SYNEX INTERNATIONAL ANNOUNCES PROJECT SHORTLISTINGS BY BCHYDRO

Synex International Inc announces that one of the potential projects of its wholly owned subsidiary, Synex Energy Resources Ltd, has been short listed by BC Hydro under its 2002/2003 Green Power Generation Procurement Process (the "Process"). The next step in the Process will be for Synex Energy to provide a further technical submission and the pricing of proposed electricity sales. The Cypress Creek Hydro Project is to be located on Vancouver Island with an expected capacity of about 3 MW.

In addition, the Forrest Kerr Hydroelectric Project (the "Project") of Coast Mountain Power Corp., was also short listed by BC Hydro. Synex Energy is a significant shareholder in Coast Mountain, holding about 9% of its outstanding shares. The Project is to be located in northwestern British Columbia and has an expected capacity of about 100 MW. During March 2003, Coast Mountain also announced that the Environmental Assessment Certificate was received as well as the signing of a memorandum of understanding with Sino Energy Consortium (Canada) Ltd. covering the development and financing of the equity and subordinated debt portions of the Project.

Synex International Inc is a public company listed on the Toronto Stock Exchange with businesses that cover the development, ownership and operation of electrical generation facilities and the provision of consulting engineering services in water resources, particularly hydroelectric facilities.
