1. Your response to prior comment 4 in the August 10, 2015 letter states that estimated fair value of your single reporting unit based on the sum of control premium and market capitalization was 4% above the June 30, 2015 carrying value of the net assets. We also note that the estimated fair value based on the income valuation approach was above the carrying value of the net assets. Subsequently, we note that your stock price declined from \$8.77 on June 30, 2015 to \$7.40 on October 23, 2015, and your revenue decreased from \$40 million to \$13 million for the 3 months period ended June 30, 2015 and September 30, 2015, respectively. In your Form 10-Q for the quarterly period ended September 30, 2015, please confirm that you will disclose the following: (1) the

percentage by which the fair value of the reporting unit exceeded the carrying value as of the date of the most recent test; and (2) a discussion of the degree of uncertainty associated with the key assumptions. The discussion regarding uncertainty should provide specifics to the extent possible (e.g., the valuation model assumes recovery from a business downturn within a defined period of time). Refer to Item 303(a)(3)(ii) of Regulation S-K and Section V of SEC Release No. 33-8350.
