

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

- Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the Quarter Ended September 29, 2012
- Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number 1-8002

THERMO FISHER SCIENTIFIC INC.
(Exact name of Registrant as specified in its charter)

Delaware
(State of incorporation or organization)

04-2209186
(I.R.S. Employer Identification No.)

81 Wyman Street
Waltham, Massachusetts
(Address of principal executive offices)

02451
(Zip Code)

Registrant's telephone number, including area code: (781) 622-1000

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of Common Stock, as of the latest practicable date.

<u>Class</u>	<u>Outstanding at September 29, 2012</u>

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Thermo Fisher Scientific Inc. (the company) enables customers to make the world healthier, cleaner and safer by providing analytical instruments, equipment, reagents and consumables, software and services for research, manufacturing, analysis, discovery and diagnostics. Markets served include pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings.

Interim Financial Statements

The interim consolidated financial statements presented herein have been prepared by Thermo Fisher Scientific Inc. (the company or Thermo Fisher), are unaudited and, in the opinion of management, reflect all adjustments of a normal recurring nature necessary for a fair statement of the financial position at September 29, 2012, the results of operations for the three- and nine-month periods ended September 29, 2012, and October 1, 2011, and the cash flows for the nine-month periods ended September 29, 2012, and October 1, 2011. Interim results are not necessarily indicative of results for a full year.

The consolidated balance sheet presented as of December 31, 2011, has been derived from the audited consolidated financial statements as of that date. The consolidated financial statements and notes are presented as permitted by Form 10-Q and do not contain all of the information that is included in the annual financial statements and notes of the company. The consolidated financial statements and notes included in this report should be read in conjunction with the 2011 financial statements and notes included in the company's Current Report on Form 8-K filed with the Securities and Exchange Commission (SEC) on August 10, 2012.

Note 1 to the consolidated financial statements for 2011 describes the significant accounting estimates and policies used in preparation of the consolidated financial statements. There have been no material changes in the company's significant accounting policies during the nine months ended September 29, 2012.

Presentation

The results of the company's laboratory workstations business have been classified and presented as discontinued operations in the accompanying financial statements (Note 14). Prior period results have been adjusted to conform to this presentation. The discontinued operations have been excluded from the following notes unless they were material. In such instances, the amounts related to the discontinued operations have been separately disclosed.

Certain reclassifications of prior year amounts have been made to conform to the current year presentation.

	\$ 11,710.9	\$ (3,738.7)	\$ 7,972.2	\$ 10,985.2	\$ (3,169.3)	\$ 7,815.9

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In addition, significant estimates were made in estimating future cash flows to assess potential impairment of assets, and in determining the ultimate loss from selling discontinued operations and abandoning leases at facilities being exited (Note 13). Actual results could differ from those estimates.

Recent Accounting Pronouncements

In July 2012, the FASB modified existing rules to allow entities to use a qualitative approach to test indefinite-lived intangible asset for impairment. The revised standard allows an entity the option to first assess qualitatively whether it is more likely than not (that is, a likelihood of more than 50 percent) that an indefinite-lived intangible asset is impaired. An entity is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the entity determines that it is more likely than not that the asset is impaired. This guidance will be effective for the company in 2013, however, early adoption is permitted. Adoption of this standard will not have an impact on the company's consolidated financial position, results of operations or cash flows.

In December 2011, the FASB issued new guidance which requires enhanced disclosures on offsetting amounts within the balance sheet, including disclosing gross and net information about instruments and transactions eligible for offset or subject to a master netting or similar agreement. The guidance is effective for the company beginning January 1, 2013 and is to be applied retrospectively. The adoption of this guidance, which is related to disclosure only, will not have an impact on the company's consolidated financial position, results of operations or cash flows.

In September 2011, the FASB modified existing rules to allow entities to use a qualitative approach to test goodwill for impairment. The revised guidance permits an entity to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If impairment is deemed more likely than not, management would perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. This guidance was effective for the company on January 1, 2012. Adoption of this standard did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In June 2011, the FASB issued new guidance pertaining to the presentation of comprehensive income. The new rule eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. The standard is intended to provide a more consistent method of presenting non-owner transactions that affect the company's equity. Under the new guidance, an entity can present items of net income and other comprehensive income in one continuous statement or in two separate, but consecutive, statements. The new guidance was effective for the company on January 1, 2012 and did not have an impact on the company's consolidated financial position, results of operations or cash flows.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In May 2011, the FASB amended existing rules covering fair value measurement and disclosure to clarify guidance and minimize differences between U.S. GAAP and International Financial Reporting Standards (IFRS). The new guidance requires entities to provide information about valuation techniques and unobservable inputs used in Level 3 fair value measurements and provide a narrative description of the sensitivity of Level 3 measurements to changes in unobservable inputs. The guidance was effective for the company on January 1, 2012 and did not have an impact on the company's consolidated financial position, results of operations or cash flows.

Note 2. Acquisitions and Dispositions

On September 13, 2012, the Specialty Diagnostics segment acquired One Lambda, a provider of transplant diagnostics, for approximately \$884 million, net of cash acquired, including related real estate and subject to a post-closing adjustment, plus up to \$25 million of additional contingent consideration based upon the achievement of specified operating results in the year following the acquisition. The company recorded \$13 million as the fair value of contingent consideration at the acquisition date. The acquisition of One Lambda enhances the segment's presence in specialty *in vitro* diagnostics and adds new capabilities to the company's transplant-testing workflow. Revenues of One Lambda were \$182 million in 2011. The purchase price exceeded the fair value of the identifiable net assets and, accordingly, \$274 million was allocated to goodwill, all of which is tax deductible.

On May 1, 2012, the Laboratory Products and Services segment acquired Doe & Ingalls Management, LLC, a North Carolina-based channel for specialty production chemicals and provider of customized supply-chain services to the life sciences and microelectronics industries, for \$175 million plus up to \$3 million of contingent consideration. The acquisition expands the segment's products and services that address the production market. Revenues of Doe & Ingalls totaled approximately \$110 million in 2011. The purchase price exceeded the fair value of the identifiable net assets and, accordingly, \$81 million was allocated to goodwill, \$53 million of which is tax deductible.

In addition, in the first nine months of 2012, the Analytical Technologies segment acquired a manufacturer and supplier of radioactive isotope identifiers, x-ray and gamma-ray detectors and spectroscopy systems used to detect radioactive and other nuclear materials in security and environmental settings and the Specialty Diagnostics segment acquired a business that holds proprietary technology for tests to diagnose pre-eclampsia and eclampsia. The aggregate consideration for these acquisitions was \$15 million plus contingent consideration of up to \$5 million.

The company made contingent purchase price and post closing adjustment payments totaling \$5 million in the first nine months of 2012, for acquisitions completed prior to 2012. The contingent purchase price payments were contractually due to the sellers upon achievement of certain performance criteria at the acquired businesses.

The company's acquisitions have historically been made at prices above the fair value of the acquired identifiable assets, resulting in goodwill, due to expectations of the synergies that will be realized by combining the businesses. These synergies include the elimination of redundant facilities, functions and staffing; use of the company's existing commercial infrastructure to expand sales of the acquired businesses' products; and use of the commercial infrastructure of the acquired businesses to cost-effectively expand sales of company products.

Acquisitions have been accounted for using the purchase method of accounting, and the acquired companies' results have been included in the accompanying financial statements from their respective dates of acquisition. Acquisition transaction costs are recorded in selling, general and administrative expenses. The net assets acquired have been recorded based on estimates of fair value and, for acquisitions completed within the past year, are subject to adjustment upon finalization of the valuation process. The company is not aware of any information that indicates the final valuations will differ materially from preliminary estimates.

The components of the purchase price and net assets acquired for 2012 acquisitions are as follows:

(In millions)	One Lambda	Doe & Ingalls	Other	Total
Purchase Price				
Cash paid	\$ 878.8	\$ 174.8	\$ 15.4	\$ 1,069.0
Purchase price payable	6.7	—	—	6.7
Fair value of contingent consideration	12.9	1.5	1.4	15.8
Cash acquired	(1.2)	—	—	(1.2)
	<u>\$ 897.2</u>	<u>\$ 176.3</u>	<u>\$ 16.8</u>	<u>\$ 1,090.3</u>
Net Assets Acquired				
Current assets	\$ 111.3	\$ 21.7	\$ 1.8	\$ 134.8
Property, plant and equipment	30.3	11.6	0.1	42.0
Intangible assets:				
Customer relationships	335.4	68.2	3.1	406.7
Product technology	172.5	1.1	7.1	180.7
Tradenames and other	17.2	16.8	—	34.0
Goodwill	274.4	81.3	8.8	364.5
Other assets	—	0.4	—	0.4
Liabilities assumed	(43.9)	(24.8)	(4.1)	(72.8)
	<u>\$ 897.2</u>	<u>\$ 176.3</u>	<u>\$ 16.8</u>	<u>\$ 1,090.3</u>

The weighted-average amortization periods for intangible assets acquired in 2012 are 13 years for customer relationships, 11 years for product technology and 13 years for tradenames and other. The weighted average amortization period for all intangible assets acquired in 2012 is 13 years.

The company acquired Dionex Corporation in May 2011, the Phadia group in August 2011 and One Lambda in September 2012. Had the acquisitions of Dionex and Phadia been completed as of the beginning of 2010, and the acquisition of One Lambda been completed as of the beginning of 2011, the company's pro forma results for 2012 and 2011 would have been as follows:

(In millions except per share amounts)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Revenues	\$ 3,122.6	\$ 3,053.5	\$ 9,383.7	\$ 9,158.5
Income from Continuing Operations	\$ 318.8	\$ 289.0	\$ 920.6	\$ 816.9
Net Income	\$ 309.8	\$ 288.1	\$ 849.5	\$ 1,127.0
Earnings per Share from Continuing Operations:				
Basic	\$ 0.88	\$ 0.76	\$ 2.52	\$ 2.12
Diluted	\$ 0.87	\$ 0.75	\$ 2.50	\$ 2.09
Earnings per Share:				
Basic	\$ 0.85	\$ 0.75	\$ 2.32	\$ 2.93
Diluted	\$ 0.85	\$ 0.75	\$ 2.31	\$ 2.89

Pro forma results include non-recurring pro forma adjustments that were directly attributable to the business combinations. Acquisition-related transaction costs incurred by the company and One Lambda of \$12.8 million and

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

\$15.0 million in the three and nine months ended September 29, 2012, respectively, recorded in 2012 have been assumed to have occurred in 2011 for pro forma purposes.

Additionally, the following non-recurring pro forma adjustments relating to charges recorded in 2011 have been assumed to have occurred in 2010 for pro forma purposes:

- Pre-tax increase in income of \$21.6 million for the nine months ended October 1, 2011, relating to monetizing equity awards held by Dionex employees at the date of acquisition.
- Pre-tax increase in income of \$24.4 million and \$39.0 million for the three and nine months ended October 1, 2011, respectively, for the sale of Dionex and Phadia inventories revalued at the date of acquisition.
- Pre-tax increase in income of \$17.7 million and \$80.6 million in the three and nine months ended October 1, 2011, respectively, for acquisition-related transaction costs incurred by the company, Dionex and Phadia.

The company's results would not have been materially different from its pro forma results had the company's other 2012 and 2011 acquisitions occurred at the beginning of 2011 or 2010, respectively.

Dispositions

On October 22, 2012, the company sold its laboratory workstations business and on April 4, 2011, the company sold its Athena Diagnostics business and its Lancaster Laboratories business (See Note 14).

Note 3. Business Segment and Geographical Information

The company's continuing operations fall into three business segments as follows:

Analytical Technologies: provides a broad offering of instruments, reagents, consumables, software and services that are used for a range of applications in the laboratory, on the production line and in the field. These products and services are used by customers in pharmaceutical, biotechnology, academic, government and other research and industrial markets, as well as the clinical laboratory.

Specialty Diagnostics: provides a wide range of diagnostic test kits, reagents, culture media, instruments and associated products used to increase the speed and accuracy of diagnoses. These products are used primarily by customers in healthcare, clinical, pharmaceutical, industrial and food safety laboratories.

Laboratory Products and Services: provides virtually everything needed for the laboratory, including a combination of self-manufactured and sourced products and an extensive service offering. These products and services are used by customers in pharmaceutical, biotechnology, academic, government and other research and industrial markets, as well as the clinical laboratory.

The company's management evaluates segment operating performance based on operating income before certain charges/credits to cost of revenues and selling, general and administrative expenses, principally associated with acquisition accounting; restructuring and other costs/income including costs arising from facility consolidations such as severance and abandoned lease expense and gains and losses from the sale of real estate and product lines; and amortization of acquisition-related intangible assets. The company uses this measure because it helps management understand and evaluate the segments' core operating results and facilitates comparison of performance for determining compensation.

(a) Represents operating income before certain charges to cost of revenues and selling, general and administrative expenses; restructuring and other costs, net; and amortization of acquisition-related intangibles.

(b) The company does not allocate other expense, net to its segments.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 4. Other Expense, Net

The components of other expense, net, in the accompanying statement of income are as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Interest Income	\$ 5.9	\$ 6.8	\$ 19.0	\$ 18.4
Interest Expense	(60.3)	(49.5)	(175.4)	(116.2)
Other Items, Net	(1.4)	(6.9)	0.8	15.2
	\$ (55.8)	\$ (49.6)	\$ (155.6)	\$ (82.6)

Other Items, Net

In the three-month period ended October 1, 2011, other items, net includes \$5 million of losses on currency exchange contracts associated with the acquisition of Phadia. In the nine months ended October 1, 2011, other items, net includes \$28 million of gains on currency exchange contracts associated with the acquisition of Phadia, offset in part by \$10 million of fees associated with a short-term financing commitment to fund the Phadia acquisition.

Note 5. Stock-based Compensation Expense

The components of pre-tax stock-based compensation expense for the company's continuing operations are as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Stock Option Awards	\$ 9.8	\$ 12.0	\$ 30.0	\$ 37.3
Restricted Share/Unit Awards	10.5	6.7	27.8	23.3
Total Stock-based Compensation Expense	\$ 20.3	\$ 18.7	\$ 57.8	\$ 60.6

Stock-based compensation expense is included in the accompanying statement of income as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Cost of Revenues	\$ 1.2	\$ 1.4	\$ 3.8	\$ 4.3
Selling, General and Administrative Expenses	18.6	16.8	52.6	54.8
Research and Development Expenses	0.5	0.5	1.4	1.5
Total Stock-based Compensation Expense	\$ 20.3	\$ 18.7	\$ 57.8	\$ 60.6

As of September 29, 2012, there was \$85 million of total unrecognized compensation cost related to unvested stock options granted. The cost is expected to be recognized through 2016 with a weighted average amortization period of 2.5 years.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

As of September 29, 2012, there was \$66 million of total unrecognized compensation cost related to unvested restricted stock unit awards. The cost is expected to be recognized through 2015 with a weighted average amortization period of 2.1 years.

During the first nine months of 2012, the company made equity compensation grants to employees consisting of 1.0 million restricted stock units and options to purchase 2.8 million shares.

Note 6. Pension and Other Postretirement Benefit Plans

Employees of a number of the company's non-U.S. and certain U.S. subsidiaries participate in defined benefit pension plans covering substantially all full-time employees at those subsidiaries. Some of the plans are unfunded, as permitted under the plans and applicable laws. The company also maintains postretirement healthcare programs at several acquired businesses where certain employees are eligible to participate. The costs of the postretirement healthcare programs are funded on a self-insured and insured-premium basis.

Net periodic benefit costs for the company's defined benefit pension plans include the following components:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Service Cost - Benefits Earned	\$ 2.9	\$ 3.0	\$ 8.9	\$ 9.1
Interest Cost on Benefit Obligation	12.7	13.6	38.2	40.7
Expected Return on Plan Assets	(13.8)	(14.4)	(41.4)	(43.1)
Amortization of Net Loss	1.7	0.8	5.1	2.3
Amortization of Prior Service Benefit	(0.1)	—	(0.1)	—
Settlement/Curtailment Loss	0.1	—	—	—
Special Termination Benefits	—	—	0.5	0.1
Net Periodic Benefit Cost	\$ 3.5	\$ 3.0	\$ 11.2	\$ 9.1

Net periodic benefit costs for the company's other postretirement benefit plans include the following components:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Service Cost - Benefits Earned	\$ 0.1	\$ 0.1	\$ 0.5	\$ 0.5
Interest Cost on Benefit Obligation	0.4	0.4	1.4	1.4

Note 7. Earnings per Share

(In millions except per share amounts)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Income from Continuing Operations	\$ 299.4	\$ 266.3	\$ 872.6	\$ 730.9
(Loss) Income from Discontinued Operations	(4.1)	(1.0)	(15.4)	4.7
(Loss) Gain on Disposal of Discontinued Operations, Net	(4.9)	0.1	(55.7)	305.4
Net Income	<u>\$ 290.4</u>	<u>\$ 265.4</u>	<u>\$ 801.5</u>	<u>\$ 1,041.0</u>
Basic Weighted Average Shares	362.6	379.5	365.6	383.3
Plus Effect of:				
Convertible debentures	—	—	—	0.7
Stock options and restricted units	2.8	3.2	2.6	3.7
Diluted Weighted Average Shares	<u>365.4</u>	<u>382.7</u>	<u>368.2</u>	<u>387.7</u>
Basic Earnings per Share:				
Continuing operations	\$.83	\$.70	\$ 2.39	\$ 1.91
Discontinued operations	(0.02)	—	(0.19)	.81
	<u>\$.80</u>	<u>\$.70</u>	<u>\$ 2.19</u>	<u>\$ 2.72</u>
Diluted Earnings per Share:				
Continuing operations	\$.82	\$.70	\$ 2.37	\$ 1.89
Discontinued operations	(0.02)	—	(0.19)	.80
	<u>\$.79</u>	<u>\$.69</u>	<u>\$ 2.18</u>	<u>\$ 2.68</u>

Options to purchase 6.4 million, 5.5 million, 8.6 million and 5.8 million shares of common stock were not included in the computation of diluted earnings per share for the third quarter of 2012 and 2011 and the first nine months of 2012 and 2011, respectively, because their effect would have been antidilutive.

Note 8. Debt and Other Financing Arrangements

Senior Notes

On August 15, 2012, the company issued \$500 million principal amount of 1.85% senior notes due 2018 and \$800 million principal amount of 3.15% senior notes due 2023 to fund its acquisition of One Lambda and for other general corporate purposes. Interest on each of the senior notes is payable semi-annually. Each of the notes may be redeemed at any time at a redemption price of 100% of the principal amount plus a specified make-whole premium plus accrued interest. The company is subject to certain affirmative and negative covenants under the indentures governing the senior notes, the most restrictive of which limits the ability of the company to pledge principal properties as security under borrowing arrangements.

Credit Facilities

On April 11, 2012, the company terminated both of its prior revolving credit agreements and entered into new revolving credit facilities with a bank group that provide for up to \$2.0 billion of unsecured multi-currency revolving credit. The new credit facilities include a \$1 billion 5-year credit agreement, with an optional \$500 million increase, plus a \$500 million 364-day credit agreement. The agreements call for interest at either a LIBOR-based rate or a rate

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued) (Unaudited)

based on the prime lending rate of the agent bank, at the company's option. The agreements contain affirmative, negative and financial covenants, and events of default customary for financings of this type. The financial covenant requires the company to maintain a Consolidated Leverage Ratio of debt to EBITDA (as defined in the agreements) below 3.5 to 1.0. The credit agreements permit the company to use the facilities for working capital; acquisitions; repurchases of common stock, debentures and other securities; the refinancing of debt; and general corporate purposes. The 5-year credit agreement allows for the issuance of letters of credit, which reduces the amount available for borrowing. If the company borrows under these facilities, it intends to leave undrawn an amount equivalent to outstanding commercial paper (\$50 million at September 29, 2012) to provide a source of funds in the event that commercial paper markets are not available. As of September 29, 2012, no borrowings were outstanding under either facility, although available capacity was reduced by approximately \$49 million as a result of outstanding letters of credit.

Note 9. Commitments and Contingencies

There are various lawsuits and claims pending against the company involving product liability, contract, commercial and other issues. In view of the company's financial condition and the accruals established for these matters, management does not believe that the ultimate liability, if any, related to these matters will have a material adverse effect on the company's financial condition, results of operations or cash flows.

The company establishes a liability that is an estimate of amounts needed to pay damages in the future for events that have already occurred. The accrued liabilities are based on management's judgment as to the probability of losses for asserted and unasserted claims and, where applicable, actuarially determined estimates. The reserve estimates are adjusted as additional information becomes known or payments are made.

For product liability, workers compensation and other personal injury matters, the company accrues the most likely amount or at least the minimum of the range of probable loss when a range of probable loss can be estimated. The company records estimated amounts due from insurers as an asset. Although the company believes that the amounts reserved and estimated recoveries are probable and appropriate based on available information, including actuarial studies of loss estimates, the process of estimating losses and insurance recoveries involves a considerable degree of judgment by management and the ultimate amounts could vary materially. Insurance contracts do not relieve the company of its primary obligation with respect to any losses incurred. The collectability of amounts due from its insurers is subject to the solvency and willingness of the insurer to pay, as well as the legal sufficiency of the insurance claims. Management monitors the financial condition and ratings of its insurers on an ongoing basis.

The company is currently involved in various stages of investigation and remediation related to environmental matters. The company cannot predict all potential costs related to environmental remediation matters and the possible impact on future operations given the uncertainties regarding the extent of the required cleanup, the complexity and interpretation of applicable laws and regulations, the varying costs of alternative cleanup methods and the extent of the company's responsibility. Expenses for environmental remediation matters related to the costs of permit requirements and installing, operating and maintaining groundwater-treatment systems and other remedial activities related to historical environmental contamination at the company's domestic and international facilities were not material in any period presented. The company records accruals for environmental remediation liabilities, based on current interpretations of environmental laws and regulations, when it is probable that a liability has been incurred and the amount of such liability can be reasonably estimated. The company calculates estimates based upon several factors, including reports prepared by environmental specialists and management's knowledge of and experience with these environmental matters. The company includes in these estimates potential costs for investigation, remediation and operation and maintenance of cleanup sites.

Management believes that its reserves for environmental matters are adequate for the remediation costs the company expects to incur. As a result, the company believes that the ultimate liability with respect to environmental remediation matters will not have a material adverse effect on the company's financial position, results of operations or cash flows. However, the company may be subject to additional remedial or compliance costs due to future events, such as changes in existing laws and regulations, changes in agency direction or enforcement policies, developments in

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

remediation technologies or changes in the conduct of the company's operations, which could have a material adverse effect on the company's financial position, results of operations or cash flows. Although these environmental remediation liabilities do not include third-party recoveries, the company may be able to bring indemnification claims against third parties for liabilities relating to certain sites.

Note 10. Comprehensive Income and Shareholders' Equity

Comprehensive Income

Comprehensive income combines net income and other comprehensive items. Other comprehensive items represent certain amounts that are reported as components of shareholders' equity in the accompanying balance sheet.

Accumulated other comprehensive items in the accompanying balance sheet consist of the following:

(In millions)	September 29, 2012	December 31, 2011
Cumulative Translation Adjustment	\$ (11.6)	\$ (206.3)
Net Unrealized Gain on Available-for-sale Investments, Net of Tax	7.1	7.0
Net Unrealized Losses on Hedging Instruments, Net of Tax	(33.8)	(36.2)
Pension and Other Postretirement Benefit Liability Adjustments, Net of Tax	(162.0)	(164.0)
	\$ (200.3)	\$ (399.5)

The unrealized losses on hedging instruments relate to the company's 5% Senior Notes due 2015 and 3.60% Senior Notes due 2021. The losses are being amortized as an increase in interest expense over the term of the related debt. The after-tax charges recognized in net income were \$2.4 million and \$0.5 million in the first nine months of 2012 and 2011, respectively.

The after-tax pension and other postretirement benefit liability adjustments recognized in net income in the first nine months of 2012 and 2011 were \$3.3 million and \$1.9 million, respectively.

Note 11. Fair Value Measurements and Fair Value of Financial Instruments

Fair Value Measurements

The company uses the market approach technique to value its financial instruments and there were no changes in valuation techniques during 2012. The company's financial assets and liabilities carried at fair value are primarily comprised of investments in money market funds, mutual funds holding publicly traded securities, derivative contracts used to hedge the company's currency and interest rate risks and other investments in unit trusts and insurance contracts held as assets to satisfy outstanding retirement liabilities.

The fair value accounting guidance requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities that the company has the ability to access.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data such as quoted prices, interest rates and yield curves.

Level 3: Inputs are unobservable data points that are not corroborated by market data.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of September 29, 2012:

(In millions)	September 29, 2012	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Cash equivalents	\$ 61.3	\$ 61.3	\$ —	\$ —
Investments in mutual funds, unit trusts and other similar instruments	35.7	35.7	—	—
Insurance contracts	60.2	—	60.2	—
Auction rate securities	4.3	—	—	4.3
Derivative contracts	0.3	—	0.3	—
Total Assets	\$ 161.8	\$ 97.0	\$ 60.5	\$ 4.3
Liabilities				
Derivative contracts	\$ 0.5	\$ —	\$ 0.5	\$ —
Contingent consideration	16.8	—	—	16.8
Total Liabilities	\$ 17.3	\$ —	\$ 0.5	\$ 16.8

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2011:

(In millions)	December 31, 2011	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Cash equivalents	\$ 377.1	\$ 377.1	\$ —	\$ —
Investments in mutual funds, unit trusts and other similar instruments	35.6	35.6	—	—
Insurance contracts	56.7	—	56.7	—
Auction rate securities	4.3	—	—	4.3
Derivative contracts	0.9	—	0.9	—
Total Assets	\$ 474.6	\$ 412.7	\$ 57.6	\$ 4.3
Liabilities				
Derivative contracts	\$ 1.2	\$ —	\$ 1.2	\$ —
Contingent consideration	1.7	—	—	1.7
Total Liabilities	\$ 2.9	\$ —	\$ 1.2	\$ 1.7

The company determines the fair value of its insurance contracts by obtaining the cash surrender value of the contracts from the issuer. The fair value of derivative contracts is the estimated amount that the company would receive/pay upon liquidation of the contracts, taking into account the change in currency exchange rates. The company determines the fair value of the auction rate securities by obtaining indications of value from brokers/dealers. The company determines the fair value of acquisition-related contingent consideration based on assessment of the

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

probability that the company would be required to make such future payment. Changes to the fair value of contingent consideration are recorded in selling, general and administrative expense. The following tables provide a rollforward of the fair value, as determined by Level 3 inputs, of the auction rate securities and contingent consideration.

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Auction Rate Securities

(a) The fair value of the foreign currency exchange contracts is included in the consolidated balance sheet under the captions other current assets or other accrued expenses.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

(In millions)	Gain (Loss) Recognized			
	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011
Derivatives Designated as Fair Value Hedges				
Interest rate swaps	\$ —	\$ 3.2	\$ —	\$ 16.5
Derivatives Not Designated as Fair Value Hedges				
Foreign currency exchange contracts				
Included in cost of revenues	1.2	—	2.6	—
Included in other expense, net	(8.8)	25.0	(2.2)	31.9

Gains and losses recognized on interest rate swap and foreign currency exchange contracts are included in the consolidated statement of income together with the corresponding, offsetting losses and gains on the underlying hedged transactions except for the exchange rate hedges entered in anticipation of completing the 2011 acquisition of Phadia (discussed below). The gains on these contracts had no underlying offset in the company's income statement.

On May 19, 2011, in connection with the planned acquisition of Phadia, the company entered into several foreign currency forward contracts to partly mitigate the currency exchange risk associated with the payment of the euro-denominated purchase price and the repayment of multi-currency debt on the Phadia books. The currencies purchased included the euro, Swedish krona and Japanese yen, with the aggregate notional amount totaling \$2.34 billion. These currency forward contracts were not able to be designated as hedging instruments and therefore the change in the derivative fair value was marked to market through income/expense, resulting in a \$28 million gain included in other expense, net, during the nine months ended October 1, 2011.

Fair Value of Other Financial Instruments

The carrying amount and fair value of the company's notes receivable and debt obligations are as follows:

(In millions)	September 29, 2012		December 31, 2011	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Notes Receivable	<u>\$ 5.7</u>	<u>\$ 5.7</u>	<u>\$ 6.5</u>	<u>\$ 6.5</u>
Debt Obligations:				
Senior notes	7,374.2	7,809.3	6,093.0	6,454.6
Commercial paper	50.0	50.0	900.0	900.0
Other	48.1	48.1	35.0	35.0
	<u>\$ 7,472.3</u>	<u>\$ 7,907.4</u>	<u>\$ 7,028.0</u>	<u>\$ 7,389.6</u>

The fair value of debt obligations was determined based on quoted market prices and on borrowing rates available to the company at the respective period ends which represent level 2 measurements.

Note 12. Supplemental Cash Flow Information

(In millions)	Nine Months Ended	
	September 29, 2012	October 1, 2011
Non-cash Activities		
Fair value of assets of acquired businesses and product lines	\$ 1,164.3	\$ 7,055.1
Cash paid for acquired businesses and product lines	(1,069.0)	(5,902.7)
Liabilities assumed of acquired businesses and product lines	\$ 95.3	\$ 1,152.4
Declared but unpaid dividends	\$ 47.7	\$ —
Issuance of stock upon vesting of restricted stock units	\$ 28.8	\$ 22.1

Note 13. Restructuring and Other Costs, Net

Restructuring and other costs in the first nine months of 2012 primarily included continuing charges for headcount reductions and facility consolidations in an effort to streamline operations, including the closure and consolidation of several facilities in the U.S. and Europe.

As of November 2, 2012, the company has identified restructuring actions that will result in additional charges of approximately \$60 million, primarily in the remainder of 2012 and the first half of 2013.

During the third quarter of 2012, the company recorded net restructuring and other costs by segment as follows:

(In millions)	Analytical Technologies	Specialty Diagnostics	Laboratory Products and Services	Corporate	Total
Cost of Revenues	\$ 0.3	\$ 2.7	\$ 0.1	\$ —	\$ 3.1
Selling, General and Administrative Expenses	—	11.6	—	7.4	19.0
Restructuring and Other Costs, Net	8.5	1.7	4.9	0.1	15.2
	\$ 8.8	\$ 16.0	\$ 5.0	\$ 7.5	\$ 37.3

The components of net restructuring and other costs by segment are as follows:

Analytical Technologies

The Analytical Technologies segment recorded \$8.8 million of net restructuring and other charges in the third quarter of 2012. The segment recorded charges to cost of revenues of \$0.3 million for accelerated depreciation at facilities closing due to real estate consolidation and the sale of inventories revalued at the date of acquisition and \$8.5 million of other restructuring costs, \$7.9 million of which were cash costs. These costs, which were primarily associated with headcount reductions and facility consolidations including the closure and consolidation of several facilities in the U.S. and Europe, consisted of \$5.1 million of severance for approximately 170 employees; \$2.0 million of abandoned facility costs; and \$0.8 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment recorded \$0.6 million of non-cash expense primarily for writedowns to estimated disposal value of real estate held for sale.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Specialty Diagnostics

The Specialty Diagnostics segment recorded \$16.0 million of net restructuring and other charges in the third quarter of 2012. The segment recorded charges to cost of revenues of \$2.7 million primarily for the sale of inventories revalued at the date of acquisition and, to a lesser extent, accelerated depreciation at facilities closing due to real estate consolidation; charges to selling, general and administrative expenses of \$11.6 million for transaction costs related to the One Lambda acquisition and \$1.7 million of other restructuring costs, all of which were cash costs. The cash costs included \$1.5 million of severance for approximately 100 employees and \$0.2 million of other cash costs associated with restructuring actions.

Laboratory Products and Services

The Laboratory Products and Services segment recorded \$5.0 million of net restructuring and other charges in the third quarter of 2012. The segment recorded charges to cost of revenues of \$0.1 million and \$4.9 million of other restructuring costs, net, \$5.3 million of which were cash costs associated with headcount reductions and facility consolidations to streamline operations. The cash costs included \$4.1 million of severance for approximately 140 employees; \$0.4 million of abandoned facility costs; and \$0.8 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment also recorded \$0.4 million of income primarily related to a gain on sale of real estate.

Corporate

During the third quarter of 2012, the company recorded charges of \$7.4 million to selling, general and administrative expenses related to product liability litigation.

First Nine Months of 2012

During the first nine months of 2012, the company recorded net restructuring and other costs as follows:

<u>(In millions)</u>	<u>Analytical Technologies</u>	<u>Specialty Diagnostics</u>	<u>Laboratory Products and Services</u>	<u>Corporate</u>	<u>Total</u>
Cost of Revenues	\$ 1.3	\$ 40.5	\$ 0.7	\$ —	\$ 42.5
Selling, General and Administrative Expenses	(0.1)	13.1	0.3	(0.2)	13.1
Restructuring and Other Costs, Net	<u>26.7</u>	<u>11.4</u>	<u>13.2</u>	<u>0.4</u>	<u>51.7</u>
	<u>\$ 27.9</u>	<u>\$ 65.0</u>	<u>\$ 14.2</u>	<u>\$ 0.2</u>	<u>\$ 107.3</u>

The components of net restructuring and other costs by segment are as follows:

Analytical Technologies

In the first nine months of 2012, the Analytical Technologies segment recorded \$27.9 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$1.3 million primarily for accelerated depreciation at facilities closing due to real estate consolidation; \$0.1 million as a reduction of selling, general and administrative expenses; and \$26.7 million of other restructuring costs, net, \$22.5 million of which were cash costs. The cash costs, which were associated with headcount reductions and facility consolidations including the consolidation and closure of several facilities in the U.S. and Europe, consisted of \$15.8 million of severance for approximately 470 employees; \$4.9 million of abandoned facility costs; and \$1.8 million of other cash costs, primarily for retention, relocation and moving expenses associated with facility consolidations. The segment also recorded \$4.2 million of non-cash expense, net, primarily for real estate writedowns related to facility consolidations.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Specialty Diagnostics

In the first nine months of 2012, the Specialty Diagnostics segment recorded \$65.0 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$40.5 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$13.1 million for transaction costs related to the One Lambda acquisition; and \$11.4 million of other restructuring costs, \$10.7 million of which were cash costs associated with headcount reductions and facility consolidations to streamline operations. The cash costs consisted of \$9.9 million of severance for approximately 220 employees; \$0.4 million of abandoned facility costs; and \$0.4 million of other cash costs. The non-cash charges of \$0.7 million consisted of writedowns to estimated disposal value of real estate held for sale.

Laboratory Products and Services

In the first nine months of 2012, the Laboratory Products and Services segment recorded charges to cost of revenues of \$0.7 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$0.3 million for revisions of estimated contingent consideration; and \$13.2 million of other restructuring costs, \$12.4 million of which were cash costs. The cash costs, which consisted of headcount reductions and facility consolidations to streamline operations, included \$7.7 million of severance for approximately 250 employees; \$2.1 million of abandoned facility costs; and \$2.6 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment recorded \$0.8 million of non-cash costs, net, primarily related to fixed asset writedowns partially offset by gains on sales of real estate.

Corporate

The company recorded \$0.4 million of cash costs for severance at its corporate operations, offset in part by a reduction of selling, general and administrative expenses of \$0.2 million, net, associated with product liability litigation.

The following table summarizes the cash components of the company's restructuring plans. The non-cash components and other amounts reported as restructuring and other costs, net, in the accompanying statement of income have been summarized in the notes to the tables. Accrued restructuring costs are included in other accrued expenses in the accompanying balance sheet.

- (a) Other includes cash compensation from monetizing equity awards held by Dionex employees at the date of acquisition and employee retention costs which are accrued ratably over the period through which employees must work to qualify for a payment.
- (b) Excludes an aggregate of \$6 million of non-cash charges, net, which are detailed by segment above.

The company expects to pay accrued restructuring costs as follows: severance, employee-retention obligations and other costs, primarily through 2013; and abandoned-facility payments, over lease terms expiring through 2018.

Note 14. Discontinued Operations

On June 22, 2012, in an effort to exit a non-core business, the company's senior management made a decision to pursue a sale of its laboratory workstations business, part of the Laboratory Products and Services segment. The company completed the sale in October 2012 for nominal proceeds. The results of the laboratory workstations business have been classified and presented as discontinued operations in the accompanying financial statements. Prior period results have been adjusted to conform to this presentation. A product line with annual revenues of approximately \$4 million that was reported within the laboratory workstations business in 2011 was retained and is now reported in the Specialty Diagnostics segment.

For 2011, the laboratory workstations business had revenues of approximately \$180 million, and an operating loss of approximately \$6 million. In the nine months ended September 29, 2012, the company recorded after tax charges aggregating \$58 million as the estimated loss on the divestiture. In addition, the company recorded an after-tax gain of \$2 million upon receipt of additional proceeds from a prior divestiture.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Operating results of the laboratory workstations business were as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	September 29, 2012	October 1, 2011	September 29, 2012	October 1, 2011

Pre-tax Loss	(6.8)	(1.7)	(25.2)	(1.4)

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business for \$740 million in cash and its Lancaster Laboratories business for \$180 million in cash and escrowed proceeds of \$20 million, substantially all of which was received in October 2012. The sale of these businesses resulted in an after-tax gain of approximately \$304 million or \$0.79 per diluted share in the second quarter of 2011. The results of both businesses have been included in the accompanying financial statements as discontinued operations. Operating results of these businesses in the first quarter of 2011 were as follows:

(In millions)	2011
Revenues	\$ 54.3
Pre-tax Income	9.1

THERMO FISHER SCIENTIFIC INC.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934 are made throughout this Management’s Discussion and Analysis of Financial Condition and Results of Operations. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words “believes,” “anticipates,” “plans,” “expects,” “seeks,” “estimates,” and similar expressions are intended to identify forward-looking statements. While the company may elect to update forward-looking statements in the future, it specifically disclaims any obligation to do so, even if the company’s estimates change, and readers should not rely on those forward-looking statements as representing the company’s views as of any date subsequent to the date of the filing of this Quarterly Report.

A number of important factors could cause the results of the company to differ materially from those indicated by such forward-looking statements, including those detailed under the heading “Risk Factors” in Part II, Item 1A of this report on Form 10-Q.

Overview of Results of Operations and Liquidity

The company develops, manufactures and sells a broad range of products that are sold worldwide. The company expands the product lines and services it offers by developing and commercializing its own technologies and by making strategic acquisitions of complementary businesses. The company’s continuing operations fall into three business segments (see Note 3): Analytical Technologies, Specialty Diagnostics and Laboratory Products and Services.

(Dollars in millions)	Three Months Ended				Nine Months Ended			
	September 29, 2012		October 1, 2011		September 29, 2012		October 1, 2011	
Revenues								
Analytical Technologies	\$ 1,012.2	32.8%	\$ 1,006.5	34.3%	\$ 3,017.9	32.6%	\$ 2,765.9	32.7%
Specialty Diagnostics	706.7	22.9%	615.8	21.0%	2,170.5	23.5%	1,763.7	20.8%
Laboratory Products and Services	1,510.1	48.9%	1,441.1	49.1%	4,490.2	48.5%	4,327.6	51.1%
Eliminations	(143.3)	(4.6)%	(130.5)	(4.4)%	(428.0)	(4.6)%	(387.7)	(4.6)%
	\$ 3,085.7	100%	\$ 2,932.9	100%	\$ 9,250.6	100%	\$ 8,469.5	100%

Sales in the third quarter of 2012 were \$3.09 billion, an increase of \$153 million from the third quarter of 2011. The increase was due to higher sales at existing businesses and acquisitions, including Phadia. Had Phadia and the company been combined from the beginning of 2011, revenues in 2012 would have increased \$79 million (3%) over pro forma 2011 revenues. Aside from the effects of currency translation and other acquisitions, net of divestitures, revenues in 2012 increased \$128 million (4%) over pro forma 2011 revenues (discussed in total and by segment below). The pro forma increase in revenues was primarily due to increased demand, across the company’s three segments, offset in part by modestly lower sales to customers in industrial markets following very strong sales growth to customers in these markets in the 2011 period. While sales to customers in academic and government markets increased modestly over weak sales to those markets in the third quarter of 2011, the company currently expects weakness in academic and government markets will continue in the near term due in part to uncertainty in government funding expectations in the U.S. and Europe.

The company’s strategy is to augment internal growth at existing businesses with complementary acquisitions such as those completed in 2012 and 2011. The company’s principal recent acquisitions are described below.

- One Lambda, a provider of transplant diagnostics, was acquired in September 2012 to enhance the company’s presence in specialty *in vitro* diagnostics and add new capabilities to the company’s transplant-testing workflow.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of Results of Operations and Liquidity (continued)

- Doe & Ingalls, a channel for specialty production chemicals and provider of customized supply-chain services to life sciences and microelectronics industries, was acquired in May 2012 to expand the company's products and services that address the production market.
- Phadia, a global leader in the development, manufacturing and marketing of complete blood-test systems to support the clinical diagnosis and monitoring of allergy and autoimmune diseases, was acquired in August 2011 to expand the company's specialty diagnostics offerings.
- Dionex, a global leader in the manufacturing and marketing of ion and liquid chromatography and sample preparation systems, consumables, and software for chemical analysis, was acquired in May 2011 to expand the company's chromatography systems portfolio.

In the third quarter of 2012, total company operating income and operating income margin were \$352 million and 11.4%, respectively, compared with \$316 million and 10.8%, respectively, in 2011. The increase in operating income and operating income margin was primarily due to profit on incremental sales from existing businesses and, to a lesser extent, productivity improvements, net of inflationary cost increases. The increase was also due in part to \$28 million of lower acquisition-related charges in the third quarter of 2012, offset in part by an increase in amortization expense of \$12 million in 2012, primarily related to the acquisition of Phadia and, to a lesser extent, foreign currency transaction losses on trade receivables and payables. The company's references throughout this discussion to productivity improvements generally refer to improved cost efficiencies from its Practical Process Improvement (PPI) processes, reduced costs resulting from global sourcing initiatives and a lower cost structure following restructuring actions including headcount reductions and consolidation of facilities.

The company recorded a benefit from income taxes in the third quarter of 2012, and a nominal provision in the third quarter of 2011. Both periods included year-to-date adjustments to reflect lower estimated full year taxes based on forecasted profitability in the countries in which the company conducts business. The estimated effective rate is 6% for 2012 and was 11% for 2011 as of the end of the third quarter of 2011. The decrease in the effective tax rate is due to higher profitability in lower tax jurisdictions. The tax provisions in the 2012 and 2011 periods were favorably affected by \$1.5 million, or 0.5 percentage points, and \$3.5 million, or 1.3 percentage points, respectively, as a result of adjustments to deferred tax balances due to changes in tax rates. The tax provision in the 2011 period was also favorably affected by \$7.9 million, or 3.0 percentage points, by the ability to use tax loss carryforwards as a result of the Phadia acquisition.

Income from continuing operations increased to \$299 million in the third quarter of 2012, from \$266 million in the third quarter of 2011, primarily due to increased operating income and lower income taxes, offset in part by higher interest expense associated with debt to fund acquisitions.

During the first nine months of 2012, the company's cash flow from operations totaled \$1.38 billion (after deducting \$21 million used by discontinued operations), compared with \$1.05 billion (including \$17 million from discontinued operations) for the first nine months of 2011. The increase resulted primarily from higher income before amortization and depreciation in 2012 compared to 2011 and lower increases in working capital items.

As of September 29, 2012, the company's short-term debt totaled \$435 million, including \$50 million of commercial paper obligations and \$351 million of senior notes, due December 2012. On April 11, 2012, the company terminated both of its prior revolving credit agreements and entered into new revolving credit facilities with a bank group that provide up to \$2.0 billion of unsecured multi-currency revolving credit. The new credit facilities include a \$1 billion 5-year credit agreement, with an optional \$500 million increase, plus a \$500 million 364-day credit agreement. If the company borrows under these facilities, it intends to leave undrawn an amount equivalent to outstanding commercial paper to provide a source of funds in the event that commercial paper markets are not available. As of September 29, 2012, no borrowings were outstanding under either facility, although available capacity was reduced by approximately \$49 million as a result of outstanding letters of credit.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of Results of Operations and Liquidity (continued)

The company believes that its existing cash and short-term investments of \$837 million as of September 29, 2012, and the company's future cash flow from operations together with available borrowing capacity under its revolving credit agreements are sufficient to meet the cash requirements of its existing businesses for the foreseeable future, including at least the next 24 months.

Critical Accounting Policies and Estimates

The company's discussion and analysis of its financial condition and results of operations is based upon its financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent liabilities. Management believes the most complex and sensitive judgments, because of their significance to the consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and Note 1 to the Consolidated Financial Statements of the company's Form 10-K for 2011, describe the significant accounting estimates and policies used in preparation of the consolidated financial statements. Actual results in these areas may differ from management's estimates under different assumptions or conditions. There have been no significant changes in the company's critical accounting policies during the first nine months of 2012.

Results of Operations

Third Quarter 2012 Compared With Third Quarter 2011

Continuing Operations

Sales in the third quarter of 2012 were \$3.09 billion, an increase of \$153 million from the third quarter of 2011. The increase was due to higher sales at existing businesses and acquisitions, including Phadia. Had Phadia and the company been combined from the beginning of 2011, revenues in 2012 would have increased \$79 million (3%) over pro forma third quarter of 2011 revenues, including \$36 million due to other acquisitions, net of divestitures, and \$128 million (4%) due to higher revenues at existing businesses, offset in part by a decrease of \$86 million due to the unfavorable effects of currency translation. The pro forma increase in revenues in 2012 was primarily due to increased demand offset in part by modestly lower sales to customers in industrial markets following very strong sales growth to customers in these markets in the 2011 period. Sales growth was strong in Asia and moderate in both Europe and, to a lesser extent, in North America. While sales to customers in academic and government markets increased modestly over weak sales to those markets in the third quarter of 2011, the company currently expects weakness in academic and government markets will continue in the near term due in part to uncertainty in government funding expectations in the U.S. and Europe.

In the third quarter of 2012, total company operating income and operating income margin were \$352 million and 11.4%, respectively, compared with \$316 million and 10.8%, respectively, in 2011. The increase in operating income and operating income margin was primarily due to profit on incremental sales from existing businesses and, to a lesser extent, productivity improvements, net of inflationary cost increases. The increase was also due in part to \$28 million of lower acquisition-related charges in the third quarter of 2012, offset in part by an increase in amortization expense of \$12 million in 2012, primarily related to the acquisition of Phadia and, to a lesser extent, foreign currency transaction losses on trade receivables and payables. The company's references throughout this discussion to productivity improvements generally refer to improved cost efficiencies from its Practical Process Improvement (PPI) processes, reduced costs resulting from global sourcing initiatives and a lower cost structure following restructuring actions including headcount reductions and consolidation of facilities.

In the third quarter of 2012, the company recorded restructuring and other costs, net, of \$37 million, including \$3 million of charges to cost of revenues primarily related to the sale of inventories revalued at the date of acquisition

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

and, to a lesser extent, accelerated depreciation on manufacturing assets to be abandoned due to facility consolidations and \$19 million of charges to selling, general and administrative expenses primarily for \$12 million of transaction costs related to the acquisition of One Lambda and a \$7 million charge for product liability litigation. The company incurred \$15 million of cash restructuring costs primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated, such as the consolidation of several facilities in the U.S. and Europe (see Note 13).

In the third quarter of 2011, the company recorded restructuring and other costs, net, of \$57 million, including \$24 million of charges to cost of revenues primarily related to the sale of inventories revalued at the date of acquisition and \$21 million of charges to selling, general and administrative expenses primarily for transaction costs related to the acquisitions of Phadia and Dionex. The company incurred \$11 million of cash restructuring costs primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that were being consolidated, such as the consolidation of several Massachusetts facilities.

As of November 2, 2012, the company has identified restructuring actions that will result in additional charges of approximately \$60 million in 2012 and the first half of 2013 and expects to identify additional actions during the remainder of 2012. The restructuring actions for which charges were incurred in the first nine months of 2012 are expected to result in annual cost savings of approximately \$70 million.

On February 3, 2012, the Internal Revenue Service issued proposed regulations that provide guidance on the excise tax imposed on the sale of medical devices under Internal Revenue Code Section 4191. The tax applies to the sale in the U.S. of certain medical devices by a manufacturer, producer or importer of the device. The tax is in the amount of 2.3% of the sale price and will apply to all devices that are sold beginning January 1, 2013. Based on the company's estimate of product revenue that is expected to be subject to the regulations, the company currently expects that imposition of the tax will cost approximately \$25 million annually, beginning in 2013.

Segment Results

The company's management evaluates segment operating performance using operating income before certain charges/credits to cost of revenues and selling, general and administrative expenses, principally associated with acquisition-related activities; restructuring and other costs/income including costs arising from facility consolidations such as severance and abandoned lease expense and gains and losses from the sale of real estate and product lines; and amortization of acquisition-related intangible assets. The company also refers to this measure as adjusted operating income. The company uses this measure because it helps management understand and evaluate the segments' core operating results and facilitate comparison of performance for determining compensation (Note 3). Accordingly, the following segment data is reported on this basis.

Consolidated Operating Income Margin	11.4%	10.8%	

Income from the company's reportable segments increased 5% to \$576 million in the third quarter of 2012 due primarily to profit on incremental sales from acquisitions and existing businesses as well as productivity improvements.

Analytical Technologies

(Dollars in millions)	Three Months Ended		
	September 29, 2012	October 1, 2011	Change
Revenues	\$ 1,012.2	\$ 1,006.5	1%
Operating Income Margin	18.9%	19.5%	(0.6)

Sales in the Analytical Technologies segment increased \$6 million to \$1.01 billion in the third quarter of 2012. Sales increased \$34 million (3%) due to higher revenues at existing businesses and \$2 million due to acquisitions. These increases were offset in part by a decrease of \$30 million due to the unfavorable effects of currency translation. The increase in revenue at existing businesses was primarily due to increased demand for analytical instruments and bioscience products.

THERMO FISHER SCIENTIFIC INC.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Results of Operations (continued)

Operating income margin was 18.9% in the third quarter of 2012 and 19.5% in the third quarter of 2011. The decrease resulted from inflationary cost increases, commercial investments and unfavorable foreign currency exchange, offset in part by productivity improvements and profit on incremental sales at existing businesses.

Specialty Diagnostics

(Dollars in millions)	Three Months Ended		
	September 29, 2012	October 1, 2011	Change
Revenues	\$ 706.7	\$ 615.8	15%
Operating Income Margin	24.1%	24.4%	(0.3)

Sales in the Specialty Diagnostics segment increased \$91 million to \$707 million in the third quarter of 2012. The increase was due to acquisitions, including Phadia and, to a lesser extent, higher revenues at existing businesses, offset in part by the unfavorable effects of currency translation. Had Phadia and the company been combined from the beginning of 2011, revenues would have increased \$17 million (2%) over pro forma 2011 revenues, including increases of \$10 million due to other acquisitions, including One Lambda, and \$32 million (5%) due to higher revenues at existing businesses, offset in part by a decrease of \$24 million due to the unfavorable effects of currency translation. The pro forma increase in revenue at existing businesses was primarily due to increased demand, particularly for clinical diagnostics and microbiology products.

Operating income margin was 24.1% in the third quarter of 2012 and 24.4% in the third quarter of 2011. The decrease resulted from inflationary cost increases, unfavorable foreign currency exchange and commercial investments offset in part by productivity improvements and profit on incremental sales at existing businesses.

Laboratory Products and Services

(Dollars in millions)	Three Months Ended		
	September 29, 2012	October 1, 2011	Change
Revenues	\$ 1,510.1	\$ 1,441.1	5%
Operating Income Margin	14.2%	13.9%	0.3

Sales in the Laboratory Products and Services segment increased \$69 million to \$1.51 billion in the third quarter of 2012. Sales increased \$26 million due to acquisitions. The unfavorable effects of currency translation resulted in a decrease in revenues of \$35 million in 2012. In addition to the changes in revenue resulting from acquisitions and currency translation, revenues increased \$78 million (5%) primarily due to increased demand for laboratory consumables and, to a lesser extent, clinical trial logistics services. The increase in demand was offset in part by modestly lower sales of laboratory equipment, particularly to customers in academic and government markets.

Operating income margin was 14.2% in the third quarter of 2012 and 13.9% in the third quarter of 2011. The increase was primarily due to productivity improvements offset in part by inflationary cost increases.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Other Expense, Net

The company reported other expense, net, of \$56 million and \$50 million in the third quarter of 2012 and 2011, respectively (Note 4). Other expense, net includes interest income, interest expense, equity in earnings of unconsolidated subsidiaries and other items, net. The increase was due in part to an increase of \$11 million in interest expense related to the debt issued to fund the Phadia, and One Lambda acquisitions. In 2011, other items, net includes a \$5 million loss on currency exchange contracts associated with the Phadia acquisition.

Provision for Income Taxes

The company recorded a benefit from income taxes in the third quarter of 2012, and a nominal provision in the third quarter of 2011. Both periods included year-to-date adjustments to reflect lower estimated full year taxes based on forecasted profitability in the countries in which the company conducts business. The estimated effective rate is 6% for 2012 and was 11% for 2011 as of the end of the third quarter of 2011. The decrease in the effective tax rate is due to higher profitability in lower tax jurisdictions. The tax provisions in the 2012 and 2011 periods were favorably affected by \$1.5 million, or 0.5 percentage points, and \$3.5 million, or 1.3 percentage points, respectively, as a result of adjustments to deferred tax balances due to changes in tax rates. The tax provision in the 2011 period was also favorably affected by \$7.9 million, or 3.0 percentage points, by the ability to use tax loss carryforwards as a result of the Phadia acquisition.

Discontinued Operations

On June 22, 2012, in an effort to exit a non-core business, the company's senior management made a decision to pursue a sale of its laboratory workstations business, part of the Laboratory Products and Services segment. The company completed the sale in October 2012 for nominal proceeds. The results of the laboratory workstations business have been classified and presented as discontinued operations in the accompanying financial statements. Prior period results have been adjusted to conform to this presentation (Note 14). Revenues of the laboratory workstations business were approximately flat in the third quarter of 2012 at \$45 million. Pre-tax loss of the business was \$7 million in the third quarter of 2012 compared with a pre-tax loss of \$2 million in the third quarter of 2011. Results in 2012 were unfavorably affected by transition costs associated with relocation of the business and higher manufacturing costs.

In the third quarter of 2012, the company revised its expected loss on the divestiture and recorded an additional after tax charge of \$7 million. For all of 2011, the laboratory workstations business had revenues of approximately \$180 million and an operating loss of approximately \$6 million.

In addition, the company recorded an after-tax gain of \$2 million in the third quarter of 2012 for additional proceeds from a prior divestiture.

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business (Athena) for \$740 million in cash and its Lancaster Laboratories business (Lancaster) for \$180 million in cash and escrowed proceeds of \$20 million, substantially all of which was received in October 2012. The sale of these businesses resulted in an after-tax gain of \$304 million or \$0.79 per diluted share. Revenues and operating income of the two businesses aggregated approximately \$225 million and \$60 million, respectively, in 2010. The results of both businesses have been included in the accompanying financial statements as discontinued operations for all periods presented (Note 2).

First Nine Months of 2012 Compared With First Nine Months of 2011

Continuing Operations

Sales in the first nine months of 2012 were \$9.25 billion, an increase of \$781 million from the first nine months of 2011. The increase was due to acquisitions, including Phadia and Dionex, and, to a lesser extent, higher sales at

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

existing businesses, offset in part by the unfavorable effects of currency translation. Had Phadia, Dionex and the company been combined from the beginning of 2011, revenues would have increased \$233 million (3%) over pro forma 2011 revenues, including \$82 million due to other acquisitions, net of divestitures and \$360 million (4%) due to higher revenues at existing businesses, offset in part by \$209 million due to the unfavorable effects of currency translation. The pro forma increase in revenues was primarily due to increased demand. Sales growth was strong in Asia and moderate in North America and Europe. Demand from customers in academic and government markets slowed to nominal growth in the 2012 period.

In the first nine months of 2012, total company operating income and operating income margin were \$1.08 billion and 11.7%, respectively, compared with \$903 million and 10.7%, respectively, in the first nine months of 2011. The increase in operating income was primarily due to productivity improvements and, to a lesser extent, profit on incremental sales from acquisitions and existing businesses and \$68 million of lower acquisition-related charges in 2012. The increase was offset in part by an increase in amortization expense of \$92 million in 2012 primarily related to the acquisitions of Phadia and Dionex.

In the first nine months of 2012, the company recorded restructuring and other costs, net, of \$107 million, including \$43 million of charges to cost of revenues related primarily to the sale of inventories revalued at the date of acquisition and \$13 million of charges to selling, general and administrative expenses consisting of transaction costs related to the acquisition of One Lambda and a \$7 million charge related to product liability litigation. The company incurred \$46 million of cash restructuring costs primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated, such as the consolidation of several facilities in the U.S. and Europe (see Note 13). The company also recorded \$6 million of non-cash expense, net, primarily real estate writedowns related to facility consolidations partially offset by a gain on sale of real estate.

In the first nine months of 2011, the company recorded restructuring and other costs, net, of \$171 million, including \$43 million of charges to cost of revenues primarily related to the sale of inventories revalued at the date of acquisition and \$62 million of charges to selling, general and administrative expenses primarily for transaction costs related to the acquisitions of Dionex and Phadia. The company incurred \$63 million of cash restructuring costs, including \$22 million of cash compensation from monetizing equity awards held by Dionex employees at the date of acquisition. The cash costs also include continuing costs associated with headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated. The company also recorded \$3 million of non-cash expense, net, primarily for a loss on sale of a heating equipment business.

Consolidated Operating Income Margin	11.7%	10.7%	

Income from the company's reportable segments increased 13% to \$1.74 billion in the first nine months of 2012 due primarily to profit on incremental sales from acquisitions and, to a lesser extent, existing businesses and productivity improvements offset in part by inflationary cost increases.

Analytical Technologies

(Dollars in millions)	Nine Months Ended		Change
	September 29, 2012	October 1, 2011	
Revenues	\$ 3,017.9	\$ 2,765.9	9%
Operating Income Margin	18.3%	17.8%	0.5

Sales in the Analytical Technologies segment increased \$252 million to \$3.02 billion in the first nine months of 2012. The increase was due to acquisitions, including Dionex and higher revenue at existing businesses, offset in part by the unfavorable effects of currency translation. Had Dionex and the company been combined from the beginning of 2011, revenues would have increased \$78 million (3%) over pro forma 2011 revenues, including an increase of \$151

THERMO FISHER SCIENTIFIC INC.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Results of Operations (continued)

million (5%) due to higher revenues at existing businesses, offset in part by \$74 million due to the unfavorable effects of currency translation and \$1 million due to a disposition. The pro forma increase in revenue at existing businesses was primarily due to increased demand across the segment's range of analytical instruments and for bioscience products, offset in part by lower sales to customers in academic and government markets.

Operating income margin was 18.3% in the first nine months of 2012 and 17.8% in the first nine months of 2011. The increase resulted from profit on incremental sales at existing businesses and, to a lesser extent, productivity improvements, net of inflationary cost increases. These increases were offset by higher spending on commercial initiatives.

Specialty Diagnostics

(Dollars in millions)	Nine Months Ended		
	September 29, 2012	October 1, 2011	Change
Revenues	<u>\$ 2,170.5</u>	<u>\$ 1,763.7</u>	<u>23%</u>
Operating Income Margin	<u>25.6%</u>	<u>24.3%</u>	<u>1.3</u>

Sales in the Specialty Diagnostics segment increased \$407 million to \$2.17 billion in the first nine months of 2012. The increase was due to acquisitions, including Phadia, and higher revenue at existing businesses, offset in part by the unfavorable effects of currency translation. Had Phadia and the company been combined from the beginning of 2011, revenues would have increased \$32 million (2%) over pro forma 2011 revenues, including increases of \$32 million due to other acquisitions and \$58 million (3%) due to higher revenues at existing businesses, offset in part by \$58 million due to the unfavorable effects of currency translation. The pro forma increase in revenue at existing businesses was primarily due to increased demand for clinical diagnostic products and, to a lesser extent, microbiology products.

Operating income margin was 25.6% in the first nine months of 2012 and 24.3% in the first nine months of 2011. The increase resulted from the accretive Phadia acquisition and, to a lesser extent, productivity improvements and profit on incremental sales at existing businesses.

Laboratory Products and Services

(Dollars in millions)	Nine Months Ended		
	September 29, 2012	October 1, 2011	Change
Revenues	<u>\$ 4,490.2</u>	<u>\$ 4,327.6</u>	<u>4%</u>
Operating Income Margin	<u>14.1%</u>	<u>14.2%</u>	<u>(0.1)</u>

Sales in the Laboratory Products and Services segment increased \$163 million to \$4.49 billion in the first nine months of 2012. Sales increased \$50 million due to acquisitions. The unfavorable effects of currency translation resulted in a decrease in revenues of \$85 million in 2012. In addition to the changes in revenue resulting from acquisitions and currency translation, revenues increased \$198 million (5%) primarily due to increased demand for laboratory consumables and, to a lesser extent, clinical trial logistics services. The increase in demand was offset in part by lower sales of laboratory equipment, particularly to customers in academic and government markets.

THERMO FISHER SCIENTIFIC INC.
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Results of Operations (continued)

Operating income margin decreased to 14.1% in the first nine months of 2012 from 14.2% in the first nine months of 2011, primarily due to inflationary pressures on costs, including oil-based raw materials such as plastic resin, and, to a lesser extent, lower sales of higher margin laboratory equipment. These decreases were offset in part by productivity improvements.

Other Expense, Net

The company reported other expense, net, of \$156 million and \$83 million in the first nine months of 2012 and 2011, respectively (Note 4). The increase was primarily due to an increase of \$59 million in interest expense related to the debt issued to fund the Phadia and Dionex acquisitions. In 2011, other items, net included a \$28 million gain on currency exchange contracts associated with the Phadia acquisition and repayment of its multi-currency debt, offset in part by \$10 million of fees associated with short-term financing commitments to fund the Phadia acquisition.

Provision for Income Taxes

The company's effective tax rates were 5.8% and 10.9% in the first nine months of 2012 and 2011, respectively. The decrease in the effective tax rate was primarily due to increased earnings in lower tax jurisdictions including the effect of the Phadia acquisition. In addition, the tax provision in the first nine months of 2012 was unfavorably affected by \$2.4 million, or 0.3 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates. The tax provision in the first nine months of 2011 was favorably affected by \$7.9 million, or 1.0 percentage points, by the ability to use tax loss carryforwards as a result of the Phadia acquisition, offset in part by \$4.7 million or 0.6 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates.

Discontinued Operations

On June 22, 2012, in an effort to exit a non-core business, the company's senior management made a decision to pursue a sale of its laboratory workstations business, part of the Laboratory Products and Services segment. The company completed the sale in October 2012 for nominal proceeds. The results of the laboratory workstations business have been classified and presented as discontinued operations in the accompanying financial statements. Prior period results have been adjusted to conform to this presentation. Revenues of the laboratory workstations business increased 5% to \$139 million in the first nine months of 2012 over the 2011 period. The business incurred a pre-tax loss of \$25 million in 2012 compared with a pre-tax loss of \$1 million in the 2011 period due to inventory write-offs, higher manufacturing costs and restructuring and other transition costs associated with relocation of the business.

In the first nine months of 2012, the company recorded after tax charges aggregating \$58 million as the expected loss on the divestiture. For all of 2011, the laboratory workstations business had revenues of approximately \$180 million, and an operating loss of approximately \$6 million (Note 14).

In addition, the company recorded an after-tax gain of \$2 million in the third quarter of 2012 for additional proceeds from a prior divestiture.

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business (Athena) for \$740 million in cash and its Lancaster Laboratories business (Lancaster) for \$180 million in cash and escrowed proceeds of \$20 million, substantially all of which was received in October 2012. The sale of these businesses resulted in an after-tax gain of \$304 million or \$0.79 per diluted share. Revenues and operating income of the two businesses aggregated approximately \$225 million and \$60 million, respectively, in 2010. The results of both businesses have been included in the accompanying financial statements as discontinued operations for all periods presented (Note 2).

The company also received additional proceeds from a previously divested business in the second quarter of 2011, resulting in an after-tax gain of \$1 million.

THERMO FISHER SCIENTIFIC INC.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Results of Operations (continued)

Recent Accounting Pronouncements

In July 2012, the FASB modified existing rules to allow entities to use a qualitative approach to test indefinite-lived intangible asset for impairment. The revised standard allows an entity the option to first assess qualitatively whether it is more likely than not (that is, a likelihood of more than 50 percent) that an indefinite-lived intangible asset is impaired. An entity is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the entity determines that it is more likely than not that the asset is impaired. This guidance will be effective for the company in 2013, however, early adoption is permitted. Adoption of this standard will not have an impact on the company's consolidated financial position, results of operations or cash flows.

In December 2011, the FASB issued new guidance which requires enhanced disclosures on offsetting amounts within the balance sheet, including disclosing gross and net information about instruments and transactions eligible for offset or subject to a master netting or similar agreement. The guidance is effective for the company beginning January 1, 2013 and is to be applied retrospectively. The adoption of this guidance, which is related to disclosure only, will not have an impact on the company's consolidated financial position, results of operations or cash flows.

In September 2011, the FASB modified existing rules to allow entities to use a qualitative approach to test goodwill for impairment. The revised guidance permits an entity to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If impairment is deemed more likely than not, management would perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. This guidance was effective for the company on January 1, 2012. Adoption of this standard did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In June 2011, the FASB issued new guidance pertaining to the presentation of comprehensive income. The new rule eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. The standard is intended to provide a more consistent method of presenting non-owner transactions that affect the company's equity. Under the new guidance, an entity can present items of net income and other comprehensive income in one continuous statement or in two separate, but consecutive, statements. The new guidance was effective for the company on January 1, 2012 and did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In May 2011, the FASB amended existing rules covering fair value measurement and disclosure to clarify guidance and minimize differences between U.S. GAAP and International Financial Reporting Standards (IFRS). The new guidance requires entities to provide information about valuation techniques and unobservable inputs used in Level 3 fair value measurements and provide a narrative description of the sensitivity of Level 3 measurements to changes in unobservable inputs. The guidance was effective for the company on January 1, 2012 and did not have an impact on the company's consolidated financial position, results of operations or cash flows.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Contingent Liabilities

The company is contingently liable with respect to certain legal proceedings and related matters. In view of the company's financial condition and the accruals established for these matters, management does not believe that the ultimate liability, if any, related to these matters will have a material adverse effect on the company's financial condition, results of operations or cash flows. However, an outcome that differs materially from current reserve estimates for one or more of the matters described in Note 9 could have a material adverse effect on the company's financial position as well as its results of operations and cash flows.

Liquidity and Capital Resources

Consolidated working capital was \$2.42 billion at September 29, 2012, compared with \$1.71 billion at December 31, 2011. Included in working capital were cash, cash equivalents and short-term investments of \$837 million at September 29, 2012 and \$1.02 billion at December 31, 2011. The increase in working capital is primarily due to higher earnings before amortization and depreciation, offset in part by the repurchase of the company's common stock.

First Nine Months of 2012

Cash provided by operating activities was \$1.38 billion during the first nine months of 2012. Increases in accounts receivable and inventory used cash of \$16 million and \$133 million, respectively, primarily to support growth in sales. An increase in other assets used cash of \$81 million primarily for prepaid expenses and the timing of tax refunds. An increase in accounts payable provided cash of \$71 million, primarily due to higher inventory purchases. Cash payments for income taxes totaled \$241 million during the first nine months of 2012, compared to \$340 million in the prior year period for continuing operations. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$46 million during the first nine months of 2012.

During the first nine months of 2012, the company's primary investing activities included acquisitions and the purchase of property, plant and equipment. The company expended \$1.07 billion for acquisitions and \$211 million for purchases of property, plant and equipment.

The company's financing activities used \$310 million of cash during the first nine months of 2012, principally to reduce commercial paper obligations by \$849 million and for the repurchase of \$800 million of the company's common stock, offset in part by the issuance of \$1.3 billion in senior notes (Note 8). In February 2012, the company initiated a quarterly cash dividend of \$0.13 per outstanding share of common stock. Year-to-date dividend payments totaled \$95 million. The company's financing activities also included \$131 million of proceeds from employee stock option exercises. On November 10, 2011, the Board of Directors authorized the repurchase of up to \$750 million of the company's common stock through November 9, 2012. On July 16, 2012, the company announced that the Board of Directors authorized the repurchase of an additional \$500 million of the company's common stock through December 31, 2012. At September 29, 2012, \$350 million was available for future repurchases of the company's common stock under these authorizations through December 31, 2012.

The company has no material commitments for purchases of property, plant and equipment and expects that for all of 2012, such expenditures will approximate between \$290 to \$300 million. The company's contractual obligations and other commercial commitments did not change materially between December 31, 2011 and September 29, 2012 with the exception of the issuance of \$1.3 billion of senior notes described in Note 8.

As of September 29, 2012, the company's short-term debt totaled \$435 million, including \$50 million of commercial paper obligations and \$351 million of senior notes, due December 2012. On April 11, 2012, the company terminated both of its prior revolving credit agreements and entered into new revolving credit facilities with a bank group that provide up to \$2.0 billion of unsecured multi-currency revolving credit. The new credit facilities include a

THERMO FISHER SCIENTIFIC INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Liquidity and Capital Resources (continued)

\$1 billion 5-year credit agreement, with an optional \$500 million increase, plus a \$500 million 364-day credit agreement. If the company borrows under these facilities, it intends to leave undrawn an amount equivalent to outstanding commercial paper to provide a source of funds in the event that commercial paper markets are not available. As of September 29, 2012, no borrowings were outstanding under either facility, although available capacity was reduced by approximately \$49 million as a result of outstanding letters of credit.

The company believes that its existing cash and short-term investments of \$837 million as of September 29, 2012, and the company's future cash flow from operations together with available borrowing capacity under its revolving credit agreements are sufficient to meet the cash requirements of its existing businesses for the foreseeable future, including at least the next 24 months.

First Nine Months of 2011

Cash provided by operating activities was \$1.05 billion during the first nine months of 2011. Increases in accounts receivable and inventory used cash of \$76 million and \$62 million, respectively, primarily to support growth in sales. An increase in accounts payable provided cash of \$29 million, primarily due to higher inventory purchases. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$50 million during the first nine months of 2011.

During the first nine months of 2011, the company's primary investing activities included acquisitions and the purchase of property, plant and equipment. The company expended \$5.69 billion for acquisitions, including contingent earn-out payments and \$180 million for purchases of property, plant and equipment. The company's continuing operations had cash proceeds from a divestiture of \$14 million and the company's discontinued operations had net cash proceeds of \$798 million, primarily from the sale of Athena and Lancaster.

The company's financing activities provided \$4.00 billion of cash during the first nine months of 2011, principally from the issuance of debt offset in part by the repurchase of \$988 million of the company's common stock. Following issuance of a redemption notice for the remaining \$329 million principal outstanding of the company's 3.25% Senior Subordinated Convertible Notes due 2024, all of the balance was converted or redeemed for a total cash outlay of \$452 million. The company's financing activities in the first nine months of 2011 also included \$154 million of proceeds of employee stock option exercises.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The company's exposure to market risk from changes in interest rates, currency exchange rates and commodity prices has not changed materially from its exposure at year-end 2011.

Item 4. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

The company's management, with the participation of the company's chief executive officer and chief financial officer, evaluated the effectiveness of the company's disclosure controls and procedures as of September 29, 2012. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed

THERMO FISHER SCIENTIFIC INC.

and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of the company's disclosure controls and procedures as of September 29, 2012, the company's chief executive officer and chief financial officer concluded that, as of such date, the company's disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There have been no changes in the company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the fiscal quarter ended September 29, 2012, that have materially affected or are reasonably likely to materially affect the company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1A. Risk Factors

Set forth below are the risks that we believe are material to our investors. This section contains forward-looking statements. You should refer to the explanation of the qualifications and limitations on forward-looking statements beginning on page 30.

We must develop new products, adapt to rapid and significant technological change and respond to introductions of new products by competitors to remain competitive. Our growth strategy includes significant investment in and expenditures for product development. We sell our products in several industries that are characterized by rapid and significant technological changes, frequent new product and service introductions and enhancements and evolving industry standards. Competitive factors include technological innovation, price, service and delivery, breadth of product line, customer support, e-business capabilities and the ability to meet the special requirements of customers. Our competitors may adapt more quickly to new technologies and changes in customers' requirements than we can. Without the timely introduction of new products, services and enhancements, our products and services will likely become technologically obsolete over time, in which case our revenue and operating results would suffer.

Many of our existing products and those under development are technologically innovative and require significant planning, design, development and testing at the technological, product and manufacturing-process levels. Our customers use many of our products to develop, test and manufacture their own products. As a result, we must anticipate industry trends and develop products in advance of the commercialization of our customers' products. If we fail to adequately predict our customers' needs and future activities, we may invest heavily in research and development of products and services that do not lead to significant revenue.

It may be difficult for us to implement our strategies for improving internal growth. Some of the markets in which we compete have been flat or declining over the past several years. To address this issue, we are pursuing a number of strategies to improve our internal growth, including:

- strengthening our presence in selected geographic markets;
- allocating research and development funding to products with higher growth prospects;
- developing new applications for our technologies;
- expanding our service offerings;
- continuing key customer initiatives;
- combining sales and marketing operations in appropriate markets to compete more effectively;
- finding new markets for our products; and
- continuing the development of commercial tools and infrastructure to increase and support cross-selling opportunities of products and services to take advantage of our depth in product offerings.

Risk Factors (continued)

We may not be able to successfully implement these strategies, and these strategies may not result in the expected growth of our business.

Our business is affected by general economic conditions and related uncertainties affecting markets in which we operate. Our business is affected by general economic conditions, both inside and outside the U.S. If the global economy and financial markets, or economic conditions in Europe, the U.S. or other key markets, are unstable, it could adversely affect the business, results of operations and financial condition of the company and its customers, distributors, and suppliers, having the effect of:

- reducing demand for some of our products;
- increasing the rate of order cancellations or delays;
- increasing the risk of excess and obsolete inventories;
- increasing pressure on the prices for our products and services; and
- creating longer sales cycles and greater difficulty in collecting sales proceeds.

For example, recent developments in Europe have created uncertainty with respect to the ability of certain European countries to continue to service their sovereign debt obligations. This debt crisis and related European financial restructuring efforts may cause the value of the euro to deteriorate, reducing the purchasing power of our European customers and reducing our U.S. dollar revenues as translated from the euro. In addition, the European crisis could result in customers in Europe taking longer to pay for products they have purchased from us, or being unable to pay at all. The continued weakness in world economies makes the strength and timing of any economic recovery uncertain, and there can be no assurance that global economic conditions will not deteriorate further.

Demand for some of our products depends on capital spending policies of our customers and on government funding policies. Our customers include pharmaceutical and chemical companies, laboratories, universities, healthcare providers, government agencies and public and private research institutions. Many factors, including public policy spending priorities, available resources and product and economic cycles, have a significant effect on the capital spending policies of these entities.

Spending by some of these customers fluctuates based on budget allocations and the timely passage of the annual federal budget. An impasse in federal government budget decisions could lead to substantial delays or reductions in federal spending. The U.S. Government has been unable to reach agreement on budget reduction measures required by the Budget Control Act of 2011. Unless Congress and the Administration take further action, an enforcement mechanism known as sequestration will trigger a total of \$1.2 trillion in spending reductions over the next decade, divided between domestic and defense spending. As a result, government funding would be reduced for certain of our customers, including those who are dependent on funding from the National Institutes of Health, which would likely have a significant effect on these entities' spending policies. These policies in turn can have a significant effect on the demand for our products.

As a multinational corporation, we are exposed to fluctuations in currency exchange rates, which could adversely affect our cash flows and results of operations. International revenues account for a substantial portion of our revenues, and we intend to continue expanding our presence in international markets. The exposure to fluctuations in currency exchange rates takes on different forms. International revenues are subject to the risk that fluctuations in exchange rates could adversely affect product demand and the profitability in U.S. dollars of products and services provided by us in international markets, where payment for our products and services is made in the local currency. As a multinational corporation, our businesses occasionally invoice third-party customers in currencies other than the one in which they primarily do business (the "functional currency"). Movements in the invoiced currency relative to the functional currency could adversely impact our cash flows and our results of operations. In addition, reported sales made in non-U.S. currencies by our international businesses, when translated into U.S. dollars for financial reporting purposes, fluctuate due to exchange rate movement. Should our international sales grow, exposure to fluctuations in currency exchange rates could have a larger effect on our financial results. In 2011, currency translation had a favorable effect of \$244 million on the revenues of our continuing operations due to the weakening of the U.S. dollar

Risk Factors (continued)

relative to other currencies in which the company sells products and services, and in the first nine months of 2012, currency translation had an unfavorable effect on revenues of our continuing operations of \$209 million.

Healthcare reform legislation could adversely impact us. The recently enacted Patient Protection and Affordable Care Act could have an adverse impact on us. Some of the potential consequences, such as a reduction in governmental support of healthcare services or adverse changes to the delivery or pricing of healthcare services or products or mandated benefits, may cause healthcare-industry participants to purchase fewer of our products and services or to reduce the prices they are willing to pay for our products or services.

Our inability to protect our intellectual property could have a material adverse effect on our business. In addition, third parties may claim that we infringe their intellectual property, and we could suffer significant litigation or licensing expense as a result. We place considerable emphasis on obtaining patent and trade secret protection for significant new technologies, products and processes because of the length of time and expense associated with bringing new products through the development process and into the marketplace. Our success depends in part on our ability to develop patentable products and obtain and enforce patent protection for our products both in the United States and in other countries. We own numerous U.S. and foreign patents, and we intend to file additional applications, as appropriate, for patents covering our products. Patents may not be issued for any pending or future patent applications owned by or licensed to us, and the claims allowed under any issued patents may not be sufficiently broad to protect our technology. Any issued patents owned by or licensed to us may be challenged, invalidated or circumvented, and the rights under these patents may not provide us with competitive advantages. In addition, competitors may design around our technology or develop competing technologies. Intellectual property rights may also be unavailable or limited in some foreign countries, which could make it easier for competitors to capture increased market position. We could incur substantial costs to defend ourselves in suits brought against us or in suits in which we may assert our patent rights against others. An unfavorable outcome of any such litigation could materially adversely affect our business and results of operations.

We also rely on trade secrets and proprietary know-how with which we seek to protect our products, in part, by confidentiality agreements with our collaborators, employees and consultants. These agreements may be breached and we may not have adequate remedies for any breach. In addition, our trade secrets may otherwise become known or be independently developed by our competitors.

Third parties may assert claims against us to the effect that we are infringing on their intellectual property rights. We could incur substantial costs and diversion of management resources in defending these claims, which could have a material adverse effect on our business, financial condition and results of operations. In addition, parties making these claims could secure a judgment awarding substantial damages, as well as injunctive or other equitable relief, which could effectively block our ability to make, use, sell, distribute, or market our products and services in the United States or abroad. In the event that a claim relating to intellectual property is asserted against us, or third parties not affiliated with us hold pending or issued patents that relate to our products or technology, we may seek licenses to such intellectual property or challenge those patents. However, we may be unable to obtain these licenses on commercially reasonable terms, if at all, and our challenge of the patents may be unsuccessful. Our failure to obtain the necessary licenses or other rights could prevent the sale, manufacture, or distribution of our products and, therefore, could have a material adverse effect on our business, financial condition and results of operations.

Changes in governmental regulations may reduce demand for our products or increase our expenses. We compete in many markets in which we and our customers must comply with federal, state, local and international regulations, such as environmental, health and safety and food and drug regulations. We develop, configure and market our products to meet customer needs created by those regulations. Any significant change in regulations could reduce demand for our products or increase our expenses. For example, many of our instruments are marketed to the pharmaceutical industry for use in discovering and developing drugs. Changes in the U.S. Food and Drug Administration's regulation of the drug discovery and development process could have an adverse effect on the demand for these products.

If our security products fail to detect explosives or radiation, we could be exposed to product liability and related claims for which we may not have adequate insurance coverage. Products currently or previously sold by our

Risk Factors (continued)

environmental and process instruments businesses include fixed and portable instruments used for chemical, radiation and trace explosives detection. These products are used in airports, embassies, cargo facilities, border crossings and other high-threat facilities for the detection and prevention of terrorist acts. If any of these products were to malfunction, it is possible that explosive or radioactive material could fail to be detected by our product, which could lead to product liability claims. There are also many other factors beyond our control that could lead to liability claims, such as the reliability and competence of the customers' operators and the training of such operators. Any such product liability claims brought against us could be significant and any adverse determination may result in liabilities in excess of our insurance coverage. Although we carry product liability insurance, we cannot be certain that our current insurance will be sufficient to cover these claims or that it can be maintained on acceptable terms, if at all.

Our inability to complete pending acquisitions or to successfully integrate any new or previous acquisitions could have a material adverse effect on our business. Our business strategy includes the acquisition of technologies and businesses that complement or augment our existing products and services. Certain acquisitions may be difficult to complete for a number of reasons, including the need for antitrust and/or other regulatory approvals. Any acquisition we may complete may be made at a substantial premium over the fair value of the net identifiable assets of the acquired company. Further, we may not be able to integrate acquired businesses successfully into our existing businesses, make such businesses profitable, or realize anticipated cost savings or synergies, if any, from these acquisitions, which could adversely affect our business.

Moreover, we have acquired many companies and businesses. As a result of these acquisitions, we recorded significant goodwill and indefinite-lived intangible assets (tradenames) on our balance sheet, which amount to approximately \$12.43 billion and \$1.35 billion, respectively, as of September 29, 2012. We assess the realizability of goodwill and indefinite-lived intangible assets annually as well as whenever events or changes in circumstances indicate that these assets may be impaired. These events or circumstances would generally include operating losses or a significant decline in earnings associated with the acquired business or asset. Our ability to realize the value of the goodwill and indefinite-lived intangible assets will depend on the future cash flows of these businesses. These cash flows in turn depend in part on how well we have integrated these businesses. If we are not able to realize the value of the goodwill and indefinite-lived intangible assets, we may be required to incur material charges relating to the impairment of those assets.

We are subject to laws and regulations governing government contracts, and failure to address these laws and regulations or comply with government contracts could harm our business by leading to a reduction in revenue associated with these customers. We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws governing government contracts differ from the laws governing private contracts and government contracts may contain pricing terms and conditions that are not applicable to private contracts. We are also subject to investigation for compliance with the regulations governing government contracts. A failure to comply with these regulations could result in suspension of these contracts, criminal, civil and administrative penalties or debarment.

Because we compete directly with certain of our larger customers and product suppliers, our results of operations could be adversely affected in the short term if these customers or suppliers abruptly discontinue or significantly modify their relationship with us. Our largest customer in the laboratory products business and our largest customer in the diagnostics business are also significant competitors. Our business may be harmed in the short term if our competitive relationship in the marketplace with these customers results in a discontinuation of their purchases from us. In addition, we manufacture products that compete directly with products that we source from third-party suppliers. We also source competitive products from multiple suppliers. Our business could be adversely affected in the short term if any of our large third-party suppliers abruptly discontinues selling products to us.

Because we rely heavily on third-party package-delivery services, a significant disruption in these services or significant increases in prices may disrupt our ability to ship products, increase our costs and lower our profitability. We ship a significant portion of our products to our customers through independent package delivery companies, such as Federal Express in the U.S. and DHL in Europe. We also maintain a small fleet of vehicles dedicated to the delivery

Risk Factors (continued)

of our products and ship our products through other carriers, including national and regional trucking firms, overnight carrier services and the U.S. Postal Service. If one of these third-party package-delivery provider experiences a major work stoppage, preventing our products from being delivered in a timely fashion or causing us to incur additional shipping costs we could not pass on to our customers, our costs could increase and our relationships with certain of our customers could be adversely affected. In addition, if one of these third-party package-delivery providers increase prices, and we are not able to find comparable alternatives or make adjustments in our delivery network, our profitability could be adversely affected.

We are required to comply with a wide variety of laws and regulations, and are subject to regulation by various federal, state and foreign agencies. For example, some of our operations are subject to regulation by the U.S. Food and Drug Administration and similar international agencies. These regulations govern a wide variety of product activities, from design and development to labeling, manufacturing, promotion, sales and distribution. If we fail to comply with the U.S. Food and Drug Administration's regulations or those of similar international agencies, we may have to recall products and cease their manufacture and distribution, which would increase our costs and reduce our revenues.

We are also subject to a variety of federal, state, local and international laws and regulations that govern, among other things, the importation and exportation of products, the handling, transportation and manufacture of substances that could be classified as hazardous, and our business practices in the U.S. and abroad such as anti-corruption and anti-competition laws. A failure to comply with these laws and regulations could result in criminal, civil and administrative penalties.

Our business could be adversely affected by disruptions at our sites. We rely upon our manufacturing operations to produce many of the products we sell and our warehouse facilities to store products, pending sale. Any significant disruption of those operations for any reason, such as strikes or other labor unrest, power interruptions, fire, earthquakes, or other events beyond our control could adversely affect our sales and customer relationships and therefore adversely affect our business. Although most of our raw materials are available from a number of potential suppliers, our operations also depend upon our ability to obtain raw materials at reasonable prices. If we are unable to obtain the materials we need at a reasonable price, we may not be able to produce certain of our products or we may not be able to produce certain of these products at a marketable price, which could have an adverse effect on our results of operations.

Fluctuations in our effective tax rate may adversely affect our results of operations and cash flows. As a global company, we are subject to taxation in numerous countries, states and other jurisdictions. In preparing our financial statements, we record the amount of tax that is payable in each of the countries, states and other jurisdictions in which we operate. Our future effective tax rate, however, may be lower or higher than experienced in the past due to numerous factors, including a change in the mix of our profitability from country to country, changes in accounting for income taxes and recently enacted and future changes in tax laws in jurisdictions in which we operate. Any of these factors could cause us to experience an effective tax rate significantly different from previous periods or our current expectations, which could have an adverse effect on our business, results of operations and cash flows.

We may incur unexpected costs from increases in fuel and raw material prices, which could reduce our earnings and cash flow. Our primary commodity exposures are for fuel, petroleum-based resins and steel. While we may seek to minimize the impact of price increases through higher prices to customers and various cost-saving measures, our earnings and cash flows could be adversely affected in the event these measures are insufficient to cover our costs.

Unforeseen problems with the implementation and maintenance of our information systems could have an adverse effect on our operations. As a part of our ongoing effort to upgrade our current information systems, we are implementing new enterprise resource planning software and other software applications to manage certain of our business operations. As we implement and add functionality, problems could arise that we have not foreseen. Such problems could adversely impact our ability to provide quotes, take customer orders and otherwise run our business in a timely manner. In addition, if our new systems fail to provide accurate and increased visibility into pricing and cost structures, it may be difficult to improve or maximize our profit margins. As a result, our results of operations and cash flows could be adversely affected.

Risk Factors (continued)

We also rely on our technology infrastructure, among other functions, to interact with suppliers, sell our products and services, fulfill orders and bill, collect and make payments, ship products, provide services and support to customers, track customers, fulfill contractual obligations and otherwise conduct business. Our systems may be vulnerable to damage or interruption from natural disasters, power loss, telecommunication failures, terrorist attacks, computer viruses, computer denial-of-service attacks, unauthorized access to customer or employee data, and other attempts to harm our systems. When we upgrade or change systems, we may suffer interruptions in service, loss of data or reduced functionality. Certain of our systems are not redundant, and our disaster recovery planning is not sufficient for every eventuality. Despite any precautions we may take, such problems could result in, among other consequences, interruptions in our services, which could harm our reputation and financial results.

Our debt may restrict our investment opportunities or limit our activities. As of September 29, 2012, we had approximately \$7.47 billion in outstanding indebtedness. In addition, on April 11, 2012, we terminated our prior revolving credit agreements and entered into new revolving credit facilities that provide for up to \$2.0 billion of unsecured multi-currency revolving credit. We may also obtain additional long-term debt and lines of credit to meet future financing needs, which would have the effect of increasing our total leverage.

Our leverage could have negative consequences, including increasing our vulnerability to adverse economic and industry conditions, limiting our ability to obtain additional financing and limiting our ability to acquire new products and technologies through strategic acquisitions.

Our ability to make scheduled payments, refinance our obligations or obtain additional financing will depend on our future operating performance and on economic, financial, competitive and other factors beyond our control. Our business may not generate sufficient cash flow to meet our obligations. If we are unable to service our debt, refinance our existing debt or obtain additional financing, we may be forced to delay strategic acquisitions, capital expenditures or research and development expenditures. Recent disruptions in the financial markets, including the bankruptcy or restructuring of a number of financial institutions and reduced lending activity, may adversely affect the availability, terms and cost of credit in the future. We cannot be sure that initiatives in response to the disruptions in the financial markets will continue to stabilize the markets in general or increase liquidity and the availability of credit to us.

Additionally, the agreements governing our debt require that we maintain certain financial ratios, and contain affirmative and negative covenants that restrict our activities by, among other limitations, limiting our ability to incur additional indebtedness, make investments, create liens, sell assets and enter into transactions with affiliates. The covenants in our revolving credit facilities include a total debt-to-EBITDA ratio. Specifically, the company has agreed that, so long as any lender has any commitment under either facility, or any loan or other obligation is outstanding under either facility, or any letter of credit is outstanding under the facility that supports letters of credit, it will not permit (as the following terms are defined in the facility) the Consolidated Leverage Ratio (the ratio of consolidated Indebtedness to Consolidated EBITDA) as at the last day of any fiscal quarter to be greater than 3.5 to 1.0.

Our ability to comply with these financial restrictions and covenants is dependent on our future performance, which is subject to prevailing economic conditions and other factors, including factors that are beyond our control such as foreign exchange rates and interest rates. Our failure to comply with any of these restrictions or covenants may result in an event of default under the applicable debt instrument, which could permit acceleration of the debt under that instrument and require us to prepay that debt before its scheduled due date. Also, an acceleration of the debt under certain of our debt instruments would trigger an event of default under other of our debt instruments.

THERMO FISHER SCIENTIFIC INC.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

A summary of the share repurchase activity for the company's third quarter of 2012 follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Dollar Amount of Shares That May Yet Be Purchased Under the Plans or Programs (1) (in millions)
Fiscal July (Jul. 1 – Aug. 4)	2,754,326	\$ 52.98	2,754,326	\$ 604.1
Fiscal August (Aug. 5 – Sep. 1)	2,500,000	56.80	2,500,000	462.1
Fiscal September (Sep. 2 – Sep. 29)	<u>1,894,229</u>	59.16	<u>1,894,229</u>	350.0
Total Third Quarter	<u><u>7,148,555</u></u>	\$ 55.96	<u><u>7,148,555</u></u>	\$ 350.0

- (1) On November 11, 2011, the company announced a repurchase program authorizing the purchase of up to \$750 million of the company's common stock through November 9, 2012. On July 16, 2012, the company announced a repurchase program authorizing the purchase of an additional \$500 million of the company's common stock through December 31, 2012. All of the shares of common stock repurchased by the company during the third quarter of 2012 were purchased under these programs.

Item 6. Exhibits

See Exhibit Index on page 52.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized as of the 2nd day of November 2012.
