*Triant Technologies Inc. develops, markets, and supports equipment health monitoring, advanced fault detection and sophisticated data analysis technology. Triant provides innovative software solutions that help its customers improve the productivity of their manufacturing equipment and is focused on the application of its technology primarily to the semiconductor industry and secondarily to other industries. Triant's core technology is UPM (Universal Process Modeling), a proprietary advanced mathematical algorithm that can be used to model the behavior of any correlated system or process. To address the emerging market opportunity in the semiconductor industry, Triant has developed ModelWare<sup>®</sup>, an equipment health monitoring and advanced fault detection software solution, based on its core UPM technology. More information about Triant is available via the Internet at [www.triant.com](http://www.triant.com).*
