THOMSON FINANCIAL

We are a diversified energy company engaged, through our subsidiaries, in

- the contract drilling of onshore oil and natural gas wells.
- · the exploration and production of oil and natural gas,
- and the acquisition of producing oil and natural gas properties.

Our operations are mainly located in the Mid-Continent, Rocky Mountain and Gulf Coast Basins. Our corporate offices are located in Tulsa, Oklahoma, with regional offices in Oklahoma City, Oklahoma; Woodward, Oklahoma; Booker, Texas; Houston, Texas and Casper, Wyoming. Our common stock trades on the New York Stock Exchange under the symbol "UNT".

<sup>(1)</sup> Future net revenues on proved reserves at 12/31/2000 were higher than other years due to high year-end spot prices used to compute the value of the reserves.

### LETTER TO THE SHAREHOLDERS

Coal, oil and natural gas provide, either directly or indirectly after being converted to electricity, 80 percent of the energy used to heat homes, provide transportation and drive industry in the United States. We are pleased to be in our 40th year of providing energy for our country and drilling services to our customers. By maintaining a conservative balance sheet, keeping our debt levels low and adding drilling rigs and oil and natural gas reserves at economic rates, we have been able to grow during depressed times as well as during peak periods of our cyclical industry.

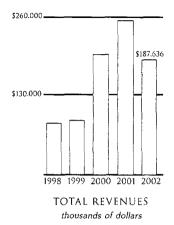

Our contract drilling subsidiary, Unit Drilling Company, achieved a new milestone in 2002 by increasing its drilling rig fleet from 55 rigs to 75 rigs, the largest fleet in its history. Our fleet is primarily medium-to-deep drilling rigs with an average depth capacity of 17,500 feet, although we are capable of drilling to 40,000 feet. All 75 of our rigs are operational, and virtually 100 percent of our drilling activity targets natural gas produciton in the United States. Unit is known in the industry for providing high quality equipment and experienced drilling personnel.

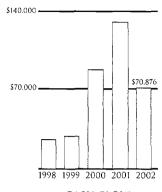

Our exploration and production subsidiary, Unit Petroleum Company, reached record reserves of 269.4 Bcf of equivalent natural gas, which includes 4.1 million barrels of oil and 244.8 Bcf of natural gas. This is a 6 percent increase over proved reserves at the end of 2001. For the nineteenth consecutive year, we replaced

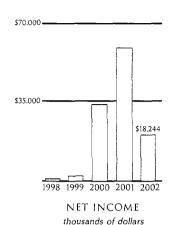

more than 150 percent of our production with new reserves, a record of which we are very proud.

Our 2002 financial results were negatively impacted by lower commodity prices. During 2002, our average natural gas price was \$2.87 compared to \$4.00 for 2001. As a consequence, drilling activity slowed and we received less for our oil and natural gas production. Year-over-year revenue decreased 28 percent to \$187.6 million, while year-over-year earnings per share decreased 73 percent to 47 cents per diluted share. Cash flow from operations, before changes in working capital, decreased 46 percent compared to the prior year. Even so, 2002 was the third best year in our history. We maintain a strong balance sheet. Our long-term debt at December 31, 2002 stands at \$30.5 million. Our debtto-capitalization ratio is 7 percent. With this conservative structure, we are in a position to grow both of our business segments.

Industry analysts believe the United States natural gas market is on an upswing. Natural gas prices have surged during the past two months. Analysts believe the upswing in prices is the market's recognition of a supply deficit in the U.S. We should benefit from this upswing because natural gas comprises over 90 percent of our reserves and virtually 100 percent of our contract drilling activity. Anticipating higher natural gas prices, we will maintain an aggressive development drilling program during the year. We plan to drill 140 to 150 wells, a 46 percent increase over last year.

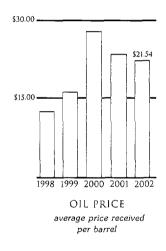

CASH FLOW from operations before changes in working capital thousands of dollars

For 2003, we plan to continue to do our part in providing the energy needs of this great country. We are proud of the contribution we have made to our industry and our nation. Our goal is to grow our oil and natural gas operations and expand our rig fleet, as appropriate, while maintaining and improving our balance sheet. Our experience over the years has given us the ability to thrive even in times of decline. We believe 2003 will be a positive year for us as well as for our industry, and we look forward to its many challenges, opportunities and rewards.

### UNIT DRILLING COMPANY

Unit Drilling
Company has a history
of providing outstanding
service to its customers
with experienced personnel and quality
equipment, allowing us
to meet a wide range of
drilling needs.

Since its inception in 1963, Unit Drilling Company has provided contract drilling services in the Anadarko Basin and shortly thereafter began drilling in the Arkoma Basin. We entered the East Texas and Gulf Coast regions in 1994 and the Rocky Mountain region in 1999. During our history, we have drilled in ten different states. Currently, our operations spread over seven different states. We enjoy a strong reputation for providing outstanding service to our customers as well as meeting a wide range of their drilling needs.

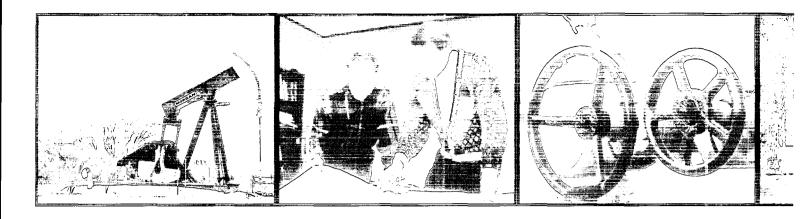

At year-end our fleet had grown to 75 onshore drilling rigs, an increase of 20 rigs or 36 percent. We currently have 41 rigs located in the Anadarko Basin, 7 rigs in the Arkoma Basin, 17 rigs located within our Gulf Coast operations, 8 rigs are in the Rocky Mountain region and 2 rigs are in West Texas. Our drilling field offices include Oklahoma City and Woodward, Oklahoma, Houston, Texas, and Casper, Wyoming.

Our rig fleet ranges in depth capacities from 9,500 to 40,000 feet, averaging 17,500 feet, and can provide vertical and horizontal services using both air and mud as a drilling medium.

2002 industry conditions scaled down considerably compared to 2001 when natural gas prices were higher. Our average number of rigs operating in 2002 was 39.1 compared to 46.3 in 2001. Drilling revenues for the year also decreased 29 percent to \$118.2 million. Average dayrates for the year on our daywork contracts declined 23 percent to an average of \$7,716. Contract drilling operating margins decreased to 23 percent, compared to 46 percent during 2001.

During August, we acquired 20 drilling rigs, increasing our total fleet to 75 rigs. These rigs range in horsepower from 650 to 2,000 with 15 having a horsepower rating of 1,000 or more. Twelve of the rigs are SCR electric. Depth capacities range from 12,000 to 25,000 feet. Twelve of these rigs are currently located in the Anadarko Basin, five are in the Gulf Coast Basin, one is in the Arkoma Basin and two are in West Texas.

We exited the year with 52 rigs operating. On February 19, 2003, 50 of our rigs are operating. We anticipate that 2003 will be another strong year for the drilling industry, and we stand ready to meet the challenge.

Unit Petroleum Company continues to be a growing force in the oil and natural gas industry. We have consistently demonstrated our ability to grow our asset base within a volatile pricing environment. Most of our prospects are generated by our experienced geological and engineering staff and focus on low risk field extension or development wells that meet our risk-weighted economic objectives. Our growth also results from an acquisition program tailored to our economic criteria. With this strategy, we have increased our total reserve base by an average annual growth rate of 19 percent over the past 19 years.

At year end, our total reserves were 269.4 Bcfe, consisting of 4.1 million barrels of oil and 244.8 Bcf of natural gas, a 6 percent equivalent Bcf increase. During 2002, we added 36.9 Bcfe of reserves, or 169 percent of our 2002 production, which marks the nineteenth consecutive year that we have met our goal of replacing at least 150 percent of each year's production with new reserves. Our three-year average finding cost was \$1.15 per Mcfe. We are proud of our ability to consistently grow our reserves at economic levels.

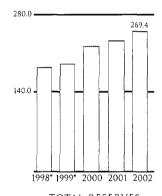

Our oil and natural gas revenues decreased 25 percent to \$68.0 million because of lower commodity prices. The natural gas prices we received averaged \$2.87 per Mcf, a 28 percent decrease from 2001, while our average oil price was \$21.54 per barrel, a 9 percent decrease from the previous year.

Total production remained relatively flat compared to 2001. We produced 18,968,000 Mcf of natural gas, a .6 percent increase. Oil production declined 4 percent to 473,000 barrels.

During 2002, we drilled 96 wells, representing a 23 percent decrease from 2001. Seventy-seven percent of the 96 wells were completed as producing wells. We plan to step up our drilling program during 2003 and drill approximately 140 to 150 wells.

We have identified 389 drillable wells in our inventory with potential reserves to us of some 200 Bcfe. These prospective wells have been identified from our growing acreage inventory of 773,000 acres, the bulk of which is held by production. At year-end, we owned an interest in 3,304 wells.

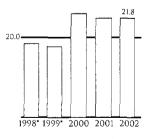

For 2003, we have budgeted \$65 million for capital expenditures, of which \$55 million is planned for exploration and development drilling, a 48 percent increase over 2002. With this aggressive approach, we anticipate 2003 will be a positive year for Unit.

<sup>(1)</sup> Restated for the merger with Questa Oil and Gas Co.

<sup>(2)</sup> Through our acquisition of the thirteen Parker rigs, Unit had non-cash capital additions of \$8,138,000 for the 1,000,000 shares given as a portion of the consideration for the rigs.

<sup>(3)</sup> Through the acquisition of CREC Rig Equipment Company and CDC Drilling Company, Unit had non-cash capital additions of \$122,491,000 for the 7,220,000 shares given as a portion of the consideration for the Company's.

<sup>(4)</sup> Future net revenues on proved reserves at 12/31/2000 were higher than other years due to high year-end spot prices used to compute the value of the reserves.

### MARKET FOR UNIT CORPORATION'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common stock trades on the New York Stock Exchange under the symbol "UNT." The following table identifies the high and low sales prices per share of our common stock for the periods indicated:

		01	2002				
QUARTER	HIGH	LOW	HIGH	FOA			
First	\$ 21.3750	\$ 16.3000	\$ 18.6000	\$ 10.2400			
Second	\$ 23.0000	\$ 14.5000	\$ 20.2500	\$ 16.0100			
Third	\$ 15.8000	\$ 7.4100	\$ 19.2500	\$ 13.6500			
Fourth	\$ 14.2400	\$ 8.2900	\$ 20.4400	\$ 16.7100			

On March 7, 2003 there were 1,857 record holders of our common stock.

We have never paid cash dividends on our common stock and currently intend to continue our policy of retaining earnings from our operations. Our loan agreement prohibits us from declaring and paying dividends (other than stock dividends) in any fiscal year in an amount greater than 25 percent of our preceding year's consolidated net income and then only if our working capital provided from operations for the previous year was equal to or greater than 175 percent of the current maturities of our long-term debt at the end of the previous year.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

With the exception of historical information, the matters discussed below may include forward-looking statements regarding our operations, financial and otherwise. We caution you that a number of important factors could cause the actual results of our future operations to differ materially from those in any forward-looking statements. Further information regarding these factors are discussed at the Forward Looking "Safe Harbor" Statements section on page 48.

#### FINANCIAL CONDITION AND LIQUIDITY

Summary. Our financial condition and liquidity depends on the cash flow from our two principal subsidiaries and borrowings under our bank loan agreement. Our cash flow is influenced mainly by the prices we receive for our natural gas production, the demand for and the dayrates we receive for our drilling rigs and, to a lesser extent, the prices we receive for our oil production. At December 31, 2002, we had cash totaling \$497,000 and we had borrowed \$30.5 million of the \$40.0 million we have elected to have available under our loan agreement.

The following is a summary of certain financial information on December 31, 2002 and for the year ended December 31, 2002:

Working Capital	\$ 16,867,000
Net Income	\$ 18,244,000
Net Cash Provided by Operating Activities	\$ 70,547,000
Long-Term Debt	\$ 30,500,000
Shareholders' Equity	\$ 421,372,000
Ratio of Long-Term Debt to Total Capitalization	7%

The following table summarizes certain operating information for the years ended December 31, 2001 and 2002:

		2001		2002	Percent Change	
Oil Production (Bbls)	492,000		473,000		(4%)	
Natural Gas Production (Mcf)	18,864,000		18	,968,000	1%	
Average Oil Price Received	\$	23.62	\$	21.54	(9%)	
Average Natural Gas Price Received	\$	4.00	\$	2.87	(28%)	
Average Number of Our Drilling Rigs						
in Use During the Period		46.3		39.1	(16%)	

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Our Bank Loan Agreement. On July 24, 2001, we signed a \$100 million bank loan agreement. At our election, the amount currently available for us to borrow is \$40 million. Although the current value of our assets would have allowed us to have access to the full \$100 million, we elected to set the loan commitment at \$40 million to reduce our financing costs since we are charged a facility fee of .375 of 1 percent on the amount available but not borrowed. At December 31, 2002, we had borrowed \$30.5 million through the bank loan.

Each year, on April 1 and October 1, our banks re-determine the loan value of our assets. This value is mainly based on an amount equal to a percentage of the discounted future value of our oil and natural gas reserves, as determined by the banks. In addition, an amount representing a part of the value of our drilling rig fleet, limited to \$20 million, is added to the loan value. Our loan agreement provides for a revolving credit facility which ends on May 1, 2005 followed by a three-year term loan. Borrowing under our loan agreement totaled \$32.4 million on February 19, 2003.

Borrowings under the revolving credit facility bear interest at the Chase Manhattan Bank, N.A. prime rate ("Prime Rate") or the London Interbank Offered Rates ("Libor Rate") plus 1.00 to 1.50 percent depending on the level of debt as a percentage of the total loan value. After May 1, 2005, borrowings under the loan agreement bear interest at the Prime Rate or the Libor Rate plus 1.25 to 1.75 percent depending on the level of debt as a percentage of the total loan value. In addition, the loan agreement allows us to select between the date of the agreement and 3 days before the start of the term loan, a fixed rate for the amount outstanding under the credit facility. Our ability to select the fixed rate option is subject to several conditions, all of which are set out in the loan agreement.

The interest rate on our bank debt was 2.47 percent at December 31, 2002 and February 19, 2003. At our election, any portion of our outstanding bank debt may be fixed at the Libor Rate, as adjusted depending on the level of our debt as a percentage of the amount available for us to borrow. The Libor Rate may be fixed for periods of up to 30, 60, 90 or 180 days with the balance of our bank debt being subject to the Prime Rate. During any Libor Rate funding period, we may not pay any part of the outstanding principal balance which is subject to the Libor Rate. Borrowings subject to the Libor Rate were \$30.5 million at December 31, 2002 and \$31.0 million at February 19, 2003.

The loan agreement also requires us to maintain:

- · consolidated net worth of at least \$125 million;
- · a current ratio of not less than 1 to 1;
- · a ratio of long-term debt, as defined in the loan agreement, to consolidated tangible net worth not greater than 1.2 to 1;
- a ratio of total liabilities, as defined in the loan agreement, to consolidated tangible net worth not greater than 1.65 to 1; and
- working capital provided by operations, as defined in the loan agreement, cannot be less than \$40 million in any year.

We are restricted from paying dividends (other than stock dividends) during any fiscal year in excess of 25 percent of our consolidated net income from the preceding fiscal year. Additionally, we can pay dividends if our working capital provided from our operations during the preceding year is equal to or greater than 175 percent of current maturities of long-term debt at the end of the preceding year. We also cannot incur additional debt except in certain limited exceptions. The creation or existence of mortgages or liens, other than those in the ordinary course of business, on any of our property is prohibited unless it is in favor of our banks.

Hedging. Periodically we hedge the prices we will receive for a portion of our future natural gas and oil production. We do so in an attempt to reduce the impact and uncertainty that price variations have on our cash flow. We entered into a collar contract covering approximately 25 percent of our daily oil production from November 1, 2000 through February 28, 2001. The collar had a floor of \$26.00 per barrel and a ceiling of \$33.00 per barrel and we received \$0.86 per barrel for entering into the transaction. During the first quarter of 2001, our oil hedging transaction yielded an increase in our oil revenues of \$17,200.

During the second quarter of 2001, we entered into a natural gas collar contract for approximately 36 percent of our June and July 2001 production, at a floor price of \$4.50 and a ceiling price of \$5.95. During the third quarter of 2001, we entered into two natural gas collar contracts for approximately 38 percent of our September thru November 2001 natural gas production. Both contracts had a floor price of \$2.50. One contract had a ceiling of \$3.68 and the other contract had a ceiling of \$4.25. During the year of 2001, the collar contracts increased natural gas revenues by \$2,030,000.

On April 30, 2002, we entered into a collar contract covering approximately 19 percent of our natural gas production for the periods of April 1, 2002 thru October 31, 2002. The collar had a floor of \$3.00 and a ceiling of \$3.98. During the year of 2002, our natural gas hedging transactions increased natural gas revenues by \$40,300. We did not have any hedging transactions outstanding at December 31, 2002.

During the first quarter of 2003, we entered into two collar contracts covering approximately 40 percent of our natural gas production for the periods of April 1, 2003 thru September 30, 2003. One collar has a floor of \$4.00 and a ceiling of \$5.75 and the other collar has a floor of \$4.50 and a ceiling of \$6.02. We also entered into two collar contracts covering approximately 25 percent of our oil production for the periods of May 1, 2003 thru December 31, 2003. One collar has a floor of \$25.00 and a ceiling of \$32.20 and the other collar has a floor of \$26.00 and a ceiling of \$31.40.

Self-Insurance. We are self-insured for certain losses relating to workers' compensation, general liability, property damage and employee medical benefits. With the recent tightening in the insurance markets our self-insurance levels have significantly increased. During the August 1, 2002 renewal of most of our insurance policies, our exposure (i.e. our deductible or retention) per occurrence we elected to incur ranged from \$200,000 for general liability to \$1 million for rig physical damage. We have purchased stop-loss coverage in order to limit, to the extent feasible, our per occurrence and aggregate exposure to certain claims. There is no assurance that such coverage will adequately protect us against liability from all potential consequences.

Impact of Prices for Oil and Natural Gas. Natural gas comprises 91 percent of our total oil and natural gas reserves. Any significant change in natural gas prices has a material affect on our revenues, cash flow and the value of our oil and natural gas reserves. Generally, prices and demand for domestic natural gas are influenced by weather conditions, supply imbalances and by world wide oil price levels. Domestic oil prices are primarily influenced by world oil market developments. All of these factors are beyond our control and we cannot predict nor measure their future influence on the prices we will receive.

Based on our production in 2002, a \$.10 per Mcf change in what we are paid for our natural gas production would result in a corresponding \$147,100 per month (\$1,765,000 annualized) change in our pre-tax operating cash flow. Our 2002 average natural gas price was \$2.87 compared to an average natural gas price of \$4.00 received in 2001. A \$1.00 per barrel change in our oil price would have a \$36,700 per month (\$440,000 annualized) change in our pre-tax operating cash flow. Our 2002 average oil price was \$21.54 compared with an average oil price of \$23.62 received in 2001.

Because natural gas prices have such a significant affect on the value of our oil and natural gas reserves, declines in these prices can result in a decline in the carrying value of our oil and natural gas properties. Price declines can also adversely affect the semi-annual determination of the amount available for us to borrow under our bank loan agreement since that determination is based mainly on the value of our oil and natural gas reserves. Such a reduction could limit our ability to carry out our planned capital projects.

We sell most of our natural gas production to third parties under month-to-month contracts. Several of these buyers have experienced financial complications resulting from the recent investigations into the energy trading industry. The long-term implications to the energy trading business, as well as to oil and natural gas producers, because of these investigations, remains to be determined. Presently we believe that our buyers will be able to perform their commitments to us. However, we continue to evaluate the information available to us about these buyers in an effort to reduce any possible future adverse impact to us.

Oil and Natural Gas Acquisitions and Capital Expenditures. Most of our capital expenditures are discretionary and directed toward future growth. Our decision to increase our oil and natural gas reserves through acquisitions or through drilling depends on the prevailing or expected market conditions, potential return on investment, future drilling potential and opportunities to obtain financing under the circumstances involved, all of which provide us with a large degree of flexibility in deciding when to incur such costs. We drilled 96 wells (51.87 net wells) in 2002 compared to 125 wells (53.44 net wells) in 2001. In December 2002, we acquired 73 producing oil and natural gas wells for \$12.5 million. Our total capital expenditures for oil and natural gas exploration and acquisitions in 2002 totaled \$58.8 million. Based on current prices, we plan to drill an estimated 140 to 150 wells in 2002 and total capital expenditures for oil and natural gas exploration and acquisitions is planned to be around \$65 million.

Contract Drilling. Our drilling work is subject to many factors that influence the number of rigs we have working as well as the costs and revenues associated with such work. These factors include competition from other drilling contractors, the prevailing prices for natural gas and oil, availability and cost of labor to run our rigs and our ability to supply the equipment needed. We have not encountered major difficulty in hiring and keeping rig crews, but such shortages have occurred periodically in the past. If demand for drilling rigs increases rapidly in the future, shortages of experienced personnel may limit our ability to increase the number of rigs we could operate.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Most of our contract drilling fleet is targeted to the drilling of natural gas wells, so changes in natural gas prices influence the demand for our drilling rigs and the prices we can charge for our contract drilling services. Low oil and natural gas prices, during most of the 1980's and 1990's, reduced demand for domestic land contract drilling rigs. In the last half of 1999 and throughout 2000, as oil and natural gas prices increased, we experienced a big increase in demand for our rigs. Demand continued to increase until the end of the third quarter of 2001 and reached a high when 52 of our rigs were working in July 2001. Because of declining natural gas prices throughout 2001, demand for our rigs dropped significantly in the fourth quarter of 2001 and stabilized with between 30 and 35 rigs operating in the first half of 2002. Natural gas and oil prices once again began to rise during the last half of 2002. With the August acquisition of 20 rigs described below, the average use of our rigs in 2002 was 39.1 rigs (63 percent) compared with 46.3 rigs (90 percent) for 2001.

As demand for our rigs increased during 2001 so did the dayrates we received. Our average dayrate reached \$11,142 by September of 2001. However, as demand began to decrease, so did our rates. Our average dayrate in 2002 was \$7,716 compared to \$10,044 for 2001. Based on the average utilization of our rigs in 2002, a \$100 per day change in dayrates has a \$3,900 per day (\$1,424,000 annualized) change in our pre-tax operating cash flow. Utilization and dayrates for our drilling rigs will depend mainly on the price of natural gas.

Our contract drilling subsidiary provides drilling services for our exploration and production subsidiary. The contracts for these services are issued under the same conditions and rates as the contracts we have entered into with unrelated third parties. Per regulations provided by the Securities and Exchange Commission, the profit received by our contract drilling segment of \$2,259,000 and \$841,000 during 2001 and 2002, respectively, was used to reduce the carrying value of our oil and natural gas properties rather than being included in our profits in current operations.

Drilling Acquisitions and Capital Expenditures. On August 15, 2002, we completed the acquisition of CREC Rig Equipment Company and CDC Drilling Company, which included twenty drilling rigs, spare drilling equipment and vehicles, for 7.22 million shares of our common stock and \$4.5 million in cash. Total consideration for the acquisition was valued at \$127 million of which \$7.7 million went to goodwill and \$2.2 million went to deferred tax assets. All of the rigs are operational and range in horsepower from 650 to 2,000 with 15 having a horsepower rating of 1,000 or more. Depth capacities range from 12,000 to 25,000 feet and twelve of the rigs are SCR electric. These agreements also give us the exclusive first option to purchase any additional rigs constructed by one of the sellers within the next three years. The addition of these twenty rigs brought our fleet to 75. For our contract drilling operations during 2002, we incurred \$139.3 million in capital expenditures, which included \$7.7 million for goodwill and \$2.2 million for deferred tax assets. For the year 2003, we anticipate capital expenditures of approximately \$25 million for our contract drilling operations.

Oil and Natural Gas Limited Partnerships and Other Entity Relationships. As of December 31, 2002, we rolled up nine of our employee partnerships into a consolidated partnership. After the rollup, we are the general partner for ten oil and natural gas partnerships which were formed privately and publicly. The partnership's revenues and costs are shared under formulas prescribed in each limited partnership agreement. The partnerships repay us for contract drilling, well supervision and general and administrative expense. Related party transactions for contract drilling and well supervision fees are the related party's share of such costs. These costs are billed on the same basis as billings to unrelated third parties for similar services. General and administrative reimbursements consist of direct general and administrative expense incurred on the related party's behalf as well as indirect expenses assigned to the related parties. Allocations are based on the related party's level of activity and are considered by management to be reasonable. During 2000, 2001 and 2002, the total paid to us for all of these fees was \$966,000, \$1,107,000 and \$929,000, respectively. We expect the fees to be about the same in 2003. Our proportionate share of assets, liabilities and net income relating to the oil and natural gas partnerships is included in our consolidated financial statements.

We own a 40 percent equity interest in a natural gas gathering and processing company. Our investment, including our share of the equity in the earnings of this company, totaled \$1.8 million at December 31, 2002 and is reported in other assets in the accompanying balance sheet. From time to time we may guarantee the debt of this company. However, as of December 31, 2002 and February 19, 2003, we were not guaranteeing any of the debt of this company.

Outlook. Both of our operating segments are extremely dependent on natural gas prices. These prices affect not only our production revenues, but also the future demand and rates for our contract drilling services. On February 19, 2003, the Nymex Henry Hub average contract settle price for the next twelve months was \$5.59. We will anticipate that if natural gas prices continue at that level, there would be an increase

in demand for our rigs and an upward movement in the rates we receive for our contract drilling services. There is a certain degree of uncertainty as to whether these prices can be sustained. This uncertainty has, in turn, made it difficult to measure the future use of our drilling rigs. We would anticipate that if current natural gas prices are, in fact, maintained we will experience an upward movement in demand for our rigs.

Contractual Commitments. We have the following contractual obligations at December 31, 2002:

Contractual Obligations	Payments Due by Period								
	Total	Less Than 1 Year		1	2 - 3 Years	4 - 5 Years		After 5 Years	
(In thousands)									
Bank Debt (1)	\$ 30,500	\$	_	\$	5,931	\$ 20,333	\$	4,236	
Hickman Note (2)	1,000		1,000					_	
Retirement Agreement (3)	1,412		170		600	600		42	
Operating Leases (4)	1,666		663		839	164			
Total Contractual Obligations	\$ 34,578	\$	1,833	\$	7,370	\$ 21,097	\$	4,278	

- (1) See Previous Discussion in Management Discussion and Analysis regarding bank debt.
- (2) On November 20, 1997, we acquired Hickman Drilling Company pursuant to an agreement and plan of merger entered into by and between us, Hickman Drilling Company and all of the holders of the outstanding capital stock of Hickman Drilling Company. As part of this acquisition, the former shareholders of Hickman held, as of December 31, 2002, promissory notes in the aggregate outstanding principal amount of \$1.0 million (See Note 4 of our Consolidated Financial Statements). These notes were paid in full in January 2003. The notes bore interest at the Chase Prime Rate, which at December 31, 2002 was 4.25 percent.
- (3) In the second quarter of 2001, we recorded \$1.3 million in additional employee benefit expenses for the present value of a separation agreement made in connection with the retirement of King Kirchner from his position as Chief Executive Officer. The liability associated with this expense, including accrued interest, will be paid in monthly payments of \$25,000 starting in July 2003 and continuing through June 2009 (See Note 4 of our Consolidated Financial Statements).
- (4) We lease office space in Tulsa, Houston and Woodward under the terms of operating leases expiring through January 31, 2007 (See Note 9 of our Consolidated Financial Statements).

At December 31, 2002, we also have the following commitments and contingencies that could create, increase or accelerate our liabilities:

	Amount of Commitment Expiration Per Period								
Other Commitments	Со	l Amount mmitted Accrued	Less Than 1 Year		2 - 3 Years	4 - 5 Years	After 5 Years		
(In thousands)		-							
Deferred Compensation Agreement (1)	\$	1,391	Un	known	Unknown	Unknown	Unknown		
Separation Benefit Agreement (2)	\$	2,081	\$	295	Unknown	Unknown	Unknown		
Gas Balancing Liability (3)	\$	1,020	Un	known	Unknown	Unknown	Unknown		
Repurchase Obligations (4)	Ur	nknown	Un	known	Unknown	Unknown	Unknown		

- (1) We provide a salary deferral plan which allows participants to defer the recognition of salary for income tax purposes until actual distribution of benefits, which occurs at either termination of employment, death or certain defined unforeseeable emergency hardships. We recognize payroll expense and record a liability, included in other long-term liabilities in our Consolidated Balance Sheet, at the time of deferral (See Note 6 of our Consolidated Financial Statements).
- (2) Effective January 1, 1997, we adopted a separation benefit plan ("Separation Plan"). The Separation Plan allows eligible employees whose employment with us is involuntarily terminated or, in the case of an employee who has completed 20 years of service, voluntarily or involuntarily terminated, to receive benefits equivalent to 4 weeks salary for every whole year of service completed with Unit up to a maximum of 104 weeks. To receive payments the recipient must waive any claims against us in exchange for receiving the separation benefits. On October 28, 1997, we adopted a Separation Benefit Plan for Senior Management ("Senior Plan"). The Senior Plan provides certain officers and key executives of Unit with benefits generally equivalent to the Separation Plan. The Compensation Committee of the Board of Directors has absolute discretion in the selection of the individuals covered in this plan (See Note 6 of our Consolidated Financial Statements).
- (3) In December, 2002, we recorded a liability on certain properties where we believe there is insufficient reserves available to allow the under-produced owners to recover their under-production from future production volumes.
- (4) We formed The Unit 1984 Oil and Gas Limited Partnership and the 1986 Energy Income Limited Partnership along with private limited partnerships (the "Partnerships") with certain qualified employees, officers and directors from 1984 through 2003, with a subsidiary of ours serving as General Partner. The Partnerships were formed for the purpose of conducting oil and natural gas acquisition, drilling and development operations and serving as co-general partner with us in any additional limited partnerships formed during that year. The Partnerships participated on a proportionate basis with us in most drilling operations and most producing property acquisitions commenced by us for our own account during the period from the formation of the Partnership through December 31 of each year. These partnership agreements require, upon the election of a limited partner, that we repurchase the limited partner's interest at amounts to be determined by appraisal in the future. Such repurchases in any one year are limited to 20 percent of the units outstanding. We made repurchases of \$14,000 and \$1,000 in 2000 and 2002, respectively, for such limited partners' interests. No repurchases were made in 2001 (See Note 9 of our Consolidated Financial Statements).

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Critical Accounting Policies. We account for our oil and natural gas exploration and development activities using the full cost method of accounting. Under this method, all costs incurred in the acquisition, exploration and development of oil and natural gas properties are capitalized. At the end of each quarter, the net capitalized costs of our oil and natural gas properties is limited to the lower of unamortized cost or a ceiling. The ceiling is defined as the sum of the present value (10 percent discount rate) of estimated future net revenues from proved reserves, based on period-end oil and natural gas prices, plus the lower of cost or estimated fair value of unproved properties not included in the costs being amortized, less related income taxes. If the net capitalized costs of our oil and natural gas properties exceed the ceiling, we are subject to a write-down to the extent of such excess. A ceiling test write-down is a non-cash charge to earnings. If required, it reduces earnings and impacts stockholders' equity in the period of occurrence and results in lower depreciation, depletion and amortization expense in future periods. Once incurred, a write-down cannot be reversed even if prices subsequently recover.

The risk that we will be required to write-down the carrying value of our oil and natural gas properties increases when oil and natural gas prices are depressed or if we have large downward revisions in our estimated proved reserves. Application of these rules during periods of relatively low oil or natural gas prices, even if temporary, increases the chance of a ceiling test write-down. Based on oil and natural gas prices on December 31, 2002 (\$4.42 per Mcf for natural gas and \$29.70 per barrel for oil), the unamortized cost of our domestic oil and natural gas properties did not exceed the ceiling of our proved oil and natural gas reserves. Natural gas prices remain erratic and any significant declines below quarter-end prices used in the reserve evaluation could result in a ceiling test write-down in following quarterly reporting periods

The value of our oil and natural gas reserves is used to determine the loan value under our bank loan agreement. This value is affected by both price changes and the measurement of reserve volumes. Oil and natural gas reserves cannot be measured exactly. Our estimate of oil and natural gas reserves require extensive judgments of our reservoir engineering data and are less precise than other estimates made in connection with financial disclosures. Assigning monetary values to such estimates does not reduce the subjectivity and changing nature of such reserve estimates. Indeed the uncertainties inherent in the disclosure are compounded by applying additional estimates of the rates and timing of production and the costs that will be incurred in developing and producing the reserves.

We use the sales method for recording natural gas sales. This method allows for recognition of revenue, which may be more or less than our share of pro-rata production from certain wells. Our policy is to expense our pro-rata share of lease operating costs from all wells as incurred. Such expenses relating to the natural gas balancing position on wells in which we have an imbalance are not material.

Drilling equipment, transportation equipment and other property and equipment are carried at cost. Renewals and betterments are capitalized while repairs and maintenance are expensed. Realization of the carrying value of property and equipment is reviewed for possible impairment whenever events or changes in circumstances suggest the carrying amount may not be recoverable. Assets are determined to be impaired if a forecast of undiscounted estimated future net operating cash flows directly related to the asset including disposal value if any, is less than the carrying amount of the asset. If any asset is determined to be impaired, the loss is measured as the amount by which the carrying amount of the asset exceeds its fair value. An estimate of fair value is based on the best information available, including prices for similar assets. Changes in such estimates could cause us to reduce the carrying value of property and equipment.

We recognize revenues generated for "daywork" drilling contracts as the services are performed, which is similar to the percentage of completion method. Under "footage" and "turnkey" contracts, we bear the risk of completion of the well, so revenues and expenses are recognized using the completed contract method. The entire amount of a loss, if any, is recorded when the loss can be reasonably determined, however, any profit is recorded only at the time the well is finished. The costs of uncompleted drilling contracts include expenses incurred to date on "footage" or "turnkey" contracts, which are still in process at the end of the period, and are included in other current assets.

### EFFECTS OF INFLATION

In the 18 years prior to the last half of 1999, the effects of inflation on our operations was minimal due to low inflation rates and moderate demand for contract drilling services. However, starting in the last half of 1999 and throughout 2000 and the first three quarters of 2001, as drilling rig dayrates and utilization increased, the impact of inflation increased as the availability of used equipment and third party services decreased. Due to industry-wide demand for qualified labor, contract drilling labor costs increased substantially in the summer of 2000 and once again in the summer of 2001 and when rig dayrates declined in 2002 the labor rates did not come back down to the levels incurred prior to the increases. How inflation will affect us in the future will depend on additional increases, if any, realized in our drilling rig rates and the prices we

receive for our oil and natural gas. If industry activity recovers and returns to levels achieved in early 2001, shortages in support equipment such as drill pipe, third party services and qualified labor could occur resulting in additional corresponding increases in our material and labor costs. These conditions may limit our ability to realize improvements in operating profits.

#### NEW ACCOUNTING PRONOUNCEMENTS

In July 2001, the FASB issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("FAS 143"). FAS 143 is effective for fiscal years beginning after June 15, 2002 (January 1, 2003 for us) and establishes an accounting standard requiring the recording of the fair value of liabilities associated with the retirement of long-lived assets (mainly plugging and abandonment costs for our depleted wells) in the period in which the liability is incurred (at the time the wells are drilled). In the first quarter of 2003, the effect of the implementation of FAS 143 is expected to increase liabilities including deferred taxes by \$11.7 million, increase the net book value of our oil and natural gas properties by \$13.0 million and we anticipate adjustment to increase net income for the accumulated effect of a change in accounting principle of \$1.3 million.

In April 2002, the FASB issued Statement of Financial Accounting Standards No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement 13, and Technical Corrections" ("FAS 145"). FAS 145 is effective for fiscal years beginning after May 15, 2002. This statement eliminates an inconsistency between the required accounting for sale-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. This statement also amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changed conditions. We do not expect the adoption of FAS 145 to have a material effect on our financial position, results of operations or cash-flows

In July 2002, the FASB issued Statement of Financial Accounting Standards No. 146, "Accounting for Cost Associated with Exit or Disposal Activities" ("FAS 146"). FAS 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. FAS 146 nullifies Emerging Issues Task Force Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." We do not expect the adoption of FAS 146 to have a material effect on our financial position, results of operations or cashflow.

On December 31, 2002, the FASB issued Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FAS 123" ("FAS 148"). FAS 148 provides additional transition guidance for companies that elect to voluntarily adopt the accounting provisions of FAS 123, "Accounting For Stock-Based Compensation." FAS 148 does not change the provisions of FAS 123 that permit entities to continue to apply the intrinsic value method of APB 25, "Accounting for Stock Issued to Employees" ("APB 25"). Since Unit applies APB 25, its accounting for stock-based compensation will not change as a result of FAS 148. FAS 148 does require certain new disclosures in both annual and interim financial statements. The required annual disclosures were effective immediately for Unit and have been included above in Note 1 of our financial statements. The new interim disclosure provisions will be effective for Unit in the first quarter of 2003.

On November 25, 2002, the FASB issued FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57, and 107 and Rescission of FASB Interpretation No. 34" ("FIN 45"). FIN 45 clarifies the requirements of FASB Statement No. 5, Accounting for Contingencies (FAS 5), relating to the guarantor's accounting for, and disclosure of, the issuance of certain types of guarantees. For guarantees that fall within the scope of FIN 45, the Interpretation requires that guarantors recognize a liability equal to the fair value of the guarantee upon its issuance. The Interpretation's provisions for initial recognition and measurement should be applied on a prospective basis to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The guarantor's previous accounting for guarantees that were issued before the date of FIN 45's initial application may not be revised or restated to reflect the effect of the recognition and measurement provisions of the Interpretation. The disclosure requirements are effective for financial statements of both interim and annual periods that end after December 15, 2002. Unit has guaranteed liabilities in the past which would fall under the terms of FIN 45, but it does not have any such guarantees at December 31, 2002.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

On January 17, 2003, the FASB issued FASB Interpretation No. 46, "Consolidation of Variable Interest Entities, an interpretation of ARB 51" ("FIN 46"). The primary objectives of FIN 46 are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights ("variable interest entities" or "VIEs") and how to determine when and which business enterprise should consolidate the VIE. This new model for consolidation applies to an entity which either (1) the equity investors (if any) do not have a controlling financial interest or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. Unit does not expect the adoption of this standard to have a material impact on its financial position or results of operations.

### **RESULTS OF OPERATIONS**

2002 versus 2001

Provided below is a comparison of selected operating and financial data for the year of 2002 versus the year of 2001:

			Percent
	2001	2002	Change
Total Revenue	\$ 259,179,000	\$ 187,636,000	-28%
Net Income	\$ 62,766,000	\$ 18,244,000	-71%
Oil and Natural Gas:			
Revenue	\$ 90,237,000	\$ 67,959,000	-25%
Average natural gas price (Mcf)	\$ 4.00	\$ 2.87	-28%
Average oil price (Bbl)	\$ 23.62	\$ 21.54	-9%
Natural gas production (Mcf)	18,864,000	18,968,000	1%
Oil production (BbI)	492,000	473,000	-4%
Operating profit (revenue less operating costs)	\$ 68,041,000	\$ 47,164,000	-31%
Operating margin	75%	69%	
Depreciation, depletion and amortization rate (Mcfe)	\$ 0.91	\$ 1.04	14%
Depreciation, depletion and amortization (includes			
\$2,083,000 and \$346,000 write off of interest			
in Shenandoah in 2001 and 2002)	\$ 22,116,000	\$ 23,338,000	6%
Drilling:			
Revenue	\$ 167,042,000	\$ 118,173,000	-29%
Percentage of revenue from daywork contracts	99%	91%	
Average number of rigs in use	46.3	39.1	-16%
Average dayrate on daywork contracts	\$ 10,044	\$ 7,716	-23%
Operating profit (revenue less operating costs)	\$ 76,036,000	\$ 26,835,000	-65%
Operating margin	46%	23%	
Depreciation	\$ 13,888,000	\$ 14,684,000	6%
General and Administrative Expense	\$ 8,476,000	\$ 8,712,000	3%
Interest Expense	\$ 2,818,000	\$ 973,000	-65%
Average Interest Rate	5.7%	3.0%	-47%
Average Long-Term Debt Outstanding	\$ 44,995,000	\$ 24,771,000	-45%

Oil and natural gas revenues, operating profits and operating profit margins were all negatively affected by lower prices received for both oil and natural gas during 2002 compared to 2001. Production in equivalent Mcf was almost the same in 2002 as in 2001. Total operating cost decreased due to lower gross production taxes resulting from lower revenues. Total depreciation, depletion and amortization ("DD&A") on our oil and natural gas properties increased due to the increase in the DD&A rate in 2002, which resulted from higher development drilling cost per equivalent Mcf. The increase would have been larger, but included in 2001 DD&A was the write down of our investment in Shenandoah Resources LTD. of \$2.1 million. The remaining balance of our investment in Shenandoah Resources LTD. of \$346,000 was written off in the third quarter of 2002.

Reduced natural gas prices, especially in the fourth quarter of 2001 and the first quarter of 2002, caused decreases in operator demand for contract drilling rigs within our working area and resulted in lower rig use and dayrates for our rigs. As a result, operating margins declined between 2002 and 2001. Approximately 9 percent of our total drilling revenues in 2002 came from footage and turnkey contracts, which had profit margins lower than our daywork contracts. One percent of our total drilling revenues came from footage and turnkey contracts in 2001. Contract drilling depreciation increased due to the acquisition of 20 rigs in August of 2002. The increase was partially offset by lower rig use.

General and administrative expense was higher in 2002 due to increases in labor cost, insurance expense and outside contract services. In the second quarter of 2001, we recorded \$1.3 million in additional employee benefit expenses for the present value of a separation agreement made in connection with the retirement of King Kirchner from his position as Chief Executive Officer. The liability associated with this expense plus accrued interest will be paid in \$25,000 monthly payments starting in July 2003 and continuing through June 2009. Our total interest expense is lower due to lower interest rates along with a substantial reduction in our long-term debt.

2001 versus 2000

Provided below is a comparison of selected operating and financial data for the year of 2001 versus the year of 2000:

•		•	Percent
	2000	 2001	Change
Total Revenue	\$ 201,264,000	\$ 259,179,000	29%
Net Income	\$ 34,344,000	\$ 62,766,000	83%
Oil and Natural Gas:			
Revenue	\$ 92,016,000	\$ 90,237,000	-2%
Average natural gas price (Mcf)	\$ 3.91	\$ 4.00	2%
Average oil price (Bbl)	\$ 26.95	\$ 23.62	-12%
Natural gas production (Mcf)	19,285,000	18,864,000	-2%
Oil production (Bbl)	488,000	492,000	1%
Operating profit (revenue less operating costs)	\$ 72,262,000	\$ 68,041,000	-6%
Operating margin	79%	75%	
Depreciation, depletion and amortization rate (Mcfe)	\$ 0.82	\$ 0.91	11%
Depreciation, depletion and amortization (includes			
\$2,083,000 write off of interest in Shenandoah in 2001)	\$ 18,492,000	\$ 22,116,000	20%
Drilling:			
Revenue	\$ 108,075,000	\$ 167,042,000	55%
Percentage of revenue from daywork contracts	85%	99%	
Average number of rigs in use	39.8	46.3	16%
Average dayrate on daywork contracts	\$ 6,957	\$ 10,044	44%
Operating profit (revenue less operating costs)	\$ 24,024,000	\$ 76,036,000	217%
Operating margin	22%	46%	
Depreciation	\$ 11,999,000	\$ 13,888,000	16%
General and Administrative Expense	\$ 6,560,000	\$ 8,476,000	29%
Interest Expense	\$ 5,136,000	\$ 2,818,000	-45%
Average Interest Rate	7.9%	5.7%	-28%
Average Long-Term Debt Outstanding	\$ 62,302,000	\$ 44,995,000	-28%

Total revenues and net income were higher in 2001 versus 2000 due to increases in the use of our drilling rigs, as well as, the dayrates we received for the use of the drilling rigs.

Oil and natural gas revenues, operating profits and operating profit margins were all negatively affected by lower natural gas production and drops in the oil price we received between 2001 and 2000. Total operating cost increased due to the addition of new wells through development drilling and increases in ad valorem taxes, workover expenses and compression fees. Operating margins also decreased due to

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

declines in production on older wells without corresponding declines in operating expenses. Depreciation, depletion and amortization ("DD&A") increased in 2001 due to a write down of our investment in Shenandoah Resources LTD. by \$2.1 million and an increase in our DD&A rate per equivalent Mcf resulting from higher development drilling cost per equivalent Mcf.

Higher natural gas prices in the last quarter of 2000 and the first quarter of 2001 increased the demand for our drilling rigs which in turn pushed contract drilling dayrates higher. As a result, drilling revenues and operating margins increased between 2001 and 2000. Our contract drilling operating cost per rig per day decreased \$400 in 2001 when compared with 2000 as increased usage reduced the impact of our fixed indirect drilling expenses. Total contract drilling operating costs were up primarily due to increased utilization and increases in field labor cost.

General and administrative expense was higher in 2001 because we recorded \$1.3 million in additional employee benefit expenses for the present value of a separation agreement made in connection with the retirement of King Kirchner from his position as Chief Executive Officer. Our total interest expense is lower due to lower interest rates along with a reduction in our long-term debt.

### QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our operations are exposed to market risks primarily as a result of changes in commodity prices and interest rates.

Commodity Price Risk. Our major market risk exposure is in the price we receive for our oil and natural gas production. The price we receive is primarily driven by the prevailing worldwide price for crude oil and market prices applicable to our natural gas production. Historically, prices we have received for our oil and natural gas production fluctuated and such fluctuation is expected to continue. The price of natural gas also effects the demand for our rigs and the amount we can charge for the use of the rigs. Based on our 2002 production, a \$.10 per Mcf change in what we are paid for our natural gas production would result in a corresponding \$147,100 per month (\$1,765,000 annualized) change in our pre-tax cash flow. A \$1.00 per barrel change in our oil price would have a \$36,700 per month (\$440,000 annualized) change in our pre-tax operating cash flow.

In an effort to try and reduce the impact of price fluctuations, over the past several years we periodically have used hedging strategies to hedge the price we will receive for a portion of our future oil and natural gas production. A detailed explanation of those transactions has been included under hedging in the financial condition portion of management's discussion and analysis of financial condition and results of operations included above.

Interest Rate Risk. Our interest rate exposure relates to our long-term debt, all of which bears interest at variable rates based on the prime rate or the London Interbank Offered Rate ("Libor Rate"). At our election, borrowings under our revolving credit and term loan may be fixed at the Libor Rate for periods up to 180 days. Historically, we have not utilized any financial instruments, such as interest rate swaps, to manage our exposure to increases in interest rates. However, we may use such financial instruments in the future should our assessment of future interest rates warrant such use. Based on our average outstanding long-term debt in 2002, a one percent change in the floating rate would change our annual pre-tax cash flow by approximately \$248,000.

### UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation. The consolidated financial statements include the accounts of Unit Corporation and its directly and indirectly wholly owned subsidiaries ("Unit"). The investment in limited partnerships is accounted for on the proportionate consolidation method, whereby Unit's share of the partnerships' assets, liabilities, revenues and expenses is included in the appropriate classification in the accompanying consolidated financial statements.

Nature of Business. Unit is engaged in the land contract drilling of natural gas and oil wells and the exploration, development, acquisition and production of oil and natural gas properties. Unit's current contract drilling operations are focused primarily in the natural gas producing provinces of the Oklahoma and Texas areas of the Anadarko and Arkoma Basins, the Texas Gulf Coast and the Rocky Mountain regions. Unit's primary exploration and production operations are also conducted in the Anadarko and Arkoma Basins and in the Texas Gulf Coast area with additional properties in the Permian Basin. The majority of its contract drilling and exploration and production activities are oriented toward drilling for and producing natural gas. At December 31, 2002, Unit had an interest in a total of 3,304 wells and served as operator of 707 of those wells. Unit provides land contract drilling services for a wide range of customers using the drilling rigs, which it owns and operates. In 2002, 68 of Unit's 75 rigs performed contract drilling services.

Drilling Contracts. Unit recognizes revenues generated from "daywork" drilling contracts as the services are performed, which is similar to the percentage of completion method. Under "footage" and "turnkey" contracts, Unit bears the risk of completion of the well therefore, revenues and expenses are recognized using the completed contract method. The duration of all three types of contracts range typically from 20 to 90 days, but some of our daywork contracts in the Rocky Mountains can range up to one year. The entire amount of a loss, if any, is recorded when the loss is determinable. The costs of uncompleted drilling contracts include expenses incurred to date on "footage" or "turnkey" contracts, which are still in process at the end of the period, and are included in other current assets.

Cash Equivalents and Book Overdrafts. Unit includes as cash equivalents, certificates of deposits and all investments with maturities at date of purchase of three months or less which are readily convertible into known amounts of cash. Book overdrafts are checks that have been issued prior to the end of the period, but not presented to Unit's bank for payment prior to the end of the period. At December 31, 2001 and 2002, book overdrafts of \$1.1 million and \$3.6 million have been included in accounts payable.

Property and Equipment. Drilling equipment, transportation equipment and other property and equipment are carried at cost. Renewals and betterments are capitalized while repairs and maintenance are expensed. Depreciation of drilling equipment is recorded using the units-of-production method based on estimated useful lives, including a minimum provision of 20 percent of the active rate when the equipment is idle. Unit uses the composite method of depreciation for drill pipe and collars and calculates the depreciation by footage actually drilled compared to total estimated remaining footage. Depreciation of other property and equipment is computed using the straight-line method over the estimated useful lives of the assets ranging from 3 to 15 years.

Realization of the carrying value of property and equipment is reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets are determined to be impaired if a forecast of undiscounted estimated future net operating cash flows directly related to the asset including disposal value if any, is less than the carrying amount of the asset. If any asset is determined to be impaired, the loss is measured as the amount by which the carrying amount of the asset exceeds its fair value. An estimate of fair value is based on the best information available, including prices for similar assets. Changes in such estimates could cause Unit to reduce the carrying value of property and equipment.

When property and equipment components are disposed of, the cost and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is generally reflected in operations. For dispositions of drill pipe and drill collars, an average cost

# UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

for the appropriate feet of drill pipe and drill collars is removed from the asset account and charged to accumulated depreciation and proceeds, if any, are credited to accumulated depreciation.

Goodwill. Goodwill represents the excess of the cost of the acquisition of Hickman Drilling Company, CREC Rig Equipment Company and CDC Drilling Company over the fair value of the net assets acquired. Prior to January 1, 2002 goodwill was amortized on the straight-line method using a 25 year life. Unit expensed \$243,000 annually for the amortization of goodwill. On July 20, 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("FAS 142"). For goodwill and intangible assets recorded in the financial statements, FAS 142 ends the amortization of goodwill and certain intangible assets and subsequently requires, at least annually, that an impairment test be performed on such assets to determine whether the fair value has changed. FAS 142 became effective for the fiscal years starting after December 15, 2001 (January 1, 2002 for Unit). Net goodwill reported in other assets at December 31, 2001 and 2002 was \$5,088,000 and \$12,794,000, respectively, and is all related to the drilling segment. Goodwill of \$7,009,000 is expected to be deductible for tax purposes.

Oil and Natural Gas Operations. Unit accounts for its oil and natural gas exploration and development activities on the full cost method of accounting prescribed by the Securities and Exchange Commission ("SEC"). Accordingly, all productive and non-productive costs incurred in connection with the acquisition, exploration and development of oil and natural gas reserves are capitalized and amortized on a composite units-of-production method based on proved oil and natural gas reserves. Unit capitalizes internal costs that can be directly identified with its acquisition, exploration and development activities. Independent petroleum engineers annually review Unit's determination of its oil and natural gas reserves. The average composite rates used for depreciation, depletion and amortization ("DD&A") were \$0.82, \$0.91 and \$1.04 per Mcfe in 2000, 2001 and 2002, respectively. The calculation of DD&A includes estimated future expenditures to be incurred in developing proved reserves and estimated dismantlement and abandonment costs, net of estimated salvage values. Unit's unproved properties totaling \$16.0 million are excluded from the DD&A calculation. In the event the unamortized cost of oil and natural gas properties being amortized exceeds the full cost ceiling, as defined by the SEC, the excess is charged to expense in the period during which such excess occurs. The full cost ceiling is based principally on the estimated future discounted net cash flows from Unit's oil and natural gas properties. As discussed in Note 12, such estimates are imprecise.

No gains or losses are recognized upon the sale, conveyance or other disposition of oil and natural gas properties unless a significant reserve amount is involved.

The SEC's full cost accounting rules prohibit recognition of income in current operations for services performed on oil and natural gas properties in which Unit has an interest or on properties in which a partnership, of which Unit is a general partner, has an interest. Accordingly, in 2000, 2001 and 2002, Unit recorded \$179,000, \$2,259,000 and \$841,000 of contract drilling profits, respectively, as a reduction of the carrying value of its oil and natural gas properties rather than including these profits in current operations.

Limited Partnerships. Unit's wholly owned subsidiary, Unit Petroleum Company, is a general partner in ten oil and natural gas limited partnerships sold privately and publicly. Some of Unit's officers, directors and employees own the interests in most of these partnerships. Unit shares partnership revenues and costs in accordance with formulas prescribed in each limited partnership agreement. The partnerships also reimburse Unit for certain administrative costs incurred on behalf of the partnerships.

Income Taxes. Measurement of current and deferred income tax liabilities and assets is based on provisions of enacted tax law; the effects of future changes in tax laws or rates are not included in the measurement. Valuation allowances are established where necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable for the year and the change during that year in deferred tax assets and liabilities.

Natural Gas Balancing. Unit uses the sales method for recording natural gas sales. This method allows for recognition of revenue, which may be more or less than our share of pro-rata production from certain wells. Unit estimates its December 31, 2002 balancing position to be approximately 1.9 Bcf on under-produced properties and approximately 2.3 Bcf on over-produced properties. Unit has recorded a receivable of \$485,000 on certain wells where we estimated that insufficient reserves are available for Unit to recover the under-production from future production volumes. Unit has also recorded a liability of \$1,020,000 on certain properties where we believe there is insufficient reserves available to allow the under-produced owners to recover their under-production from future production volumes. Unit's policy is to expense the pro-rata share of lease operating costs from all wells as incurred. Such expenses relating to the balancing position on wells in which Unit has imbalances are not material.

Equity Investments. Unit owns a 40 percent equity interest in a natural gas gathering and processing company. The investments, including Unit's share of the equity in the earnings of this company, totaled \$1.8 million at December 31, 2002 and is reported in other assets.

Employee and Director Stock Based Compensation. Unit applies APB Opinion 25 in accounting for its stock option plans for its employees and directors, which are explained more fully in Note 6. Under this standard, no compensation expense is recognized for grants of options, which include an exercise price equal to or greater than the market price of the stock on the date of grant. Accordingly, based on Unit's grants in 2000, 2001 and 2002 no compensation expense has been recognized. Compensation expense included in reported net income is Unit's matching 401(k) contribution (See Note 6). Had compensation been determined on the basis of fair value pursuant to FASB Statement No. 123, net income and earnings per share would have been reduced as follows:

	2000	2001	2002
(In thousands):

Pro forma	\$ 0.95	\$ 1.72	\$ 0.45
Diluted Earnings per Share:			
As reported	\$ 0.95	\$ 1.73	\$ 0.47
Pro forma	\$ 0.94	\$ 1.71	\$ 0.45

The fair value of each option granted is estimated using the Black-Scholes model. Unit's estimate of stock volatility in 2000 and 2001 was 0.55 and in 2002 was 0.53, based on previous stock performance. Dividend yield was estimated to remain at zero with a risk free interest rate of 5.26, 5.41 and 4.24 percent in 2000, 2001 and 2002, respectively. Expected life ranged from 1 to 10 years based on prior experience depending on the vesting periods involved and the make up of participating employees. The aggregate fair value of options granted during 2000 and 2002 under the Stock Option Plan were \$1,470,000 and \$1,669,000, respectively. No options were issued under the Stock Option Plan in 2001. Under the Non-Employee Director's Stock Option Plan the aggregate fair value of options granted during 2000, 2001 and 2002 were \$99,000, \$201,000 and \$262,000, respectively.

Self Insurance. Unit utilizes self insurance programs for employee group health and worker's compensation. Self insurance costs are accrued based upon the aggregate of estimated liabilities for reported claims and claims incurred but not yet reported. Accrued liabilities include \$4,583,000 and \$3,632,000 for employer group health insurance and worker's compensation at December 31, 2001 and 2002, respectively. Due to high premium cost, Unit decided to increase its deductible for general liability claims to \$200,000 and to \$1 million for rig physical damage claims.

# UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Treasury Stock. On August 30, 2001, Unit's Board of Directors authorized the purchase of up to one million shares of Unit's common stock. The timing of stock purchases are made at the discretion of management. During 2001, 30,000 shares were repurchased for \$296,000. These shares were used for a portion of the company match to the 401(k) Employee Thrift Plan. No treasury stock was owned by Unit at December 31, 2002.

Financial Instruments and Concentrations of Credit Risk. Financial instruments, which potentially subject Unit to concentrations of credit risk, consist primarily of trade receivables with a variety of national and international oil and natural gas companies. Unit does not generally require collateral related to receivables. Such credit risk is considered by management to be limited due to the large number of customers comprising Unit's customer base. During 2002, one purchaser of Unit's oil and natural gas production accounted for approximately 11 percent of consolidated revenues. At December 31, 2002 accounts receivable from one oil and natural gas purchaser was approximately \$713,000. In addition, at December 31, 2001 and 2002, Unit had a concentration of cash of \$2.0 million and \$3.0 million, respectively, with one bank.

Hedging Activities. On January 1, 2001, Unit adopted Statement of Financial Accounting Standard No. 133 (subsequently amended by Financial Accounting Standard No.'s 137 and 138), "Accounting for Derivative Instruments and Hedging Activities" ("FAS 133"). This statement requires all derivatives to be recognized on the balance sheet and measured at fair value. If a derivative is designated as a cash flow hedge, Unit is required to measure the effectiveness of the hedge, or the degree that the gain (loss) for the hedging instrument offsets the loss (gain) on the hedged item, at each reporting period. The effective portion of the gain (loss) on the derivative instrument is recognized in other comprehensive income as a component of equity and subsequently reclassified into earnings when the forecasted transaction affects earnings. The ineffective portion of a derivative's change in fair value is required to be recognized in earnings immediately. Derivatives that do not qualify for hedge treatment under FAS 133 must be recorded at fair value with gains (losses) recognized in earnings in the period of change.

Unit periodically enters into derivative commodity instruments to hedge its exposure to price fluctuations on oil and natural gas production. Such instruments include regulated natural gas and crude oil futures contracts traded on the New York Mercantile Exchange (NYMEX) and over-the-counter swaps and basic hedges with major energy derivative product specialists. Initial adoption of this standard was not material. In the first quarter of 2000, Unit entered into swap transactions in an effort to lock in a portion of its daily production at the higher oil prices which currently existed. These transactions applied to approximately 50 percent of Unit's daily oil production covering the period from April 1, 2000 to July 31, 2000 and 25 percent of our oil production for August and September of 2000, at prices ranging from \$24.42 to \$27.01.

Unit entered into a collar contract for approximately 25 percent of its daily production for the period covering November 1, 2000 to February 28, 2001. The collar had a floor of \$26.00 and a ceiling of \$33.00 and Unit received \$0.86 per barrel for entering into the collar transaction. During 2000, the net effect of these hedging transactions yielded a reduction in Unit's oil revenues of \$465,000. During the first quarter of 2001, the net effect of this hedging transaction yielded an increase in oil revenues of \$17,200. During the second quarter of 2001, Unit entered into a natural gas collar contract for approximately 36 percent of its June and July 2001 natural gas production, at a floor price of \$4.50 and a ceiling price of \$5.95. During the third quarter of 2001, Unit entered into two natural gas collar contracts for approximately 38 percent of its September thru November 2001 natural gas production. Both contracts had a floor price of \$2.50. One contract had a ceiling price of \$3.68 and the other contract had a ceiling price of \$4.25. During 2001 natural gas collar contracts added \$2.030,000 to Unit's natural gas revenues.

On April 30, 2002, Unit entered into a collar contract covering approximately 19 percent of its natural gas production for the periods of April 1, 2002 thru October 31, 2002. The collar had a floor of \$3.00 and a ceiling of \$3.98. During the year of 2002, the natural gas hedging transactions increased natural gas revenues by \$40,300. At December 31, 2002, Unit was not holding any natural gas or oil derivative contracts.

During the first quarter of 2003, Unit entered into two collar contracts covering approximately 40 percent of its natural gas production for the periods of April, 1 2003 thru September 30, 2003. One collar has a floor of \$4.00 and a ceiling of \$5.75 and the other collar has a floor of \$4.50 and a ceiling of \$6.02. Unit also entered into two collar contracts covering approximately 25 percent of its oil production for the periods of May 1, 2003 thru December 31, 2003. One collar has a floor of \$25.00 and a ceiling of \$32.20 and the other collar has a floor of \$26.00 and a ceiling of \$31.40.

Accounting Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In July 2001, the FASB issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("FAS 143"). FAS 143 is effective for fiscal years beginning after June 15, 2002 (January 1, 2003 for Unit), and establishes an accounting standard requiring the recording of the fair value of liabilities associated with the retirement of long-lived assets (mainly plugging and abandonment costs for Unit's depleted wells) in the period in which the liabilities are incurred (at the time the wells are drilled). In the first quarter of 2003, the effect of the implementation of FAS 143 is expected to increase liabilities including deferred taxes by \$11.7 million, increase the net book value of Unit's oil and natural gas properties by \$13.0 million and the anticipated adjustment to increase net income for the accumulated effect of a change in accounting principle is expected to be \$1.3 million.

In April 2002, the FASB issued Statement of Financial Accounting Standards No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement 13, and Technical Corrections" ("FAS 145"). FAS 145 is effective for fiscal years beginning after May 15, 2002. This statement eliminates an inconsistency between the required accounting for sale-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. This statement also amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changed conditions. Unit does not expect the adoption of FAS 145 to have a material effect on our financial position, results of operations or cashflows.

In July 2002, the FASB issued Statement of Financial Accounting Standards No. 146, "Accounting for Cost Associated with Exit or Disposal Activities" ("FAS 146"). FAS 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. FAS 146 nullifies Emerging Issues Task Force Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." Unit does not expect the adoption of FAS 146 to have a material effect on our financial position, results of operations or cashflow.

On December 31, 2002, the FASB issued Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FAS 123" ("FAS 148"). FAS 148 provides additional transition guidance for companies that elect to voluntarily adopt the accounting provisions of FAS 123, "Accounting For Stock-Based Compensation." FAS 148 does not change the provisions of FAS 123 that permit entities to continue to apply the intrinsic value method of APB 25, "Accounting for Stock Issued to Employees" ("APB 25"). Since Unit applies APB 25, its accounting for stock-based compensation will not change as a result of FAS 148. FAS 148 does require certain new disclosures in both annual and interim financial statements. The required annual disclosures were effective immediately for Unit and have been included above in Note 1 of the Company's financial statements. The new interim disclosure provisions will be effective for Unit in the first quarter of 2003.

On November 25, 2002, the FASB issued FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57, and 107 and Rescission of FASB Interpretation No. 34" ("FIN 45"). FIN 45 clarifies the requirements of FASB Statement No. 5, Accounting for Contingencies ("FAS 5"), relating to the guarantor's accounting for, and disclosure of, the issuance of certain types of guarantees. For guarantees that fall within the scope of FIN 45, the Interpretation requires that guarantors recognize a liability equal to the fair value of the guarantee upon its issuance. The Interpretation's provisions for initial recognition and measurement should be applied on a prospective bases to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The guarantor's previous accounting for guarantees that were issued before the date of FIN 45's initial application may not be revised or restated to reflect the effect of the recognition and measurement provisions

### UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

of the Interpretation. The disclosure requirements are effective for financial statements of both interim and annual periods that end after December 15, 2002. Unit has guaranteed liabilities in the past which would fall under the terms of FIN 45, but it does not have any such guarantees at December 31, 2002.

On January 17, 2003, the FASB issued FASB Interpretation No. 46, "Consolidation of Variable Interest Entities, an interpretation of ARB 51" ("FIN 46"). The primary objectives of FIN 46 are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights ("variable interest entities" or "VIEs") and how to determine when and which business enterprise should consolidate the VIE. This new model for consolidation applies to an entity which either (1) the equity investors (if any) do not have a controlling financial interest or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. Unit does not expect the adoption of this standard to have a material impact on its financial position or results of operations.

### NOTE 2 - ACQUISITIONS

On August 15, 2002, Unit completed the acquisition of CREC Rig Equipment Company and CDC Drilling Company. Both of these acquisitions were stock purchase transactions. Unit issued 6,819,748 shares of common stock and paid \$3,813,053 for all the outstanding shares of CREC Rig Acquisition Company and issued 400,252 shares of common stock and paid \$686,947 for all the outstanding shares of CDC Drilling Company. The assets of the acquired companies included twenty drilling rigs, spare drilling equipment and vehicles. What we paid in both transactions was determined through arms-length negotiations between the parties and only the cash portion of the transaction appears in the investing and financing activities of Unit's Consolidated Condensed Statement of Cash Flows.

Total consideration given in the acquisition was determined based on the depth capacity of the rigs, the working condition of the rigs and the ability of the rigs to enhance Unit's ability to provide services and equipment required by our customers on a timely basis within the Anadarko and Gulf Coast areas where the rigs are located. The calculation and allocation of the total consideration paid for the acquisition are as follows (in thousands):

Calculation of Consideration Paid: Unit Corporation common stock		
(7,220,000 shares at \$16.96556 per share)	\$	122,491
Cash		4,500
Total consideration	\$	126,991
Allocation of Total Consideration Paid:	•	440.004
Drilling rigs	\$	112,994
Spare drilling equipment		3,500
Vehicles		636
Deferred tax asset		2,155
Goodwill		7,706
Total consideration	\$	126,991

Unaudited summary pro forma results of operations for the Company, reflecting the above acquisitions as if they had occurred at the beginning of the year ended December 31, 2001 are as follows:

	Year Ended	Year Ended
	December 31, 2001	December 31, 2002
Revenues	\$ 311,104,000	\$ 215,805,000
Net Income	\$ 70,457,000	\$ 15,320,000
Net Income per Common Share (Diluted)	\$ 1.62	\$ 0.34

The pro forma results of operations are not necessarily indicative of the actual results of operations that would have occurred had the purchase actually been made at the beginning of the respective periods nor of the results which may occur in the future.

### NOTE 3 - EARNINGS PER SHARE

The following data shows the amounts used in computing earnings per share.

	(	Income Numerator)	Weighted Shares (Denominator)	-Share nount
For the Year Ended December 31, 2000:				 
Basic earnings per common share	\$	34,344,000	35,723,000	\$ 0.96
Effect of dilutive stock options			409,000	 
Diluted earnings per common share	\$	34,344,000	36,132,000	\$ 0.95
For the Year Ended December 31, 2001:				
Basic earnings per common share	\$	62,766,000	35,967,000	\$ 1.75
Effect of dilutive stock options			291,000	
Diluted earnings per common share	\$	62,766,000	36,258,000	\$ 1.73
For the Year Ended December 31, 2002:				
Basic earnings per common share	\$	18,244,000	38,844,000	\$ 0.47
Effect of dilutive stock options			268,000	
Diluted earnings per common share	\$	18,244,000	39,112,000	\$ 0.47

The following options and their average exercise prices were not included in the computation of diluted earnings per share because the option exercise prices were greater than the average market price of common shares for the years ended December 31,:

	2000		2001	2002
Options	144,000	_	153,000	 198,500
Average Exercise Price	\$ 16.59	\$	16.79	\$ 19.01

### NOTE 4 - LONG-TERM DEBT AND OTHER LONG-TERM LIABILITIES

Long-term debt consisted of the following as of December 31, 2001 and 2002:

	 2001	2002
(In thousands)		
Revolving Credit and Term Loan, with Interest at December 31, 2001		
and 2002 of 3.3 Percent and 2.5 Percent, Respectively	\$ 30,000	\$ 30,500
Notes Payable for Hickman Drilling Company Acquisition with Interest		
at December 31, 2001 and 2002 of 4.75 Percent and 4.25 Percent,		
Respectively	2,000	1,000
	32,000	 31,500
Less Current Portion	1,000	1,000
Total Long-Term Debt	\$ 31,000	\$ 30,500

At December 31, 2002, Unit has a \$100 million bank loan agreement consisting of a revolving credit facility through May 1, 2005 and a term loan thereafter, maturing on May 1, 2008. Borrowings under the loan agreement are limited to a commitment amount. Although, the current value of Unit's assets under the latest loan value computation supported a full \$100 million, Unit elected to set the loan commitment at \$40 million in order to reduce costs. The loan value under the revolving credit facility is subject to a semi-annual re-determination calculated

### UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### (CONTINUED)

primarily as the sum of a percentage of the discounted future value of Unit's oil and natural gas reserves, as determined by the banks. In addition, an amount representing a part of the value of Unit's drilling rig fleet, limited to \$20 million, is added to the loan value. Any declines in commodity prices would adversely impact the determination of the loan value.

Borrowings under the revolving credit facility bear interest at the Chase Manhattan Bank, N.A. prime rate ("Prime Rate") or the London Interbank Offered Rates ("Libor Rate") plus 1.00 to 1.50 percent depending on the level of debt as a percentage of the total loan value. Subsequent to May 1, 2005, borrowings under the loan agreement bear interest at the Prime Rate or the Libor Rate plus 1,25 to 1,75 percent depending on the level of debt as a percentage of the total loan value.

At Unit's election, any portion of the debt outstanding may be fixed at the Libor Rate for 30, 60, 90 or 180 days. During any Libor Rate funding period the outstanding principal balance of the note to which such Libor Rate option applies may not be paid. Borrowings under the Prime Rate option may be paid anytime in part or in whole without premium or penalty.

Unit pays an origination fee equal to one percent of the elected loan commitment annually and a facility fee of 3/8 of one percent is charged for any unused portion of the commitment amount. Some of Unit's drilling rigs are collateral for such indebtedness and the balance of Unit's assets are subject to a negative pledge.

The loan agreement includes prohibitions against (i) the payment of dividends (other than stock dividends) during any fiscal year in excess of 25 percent of the consolidated net income of Unit during the preceding fiscal year, and only if working capital provided from operations during said year is equal to or greater than 175 percent of current maturities of long-term debt at the end of such year, (ii) the incurrence by Unit or any of its subsidiaries of additional debt with certain very limited exceptions and (iii) the creation or existence of mortgages or liens, other than those in the ordinary course of business, on any property of Unit or any of its subsidiaries, except in favor of its banks. The loan agreement also requires that Unit maintain consolidated net worth of at least \$125 million, a current ratio of not less than 1 to 1, a ratio of longterm debt, as defined in the loan agreement, to consolidated tangible net worth not greater than 1.2 to 1 and a ratio of total liabilities, as defined in the loan agreement, to consolidated tangible net worth not greater than 1.65 to 1. In addition, working capital provided by operations, as defined in the loan agreement, cannot be less than \$40 million in any year.

In November 1997, Unit completed the acquisition of Hickman Drilling Company. In association with this acquisition, we issued an aggregate of \$5.0 million in promissory notes payable in five equal annual installments commencing January 2, 1999, with interest at the Prime Rate. At December 31, 2002, \$1 million remained outstanding on these promissory notes and they were paid in full in January 2003.

Other long-term liabilities consisted of the following as of December 31, 2001 and 2002:

	2001			2002
(In thousands)	• • •			
Separation Benefit Plan	\$	1,959	\$	2,081
Deferred Compensation Plan		1,277		1,391
Retirement Agreement		1,330		1,412
Gas Balancing Liability				1,020
Natural Gas Purchaser Prepayment		437		
		5,003		5,904
Less Current Portion		893		465
Total Other Long-Term Liabilities	\$	4,110	\$	5,439

Estimated annual principal payments under the terms of long-term debt and other long-term liabilities from 2003 through 2007 are \$1,465,000, \$300,000, \$6,231,000, \$10,467,000 and \$10,467,000. Based on the borrowing rates currently available to Unit for debt with similar terms and maturities, long-term debt at December 31, 2002 approximates its fair value.

#### NOTE 5 - INCOME TAXES

A reconciliation of the income tax expense, computed by applying the federal statutory rate to pre-tax income to Unit's effective income tax expense is as follows:

	2000	2001	2002
(In thousands)			
Income Tax Expense Computed by			
Applying the Statutory Rate	\$ 19,345	\$ 34,538	\$ 9,739
State Income Tax, Net of Federal Benefi	t 1,575	2,859	834
Statutory Depletion and Other	8	(1,484)	(1,021)
Income tax expense	\$ 20,928	\$ 35,913	\$ 9,552

Deferred tax assets and liabilities are comprised of the following at December 31, 2001 and 2002:

		2001	 2002
(In thousands)			
Deferred Tax Assets:			
Allowance for losses and nondeductible accruals	\$	3,867	\$ 3,942
Net operating loss carryforward			17,752
Statutory depletion carryforward		2,874	4,231
Alternative minimum tax credit carryforward	_	5,196	 395
Gross deferred tax assets		11,937	26,320
Deferred Tax Liability:			
Depreciation, depletion and amortization		(83,720)	 (110,598)
Net deferred tax liability		(71,783)	(84,278)
Current Deferred Tax Asset		2,157	 2,042
Non-Current - Deferred Tax Liability	\$	(73,940)	\$ (86,320)

Realization of the deferred tax asset is dependent on generating sufficient future taxable income. Although realization is not assured, management believes it is more likely than not that the deferred tax asset will be realized. The amount of the deferred tax asset considered realizable, however, could be reduced in the near-term if estimates of future taxable income are reduced.

At December 31, 2002, Unit has an excess statutory depletion carryforward of approximately \$11,135,000, which may be carried forward indefinitely and is available to reduce future taxable income, subject to statutory limitations. At December 31, 2002, Unit has net operating loss carryforwards of approximately \$46,700,000 which expire from 2019 to 2022.

#### NOTE 6 - EMPLOYEE BENEFIT AND COMPENSATION PLANS

In December 1984, the Board of Directors approved the adoption of an Employee Stock Bonus Plan ("the Plan") whereby 330,950 shares of common stock were authorized for issuance under the Plan. On May 3, 1995, Unit's shareholders approved and amended the Plan to increase by 250,000 shares the aggregate number of shares of common stock that could be issued under the Plan. Under the terms of the Plan, bonuses may be granted to employees in either cash or stock or a combination thereof, and are payable in a lump sum or in annual installments subject to certain restrictions. No shares were issued under the Plan in 2000, 2001 and 2002.

Unit also has a Stock Option Plan (the "Option Plan"), which provides for the granting of options for up to 2,700,000 shares of common stock to officers and employees. The Option Plan permits the issuance of qualified or nonqualified stock options. Options granted typically become exercisable at the rate of 20 percent per year one year after being granted and expire after ten years from the original grant date. The exercise price for options granted under this plan is the fair market value of the common stock on the date of the grant.

# UNIT CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Activity pertaining to the Stock Option Plan is as follows:

	NUMBER OF	WEIGHTED AVERAGE	
	SHARES	EXERCISE PRICE	
Outstanding at January 1, 2000	657,600	\$ 4.41	
Granted	146,000	16.59

\$11.31 - \$14.06	6,500	7.3 years	\$	13.61	
\$16.69 - \$19.04	295.500	9.0 years	\$	17.95	

### EXERCISABLE OPTIONS AT DECEMBER 31, 2002

#### WEIGHTED AVERAGE

EXERCISE PRICES	XERCISE PRICES NUMBER OF SHARES		EXERCISE PRICE		
\$2.75 - \$4.00	196,000	\$	3.36		
\$7.25 - \$10.00	91,700	\$	8.61		
\$11.31 - \$14.06	3,200	\$	13.18		
\$16.69 - \$19.04	64,200	\$	17.05		

Options for 407,900, 329,300 and 355,100 shares were exercisable with weighted average exercise prices of \$4.24, \$6.25 and \$7.28 at December 31, 2000, 2001 and 2002, respectively.

In February and May 1992, the Board of Directors and shareholders, respectively, approved the Unit Corporation Non-Employee Directors' Stock Option Plan (the "Old Plan") and in February and May 2000, the Board of Directors and shareholders, respectively, approved the Unit Corporation 2000 Non-Employee Director's Stock Option Plan (the "Directors' Plan"). Under the Directors' Plan, which replaced the Old Plan, an aggregate of 300,000 shares of Unit's common stock may be issued upon exercise of the stock options. Under the Old Plan, on the first business day following each annual meeting of stockholders of Unit, each person who was then a member of the Board of Directors of Unit and who was not then an employee of Unit or any of its subsidiaries was granted an option to purchase 2,500 shares of common stock. Under the Directors' Plan, commencing with the year 2000 annual meeting, the amount granted has been increased to 3,500 shares of common stock. The option price for each stock option is the fair market value of the common stock on the date the stock options are granted. No stock options may be exercised during the first six months of its term except in case of death and no stock options are exercisable after ten years from the date of grant.

### Activity pertaining to the Directors' Plan is as follows:

	NUMBER OF SHARES	WEIGHTED AVERAGE EXERCISE PRICE
Outstanding at January 1, 2000	77,500	\$ 5.86
Granted	17,500	12.19
Outstanding at December 31, 2000	95,000	7.03
Granted	17,500	17.54
Exercised	(37,000)	6.80
Outstanding at December 31, 2001	75,500	9.58
Granted	21,000	20.10
Exercised	(2,500)	1.75
Outstanding at December 31, 2002	94,000	\$ 12.14

### OUTSTANDING AND EXERCISABLE OPTIONS AT DECEMBER 31, 2002

		WEIGHTED AVERAGE	
		REMAINING	WEIGHTED AVERAGE
EXERCISE PRICES	NUMBER OF SHARES	CONTRACTUAL LIFE	EXERCISE PRICE
\$2.88 - \$3.75	15,000	1.0 years	\$ 3.40
\$6.87 - \$9.00	30,000	5.0 years	\$ 7.76
\$12.19 - \$17.54	28,000	8.0 years	\$ 15.53
\$20.10 - \$20.10	21,000	9.3 years	\$ 20.10

Under Unit's 401(k) Employee Thrift Plan, employees who meet specified service requirements may contribute a percentage of their total compensation, up to a specified maximum, to the plan. Unit may match each employee's contribution, up to a specified maximum, in full or on a partial basis. The Company made discretionary contributions under the plan of 58,353, 35,016 and 87,452 shares of common stock and recognized expense of \$595,000, \$1,082,000 and \$1,079,000 in 2000, 2001 and 2002, respectively.

Unit provides a salary deferral plan ("Deferral Plan") which allows participants to defer the recognition of salary for income tax purposes until actual distribution of benefits which occurs at either termination of employment, death or certain defined unforeseeable emergency hardships. Funds set aside in a trust to satisfy Unit's obligation under the Deferral Plan at December 31, 2000, 2001 and 2002 totaled \$1,536,000, \$1,277,000 and \$1,391,000, respectively. Unit recognizes payroll expense and records a liability at the time of deferral.

Effective January 1, 1997, Unit adopted a separation benefit plan ("Separation Plan"). The Separation Plan allows eligible employees whose employment with Unit is involuntarily terminated or, in the case of an employee who has completed 20 years of service, voluntarily or involuntarily terminated, to receive benefits equivalent to 4 weeks salary for every whole year of service completed with Unit up to a maximum of 104 weeks. To receive payments the recipient must waive any claims against Unit in exchange for receiving the separation benefits. On October 28, 1997, Unit adopted a Separation Benefit Plan for Senior Management ("Senior Plan"). The Senior Plan provides certain officers and key executives of Unit with benefits generally equivalent to the Separation Plan. The Compensation Committee of the Board of Directors has absolute discretion in the selection of the individuals covered in this plan. Unit recognized expense of \$558,000, \$589,000 and \$619,000 in 2000, 2001 and 2002, respectively, for benefits associated with anticipated payments from both separation plans.

Unit has entered into key employee change of control contracts with five of our executive officers. These severance contracts have an initial three-year term that is automatically extended for one year upon each anniversary, unless a notice not to extend is given by Unit. If a change of control of the company, as defined in the contracts, occurs during the term of the severance contract, then the contract becomes operative for a fixed three-year period. The severance contracts generally provide that the executive's terms and conditions for employment (including position, work location, compensation and benefits) will not be adversely changed during the three-year period after a change of control. If the executive's employment is terminated by the company (other than for cause, death or disability), the executive terminates for good reason during such three-year period, or the executive terminates employment for any reason during the 30-day period following the first

(CONTINUED)

anniversary of the change of control, and upon certain terminations prior to a change of control or in connection with or in anticipation of a change of control, the executive is generally entitled to receive, in addition to certain other benefits, any earned but unpaid compensation; up to 2.9 times the executive's base salary plus annual bonus (based on historic annual bonus); and the company matching contributions that would have been made had the executive continued to participate in the company's 401(k) plan for up to an additional three years.

The severance contract provides that the executive is entitled to receive a payment in an amount sufficient to make the executive whole for any excise tax on excess parachute payments imposed under Section 4999 of the Code. As a condition to receipt of these severance benefits, the executive must remain in the employ of the company prior to change of control and render services commensurate with his position.

#### NOTE 7 - TRANSACTIONS WITH RELATED PARTIES

Unit formed private limited partnerships (the "Partnerships") with certain qualified employees, officers and directors from 1984 through 2002, with a subsidiary of Unit serving as General Partner. Questa Oil and Gas Co. formed five private limited partnerships from 1981 to 1993. The Partnerships were formed for the purpose of conducting oil and natural gas acquisition, drilling and development operations and serving as co-general partner with Unit in any additional limited partnerships formed during that year. The Partnerships participated on a proportionate basis with Unit and Questa, respectively, in most drilling operations and most producing property acquisitions commenced by Unit or Questa for their own account during the period from the formation of the Partnerships through December 31 of each year. Unit repurchased the limited partner's interest in three of five Questa partnerships in the fourth quarter of 2000 and one of the Questa partnerships in the first quarter of 2001 and the four partnerships were dissolved. On December 31, 2002, Unit rolled up nine of the private limited partnerships and consolidated them into one partnership.

Amounts received in the years ended December 31 from both public and private Partnerships for which Unit and Questa are a general partner are as follows:

	2000		2001		2	002
(In thousands)						
Contract Drilling	\$	296	\$	416	\$	209
Well Supervision and Other Fees	\$	478	\$	498	\$	510
General and Administrative						
Expense Reimbursement	\$	192	\$	193	\$	210

Related party transactions for contract drilling and well supervision fees are the related party's share of such costs. These costs are billed to related parties on the same basis as billings to unrelated parties for such services. General and administrative reimbursements are both direct general and administrative expense incurred on the related party's behalf and indirect expenses allocated to the related parties. Such allocations are based on the related party's level of activity and are considered by management to be reasonable.

A subsidiary of Unit paid the Partnerships, for which Unit or a subsidiary is the general partner, \$6,000, \$3,000 and \$1,000 during the years ended December 31, 2000, 2001 and 2002, respectively, for purchases of natural gas production.

### NOTE 8 - SHAREHOLDER RIGHTS PLAN

Unit maintains a Shareholder Rights Plan (the "Plan") designed to deter coercive or unfair takeover tactics, to prevent a person or group from gaining control of Unit without offering fair value to all shareholders and to deter other abusive takeover tactics, which are not in the best interest of shareholders.

Under the terms of the Plan, each share of common stock is accompanied by one right, which given certain acquisition and business combination criteria, entitles the shareholder to purchase from Unit one one-hundredth of a newly issued share of Series A Participating

Cumulative Preferred Stock at a price subject to adjustment by Unit or to purchase from an acquiring company certain shares of its common stock or the surviving company's common stock at 50 percent of its value.

The rights become exercisable 10 days after Unit learns that an acquiring person (as defined in the Plan) has acquired 15 percent or more of the outstanding common stock of Unit or 10 business days after the commencement of a tender offer, which would result in a person owning 15 percent or more of such shares. Unit can redeem the rights for \$0.01 per right at any date prior to the earlier of (i) the close of business on the tenth day following the time Unit learns that a person has become an acquiring person or (ii) May 19, 2005 (the "Expiration Date"). The rights will expire on the Expiration Date, unless redeemed earlier by Unit.

### NOTE 9 - COMMITMENTS AND CONTINGENCIES

Unit leases office space under the terms of operating leases expiring through January 31, 2007. Future minimum rental payments under the terms of the leases are approximately \$663,000, \$647,000, \$192,000, \$151,000 and \$13,000 in 2003, 2004, 2005, 2006 and 2007, respectively. Total rent expense incurred by the Company was \$535,000, \$582,000 and \$678,000 in 2000, 2001 and 2002, respectively.

The Unit 1984 Oil and Gas Limited Partnership and the 1986 Energy Income Limited Partnership agreements along with the employee oil and gas limited partnerships require, upon the election of a limited partner, that Unit repurchase the limited partner's interest at amounts
to be determined by appraisal in the future. Such repurchases in any one year are limited to 20 percent of the units outstanding. Unit made
repurchases of \$14,000 and \$1,000 in 2000 and 2002, respectively, for such limited partners' interests. No repurchases were made in 2001.
Subsequent to the merger, in 2000, Unit also paid \$17,000 for additional interest in two of the Questa limited partnerships and \$1,980,000 for
all the remaining interest in three other Questa partnerships. In 2001, Unit paid \$15,000 for interests in two of the Questa limited partnerships
and subsequently dissolved one of the Questa partnerships.

Unit is a party to various legal proceedings arising in the ordinary course of its business none of which, in management's opinion, will result in judgments which would have a material adverse effect on Unit's financial position, operating results or cash flows.

### NOTE 10 - INDUSTRY SEGMENT INFORMATION

Unit has two business segments: Contract Drilling and Oil and Natural Gas, representing its two strategic business units offering different products and services. The Contract Drilling segment provides land contract drilling of oil and natural gas wells and the Oil and Natural Gas segment is engaged in the development, acquisition and production of oil and natural gas properties.

The accounting policies of the segments are the same as those described in the Summary of Significant Accounting Policies (Note 1). Management evaluates the performance of Unit's operating segments based on operating income, which is defined as operating revenues less operating expenses and depreciation, depletion and amortization. Unit has natural gas production in Canada, which is not significant.

	 2000		2001		2002	
(In thousands)			 			
Revenues:						
Contract drilling	\$	108,075	\$ 167,042	\$	118,173

Net income (2)	\$	2,642	\$	5,108	\$	3,708	\$	6,786
Earnings per common share:								
Basic (3)	\$	0.07	\$	0.14	\$	0.09	\$	0.16
Diluted (4)	\$	0.07	\$	0.14	\$	0.09	\$	0.16

<sup>(1)</sup> Gross Profit excludes other revenues, general and administrative expense and interest expense.

<sup>(2)</sup> The net income for the three months ended December 31, 2001 and 2002 includes a tax benefit of \$1.5 million and \$1.1 million, respectively, relating to an increase in the estimated amount of statutory depletion carryforward.

<sup>(3)</sup> Due to the effect of rounding basic earnings per share for the year's four quarters does not equal the annual earnings per share.

<sup>(4)</sup> Due to the effect of price changes of Unit' stock, diluted earnings per share for the year's four quarters, which includes the effect of potential dilutive common shares calculated during each quarter, does not equal the annual diluted earnings per share, which includes the effect of such potential dilutive common shares calculated for the entire year.

- 7	_,00 ,	,		J.,	_,,,,,	,	

Oil and natural gas reserves cannot be measured exactly. Estimates of oil and natural gas reserves require extensive judgments of reservoir engineering data and are generally less precise than other estimates made in connection with financial disclosures. Unit utilizes Ryder Scott Company, independent petroleum consultants, to review its reserves as prepared by its reservoir engineers.

Proved reserves are those quantities which, upon analysis of geological and engineering data, appear with reasonable certainty to be recoverable in the future from known oil and natural gas reservoirs under existing economic and operating conditions. Proved developed reserves are those reserves, which can be expected to be recovered through existing wells with existing equipment and operating methods. Proved undeveloped reserves are those reserves which are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required.

Estimates of oil and natural gas reserves require extensive judgments of reservoir engineering data as previously explained. Assigning monetary values to such estimates does not reduce the subjectivity and changing nature of such reserve estimates. Indeed the uncertainties inherent in the disclosure are compounded by applying additional estimates of the rates and timing of production and the costs that will be incurred in developing and producing the reserves. The information set forth herein is, therefore, subjective and, since judgments are involved, may not be comparable to estimates submitted by other oil and natural gas producers. In addition, since prices and costs do not remain static and no price or cost escalations or de-escalations have been considered, the results are not necessarily indicative of the estimated fair market value of estimated proved reserves nor of estimated future cash flows.

The standardized measure of discounted future net cash flows ("SMOG") was calculated using year-end prices and costs, and year-end statutory tax rates, adjusted for permanent differences, that relate to existing proved oil and natural gas reserves. SMOG as of December 31 is as follows (unaudited):

		USA	CANADA	TOTAL
(In thousands)				
2000:				
Future cash flows	\$	2,260,796	\$ 4,155	\$ 2,264,951

Unit's SMOG and changes therein were determined in accordance with Statement of Financial Accounting Standards No. 69. Certain information concerning the assumptions used in computing SMOG and their inherent limitations are discussed below. Management believes such information is essential for a proper understanding and assessment of the data presented.

The assumptions used to compute SMOG do not necessarily reflect management's expectations of actual revenues to be derived from those reserves nor their present worth. Assigning monetary values to the reserve quantity estimation process does not reduce the subjective and ever-changing nature of such reserve estimates. Additional subjectivity occurs when determining present values because the rate of producing the reserves must be estimated. In addition to errors inherent in predicting the future, variations from the expected production rate could result from factors outside of management's control, such as unintentional delays in development, environmental concerns or changes in prices or regulatory controls. Also, the reserve valuation assumes that all reserves will be disposed of by production. However, other factors such as the sale of reserves in place could affect the amount of cash eventually realized.

Future cash flows are computed by applying year-end spot prices of oil (\$29.70) and natural gas (\$4.42) relating to proved reserves to the year-end quantities of those reserves. Future price changes are considered only to the extent provided by contractual arrangements in existence at year-end.

Future production and development costs are computed by estimating the expenditures to be incurred in developing and producing the proved oil and natural gas reserves at the end of the year, based on continuation of existing economic conditions.

Future income tax expenses are computed by applying the appropriate year-end statutory tax rates to the future pretax net cash flows relating to proved oil and natural gas reserves less the tax basis of Unit's properties. The future income tax expenses also give effect to permanent differences and tax credits and allowances relating to Unit's proved oil and natural gas reserves.

Care should be exercised in the use and interpretation of the above data. As production occurs over the next several years, the results shown may be significantly different as changes in production performance, petroleum prices and costs are likely to occur.

### UNIT CORPORATION AND SUBSIDIARIES REPORT OF INDEPENDENT ACCOUNTANTS

THE SHAREHOLDERS AND BOARD OF DIRECTORS Unit Corporation

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, changes in shareholders' equity and cash flows present fairly in all material respects, the financial position of Unit Corporation and its subsidiaries at December 31, 2001 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

### CORPORATE INFORMATION

### Corporate Headquarters

Unit Corporation 1000 Kensington Tower 7130 South Lewis Tulsa, Oklahoma 74136 918-493-7700

### World Wide Web Address

http://www.unitcorp.com

### Transfer Agent and Registrar

Communications concerning the transfer of shares, lost certificates and changes of address should be directed to:

Transfer Agent/Registrar Mellon Investor Services, LLC 85 Challenger Road Ridgefield, NJ 07660

You may reach them by telephone at 800-851-9677 or via the Internet at http://www.melloninvestor.com.

### Stock Listing

Our common stock trades on the New York Stock Exchange under the symbol: "UNT." During 2002, 36.8 million shares of our stock were traded on the NYSE, compared with 43.8 million shares in 2001. Approximately 43.3 million shares were outstanding at the end of 2002.

### Shareholder Profile

We had 1,857 shareholders of record at year-end 2002.

#### Annual Meeting

Our annual meeting of stockholders will be held at 11:00 a.m. on May 7, 2003 in the Tulsa Room, formerly known as the Green Room, at the Bank of Oklahoma Tower, 9th floor, in Tulsa Oklahoma.

A more thorough discussion of forward-looking statements with the possible impact of some of these risks and uncertainties is provided in our Annual Report on Form 10-K filed with the Securities and Exchange Commission. We encourage you to obtain and read that document.

#### Investor Relations

The Form 10-K report is available in April. The Form 10-Q reports are available in May, August and November. The Form 10-K and Form 10-Q are available for viewing on our website at www.unitcorp.com.

Copies of the Forms 10-K, 10-Q and Annual Report, filed with the Securities and Exchange Commission, are available without charge upon written request to Linda Swanson, Investor Relations Department, 1000 Kensington Tower, 7130 South Lewis, Tulsa, Oklahoma 74136.

Telephone: 918-493-7700

### Forward Looking "Safe Harbor" Statements

Statements in this document, information included in, or incorporated by reference from, future filings by us with the Securities and Exchange Commission, as well as information contained in written material, press releases and oral statements issued by or on behalf of us, contain, or may contain, certain statements that may be deemed to be "forward-looking statements" within the meaning of federal securities laws. All statements, other than statements of historical facts, included in this document, which address activities, events or developments which we expect or anticipate will or may occur in the future are forward-looking statements. The words "believes," "intends," "expects," "anticipates," "projects," "estimates," "predicts" and similar expressions are also intended to identify forward-looking statements.

These forward-looking statements include, among others, such things as the amount and nature of future capital expenditures, the number of wells to be drilled or reworked, oil and natural gas prices and demand, exploration prospects, estimates of proved oil and natural gas reserves, reserve potential, development and infill drilling potential, drilling prospects, expansion and other development trends of the oil and natural gas industry, business strategy, production of oil and natural gas reserves, expansion and growth of our business and operations, and drilling rig utilization, revenues and costs.

These statments are based on certain assumptions and analysis made by us in light of our experience and our perception of historical trends, current conditions and expected future developments as well as other factors we believe are appropriate in the circumstances. However, whether actual results and developments will conform to our expectations and predictions is subject to a number of risks and uncertainties which could cause actual results to differ materially from our expectations, including the risk factors discussed in this document, general economic, market or business conditions, the nature or lack of business opportunities that may be presented to and pursued by us, demand for land drilling services, changes in laws or regulations, and other factors, most of which are beyond our control. We disclaim any obligation to update or revise any forward-looking statement to reflect events or circumstances occurring hereafter or to reflect the occurence of anticipated or unanticipated events.
