PROGRESS REPORT TO SHAREHOLDERS

To Our Shareholders

For the past 90 years, Guaranty Bond Bank, a subsidiary of Guaranty Bancshares, Inc. (GNTY), has focused on being not just a bank, but a premier financial services institution committed to the growth and prosperity of the communities served. The past ten years have seen steady growth without losing sight of our mission to position the Company in growing markets broadening our customer base and achieving diversity to build our level of profitability and return to shareholders.

With the recognition of over \$4.3 million in net income for 2002, Guaranty once again reported the strongest and most profitable year in the Company's history. The Company experienced a growth of 23.8% in stock value during 2002 moving from \$13 a share to \$16.09 a share at December 31, 2002. While many facets of the market experienced double-digit losses during the same time period, our commitment to strength and stability weathered the continued economic downturn. In a dwindling economy, the Company recorded an increase of 33.9% in earnings per share (basic) to \$1.46 while achieving a return on equity of 12.90% in 2002.

The most notable move of Guaranty Bond Bank during 2002 was the posting of an additional \$57.5 million in total assets, a growth of 12.48%, pushing the Bank over the half billion mark to \$516.8 million. Additionally, deposits grew \$43.5 million to \$427.2 million, a change of 11.35% while loans grew \$34.4 million to \$365.6 million.

Guaranty Bancshares, Inc. other subsidiaries include a full array of trust services through the Guaranty Bond Bank Trust Department, as well as, investment services through, BSC Securities, L.C., a regional brokerage firm equipped to handle virtually all investment needs. Also, Guaranty Bond Mortgage is a full service mortgage company meeting the needs of the fixed rate home loan through multiple agencies including the Veteran's Administration and FHA.

The Company has assembled a strong management team over the past decade committed to responding quickly and creatively to the changing financial needs of its customers. They are responsible for maintaining a strong and efficient infrastructure that will preserve the Company's financial strength and philosophy even through tough economic times and management transition. During 2002, there were significant management changes made by the board of directors to insure long-term continuity of the bank's administration. Art Scharlach moved to the position of Chairman of the Board and CEO of the Bank while Bill Jones will serve as the Bank's Vice Chairman. Ty Abston was promoted to President of the Bank, succeeding Mr. Scharlach. Kirk Lee relocated to Mount Pleasant to serve as Executive Vice President of the Bank. Additional management strength was added with the election of Jim Richmond as President - Paris location, succeeding Mr. Lee, and Travis Mauldin joining the team as President - Texarkana location. These moves, along with the support and guidance of Executive Vice President Mike Rhea and Executive Vice President/CFO Cappy Payne, insure a strong management team for the company into the future.

This annual report represents a pledge from the directors, officers and employees to always manage your company with integrity and commitment to the local markets we serve, while providing a fair return to our shareholders. This pledge stands strong as we continue growing our presence in each of our markets.

Thank you for your continued support as we strive toward the goal of being the strongest community bank in each of the markets we serve.

Ty Abston, Art Scharlach, Bill Jones and Cappy Payne

Art Scharlach *Bill B. Jones* *Ty Abston* *Cappy A. Payne*

EXECUTIVE MANAGEMENT

Kirk Lee, Mike Rhea, Cappy Payne, Ty Abston, Art Scharlach

Guaranty remains committed to guiding principles.

- Integrity.
- Trust.
- Consistency.
- Professionalism.
- Courage.

Our continued success is supported by a generation of new leaders who understand these values. Perhaps our most significant accomplishment is the successful preparation of a generation of bankers to guide our future.

LOCATION PRESIDENTS

Martin Bell, Sulphur Springs

Bob Clark, Commerce

Bruce T. Harwell, Pittsburg

New opportunities. New communities. Supported by bankers empowered to utilize their expertise, judgement and abilities.

Guaranty location presidents exercise flexibility in delivering products to fit the communities served. It adds up to a progressive style of leadership that utilizes our bankers' enthusiasm and talents.

Virgil Jones, Talco / Deport

LOCATION PRESIDENTS

Travis Mauldin, Texarkana

With over \$500 million in assets, Guaranty is represented by a responsive team of leaders with the authority to deliver products to their customers. Competing aggressively in every market provides opportunity for growth to our customers and our bank, leading to a bright and solid future for the local communities.

Bart Scharlach, Fort Stockton

Jim Richmond, Paris

Joe Rose, Bogata

SENIOR MANAGEMENT

Steve Bledsoe, Texarkana

Guaranty's senior vice presidents bring expertise and involvement, assuring continuity of management through their understanding of our philosophy.

Tanis Hager, Paris

Stan Garrett, Mt. Pleasant

Latrel McCallum, Mt. Pleasant

Chuck Capel, Mt. Pleasant

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and Shareholders
Guaranty Bancshares, Inc.
Mount Pleasant, Texas

We have audited the consolidated balance sheets of Guaranty Bancshares, Inc. (the Company) as of December 31, 2002 and 2001, and the related consolidated statements of earnings, changes in shareholders' equity and cash flows for the years then ended. Such consolidated financial statements and our report thereon dated January 10, 2003, expressing an unqualified opinion (which is not included herein), are included in the Annual Report on Form 10-K of Guaranty Bancshares, Inc. for the year ended December 31, 2002. The accompanying condensed consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on such condensed consolidated financial statements in relation to the complete consolidated financial statements. The consolidated financial statements as of and for the year ended December 31, 2000 were audited by Fisk & Robinson, P.C., who merged with McGladrey & Pullen, LLP as of October 1, 2001, and whose report dated February 8, 2001, expressed an unqualified opinion on those statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements of the Company as of and for the years ended December 31, 2002 and 2001, is fairly stated in all material respects in relation to the basic consolidated financial statements from which it has been derived.

SUMMARY FINANCIAL INFORMATION

The condensed presentation of operating results and selected financial data on the preceding pages is intended only as a convenient reference. The Company's 2002 Annual Report on Form 10-K includes, among other things, the audited consolidated financial statements and notes thereto, the independent auditor's report, and management's discussion and analysis of financial condition and results of operations. The Annual Report on Form 10-K also identifies important qualifications and risks, and the information herein should be read together with the Annual Report on Form 10-K for a complete understanding of the Company's financial position, results of operations, cash flows, and changes in shareholders' equity. A copy of the Annual Report on Form 10-K may be obtained by calling the Company.

As of June 28, 2002, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the shares of Common Stock held by non-affiliates, based on the closing price of the Common Stock on the Nasdaq National Market System on such date, was approximately \$20.7 million.

Documents Incorporated by Reference:

Portions of the Company's Proxy Statement relating to the 2003 Annual Meeting of Shareholders, which will be filed within 120 days after December 31, 2002, are incorporated by reference into Part III, Items 10-13 of this Form 10-K.

PART I

SPECIAL CAUTIONARY NOTICE REGARDING FORWARD-LOOKING INFORMATION

Statements and financial discussion and analysis contained in this Annual Report on Form 10-K that are not historical facts are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements describe the Company's future plans, strategies and expectations, are based on assumptions and involve a number of risks and uncertainties, many of which are beyond the Company's control. The important factors that could cause actual results to differ materially from the forward-looking statements include, without limitation:

- changes in interest rates and market prices, which could reduce the Company's net interest margins, asset valuations and expense expectations;
- changes in the levels of loan prepayments and the resulting effects on the value of the Company's loan portfolio;
- changes in local economic and business conditions which adversely affect the Company's customers and their ability to transact profitable business with the Company, including the ability of its borrowers to repay their loans according to their terms or a change in the value of the related collateral;
- increased competition for deposits and loans adversely affecting rates and terms;
- the timing, impact and other uncertainties of the Company's potential future acquisitions, including the Company's ability to identify suitable future acquisition candidates, the success or failure in the integration of their operations, and the Company's ability to enter new markets successfully and capitalize on growth opportunities;
- increased credit risk in the Company's assets and increased operating risk caused by a material change in commercial, consumer and/or real estate loans as a percentage of the total loan portfolio;
- the failure of assumptions underlying the establishment of and provisions made to the allowance for loan losses;
- changes in the availability of funds resulting in increased costs or reduced liquidity;
- changes in the Company's ability to pay dividends on its Common Stock;
- increased asset levels and changes in the composition of assets and the resulting impact on the Company's capital levels and regulatory capital ratios;
- the Company's ability to acquire, operate and maintain cost effective and efficient systems without incurring unexpectedly difficult or expensive but necessary technological changes;
- the loss of senior management or operating personnel and the potential inability to hire qualified personnel at reasonable compensation levels;
- the effects of the Internal Revenue Service's examination regarding the Company's leveraged leasing transactions;
- changes in economic and business conditions which would adversely affect the value of the Aircraft Finance Trust ("AFT"), and cause the Company to not fully realize its current investment in AFT; and

- changes in status of government regulations or their interpretations applicable to bank holding companies and the Company's present and future banking and other subsidiaries, including changes in tax requirements and tax rates.

All written or oral forward-looking statements attributable to the Company are expressly qualified in their entirety by these cautionary statements.

Item 1. Business

General

Guaranty Bancshares, Inc. (the "Company") was incorporated as a business corporation under the laws of the State of Texas in 1980 to serve as a holding company for Guaranty Bond Bank, formally known as Guaranty Bank, (the "Bank"), which was chartered in 1913, and for Talco State Bank, which was chartered in 1912 and merged into the Bank in 1997. The Company's headquarters are located at 100 West Arkansas, Mount Pleasant, Texas 75455, and its telephone number is (903) 572-9881.

The Company has grown through a combination of internal growth, the acquisition of community banks and the opening of new community banking offices. In 1992, the Company established its Deport, Texas location by acquiring certain assets and liabilities of the First National Bank of Deport (the "Deport Bank"). The Deport Bank also had a branch in Paris, Texas, which the Company acquired. To enhance its expansion into the Paris community, in 1994 the Company constructed a new facility to serve as its Paris location. In 2001, the Paris facility was expanded from approximately 5,400 square feet to approximately 9,700 square feet, again to service the expanded customer base. In 1993, the Company purchased a commercial bank in Bogata, Texas and in 1996 opened a second retail-service banking facility in Mount Pleasant. In 1997, the Company merged Talco State Bank into the Bank and opened a full-service location in Texarkana. Texarkana is the center of a trade area encompassing approximately 123,000 people. Management of the Company believes that this trade area provides opportunity for strong continued growth in loans and deposits. Texas Highway 59 (scheduled to become Interstate 69), which serves as the primary "NAFTA Highway" linking the interior United States and Mexico, is a main artery to Texarkana. The increased traffic along this NAFTA Highway is expected to enhance economic activity in this area and create more opportunities for growth. In 1998, the Company completed a new facility in Texarkana to enhance its expansion in the Texarkana market. In 1999, the Company opened a full-service location in Pittsburg, Texas, a community of approximately 4,500 people located 12 miles from Mount Pleasant. Also in 1999, the Company acquired the First American Financial Corporation, ("First American"), with locations in Sulphur Springs and Commerce, Texas. The Company also acquired First American's wholly owned mortgage company. In 2000, the operations of the mortgage subsidiary, which were being continued by the Company under the name Guaranty Mortgage Company, were merged into the Bank. Also in August 2000, the Company was granted approval by the Texas Department of Banking to open a loan production office in Fort Stockton, Texas, located in the western portion of Texas. In December of 2000, the Company was granted approval by the Banking Department to operate this facility as a full-service bank location. As of December 31, 2002, product offerings at the Fort Stockton location are limited to loans and time deposits.

The Company has developed a community-banking network, with most of its offices located in separate communities. Lending and investment activities are funded from a strong core deposit base consisting of approximately 39,000 deposit accounts as of December 31, 2002. Each of the Company's offices has the authority and flexibility to make pricing decisions within overall ranges developed by the Company as a form of quality control. Management of the Company believes that its responsiveness to local customers and ability to adjust deposit rates and price loans at each location gives it a distinct competitive advantage. Employees are committed to personal service and developing long-term customer relationships, and adequate staffing is provided at each location to ensure that customers' needs are well addressed. The Company provides economic incentives to its officers to develop additional business for the Company and to cross-sell additional products and services to existing customers.

The Company continues to look for additional expansion opportunities, either through acquisitions of existing financial institutions or by establishing de novo offices. The Company intends to consider various strategic

acquisitions of banks, banking assets or financial service entities related to banking in those areas that management believes would complement and help grow the Company's existing business. The Company is particularly optimistic about the growth potential in the Texarkana, Sulphur Springs, Paris, and Mount Pleasant market areas.

The national, regional and local economies have experienced a deterioration and should continue to do so, though at a slow pace. While the current deterioration will have a negative affect on the Bank's earnings and growth, management believes the Bank is well positioned to weather this event.

The Bank owns interests in five entities which complement the Company's business: (i) Guaranty Leasing Company ("Guaranty Leasing"), which finances equipment leases and has engaged in certain leveraged lease transactions; (ii) Guaranty Company, which owns real estate for future Bank expansion; (iii) GB Com, Inc., a nominee company; (iv) BSC Securities, L.C. ("BSC"), which provides brokerage services; and, (v) Independent Bank Services, L.C. ("IBS"), which performs compliance, loan review, internal audit and EDP audit functions. These entities are accounted for in the Bank's financial statements using the equity method of accounting and are included in other assets on the balance sheet.

Business

The Company's guiding strategy is to increase shareholder value by providing customers with individualized, responsive, quality service and to augment its existing market share. The Company's main objective is to increase loans and deposits through additional expansion opportunities in Texas, while stressing efficiency and maximizing profitability. In furtherance of this objective, the Company has employed the following operating strategies:

Focus On Community Banking. The Company has developed a reputation of being a premier provider of financial services to small and medium-sized businesses, professionals and individuals in Northeast Texas. Management believes the Company's reputation for providing personal, professional and dependable service is well established in communities located in this area. Each of the Company's full-service branch locations is administered by a local President with knowledge of the community and lending expertise in the specific industries found in the community, whether it is agriculture, manufacturing and commerce or professional services. Decisions regarding loans are made at each location in a timely manner.

Controlled Core Growth. In recent years, the Company has increased its market share in each of the communities in which it maintains a full-service banking facility. In its principal location of Mount Pleasant, the Company's market share of financial institution deposits based on the FDIC Deposit Market Share data as of June 30, 2002 is approximately 43.7%. Deposits at the Paris location grew 10.6% in 2001 and 15.4% in 2002. Deposits at the Commerce location grew 38.0% in 2001 and 27.9% in 2002. Deposits at the Pittsburg location, which opened in May 2000, grew \$2.9 million in 2001 and \$4.4 million in 2002 representing 10.0% of the market share in Camp County. Deposits at the Sulphur Springs location represent an approximate market share of 15.3%. The Company continues to grow in its Texarkana market with deposits increasing 19.5% to \$23.6 million at December 31, 2002. The Company is well known in its geographic area as a result of its longevity and reputation for service. The Company intends to grow by continuing to seek strategic acquisitions and branching opportunities.

Leadership Technology. The Company has embraced technological change as a way to remain competitive, manage operational costs associated with growth and offer superior products to its customers. Recent technological implementations include Internet Banking, electronic bill and note payment, document imaging, optical report archival high speed communication via T-1 lines, remote proof capture, electronic statement delivery, and an automated voice response system. Currently, the Company is evaluating several additional enhancements that will improve its ability to deliver information internally to improve productivity and externally to provide convenience and timeliness to its growing customer base. Such enhancements include upgrading the core processing system the Bank uses, and electronic account reconciliation and internal transfers. The Company has made significant investments in technology, and has become a technological leader in its market.

Offer Competitive Products. The Company recognizes its competition is not solely banks, but brokerage houses, insurance companies, credit unions and various other competitors, and that in order to thrive it must be competitive in the products that it offers. The Company offers a full range of commercial loan products, including term loans, lines of credit, fixed asset loans, real estate loans and working capital loans. The Company also offers

consumers a full range of personal loan products including automobile loans, home improvement loans, consumer loans and mortgage loans. The Company also has a wide variety of deposit products, including a Premier Money Market Account that pays a rate competitive with most brokerage investment accounts and has been very attractive to customers. This product, coupled with certificates of deposit, NOW accounts, savings accounts, Internet banking, free checking, debit cards and overdraft protection, gives the customer a full complement of deposit products at competitive rates.

Expand Revenue Sources. In order to provide service to its customers and to augment revenues, the Company offers brokerage services through BSC, a full-service brokerage company. BSC offers a complete array of investment options including stocks, bonds, mutual funds, financial and retirement planning, tax advantaged investments and asset allocations. BSC offers securities through Southwest Securities, a Texas-based independent clearing firm and is licensed and regulated through the National Association of Securities Dealers, the Securities and Exchange Commission and various state and federal banking authorities. The Company's Trust Department offers complete trust services, including estate administration and custody, trust and asset management services. Management believes that an aging affluent population will foster an increase in the need for professional estate administration services. The maturing of the baby boomer generation is creating a market for asset management services. The Trust Department is in a unique position since there is little competition for trust services in the Company's markets. Because of the Company's strong presence in its markets, management believes that banking relationships can be leveraged into growth for the Trust Department. Growth in trust assets and corresponding management fees will result from expanding estate administration, traditional trust services, asset management services and custodial services in the Company's markets.

Improve Operating Efficiencies. In order to control overhead expenses, the Company seeks to provide a full range of services as effectively as possible. Through BSC, the Company is able to provide its customers with full brokerage services without having to carry the entire cost itself due to a shared cost agreement with other banks. Similarly, the Company enjoys the compliance and loan review functions provided by IBS on a shared cost basis with a group of other banks participating in this arrangement. The Company has spent the last ten years and considerable revenue expanding its market and improving the delivery of its financial products, which has resulted in a higher than desired efficiency ratio. Beginning with the acquisition of the Deport Bank in 1992, the Company has added ten locations. As a result, it has taken longer for the Company to achieve the desired economies of scale, but with its growth rate, those economies are beginning to be realized and the efficiency ratio is expected to show declining trends in the future. The Company has the support staff and related fixed asset investments to accommodate additional growth and enjoy additional economies of scale.

Training. An effective training program is critical to the Bank's success. The rapid growth experienced by the Bank, changes in technology, changes in bank regulations, and staff development all contribute to the need for a strong training program. To this end, the Human Resources Manager has been charged with developing and implementing a more formalized training program. In addition, a new computerized training room was set up in the fourth quarter of 2002.

Competition

The banking business is highly competitive, and the profitability of the Company depends principally on the Company's ability to compete in the market areas in which its banking operations are located. The Company competes with other commercial banks, savings banks, savings and loan associations, credit unions, finance companies, mutual funds, insurance companies, brokerage and investment banking firms, asset-based non-bank lenders and certain other non-financial entities, including retail stores which may maintain their own credit programs and certain governmental organizations which may offer more favorable financing than the Company. The Company has been able to compete effectively with other financial institutions by emphasizing customer service, technology and local office decision-making, by establishing long-term customer relationships and building customer loyalty, and by providing products and services designed to address the specific needs of its customers. Competition from both financial and non-financial institutions is expected to continue.

Under the Gramm-Leach-Bliley Act, effective March 11, 2000, securities firms and insurance companies that elect to become financial holding companies may acquire banks and other financial institutions. See "**Supervision and Regulation – The Company**". The financial services industry is also likely to become even more competitive as further technological advances enable more companies to provide financial services. These

technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

Leveraged Lease Transactions

In a series of transactions in 1992, 1994 and 1995, Guaranty Leasing acquired limited partnership interests in three different partnerships (collectively, the "Partnerships" or individually, a "Partnership") engaged in the equipment leasing business. The investments were structured by TransCapital Corporation ("TransCapital") through various subsidiaries and controlled partnerships.

Generally, in each of the transactions the Partnership became the lessee of equipment from an equipment owner (pursuant to a sale and leaseback transaction) and the sublessor of the equipment to the equipment user. Each Partnership receives note payments from the equipment owner under a purchase money note given to purchase the equipment from that Partnership. The Partnership makes lease payments to the equipment owner pursuant to the master lease of the equipment. In most instances, payments under the purchase money note equals lease payments under the master lease. Rental payments from the equipment used under these equipment subleases were sold in advance subject to existing liens for purchase of the equipment.

The Partnership incurs a tax loss while the master lease/sublease structure is in place, primarily because deductions for rentals paid under the master lease exceed taxable interest income under the purchase money note. Consequently, Guaranty Leasing has reported tax losses as a result of its investments in the Partnerships, which were deductible by the Company. In November 1998, Guaranty Leasing was informed by the Internal Revenue Service (the "Service") that it has taken the position that certain losses taken by one of the three Partnerships during 1994, 1995 and 1996 of \$302,000, \$410,000 and \$447,000, respectively, would be disallowed. In October 2001, Guaranty Leasing was informed by the Service that it has taken the position that certain losses taken by that Partnership during 1997 of \$487,000 would also be disallowed. In September 2002, the Company received from the Service a Notice of Final Partnership Administrative Adjustment ("FPAA") disallowing these deductions. Based upon the advice of counsel, the Company believes that it has correctly reported these transactions for tax purposes and that it has obtained appropriate legal, accounting and appraisal opinions and authority to support its positions. However as of December 31, 2002, the Company has recorded and expensed the tax affect of the disallowed deductions. On February 3, 2003, the Company filed a petition to begin the process to litigate the matter in the United States District Court for the Eastern District of Texas. Any final determination with respect to the Partnership will be binding on the Company. Should the Service pursue an investigation of and ultimately disallow the related tax deductions taken during the remaining years of the above partnership as well as the other two partnerships, the Company will be required to recognize an additional maximum tax liability of approximately \$3.9 million plus possible penalty and interest. The Company is actively contesting the position of the Service in connection with this matter, and will take appropriate steps necessary to protect its legal position.

During the year ended December 31, 2000, Guaranty Leasing acquired for approximately \$2.8 million, a 2.5% ownership interest in an Aircraft Finance Trust ("AFT"), a special purpose business trust formed to acquire, finance, refinance, own, lease, sublease, sell and maintain aircraft. AFT was created by General Electric Capital Corporation, and is a financing transaction through which airlines lease aircraft. AFT is a business trust formed in 1999 under the laws of the state of Delaware, and it leases aircraft to airlines around the world. The senior notes issued to AFT are rated AA by Standard and Poors and the notes are secured by the cash flow from the aircraft leases. The notes mature in 2024.

During the fourth quarter of 2001, on belief that the Company's investment in AFT was impaired by declines in air travel and reduced demand for commercial aircraft, an impairment charge of \$1.5 million was recorded and the carrying amount of the investment was reduced to \$1.6 million. During the third quarter of 2001, AFT recorded an impairment charge of \$18.2 million related to two airplanes. In addition, management received indications the appraised value of AFT's fleet of airplanes had declined approximately 9% from their value the past year. Based on these factors, the limited marketability of the investment, the uncertainty surrounding the air transport industry and general economic conditions, management believed that the value of its investment in AFT was permanently impaired.

Employees

As of December 31, 2002, the Company had 200 full-time employees and 35 part-time employees, 83 of whom were officers of the Bank. All employees are non-union employees. The Company provides medical and hospitalization insurance to its full-time employees. The Company considers its relations with employees to be excellent.

Supervision and Regulation

The supervision and regulation of bank holding companies and their subsidiaries is intended primarily for the protection of depositors, the deposit insurance funds of the Federal Deposit Insurance Corporation ("FDIC") and the banking system as a whole, and not for the protection of the bank holding company shareholders or creditors. The banking agencies have broad enforcement power over bank holding companies and banks including the power to impose substantial fines and other penalties for violations of laws and regulations.

The following description summarizes some of the laws to which the Company and the Bank are subject. References herein to applicable statutes and regulations are brief summaries thereof, do not purport to be complete, and are qualified in their entirety by reference to such statutes and regulations.

The Company. The Company is a bank holding company registered under the Bank Holding Company Act of 1956, as amended (the "BHC Act"), and it is subject to supervision, regulation and examination by the Board of Governors of the Federal Reserve System ("Federal Reserve"). The BHC Act and other federal laws subject bank holding companies to particular restrictions on the types of activities in which they may engage, and to a range of supervisory requirements and activities, including regulatory enforcement actions for violations of laws and regulations.

Regulatory Restrictions on Dividends; Source of Strength. It is the policy of the Federal Reserve that bank holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiaries.

Under Federal Reserve policy, a bank holding company is expected to act as a source of financial strength to each of its banking subsidiaries and commit resources to their support. Such support may be required at times when, absent this Federal Reserve policy, a holding company may not be inclined to provide it. As discussed below, a bank holding company in certain circumstances could be required to guarantee the capital plan of an undercapitalized banking subsidiary.

In the event of a bank holding company's bankruptcy under Chapter 11 of the U.S. Bankruptcy Code, the trustee will be deemed to have assumed and is required to cure immediately any deficit under any commitment by the debtor holding company to any of the federal banking agencies to maintain the capital of an insured depository institution, and any claim for breach of such obligation will generally have priority over most other unsecured claims.

Financial Modernization. On October 26, 2001, President Bush signed the USA Patriot Act of 2001. Enacted in response to the terrorist attacks in New York, Pennsylvania and Washington, D.C. on September 11, 2001, the Patriot Act is intended to strengthen U.S. law enforcement's and the intelligence communities' ability to work cohesively to combat terrorism on a variety of fronts. The potential impact of the Act on financial institutions of all kinds is significant and wide ranging. The Act contains sweeping anti-money laundering and financial transparency laws and requires various regulations, including:

- due diligence requirements for financial institutions that administer, maintain or manage private bank accounts or correspondent accounts for non-U.S. persons;
- standards for verifying customer identification at account opening;

- rules to promote cooperation among financial institutions, regulators, and law enforcement entities in identifying parties that may be involved in terrorism or money laundering;
- reports by non-financial trades and businesses filed with the Treasury Department's Financial Crimes Enforcement Network for transactions exceeding \$10,000; and;
- filing of suspicious activities reports regarding securities by brokers and dealers if they believe a customer may be violating U.S. laws and regulations.

The Company is unable to predict the impact of such laws on its financial condition or results of operations at this time.

Under the Financial Services Modernization Act, federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to nonaffiliated third parties. Pursuant to the rules, financial institutions must provide:

- initial notices to customers about their privacy policies, describing the conditions under which they may disclose non-public personal information to nonaffiliated third parties and affiliates;
- annual notices of their privacy policies to current customers; and
- a reasonable method for customers to "opt out" of disclosures to nonaffiliated third parties.

These privacy provisions will affect how customer information is transmitted through diversified financial companies and conveyed to outside vendors. Management believes the privacy positions will not have a material adverse effect on the Company's financial condition or results of operations.

Safe and Sound Banking Practices. Bank holding companies are not permitted to engage in unsafe and unsound banking practices. The Federal Reserve's Regulation Y, for example, generally requires a holding company to give the Federal Reserve prior notice of any redemption or repurchase of its own equity securities, if the consideration to be paid, together with the consideration paid for any repurchases or redemptions in the preceding year, is equal to 10% or more of the company's consolidated net worth. The Federal Reserve may oppose the transaction if it believes that the transaction would constitute an unsafe or unsound practice or would violate any law or regulation. Depending upon the circumstances, the Federal Reserve could take the position that paying a dividend would constitute an unsafe or unsound banking practice.

The Federal Reserve has broad authority to prohibit activities of bank holding companies and their non-banking subsidiaries which represent unsafe and unsound banking practices or which constitute violations of laws or regulations, and can assess civil money penalties for certain activities conducted on a knowing and reckless basis, if those activities caused a substantial loss to a depository institution. The penalties can be as high as \$1.0 million for each day the activity continues.

Anti-Tying Restrictions. Bank holding companies and their affiliates are prohibited from tying the provision of certain services, such as extensions of credit, to other services offered by a holding company or its affiliates.

Capital Adequacy Requirements. The Federal Reserve has adopted a system using risk-based capital guidelines to evaluate the capital adequacy of bank holding companies. Under the guidelines, specific categories of assets are assigned different risk weights, based generally on the perceived credit risk of the asset. These risk weights are multiplied by corresponding asset balances to determine a "risk-weighted" asset base. The guidelines require a minimum total risk-based capital ratio of 8.0% (of which at least 4.0% is required to consist of Tier 1 capital elements). Total capital is the sum of Tier 1 and Tier 2 capital. As of December 31, 2002, the Company's ratio of Tier 1 capital to total risk-weighted assets was 12.06% and its ratio of total capital to total risk-weighted assets was 13.12%. See "Management's Discussion and Analysis of Financial Condition and Results of Operations".

In addition to the risk-based capital guidelines, the Federal Reserve uses a leverage ratio as an additional tool to evaluate the capital adequacy of bank holding companies. The leverage ratio is a company's Tier 1 capital divided by its average total consolidated assets. Certain highly rated bank holding companies may maintain a minimum leverage ratio of 3.0%, but other bank holding companies may be required to maintain a leverage ratio of up to 200 basis points above the regulatory minimum. As of December 31, 2002, the Company's leverage ratio was 8.62%.

The federal banking agencies' risk-based and leverage ratios are minimum supervisory ratios generally applicable to banking organizations that meet certain specified criteria, assuming that they have the highest regulatory rating. Banking organizations not meeting these criteria are expected to operate with capital positions well above the minimum ratios. The federal bank regulatory agencies may set capital requirements for a particular banking organization that are higher than the minimum ratios when circumstances warrant. Federal Reserve guidelines also provide that banking organizations experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels, without significant reliance on intangible assets.

Imposition of Liability for Undercapitalized Subsidiaries. Bank regulators are required to take "prompt corrective action" to resolve problems associated with insured depository institutions whose capital declines below certain levels. In the event an institution becomes "undercapitalized," it must submit a capital restoration plan. The capital restoration plan will not be accepted by the regulators unless each company having control of the undercapitalized institution guarantees the subsidiary's compliance with the capital restoration plan up to a certain specified amount. Any such guarantee from a depository institution's holding company is entitled to a priority of payment in bankruptcy.

The aggregate liability of the holding company of an undercapitalized bank is limited to the lesser of 5% of the institution's assets at the time it became undercapitalized or the amount necessary to cause the institution to be "adequately capitalized." The bank regulators have greater power in situations where an institution becomes "significantly" or "critically" undercapitalized or fails to submit a capital restoration plan. For example, a bank holding company controlling such an institution can be required to obtain prior Federal Reserve approval of proposed dividends, or might be required to consent to a consolidation or to divest the troubled institution or other affiliates.

Acquisitions by Bank Holding Companies. The BHC Act requires every bank holding company to obtain the prior approval of the Federal Reserve before it may acquire all or substantially all of the assets of any bank, or ownership or control of any voting shares of any bank, if after such acquisition it would own or control, directly or indirectly, more than 5% of the voting shares of such bank. In approving bank acquisitions by bank holding companies, the Federal Reserve is required to consider the financial and managerial resources and future prospects of the bank holding company and the banks concerned, the convenience and needs of the communities to be served, and various competitive factors.

Control Acquisitions. The Change in Bank Control Act prohibits a person or group of persons from acquiring "control" of a bank holding company unless the Federal Reserve has been notified and has not objected to the transaction. Under a rebuttable presumption established by the Federal Reserve, the acquisition of 10% or more of a class of voting stock of a bank holding company with a class of securities registered under Section 12 of the Exchange Act, such as the Company, would, under the circumstances set forth in the presumption, constitute acquisition of control of the Company.

In addition, any company is required to obtain the approval of the Federal Reserve under the BHC Act before acquiring 25% (5% in the case of an acquirer that is a bank holding company) or more of the outstanding Common Stock of the Company, or otherwise obtaining control or a "controlling influence" over the Company.

The Bank. The Bank is a Texas-chartered banking association, the deposits of which are insured by the Bank Insurance Fund ("BIF") of the FDIC. The Bank is not a member of the Federal Reserve System; therefore, the Bank is subject to supervision and regulation by the FDIC and the Texas Department of Banking ("TDB"). Such supervision and regulation subjects the Bank to special restrictions, requirements, potential enforcement actions and periodic examination by the FDIC and the TDB. Because the Federal Reserve regulates the bank holding company parent of the Bank, the Federal Reserve also has supervisory authority, which directly affects the Bank.

Equivalence to National Bank Powers. The Texas Constitution, as amended in 1986, provides that a Texas-chartered bank has the same rights and privileges that are or may be granted to national banks domiciled in Texas. To the extent that the Texas laws and regulations may have allowed state-chartered banks to engage in a broader range of activities than national banks, the FDICIA has operated to limit this authority. FDICIA provides that no state bank or subsidiary thereof may engage as principal in any activity not permitted for national banks, unless the institution complies with applicable capital requirements and the FDIC determines that the activity poses no significant risk to the insurance fund. In general, statutory restrictions on the activities of banks are aimed at protecting the safety and soundness of depository institutions.

Financial Modernization. Under the Gramm-Leach-Bliley Act, a national bank may establish a financial subsidiary and engage, subject to limitations on investment, in activities that are financial in nature, other than insurance underwriting as principal, insurance company portfolio investment, real estate development, real estate investment and annuity issuance. To do so, a bank must be well capitalized, well managed and have a CRA rating of satisfactory or better. Subsidiary banks of a financial holding company or national banks with financial subsidiaries must remain well capitalized and well managed in order to continue to engage in activities that are financial in nature without regulatory actions or restrictions, which could include divestiture of the financial subsidiary or subsidiaries. In addition, a financial holding company or a bank may not acquire a company that is engaged in activities that are financial in nature unless each of the subsidiary banks of the financial holding company or the bank has a CRA rating of satisfactory or better.

Although the powers of state-chartered banks with respect to engaging in financial activities are not specifically addressed in the Gramm-Leach-Bliley Act, state banks, such as the Bank, will have the same if not greater powers as national banks through the parity provision contained in the Texas Constitution.

Branching. Texas law provides that a Texas-chartered bank can establish a branch anywhere in Texas provided that the branch is approved in advance by the TDB. The branch must also be approved by the FDIC, which considers a number of factors, including financial history, capital adequacy, earnings prospects, character of management, needs of the community and consistency with corporate powers.

Restrictions on Transactions With Affiliates and Insiders. Transactions between the Bank and its nonbanking affiliates, including the Company, are subject to Section 23A of the Federal Reserve Act. In general, Section 23A imposes limits on the amount of such transactions, and also requires certain levels of collateral for loans to affiliated parties. It also limits the amount of advances to third parties, which are collateralized by the securities or obligations of the Company or its subsidiaries.

Affiliate transactions are also subject to Section 23B of the Federal Reserve Act which generally requires that certain transactions between the Bank and its affiliates be on terms substantially the same, or at least as favorable to the Bank, as those prevailing at the time for comparable transactions with or involving other nonaffiliated persons.

The restrictions on loans to directors, executive officers, principal shareholders and their related interests (collectively referred to herein as "insiders") contained in the Federal Reserve Act and Regulation O apply to all insured institutions and their subsidiaries and holding companies. These restrictions include limits on loans to one borrower and conditions that must be met before such a loan can be made. There is also an aggregate limitation on all loans to insiders and their related interests. These loans cannot exceed the institution's total unimpaired capital and surplus, and the FDIC may determine that a lesser amount is appropriate. Insiders are subject to enforcement actions for knowingly accepting loans in violation of applicable restrictions.

Restrictions on Distribution of Subsidiary Bank Dividends and Assets. Dividends paid by the Bank have provided a substantial part of the Company's operating funds and it is anticipated that dividends paid by the Bank to the Company will continue to be the Company's principal source of operating funds. Capital adequacy requirements serve to limit the amount of dividends that may be paid by the Bank. Under federal law, the Bank cannot pay a dividend if, after paying the dividend, the Bank will be "undercapitalized." The FDIC may declare a dividend payment to be unsafe and unsound even though the Bank would continue to meet its capital requirements after the dividend.

Because the Company is a legal entity separate and distinct from its subsidiaries, its right to participate in the distribution of assets of any subsidiary upon the subsidiary's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors. In the event of a liquidation or other resolution of an insured depository institution, the claims of depositors and other general or subordinated creditors are entitled to a priority of payment over the claims of holders of any obligation of the institution to its shareholders, including any depository institution holding company (such as the Company) or any shareholder or creditor thereof.

Examinations. The FDIC periodically examines and evaluates insured banks. Based upon such an evaluation, the FDIC may revalue the assets of the institution and require that it establish specific reserves to compensate for the difference between the FDIC-determined value and the book value of such assets. The TDB also conducts examinations of state banks but may accept the results of a federal examination in lieu of conducting an independent examination.

Audit Reports. Insured institutions with total assets of \$500 million or more must submit annual audit reports prepared by independent auditors to federal and state regulators. In some instances, the audit report of the institution's holding company can be used to satisfy this requirement. Auditors must receive examination reports, supervisory agreements and reports of enforcement actions. In addition, financial statements prepared in accordance with generally accepted accounting principles in the United States of America, management's certifications concerning responsibility for the financial statements, internal controls and compliance with legal requirements designated by the FDIC, and an attestation by the auditor regarding the statements of management relating to the internal controls must be submitted. For institutions with total assets of more than \$3 billion, independent auditors may be required to review quarterly financial statements. FDICIA requires that independent audit committees be formed, consisting of outside directors only. The committees of such institutions must include members with experience in banking or financial management, must have access to outside counsel, and must not include representatives of large customers.

Capital Adequacy Requirements. The FDIC has adopted regulations establishing minimum requirements for the capital adequacy of insured institutions. The FDIC may establish higher minimum requirements if, for example, a bank has previously received special attention or has a high susceptibility to interest rate risk.

The FDIC's risk-based capital guidelines generally require state banks to have a minimum ratio of Tier 1 capital to total risk-weighted assets of 4.0% and a ratio of total capital to total risk-weighted assets of 8.0%. The capital categories have the same definitions for the Bank as for the Company. As of December 31, 2002, the Bank's ratio of Tier 1 capital to total risk-weighted assets was 11.17% and its ratio of total capital to total risk-weighted assets was 12.21%. See "**Management's Discussion and Analysis of Financial Condition and Results of Operations**".

The FDIC's leverage guidelines require state banks to maintain Tier 1 capital of no less than 5.0% of average total assets, except in the case of certain highly rated banks for which the requirement is 3.0% of average total assets. The TDB has issued a policy, which generally requires state chartered banks to maintain a leverage ratio (defined in accordance with federal capital guidelines) of 6.0%. As of December 31, 2002, the Bank's ratio of Tier 1 capital to average total assets (leverage ratio) was 8.08%. See "**Management's Discussion and Analysis of Financial Condition and Results of Operations**".

Corrective Measures for Capital Deficiencies. The federal banking regulators are required to take "prompt corrective action" with respect to capital-deficient institutions. Agency regulations define, for each capital category, the levels at which institutions are "well capitalized," "adequately capitalized," "under capitalized," "significantly under capitalized" and "critically under capitalized." A "well capitalized" bank has a total risk based capital ratio of 10.0% or higher; a Tier 1 risk based capital ratio of 6.0% or higher; a leverage ratio of 5.0% or higher; and is not subject to any written agreement, order or directive requiring it to maintain a specific capital level for any capital measure. An "adequately capitalized" bank has a total risk based capital ratio of 8.0% or higher; a Tier 1 risk based capital ratio of 4.0% or higher; a leverage ratio of 4.0% or higher (3.0% or higher if the bank was rated a composite 1 in its most recent examination report and is not experiencing significant growth); and does not meet the criteria for a well capitalized bank. A bank is "under capitalized" if it fails to meet any one of the ratios required to be adequately capitalized.

In addition to requiring undercapitalized institutions to submit a capital restoration plan, agency regulations contain broad restrictions on certain activities of undercapitalized institutions including asset growth, acquisitions, branch establishment, and expansion into new lines of business. With certain exceptions, an insured depository institution is prohibited from making capital distributions, including dividends, and is prohibited from paying management fees to control persons if the institution would be undercapitalized after any such distribution or payment.

As an institution's capital decreases, the FDIC's enforcement powers become more severe. A significantly undercapitalized institution is subject to mandated capital raising activities, restrictions on interest rates paid and transactions with affiliates, removal of management, and other restrictions. The FDIC has only very limited discretion in dealing with a critically undercapitalized institution and is virtually required to appoint a receiver or conservator.

Banks with risk-based capital and leverage ratios below the required minimums may also be subject to certain administrative actions, including the termination of deposit insurance upon notice and hearing, or a temporary suspension of insurance without a hearing in the event the institution has no tangible capital.

Management believes that the Company meets all capital adequacy requirements to which it is subject at December 31, 2002. The Bank's capital ratios exceeded the minimum requirements for "well capitalized" institutions under the regulatory framework for prompt corrective action at December 31, 2002. As a result, the Company does not believe that FDICIA's prompt corrective action regulations will have any material effect on the activities or operations of the Bank. It should be noted, however, that a bank's capital category is determined solely for the purpose of applying the FDIC's "prompt corrective action" regulations and that the capital category may not constitute an accurate representation of the Bank's overall financial condition or prospects.

Deposit Insurance Assessments. The Bank must pay assessments to the FDIC for federal deposit insurance protection. The FDIC has adopted a risk-based assessment system as required by FDICIA. Under this system, FDIC-insured depository institutions pay insurance premiums at rates based on their risk classification. Institutions assigned to higher-risk classifications (that is, institutions that pose a greater risk of loss to their respective deposit insurance funds) pay assessments at higher rates than institutions that pose a lower risk. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to the regulators. In addition, the FDIC can impose special assessments in certain instances. The current range of BIF assessments is between 0% and 0.27% of deposits.

The FDIC established a process for raising or lowering all rates for insured institutions semi-annually if conditions warrant a change. Under this new system, the FDIC has the flexibility to adjust the assessment rate schedule twice a year without seeking prior public comment, but only within a range of five cents per \$100 above or below the premium schedule adopted. Changes in the rate schedule outside the five-cent range above or below the current schedule can be made by the FDIC only after a full rulemaking with opportunity for public comment.

On September 30, 1996, President Clinton signed into law an act that contained a comprehensive approach to recapitalize the Savings Association Insurance Fund ("SAIF") and assure the payment of the Financing Corporation's ("FICO") bond obligations. Under this new act, banks insured under the BIF are required to pay a portion of the interest due on bonds that were issued by FICO to help shore up the ailing Federal Savings and Loan Insurance Corporation in 1987. The FDIC also applies an assessment against BIF-assessable deposits to be paid to the Financing Corporation ("FICO") to assist in paying interest of FICO bonds, which financed the resolution of the thrift industry crisis. The FICO assessment on BIF-insured deposits was approximately 1.70 basis points for the fourth quarter 2002. The FICO assessment rate is adjusted quarterly.

Enforcement Powers. The FDIC and the other federal banking agencies have broad enforcement powers, including the power to terminate deposit insurance, impose substantial fines and other civil and criminal penalties and appoint a conservator or receiver. Failure to comply with applicable laws, regulations and supervisory agreements could subject the Company or its banking subsidiaries, as well as officers, directors and other institution-affiliated parties of these organizations, to administrative sanctions and potentially substantial civil money penalties. The appropriate federal banking agency may appoint the FDIC as conservator or receiver for a banking institution (or the FDIC may appoint itself, under certain circumstances) if any one or more of a number of circumstances exist,

including, without limitation, the fact that the banking institution is undercapitalized and has no reasonable prospect of becoming adequately capitalized; fails to become adequately capitalized when required to do so; fails to submit a timely and acceptable capital restoration plan; or materially fails to implement an accepted capital restoration plan. The TDB also has broad enforcement powers over the Bank, including the power to impose orders, remove officers and directors, impose fines and appoint supervisors and conservators.

Brokered Deposit Restrictions. Adequately capitalized institutions cannot accept, renew or roll over brokered deposits except with a waiver from the FDIC, and are subject to restrictions on the interest rates that can be paid on such deposits. Undercapitalized institutions may not accept, renew or roll over brokered deposits.

Cross-Guarantee Provisions. The Financial Institutions Reform, Recovery and Enforcement Act of 1989 ("FIRREA") contains a "cross-guarantee" provision which generally makes commonly controlled insured depository institutions liable to the FDIC for any losses incurred in connection with the failure of a commonly controlled depository institution.

Community Reinvestment Act. The CRA and the regulations issued thereunder are intended to encourage banks to help meet the credit needs of their service area, including low and moderate income neighborhoods, consistent with the safe and sound operations of the banks. These regulations also provide for regulatory assessment of a bank's record in meeting the needs of its service area when considering applications to establish branches, merger applications and applications to acquire the assets and assume the liabilities of another bank. FIRREA requires federal banking agencies to make public a rating of a bank's performance under the CRA. In the case of a bank holding company, the CRA performance record of the banks involved in the transaction are reviewed in connection with the filing of an application to acquire ownership or control of shares or assets of a bank or to merge with any other bank holding company. An unsatisfactory record can substantially delay or block the transaction.

Consumer Laws and Regulations. In addition to the laws and regulations discussed herein, the Bank is also subject to certain consumer laws and regulations that are designed to protect consumers in transactions with banks. While the list set forth herein is not exhaustive, these laws and regulations include the Truth in Lending Act, the Truth in Savings Act, the Electronic Funds Transfer Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act, and the Fair Housing Act, among others. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits or making loans to such customers. The Bank must comply with the applicable provisions of these consumer protection laws and regulations as part of their ongoing customer relations.

Instability of Regulatory Structure. Various legislation, such as the Gramm-Leach-Bliley Act, which expanded the powers of banking institutions and bank holding companies, and proposals to overhaul the bank regulatory system and limit the investments that a depository institution may make with insured funds, is from time to time introduced in Congress. Such legislation may change banking statutes and the operating environment of the Company and the Bank in substantial and unpredictable ways. The Company cannot determine the ultimate effect that the Gramm-Leach-Bliley Act will have or the effect that potential legislation, if enacted, or implementing regulations with respect thereto, would have, upon the financial condition or results of operations of the Company or its subsidiaries.

Expanding Enforcement Authority. One of the major additional burdens imposed on the banking industry by FDICIA is the increased ability of banking regulators to monitor the activities of banks and their holding companies. In addition, the Federal Reserve and FDIC possess extensive authority to police unsafe or unsound practices and violations of applicable laws and regulations by depository institutions and their holding companies. For example, the FDIC may terminate the deposit insurance of any institution, which it determines has engaged in an unsafe or unsound practice. The agencies can also assess civil money penalties, issue cease and desist or removal orders, seek injunctions, and publicly disclose such actions. FDICIA, FIRREA and other laws have expanded the agencies' authority in recent years, and the agencies have not yet fully tested the limits of their powers.

Effect on Economic Environment. The policies of regulatory authorities, including the monetary policy of the Federal Reserve, have a significant effect on the operating results of bank holding companies and their subsidiaries. Among the means available to the Federal Reserve to affect the money supply are open market operations in U.S. Government securities, changes in the discount rate on member bank borrowings, and changes in

reserve requirements against member bank deposits. These means are used in varying combinations to influence overall growth and distribution of bank loans, investments and deposits, and their use may affect interest rates charged on loans or paid for deposits.

Federal Reserve monetary policies have materially affected the operating results of commercial banks in the past and are expected to continue to do so in the future. The nature of future monetary policies and the effect of such policies on the business and earnings of the Company and the Bank cannot be predicted.

Item 2. *Properties*

The Company conducts business at eleven banking locations, with two located in Mount Pleasant, eight located in the Northeast Texas communities of Bogata, Commerce, Deport, Paris, Pittsburg, Sulphur Springs, Talco, Texarkana and one located in the West Texas community of Fort Stockton. The Company's headquarters are located at 100 West Arkansas in Mount Pleasant in a two-story office building. The Company owns all of its locations and considers the properties to be suitable and adequate for the Company's present needs. The following table sets forth specific information on each of the Company's locations:

<u>Location</u>	<u>Address</u>	<u>Deposits at December 31, 2002</u>
		(Dollars in thousands)
Bogata	110 Halesboro Street, Bogata, Texas 75417	\$ 14,596
Commerce	1108 Park Street, Commerce, Texas 75429	30,171
Deport	111 Main Street, Deport, Texas 75435	15,647
Fort Stockton	#1 Spring Drive, Fort Stockton, Texas 75435	967 ⁽¹⁾
Mount Pleasant-Downtown	100 West Arkansas, Mount Pleasant, Texas 75455	160,733
Mount Pleasant-South	2317 South Jefferson, Mount Pleasant, Texas 75455	5,420
Paris	3250 Lamar Avenue, Paris, Texas 75460	73,942
Pittsburg	116 South Greer Blvd., Pittsburg, Texas 75686	21,387
Sulphur Springs	919 Gilmer Street, Sulphur Springs, Texas 75482	64,202
Talco	104 Broad Street, Talco, Texas 75487	14,284
Texarkana	2202 St. Michael Drive, Texarkana, Texas 75503	23,601

⁽¹⁾ Location offers loans and time deposits only.

Item 3. *Legal Proceedings*

The Company faces ordinary routine litigation arising in the normal course of business. In the opinion of management, liabilities (if any) arising from such claims will not have a material adverse effect upon the business, results of operations or financial condition of the Company.

In March 2000, the Company filed an action in the District Court of Titus County, Texas against Guaranty Federal Bank, F.S.B., ("Guaranty Federal") a thrift institution, after the Company discovered that Guaranty Federal was using the name, "Guaranty Bank", in its business dealings. The case sought a declaratory judgment that the Company has the sole right to the name "Guaranty Bank". In November 2001, a settlement was reached. In exchange for \$3.0 million, the Company dropped the lawsuit against Guaranty Federal and the Company agreed to change its name by December 31, 2002. At December 31, 2001, the financial statements of the Company reflect the effect of this settlement. In October 2002, the Bank officially changed its name to Guaranty Bond Bank.

In November 1998, Guaranty Leasing was informed by the Internal Revenue Service (the "Service") that it has taken the position that certain losses taken by one of the three Partnerships during 1994, 1995 and 1996 of \$302,000, \$410,000 and \$447,000, respectively, would be disallowed. In October 2001, Guaranty Leasing was informed by the Service that it has taken the position that certain losses taken by that Partnership during 1997 of \$487,000 would also be disallowed. In September 2002, the Company received from the Service a Notice of Final Partnership Administrative Adjustment ("FPAA") disallowing these deductions. Based upon the advice of counsel, the Company believes that it has correctly reported these transactions for tax purposes and that it has obtained appropriate legal, accounting and appraisal opinions and authority to support its positions. However as of December 31, 2002, the Company has recorded and expensed the tax affect of the disallowed deductions. On February 3, 2003, the Company filed a petition to begin the process to litigate the matter in the United States District Court for the Eastern District of Texas. Any final determination with respect to the Partnership will be binding on the Company. Should the Service pursue an investigation of and ultimately disallow the related tax deductions taken during the remaining years of the above partnership as well as the other two partnership, the Company will be required to recognize an additional maximum tax liability of approximately \$3.9 million plus possible penalty and interest. The Company is actively contesting the position of the Service in connection with this matter, and will take appropriate steps necessary to protect its legal position.

Item 4. *Submission of Matters to a Vote of Security Holders*

No matters were submitted to a vote of security holders during the fourth quarter of 2002.

PART II

Item 5. *Market for Registrant's Common Equity and Related Shareholder Matters*

The Common Stock began trading on May 21, 1998 and is listed on the Nasdaq National Market System ("Nasdaq NMS") under the symbol "GNTY". Prior to that date, the Company's Common Stock was privately held and not listed on any public exchange or actively traded. The Company had a total of 2,931,928 shares outstanding at December 31, 2002. As of December 31, 2002, there were 366 registered shareholders of record. The number of beneficial shareholders is unknown to the Company at this time.

The following table presents the high and low Common Stock prices reported on the Nasdaq NMS by quarter during the two years ended December 31, 2002:

	2002		2001	
	High	Low	High	Low
Fourth quarter	\$ 16.25	\$ 14.00	\$ 14.10	\$ 11.01
Third quarter	15.00	13.07	14.10	11.05
Second quarter	15.15	13.00	11.25	10.75
First quarter	13.25	12.26	11.19	10.25

Holders of Common Stock are entitled to receive dividends when, as and if declared by the Company's Board of Directors out of funds legally available therefore. While the Company has declared dividends on its Common Stock since 1980, and paid semi-annual dividends aggregating \$0.32 per share per annum in 2002, there is no assurance that the Company will continue to pay dividends in the future.

The principal source of cash revenues to the Company is dividends paid by the Bank with respect to the Bank's capital stock. There are certain restrictions on the payment of such dividends imposed by federal and state banking laws, regulations and authorities. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Supervision and Regulation - "The Bank".

The cash dividends paid per share by quarter were as follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Fourth quarter	\$ 0.17	\$0.15	\$ 0.13
Third quarter	-	-	-
Second quarter	0.15	0.13	0.12
First quarter	-	-	-

Securities Authorized for Issuance Under Equity Compensation Plans

The Company currently has stock options outstanding. The options were granted under the Company's 1998 Stock Incentive Plan which was approved by the Company's shareholders. The following table provides information as of December 31, 2002 regarding the Company's equity compensation plans under which the Company's equity securities are authorized for issuance:

<u>EQUITY COMPENSATION PLAN INFORMATION</u>			
<u>(a)</u>	<u>(b)</u>	<u>(c)</u>	
<u>Plan category</u>	<u>Number of securities to be issued upon exercise of outstanding options warrants and rights</u>	<u>Weight-average exercise price of outstanding options</u>	<u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))</u>
Equity compensation plans approved by security holders	104,500	\$ 9.91	893,500
Equity compensation plans not approved by security holders	-	-	-
Total	<u>104,500</u>	<u>\$ 9.91</u>	<u>893,500</u>

Item 6. Selected Financial Data

SELECTED CONSOLIDATED FINANCIAL DATA OF THE COMPANY

The following selected consolidated financial data should be read in conjunction with the Consolidated Financial Statements of the Company and the notes thereto, appearing elsewhere in this Annual Report on Form 10-K, and the information contained in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations."

The following table presents selected historical consolidated financial data as of and for the five years ended December 31, 2002 and are derived from the Company's Consolidated Financial Statements, which have been audited by independent certified public accountants.

	As of and for the Years Ended December 31				
	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>	<u>1998</u>
	(Dollars in thousands, except per share data)				
Income Statement Data:					
Interest income	\$ 28,955	\$ 29,861	\$ 29,017	\$ 21,568	\$ 18,368
Interest expense	12,272	16,363	16,742	10,506	8,951
Net interest income	16,683	13,498	12,275	11,062	9,417
Provision for loan losses	1,260	1,385	595	310	540
Net interest income after provision for loan losses	15,423	12,113	11,680	10,752	8,877
Noninterest income	5,056	6,201	3,723	3,374	2,826

Performance Ratios:					
Return on average assets	0.89%	0.76%	0.64%	1.01%	1.05%
Return on average common equity	12.90	10.74	8.87	12.01	12.34
Net interest margin	3.73	3.46	3.44	3.93	4.07
Efficiency ratio ⁽³⁾	68.79	70.10	75.72	71.12	69.33
Asset Quality Ratios⁽⁴⁾:					
Nonperforming assets to total loans and other real estate	1.18%	1.87%	1.73%	0.43%	0.67%
Net loan charge-offs to average loans	0.27	0.20	0.19	0.08	0.09
Allowance for loan losses to total loans	1.01	1.01	0.90	0.98	0.81
Allowance for loan losses to nonperforming loans ⁽⁵⁾	114.87	59.23	54.83	244.94	130.80
Capital Ratios ⁽⁴⁾:					
Leverage ratio	8.62%	8.44%	8.60%	8.21%	9.30%
Average shareholders' equity to average total assets	6.92	7.09	7.17	8.40	8.59
Tier 1 risk-based capital ratio	12.06	11.52	11.79	9.86	12.29
Total risk-based capital ratio	13.12	12.58	12.69	10.83	13.08

⁽¹⁾ Adjusted for a seven for one stock split effective March 24, 1998.

⁽²⁾ Net earnings per share are based upon the weighted average number of common shares outstanding during the period.

⁽³⁾ Calculated by dividing total noninterest expenses by net interest income plus noninterest income, excluding securities losses or gains.

⁽⁴⁾ At period end, except net loan charge-offs to average loans, and average shareholders' equity to average total assets which is for periods ended at such date.

⁽⁵⁾ Nonperforming loans consist of nonaccrual loans, loans contractually past due 90 days or more and restructured loans.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Certain statements in this Annual Report on Form 10-K include forward-looking information within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to the "safe harbor" created by those sections. These forward-looking statements involve certain risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. Such risks and uncertainties include, but are not limited to, the factors listed under "Special Cautionary Notice Regarding Forward Looking Information," included on page 3 of this report and those described in this discussion and analysis. Management's Discussion and Analysis of Financial Condition and Results of Operations analyzes the major elements of the Company's balance sheets and statements of earnings. This section should be read in conjunction with the Company's Consolidated Financial Statements and accompanying notes and other detailed information appearing elsewhere in this Annual Report on Form 10-K.

Application of Critical Accounting Policies And Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. While the Company bases its estimates on historical experience, current information and other factors deemed to be relevant, actual results could differ from those estimates.

The Company considers accounting estimates to be critical to its reported financial results if (i) the accounting estimate requires management to make assumptions about matters that are highly uncertain and (ii) different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on the Company's financial statements. Accounting policies related to allowance for loan losses and loss contingencies are considered to be critical as these policies involve considerable subjective judgment and estimation by management.

Critical accounting policies, and the Company's procedures related to these policies, are described in detail below. Also see Note 1 – Summary of Significant Accounting Policies in the accompanying Notes to Consolidated Financial Statements.

Allowance for Loan Losses. The allowance for loan losses is a reserve established through a provision for loan losses charged to expense and represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in management's judgment, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. In estimating the allowance for loan losses, management considers historical charge-off experience, loan delinquencies, the credit worthiness of individual customers, economic conditions affecting specific customer industries and general economic conditions, among other factors. Should any of these factors change, the Company's estimate of probable loan losses could also change, which could affect the level of the future provisions for loan losses. See additional discussion under the sections captioned, "Allowance for Loan Losses" and "Provision for Loan Losses," included elsewhere in this Management's Discussion and Analysis of Financial Condition and Results of Operations. Also see Note 3 – Loans and Allowance for Loan Losses in the accompanying Notes to Consolidated Financial Statements.

Loss Contingencies. There are times when non-recurring events occur that require management to consider whether an accrual for a loss contingency is appropriate. Accruals for such loss contingencies typically relate to legal proceedings and other claims and are recorded when management believes the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. Contingent liabilities are often resolved over long time periods. Estimating probable losses requires analysis of multiple forecasts that often depend on judgments about potential actions by third parties. While there can be no assurance, the Company currently believes the outcome of current outstanding legal proceedings will not have a material adverse effect on the Company's business, financial condition or results of operations. The outcomes are inherently uncertain, and it is possible that some of these matters may be resolved materially adversely to the Company. The adverse resolution of any one or

more of these matters could have a material adverse effect on the Company's financial condition or results of operations.

Overview

Net earnings available to common shareholders were \$4.4 million, \$3.3 million and \$2.5 million for the years ended December 31, 2002, 2001 and 2000, respectively, and diluted net earnings per share were \$1.45, \$1.09 and \$0.80 for these same periods. The increase in earnings from 2001 to 2002 resulted primarily from an increase in net interest income, caused by a growth in interest-earning assets and a higher net interest margin and a decrease in provision for loan losses and income taxes, partially offset by a decrease in noninterest income and an increase in noninterest expense. Average interest-earning assets increased from \$390.3 million to \$447.4 million, or 14.6% in 2002 while the net interest margin was 3.46% in 2001 compared to 3.73% in 2002, an increase of 7.8%. The provision for loan losses decreased from \$1.4 million in 2001 to \$1.3 million in 2002, while the provision for income taxes decreased from \$1.5 million to \$1.4 million. Noninterest income decreased \$1.1 million, or 18.5%, from \$6.2 million in 2001 to \$5.1 million in 2002. This decrease was primarily due to \$3.0 million in nonrecurring gain recognized during 2001 from the settlement of the Guaranty Federal lawsuit. This nonrecurring gain, however, was partially offset in 2001 by a \$1.5 million impairment charge recognized on the Company's investment in AFT. Noninterest expenses increased \$1.2 million, or 8.7% during 2002 compared to 2001 primarily due to increases in personnel related cost. The increase in earnings from 2000 to 2001 resulted primarily from an increase in net interest income, caused by a growth in interest-earning assets and a lower cost of funds, and an increase in noninterest income offset by an increase in the provision for loan losses and an increase in noninterest expense. The Company posted returns on average assets of 0.89%, 0.76% and 0.64 % and returns on average common equity of 12.90%, 10.74% and 8.87% in 2002, 2001 and 2000, respectively.

Total assets at December 31, 2002 and 2001 were \$518.0 million and \$460.5 million, respectively. Total deposits at December 31, 2002 and 2001 were \$425.0 million and \$383.3 million, respectively. Deposits increased by \$41.7 million, or 10.9% in 2002. The increase was primarily attributable to internal growth in the Paris, Sulphur Springs, Commerce, Deport, Pittsburg and Texarkana locations. At December 31, 2002 and 2001, securities totaled \$107.0 million and \$81.7 million. The increase in securities in 2002 was primarily due to the investment of funds generated from increases in deposits and Federal Home Loan Bank advances in excess of loan growth. Common shareholders' equity was \$34.6 million and \$31.8 million at December 31, 2002 and 2001, respectively. The increase in common shareholder's equity for the year ended December 31, 2002 reflects earnings retention and an increase in the unrealized gain on securities available for sale, partially offset by the purchase of treasury stock and payment of dividends.

Results of Operation

Net Interest Income

Net interest income represents the amount by which interest income on interest-earning assets, which include securities, loans, and federal funds sold, exceeds interest expense incurred on interest-bearing liabilities, which include deposits and other borrowed funds. Net interest income is the principal source of the Company's earnings. Interest rate fluctuations, as well as changes in the amount and type of earning assets and liabilities, combine to affect net interest income.

2002 versus 2001 Net interest income increased from \$13.5 million in 2001 to \$16.7 million in 2002, an increase of \$3.2 million, or 23.7%, primarily due to a decrease in interest expense of \$4.1 million, or 25.0%, partially offset by a decrease in interest income of \$906,000, or 3.0%. This resulted in net interest margins of 3.73% and 3.46% and net interest spreads of 3.31% and 2.85% for the years ended December 31, 2002 and 2001, respectively.

The increase in net interest income for 2002 was primarily due to the decrease in cost of interest-bearing liabilities from 4.80% in 2001 to 3.16% in 2002. While the Company had an increase in average loans of \$40.2 million, or 13.3% and average securities of \$16.8 million, or 22.4%, the impact of these increases were partially offset by lower yields on interest-earning assets which decreased from 7.65% in 2001 to 6.47% in 2002. The lower yields and lower costs of funds resulted from a decrease in prime rate during 2001 from 9.50% to 4.75% and a

further reduction in 2002 from 4.75% to 4.50%.

2001 versus 2000. Net interest income increased from \$12.3 million in 2000 to \$13.5 million in 2001, an increase of \$1.2 million, or 10.0% primarily due to a growth in interest income of \$844,000, or 2.9%, and a decrease in interest expense of \$379,000, or 2.3%. This resulted in net interest margins of 3.46% and 3.44% and net interest spreads of 2.85% and 2.72% for the years ended December 31, 2001 and 2000, respectively.

The increase in total interest income for 2001 was primarily due to growth in average loans of \$34.7 million, or 12.9% and growth in federal funds sold of \$9.3 million, or 270.4%, which contributed an additional \$1.4 million and \$367,000, respectively, to total interest income. Total interest income was negatively affected by a reduction in average securities of \$10.1 million, or 11.9% as well as lower yields on loans, securities, and federal funds sold. The decrease in total interest expense was primarily due to a decrease in the cost of funds from 5.42% in 2000 to 4.80% in 2001, which offset increases in average interest-bearing liabilities of \$32.3 million, or 10.5%.

The following table presents for the periods indicated the total dollar amount of interest income from average interest-earning assets and the resultant yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates. No tax equivalent adjustments were made and all average balances are derived from average daily balances. Nonaccruing loans have been included in the tables as loans carrying a zero yield.

The following schedule presents the dollar amount of changes in interest income and interest expense for the major components of interest-earning assets and interest-bearing liabilities and distinguishes between the changes in interest income and interest expense related to changes in average outstanding balances and the volatility of interest rates. For purposes of this table, changes attributable to both rate and volume, which can be segregated, have been allocated proportionately to changes due to rate and changes due to volume.

	Years Ended December 31,

Provision for Loan Losses

The Company's provision for loan losses is established through charges to operating income in the form of the provision in order to bring the total allowance for loan losses to a level deemed appropriate by management of the Company based on such factors as historical experience, the volume and type of lending conducted by the Company, the amount of nonperforming assets, regulatory policies, generally accepted accounting principles, general economic conditions, and other factors related to the collectability of loans in the Company's portfolio as discussed under "Allowance for Loan Losses". In 2001, the Company made significant enhancements to the allowance for loan loss methodology to better quantify the risk associated with these internal and external factors.

The Company's provision for loan losses for 2002 was \$1.3 million compared with \$1.4 million for 2001. The decrease in the provision was due primarily to a decrease in total nonperforming loans of \$2.4 million, or 43.1%. Average loans outstanding increased from \$302.7 million for 2001 to \$342.8 million for 2002, an increase of \$40.1 million, or 13.2%. Total classified loans decreased from \$13.0 million at December 31, 2001 to \$9.9 million at December 31, 2002, a decrease of \$3.1 million, or 23.8%. Management believes the Company has maintained good asset quality as net charge-offs remain at manageable levels totaling \$914,000, or 0.27% of average loans in 2002 compared with \$617,000, or 0.20% of average loans in 2001. The Company's provision for loan losses increased from \$595,000 in 2000 to \$1.4 million in 2001 primarily due to loan growth, an increase in classified loans, and the national economic conditions.

Noninterest Income

Noninterest income is an important source of revenue for financial institutions. The Company's primary sources of noninterest income are service charges on deposit accounts and other banking service related fees. Noninterest income for the year ended December 31, 2002 was \$5.1 million, a decrease of \$1.1 million from \$6.2 million in 2001 but up from \$3.7 million in 2000. The decrease is primarily due to a nonrecurring gain of \$3.0 million in 2001 in connection with the settlement of the Guaranty Federal lawsuit. This gain represents the amount

received in January 2002 in connection with the November 2001 settlement and concurrent transfer of the Company's rights to certain intangible assets. This income was partially offset by a nonrecurring impairment charge during 2001 of \$1.5 million associated with the AFT lease transaction.

During 2000, Guaranty Leasing, acquired a 2.5% ownership interest in AFT for approximately \$2.8 million. The AFT ownership interest is classified as an Other Asset on the Company's balance sheet. As of December 31, 2002 and 2001, the book value of the AFT ownership was \$1.6 million. During the fourth quarter of 2001, on belief that the Company's investment in AFT was impaired by declines in air travel and reduced demand for commercial aircraft, an impairment charge of \$1.5 million was recorded and the carrying amount of the investment was reduced to \$1.6 million. During the third quarter of 2001, AFT recorded an impairment charge of \$18.2 million related to two airplanes. In addition, management received indications the appraised value of AFT's fleet of airplanes had declined approximately 9% from their value the past year. Based on these factors, the limited marketability of the investment, the uncertainty surrounding the air transport industry and general economic conditions, management believed that the value of its investment in AFT was permanently impaired.

Excluding the gain on settlement of litigation and the impairment charge of the AFT, recurring noninterest income for 2001 totaled \$4.6 million. Excluding these items in 2001, noninterest income for 2002 reflects an increase of \$495,000, or 10.9%, over 2001. The year ended December 31, 2002 reflected an increase in service charge income of \$279,000 over the same period in 2001 and \$561,000 over the same period in 2000, representing a 10.4% and a 23.4% increase, respectively. Securities gains decreased \$36,000, from \$416,000 in 2001 to \$380,000 in 2002. As to normal and recurring noninterest income, the Company experienced a 10.9% increase to \$5.1 million for the twelve months ended December 31, 2002 and a 22.5% increase to \$4.6 million for the same period in 2001.

The following table presents for the periods indicated the major categories of noninterest income:

	Years Ended December 31,		
	<u>2002</u>	<u>2001</u>	<u>2000</u>
	(Dollars in thousands)		
Service charges	\$ 2,957	\$ 2,678	\$ 2,396
Securities gains, net	380	416	(34)
Fee income	863	668	663
Fiduciary income	163	136	109
Earnings from key-man life insurance	236	204	234
Gain on sale of loans	272	98	-
Gain on sale of assets	97	36	38
Gain on sale of ORE	12	176	21
Income from lease transactions	-	-	19
Income from investment in AFT	-	140	145
Impairment of investment in AFT	-	(1,500)	-
Gain on settlement of litigation	-	3,000	-
Other noninterest income	76	149	132
Total noninterest income	<u>\$ 5,056</u>	<u>\$ 6,201</u>	<u>\$ 3,723</u>

The increase in noninterest income in both 2002 to 2001, excluding the gain on settlement of litigation and the impairment charge taken in AFT, resulted primarily from service charges and fee income due to an increase in the number of deposit accounts. Additionally, the Company continued to emphasize fee-based services resulting in greater income from check cashing, ATM fees, appraisal fees and wire transfer fees.

Noninterest Expense

For the years ended December 31, 2002, 2001 and 2000, noninterest expense totaled \$14.7 million, \$13.5 million and \$12.1 million, respectively. The \$1.2 million, or 8.9%, increase in 2002 was primarily the result of increases in employee compensation and benefits. Employee compensation and benefits increased from \$7.6 million in 2001 to \$8.7 million in 2002, an increase of \$1.1 million, or 14.5%. This increase was due to an increase in full time equivalent employees from 199 at December 31, 2001 to 212 at December 31, 2002, normal salary adjustments, increased bonus incentives, profit sharing contributions, and payroll taxes.

The increase in total noninterest expense for 2001 over 2000 of \$1.4 million, or 11.4%, was primarily the result of increases in employee compensation and benefits, fixed asset expense, and increased litigation expense. Employee compensation and benefits increased from \$6.8 million in 2000 to \$7.6 million in 2001, an increase of \$801,000, or 11.8%. This increase was due to an increase in full time equivalent employees from 192 at December 31, 2000 to 199 at December 31, 2001, an increase in incentive compensation, and normal salary adjustments. Legal and professional fees increased \$218,000 or 33.7% primarily due to litigation involving the lawsuit with Guaranty Federal.

The Company's efficiency ratios, calculated by dividing total noninterest expense (excluding securities gains and losses) by net interest income plus noninterest income, were 68.79% in 2002, 70.10% in 2001, and 75.72% in 2000.

The following table presents for the periods indicated the major categories of noninterest expense:

	Years Ended December 31,		
	2002	2001	2000
	(Dollars in thousands)		
Employee compensation and benefits	\$ 8,711	\$ 7,592	\$ 6,791
Non-staff expenses:			
Occupancy expenses	1,992	1,901	1,758
Legal and professional fees	933	864	646
Director and committee fees	534	412	389
Advertising	310	278	357
ATM and debit card expense	317	279	230
Office and computer supplies	265	429	357
Postage	187	180	156
Phone expense	194	188	185
Other	1,249	1,396	1,271
Total non-staff expenses	5,981	5,927	5,349
Total noninterest expense	\$ 14,692	\$ 13,519	\$ 12,140

Income Taxes

Federal income tax is reported as income tax expense and is influenced by the amount of taxable income, the amount of tax-exempt income, the amount of non-deductible interest expense and the amount of other non-deductible expense. The Company utilized tax benefits on leveraged lease transactions in the amounts of \$960,000, \$763,000 and \$650,000 for 2002, 2001 and 2000, respectively. The effective tax rates for 2002, 2001 and 2000 were 24.37%, 31.39% and 23.14%, respectively. Income taxes for financial purposes in the consolidated statements of earnings differ from the amount computed by applying the statutory income tax rate of 34% to earnings before income taxes. The difference in the statutory rate is primarily due to the tax benefits on the leveraged lease transactions and non-taxable income.

Additionally, the State of Texas imposes a Texas franchise tax. Taxable income for the income tax component of the Texas franchise tax is the federal pre-tax income, plus certain officers' salaries, less interest income from federal securities. Total franchise tax expense was \$41,000 in 2002, \$50,000 in 2001 and \$56,000 in 2000. Such expense was included as a part of other noninterest expense.

Impact of Inflation

The effects of inflation on the local economy and on the Company's operating results have been relatively modest for the past several years. Since substantially all of the Company's assets and liabilities are monetary in nature, such as cash, securities, loans and deposits, their values are less sensitive to the effects of inflation than to

changing interest rates, which do not necessarily change in accordance with inflation rates. The Company tries to control the impact of interest rate fluctuations by managing the relationship between its interest rate sensitive assets and liabilities. See "Quantitative and Qualitative Disclosures About Market Risk" below.

Financial Condition

Loan Portfolio (including loans held for sale)

The Company provides a broad range of commercial, real estate and consumer loan products to small and medium-sized businesses and individuals in its market areas. The Company aggressively pursues qualified lending customers in both the commercial and consumer sectors, providing customers with direct access to lending personnel and prompt, professional service. The 86.0% gross loan to deposit ratio as of December 31, 2002, reflects the Company's commitment as an active lender in the local communities it serves. Total loans were \$365.6 million at December 31, 2002, an increase of \$34.3 million, or 10.4% compared with \$331.3 million at December 31, 2001. In 2001, total loans increased by \$43.9 million, or 15.3% to \$331.3 million from \$287.3 million at December 31, 2000. In 2000, total loans increased by \$32.1 million, or 12.6% from \$255.2 million at December 31, 1999. The growth in loans reflects the stable local economy, an aggressive advertising campaign, the Company's pro-lending reputation and the solicitation of new companies and individuals entering the Company's market areas.

The following table summarizes the loan portfolio (including loans held for sale) of the Company by type of loan as of the dates indicated:

	December 31,

The primary lending focus of the Company is on loans to small and medium-sized businesses and one-to-four family residential mortgage loans. The Company's commercial lending products include business loans, commercial real estate loans, equipment loans, working capital loans, term loans, revolving lines of credit and letters of credit. Most commercial loans are collateralized and on payment programs. The purpose of a particular loan generally determines its structure. In almost all cases, the Company requires personal guarantees on commercial loans to help assure repayment.

Commercial

The Company's commercial loans are primarily made within its market area and are underwritten on the basis of the borrower's ability to service such debt from income. As a general practice, the Company takes as collateral a lien on any available real estate, equipment, or other assets obtained owned by the borrower and obtains a personal guaranty of the borrower. In general, commercial loans involve more credit risk than residential mortgage loans and commercial mortgage loans and, therefore, usually yield a higher return. The increased risk for commercial loans is due to the type of collateral securing these loans. The increased risk also derives from the expectation that commercial loans generally will be serviced principally from the business' operations, and those

operations may not be successful. As a result of these additional complexities, variables and risks, commercial loans require more thorough underwriting and servicing than other types of loans.

In addition to commercial loans secured by real estate, the Company makes commercial mortgage loans to finance the purchase of real property, which generally consists of real estate with completed structures. Commercial mortgage lending typically involves higher loan principal amounts and the repayment of loans is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. As a general practice, the Company requires its commercial mortgage loans to be secured by well-managed income producing property with adequate margins and to be guaranteed by responsible parties. The Company's commercial mortgage loans are generally secured by first liens on real estate. Loans with fixed interest rates typically amortize over a 10 to 15 year period with balloon payments due at the end of one to five years. In underwriting commercial mortgage loans, consideration is given to the property's operating history, future operating projections, current and projected occupancy, location and physical condition. The underwriting analysis also includes credit checks, appraisals and a review of the financial condition of the borrower and guarantor.

Construction

The Company makes loans to finance the construction of residential and, to a limited extent, nonresidential properties. Construction loans generally are secured by first liens on real estate. The Company conducts periodic inspections, either directly or through an agent, prior to approval of periodic draws on these loans. Construction loans involve additional risks attributable to the fact that loan funds are advanced upon the security of a project under construction, and the project is of uncertain value prior to its completion. Because of uncertainties inherent in estimating construction costs, the market value of the completed project and the effects of governmental regulation on real property, it can be difficult to accurately evaluate the total funds required to complete a project and the related loan to value ratio. As a result of these uncertainties, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of a borrower or guarantor to repay the loan. If the Company is forced to foreclose on a project prior to completion, there is no assurance that it will be able to recover all of the unpaid portion of the loan. In addition, the Company may be required to fund additional amounts to complete a project and may have to hold the property for an indeterminate period of time.

1-4 Family Residential

The Company offers a variety of mortgage loan products. The Company's loans collateralized by one-to-four family residential real estate generally are originated in amounts of no more than 90% of the lower of cost or appraised value. The Company generally requires mortgage title insurance and hazard insurance in the amount of the loan. Of the mortgages originated, the Company generally retains mortgage loans with short terms or variable rates and sells longer-term fixed-rate loans that do not meet the Company's credit underwriting standards. Prior to the acquisition of First American in September 1999, the Company sold such loans to Texas Independent Bank Mortgage Company; however, since the First American acquisition, the Company sells these loans directly into the secondary market.

As of December 31, 2002, the Company's one-to-four family residential real estate loan portfolio (including loans held for sale) was \$144.9 million. Of this amount, \$45.1 million is repriceable in one year or less and an additional \$80.0 million is repriceable from one year to five years. These high percentages in short-term real estate loans reflect the Company's commitment to reducing interest rate risk.

Consumer

The Company provides a wide variety of consumer loans including motor vehicle, watercraft, education loans, personal loans (collateralized and uncollateralized) and deposit account collateralized loans. The terms of these loans typically range from 12 to 60 months and vary based upon the nature of collateral and size of loan. As of December 31, 2002, the Company had no indirect consumer loans, indicating a preference to maintain personal banking relationships and strict underwriting standards. Consumer loans entail greater risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by rapidly depreciating assets such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan balance. The remaining deficiency often does not warrant

further substantial collection efforts against the borrower beyond obtaining a deficiency judgment. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws may limit the amount which can be recovered on such loans. During the last several years, management has placed tighter controls on consumer credit due to record high personal bankruptcy filings nationwide.

Agriculture

The Company provides agricultural loans for short-term crop production, including cotton, milo and corn, farm equipment, cattle and agricultural real estate financing. The Company evaluates agricultural borrowers primarily based on their historical profitability, level of experience in their particular agricultural industry, overall financial capacity and the availability of secondary collateral to withstand economic and natural variations common to the industry. Because agricultural loans present a higher level of risk associated with events caused by nature, and the volatility of the world market prices on commodities, the Company routinely makes on-site visits, inspections, and utilize government guaranteed programs in order to monitor, identify and manage such risks.

The Company rarely makes loans at its legal lending limit. Lending officers are assigned various levels of loan approval authority based upon their respective levels of experience and expertise. All loans above \$700,000 are evaluated and acted upon by the Executive Committee, which meets weekly. All new and renewed loans greater than \$100,000 are reported monthly to the Board of Directors. All new and renewed loans of \$400,000 or less are reported weekly to the Executive Committee. The Company's strategy for approving or disapproving loans is to follow conservative loan policies and underwriting practices which include: (i) granting loans on a sound and collectible basis; (ii) investing funds properly for the benefit of shareholders and the protection of depositors; (iii) serving the legitimate needs of the community and the Company's general market area while obtaining a balance between maximum yield and minimum risk; (iv) ensuring that primary and secondary sources of repayment are adequate in relation to the amount of the loan; (v) developing and maintaining adequate diversification of the loan portfolio as a whole and of the loans within each category; and (vi) ensuring that each loan is properly documented and, if appropriate, insurance coverage is adequate. The Company's loan review and compliance personnel interact daily with commercial and consumer lenders to identify potential underwriting or technical exception variances. In addition, the Company has placed increased emphasis on the early identification of problem loans to aggressively seek resolution of the situations and thereby keep loan losses at a minimum.

The contractual maturity ranges of the commercial, industrial, agriculture, commercial real estate, and real estate construction loan portfolio and the amount of such loans with predetermined interest rates in each maturity range as of December 31, 2002, are summarized in the following table:

	December 31, 2002			
	One Year or Less	After One Through	After	Total
		Five Years	Five Years	
	(Dollars in thousands)			
Commercial and industrial	\$ 30,502	\$ 24,429	\$ 3,730	\$ 58,661
Agriculture	6,712	2,831	446	9,989
Real estate construction	13,022	544	451	14,017
Commercial real estate	22,302	34,779	24,568	81,649
Total	<u>\$ 72,538</u>	<u>\$ 62,583</u>	<u>\$ 29,195</u>	<u>\$ 164,316</u>
Loans with a predetermined interest rate	\$ 45,754	\$ 49,353	\$ 11,431	\$ 106,538
Loans with a floating interest rate	26,784	13,230	17,764	57,778
Total	<u>\$ 72,538</u>	<u>\$ 62,583</u>	<u>\$ 29,195</u>	<u>\$ 164,316</u>

Nonperforming Assets

The Company has several procedures in place to assist it in maintaining the overall quality of its loan portfolio. The Company has established underwriting guidelines to be followed by its officers and also monitors its delinquency levels for any negative or adverse trends. There can be no assurance, however, that the Company's loan portfolio will not become subject to increasing pressures from deteriorating borrower credit due to general economic conditions.

Nonperforming assets at December 31, 2002, decreased \$1.9 million, or 30.4%, to \$4.3 million compared with \$6.2 million at December 31, 2001. This decrease reflects a reduction in nonaccrual loans primarily attributed to transferring the collateral on two large lines of credit into other real estate. The reduction in past due loans is the result of the Company's continued aggressive collection efforts and the balance of reductions were a result of liquidation of collateral and loan payoffs. Nonperforming assets were \$5.0 million at December 31, 2000. This resulted in ratios of nonperforming assets to total loans plus other real estate of 1.18%, 1.87% and 1.73% for the years ended December 31, 2002, 2001 and 2000, respectively.

The Company generally places a loan on nonaccrual status and ceases to accrue interest when loan payment performance is deemed unsatisfactory. Loans where the interest payments jeopardize the collection of principal are placed on nonaccrual status, unless the loan is both well secured and in the process of collection. Cash payments received while a loan is classified as nonaccrual are recorded as a reduction of principal as long as doubt exists as to collection. If interest on nonaccrual loans had been accrued, such income would have been approximately \$106,000 and \$251,000 for 2002 and 2001, respectively. The Company is sometimes required to revise a loan's interest rate or repayment terms in a troubled debt restructuring; however, the Company had no restructured loans or additional nonperforming interest-earning assets at December 31, 2002, 2001, 2000, 1999 or 1998. In addition to an internal loan review, the Company retains IBS on a semi-annual basis to evaluate the loan portfolio.

The Company maintains current appraisals on loans secured by real estate, particularly those categorized as nonperforming loans and potential problem loans. In instances where updated appraisals reflect reduced collateral values, an evaluation of the borrower's overall financial condition is made to determine the need, if any, for possible write-downs or appropriate additions to the allowance for loan losses. The Company records other real estate at the lower of its fair market value, minus estimated costs to sell the property, or the recorded investment in the loan on the date of transfer.

The following table presents information regarding nonperforming assets at the dates indicated:

	December 31,				
	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>	<u>1998</u>
	(Dollars in thousands)				
Nonaccrual loans	\$ 2,810	\$ 3,737	\$ 1,214	\$ 443	\$ 290
Accruing loans past due 90 days or more	404	1,912	3,488	574	866
Other real estate	1,111	562	274	79	97
Total nonperforming assets	<u>\$ 4,325</u>	<u>\$ 6,211</u>	<u>\$ 4,976</u>	<u>\$ 1,096</u>	<u>\$ 1,253</u>
Nonperforming assets to total loans and other real estate	1.18%	1.87%	1.73%	0.43%	0.67%

The Company considers a loan to be impaired based on current information and events, if it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is based on the present value of expected future cash flows discounted at the loan's effective interest rate or the loan's observable market price or based on the fair value of the collateral if the loan is collateral-dependent.

Allowance for Loan Losses

The allowance for loan losses is a reserve established through charges to earnings in the form of a provision for loan losses. Management has established an allowance for loan losses, which it believes, is adequate for estimated losses in the Company's loan portfolio. Based on an evaluation of the loan portfolio, management presents a quarterly review of the adequacy of the allowance for loan losses to the Company's Board of Directors. In making its evaluation, management considers the diversification by industry of the Company's commercial loan portfolio, the effect of changes in the local real estate market on collateral values, the results of recent regulatory examinations, the effects on the loan portfolio of current economic indicators and their probable impact on borrowers, the amount of charge-offs for the period, the amount of nonperforming loans and related collateral security, the results of management's internal loan review, the evaluation of its loan portfolio through a semi-annual external loan review conducted by IBS and the annual examination of the Company's financial statements by its independent auditors. Charge-offs occur when loans are deemed to be uncollectible.

The Company follows an internal loan review program to evaluate the credit risk in the loan portfolio. Through the loan review process, the Company maintains an internally classified loan list, which, along with the delinquency list of loans, helps management assess the overall quality of the loan portfolio and the adequacy of the allowance for loan losses. Loans internally classified as "substandard" or in the more severe categories of "doubtful" or "loss" are those loans that, at a minimum, have clear and defined weaknesses such as a highly-leveraged position, unfavorable financial ratios, uncertain repayment sources or poor financial condition, which may jeopardize recoverability of the debt. At December 31, 2002, the Company had \$9.9 million of such loans compared with \$13.0 million at December 31, 2001, a decrease of \$3.1 million, or 23.8%. This decrease is primarily due to the improvement, workout, or foreclosure of nine large loan relationships between \$270,000 and \$1.4 million, partially offset by the classification of five new relationships, ranging from \$252,000 to \$443,000. Specific reserves have been established for these new lines based on the estimated exposure on these lines.

In addition to the internally classified loan list and delinquency list of loans, the Company maintains a separate "watch list" which further aids the Company in monitoring loan portfolios. Watch list loans show warning elements where the present status portrays one or more deficiencies that require attention in the short term or where pertinent ratios of the loan account have weakened to a point where more frequent monitoring is warranted. These loans do not have all of the characteristics of a classified loan (substandard or doubtful) but do show weakened elements as compared with those of a satisfactory credit. The Company reviews these loans to assist in assessing the adequacy of the allowance for loan losses. At December 31, 2002, the Company had \$7.1 million of such loans compared with \$2.3 million at December 31, 2001, an increase of \$4.8 million, or 208.7%. This increase is primarily due to the addition of three relationships totaling \$4.4 million. All of the loans associated with these relationships are well secured and appropriately structured. With the exception of one small loan, all of these borrowers are current with their payments.

In order to determine the adequacy of the allowance for loan losses, the Company establishes both specific and general reserves. The Company establishes specific allocations for the majority of problem loans based on the estimated exposure in each individual loan. The exposure is generally identified by determining the present value of estimated future cash flows or the fair value of collateral if repayment is expected solely from the collateral. The Company establishes general reserves for non-problem loans primarily based on its historical charge-off experience. Consideration is also given to the level and trend of delinquent loans, loan growth, underwriting standards, economic conditions, and other qualitative factors based on management's judgment.

Loans are charged-off against the allowance for loan losses when appropriate. Although management believes it uses the best information available to make determinations with respect to the allowance for loan losses, future adjustments may be necessary if economic conditions differ from the assumptions used in making the initial determinations.

During 2002, net loan charge-offs totaled \$914,000, or 0.27% of average loans outstanding for the period, compared with \$617,000 in net loan charge-offs or 0.20% of average loans for the year ended December 31, 2001. During 2002, the Company recorded a provision for loan losses of \$1.3 million compared with \$1.4 million for 2001. The decrease in provision for 2002 is due primarily to a decrease in classified loans. The Company made a provision for loan losses of \$595,000 for 2000. The increase in provision from 2000 to 2001 is due primarily to loan growth, an increase in classified loans, and general economic uncertainty. At December 31, 2002, the allowance for

loan losses totaled \$3.7 million, or 1.01% of total gross loans. At December 31, 2001, the allowance for loan losses totaled \$3.3 million or 1.01% of gross loans.

The following table presents, for the periods indicated, an analysis of the allowance for loan losses and other related data:

	Years Ended December 31,				
	2002	2001	2000	1999	1998
	(Dollars in thousands)				
Average loans outstanding	\$ 342,823	\$ 302,656	\$ 267,996	\$ 213,737	\$ 169,754
Gross loans outstanding at end of period	\$ 365,615	\$ 331,255	\$ 287,335	\$ 255,209	\$ 185,886
Allowance for loan losses at beginning of period	\$ 3,346	\$ 2,578	\$ 2,491	\$ 1,512	\$ 1,129
Provision for loan losses	1,260	1,385	595	310	540
Balance acquired with First American acquisition				846	
Charge-offs:

Securities Available-for-Sale

The Company uses its securities portfolio to ensure liquidity for cash requirements, to manage interest rate risk, to provide a source of income, to ensure collateral is available for municipal pledging requirements and to manage asset quality. At December 31, 2002, investment securities totaled \$107.0 million, an increase of \$25.3 million from \$81.7 million at December 31, 2001. The increase was primarily attributable to \$95.9 million in securities purchases in 2002, partially offset by \$71.0 million in securities sold and in principal repayments. Generally, the growth in securities was funded by increases in deposits and Federal Home Loan Bank advances in excess of loan growth. The December 31, 2001 net unrealized gain was \$1.3 million compared to the December 31, 2002 net unrealized gain of \$2.0 million. At December 31, 2002, securities represented 20.7% of total assets compared to 17.7% of total assets at December 31, 2001. The yield on the securities portfolio for 2002 was 5.05% compared to a yield of 6.27% for 2001 and 6.07% for 2000.

During 2002, the securities portfolio mix changed within various categories. U.S. Government securities increased from \$4.5 million at December 31, 2001 to \$14.1 million at December 31, 2002. The Company continues to hold collateralized mortgage obligations ("CMO's") in its securities portfolio. A CMO is collateralized directly by mortgages or by mortgage-backed securities issued by government agencies. The Company's investment in CMO's decreased from \$34.4 million at December 31, 2001 to \$25.3 million at December 31, 2002, a decrease of \$9.1 million or 26.5%. The Company also had an increase of \$29.1 million in mortgage-backed securities from \$34.0 million at December 31, 2001 to \$63.1 million at December 31, 2002. Investments in obligations of state and political subdivisions decreased from \$6.8 million at December 31, 2001 to \$1.3 million at December 31, 2002 as securities that were called or sold or matured were not reinvested in the same category.

The following table summarizes the fair value of securities available for sale held by the Company as of the dates shown:

	December 31,		
	<u>2002</u>	<u>2001</u>	<u>2000</u>
	(Dollars in thousands)		
U.S. government agency securities	\$ 14,127	\$ 4,494	\$ 26,184

Totals	<u>\$ 246</u>	<u>5.86%</u>	<u>\$ 20,309</u>	<u>4.14%</u>	<u>\$ 29,098</u>	<u>4.56%</u>	<u>\$ 57,339</u>	<u>4.33%</u>	<u>\$ 106,992</u>	<u>4.40%</u>

The Company classifies debt and equity securities at the date of purchase into one of two categories: held-to-maturity, or available-for-sale. At each reporting date, the appropriateness of the classification is reassessed. Investments in debt securities are classified as held-to-maturity and measured at amortized cost in the financial statements only if management has the positive intent and ability to hold those securities to maturity. Investments not classified as held-to-maturity are classified as available-for-sale and measured at fair value in the financial statements with unrealized gains and losses reported, net of tax, in a separate component of shareholders' equity until realized. The Company had no securities classified as held to maturity at December 31, 2002, 2001 or 2000.

Mortgage-backed securities and CMO's are securities, which have been developed by pooling a number of real estate mortgages and are principally issued by or guaranteed by federal agencies such as the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. These securities are deemed to have high credit ratings and regular monthly cash flows of principal and interest, which are guaranteed by the issuing agencies. All the Company's mortgage-backed securities at December 31, 2002 were agency-issued collateral obligations.

At December 31, 2002, 61.3% of the mortgage-backed and CMO securities held by the Company had final maturities of more than 10 years. However, unlike U.S. Treasury and U.S. Government agency securities, which have a lump sum payment at maturity, mortgage-backed and CMO securities provide cash flows from regular principal and interest payments and principal prepayments throughout the lives of the securities. Therefore, the average life, or the average amount of time until the Company receives the total amount invested, of the mortgage-backed or CMO security will be shorter than the contractual maturity. The Company estimates the remaining average life of the fixed-rate mortgage-backed and CMO security portfolio to be less than three years. These securities, when purchased at a premium, will generally suffer decreasing net yields as interest rates drop because homeowners tend to refinance their mortgages. Thus, the premium paid must be amortized over a shorter period. Therefore, securities when purchased at a discount will obtain higher net yields in a decreasing interest rate environment. As interest rates rise, the opposite will generally be true. During a period of increasing interest rates, fixed rate mortgage-backed and CMO securities do not tend to experience heavy prepayments of principal and consequently, the average lives of these securities will not be unduly shortened.

Premises and Equipment

Premises and equipment totaled \$13.6 million at December 31, 2002 and \$13.6 million at December 31, 2001. The net change reflects a decrease of \$51,000, or 0.4% in fixed assets. The decrease is primarily due to the purchase of furniture and computer hardware for the Company offset by depreciation recorded for the year.

Other Assets

The Company owns single premium insurance policies insuring the lives of certain key senior officers. The net cash surrender value of these policies totaled \$5.9 million at December 31, 2002 and \$5.1 million at December 31, 2001. At December 31, 2001 the Company also had recorded a receivable of \$3.0 million reflecting the settlement of its lawsuit against Guaranty Federal. The Company received the \$3.0 million in January 2002.

Deposits

The Company offers a variety of deposit accounts having a wide range of interest rates and terms. The Company's deposit accounts consist of demand, savings, money market and time accounts. The Company relies primarily on competitive pricing policies and customer service to attract and retain these deposits. The Company does not have or accept any brokered deposits.

Total deposits increased to \$425.0 million at December 31, 2002, from \$383.3 million at December 31, 2001, an increase of \$41.7 million, or 10.9%. Noninterest-bearing deposits increased from \$63.7 million at December 31, 2001 to \$68.5 million at December 31, 2002, an increase of \$4.8 million, or 7.5%. Certificates of deposit increased from \$213.5 million at December 31, 2001, to \$241.3 million at December 31, 2002, an increase of \$27.8 million, or 13.0%. Other interest-bearing deposits increased from \$106.0 million at December 31, 2001 to \$115.1 million at December 31, 2002, an increase of \$9.1 million, or 8.6%. The increase in deposits is primarily due to a generally increasing customer base across most of the Company's market areas. The Paris and Sulphur Springs locations reflected the largest increases in deposits by dollar volume, combining for a \$19.3 million, or 16.3% increase. Deport, Commerce, Pittsburg, and Texarkana combined for an \$21.0 million, or 30.1% increase, while the remaining locations showed more modest gains. Two locations showed slight declines in deposits. Management feels that the majority of the locations will continue to gain market shares as the Company continues to become better known in its respective market areas. The Company's ratio of average noninterest-bearing demand deposits to average total deposits for years ended December 31, 2002, 2001, and 2000, were 15.7%, 15.0%, and 15.8%, respectively.

The daily average balances and weighted-average rates paid on deposits for each of the years ended December 31, 2002, 2001 and 2000 are presented below:

	Years Ended December 31,					
	2002		2001		2000	
	Amount	Rate	Amount	Rate	Amount	Rate
	(Dollars in thousands)					
Regular savings	\$ 11,774	1.44%	\$ 10,084	1.97%	\$ 9,497	2.50%
NOW accounts	35,740	1.04	33,992	2.09	31,678	2.96
Money market checking	61,150	1.58	60,524	2.96	56,153	5.10
Time deposits less than \$100,000	132,800	3.53	125,236	5.62	115,198	5.74
Time deposits \$100,000 and over	98,396	3.70	88,603	5.75	78,277	5.98
Total interest-bearing deposits	\$ 339,860	2.89%	\$ 318,439	4.66%	\$ 290,803	5.27%

Total deposits	\$ 403,125	2.44%	\$ 374,566	3.96%	\$ 345,342	4.44%

The following table sets forth the amount of the Company's certificates of deposits by time remaining until maturity:

	2002
2003	\$ 191,478
2004	32,391
2005	5,858
2006	2,927
2007	8,669
Thereafter	-
	\$ 241,323

Other Borrowings

Federal Home Loan Bank ("FHLB") advances may be utilized from time to time as either a short-term funding source or a longer-term funding source. FHLB advances can be particularly attractive as a longer-term funding source to balance interest rate sensitivity and reduce interest rate risk. The Company is eligible for two borrowing programs through the FHLB. The first, called "Short Term Fixed," requires delivery of eligible securities for collateral. Maturities under this program range from 1-35 days. The Company does not currently have any borrowings under this program. As of December 31, 2002, the Company does not have any of its investment securities in safekeeping at the FHLB.

The second borrowing program, the "Blanket Borrowing Program," is under a borrowing agreement which does not require the delivery of specific collateral. Borrowings are limited by the level of qualified, pledgable real estate loans held and FHLB stock owned. At December 31, 2002, the Company had approximately \$42.8 million borrowed of a potential \$169.9 million available under this program, leaving approximately \$127.1 million in available borrowings.

On March 23, 2000, the Company, in a private placement, issued \$7.0 million (7,000 shares with a liquidation amount of \$1,000 per security) of 10.875% Fixed Rate Capital Trust Pass-through Securities ("TruPS") through a newly formed, wholly-owned subsidiary, Guaranty (TX) Capital Trust I (the "Trust"). The Trust invested the total proceeds from the sale of the TruPS in 10.875% Junior Subordinated Deferrable Interest Debentures (the

“Debentures”) issued by the Company. The net proceeds from the sale of the Debentures were used to repurchase shares of the Company’s stock, provide a \$1.5 million additional capital contribution to Guaranty Bond Bank and provide for additional working capital to support growth.

With certain exceptions, the amount of the principal and any accrued and unpaid interest on the Debentures are subordinated in right of payment to the prior payment in full of all senior indebtedness of the Company. The terms of the Debentures are such that they qualify as Tier I capital under the Federal Reserve Board’s regulatory capital guidelines applicable to bank holding companies. Interest on the Debentures is payable semi-annually on March 8 and September 8 of each year, commencing September 8, 2000. The interest is deferrable on a cumulative basis for up to five consecutive years following a suspension of dividend payments on all other capital stock. No principal payments are due until maturity on March 8, 2030.

On any March 8 or September 8 on or after March 8, 2010 and prior to maturity, the Debenture are redeemable for cash at the option of the Company, on at least 30 but not more than 60 days notice, in whole or in part, at the redemption prices set forth in the table below, plus accrued interest to the date of redemption:

If Redeemed During 12 Months Beginning March 8,	Percentage of Principal Amount	If Redeemed During 12 Months Beginning March 8,	Percentage of Principal Amount
2010	105.44%	2016	102.18%
2011	104.89%	2017	101.63%
2012	104.35%	2018	101.09%
2013	103.81%	2019	100.54%
2014	103.26%	2020 and after	100.00%
2015	102.72%		

Upon the occurrence of certain special events, the Company will have the right to call the securities at par at any time with the permission of the Federal Reserve.

On October 30, 2002, the Company, in a private placement, issued an additional \$3.0 million (3,000 shares with a liquidation amount of \$1,000 per security) of Capital Trust Pass-through Securities (“TruPS II”) through a newly formed, wholly-owned subsidiary, Guaranty (TX) Capital Trust II (the “Trust II”). The Trust II invested the total proceeds from the sale of the TruPS II in Junior Subordinated Deferrable Interest Debentures (the “Debentures II”) issued by the Company. The Debentures II bear a fixed rate of interest of 7.94% for 10 years; thereafter, until the maturity, the interest rate will float at 3.35% above the 3 month LIBOR. The net proceeds from the sale of the Debentures II are being used to repurchase shares of the Company’s stock and provide for additional working capital to support growth.

With certain exceptions, the amount of the principal and any accrued and unpaid interest on the Debentures II are subordinated in right of payment to the prior payment in full of all senior indebtedness of the Company. The terms of the Debentures II are such that they qualify as Tier 1 capital under the Federal Reserve Board’s regulatory capital guidelines applicable to bank holding companies. Interest on the Debenture II is payable quarterly on January 30, April 30, July 30, and October 30 of each year at a fixed rate per annum equal to 7.94% until October 2012 and a variable rate per annum, reset quarterly, equal to LIBOR plus 3.35%, thereafter. The interest is deferrable on a cumulative basis for up to five consecutive years following a suspension of dividend payments on all other capital stock. No principal payments are due until maturity on October 30, 2032.

On any interest payment date on or after October 30, 2012 and prior to maturity date, the Debentures II are redeemable for cash at the option of the Company, on at least 30 but not more than 60 days notice, in whole or in part, at a redemption price equal to 100% of the principal amount to be redeemed, plus accrued interest to the date of redemption.

Capital Resources and Liquidity

Capital management consists of providing equity to support both current and future operations. The Company is subject to capital adequacy requirements imposed by the Federal Reserve and the Bank is subject to capital adequacy requirements imposed by the FDIC and the TDB. Both the Federal Reserve and the FDIC have adopted risk-based capital requirements for assessing bank holding company and bank capital adequacy. These standards define capital and establish minimum capital requirements in relation to assets and off-balance sheet exposure, adjusted for credit risk. The risk-based capital standards currently in effect are designed to make regulatory capital requirements more sensitive to differences in risk profiles among bank holding companies and banks, to account for off-balance sheet exposure and to minimize disincentives for holding liquid assets. Assets and off-balance sheet items are assigned to broad risk categories, each with appropriate relative risk weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

The risk-based capital standards issued by the Federal Reserve require all bank holding companies to have "Tier 1 capital" of at least 4.0% and "total risk-based" capital (Tier 1 and Tier 2) of at least 8.0% of total risk-adjusted assets. "Tier 1 capital" generally includes common shareholders' equity and qualifying perpetual preferred stock together with related surpluses and retained earnings, less deductions for goodwill and various other intangibles. "Tier 2 capital" may consist of a limited amount of intermediate-term preferred stock, a limited amount of term subordinated debt, certain hybrid capital instruments and other debt securities, perpetual preferred stock not qualifying as Tier 1 capital, and a limited amount of the general valuation allowance for loan losses. The sum of Tier 1 capital and Tier 2 capital is "total risk-based capital".

The Federal Reserve has also adopted guidelines which supplement the risk-based capital guidelines with a minimum ratio of Tier 1 capital to average total consolidated assets ("leverage ratio") of 3.0% for certain institutions with well diversified risk, including no undue interest rate exposure; excellent asset quality; high liquidity; good earnings; and that are generally considered to be strong banking organizations, rated composite 1 under applicable federal guidelines, and that are not experiencing or anticipating significant growth. Other banking organizations are required to maintain a leverage ratio of at least 4.0% to 5.0%. These rules further provide that banking organizations experiencing internal growth or making acquisitions will be expected to maintain capital positions substantially above the minimum supervisory levels and comparable to peer group averages, without significant reliance on intangible assets.

Pursuant to FDICIA, each federal banking agency revised its risk-based capital standards to ensure that those standards take adequate account of interest rate risk, concentration of credit risk and the risks of nontraditional activities, as well as reflect the actual performance and expected risk of loss on multifamily mortgages. The Bank is subject to capital adequacy guidelines of the FDIC that are substantially similar to the Federal Reserve's guidelines. Also pursuant to FDICIA, the FDIC has promulgated regulations setting the levels at which an insured institution such as the Bank would be considered "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." The Bank is classified "well capitalized" for purposes of the FDIC's prompt corrective action regulations. See "**Supervision and Regulation – The Company**" and "**– The Bank**".

Shareholders' equity increased to \$34.6 million at December 31, 2002, from \$31.8 million at December 31, 2001, an increase of \$2.8 million, or 8.8%. This increase was primarily the result of net earnings of \$4.4 million and the net change in unrealized gain on available-for-sale securities of \$490,000, offset by the payment of common stock dividends of \$951,000 and the purchase of treasury stock of \$1.2 million.

The following table provides a comparison of the Company's and the Bank's leverage and risk-weighted capital ratios as of December 31, 2002 to the minimum and well-capitalized regulatory standards:

	<u>Minimum Required</u>	<u>To Be Well Capitalized Under Prompt Corrective Action Provisions</u>	<u>Actual Ratio at December 31, 2002</u>
The Company			
Leverage ratio	4.00% ⁽¹⁾	N/A	8.62%
Tier 1 risk-based capital ratio	4.00%	N/A	12.06%
Risk-based capital ratio	8.00%	N/A	13.12%
The Bank			
Leverage ratio	3.00% ⁽²⁾	5.00%	8.08%
Tier 1 risk-based capital ratio	4.00%	6.00%	11.17%
Risk-based capital ratio	8.00%	10.00%	12.21%

⁽¹⁾ The Federal Reserve may require the Company to maintain a leverage ratio above the required minimum.

⁽²⁾ The FDIC may require the Bank to maintain a leverage ratio above the required minimum.

At December 31, 2002, the Company's capital ratios exceeded the minimums required by regulatory guidelines. The Company intends to maintain an optimal capital and leverage mix. Liquidity involves the Company's ability to raise funds to support asset growth or reduce assets to meet deposit withdrawals and other payment obligations, to maintain reserve requirements and otherwise to operate the Company on an ongoing basis. The Company's liquidity needs are met primarily by financing activities, which consisted mainly of growth in core deposits, supplemented by investment securities and earnings through operating activities. Access to purchased funds from correspondent banks is available and has been utilized on occasion to take advantage of investment opportunities. The cash and federal funds sold position, supplemented by amortizing investments along with payments and maturities within the loan portfolio, have historically created an adequate liquidity position.

The Company's liquidity management objective is to meet maturing debt obligations, fund loan commitments and deposit withdrawals, and manage operations on a cost effective basis. Management believes that sufficient resources are available to meet the Company's liquidity objective through its debt maturity structure, holdings of liquid assets, and access to the capital markets through a variety of funding vehicles. Proper liquidity management is crucial to ensure that the Company is able to take advantage of new business opportunities as well as meet the demands of its customers.

The Bank's traditional funding sources consist primarily of core deposits, established federal funds and other borrowing lines with major banks, proceeds from matured investments, contracts to repurchase investment securities and principal and interest repayments on loans.

Management is not aware of any events that are reasonably likely to have a material adverse effect on the Company's liquidity, capital resources or operations. In addition, management is not aware of any regulatory recommendations regarding liquidity, which if implemented, would have a material adverse effect on the Company.

Industry Segments

The principal business of the Company is overseeing the business of the Bank. The Company has no significant assets other than its investment in the Bank, therefore, the banking operation is the Company's only reportable segment.

Recent Accounting Pronouncements

Statement of Financial Accounting Standards (SFAS) No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS 145 clarifies and simplifies existing accounting pronouncements related to gains and losses from debt extinguishments and certain lease modifications and eliminates certain transitional accounting standards that are no longer necessary. This statement also makes minor technical corrections to various other existing pronouncements. Certain provisions of this statement will become effective for the Company on January 1, 2003, while other provisions became effective for transactions occurring and financial statements issued after May 15, 2002. Adoption of the provisions of this statement that were effective after May 15, 2002 did not have a significant impact on the Company's financial statements. Furthermore, adoption of the remaining provisions of this statement on January 1, 2003 is not expected to have a significant impact on the Company's financial statements.

SFAS No. 147, "Acquisitions of Certain Financial Institutions, an Amendment of FASB Statements No. 72 and 144 and FASB Interpretation No. 9." SFAS 147 removes acquisitions of financial institutions from the scope of both SFAS 72, "Accounting for Certain Acquisitions of Banking or Thrift Institutions," and FASB Interpretation (FIN) No. 9, "Applying APB Opinions No. 16 and 17 When a Savings and Loan Association or a Similar Institution Is Acquired in a Business Combination Accounted for by the Purchase Method," and requires such transactions be accounted for in accordance with SFAS 141, "Business Combinations," and SFAS 142, "Goodwill and Other Intangible Assets." In addition, SFAS 147 amends SFAS 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," to include in its scope long-term customer-relationship intangible assets of financial institutions such as depositor- and borrower-relationship intangible assets and credit cardholder intangible assets. The provisions of SFAS 147 became effective on October 1, 2002. Adoption of this statement did not have a significant impact on the Company's financial statements.

SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an Amendment of FASB Statement No. 123." Effective for financial statements issued for fiscal years ending after December 15, 2002, SFAS 148 amends SFAS 123, "Accounting for Stock-Based Compensation," to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. SFAS 148 also amends the disclosure requirements of SFAS 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The Company transitioned to the fair value method of accounting for stock-based compensation during 2002 using the modified prospective method prescribed by this standard.

Financial Accounting Standards Board Interpretation (FIN) No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others – an Interpretation of FASB Statements No. 5, 57 and 107 and Rescission of FASB Interpretation No. 34." FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The initial recognition and measurement provisions of FIN 45 are applicable on a prospective basis to guarantees issued or modified after December 31, 2002. Implementation of these provisions of FIN 45 is not expected to have a material impact on the Company's financial statements. The disclosure requirements of FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002, and have been adopted in the Company's financial statements for December 31, 2002.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk.*

The Company's Asset Liability and Funds Management Policy provides management with the necessary guidelines for effective funds management, and the Company has established a measurement system for monitoring its net interest rate sensitivity position. The Company manages its sensitivity position within established guidelines.

Interest rate risk is managed by the Asset Liability Committee ("ALCO"), which is composed of senior officers of the Company, in accordance with policies approved by the Company's Board of Directors. The ALCO formulates strategies based on appropriate levels in interest rate risk. In determining the appropriate level of interest rate risk, the ALCO considers the impact on earnings and capital based on the current outlook on interest rates,

potential changes in interest rates, regional economies, liquidity, business strategies, and other factors. The ALCO meets regularly to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses, purchase and sale activity, commitments to originate loans, and the maturities of investments and borrowings. Additionally, the ALCO reviews liquidity, cash flow flexibility, maturities of deposits and consumer and commercial deposit activity. Management uses two methodologies to manage interest rate risk: (i) an analysis of relationships between interest-earning assets and interest-bearing liabilities; and (ii) interest rate shock simulation models. The Company has traditionally managed its business to reduce its overall exposure to changes in interest rates, however, under current policies of the Company's Board of Directors, management has been given some latitude to increase the Company's interest rate sensitivity position within certain limits if, in management's judgment, it will enhance profitability. As a result, changes in market interest rates may have a greater impact on the Company's financial performance in the future than they have had historically.

To effectively measure and manage interest rate risk, the Company uses interest rate shock simulation models to determine the impact on net interest income under various interest rate scenarios, balance sheet trends and strategies. From these simulations, interest rate risk is quantified and appropriate strategies are developed and implemented. Additionally, duration and market value sensitivity measures are utilized when they provide added value to the overall interest rate risk management process. The overall interest rate risk position and strategies are reviewed by the Company's Board of Directors on an ongoing basis. The Company manages its exposure to interest rates by structuring its balance sheet in the ordinary course of business. The Company does not currently enter into instruments such as leveraged derivatives, structured notes, interest rate swaps, caps, floors, financial options, financial futures contracts or forward delivery contracts for the purpose of reducing interest rate risk.

The impact on future net earnings based on interest sensitive assets and liabilities held at December 31, 2002 using the interest rate shock simulation is as follows:

Change in Interest Rates	Net Earnings	Change in Net Earnings
+ 300	\$ 5,949	\$ 251
+200	6,196	498
+100	6,239	541
Base	5,698	-
- 100	5,051	(647)
- 200	4,303	(1,395)
- 300	3,425	(2,273)

An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market interest rates. The management of interest rate risk is performed by analyzing the maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time ("GAP") and by analyzing the effects of interest rate changes on net interest income over specific periods of time by projecting the performance of the mix of assets and liabilities in varied interest rate environments. Interest rate sensitivity reflects the potential effect on net interest income of a movement in interest rates. A company is considered to be asset sensitive, or having a positive GAP, when the amount of its interest-earning assets maturing or repricing within a given period exceeds the amount of its interest-bearing liabilities also maturing or repricing within that time period. Conversely, a company is considered to be liability sensitive, or having a negative GAP, when the amount of its interest-bearing liabilities maturing or repricing within a given period exceeds the amount of its interest-earning assets also maturing or repricing within that time period. During a period of rising interest rates, a negative GAP would tend to affect net interest income adversely, while a positive GAP would tend to result in an increase in net interest income. During a period of falling interest rates, a negative GAP would tend to result in an increase in net interest income, while a positive GAP would tend to affect net interest income adversely. However, it is management's intent to achieve a proper balance so that incorrect rate forecasts should not have a significant impact on earnings.

The following table sets forth an interest rate sensitivity analysis for the Company at December 31, 2002:

Volumes Subject to Repricing Within

	0-30	31-180	181-365	1-3	3-5	Greater than	Total
	days	days	days	years	years	5 years	
(Dollars in thousands)							
Interest-earning assets:							
Securities	\$ 4,058	\$ 23,211	\$ 30,993	\$ 42,537	\$ 200	\$ 5,993	\$ 106,992
Loans	74,244	71,944	56,467	124,771	30,893	7,296	365,615
Federal funds sold	1,530	-	-	-	-	-	1,530
Total interest-earning assets	79,832	95,155	87,460	167,308	31,093	13,289	474,137
Interest-bearing liabilities:							
NOW, money market and savings deposits	115,113	-	-	-	-	-	115,113
Certificates of deposit and other time deposits	21,515	80,191	89,574	38,294	11,626	123	241,323
Borrowed funds	28	2,641	2,674	12,092	24,584	744	42,763
Long-term debt	-	-	-	-	-	10,000	10,000
Total interest-bearing liabilities	136,656	82,832	92,248	50,386	36,210	10,867	409,199
Period GAP	\$ (56,824)	\$ 12,323	\$ (4,788)	\$ 116,922	\$ (5,117)	\$ 2,422	\$ 64,938
Cumulative GAP	\$ (56,824)	\$ (44,501)	\$ (49,289)	\$ 67,633	\$ 62,516	\$ 64,938	
Period GAP to total assets	(10.97)%	2.38%	(0.92)%	22.57%	(0.99)%	0.47%	
Cumulative GAP to total assets	(10.97)%	(8.59)%	(9.52)%	13.06%	12.07%	12.54%	
Cumulative interest-earning assets to cumulative interest-bearing liabilities	58.42%	79.73%	84.19%	118.68%	115.69%	115.87%	

The Company's one-year cumulative GAP position at December 31, 2002, was negative \$49.3 million or 9.52% of assets. This is a one-day position that is continually changing and is not indicative of the Company's position at any other time. While the GAP position is a useful tool in measuring interest rate risk and contributes toward effective asset and liability management, it is difficult to predict the effect of changing interest rates solely on that measure, without accounting for alterations in the maturity or repricing characteristics of the balance sheet that occur during changes in market interest rates. For example, the GAP position reflects only the prepayment assumptions pertaining to the current rate environment. Assets tend to prepay more rapidly during periods of declining interest rates than during periods of rising interest rates. Because of this and other risk factors not contemplated by the GAP position, an institution could have a matched GAP position in the current rate environment and still have its net interest income exposed to increased rate risk. To better qualify and account for the variables not incorporated into GAP analysis, the Company utilizes an interest rate simulation model as discussed previously. The Company maintains a Rate Committee and the ALCO that reviews the Company's interest rate risk position on a weekly or monthly basis, respectively.

Item 8. Financial Statements and Supplementary Data

The financial statements, the reports thereon, the notes thereto and supplementary data commence at page F-1 of this Annual Report on Form 10-K.

Condensed quarterly results of operations for the years ended December 31, 2002 and 2001 were as follows:

	QUARTER ENDED 2002			
	(unaudited)			
	Dec. 31	Sept. 30	June 30	March 31
	(Dollars in thousands, except per share data)			
Interest income	\$ 7,324	\$ 7,357	\$ 7,194	\$ 7,080
Interest expense	2,972	3,061	3,099	3,140
Net interest income	4,352	4,296	4,095	3,940
Provision for loan losses	225	335	450	250
Net interest income after provision for loan losses	4,127	3,961	3,645	3,690
Noninterest income	1,320	1,227	1,475	1,034
Noninterest expense	3,945	3,683	3,574	3,490
Earnings before taxes	1,502	1,505	1,546	1,234
Provision for income tax expense	292	413	453	252

PART III

Item 10. *Directors and Executive Officers of the Registrant*

The information under the captions "Election of Directors," "Continuing Directors and Executive Officers" and "Section 16(a) Beneficial Ownership Reporting Compliance" in the Company's definitive Proxy Statement relating to its 2003 Annual Meeting of Shareholders (the "2003 Proxy Statement"), which will be filed within 120 days after December 31, 2002, is incorporated herein by reference in response to this item.

Item 11. *Executive Compensation*

The information under the caption "Executive Compensation and Other Matters" in the 2003 Proxy Statement, which will be filed within 120 days after December 31, 2002, is incorporated herein by reference in response to this item.

Item 12. *Security Ownership of Certain Beneficial Owners and Management*

The information under the caption "Beneficial Ownership of Common Stock by Management of the Company and Principal Shareholders" in the 2003 Proxy Statement, which will be filed within 120 days after December 31, 2002, is incorporated herein by reference in response to this item.

Item 13. *Certain Relationships and Related Transactions*

The information under the caption "Interests of Management and Others in Certain Transactions" in the 2003 Proxy Statement, which will be filed within 120 days after December 31, 2002, is incorporated herein by reference in response to this item.

Item 14. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

The Company's chief executive officer and chief financial officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-14(c) and 15d-14(c)) as of a date (the "Evaluation Date") within 90 days before the filing date of this annual report on Form 10-K, have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were adequate and designed to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to them by others within those entities.

Changes in Internal Controls

There were no significant changes in the Company's internal controls or, to the knowledge of the Company's chief executive officer and chief financial officer, in other factors that could significantly affect the Company's disclosure controls and procedures subsequent to the Evaluation Date.

PART IV

Item 15. Exhibits, Financial Statement Schedules, and Reports on Form 8-K

Consolidated Financial Statements and Schedules

Reference is made to the Financial Statements, the reports thereon, the notes thereto and supplementary data commencing at page F-1 of this Annual Report on Form 10-K. Set forth below is a list of such Financial Statements:

- Independent Auditor's Reports
- Consolidated Balance Sheets as of December 31, 2002 and 2001
- Consolidated Statements of Earnings for the Years Ended December 31, 2002, 2001 and 2000
- Consolidated Statements of Changes in Shareholders' Equity for the Years Ended December 31, 2002, 2001 and 2000
- Consolidated Statements of Cash Flows for the Years Ended December 31, 2002, 2001 and 2000
- Notes to Consolidated Financial Statements

Financial Statement Schedules

All supplemental schedules are omitted as inapplicable or because the required information is included in the Consolidated Financial Statements or notes thereto.

Exhibits

Each exhibit marked with an asterisk is filed with this Annual Report on Form 10-K.

<u>Exhibit Number</u>	<u>Description</u>
2.1	Agreement and Plan of Reorganization dated as of April 23, 1999 between First American Financial Corporation and Guaranty Bancshares, Inc. (incorporated herein by reference to Exhibit 2.1 to the Company's Registration Statement on Form S-4 (Registration No. 333-81881)).

Certifications

I, Arthur B. Scharlach, Jr. certify that:

I have reviewed this annual report on Form 10-K of Guaranty Bancshares, Inc.;

Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;

Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;

The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;

evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and

presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Independent Auditor's Report

The Board of Directors and Stockholders
Guaranty Bancshares, Inc.

We have audited the accompanying consolidated balance sheets of Guaranty Bancshares, Inc. (the Company) as of December 31, 2002 and 2001 and the related consolidated statements of earnings, changes in shareholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. The financial statements for the year ended December 31, 2000 were audited by Fisk & Robinson, P.C. whose partners and employees merged with McGladrey & Pullen, LLP on October 1, 2001 and whose report dated February 9, 2001, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Guaranty Bancshares, Inc. as of December 31, 2002 and 2001, and the results of its consolidated operations and its consolidated cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1, the Company changed its method of accounting for stock-based compensation in connection with the adoption of a new accounting standard.

/s/ MCGLADREY & PULLEN, LLP

Dallas, Texas
January 10, 2003

The report that appears below is a copy of the report issued by Fisk & Robinson, P.C., the previous independent auditor of Guaranty Bancshares, Inc. That firm has discontinued performing auditing and accounting services.

Independent Auditor's Report

The Board of Directors and Stockholders
Guaranty Bancshares, Inc.

We have audited the accompanying consolidated balance sheet of Guaranty Bancshares, Inc. (the Company) as of December 31, 2000 and the related consolidated statement of earnings, changes in shareholders' equity and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. The 1999 and 1998 consolidated financial statements of Guaranty Bancshares, Inc. were audited by other auditors whose report dated January 26, 2000, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Guaranty Bancshares, Inc. as of December 31, 2000, and the results of their operations and their consolidated cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies followed in the preparation of the consolidated financial statements. The policies conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry.

Principles of Consolidation

The consolidated financial statements include the accounts of Guaranty Bancshares, Inc and its wholly-owned subsidiaries Guaranty (TX) Capital Trust I, Guaranty (TX) Capital Trust II, and Guaranty Financial Corp., Inc. which wholly owns Guaranty Bond Bank, formally Guaranty Bank (Bank) and one non-bank subsidiary, Guaranty Company. Guaranty Bond Bank has two wholly-owned non-bank subsidiaries, Guaranty Leasing Company, and GB Com, Inc. All entities combined are collectively referred to as the "Company." All significant intercompany balances and transactions have been eliminated in consolidation.

Nature of Operations

The Company operates ten locations in Northeast Texas and one location in Fort Stockton, Texas. The Company's main sources of income are derived from granting loans primarily in Northeast Texas and investing in securities issued by the U.S. Treasury, U.S. government agencies and state and political subdivisions. A variety of financial products and services are provided to individual and corporate customers. The primary deposit products are checking accounts, money market accounts, and certificates of deposit. The primary lending products are real estate, commercial, and consumer loans. Although the Company has a diversified loan portfolio, a substantial portion of its debtors' abilities to honor contracts is dependent on the economy of the area.

Use of Estimates

To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and actual future results could differ. The allowance for loan losses, fair values of financial instruments, the status of contingencies, and the value of the Company's recorded investment in the Aircraft Finance Trust ("AFT") are particularly subject to change.

Cash Equivalents and Supplemental Cash Flow Information

Cash and cash equivalents include cash, due from banks and interest-bearing deposits with other banks, which have initial maturities under 90 days. Net cash flows are reported for loan and deposit transactions, and short-term borrowings with initial maturities under 90 days.

In 2002, 2001 and 2000, cash paid for interest totaled \$12,505, \$15,974, and \$15,929 and cash paid for income taxes totaled \$1,320, \$104, and \$250. Significant noncash transactions included transfers from loans to other real estate and repossessed assets of \$3,988, \$2,157, and \$903 in 2002, 2001 and 2000.

Securities

Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities are classified as available for sale when they might be sold before maturity. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income. Management determines the appropriate classification of securities at the time of purchase. Restricted securities such as stock in the Independent Bankers Financial Corporation, the Federal Reserve Bank, the Federal Home Loan Bank and Independent Bankers Capital Fund, L.P. are carried at cost.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interest income includes amortization of purchase premiums and discounts. Gains and losses on sales are based on the amortized cost of the security sold. Securities are written down to fair value when a decline in fair value is not temporary.

Loans Held For Sale

Certain residential mortgage loans are originated for sale in the secondary mortgage-loan market. These loans are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses are recognized through a valuation allowance by charges to income. To mitigate the interest rate risk, fixed commitments may be obtained at the time loans are originated or identified for sale.

Loans

Loans are reported at the principal amount outstanding, net of charge-offs, unearned discounts, purchase discounts and an allowance for loan losses. Unearned discounts on installment loans are recognized using a method that approximates a level yield over the term of the loans. Interest on other loans is reported on the level yield interest method and includes amortization of net deferred loan fees and costs over the loan term.

Interest income is not reported when full loan repayment is in doubt, typically when the loan is impaired or payments are past due 90 days or more. Payments received on such loans are reported as principal reductions.

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance is dependent upon a variety of factors, including the performance of the bank's loan portfolio, the economy, changes in real estate values and interest rates and the view of the regulatory authorities toward loan classifications.

Management estimates the allowance balance required, in part, by review of the loan portfolio to evaluate potential problem loans. Potential problem loans are classified and separately monitored by management. Loans classified as "special mention" are those that contain a weakness that, if left unattended, could develop into a problem affecting the ultimate collectibility of the loan. Loans classified as "substandard" are those loans with clear and defined weaknesses such as highly leveraged positions, unfavorable financial ratios, uncertain repayment sources or poor financial condition, which may jeopardize recoverability of the loan. Loans classified as "doubtful" are those loans that have characteristics similar to substandard loans, but also have an increased risk that a loss may occur or at least a portion of the loan may require a charge-off if liquidated at present. Although loans classified as substandard do not duplicate loans classified as doubtful, both substandard and doubtful loans may include some loans that are past due at least 90 days, are on nonaccrual status or have been restructured. Loans classified as "loss" are those loans that are in the process of being charged off.

Loan impairment is reported when full payment under the loan terms is not expected. Loans are evaluated for impairment when payments are delayed, typically 90 days or more, or when analysis of a borrower's operating results and financial condition indicates the borrower's underlying cash flows are not adequate to meet debt service requirements and it is probable that not all principal and interest amounts will be collected according to the original terms of the loan. Impairment is evaluated in total for smaller-balance loans of similar nature such as residential mortgage and consumer loans and on an individual loan basis for other loans. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In addition to allocations made for specific classified loans, general reserve allocations are made after consideration of such factors as past loan loss experience, general prevailing economic conditions, the nature, composition and volume of the loan portfolio, and other qualitative factors based on management's judgment.

While portions of allowance may be allocated for specific credits, the entire allowance is available for any credit that, in management's judgment, should be charged-off.

Premises and Equipment

Premises and equipment are stated at cost, less accumulated depreciation. Depreciation is provided on the straight-line method over the estimated useful lives of the related assets. Maintenance, repairs and minor improvements are charged to noninterest expense as incurred.

Other Real Estate

Assets acquired through, or in lieu of, foreclosure are initially recorded at fair value when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed.

Goodwill

On January 1, 2002, the Company stopped amortizing goodwill and adopted a new policy for measuring goodwill for impairment. No impairment of goodwill was recognized in connection with the adoption of this new policy. Under the new policy, goodwill is assigned to reporting units. The Company currently operates as a single reporting unit and all of the reported goodwill is associated with the entire Company. Goodwill is then tested for impairment at least annually, or on an interim basis if an event occurs or circumstances change that would more-likely-than-not reduce the fair value of the reporting unit below its carrying value. Goodwill is tested for impairment using a two-step approach. The first step is to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired and the second step is not required. If the fair value of the reporting unit is less than its carrying amount, the second step of the impairment test measures the amount of the impairment loss, if any. The second step of the impairment test is to compare the implied fair value of goodwill to its carrying amount. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess. The implied fair value of goodwill is calculated in the same manner that goodwill is calculated in a business combination, whereby the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price. The excess "purchase price" over the amounts assigned to assets and liabilities would be the implied fair value of goodwill.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Prior to January 1, 2002, goodwill had been amortized over a 20 year period. The following table presents reported net income and earnings per common share for the years ended December 31, 2001 and 2000 adjusted to exclude goodwill amortization expense.

	<u>2001</u>	<u>2000</u>
Reported net income	\$ 3,290	\$ 2,508
Add back amortization of goodwill	150	175
Adjusted net income	<u>\$ 3,440</u>	<u>\$ 2,683</u>
Reported earnings per share - basic and diluted	\$ 1.09	\$ 0.80
Add back goodwill amortization	0.05	0.06
Adjusted earnings per share - basic and diluted	<u>\$ 1.14</u>	<u>\$ 0.86</u>

Intangible Assets and Other Long-Lived Assets

Intangible assets with definite useful lives are amortized on a straight-line basis over their estimated useful life. Intangible assets, premises and equipment and other long-lived assets are tested for impairment whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the expected amount to be realized.

Stock Compensation

In accordance with a new accounting standard, *SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure, an Amendment of FASB Statement No. 123,"* the Company transitioned to the fair value method of accounting for stock-based compensation during 2002 using the modified prospective method prescribed by the standard. Under the modified prospective method, the Company began recognizing stock-based employee compensation expense from the beginning of 2002 as if the fair value method had been used to account for all employee awards granted, modified, or settled in fiscal years beginning after December 15, 1994. The fair value of options granted is determined using the Black-Scholes option valuation model. Stock-based employee compensation expense totaled approximately \$49 in 2002. Under the modified prospective method, no stock-based employee compensation expense is recognized for prior periods.

Prior to 2002, stock-based compensation expense under stock option plans was reported only if options were granted below market price at grant date in accordance with the intrinsic value method of Accounting Principles Board (APB) Opinion No. 25.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair Values of Financial Instruments

Fair values of financial instruments are estimated using relevant market information and other assumptions. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates. The fair value estimates of existing on and off balance sheet financial instruments do not include the value of anticipated future business or the value of assets and liabilities not considered financial instruments.

Loss Contingencies

Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated.

Dividend Restriction

Banking regulations require the maintenance of certain capital and net income levels that may limit the amount of dividends that may be paid. Regulatory capital requirements are more fully disclosed in a separate note.

Restrictions on Cash

The Company was required to have \$1,907 and \$705 of cash on hand or on deposit with the Federal Reserve Bank to meet regulatory reserve and clearing requirements at December 31, 2002 and 2001, respectively. Deposits with the Federal Reserve Bank do not earn interest.

Earnings Per Common Share

Basic earnings per share ("EPS") is based on net earnings divided by the weighted-average number of shares outstanding during the period. Diluted EPS includes the dilutive effect of stock options granted using the treasury stock method.

Earnings per common share is computed by dividing net earnings available to common shareholders by the weighted-average number of common shares outstanding for the year. The earnings available to common shareholders and the weighted-average number of common shares outstanding for basic and diluted earnings per share computations were as follows:

GUARANTY BANCSHARES, INC.

Total other comprehensive income	<u>\$ 490</u>	<u>\$ 386</u>	<u>\$ 1,236</u>

Recent Accounting Pronouncements

Statement of Financial Accounting Standards (SFAS) No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS 145 clarifies and simplifies existing accounting pronouncements related to gains and losses from debt extinguishments and certain lease modifications and eliminates certain transitional accounting standards that are no longer necessary. This statement also makes minor technical corrections to various other existing pronouncements. Certain provisions of this statement will become effective for the Company on January 1, 2003, while other provisions became effective for transactions occurring and financial statements issued after May 15, 2002. Adoption of the provisions of this statement that were effective after May 15, 2002 did not have a significant impact on the Company's financial statements. Furthermore, adoption of the remaining provisions of this statement on January 1, 2003 is not expected to have a significant impact on the Company's financial statements.

SFAS No. 147, "Acquisitions of Certain Financial Institutions, an Amendment of FASB Statements No. 72 and 144 and FASB Interpretation No. 9." SFAS 147 removes acquisitions of financial institutions from the scope of both SFAS 72, "Accounting for Certain Acquisitions of Banking or Thrift Institutions," and FASB Interpretation (FIN) No. 9, "Applying APB Opinions No. 16 and 17 When a Savings and Loan Association or a Similar Institution Is Acquired in a Business Combination Accounted for by the Purchase Method," and requires such transactions be accounted for in accordance with SFAS 141, "Business Combinations," and SFAS 142, "Goodwill and Other Intangible Assets." In addition, SFAS 147 amends SFAS 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," to include in its scope long-term customer-relationship intangible assets of financial institutions such as depositor- and borrower-relationship intangible assets and credit cardholder intangible assets. The provisions of SFAS 147 became effective on October 1, 2002. Adoption of this statement did not have a significant impact on financial statements.

(Dollars in thousands)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an Amendment of FASB Statement No. 123." Effective for financial statements issued for fiscal years ending after December 15, 2002, SFAS 148 amends SFAS 123, *"Accounting for Stock-Based Compensation,"* to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. SFAS 148 also amends the disclosure requirements of SFAS 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. As discussed above, the Company transitioned to the fair value method of accounting for stock-based compensation during 2002 using the modified prospective method prescribed by this standard.

Financial Accounting Standards Board Interpretation (FIN) No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others – an Interpretation of FASB Statements No. 5, 57 and 107 and Rescission of FASB Interpretation No. 34." FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The initial recognition and measurement provisions of FIN 45 are applicable on a prospective basis to guarantees issued or modified after December 31, 2002. Implementation of these provisions of FIN 45 is not expected to have a material impact on the Company's financial statements. The disclosure requirements of FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002, and have been adopted in the Company's financial statements for December 31, 2002.

Reclassifications

Some items in prior financial statements have been reclassified to conform with the current presentation.

NOTE 2 – SECURITIES AVAILABLE-FOR-SALE

Year-end securities available for sale were as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
December 31, 2002:				
U. S. government agency securities	\$ 13,728	\$ 399	\$ -	\$ 14,127
Mortgage-backed securities	61,808	1,341	1	63,148
Collateralized mortgage obligations	25,039	281	40	25,280
Equity securities	3,165	-	-	3,165
Obligations of state and political subdivisions	1,225	47	-	1,272
	<u>\$ 104,965</u>	<u>\$ 2,068</u>	<u>\$ 41</u>	<u>\$ 106,992</u>
December 31, 2001:				
U. S. government agency securities	\$ 4,208	\$ 286	\$ -	\$ 4,494
Mortgage-backed securities	33,600	374	22	33,952
Collateralized mortgage obligations	33,920	494	24	34,390
Equity securities	2,112	-	-	2,112
Obligations of state and political subdivisions	6,590	177	-	6,767
	<u>\$ 80,430</u>	<u>\$ 1,331</u>	<u>\$ 46</u>	<u>\$ 81,715</u>

Mortgage-backed securities and collateralized mortgage obligations are backed by pools of mortgages that are insured or guaranteed by the Federal Home Loan Mortgage Corporation (FHLMC), the Federal National Mortgage Association (FNMA) or the Government National Mortgage Corporation (GNMA). Equity securities include stock holdings in Independent Bankers Financial Corporation, the Federal Reserve Bank, the Federal Home Loan Bank, and Independent Bankers Capital Fund, L.P.

At year-end 2002, there were no holdings of securities of any one issuer, other than the U.S. government and its agencies, in an amount greater than 10% of shareholders' equity.

Securities with a fair value of approximately \$57,682 and \$50,141 at December 31, 2002, and 2001, respectively, were pledged to secure public deposits and for other purposes as required or permitted by law.

NOTE 3 – LOANS AND ALLOWANCE FOR LOAN LOSSES

	<u>2002</u>	<u>2001</u>
Commercial	\$ 58,661	\$ 66,642
Agriculture	9,989	8,589
Real estate		
Construction	14,017	9,492
1-4 family residential	139,156	124,480
Farmland	14,765	9,794
Commercial	81,649	68,165
Multi-family residential	9,289	9,333
Consumer	32,429	33,204
Total gross loans	<u>359,955</u>	<u>329,699</u>
Less:		
Unearned discounts	67	78
Allowance for loan losses	3,692	3,346
Total net loans	<u>\$356,196</u>	<u>\$326,275</u>

Loans to executive officers, directors, principal shareholders and their affiliates were as follows:

Beginning balance	\$ 14,674	\$ 12,499
New loans	5,881	14,806
Repayments	(7,114)	(12,631)
Ending balance	<u>\$ 13,441</u>	<u>\$ 14,674</u>

Changes in the allowance for loan losses were as follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Beginning balance	\$ 3,346	\$ 2,578	\$ 2,491
Provision	1,260	1,385	595
Charge-offs	(1,072)	(835)	(678)
Recoveries	158	218	170
Ending balance	<u>\$ 3,692</u>	<u>\$ 3,346</u>	<u>\$ 2,578</u>

Impaired loans were as follows:

	<u>2002</u>	<u>2001</u>
Year-end loans with allowance allocated	\$ 2,810	\$ 3,737
Year-end loans with no allowance allocated	-	-
Impaired loans	<u>2,810</u>	<u>3,737</u>
Amount of the allowance allocated	<u>\$ 913</u>	<u>\$ 508</u>

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 3 – LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

The average balance of impaired loans was \$3,265 in 2002, \$2,973 in 2001 and \$1,121 in 2000. No interest income was recognized on these impaired loans during 2002, 2001 or 2000. There were no commitments to lend additional funds to borrowers whose loans were classified as impaired.

The following table presents information regarding nonperforming assets at the dates indicated:

	December 31,	
	2002	2001
Nonaccrual loans	\$ 2,810	\$ 3,737
Accruing loans past due 90 days or more	404	1,912
Other real estate	1,111	562
Total nonperforming assets	<u>\$ 4,325</u>	<u>\$ 6,211</u>
Nonperforming assets to total loans and other real estate	1.18%	1.87%

If interest on nonaccrual loans had been accrued, such income would have been approximately \$106 in 2002, \$251 in 2001 and \$113 in 2000.

NOTE 4 - PREMISES AND EQUIPMENT

Year-end premises and equipment were as follows:

	<u>2002</u>	<u>2001</u>
Land	\$ 2,604	\$ 2,369
Building and improvements	12,736	12,482
Furniture, fixtures and equipment	4,687	4,255
Automobiles	110	175
	<u>20,137</u>	<u>19,281</u>
Less accumulated depreciation	6,572	5,665
	<u>\$ 13,565</u>	<u>\$ 13,616</u>

Depreciation expense totaled \$992 in 2002, \$984 in 2001 and \$846 in 2000.

NOTE 5 - INTEREST-BEARING DEPOSITS

Year-end interest-bearing deposits were as follows:

	<u>2002</u>	<u>2001</u>
NOW accounts	\$ 39,368	\$ 33,816
Savings and money market accounts	75,745	72,217
Certificates of deposit less than \$100,000	136,483	124,931
Certificates of deposit of \$100,000 or more	104,840	88,589
	<u>\$ 356,436</u>	<u>\$ 319,553</u>

Year-end scheduled maturities of certificates of deposit were as follows:

	<u>2002</u>
2003	\$ 191,478
2004	32,391
2005	5,858
2006	2,927
2007	8,669
Thereafter	-
	<u>\$ 241,323</u>

Deposits of executive officers, directors and significant shareholders totaled \$10,954 and \$11,034 at December 31, 2002 and 2001, respectively.

2007	5.19%	307	307
Thereafter	5.19%	712	712
		2,763	3,092
		\$ 42,763	\$ 33,092

The maximum month-end balance of FHLB advances outstanding was \$52,875 and \$33,145 in 2002 and 2001. Average balances of borrowings outstanding during 2002 and 2001 were \$40,892 and \$12,392. As a member of the FHLB system, the Bank has the ability to obtain borrowings up to a maximum total of \$169,920 subject to the level of qualified, pledgable first lien mortgage loans and FHLB stock owned. The advances are collateralized by a blanket pledge of the Bank's first lien mortgage loan portfolio and FHLB stock. The weighted-average interest rates on these borrowings were 4.02% and 4.88% at December 31, 2002 and December 31, 2001.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 7 – LONG TERM DEBT

In March 2000, the Company, in a private placement, issued \$7,000 (seven thousand shares with a liquidation amount of one thousand dollars per security) of 10.875% fixed rate trust preferred securities through a newly formed, wholly-owned subsidiary, Guaranty (TX) Capital Trust I (the "Trust"). The Trust invested the total proceeds from the sale of the TruPS in 10.875% fixed rate Junior Subordinated Deferrable Interest Debentures (the "Debentures") issued by the Company. The net proceeds from the sale of the Debentures were used to buy back shares of the Company's stock, provide a \$1,502 additional capital contribution to Guaranty Bond Bank and provide for additional working capital to support growth.

With certain exceptions, the amount of the principal and any accrued and unpaid interest on the Debentures are subordinated in right of payment to the prior payment in full of all senior indebtedness of the Company. The terms of the Debentures are such that they qualify as Tier I capital under the Federal Reserve Board's regulatory capital guidelines applicable to bank holding companies, subject to limitations. Interest on the Debentures is payable semi-annually on March 8 and September 8 of each year, commencing September 8, 2000. The interest is deferrable on a cumulative basis for up to five consecutive years following a suspension of dividend payments on all other capital stock. No principal payments are due until maturity on March 8, 2030.

On any March 8 or September 8 on or after March 8, 2010 and prior to maturity, the Debentures are redeemable for cash at the option of the Company, on at least 30 but not more than 60 days notice, in whole or in part, at the redemption prices set forth in the table below, plus accrued interest to the date of redemption.

If Redeemed During 12 Months Beginning March 8,	Percentage of Principal Amount	If Redeemed During 12 Months Beginning March 8,	Percentage of Principal Amount
2010	105.438%	2016	102.175%
2011	104.894%	2017	101.631%
2012	104.350%	2018	101.088%
2013	103.806%	2019	100.544%
2014	103.263%	2020 and after	100.000%
2015	102.719%		

Upon the occurrence of certain special events, the Company will have the right to call the securities at par at any time with the permission of the Federal Reserve.

In October 2002, the Company, in a private placement, issued \$3,000 (three thousand shares with a liquidation amount of one thousand dollars per security) of trust preferred securities through a newly formed, wholly-owned subsidiary, Guaranty (TX) Capital Trust II ("Trust II"). The trust preferred securities will pay quarterly distributions on January 30, April 30, July 30 and October 30 of each year at a fixed rate per annum equal to 7.94% until October 2012 and a variable rate per annum, reset quarterly, equal to LIBOR plus 3.35%, thereafter. Trust II invested the proceeds from the sale of the trust preferred securities in Junior Subordinated Deferrable Interest Debentures II (the "Debentures II") issued by the Company. The net proceeds from the sale of the Debentures II are being used to buy back shares of the Company's stock and provide for additional working capital to support growth.

(Dollars in thousands)

NOTE 7 – LONG TERM DEBT (Continued)

With certain exceptions, the amount of the principal and any accrued and unpaid interest on the Debentures II are subordinated in right of payment to the prior payment in full of all senior indebtedness of the Company. The terms of the Debentures II are such that they qualify as Tier I capital under the Federal Reserve Board's regulatory capital guidelines applicable to bank holding companies. Interest on the Debentures II is payable quarterly at the same rate as dividends are paid on the trust preferred securities. The interest is deferrable at a cumulative basis for up to five consecutive years following a suspension of dividend payments on all other capital stock. No principal payments are due until maturity on October 30, 2032.

On any interest payment date on or after October 30, 2012 and prior to maturity date, the Debentures II are redeemable for cash at the option of the Company, on at least 30 but not more than 60 days notice, in whole or in part, at a redemption price equal to 100% of the principal amount to be redeemed, plus accrued interest to the date of redemption.

Upon the occurrence of certain special events, the Company will have the right to call the securities at a redemption price equal to 100% of the principal amount to be redeemed plus accrued interest to the date of redemption.

Any redemption is subject to the Company obtaining the prior approval of the Federal Reserve.

NOTE 8 - PREFERRED AND COMMON STOCK

A summary of issued and outstanding shares of stock is as follows:

	<u>Issued and Outstanding Preferred Stock</u>	<u>Common Stock Issued</u>	<u>Treasury Stock</u>	<u>Common Stock Outstanding</u>
Balance at January 1, 2000	-	3,250,016	(17,600)	3,232,416
Purchase of treasury stock	-	-	(188,383)	(188,383)
Balance at December 31, 2000	-	3,250,016	(205,983)	3,044,033
Purchase of treasury stock	-	-	(39,605)	(39,605)
Balance at December 31, 2001	-	3,250,016	(245,588)	3,004,428
Purchase of treasury stock	-	-	(74,500)	(74,500)
Exercise of stock options	-	2,000	-	2,000
Balance at December 31, 2002	-	<u>3,252,016</u>	<u>(320,088)</u>	<u>2,931,928</u>

Preferred stock, if outstanding, pays dividends semi-annually. Preferred stock is not cumulative or participating, has no voting rights and is not convertible. Preferred stock has liquidation preferences over common stock of the Company. Dividends on common stock of the Company may not be declared or paid unless dividends for the same period on preferred stock have been paid or declared.

NOTE 9 - STOCK OPTIONS

In 1998, the Company's Board of Directors, with the approval of shareholders, adopted the 1998 Stock Incentive Plan. Under the provisions of this plan, 1,000,000 shares have been reserved for issuance. The plan provides for the grant of nonqualified stock options to certain officers of the Company at exercise prices equal to the fair market value per share of the Company's common stock on the date of the grant. Options granted under the plan generally expire after eight years and generally vest and become exercisable in five equal annual installments commencing on the first anniversary of the date of grant and annually thereafter.

NOTE 9 – STOCK OPTIONS (Continued)

In accordance with a new accounting standard, *SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an Amendment of FASB Statement No. 123,"* the Company transitioned to the fair value method of accounting for stock-based compensation during 2002 using the modified prospective method prescribed by the standard. Under the modified prospective method, the Company began recognizing stock-based employee compensation expense from the beginning of 2002 as if the fair value method had been used to account for all employee awards granted, modified, or settled in fiscal years beginning after December 15, 1994. The fair value of options granted is determined using the Black-Scholes option valuation model. Stock-based employee compensation expense totaled approximately \$49 in 2002. Under the modified prospective method, no stock-based employee compensation expense is recognized for prior periods.

The weighted-average fair value of options granted in 2002 and 2000 was \$4.09 and \$2.03 per option. Fair values of options are estimated at the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions for 2002 and 2000: risk-free interest rates of 5.00% and 6.42%; market price volatility factors of 0.29% and 0.08%; a weighted-average expected life of the options of 8 years; and dividend yields of 2.24% and 2.59%.

Prior to 2002, stock-based compensation expense under stock option plans was reported only if options were granted below market price at grant date in accordance with the intrinsic value method of Accounting Principles Board (APB) Opinion No. 25.

The following pro forma information presents net earnings and earnings per common share for 2001 and 2000 had the fair value method been used to measure compensation cost for stock-based compensation plans. For purposes of these pro forma disclosures, the estimated fair value of the options is amortized to expense over the related vesting periods.

	2001	2000
Net earnings, as reported	\$ 3,290	\$ 2,508
Stock-based employee compensation expense, net of tax	(23)	(17)
Pro forma net earnings	\$ 3,267	\$ 2,491
Earnings per share - basic and diluted:		
As reported	\$ 1.09	\$ 0.80
Pro forma	1.08	0.80

(Dollars in thousands, except per share amounts)

NOTE 10 – EMPLOYEE BENEFITS

The Company maintains an Employee Stock Ownership Plan containing Section 401(k) provisions covering substantially all employees. The plan provides for a matching contribution of up to 4% of qualified compensation. Total contributions accrued or paid for 2002, 2001 and 2000 totaled \$462, \$390 and \$280.

The Company maintains a non-qualified, non-contributory "Supplemental Retirement Plan." The plan covers an executive officer to provide benefits equal to amounts payable under the Company's retirement plan and certain social security benefits to aggregate a predetermined percentage of the final five-year average salary. The plan is non-funded. Amounts accrued or paid for 2002, 2001 and 2000 totaled \$11, \$13 and \$15.

The Company established a non-qualified, non-contributory, "Salary Continuation Plan" in 1998. The plan covers an executive officer to provide benefits equal to an amount which represents 75% of projected compensation at retirement as adjusted for amounts payable under the Company's retirement plan and certain social security benefits. This plan is non-funded. Amounts accrued for 2002, 2001 and 2000 totaled \$116, \$111 and \$100.

During 1998 the Company established a non-qualified, non-contributory, "Executive Incentive Retirement Plan." The plan covers a selected group of key personnel to provide benefits equal to amounts computed under an "award criteria" at various targeted salary levels as adjusted for annual earnings performance of the Company. Amounts accrued for 2002, 2001 and 2000 totaled \$50, \$35 and \$29.

The Company has a bonus plan that provides guidelines whereby key employees can earn bonus compensation based on the profitability of the Company. The bonus amounts are determined based on the Company's achievement of certain percentages of return on equity targets. This plan is approved and adopted annually by the Board of Directors of the Company at the first board meeting of the year. The bonus pool under this plan for 2002, 2001 and 2000 totaled \$874, \$679 and \$444.

NOTE 11 - INCOME TAXES

The sources of year-end gross deferred income tax assets and liabilities were as follows:

	<u>2002</u>	<u>2001</u>
Deferred tax assets:		
Allowance for loan losses	\$ 995	\$ 878
Deferred Compensation	240	197
Other	15	56
Total deferred tax asset	<u>\$ 1,250</u>	<u>\$ 1,131</u>
Deferred tax liabilities:		
Security basis	\$ (90)	\$ (69)
Unrealized gain on available-for-sale securities	(689)	(437)
Depreciation	(1,160)	(1,039)
Leasing transactions	(902)	(576)
Deferred loan costs, net	(399)	(403)
Other	(47)	(47)
Total deferred tax liability	<u>\$ (3,287)</u>	<u>\$ (2,571)</u>
Net deferred tax liability	<u>\$ 2,037</u>	<u>\$ 1,440</u>

A reconciliation of the Company's effective income tax rate and the statutory federal income tax rate for each reported period is as follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Statutory federal income tax rate	34.00%	34.00%	34.00%
Tax exempt income	(2.76)	(3.68)	(4.58)
Recognition of benefit on lease and AFT transactions	(7.40)	(1.18)	(13.82)
Other, net	0.53	2.25	7.54
Effective income tax rate	<u>24.37%</u>	<u>31.39%</u>	<u>23.14%</u>

Guaranty Leasing Company is a substantial partner in various complex equipment leasing transactions primarily originated in 1992, 1994 and 1995 involving leveraged leases. In November 1998, Guaranty Leasing was informed by the Internal Revenue Service (the "Service") that it has taken the position that certain losses taken by one of the three Partnerships during 1994, 1995 and 1996 of \$302, \$410, and \$447, respectively, would be disallowed. In October 2001, Guaranty Leasing was informed by the Service that it has taken the position that certain losses taken by that Partnership during 1997 of \$487, would also be disallowed. In September 2002, the Company received from the Service a Notice of Final Partnership Administrative Adjustment ("FPAA") disallowing these deductions. Based upon the advice of counsel, the Company believes that it has correctly reported these transactions for tax purposes and that it has obtained appropriate legal, accounting and appraisal opinions and authority to support its positions. However as of December 31, 2002, the Company has recorded and expensed the tax affect of the disallowed deductions. On February 3, 2003, the Company filed a petition to begin the process to litigate the matter in the United States District Court for the Eastern District of Texas. Any final determination with respect to the Partnership will be binding on the Company. Should the Service pursue an investigation of and ultimately disallow the related tax deductions taken during the remaining years of the above partnership as well as the other two partnerships, the Company will be required to recognize an additional maximum tax liability of approximately \$3,900 plus possible penalty and interest. The Company is actively contesting the position of the Service in connection with this matter, and will take appropriate steps necessary to protect its legal position.

GUARANTY BANCSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2002, 2001 and 2000
(Dollars in thousands)

NOTE 12 – NONINTEREST INCOME AND NONINTEREST EXPENSE

Other noninterest income consisted of the following:

	Years Ended December 31,		
	2002	2001	2000
Fee income	\$ 863	\$ 668	\$ 663
Fiduciary income	163	136	109
Earnings from key-man life insurance	236	204	234
Gain on sale of loans	272	98	-
Gain on sale of assets	97	36	38
Gain on sale of other real estate	12	176	21
Income from lease transactions	-	-	19
Income from investment in AFT	-	140	145
Impairment of investment in AFT	-	(1,500)	-
Gain on settlement of litigation	-	3,000	-
Other noninterest income	76	149	132
	<u>\$ 1,719</u>	<u>\$ 3,107</u>	<u>\$ 1,361</u>

Disregarding the Company's one time gain on settlement of litigation of \$3,000 and impairment charge from its AFT investment of \$1,500 in 2001, the Company's recurring noninterest income was \$1,719, \$1,607, and \$1,361 in 2002, 2001, and 2000.

Gain on the settlement of litigation represents the amount received in January 2002 in connection with the November 2001 settlement and concurrent transfer of the Company's rights to certain intangible assets. Estimated costs related to compliance with the provisions of the settlement agreement have been accrued and recorded in the accompanying financial statements.

During 2000, Guaranty Leasing, acquired a 2.5% ownership interest in AFT for approximately \$2,800. The AFT ownership interest is classified as an Other Asset on the Company's balance sheet. As of December 31, 2002 and 2001, the book value of the AFT ownership interest was \$1,600.

During the fourth quarter of 2001, on belief that the Company's investment in AFT was impaired by declines in air travel and reduced demand for commercial aircraft, an impairment charge of \$1,500 was recorded and the carrying amount of the investment was reduced to \$1,577. During the third quarter of 2001, AFT recorded an impairment charge of \$18,158 related to two airplanes. In addition, management received indications the appraised value of AFT's fleet of airplanes had declined approximately 9% from their value the past year. Based on these factors, the limited marketability of the investment, the uncertainty surrounding the air transport industry and general economic conditions, management believed that the value of its investment in AFT was permanently impaired.

NOTE 12 – NONINTEREST INCOME AND NONINTEREST EXPENSE (Continued)

Other noninterest expense consisted of the following:

	Years Ended December 31,		
	2002	2001	2000
Legal and professional fees	\$ 933	\$ 864	\$ 646
Director and committee fees	534	412	389
Advertising	310	278	357
ATM and debit card expense	317	279	230
Office and computer supplies	265	429	357
Postage	187	180	156
Phone expense	194	188	185
Other	1,249	1,396	1,271
	<u>\$ 3,989</u>	<u>\$ 4,026</u>	<u>\$ 3,591</u>

NOTE 13 – COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Company enters into various transactions, which, in accordance with generally accepted accounting principles, are not included in the consolidated balance sheets. These transactions are referred to as "off-balance sheet commitments." The Company enters into these transactions to meet the financing needs of its customers. These transactions include commitments to extend credit and letters of credit, which involve elements of credit risk in excess of the amounts recognized in the consolidated balance sheets. The Company minimizes its exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures.

The Company enters into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Customers use credit commitments to ensure that funds will be available for working capital purposes, for capital expenditures and to ensure access to funds at specified terms and conditions. Substantially all of the Company's commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. Management assesses the credit risk associated with certain commitments to extend credit in determining the level of the allowance for credit losses.

Letters of credit are written conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The Company's policies generally require that letters of credit arrangements contain security and debt covenants similar to those contained in loan agreements. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount shown in the table below. If the commitment is funded, the Company would be entitled to seek recovery from the customer. As of December 31, 2002 and 2001, no amounts have been recorded as liabilities for the Bank's potential obligations under these guarantees.

Commitments and letters of credit outstanding at year-end were as follows:

	Contract or	
	Notional Amount	
	2002	2001
Commitments to extend credit	\$ 27,838	\$ 21,394
Letters of credit	1,140	1,042

NOTE 13 – COMMITMENTS AND CONTINGENCIES (Continued)

The Company is involved in certain claims and lawsuits occurring in the normal course of business. Management, after consultation with legal counsel, does not believe that the outcome of these actions would have a material impact on the financial statements of the Company.

Guaranty Leasing Company, a non-bank subsidiary of the Bank, was a partner in various equipment leasing transactions involving leveraged leases. The transactions were structured as “wrap leases” under which the partnerships are the lessees with respect to the owners of the equipment and are the sublessors under the sublease with the users. During 2000, the Company sold its remaining interest in the wrap leases.

NOTE 14 - REGULATORY MATTERS

Banks and bank holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting, and other factors. Failure to meet minimum capital requirements can initiate regulatory action. Management believes, as of December 31, 2002 and 2001, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

Tier 1 capital to average assets:						
Consolidated	36,490	8.44%	17,288	4.00%		n/a
Bank	35,624	8.25%	17,269	4.00%	21,587	5.00%

As of December 31, 2002 and 2001, the Bank met the level of capital required to be categorized as well capitalized under prompt corrective action regulations. Management is not aware of any conditions subsequent to December 31, 2002 that would change the Bank's capital category.

The Bank is a state-chartered banking association and therefore is subject to regulation, supervision and examination by the Texas Department of Banking. The Bank is also a member of the Federal Deposit Insurance Corporation ("FDIC"). Because the Federal Reserve Bank ("FRB") regulates the bank holding company parent of the Bank, the FRB also has supervisory authority that directly affects the Bank. In addition, upon making certain determinations with respect to the condition of any insured bank, such as the Bank, the FDIC may begin proceedings to terminate a bank's federal deposit insurance.

Dividends paid by the Company are mainly provided by dividends from its subsidiaries. However, certain restrictions exist regarding the ability of its bank subsidiary to transfer funds to the Company in the form of cash dividends, loans or advances. These guidelines do not currently restrict the Bank from paying normal dividends to the Company.

NOTE 15 - FAIR VALUES OF FINANCIAL INSTRUMENTS

The estimated fair value approximates carrying value for financial instruments except those described below:

Securities: Fair values for securities are based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar instruments.

Loans: The fair value of fixed-rate loans and variable-rate loans which reprice on an infrequent basis is estimated by discounting future cash flows using the current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality.

Deposits: The fair value of deposit liabilities with defined maturities and long-term debt is estimated by discounting future cash flows using the interest rates currently offered for deposits or similar borrowings of similar remaining maturities.

FHLB Advances and Long-Term Debt: The fair value of borrowings is estimated by discounting future cash flows using currently available rates for similar financing.

Off-Balance-Sheet Instruments: The fair values of these items are not material and are therefore not included on the following schedule.

The estimated year-end fair values of financial instruments are detailed in the following table. The fair value of financial instruments is defined as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

	<u>2002</u>		<u>2001</u>	
	<u>Carrying Amount</u>	<u>Estimated Fair Value</u>	<u>Carrying Amount</u>	<u>Estimated Fair Value</u>
Financial assets:				
Cash and cash equivalents	\$ 18,244	\$ 18,244	\$ 15,410	\$ 15,410
Federal funds sold	1,530	1,530	4,395	4,395
Securities available for sale	106,992	106,992	81,715	81,715
Loans held for sale	5,727	5,727	1,634	1,634
Loans, net	356,196	356,968	326,275	329,439
Accrued interest receivable	3,002	3,002	3,167	3,167
Cash surrender value of life insurance	5,860	5,860	5,178	5,178
Financial liabilities:				
Deposits	\$ 424,950	\$ 426,481	\$ 383,279	\$ 378,641
FHLB advances	42,763	44,287	33,092	32,692
Long-term debt	10,000	12,505	7,000	7,663
Accrued interest payable	1,150	1,150	1,383	1,383

While these estimates of fair value are based on management's judgment of appropriate factors, there is no assurance that, were the Company to have disposed of such items at December 31, 2002 and 2001, the estimated fair values would necessarily have been achieved at those dates, since market values may differ depending on various circumstances. The estimated fair values at December 31, 2002 and 2001, should not necessarily be considered to apply at subsequent dates.

NOTE 15 - FAIR VALUES OF FINANCIAL INSTRUMENTS (Continued)

In addition, other assets, such as property and equipment, and liabilities of the Company that are not defined as financial instruments are not included in the above disclosures. Also, nonfinancial instruments typically not recognized in financial statements nevertheless may have value but are not included in the above disclosures. These include, among other items, the estimated earning power of core deposit accounts, the trained work force, customer goodwill and similar items.
