income Fund	\$125	\$—	\$—*	N/A	\$131

<sup>\*</sup> Not shown due to rounding.

Any amounts due to the Funds as a reimbursement but not paid as of March 31, 2016 are shown as a receivable from affiliates on the Statement of Assets and Liabilities.

#### 7. RELATED PARTY TRANSACTIONS

Certain Funds are permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 of the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the period ended March 31, 2016, the Funds below engaged in purchases and sales of securities pursuant to Rule 17a-7 of the Act (amounts in thousands):

Fund	Purchases	Sales
Ivy Apollo Multi-Asset Income Fund	\$ 7,370	\$
Ivy Apollo Strategic Income Fund	12,312	_

#### 8. INTERFUND LENDING PROGRAM

Pursuant to an exemptive order issued by the SEC ("Order"), the Trust and the Advisors Fund Complex (Waddell & Reed Advisors Funds, Ivy Funds Variable Insurance Portfolios and InvestEd Portfolios; referred to with the Funds for purposes of this section as Funds) have the ability to lend money to, and borrow money from, each other pursuant to a master interfund lending agreement ("Interfund Lending Program"). Under the Interfund Lending Program, the Funds may lend or borrow money for temporary purposes directly to or from one another (each an "Interfund Loan"), subject to meeting the conditions of the Order. The interest rate to be charged on an Interfund Loan is the average of the overnight repurchase agreement rate and the short-term bank loan rate. The Funds made no Interfund Loans under the Interfund Lending Program during the period ended March 31, 2016.

<sup>(1)</sup> Due to Class A, Class C, Class I, Class R6 and/or Class Y contractual expense limits, investment management fees were waived for all share classes.

<sup>(2)</sup> Due to Class A, Class C, Class E, Class I, Class R, Class R6 and/or Class Y contractual expense limits, investment management fees were waived for all share classes.

#### 9. INVESTMENT SECURITIES TRANSACTIONS (\$ amounts in thousands)

The cost of purchases and the proceeds from maturities and sales of investment securities (excluding short-term securities) for the period ended March 31, 2016, were as follows:

	Purcho	ses	Sales		
	U.S. Government	Other Issuers	U.S. Government	Other Issuers

Ivy Targeted Return Bond Fund<sup>(2)</sup>

Net

#### 11. COMMITMENTS

Bridge loan commitments may obligate a Fund to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Fund earns a commitment fee, typically set as a percentage of the commitment amount. Such fee income is included in interest income on the Statements of Operations. At March 31, 2016, there were no outstanding bridge loan commitments.

#### 12. FEDERAL INCOME TAX MATTERS (\$ amounts in thousands)

For Federal income tax purposes, cost of investments owned at March 31, 2016 and the related unrealized appreciation (depreciation) were as follows:

Fund	Cost of Investments	Gross Appreciation	Gross Depreciation	Unrealized Appreciation (Depreciation)
Ivy Apollo Multi-Asset Income Fund	\$165,161	\$4,933	\$2,159	\$ 2,774
Ivy Apollo Strategic Income Fund	182,314	2,329	1,557	772
Ivy Emerging Markets Local Currency Debt Fund	40,924	635	3,293	(2,658)
Ivy Targeted Return Bond Fund	55,558	1,291	134	1,157

For Federal income tax purposes, the Funds' distributed and undistributed earnings and profit for the year ended September 30, 2015 and the post-October and late-year ordinary activity were as follows:

						Post-	Late-
						October	Year
	Distributed	Undistributed	Distributed	Undistributed		Capital	Ordinary
	Ordinary	Ordinary	Long-Term	Long-Term	Tax Return	Losses	Losses
Fund	Income	Income	Capital Gains	Capital Gains	of Capital	Deferred	Deferred
Ivy Emerging Markets Local Currency Debt Fund	\$688	\$—	\$10	\$—	\$—	\$—	\$914

Internal Revenue Code regulations permit each Fund to elect to defer into its next fiscal year capital losses incurred between each November 1 and the end of its fiscal year. Each Fund is also permitted to defer into its next fiscal year late-year ordinary losses that arise from the netting of activity generated between each November 1 and the end of its fiscal year on certain specified ordinary items.

Accumulated capital losses represent net capital loss carryovers as of September 30, 2015 that may be available to offset future realized capital gains and thereby reduce future capital gains distributions. As of September 30, 2015, the capital loss carryovers were as follows:

	Short-	Long-
	Term	Term
	Capital	Capital
	Loss	Loss
Fund	Carryover	Carryover
lvy Emerging Markets Local Currency Debt Fund	\$250	\$25

<sup>\*</sup> Not shown due to rounding.

<sup>(1)</sup> Period from October 1, 2015 (commencement of operations) to March 31, 2016.

<sup>(2)</sup> Period from January 4, 2016 (commencement of operations) to March 31, 2016.

# APPROVAL OF INVESTMENT MANAGEMENT AGREEMENTS Ivy Funds

#### Approvals for Ivy Apollo Strategic Income Fund and Ivy Apollo Multi-Asset Income Fund

At a meeting of the Board of Trustees (the "Board") of Ivy Funds (the "Trust") held on August 11, 2015, the trustees, including all of the trustees who are not "interested persons" (the "Independent Trustees"), as defined in Section 2(a)(19) of the Investment Company Act of 1940, as amended (the "1940 Act"), considered and approved an amendment to the Investment Management Agreement (the "Management Agreement") between Ivy Investment Management Company ("IICO") and the Trust, on behalf of Ivy Apollo Strategic Income Fund and Ivy Apollo Multi-Asset Income Fund (the "Funds"), to include the Funds under the Management Agreement. The Board considered and approved two investment subadvisory agreements (the "Subadvisory Agreements"). The Board also considered and approved an investment subadvisory agreement between IICO and Apollo Credit Management, LLC ("Apollo") with respect to the Funds. The Board also considered and approved an investment subadvisory agreement by and among IICO, LaSalle Investment Management Securities, LLC and LaSalle investment Management Securities B.V. (collectively, "LaSalle") with respect to Ivy Apollo Multi-Asset Income Fund. The Funds are newly created series of the Trust.

The Independent Trustees were assisted in their consideration of the Management Agreement and the Subadvisory Agreements (together, the "Agreements") by independent legal counsel, and met with such counsel separately from representatives of IICO. Independent legal counsel had provided the Board with a memorandum that discussed the various factors that the Board should consider as part of its review of the Agreements, including, among other things, the nature and the quality of the services proposed to be provided to the Funds by IICO, LaSalle and Apollo, potential profitability of each of IICO, LaSalle and Apollo (including any fall-out benefits) from their proposed relationship with the Funds, projected economies of scale, the role played by the Independent Trustees and information on comparative fees and expenses. The material factors and conclusions that formed the basis for the Board's determination to approve the Agreements are discussed below.

In considering the Agreements, the Board noted that although the Funds had not yet commenced operations, the Funds appeared to be designed to be able to achieve acceptable performance. The Board also considered the proposed expenses of the Funds, the cost of the services proposed to be provided by IICO, LaSalle and Apollo, including as compared to the other Funds in the Trust family and comparable funds. The Board also noted the proposed expense cap agreement, and concluded that the proposed expenses of the Funds were acceptable. The Board did not discuss possible economies of scale because the Funds had not yet commenced operations. The Board noted that it would monitor profitability once the Funds began operations. The Board considered the nature, extent and quality of services proposed to be provided to the Funds by IICO, LaSalle and Apollo, taking into account the investment objectives and strategies of the Funds, the Board's experience with IICO and LaSalle and with respect to Apollo, the information that IICO had presented to the Board on Apollo, Apollo's prior presentation on its capabilities and global resources available to it, and other materials previously provided to the Board on the Funds. In addition, the Board reviewed the resources and key personnel of IICO, LaSalle and Apollo. The Board also considered other services proposed to be provided to the Fund by IICO based upon its current experiences with IICO, such as IICO's ability to monitor adherence to the Funds' investment restrictions, producing reports, providing support services for the Board and Board committees on Fund matters, communicating with shareholders and overseeing the activities of other service providers, including monitoring compliance with various policies and procedures and with applicable laws and regulations. The Board also took into account the compliance environment at Apollo, noting that a review of Apollo's compliance environment had occurred previously. The Board concluded that the nature and extent of services to be provided by IICO, LaSalle and Apollo are reasonable, considering the quality of the services currently provided by IICO for other Funds of the Trust. The Board also discussed whether either of IICO, LaSalle or Apollo would derive any other direct or indirect benefits from serving as investment adviser or subadviser, as the case may be, to the Funds. The Board considered the benefits that would accrue to IICO, LaSalle and Apollo from their relationship with the Funds, including the fact that a variety of services for the Funds were proposed to be provided by affiliates of IICO, including distribution, shareholder servicing and transfer agency services. After consideration of these and other factors, the Board concluded that none of IICO, LaSalle or Apollo or any of their affiliates would receive any additional direct benefits that would preclude the Board from approving the Agreements for the Funds.

#### Ivy Targeted Return Bond Fund

At a meeting of the Board of Trustees (the "Board") of Ivy Funds (the "Trust") held on November 16, 2015, the trustees, including all of the trustees who are not "interested persons" (the "Independent Trustees"), as defined in Section 2(a)(19) of the Investment Company Act of 1940, as amended (the "1940 Act"), considered and approved an amendment to the Investment Management Agreement (the "Management Agreement") between Ivy Investment Management Company ("IICO") and the Trust, on behalf of Ivy Targeted Return Bond Fund (the "Fund"), to include the Fund under the Management Agreement. The Board also considered and approved an investment subadvisory agreement (the "Sub-advisory Agreement") between IICO, Pictet Asset Management SA, and Pictet Asset Management Limited (collectively, "Pictet"). The Fund is a newly created series of the Trust.

The Independent Trustees were assisted in their consideration of the Management Agreement and the Sub-advisory Agreement (together, the "Agreements") by independent legal counsel, and met with such counsel separately from representatives of IICO. Independent legal counsel had provided the Board with a memorandum that discussed the various factors that the Board should consider as part of its review of the Agreements, including, among other things, the nature and the quality of the services proposed to be provided to the Fund by IICO and Pictet, potential profitability of each of IICO and Pictet (including any fall-out benefits) from their proposed relationship with the Fund, projected economies of scale, the role played by the Independent Trustees and information on comparative fees and expenses. The material factors and conclusions that formed the basis for the Board's determination to approve the Agreements are discussed below.

In considering the Agreements, the Board noted that although the Fund had not yet commenced operations, the Fund appeared to be designed to be able to achieve acceptable performance. The Board also considered the proposed expenses of the Fund, the cost of the services proposed to be provided by IICO and Pictet, including as compared to the other Funds in the Trust family and comparable funds. The Board also reviewed the Fund's proposed benchmark, as well as management's explanation on how the Fund is designed to fit in with the Trust's other fixed-income

strategies. The Board also took into account the proposed expense cap agreement and concluded that the proposed expenses of the Fund were acceptable. The Board did not discuss possible economies of scale because the Fund had not yet commenced operations. The Board noted that it would monitor profitability once the Fund began operations. The Board considered the nature, extent and quality of services proposed to be provided to the Fund by IICO and Pictet, taking into account the investment objective and strategy of the Fund, the Board's experience with each of IICO of Pictet, additional information that IICO had presented to the Board on Pictet, Pictet's presentation on its capabilities and global resources, Pictet's prior performance in managing this strategy and its prior performance in sub-advising the Ivy Emerging Markets Local Currency Debt Fund (the "EMLCD Fund"), and other materials previously provided to the Board on the Fund. In addition, the Board reviewed the resources and key personnel of IICO and Pictet. The Board also considered other services proposed to be provided to the Fund by IICO based upon its current experiences with IICO, such as IICO's ability to monitor adherence to the Fund's investment restrictions, producing reports, providing support services for the Board and Board committees on Fund matters, communicating with shareholders and overseeing the activities of other service providers, including monitoring compliance with various policies and procedures and with applicable laws and regulations. The Board also took into account the compliance environment at IICO. The Board concluded that the nature and extent of the services proposed to be provided by IICO and Pictet are reasonable, considering the quality of the services currently provided by IICO and Pictet for other Funds, and with respect to Pictet, based upon its current role as investment sub-adviser to the EMLCD Fund series of the Trust, and based upon its presentation and experience. The Board also discussed whether either of IICO or Pictet would derive any other direct or indirect benefits from serving as investment adviser and subadviser, respectively, to the Fund. The Board considered the benefits that would accrue to IICO and Pictet from their relationship with the Fund, including the fact that a variety of services for the Fund were proposed to be provided by affiliates of IICO, including distribution, shareholder servicing and transfer agency services. After consideration of these and other factors, the Board concluded that none of IICO, Pictet, or any of their affiliates would receive any additional direct benefits that would preclude the Board from approving the Agreements for the Fund.

## PROXY VOTING INFORMATION Ivy Funds

#### **Proxy Voting Guidelines**

A description of the policies and procedures Ivy Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 1.800.777.6472 and (ii) on the Securities and Exchange Commission's ("SEC") website at www.sec.gov.

#### **Proxy Voting Records**

Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on Form N-PX through the Ivy Funds' website at www.ivyfunds.com and on the SEC's website at www.sec.gov.

Portfolio holdings can be found on the Trust's website at www.ivyfunds.com. Alternatively, a complete schedule of portfolio holdings of each Fund for the first and third quarters of each fiscal year is filed with the SEC and can be found on the Trust's Form N-Q. These holdings may be viewed in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.

# TO ALL TRADITIONAL IRA PLANHOLDERS: **Ivy Funds**

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W–4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.
