- Exploration Drilling in Progress

Diamond drilling has commenced on the Bellechasse Property of Golden Hope Mines Limited in the Eastern Townships, south of Quebec City, Quebec. The initial drill holes will explore untested anomalous conditions indicative of possible underlying gold occurrences peripheral to the established Bellechasse Deposit. The Bellechasse Deposit is a partially defined concentration of gold mineralization exposed by stripping over an area approximately 600 feet by 600 feet. Further definition work on the deposit consisting of bulk sampling and large core drilling is scheduled for the summer of 2003.
