Eastmain Resources Inc. (TSX-ER)
SECOND QUARTERLY REPORT
FOR THE PERIOD ENDING January 31, 2002

Clearwater Project (Eau Claire Gold Deposit), Quebec

An updated resource estimate for the Eau Claire gold deposit, conforming to National Instrument 43-101, will be released during the current quarter. The 2002 drill campaign was successful in expanding the dimensions of the gold deposit 200 metres vertically and 300 metres laterally to the east. The deposit is open laterally east and west and at depth below 500 metres. 107 gold-bearing veins were intersected in 15 of 18 drill holes completed in 2002. Approximately 25% of the vein intersections contain >5 to 22.8 grams gold per tonne across a width of 1.5 to 9.0 metres. The 2002 drill program tested the gold deposit along a 900-metre length targeting a vertical depth between 300 and 500 metres.

A second 10,000-metre drill program with the objective of expanding the contained resource towards one million ounces of gold is scheduled to begin June 2003. The program will focus on the east and western extensions of the Eau Claire deposit between 100 to 400 m vertical depth.

Eastmain is exercising its option to earn 75% interest in the Clearwater Project by spending \$2.5 million in exploration over a four-year period. Through financial rebates currently offered by the Government of Québec the net earn-in requirement to the Corporation will be reduced to approximately \$1.0 million. The Company anticipates completing its earn-in by the end of the calendar year.

The project infrastructure is rapidly improving from a prospect in an isolated frontier setting to a significant gold deposit with road and power access. Hydro Québec is constructing the Eastmain-1 power project which includes a 2,500-person camp, a 70-km-long 315 kV transmission line and an all-weather road extending from Nemiscau to the Eastmain River. The Eau Claire deposit is five kilometres north of the proposed reservoir. The principal dam will be situated at kilometre 217 on the Eastmain River with three 160 MW turbines installed. Production from Eastmain-1 is estimated at 2.7 TWh/annum.

Financial

As at January 31, 2003 the working capital of the Corporation was \$1,257,458. Eastmain contributed \$1,229,551 in deferred exploration expenditures for the six month period. Revenue for the three-month period was \$72,022 while operating expenses totaled \$116,044. The net loss for the three month period was \$44,022. Subsequent to the reporting period the Corporation received \$146,325 refund from the Province of Québec for 2001 exploration expenditures at Clearwater. During the period management subscribed for 100,000 common shares of the Corporation for net proceeds of \$30,000.

1. ACCOUNTING POLICIES

The management of Eastmain Resources Inc. (the "Company") have prepared these financial statements in accordance with Canadian generally accepted accounting principles. These statements should be read in conjunction with the audited financial statements for the year ended July 31, 2002.

The disclosures in these interim financial statements do not conform in all respects to generally accepted accounting principles in Canada for annual financial reporting.

In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. Operating results for the six months ended January 31, 2003 are not indicative of the results that may be expected for the full year ending July 31, 2003.

Stock Option Compensation

Effective August 1, 2002, the Company adopted the new recommendations of the CICA Handbook Section, Stock-based Compensation and Other Stock-based Payments. This section established standards for the recognition, measurement and disclosure of stock-based compensation and other stock-based payments made in exchange for goods and services. These new recommendations require that compensation for all awards made to non-employees and certain awards made to employees be measured and recorded in the financial statements at fair value. This section also sets out a fair value based method of accounting for stock options issued to employees and applies to awards granted on or after fiscal years ending January 1, 2002.

The Company, as permitted by Section 3870, has chosen not to use the fair value method to account for stock-based employee compensation plans, but to disclose pro-forma information for options granted after August 1, 2002. The Company records no compensation expense when options are issued to employees. Any consideration paid by employees on the exercise of the options is credited to capital stock.
