Transaction Overview

Collateral:	As of the Cut-off Date, the Mortgage Loans will consist of approximately 1,859 seasoned, fixed-rate, first and second lien, closed-end, mortgage loans. The aggregate outstanding principal balance of all of the Mortgage Loans is approximately \$169,304,340 as of the Cut-off Date. As of the Cut-off Date, approximately 3.5% of the Mortgage Loans are 30-59 days delinquent. Approximately 19.92% of the Mortgage Loans are Daily Simple Interest Loans.		
Daily Simple Interest Loans:	The Daily Simple Interest Loans provide for substantially equal monthly payments that are allocated to principal and interest according to the daily simple interest method. Each monthly payment consists of an installment of interest which is calculated according to the simple interest method on the basis of the outstanding principal balance of the mortgage loan multiplied by the stated note rate and further multiplied by a fraction, the numerator of which is the number of days in the period elapsed since the last day interest was paid and the denominator of which is 365 days, as opposed to the customary method, on which 30 days of interest is owed each month irrespective of the day on which the payment is received. As payments are received, the amount received is applied first to interest accrued to the date of payment and the balance is applied to reduce the unpaid principal balance. Accordingly, if a mortgagor pays a fixed monthly installment before its scheduled due date, the portion of the payment allocable in interest for the period since the preceding payment was made will be less than it would have been had the payment been made as scheduled, and the portion of the payment applied to reduce the unpaid principal balance will be correspondingly greater. However, if the next succeeding payment is made on the due date, a greater amount will be allocated to interest than would be the case if the previous payment had also been on the due date. Conversely, if a mortgagor pays a fixed monthly installment after its scheduled due date, the portion of the payment allocable to interest for the period since the preceding payment was made will be greater than it would have been had the payment been made as scheduled, and the remaining portion, if any, of the payment applied to reduce the unpaid principal balance will be correspondingly less. If each scheduled payment is made on or prior to its scheduled due date, the principal balance of the mortgage loan will amortize in the manner described above. However, if the mortgagor consistently makes scheduled payments after the scheduled due date the mortgage loan will amortize more slowly than scheduled. Any remaining unpaid principal is payable on the final maturity date of the mortgage loan.

enough principal and interest on the Mortgage Loans to distribute to the holders of the Class A Certificates all principal and interest amounts to which they are then entitled.

Once Realized Losses have been allocated to the Mezzanine Certificates the principal amount of the reduction in the Certificate Principal Balance of such certificates will no longer accrue interest and will not be reinstated thereafter. However, allocated Realized Losses may be paid to the holders of the Mezzanine Certificates from Net Monthly Excess Cashflow, to the extent of funds available.

**Required
Overcollateralization
Amount:**

Overcollateralization refers to the amount by which the aggregate principal balance of the Mortgage Loans exceeds the Certificate Principal Balance of the Certificates. This excess (the "Overcollateralization Amount") is intended to protect the certificateholders against shortfalls in payments on the Certificates. The Overcollateralization Amount for the Certificates will initially be 0.00% and is anticipated to build to approximately 0.50% of the aggregate principal balance of the Mortgage Loans as of the Cut-off Date (the "Required Overcollateralization Amount"). On or after the Stepdown Date and provided that a trigger event is not in effect, the Required Overcollateralization Amount may be permitted to decrease to approximately 1.00% of the ending aggregate principal balance of the Mortgage Loans as of such Due Period, subject to a floor amount of approximately 0.50% of the aggregate outstanding principal balance of the Mortgage Loans as of the Cut-off Date. If, due to losses, the Overcollateralization Amount is reduced below the Required Overcollateralization Amount, excess spread, if any is available will be paid to the Certificates then entitled to receive distributions in respect of principal in order to reduce the Certificate Principal Balance of such Certificates to the extent necessary to reach the Required Overcollateralization Amount.

**Overcollateralization
Increase Amount:**

An Overcollateralization Increase Amount for any Distribution Date is the amount of Net Monthly Excess Cashflow actually applied as an accelerated payment of principal to the extent the Required Overcollateralization Amount exceeds the current Overcollateralization Amount.

**Overcollateralization
Reduction Amount:**

An Overcollateralization Reduction Amount for any Distribution Date is the amount by which the current Overcollateralization Amount exceeds the Required Overcollateralization Amount after taking into account all other distributions to be made on the Distribution Date limited to the distribution of principal on the Mortgage Loans.

Stepdown Date:

Is the earlier of (i) the first Distribution Date on which the Certificate Principal Balances of the Class A Certificates have been reduced to zero and (ii) the later to occur of (x) the Distribution Date occurring in April 2008 and (y) the first Distribution Date on which the Credit Enhancement Percentage (calculated for this purpose only after taking into account distributions of principal on the Mortgage Loans, but prior to any distribution of principal to the holders of the Certificates) is equal to or greater than approximately 12.50%.

Transaction Overview (Cont.)

Credit Enhancement Percentage: The Credit Enhancement Percentage for any class and any Distribution Date is the percentage obtained by dividing (x) the aggregate Certificate Principal Balance of the Class M Certificates and Class CE Certificates by (y) the aggregate principal balance of the Mortgage Loans, as of the last day of the related Due Period calculated after giving effect to scheduled payments of principal due during the related Due Period, to the extent received or advanced, and unscheduled collections of principal received during the related Prepayment Period and after reduction for Realized Losses incurred on the Mortgage Loans during the related Prepayment Period and distribution of the Principal Distribution Amount to the holders of the Certificates then entitled to distributions of principal on the Distribution Date.

Net Monthly Excess Cashflow: For any Distribution Date is equal to the sum of (i) any Overcollateralization Reduction Amount and (ii) the excess of the Available Distribution Amount over the sum of (x) with respect to the Class A Certificates, the Senior Interest Distribution Amount for such Distribution Date, (y) with respect to the Mezzanine Certificates, the aggregate Interest Distribution Amount for such Distribution Date and (z) the amount of principal required to be distributed to the holders of the Certificates on such Distribution Date.

Net WAC Pass-Through Rate: Offered Certificates: A per annum rate (calculated on a 30/360 basis) equal to the weighted average of the Expense Adjusted Mortgage Rates of Mortgage Loans.

*Current Updated CLTV's are calculated by taking the updated CLTV for all the loans. Updated CLTV's for the loans are calculated by taking the UPB as of the Cut-off date plus the senior balance, in the case of second liens, divided by the BPO value, if available. If a BPO was not available, then an AVM was used as the property value. If neither a BPO nor an AVM was available, the Original Appraisal Value was used. For purposes of calculating updated CLTV's, a BPO was used for 24.72% of the Mortgage Loans by balance, an AVM was used for 73.57% of the Mortgage Loans by balance, and an Original Appraisal Value was used for 1.71% of the Mortgage Loans by balance.
