Letter to Contract Owners

December 31, 2004

During the first three quarters of 2004, the stock market produced lackluster results, as concerns over rising oil prices, a weakening dollar, the Iraqi war, and the presidential election put a drag on the economy and the market. In the final quarter of the year, however, the market experienced a dramatic turnaround. The elections in November and a significant drop in oil prices beginning in October served as catalysts for the change, and gains made during the fourth quarter accounted for most of the return in the stock market for the year.

The S&P 500 Index (a widely used benchmark of U.S. equity performance) gained 10.88% for the year. Small capitalization stocks and international equities were the strongest performers, as measured by the S&P SmallCap 600 Index, which gained 22.65%, and the EAFE Index, which was up 20.70% for the year.

The bond market also posted positive returns for the year, with high yield bonds significantly outperforming investment grade bonds. The total return of the Merrill Lynch Domestic Master Index (a broad-based bond index) was 4.34% for the year, while high yield bonds returned 10.85%, as measured by the Lehman High Yield Intermediate Market Index (an index of non-investment grade bonds).

Credit spreads narrowed during the year as bond investors looking for higher yields took on more credit risk rather than locking in longer term bonds. Yields on Treasuries remained basically unchanged over the year, as investors seeking higher yields put money in more speculative areas of the bond market. The 10-year Treasury started the year at 4.25% and ended at 4.22%; the 30-year Treasury bond began the year at 4.89%, and finished at 4.83%.

Through most of the first half of 2004, short-term interest rates remained at 45-year lows, where they had been unchanged since mid 2003. Beginning in June, however, the Federal Reserve began a series of interest rate increases, and by year end the federal funds rate stood at 2.25%, up from 1.00%. The Federal Reserve has indicated that it will continue to increase rates in 2005, although a variety of economic variables could impact its decisions on rates in the coming months.

Although the consensus calls for 3.0% to 3.5% growth in GDP in 2005, a number of concerns compel us to urge caution. The fiscal and monetary policies that have stimulated the economy over the past two years are behind

us, with the immediate impact of the 2003 tax cuts already factored into the economy and the Fed signaling its intention to raise rates further.

This late in the business cycle, we believe investors would be wise to moderate their expectations for returns in both stocks and bonds. The market is currently "priced for perfection." If the year ahead turns out to be less than perfect, some asset classes could give back returns of the past few years. We believe we are closer to the time when investors should hold on to past returns rather than chase yields and returns. All markets now have had a nice run up and most asset classes are rich compared to historic standards. We believe a well-balanced portfolio — one diversified between stocks and bonds, as well as among foreign and domestic investments — is the wisest course of action.

As always, at Northwestern Mutual we take very seriously our commitment to the highest quality investment management and ethical business practices. We appreciate the trust you have placed in our organization, and will work steadfastly in 2005 to preserve that trust.

How To Get More Information

Northwestern Mutual Express:

1-800-519-4665

The Express Line gives Trustees (or Owners) convenient up-to-date information about your contract with a contract number and a Personal Identification Number (PIN). Call toll-free to review contract values and unit values, transfer among portfolios, change the allocation and obtain fund performance information.

Information on the Internet:

Northwestern Mutual Financial Network
WWW.NMFN.COM

For information about Northwestern Mutual visit us on our Website. Included is information on Daily Variable Annuity Unit Value Prices, Current Performance, and Fund Information. Contact Your Northwestern Mutual Investment Services representative if you have questions about your contract or any of the contract owner privileges.

Contract Owner Privileges

When the Owner is the Trustee of a qualified employee trust, the exercise of any contract owner privileges by the Trustee must be consistent with the terms and provisions of the qualified plan under which the contract is maintained. Northwestern Mutual shall have no duty to question any actions directed by the Trustee/Owner.

Free Transfers Among Portfolios

You can change your investment allocation or transfer values among the portfolios by calling the Northwestern Mutual Express line at 800-519-4665. Also, you can Mail or Fax the request forms to the Home Office for the same day changes.

Northwestern Mutual is not currently charging a fee for transfers, but reserves the right to charge \$25 for each transfer exceeding 12 in a contract year. The amount and timing restrictions discussed here do not apply to interest sweeps from the GIF to the variable funds. The GIF is ONLY available in the Front-Load design in NJ, OR, UT, WA, and the GIF is NOT available in either design in MA.

Contract Owner Communications

Northwestern Mutual Express gives you 24-hour access to your contract. You receive Confirmation Statements on each transaction, VA Quarterly Summary Statements, and the Annuity Aspects Newsletter providing financial and annuity information.

Automatic Investment Plan

You can invest via the Electronic Funds Transfer (EFT) Plan. Your bank can transmit money safely and quickly from your bank checking or NOW account.

A program of regular investing cannot assure a profit or protect against a loss in a declining market.

Automatic Dollar Cost Averaging Plan

Your money is automatically transferred from the Money Market Portfolio to any of the variable portfolios on a monthly, quarterly or semi-annual basis.

Dollar cost averaging does not assure a profit or protect against loss in a declining market. Carefully consider your willingness to continue payments during periods of low prices.

Portfolio Rebalancing

To help maintain your asset allocation plan percentage over time, this service will automatically readjust the asset allocations back to the desired specified percentages.

Only contracts with accumulation value of \$10,000 or more are eligible. Portfolio rebalancing may only be used with the variable funds, not the Guaranteed Interest Fund, and may not be used in conjunction with dollar cost averaging.

All investments are subject to market risks and a loss of principal. The investment return and principal value will fluctuate, and when sold, may be more or less than their original cost, and could result in a taxable event.

Interest Sweeps

The Interest Sweep service will automatically sweep or transfer interest earnings from the Guaranteed Interest Fund (GIF) to any of the variable investment options. Interest earnings can be swept monthly, quarterly, semi-annually or annually.

Only contracts with \$10,000 or more in the GIF are eligible. The amount and timing restrictions that ordinarily apply to transfers between the GIF and the variable funds do not apply to interest sweeps. The GIF is ONLY available in the Front-Load design in NJ, OR, UT, WA, and the GIF is NOT available in either design in MA.

Systematic Withdrawal Plan

While your contract is in the accumulation phase, you can arrange to automatically withdraw money to generate a payment stream.

Special Withdrawal Privilege

You can withdraw 10% of the contract's accumulation value without a surrender charge, if the contract has at least a \$10,000 balance, beginning on the first contract anniversary.

Terminal Illness Benefit*

Withdrawal charges are waived if the primary Annuitant is terminally ill and has a life expectancy of 12 months or less.

Nursing Home Benefit*

Withdrawal charges are waived after the first contract anniversary if the primary annuitant's confinement is medically necessary for at least 90 consecutive days in a licensed nursing facility or hospital.

*The benefit is not available in MA, NJ, NY and TX.

Performance Summary for NML Variable Annuity Account A

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performances may be lower or higher than the performance data quoted. For the most recent month-end performance information visit www.nmfn.com.

All total return figures are for divisions of NML Variable Annuity Account A and are based on the change in unit value, which reflects expenses, such as account charges and fees applied at the contract level; figures for the Front Load contract reflect a maximum sales load of 4% for the Series QQ and 4.5% for the Series RR; figures for the Series QQ Back Load contract with surrender reflect deductions for a maximum 8% withdrawal charge, declining at a rate of 1% per year; figures for the Series RR Back Load contract with surrender reflect deductions for a maximum 6% withdrawal charge for the first three years, declining at a rate of 1% per year thereafter. The data reflects an initial contract size of \$10,000 for the Front Load (minimum size) and \$1,000 for the Back Load. Performance data quoted represents past results and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that, when redeemed, it may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Performance for other separate accounts will differ.

- (a) Returns stated are as of the inception date of the portfolio which precedes availability in Account A. See the following footnotes for portfolio inception dates.
- (b) Inception date of 4/30/99.
- (c) Inception date of 7/31/01.
- (d) Inception date of 5/1/03.
- (e) Inception date of this division in the Account A was 5/1/03. Actual fund inception was 12/28/98. Performance quoted prior to 5/1/03 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (f) Inception date of this division in Account A was 4/30/99. Actual fund inception was 1/2/97. Performance quoted prior to 4/30/99 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (g) 10 year return for this division in Account A.
- (h) For the seven-day period ended December 31, 2004, the Money Market Portfolio's yield was 2.17% and was equivalent to a compound effective yield of 2.20%. The seven-day yield does not include deductions that are included in the separate accounts. The yield quotation more closely reflects the current earnings of the Money Market Portfolio than the total return quotation.
- (j) Returns shown include any fee waivers in effect and deductions for all Fund expenses. In the absence of fee waivers, total return would be less. For the Money Market Division, total returns include the effect of a fee waiver from December 2, 2002 through December 31, 2004, which ended on December 31, 2004.

All total return figures are for divisions of NML Variable Annuity Account A and are based on the change in unit value, which reflects expenses, such as account charges and fees applied at the contract level; figures for the Front Load contract reflect a maximum sales load of 4% for the Series QQ and 4.5% for the Series RR; figures for the Series QQ Back Load contract with surrender reflect deductions for a maximum 8% withdrawal charge, declining at a rate of 1% per year; figures for the Series RR Back Load contract with surrender reflect deductions for a maximum 6% withdrawal charge for the first three years, declining at a rate of 1% per year thereafter. The data reflects an initial contract size of \$10,000 for the Front Load (minimum size) and \$1,000 for the Back Load. Performance data quoted represents past results and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that, when redeemed, it may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Performance for other separate accounts will differ.

- (a) Returns stated are as of the inception date of the portfolio which precedes availability in Account A. See the following footnotes for portfolio inception dates.
- (b) Inception date of 4/30/99.
- (c) Inception date of 7/31/01.
- (d) Inception date of 5/1/03.
- (e) Inception date of this division in the Account A was 5/1/03. Actual fund inception was 12/28/98. Performance quoted prior to 5/1/03 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (f) Inception date of this division in Account A was 4/30/99. Actual fund inception was 1/2/97. Performance quoted prior to 4/30/99 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (g) 10 year return for this division in Account A.
- (h) For the seven-day period ended December 31, 2004, the Money Market Portfolio's yield was 2.17% and was equivalent to a compound effective yield of 2.20%. The seven-day yield does not include deductions that are included in the separate accounts. The yield quotation more closely reflects the current earnings of the Money Market Portfolio than the total return quotation.
- (j) Returns shown include any fee waivers in effect and deductions for all Fund expenses. In the absence of fee waivers, total return would be less. For the Money Market Division, total returns include the effect of a fee waiver from December 2, 2002 through December 31, 2004, which ended on December 31, 2004.

Annualized	15.33%	12.40%	—	6.22%	—	26.66%	8.60%
Since portfolio inception(a)	—	—	—	—	—	—	—
Annualized	—	—	—	—	—	—	—
Current Yield(h)	—	—	—	—	—	—	—

All total return figures are for divisions of NML Variable Annuity Account A and are based on the change in unit value, which reflects expenses, such as account charges and fees applied at the contract level; figures for the Front Load contract reflect a maximum sales load of 4% for the Series QQ and 4.5% for the Series RR; figures for the Series QQ Back Load contract with surrender reflect deductions for a maximum 8% withdrawal charge, declining at a rate of 1% per year; figures for the Series RR Back Load contract with surrender reflect deductions for a maximum 6% withdrawal charge for the first three years, declining at a rate of 1% per year thereafter. The data reflects an initial contract size of \$10,000 for the Front Load (minimum size) and \$1,000 for the Back Load. Performance data quoted represents past results and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that, when redeemed, it may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Performance for other separate accounts will differ.

- (a) Returns stated are as of the inception date of the portfolio which precedes availability in Account A. See the following footnotes for portfolio inception dates.
- (b) Inception date of 4/30/99.
- (c) Inception date of 7/31/01.
- (d) Inception date of 5/1/03.
- (e) Inception date of this division in the Account A was 5/1/03. Actual fund inception was 12/28/98. Performance quoted prior to 5/1/03 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (f) Inception date of this division in Account A was 4/30/99. Actual fund inception was 1/2/97. Performance quoted prior to 4/30/99 is based on actual investment experience, adjusted for expenses of the product and premium charges.
- (g) 10 year return for this division in Account A.
- (h) For the seven-day period ended December 31, 2004, the Money Market Portfolio's yield was 2.17% and was equivalent to a compound effective yield of 2.20%. The seven-day yield does not include deductions that are included in the separate accounts. The yield quotation more closely reflects the current earnings of the Money Market Portfolio than the total return quotation.
- (j) Returns shown include any fee waivers in effect and deductions for all Fund expenses. In the absence of fee waivers, total return would be less. For the Money Market Division, total returns include the effect of a fee waiver from December 2, 2002 through December 31, 2004, which ended on December 31, 2004.

Guaranteed Interest Fund (GIF)

Description:

Amounts you invest in the Guaranteed Interest Fund earn interest at rates we declare from time to time. We will guarantee the interest rate for each amount for at least one year. The interest rate will be at an annual effective rate of the minimum guaranteed rate for the state of issue, which is in the contract. At the expiration of the period for which we guarantee the interest rate, we will declare a new interest rate. We credit interest and compound it daily.

Each purchase payment or amount transferred to the GIF becomes part of Northwestern Mutual's general assets, which are all of the Company's assets except those held in separate accounts.

The GIF is ONLY available in the Front-Load design in NJ, OR, UT, WA, and the GIF is NOT available in either design in MA.

Net Assets:

\$460 million

† These rates do not reflect the \$30 annual contract fee. The maximum transfer amount from the GIF to a variable fund can not be less than \$1,000 or greater than \$50,000. The limit does not apply in New York. Investments in the GIF are subject to a maximum limit of \$100,000 without our prior consent. In states where the annual effective interest rate may not be less than 3% in all years, the maximum limit without our consent is \$50,000. For contracts issued prior to September 2, 2003, or pending state approval, investments in the GIF are subject to a maximum limit of \$1 million (\$250,000 in New York) without prior consent. Contractual minimum rates vary by state.

* The "MINIMUM GUARANTEED" could range from 1.0% to at least 3.0% depending on your state. Please consult with your Financial Representative or call the Customer Service Line at 1-888-455-2232 to get the current GIF interest rate in your state.

Small Cap Growth Stock Portfolio

Objective:

Maximum long-term appreciation of capital

Portfolio Strategy:

Strive for the highest possible rate of capital appreciation by investing in companies with potential for rapid growth.

Net Assets:

\$442 million

The Small Cap Growth Stock Portfolio seeks long-term growth of capital. The Portfolio seeks to achieve this objective by investing in emerging companies with rapidly growing revenues and earnings supported by financial strength and capable management. Holdings are smaller companies with a median market capitalization of approximately \$1 billion; the range of market capitalization is generally between \$200 million and \$3 billion. A strong orientation to quality and a commitment to broad diversification mean that this Portfolio is generally less risky and less volatile than many small-capitalization growth portfolios. In evaluating individual companies, factors such as the growth rates of revenues and earnings, opportunities for margin expansion, financial strength and quality of management are important variables.

The investment process involves detailed studies of individual companies. Factors evaluated include the growth rates of revenues and earnings, opportunities for margin expansion, financial strength and quality of management. Since growth stock portfolios tend to react strongly to changes in financial and economic markets, as well as to changes in the prospects for individual companies, returns of this Portfolio can vary considerably from time to time. A higher level of risk (with risk defined as variability of returns over time) is accepted for the potential of greater long-term returns.

For the year ended December 31, 2004, the Small Cap Growth Portfolio returned 18.80%, outperforming the Russell 2000 Index, which had a return of 18.44%, but lagging the S&P SmallCap 600 Index, which had a return of 22.65%. (These indices are unmanaged, cannot be invested in directly, and do not include administrative expenses or sales charges.) The Portfolio outperformed its peer group, Small-Cap Growth Funds, which had an average return of 11.71% for the year ended December 31, 2004, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The Portfolio's underperformance relative to the S&P SmallCap 600 Index was the result of both industry weightings and stock selection, and reflects the Portfolio's emphasis on financially sound, profitable small-cap stocks with predictable future earnings streams, at a time when lower quality issues performed better.

Following an extraordinary year in 2003, small-capitalization stocks once again rewarded investors in 2004. During 2004, however, the major portion of the gain in small-cap stocks, as well as in the overall stock market, was realized in the fourth quarter. Earlier in the year, the stock market produced lackluster results as economic concerns, including rising oil prices, the weakening U.S. dollar, the war in Iraq and the upcoming presidential election, hampered performance. Indications that the Federal Reserve might start raising interest rates — after a long period in which U.S. consumers had benefited from rates at 45-year lows — also had a dampening effect on the market. In the fourth quarter, however, especially following the elections in November, the stock market experienced a dramatic rally, in which all asset classes gained. The S&P 500

Index (a gauge of broad stock market performance), which returned 10.88% for the year, gained 9.23% in the fourth quarter alone.

Higher beta stocks — particularly small-cap and international stocks — experienced an even more dramatic lift during the fourth quarter. Small-capitalization stocks, as measured by the S&P 600 SmallCap Index, returned 22.65% for the year ended December 31, 2004, with 13.00% of that gain coming in the fourth quarter. International stocks, as measured by the EAFE (Europe, Australasia, Far East) Index, gained 20.70% for the year, 15.36% of which came in the fourth quarter. The drive for beta in the fourth quarter pushed up prices of lower quality issues as investors demonstrated a willingness to take on more risk in order to make up for the lower returns earlier in the year.

Differences in performance versus the benchmarks during 2004 resulted mainly from individual security selection, and secondarily from sector selection. Positive impacts in the Portfolio included an overweight position in Consumer Discretionary stocks, as well as good stock selection within the sector. Holdings that added the most performance in the Portfolio in 2004 included Aaron Rents (which rents and sells residential and office furniture, and is one of the Portfolio's top ten holdings), Pinnacle Entertainment (a diversified gaming company), Guitar Center Inc. (a musical instrument retailer), Polaris Industries (manufactures snowmobiles and other outdoor vehicles), and Getty Images (a media company).

Several Technology holdings also performed very well for the year. Cognizant Technology Solution (which provides custom information technology management services, and is one of the Portfolio's top ten holdings), Cree Inc. (manufactures carbide-based semiconductor materials) and Verint Systems Inc. (provides analytical software-based solutions) all posted very good returns. Consumer Staple stocks United Natural Foods Inc. and Peet's Coffee & Tea also posted excellent gains.

Negative impacts on the Portfolio during 2004 included poor performance in several Technology stocks, especially semiconductor-related Genesis Microchip (designs integrated circuits), Entegris (provides materials management solutions to microelectronics industry), and Plexus Corp. Inc. (provides product realization services to original equipment manufacturers). In addition, although the Portfolio was slightly overweight in the Energy sector, it did not benefit as much from the substantial run-up in Energy prices because most of its holdings were in service stocks and not in energy production stocks.

Heading into 2005, we look for earnings growth for small-capitalization stocks to outpace larger companies. We do not expect, however, that a rising tide will lift all boats equally. While sector positioning can be an important driver of overall performance, stock selection will be important in 2005. We continue to remain focused on individual stock selection, looking for companies with above-average growth potential, and we believe we should continue to find attractive candidates for the portfolio.

Small Cap Growth Stock Portfolio

Relative Performance

Average Annual Total Return For Periods Ended December 31, 2004

	1 Year	5 Years	Since Inception*
Small Cap Growth Stock Portfolio	18.80%	5.78%	17.24%
S&P Small Cap 600 Index	22.65%	11.60%	13.06%
Russell 2000 Index	18.44%	6.68%	8.97%
Small Cap Growth Funds Lipper Average	11.71%	-1.42%	-

* inception date of 4/30/99

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 4/30/99 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account, are shown beginning on page iv of the Performance Summary of the Separate Account report.

Since the Portfolio invests primarily in small capitalization issues, the indices that best reflect the portfolio's performance are the Standard and Poor's (S&P) SmallCap 600 Index and Russell 2000 Index. The indices cannot be invested in directly and do not include sales charges.

The Standard & Poors SmallCap 600 Index is an unmanaged index of 600 selected common stocks of smaller U.S. -based companies compiled by Standard & Poor's Corporation. As of December 31, 2004, the 600 companies in the composite had a median market capitalization of \$754.0 million and total market value of \$522.8 billion. The SmallCap 600 represents approximately 2.8% of the market value of Compustat's database of over 9,381 equities.

The Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. These 3,000 companies represent approximately 98% of the investable U.S. equity market. As of the latest reconstitution, the average market capitalization of companies in the Russell 3000 was approximately \$4.4 billion; the median market capitalization was approximately \$822.4 million. Market capitalization of companies in the Index ranged from \$175.8 million to \$317.8 billion.

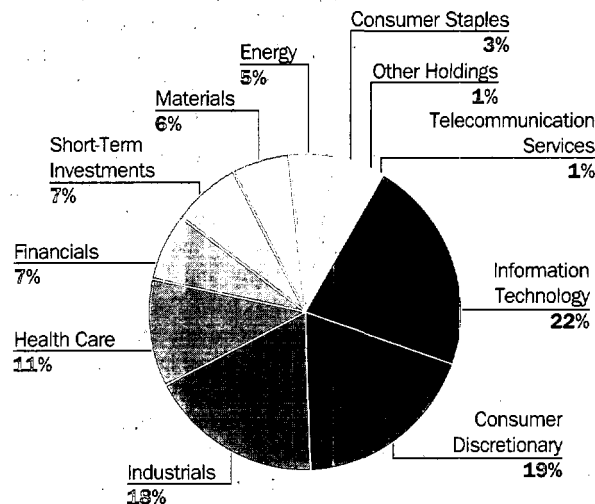

The Russell 2000 Index represents approximately 8% of the total market capitalization of the Russell 3000 Index. As of the latest reconstitution, the average market capitalization of companies in the Russell 2000 was approximately \$607.1 million; the median market capitalization was approximately \$496.4 million. The largest company in the Index had an approximate market capitalization of \$1.6 billion.

The Lipper Variable Insurance Products (VIP) Small Cap Growth Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 250% of the dollar-weighted median of the smallest 500 of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Small-cap growth funds typically have an above average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SmallCap 600 Index. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,090.60	\$2.97
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.99	\$2.87

* Expenses are equal to the Fund's annualized expense ratio of 0.56%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

T. Rowe Price Small Cap Value Portfolio

Objective:

Long-term growth of capital

Portfolio Strategy:

Invest in small companies whose common stocks are believed to be undervalued.

Net Assets:

\$200 million

The T. Rowe Price Small Cap Value Portfolio invests in companies with market capitalizations in the range of the S&P SmallCap 600 whose current stock prices do not appear to reflect their underlying value. For this Portfolio, value is defined broadly, with consideration given to stock price relative to long-term growth prospects and business franchises, in addition to typical value measures such as assets, current earnings and cash flow. The major emphasis is on selection of individual stocks, with secondary consideration given to industry weightings in order to keep the Portfolio broadly diversified among economic sectors.

U.S. stocks rose moderately in 2004, extending the previous year's brisk gains. After beginning the year on a strong note, stocks struggled to make headway as economic growth moderated amid rising short-term interest rates, surging energy costs, and a heated presidential campaign. Stock prices rose as oil prices backed away from their late-October peak of \$55 per barrel, and gains accelerated following the re-election of President Bush. By year-end, several major indices were at or near their highest levels of the year. Small- and mid-cap stocks outperformed their larger counterparts. As measured by various Russell indices, growth stocks lagged value across all market capitalizations.

The T. Rowe Price Small Cap Value Portfolio outpaced the S&P 600 Index over the twelve months ended December 31, 2004. The Portfolio benefited throughout most of the year from the market's renewed focus on earnings, cash flow, and sales growth.

The Portfolio's returns were helped considerably by our investments in the industrials and business services sectors. The air freight and road and rail industries were beneficiaries of increased economic activity as more raw materials and finished goods moved around the world. Transportation services firms Landstar Systems and UTi Worldwide benefited from strong demand for shipping. Other areas of strength included our regional and community bank holdings, including East West Bancorp, Texas Regional Bancshare, and First Republic Bank of San Francisco. Hotel REITs benefited from the rebound in business travel. LaSalle Hotel Properties and Innkeepers USA Trust helped results.

Relatively few of the Portfolio's holdings lost ground over the past year, although some lagged well behind the benchmark. Restaurant holding Ruby Tuesday was squeezed by rising commodity prices. Unifi, a diversified textile yarn producer, lost ground as its proposed joint venture in China fell through. Tetra Technologies, an oil services company, hurt relative performance as the hurricanes disrupted its offshore oil business. Oil equipment company Lone Star Technologies, on the other hand, was a very strong performer for the Portfolio.

Business fundamentals continue to improve as economic strength drives earnings growth. Significant risks remain, however, including higher inflation, widening budget and trade deficits, a weak U.S. dollar, and geopolitical concerns. Small-caps have beaten large-caps for the past six years, and while growth stocks outperformed their value counterparts during the fourth quarter of 2004, value maintains a significant five-year advantage. Given that we are near the upper end of historic relative valuation levels for smaller-cap stocks, we are cautious. We continue to find good risk/reward candidates among small- and mid-caps, but they are somewhat harder to come by than in previous years.

Relative Performance

Average Annual Total Return For Periods Ended December 31, 2004

	1 Year	Since Inception*
T. Rowe Price Small Cap Value Portfolio	24.57%	15.10%
S&P Small Cap 600 Index	22.65%	12.21%
Russell 2000 Index	18.44%	10.50%
Small Cap Core Funds Lipper Average	17.47%	—

* inception date of 7/31/01

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 7/31/01 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account, are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. These 3,000 companies represent approximately 98% of the investable U.S. equity market. As of the latest reconstitution, the average market capitalization of companies in the Russell 3000 was approximately \$4.4 billion; the median market capitalization was approximately \$822.4 million. Market capitalization of companies in the Index ranged from \$175.8 million to \$317.8 billion. These indices are unmanaged, cannot be invested in directly, and do not include administrative expenses or sales charges.

The Russell 2000 Index represents approximately 8% of the total market capitalization of the Russell 3000 Index. As of the latest reconstitution, the average market capitalization of companies in the Russell 2000 was approximately \$607.1 million; the median market capitalization was approximately \$496.4 million. The largest company in the Index had an approximate market capitalization of \$1.6 billion.

The Standard & Poor's SmallCap 600 Index is an unmanaged index of 600 selected common stocks of smaller U.S.-based companies compiled by Standard & Poor's Corporation. As of December 31, 2004, the 600 companies in the composite had a median market capitalization of \$754.0 million and total market value of \$522.8 billion. The SmallCap 600 represents approximately 2.8% of the market value of Compustat's database of over 9,381 equities. These indices are unmanaged, cannot be invested in directly, and do not include administrative expenses or sales charges.

The Lipper Variable Insurance Products (VIP) Small Cap Core Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 250% of the dollar-weighted median of the smallest 500 of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Small-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SmallCap 600 Index. Source: Lipper, Inc.

Top 10 Equity Holdings 12/31/04

Company	% of Total Net Assets
Landstar System, Inc.	2.3%
Texas Regional Bancshares, Inc. - Class A	1.7%
East West Bancorp, Inc.	1.6%
Aaron Rents, Inc.	1.5%
First Republic Bank	1.4%
Silicon Valley Bancshares	1.3%
ProAssurance Corp.	1.3%
Matthews International Corp. - Class A	1.2%
Franklin Electric Co., Inc.	1.2%
RARE Hospitality International, Inc.	1.1%

Part of the Northwestern Mutual Series Fund, Inc. The investment advisor for the fund is Mason Street Advisors, LLC.

Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and a hypothetical rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,120.70	\$4.65
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.45	\$4.43

* Expenses are equal to the Fund's annualized expense ratio of 0.87%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

ADR — American Depository Receipt

144A after the name of a security represents a security exempt from registration under Rule 144A of the securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2004, the value of these securities was \$3, representing 0% of net assets.

(a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$151,654 and the net unrealized appreciation of investments based on that cost was \$49,467 which is comprised of \$51,112 aggregate gross unrealized appreciation and \$1,645 aggregate gross unrealized depreciation.

The Accompanying Notes are an Integral Part of the Financial Statements

Aggressive Growth Stock Portfolio

Objective:

Maximum long-term appreciation of capital

Portfolio Strategy:

Strive for the highest possible rate of capital appreciation by investing in companies with potential for rapid growth.

Net Assets:

\$1.3 billion

The Aggressive Growth Stock Portfolio seeks emerging growth companies in the middle-capitalization range, generally with market capitalizations of less than \$10 billion. The Portfolio's focus in stock selection is on the individual companies' ability to generate revenue, expand profit margins and maintain solid balance sheets; industry sector selection is of secondary importance. Since growth stock portfolios tend to react strongly to changes in financial and economic markets, as well as to changes in the prospects for individual companies, returns of this Portfolio can vary considerably from time to time. A higher level of risk (with risk defined as variability of returns over time) is accepted for the potential of greater long-term returns.

For the year ended December 31, 2004, the Aggressive Growth Stock Portfolio had a return of 14.22%, compared with 16.49% for its benchmark, the S&P MidCap 400 Index. (This index is unmanaged, cannot be invested in directly, and does not include administrative expenses or sales charges.) The Portfolio underperformed its peer group, Mid-Cap Growth Funds, which had an average return of 14.75% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The Portfolio's underperformance relative to the Index resulted mainly from sector selection, and also reflects its emphasis on quality stocks at a time when lower quality issues performed better.

Following an extraordinary year in 2003, mid-capitalization stocks once again rewarded investors in 2004. For 2004, however, the major portion of the gain in mid-cap stocks, as well as in the overall stock market, was realized in the fourth quarter. Earlier in the year, the stock market produced lackluster results as economic concerns, including rising oil prices, the weakening U.S. dollar, the war in Iraq and the upcoming presidential election, hampered performance. Indications that the Federal Reserve might start raising interest rates — after a long period in which U.S. consumers had benefited from rates at 45-year lows — also had a dampening effect on the market. In the fourth quarter, however, especially following the elections in November, the stock market experienced a dramatic rally, in which all asset classes gained. The S&P 500 Index (a gauge of broad stock market performance), which returned 10.88% for the year, gained 9.23% in the fourth quarter alone.

Higher beta stocks — including small- and mid-cap stocks — experienced an even more dramatic lift during the fourth quarter. Small-capitalization stocks, as measured by the S&P 600 SmallCap Index, returned 22.65% for the year ended December 31, 2004, with 13.00% of that gain coming in the fourth quarter. Mid-cap stocks, as measured by the S&P 400 MidCap Index, returned 16.49% for the year, 12.16% of which came in the last quarter. The drive for beta in the fourth quarter pushed up prices of lower quality issues as investors demonstrated a willingness to take on more risk in order to make up for the low returns earlier in the year.

The Portfolio's underperformance relative to the Index this year resulted primarily from sector selection. Overweight positions in the Industrial and Technology sectors, together with poor returns in several stocks in those sectors, hurt performance. Industrial sector stocks that performed poorly included Cintas Corp. (designs and manufactures corporate identity uniform programs), ARAMARK Corp. (provides outsourced services), and Manpower Inc. (an employment service organization). Technology sector stocks that hurt performance included Silicon Laboratories (designs and develops integrated circuits), Microchip Technology Inc. (develops and manufactures microcontrollers), and Integrated Circuit Systems (designs and develops silicon timing devices). Several Consumer Discretionary stocks also hurt performance; the biggest detractors were radio holdings Univision Communications and Westwood One. Retailers Jones Apparel Group and Ann Taylor also performed poorly during the year.

Adding to the Portfolio's performance was a substantial overweight position in the Health Care sector. Individual holdings, including Elan Corp. (research and development of therapeutic products for neurology and autoimmune diseases), Kinetic Concepts Inc. (a global medical technology company), Cytoc Corp. (designs and manufactures systems for diagnostic applications), and Biogen Idec Inc. (research and development of targeted cancer therapies) all experienced large gains earlier in the year. Positions in these stocks were subsequently trimmed back to lock in gains. Also adding to performance in 2004 were Consumer Discretionary stocks PetSmart (a retailer and online supplier of pet supplies), Getty Images (a media company), Pixar Inc. (a digital animation studio), and Michaels Stores Inc. (an art and home décor retailer).

Stocks in the Industrial sector that performed well included Expeditors International (global logistics management), L-3 Communications Holdings (supplier of secure communications systems), and Corporate Executive Board Co. (provides analysis on corporate strategy and operations). Education stock Apollo Group Inc., Technology stock VeriSign Inc., and Consumer Staples stock Whole Foods Market Inc. also performed well. In addition, an increased position in the Portfolio's top holding, CIT Group (a finance company), helped performance for the year.

As of early January 2005, the market had corrected from its December 2004 highs. We believe earnings growth may slow from its previously torrid pace, but may go to a more sustainable level. Because of this, we will be looking for favorable returns from mid-cap stocks and continue to expect mid-cap companies to outperform their larger brethren in the near future. We look to keep cash low and our holdings list fresh during 2005.

Aggressive Growth Stock Portfolio

Relative Performance

Average Annual Total Return
For Periods Ended December 31, 2004

	1 Year	5 Years	10 Years
Aggressive Growth Stock Portfolio	14.22%	-0.91%	10.68%
S&P MidCap 400 Index	16.49%	9.54%	16.10%
Mid Cap Growth Funds Lipper Average	14.75%	-1.73%	10.08%

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account, are shown beginning on page iv of the Performance Summary of the Separate Account report.

Since the Portfolio invests primarily in medium-capitalization (Mid Cap) issues, the index that best reflects the Portfolio's performance is the S&P MidCap 400 Index. This is a capitalization-weighted index that measures the performance of the mid-range sector of the U.S. stock market. The index cannot be invested in directly and does not include sales charges.

As of December 31, 2004, the 400 companies in the composite had a median market capitalization of \$2.4 billion and a total market value of \$1.1 trillion. The MidCap 400 represents approximately 5.8% of the market value of the Compustat's database of about 9,381 equities.

The Lipper Variable Insurance Products (VIP) Mid Cap Growth Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Mid-cap growth funds typically have an above-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P MidCap 400 Index. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.

Investing in medium company stocks involves a greater degree of risk than investing in large company stocks.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,070.60	\$2.71
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.21	\$2.65

* Expenses are equal to the Fund's annualized expense ratio of 0.52%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

International Growth Portfolio

Objective:

Long-term capital appreciation

Portfolio Strategy:

Invest in stocks of companies outside the U.S. that are expected to experience above-average growth.

Net Assets:

\$110 million

The International Growth Stock Portfolio seeks long-term capital appreciation. The Portfolio seeks to achieve this objective by investing primarily in common stocks of companies that are headquartered or trade primarily in markets outside the United States and that are expected to grow more rapidly than market averages. Normally, the Portfolio invests at least 80% of its assets in non-U.S. securities. The investments comprising the Portfolio are chosen individually, reflecting the managers' assessment of their attractiveness. Equities purchased will possess, in the managers' judgment, a combination of solid fundamentals, attractive valuation, and positive technical evaluation.

Companies judged to have a positive fundamental situation are likely to exhibit a history of superior sales and profit growth, or expectations of such growth, strong product/service positioning, experienced management, and solid or improving financial position. Prices are evaluated in reference to the company's own expected growth, comparable companies within the same or similar industries, and/or companies with similar expected growth characteristics. Technical indicators would include such things as past price performance and anticipated supply and demand balance. Industry and country weights within the Portfolio, while monitored as a gauge of the Portfolio's exposure to risk, are treated primarily as by-products of the stock selection process. The equities in the Portfolio will include small, medium, and large capitalization issues. Current income will be a secondary consideration in stock selection.

Following an extraordinary year in 2003, international stocks once again produced very nice returns in 2004, aided by a continuation of the cyclical recovery and a boost from foreign currencies. For the year ended December 31, 2004, the International Growth Stock Portfolio had a return of 21.59%, outperforming the MSCI EAFE (Europe, Australasia Far East) Index, which returned 20.70% for the year. (This index is unmanaged, cannot be invested in directly, and does not include administrative expenses or sales charges.) The Portfolio also outperformed its peer group, International Growth, which had an average return of 17.44% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

The Portfolio's outperformance relative to the Index can be attributed to its participation in some of the strongest international markets. For instance, the Scandinavian countries of Sweden, Norway and Denmark were all strong performers. Additionally, Ireland and Spain turned in superior returns. In general, these countries showed stronger economic growth than their European counterparts. These are all countries to which the Portfolio maintained a healthy exposure.

A higher weighting in Scandinavian stocks, especially in Sweden, Norway and Denmark, added to the Portfolio's performance during 2004. Stocks of special interest in those countries included Ericsson (the world's leading manufacturer of mobile telecommunications

infrastructure equipment), Nobia AB (manufactures kitchen interiors), and Volvo (international transport equipment group). Nokian Renkaat (a Finnish tire manufacturer) also added value. Several stocks based in the United Kingdom also added to performance, including Punch Taverns (a pub leasing company, which is one of the Portfolio's top ten holdings), Capita Group (corporate services), Wolseley (building material distribution), and Tesco Foods (a retailer, which is also a top ten holding).

Exposure to Emerging Markets also increased returns for the Portfolio in 2004. The emerging markets generally, and in particular Indonesia, Brazil, Mexico, and the countries of Eastern Europe, were strong in 2004. In the Indonesian market, which benefited from investor perceptions of reform, the Portfolio's holdings in PT Telecom and Bank Rakyat did very well. OTP Bank in Hungary (another one of the Portfolio's top ten holdings), as well as Erste Bank in Austria, also performed strongly as investors sought ways to capitalize on the addition of a number of Eastern European countries to the European Union. The Portfolio would have benefited from more holdings in Mexico, which rose smartly. Urbi Desarrollos (a home builder) shared those gains. Brazil also rose strongly on relief over the new government's policies. The Portfolio's single holding in Brazil, Natura Cosméticos (manufactures and distributes cosmetics), more than doubled.

An underweight position in Japan helped performance in 2004 as Japan was a relative laggard. Japan's economy slowed markedly in the second half of the year, rekindling investor fears about the sustainability of growth and dragging the market downward. Strong performers for the Portfolio in Japan in 2004 included Bridgestone (tire manufacturer), Kubota (industrial and farm machinery manufacturer), and USS (auto auctions).

While country selection aided portfolio performance, sector weightings worked against it. Markets were led by a sector in which it is difficult for growth investors to participate, Utilities (+32.36%). Also exceptionally strong were Energy (+27.62%) and Financials (+25.26%). The Portfolio is significantly underweight in each of these sectors. Stock selection within these groups was good, with the Portfolio's holdings outperforming the Index in each sector. Information Technology was the weakest sector (+8.84%), followed by Health Care (+11.39%), and Consumer Discretionary (+15.10%). The Portfolio is heavily overweighted in all three sectors versus the Index. Here again stock selection within sectors was good, with significantly superior performance in both the Health Care and Consumer Discretionary sectors.

The Portfolio's exposure to small and mid-capitalization issues aided performance as returns by market capitalization sectors were inverse, with large cap issues gaining 19.50%, mid-cap issues gaining 27.92%, and small cap issues gaining 31.15%.

International Growth Portfolio

Relative Performance

Average Annual Total Return
For Periods Ended December 31, 2004

	1 Year	Since Inception*
International Growth Portfolio	21.59%	8.99%
EAFE Index	20.70%	8.65%
International Growth Funds Lipper Average	17.44%	-

*inception date of 7/31/01

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 7/31/01 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

As depicted in the graph, the International Growth Portfolio is compared against the Morgan Stanley Capital International EAFE ("Europe-Australasia-Far East") Index. The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance, excluding the US & Canada. As of December 31, 2004 the MSCI EAFE Index consisted of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The objective of the Index is to reflect the movements of stock markets in these countries by representing an unmanaged (indexed) portfolio within each country. The Index seeks to include securities to represent 85% of the free float-adjusted market capitalization within each industry group within each country. A cross section of large, medium, and small capitalization stocks are included, taking into account liquidity concerns. The Index is calculated in U.S. dollars. The Index cannot be invested in directly and does not include administrative expenses or sales charges.

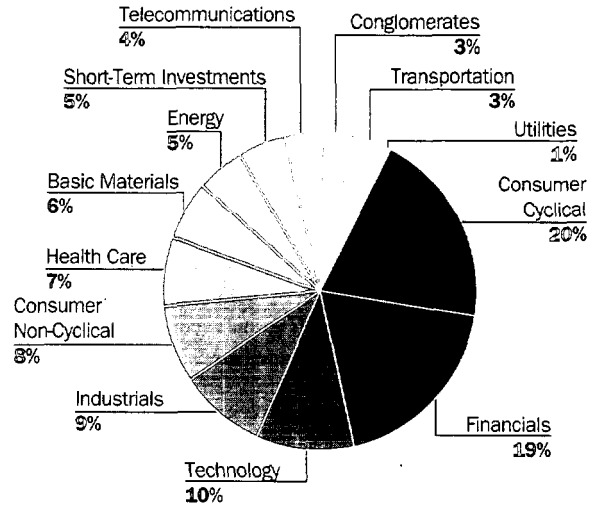

The Lipper Variable Insurance Products (VIP) International Growth Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies strictly outside of the U.S. Growth funds typically have an above-average price-to-cash flow ratio, price-to-book ratio, and three-year sales-per-share growth value compared to the S&P/Citigroup World ex-U.S. BMI. Source: Lipper, Inc.

Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. These include the risks of currency fluctuation, of political and economic instability and of less well-developed government supervision and regulation of business and industry practices, as well as differences in accounting standards.

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,156.40	\$5.15
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.05	\$4.83

* Expenses are equal to the Fund's annualized expense ratio of 0.95%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

Franklin Templeton International Equity Portfolio

Objective: Long-term appreciation of capital through diversification into markets outside the United States	Portfolio Strategy: Participate in the growth of foreign economies by investing in securities with high long-term earnings potential relative to current market values.	Net Assets: \$981 million
---	---	-------------------------------------

The Franklin Templeton International Equity Portfolio seeks long-term growth of capital. The Portfolio seeks to achieve this objective by investing primarily in equity securities of issuers from countries outside the U.S. The Portfolio's holdings will consist primarily of equity securities of issuers in foreign countries. The Portfolio's strategy is to identify and invest in the undervalued stocks of foreign companies offering the greatest discounts to their long-term values. The strategy will reflect a bottom-up, value-oriented and long-term investment philosophy. In choosing equities, the Portfolio's manager will focus on the market price of a company's security in relation to its long-term earnings, asset value and cash flow potential. A company's historical value measure, including price/earnings ratio, profit margins and liquidation value, also will be considered.

For the second year in a row, most stock markets throughout the world posted strong performance in 2004. The fourth quarter, in particular, was strong for international stocks, as the flight away from the U.S. dollar continued and we saw the biggest currency moves of the year. For the year ended December 31, 2004, the International Equity Portfolio had a total return of 19.33%, slightly below the 20.70% return on the MSCI EAFE Index. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The average return for the Portfolio's peer group, International Value Funds, was 20.75% for the year ended December 31, 2004, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

The Portfolio's slight underperformance relative to the Index can be attributed to two factors: underweight positions in the Financials and Consumer Staples sectors, and underweight positions in countries that turned in strong performance for the year. Although the Financials sector represented the Portfolio's largest sector weighting (approximately 20%), it was well below the EAFE

Index's weighting of more than 27%. A minor underweighting in Europe also slightly detracted from results.

Other country weights were positive for return in 2004. Overweightings in two countries, South Korea (which is not in the EAFE Index) and Hong Kong, benefited the Portfolio as Emerging Markets experienced good returns in 2004. In addition, the Portfolio had holdings in Latin America (which is not in the EAFE Index) that added value through currency appreciation and strong price appreciation. Other sector weightings that were positive for the Portfolio included overweightings in the Materials, Industrials and Utilities sectors.

Individual stocks that benefited the Portfolio in 2004 included E.ON AG (a German-based industrial company). We like E.ON on its cheap valuation and fundamentals: the company is growing its dividends at 10% a year, has great cash flow and a debt-to-assets ratio of approximately 20%. Under its new CEO, the company committed its efforts to efficiency and streamlining business during 2004 by selling off non-core assets and focusing on electric and gas. The stock appreciated nicely during the year due to cost reductions and higher prices for gas and electric. Suez SA, one of the largest utilities in France, also turned in good performance and is now among the Portfolio's top ten holdings because of price appreciation. In addition, Nordea Bank benefited from the continued consolidation of banks in northern Europe, Brazilian company CVRD, the world's largest iron ore producer, benefited from the strong demand from China. Energy companies posted very strong returns as the price of oil remained at high levels throughout the year, which in turn benefited Portfolio holding CNOOC in China, Norsk Hydro in Norway and Respsol YPF in Spain. The utility sector was the best performing area in the EAFE Index and in the Portfolio was up 34% on strength in companies such as Korea Energy Power Company (KEPCO).

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

As depicted in the graph, the Franklin Templeton International Equity Portfolio is compared against the Morgan Stanley Capital International EAFE ("Europe-Australasia-Far East") Index. The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance, excluding the US & Canada. As of December 31, 2004 the MSCI EAFE Index consisted of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The objective of the Index is to reflect the movements of stock markets in these countries by representing an unmanaged (indexed) portfolio within each country. The Index seeks to include securities to represent 85% of the free float-adjusted market capitalization within each industry group within each country. A cross section of large, medium, and small capitalization stocks are included, taking into account liquidity concerns. The Index is calculated in U.S. dollars. The Index cannot be invested in directly and does not include administrative expenses or sales charges.

The Lipper Variable Insurance Products (VIP) International Value Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies strictly outside of the U.S. Value funds typically have a below-average price-to-cash flow ratio, price-to-book ratio, and three-year sales-per-share growth value compared to the S&P/Citigroup World ex-U.S. BMI. Source: Lipper, Inc.

Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. These include the risks of currency fluctuation, of political and economic instability and of less well-developed government supervision and regulation of business and industry practices, as well as differences in accounting standards.

Sector Allocation 12/31/04

Allocation is based on percentage of equities.
Allocation and Top 10 Holdings is subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,143.70	\$3.83
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.26	\$3.61

* Expenses are equal to the Fund's annualized expense ratio of 0.71%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

AllianceBernstein Mid Cap Value Portfolio

Objective:

Long-term growth of capital and current income.

Portfolio Strategy:

Invest primarily in the equity securities of mid-sized companies that are believed to be undervalued.

Net Assets:

\$72 million

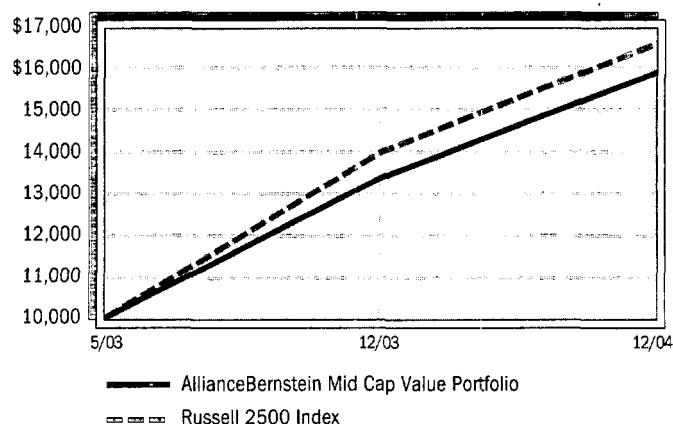

The primary investment objective of the AllianceBernstein Mid Cap Value Portfolio is long-term capital growth. The portfolio invests primarily in a diversified portfolio of equities of mid-sized companies that are believed to be undervalued. The portfolio's investment policies emphasize investment in companies that are determined by Alliance to be undervalued, using Bernstein's fundamental value approach. In selecting investments, management uses its fundamental research to identify companies whose long-term earnings power is not reflected in the current market price of their securities.

2004 was another great year for small- and mid-cap stocks, and for the sixth consecutive year, the Russell 2500 Index beat the broad market, as represented by the Standard & Poor's (S&P) 500 Stock Index. For the year, the Portfolio returned 18.67%, slightly outperforming its style-neutral benchmark, the Russell 2500 Index, which returned 18.29%, but modestly trailing the value benchmark, the Russell 2500 Value Index, which returned 21.58% during the same period. Within the small- and mid-cap universe, larger stocks are now much cheaper than smaller stocks, and the Portfolio's management team has positioned the Portfolio to take advantage of this valuation disparity.

The Portfolio outperformed its benchmark, the Russell 2500 Index, returning 18.67% versus 18.29% for the benchmark during the twelve months ended December 31, 2004. Both sector selection and stock selection contributed to our premium during 2004. Strong stock selection in the producer durables, materials and processing and consumer staples sectors offset negative stock selection positions in the financial services, consumer discretionary and autos & transportation sectors. An underweighted position in the technology sector, in addition to an overweighted position in the materials and processing sector, also contributed to the Portfolio's premium. Notable contributors for the year included Terex, PacifiCare Health Systems, Texas Industries, Andrew and FMC. Detractors during the annual period included Vishay Intertechnology, Group 1 Automotive, American Axle & Manufacturing, Dana Corp. and Universal Health.

With no major controversy creating anxiety today, there are few sizeable value themes and the value opportunity, as we measure it, is smaller than usual. Our research continues to identify, however, some pockets of opportunity. We remain convinced that among small companies, larger is cheaper. After a period of extraordinary outperformance, the smallest companies in the Russell 2500 Index are still posting losses collectively, while the largest are selling at just 22 times trailing earnings. Moreover, the larger the company, the cheaper it gets. The discount of larger-cap stocks within the group is all the more striking because over the long-term, the largest small-cap companies have delivered higher returns on both equity and investment, with lower volatility. Looking at sectors, we continue to maintain a pro-cyclical investment stance, although the character is shifting somewhat. Overweighted positions in commodities and capital equipment have been pared as stocks have appreciated. That capital has been recycled into consumer stocks as anxiety about consumer spending has created some relative bargains. We have also been investing in business services as we feel that there are companies with attractive valuations that are likely to enjoy improved results with an eventual rebound in white collar employment that accompanies every economic recovery.

Relative Performance

Average Annual Total Return For Periods Ended December 31, 2004

	1 Year	Since Inception*
AllianceBernstein Mid Cap Value Portfolio	18.67%	31.55%
Russell 2500 Index	18.29%	34.96%
Mid Cap Value Funds Lipper Average	19.03%	—

*inception date of 5/1/03

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 5/1/03 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report. The Russell 2500 Index measures the performance of the 2,500 smallest companies in the Russell 3000 Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. These 3,000 companies represent approximately 98% of the investable US equity market. As of the latest reconstitution, the average market capitalization of companies in the Russell 3000 was approximately \$4.4 billion; the median market capitalization was approximately \$822.4 million. Market capitalization of companies in the Index ranged from \$317.8 billion to \$175.8 million. The index is unmanaged and cannot be invested in directly and does not include administrative expenses or sales charges.

The Russell 2500 Index represents approximately 16% of the total market capitalization of the Russell 3000 Index. As of the latest reconstitution, the average market capitalization of companies in the Russell 2500 was approximately \$992.9 million; the median market capitalization was approximately \$640 million. The largest company in the Index had an approximate market capitalization of \$4.0 billion.

The Lipper Variable Insurance Products (VIP) Mid Cap Value Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Mid-cap value funds typically have a below-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P MidCap 400 Index. Source: Lipper, Inc.

Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.

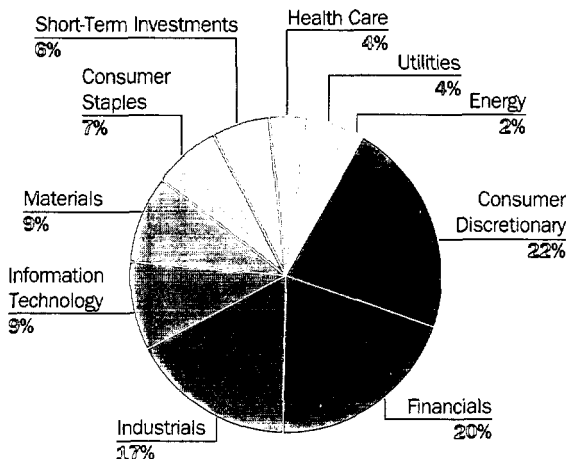

Investing in medium company stocks involves a greater degree of risk than investing in large company stocks.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,118.30	\$4.66
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.43	\$4.44

* Expenses are equal to the Fund's annualized expense ratio of 0.88%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

Index 400 Stock Portfolio

Objective:

Long-term capital appreciation through cost-effective participation in broad market performance

Portfolio Strategy:

Invest in a portfolio designed to approximate the composition and returns of the S&P MidCap 400 Index.

Net Assets:

\$427 million

The Index 400 Stock Portfolio seeks investment results that approximate the performance of the Standard & Poor's MidCap 400 Composite Stock Price Index by investing in stocks included in the S&P MidCap 400 Index, which is composed of 400 common stocks. The S&P MidCap 400 Index does not include the very large issues that account for most of the weighting in the S&P 500® Index. Most of the companies in the S&P MidCap 400 Index have a market value in the range of \$750 million to \$5 billion. The Portfolio's strategy is to capture mid-cap market performance by investing in a portfolio modeled after a mid-cap stock index. The Portfolio invests in stocks included in the S&P MidCap 400 Index in proportion to their weightings in the Index, and may buy or sell securities after announced changes in the Index but before or after the effective date of the changes to attempt to achieve higher correlation with the Index. The Index 400 Stock Portfolio is not managed in the traditional sense using economic, financial and market analysis. A computer program is used to determine which stocks are to be purchased or sold to achieve the Portfolio's objective. Therefore, the Portfolio remains neutral relative to the benchmark in terms of economic sectors, market capitalization and growth and value styles of investing. The Portfolio will, to the extent feasible, remain full invested, and cash flows are invested promptly to attempt to minimize their impact on returns. The Portfolio may purchase Index futures contracts in amounts approximating the cash held in the Index.

For the year ended December 31, 2004, the Index 400 Stock Portfolio had a return of 16.26%, slightly behind the return on the S&P MidCap 400 Index of 16.49%. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) Portfolio performance slightly lagged the S&P 400 MidCap Index due to transaction costs, administrative expenses, cash flow effects and holdings of stock index futures contracts. The average return for the Portfolio's peer group, Mid-Cap Core Funds, was 16.47% for the year ended December 31, 2004, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. However, the Mid-Cap Core Funds peer group is not strictly comparable to the Index 400 Stock Portfolio because many of the portfolios in the group are actively managed.

Following a spectacular year for stocks in 2003, the U.S. stock market experienced very nice gains again for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%. The higher risk segments of the market posted even larger gains: the S&P SmallCap 600 Index gained 22.65% and the S&P MidCap 400 Index gained 16.49% for the year. The majority of the gains in

2004, however, came in the fourth quarter alone. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%. For the S&P MidCap 400 Index, the fourth quarter accounted for 12.16% of its 2004 annual gain of 16.49%.

The 400 stocks in the MidCap 400 Index are divided into ten industry sectors. For the year ended December 31, 2004, all but one of the sectors showed substantial gains. The strongest sectors were Energy (up 31.82%), Materials (up 28.14%), Consumer Staples (up 20.74%), Consumer Discretionary (up 18.38%) and Industrials (up 18.15%). Energy was the top performing sector for the year, benefiting from a dramatic rise in oil prices through much of 2004. However, oil prices dropped substantially beginning in October and the sector turned in poor performance for the fourth quarter. Other sectors that performed well were Financials (up 17.04%), Health Care (up 14.94%), Utilities (up 14.39%) and Telecommunications Services (up 13.31%). The only sector with negative performance for the year was Information Technology (down -3.70%). The sector was hit hard earlier in 2004 as investors turned more defensive, but Info Tech stocks had a very nice gain in the fourth quarter as the market rallied and investors were willing to take on more risk.

The Portfolio seeks to track the performance and weightings of stocks in the S&P MidCap 400 Index. Accordingly, changes are made to the Portfolios' holdings as the Index changes. Such changes occur as companies go public or private, merge, divest or have major changes in market capitalization. Additionally, Standard & Poor's adjusts the Index to better reflect the companies that are most representative of the composition of the U.S. economy. There were 25 additions to the Index during 2004. Those added in the fourth quarter were Advance Auto Parts, Crane Co., Deluxe Corp., Steel Dynamics, Worthington Industries, Weingarten Realty CBI, Techne Corp. and VCA Antech. There were also 25 companies eliminated from the Index during the year. Those eliminated during the fourth quarter were XTO Energy, Six Flags, Quantum Corp., Superior Industries, Compass Bancshares, L-3 Communications, Advanced Fibre Communications and IMC Global.

Mid Cap Core Funds Lipper Average	16.47%	9.51%	-

*inception date of 4/30/99

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 4/30/99 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The S&P MidCap 400 Index is a capitalization-weighted index that measures the performance of the mid-range sector of the U.S. stock market. As of December 31, 2004, the 400 companies in the composite had a median market capitalization of \$2.4 billion and a total market value of \$1.1 trillion. The MidCap 400 represents approximately 5.8% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Mid Cap Core Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Mid-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P MidCap 400 Index. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on equities.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,097.50	\$1.39
Hypothetical (5% return before expenses)	\$1,000.00	\$1,023.51	\$1.34

* Expenses are equal to the Fund's annualized expense ratio of 0.26%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

Janus Capital Appreciation Portfolio

Objective:

Long-term growth of capital

Portfolio Strategy:

Invest in equity securities selected for their growth potential.

Net Assets:

\$57 million

The Janus Capital Appreciation Portfolio seeks long-term growth of capital through investments in the equities of companies selected for their growth potential; the main emphasis is on large-capitalization stocks. The Portfolio is managed using a "bottom-up" approach, which means that the holdings are selected by examining individual securities, rather than focusing on broad economic trends or industry sectors.

For the year ended December 31, 2004, the Janus Capital Appreciation Portfolio returned 19.67% while its benchmark, the S&P 500 Index, returned 10.88%. Among the reasons the Portfolio significantly outperformed the S&P 500 Index was our decision to maintain overweight positions in the healthcare and information technology sectors and the exceptionally strong results posted by a number of our picks in these two groups. Weaker areas of investment included industrials and telecommunications services, where select portfolio holdings experienced setbacks.

The Portfolio's impressive metrics can be credited to the quality and depth of the investment research performed by our analysts. Their work has given us the confidence to invest early and with conviction in some of our best ideas. In fact, our investments in strong performers such as Apple Computer, eBay and UnitedHealth Group, among others, are the result of long-term investment commitments.

Our investment in Apple Computer was the strongest contributor to performance during the period. Apple recently launched one of its most elegant products to date, the new G5 iMac. The early reviews have been overwhelmingly positive and we expect this to be an important product for the company. More importantly, Apple's wildly successful iPod music player continues to be the music-listening device of choice and sales continue to exceed most investors' expectations.

Another strong-performing position in the Portfolio was eBay. Its management team, the sheer financial power of its business model and the global proliferation of the "eBay economy" have all

continued to impress us. The eBay trading platform is well on its way to enabling the buying and selling of products worldwide with a gross merchandise value (GMV) in excess of \$34 billion dollars. eBay's own revenues from those sales were in excess of \$2.5 billion in 2004 and we expect both to grow rapidly again in 2005. To give you an idea of the velocity of trade on eBay, a car is sold every six minutes, a digital camera is sold every 14 minutes and a piece of jewelry every eight minutes. Today, over 430,000 people are making a living buying and selling on eBay. Finally, we continue to be impressed with eBay's entire management team and their ability to guide the company's explosive growth.

Investing in the managed care sector is not for the faint of heart; very few issues are as highly charged as healthcare. But, as consumers become increasingly responsible for the first dollars spent on their healthcare needs, it's clear to us that UnitedHealth Group is succeeding in the marketplace. The company's flexible plan designs, along with its increasing focus on making healthcare more affordable for larger and larger segments of the population, are a powerful financial combination. Janus' healthcare team continues to do an outstanding job monitoring medical and financial trends as well as anticipating the changes in this emotionally charged space. We continue to have the utmost confidence in Bill Maguire, Steve Hemsley and the entire UnitedHealth management team.

Not all of our investments have met our expectations. Drugmaker Forest Labs was a poor performer. While the stock will be faced with some issues over the next several quarters, including product competition and generic challenges to key drugs, we believe that the worst is priced into the stock and have maintained our stake for now.

Meanwhile, we liquidated our position in Nvidia, a stock that was among our biggest detractors. While we like the longer-term prospects for graphic-intensive semiconductor manufacturers, we feel that better opportunities lie elsewhere.

Janus Capital Appreciation Portfolio

Relative Performance

Average Annual Total Return
For Periods Ended December 31, 2004

	1 Year	Since Inception*
Janus Capital Appreciation Portfolio	19.67%	24.16%
S&P 500 Index	10.88%	13.97%
Large Cap Growth Funds Lipper Average	8.04%	-

*inception date of 5/1/03

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 5/1/03 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Large Cap Growth Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap growth funds typically have an above-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. Source: Lipper, Inc.

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,135.10	\$4.46
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.66	\$4.22

* Expenses are equal to the Fund's annualized expense ratio of 0.83%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

(a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$41,872 and the net unrealized appreciation of investments based on that cost was \$14,602 which is comprised of \$14,725 aggregate gross unrealized appreciation and \$123 aggregate gross unrealized depreciation.

The Accompanying Notes are an Integral Part of the Financial Statements

Growth Stock Portfolio

Objective:

Long-term appreciation of capital with moderate risk

Portfolio Strategy:

Hold a diversified mix of high quality growth stocks of medium and large companies with above-average potential for earnings growth.

Net Assets:

\$687 million

The Growth Stock Portfolio seeks long-term growth of capital by investing in companies believed to have above-average earnings growth potential; current income is secondary. The Portfolio's holdings will consist primarily of high quality growth stocks of medium and large companies. The Portfolio's strategy is to analyze economic trends to determine their impact on various sectors and industries and to select high quality stocks from industries with the best earnings potential. The Portfolio invests primarily in equity securities of well-established companies selected for their growth potential, with emphasis placed on high quality companies with strong financial characteristics. The investment process is initiated with an analysis of the economic outlook. Further study of economic sectors leads to the identification of growth-oriented industries, and to detailed studies of individual companies. In evaluating individual companies, factors such as the company management team, product outlook, global exposure, industry leadership position and financial characteristics are important variables used in the analysis.

For the year ended December 31, 2004, the Growth Stock Portfolio returned 6.67%, lagging the S&P 500 Index, which returned 10.88%. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The Portfolio's underperformance compared to the Index can be attributed primarily to two factors: overweight positions in the Information Technology and Health Care sectors, which registered small gains for the year, and the Portfolio's investment style, which is to invest in quality companies with consistent growth in earnings. That strategy emphasizes long-term growth of capital and is designed to capture the long-term potential outperformance of medium and large-cap stocks with reduced volatility. It is not uncommon, therefore, for the Portfolio to lag in a market led by riskier areas of the market, which was true in 2004, particularly in the fourth quarter. The average return for the Large-Cap Core Funds—the peer group in which Lipper places the Portfolio—was 8.59% for the year ended December 31, 2004, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The average return for the Large-Cap Growth Funds—the peer group which the managers believe better suits the Portfolio's investment style—was 8.04% for 2004, according to Lipper.

Following a spectacular year for stocks in 2003, the U.S. stock market experienced very nice gains again for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%. As the cyclical recovery continued in 2004, returns on large capitalization stocks lagged for the second year in a row, as investors sought higher returns in riskier segments of the market such as small-cap and international stocks.

Those segments posted even larger gains: the S&P SmallCap 600 Index gained 22.65% and the MSCI EAFE Index gained 20.70% for the year. The majority of the gains in all segments of the market, however, came in the fourth quarter alone. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%.

In the Growth Stock Portfolio, overweight positions in Information Technology and Health Care, as well as individual stock selections in those sectors, hurt performance in 2004. Cisco Systems Inc. (computer networking solutions) and Intel Corporation (semiconductors) both performed poorly; Health Care stocks Pfizer Inc. (pharmaceuticals and consumer products) and Eli Lilly & Co. (pharmaceuticals) put a drag on the Portfolio's return for the year, as the sector was affected by negative news on a number of prescription drugs. A lack of exposure to the Utilities sector, which was one of the highest performing sectors in 2004, also held down total return.

Positives for the Portfolio in 2004 included an overweight position in Consumer Discretionary stocks relative to the S&P 500. Target Corp. (general merchandise retailer), which is one of the Portfolio's top ten holdings, posted strong gains for the year. Individual stock selection in the Industrials and Energy sectors also added value. Energy was the strongest performing sector in 2004, and the Portfolio benefited from stock selection within this sector, particularly from its positions in EOG Resources, Inc. (natural gas and crude oil exploration) and Halliburton Holding Co. (engineering and construction service provider). Other individual securities that helped performance were Federal Express, Yahoo! Inc. and American Standard. Diversification within the Portfolio continued to increase during 2004, and the ten largest holdings represented 21.7% of the Portfolio's net asset value as of December 31, 2004, compared to 24.6% at the end of 2003.

Looking forward to 2005, quality, large capitalization stocks, which have lagged the market for the past two years, may be poised for an upturn. If large cap stocks return to favor, the Portfolio should be well positioned to take advantage of an environment that rewards quality.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Large Cap Core Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. Source: Lipper, Inc.

The Lipper Variable Insurance Products (VIP) Large Cap Growth Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap growth funds typically have an above-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,055.30	\$2.22
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.68	\$2.18

* Expenses are equal to the Fund's annualized expense ratio of 0.43%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

Large Cap Core Stock Portfolio

Objective:

Long-term growth of capital and income; consistent with moderate investment risk

Portfolio Strategy:

Actively manage a portfolio of equity securities with a goal of exceeding the total return of the S&P 500 Index.

Net Assets:

\$470 million

The Large Cap Core Stock Portfolio seeks long-term growth of capital and income. The Portfolio seeks to achieve these objectives primarily by investing in the equity securities of companies selected for their growth potential. The Portfolio's holdings will consist primarily of equity securities of large companies. The Portfolio's strategy is to actively manage a portfolio of selected equity securities with a goal of outperforming the total return of the S&P 500® Index. The Portfolio attempts to reduce risk by investing in many different economic sectors, industries and companies. The Portfolio's manager may underweight or overweight selected economic sectors against the sector weightings of the S&P 500 Index to seek to enhance the Portfolio's total return or reduce fluctuations in market value relative to the S&P 500 Index.

For the year ended December 31, 2004, the Large Cap Core Stock Portfolio had a return of 8.16%, lagging the 10.88% return on the S&P 500 Index. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The average return for the Portfolio's peer group, Large-Cap Core Funds, was 8.59% for the same time period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The Portfolio's underperformance relative to the Index resulted mainly from a lack of higher risk stocks, particularly in the Information Technology sector, at a time when investor's preference was for more speculative stocks than those that populate the Large Cap Core Stock Portfolio. Our investment approach, which emphasizes long-term growth of capital and income, is designed to capture the long-term potential outperformance of large cap stocks with reduced volatility. It is not uncommon, therefore, for the Portfolio to lag in a market led by speculative stocks, which was true particularly in the fourth quarter of 2004.

Following a spectacular year for stocks in 2003, the U.S. stock market experienced very nice gains again for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%. The higher risk segments of the market posted even larger gains: the S&P SmallCap 600 Index gained 22.65% and the S&P MidCap 400 Index gained 16.49% for the year. The majority of the gains in 2004, however, came in the fourth quarter alone. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%. The fourth quarter rally was even more pronounced in small and mid-cap stocks. The S&P SmallCap 600 Index gained 13.00% in the fourth quarter, while its gain for the year was 22.65%. And in the S&P MidCap 400 Index, the fourth quarter accounted for 12.16% of its annual gain of 16.49%.

The Portfolio's underperformance relative to the Index was primarily due to our position in the Information Technology sector.

Early in 2004, the Portfolio was too aggressively positioned here. During the second quarter as the Technology sector rallied, we trimmed back some of our higher-beta holdings, which left the Portfolio defensively positioned — overweight in business service stocks such as First Data Corp. and bellwethers such as IBM and Microsoft. Performance was hurt by this defensive positioning late in 2004 as the market returned to high beta, low capitalization stocks. We continue to be fairly defensively positioned here, focusing on technology companies with non-commodity products and steady earnings growth. Despite an overweight position in the Technology sector during the year, the Portfolio didn't own the riskier stocks that were the biggest gainers in 2004. The Portfolio's holdings in National Semiconductor Corp., Intel Corporation, and Cisco Systems Inc. (one of the Portfolio's top ten holdings) were all negative for the year.

Also putting a drag on the Portfolio's performance was an underweight position in the Industrials sector, which performed well during the year. In 2004, we underweighted Industrials because we believed this sector already had a premium valuation relative to the S&P 500 Index. We felt that earnings estimates may have gotten ahead of themselves, possibly setting some of these stocks up for a disappointment. Positions in the Industrials sector, however, were added throughout 2004, including increasing our existing holding in General Electric and initiating a position in Tyco International. Individual security selection in the Health Care sector detracted from the Portfolio's performance in 2004. Two pharmaceutical stocks held in the Portfolio, Eli Lilly & Co. and Pfizer Inc., sustained substantial losses in 2004. The Health Care sector as a whole was impacted by negative news from studies on several prescription drugs. During the fourth quarter of 2004, the Portfolio's positions in Lilly and Pfizer were substantially reduced.

Sector allocation and individual security selection within the Materials and Energy sectors made a positive contribution. The Portfolio's 2004 performance benefited from overweight positions in both of those sectors, as both of these sectors outperformed. Stocks that performed well included Monsanto Co. (agricultural products), which was substantially overweight in the Portfolio, ConocoPhillips (a global energy company), which is also one of the Portfolio's top ten holdings, and EOG Resources Inc. (natural gas and crude oil exploration). Energy was the best performing sector in the S&P 500 Index in 2004, driven by rising prices in oil and gas through much of the year. Despite a fallback in prices in the fourth quarter, the Energy sector gained nearly 29% for the year. Other individual holdings that added substantially to the Portfolio's performance in 2004 included Google Inc. (a global technology company, best known for its online index of websites), PetsMart (a pet supply retailer), Prudential Financial Inc. (a financial services company), and Canadian National Railway Co.

U.S. economic growth in 2005 may lag that of 2004. In an environment like that, companies with more stable growth, including larger capitalization companies, could be more attractive to investors. The Portfolio focuses on companies with stable earnings growth, strong market share and pricing power. We also look for companies with increasing amounts of free cash flow that are focused on returning that to shareholders through share

Large Cap Core Stock Portfolio

buybacks, dividend increases or accretive acquisitions. As of December 31, 2004, the Portfolio has overweight positions in the Energy and Materials sectors; an underweight position in Financials; and is near market weight in all other sectors. These weightings are intended to take advantage of previous under spending and high demand levels in the Energy and Materials areas. The underweight in Financials is due to potentially higher interest rates and the flattening of the yield curve as a result. While sector weighting can be an important driver of overall Portfolio performance, we continue to remain focused on individual stock selection, looking for companies with long-term growth of capital and income potential.

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Large Cap Core Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. Source: Lipper, Inc.

Sector Allocation 12/31/04

Large Cap Core Stock Portfolio

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,065.30	\$2.29
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.61	\$2.25

* Expenses are equal to the Fund's annualized expense ratio of 0.44%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

Capital Guardian Domestic Equity Portfolio

Objective:

Long-term growth of capital and income

Portfolio Strategy:

Invest in larger American companies that exhibit value characteristics relative to S&P 500 Index.

Net Assets:

\$212 million

The Capital Guardian Domestic Equity Portfolio seeks long-term growth of capital and income. The Portfolio seeks to meet this objective primarily by investing in equity securities of U.S. issuers and securities whose principal markets are in the U.S., including American Depositary Receipts (ADRs) and other U.S. registered securities. The companies in which the Portfolio invests will generally have a market capitalization of \$1 billion dollars or more at the time of purchase. In selecting securities for purchase or sale, the Portfolio's investment adviser attempts to keep the Portfolio's assets invested in securities that exhibit one or more value characteristics relative to the market norms reflected in the S&P 500 Index. These value characteristics include below market price to earnings ratios, below market price to book ratios, and dividend yields that are equal to or above the market norms.

For the year ended December 31, 2004, the Capital Guardian Domestic Equity Portfolio returned 16.85%, outperforming the S&P 500 Index, which had a return of 10.88%, by nearly six percentage points. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The average return for the Portfolio's peer group, Multi-Cap Value Funds, was 14.62%, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

Following a spectacular year for stocks in 2003, the U.S. stock market experienced very nice gains again for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%. The higher risk segments of the market posted even larger gains: the S&P SmallCap 600 Index gained 22.65% and the S&P MidCap 400 Index gained 16.49% for the year. The majority of the gains in 2004, however, came in the fourth quarter alone. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%.

The Portfolio's strong performance in 2004 can be attributed to a combination of sector weighting decisions and individual stock selection. Overweight positions in the Energy and Telecommunication Services sectors added performance for the year as those sectors enjoyed very nice returns. The Energy sector, aided by rising oil prices through much of the year, was the best performing sector in the S&P 500 Index in 2004. Underweight positions in Information Technology and Health Care also helped performance. The Health Care sector, which was hurt by negative news on a number of prescription drugs, was the worst performing sector for 2004.

Individual stock selection was also key to performance. Five of the Portfolio's top ten holdings were among the top ten contributors to performance in 2004, including SLM Corp. (financial services), Altria Group Inc. (consumer products), General Electric Co. (diversified industrial corp.), Hartford Financial Services (diversified insurance co.) and General Growth Properties (real estate investment trust). Individual securities in the Energy and Telecommunication Services sectors that added value included Transocean Inc. (oil and gas well drilling) and Sprint FON Group (long-distance, local and wireless communications). Both posted impressive gains for the year. Although being underweight in the Information Technology and Health Care sectors helped the Portfolio's performance overall, a number of stocks in those sectors performed well. Advanced Micro Devices Inc. (semiconductor manufacturer), Sabre Holdings Corp. (proprietary computer reservation system), Sun Microsystems Inc. (network computer products and services), Fairchild Semiconductor International (designs and develops semiconductors), WellPoint Inc. (health benefits company), Becton Dickinson Co. (health care supplies and systems), Cigna Corp. (insurance and financial services), and Lincare Holdings Inc. (provides in-home respiratory therapy services) were all good performers.

Key sector detractors to the Portfolio's performance in 2004 included an underweight position in Consumer Discretionary stocks, as well as individual Health Care holdings Merck & Co. Inc., Pfizer Inc., Eli Lilly & Co., and AstraZeneca Group PLC. Technology stocks Cadence Design Systems, Avnet Inc., Hewlett-Packard Co. and MicronTechnology, Inc. also had poor performance in 2004.

Capital Guardian Domestic Equity Portfolio

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 7/31/01 (commencement of the portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

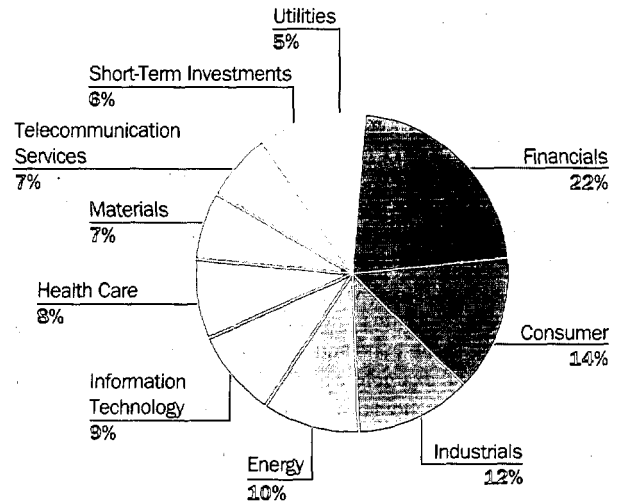

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Multi Cap Value Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by portfolio practice, invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time. Multi-cap funds typically have between 25% to 75% of their assets invested in companies with market capitalizations (on a three-year weighted basis) above 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Multi-cap value funds typically have a below-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SuperComposite 1500 Index. Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,114.10	\$3.28
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.73	\$3.14

* Expenses are equal to the Fund's annualized expense ratio of 0.62%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

- (a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$178,973 and the net unrealized appreciation of investments based on that cost was \$32,543 which is comprised of \$34,634 aggregate gross unrealized appreciation and \$2,091 aggregate gross unrealized depreciation.

The Accompanying Notes are an Integral Part of the Financial Statements

T. Rowe Price Equity Income Portfolio

Objective:

Long-term growth of capital and income.

Portfolio Strategy:

Invest in the equity securities of established companies.

Net Assets:

\$90 million

The objective of the T. Rowe Price Equity Income Portfolio is long-term growth of capital and income. Management seeks to achieve this objective mainly through investment in the stocks of well-established companies paying above-average dividends. A value approach is used in selecting investments, with an effort made to identify companies that appear to be undervalued by various measures but have good prospects for capital appreciation and dividend growth. Management looks for characteristics such as an established operating history, above-average dividend yield, a low price/earnings ratio, sound financial condition, and a low stock price relative to a company's underlying value.

U.S. stocks posted their second consecutive year of gains for the first time since 1998-99. Value shares outstripped growth by an impressive margin in 2004, while small- and mid-cap stocks outpaced large-company shares. The widely followed Dow Jones Industrial Average registered the smallest gain, while the broader market indices, including the S&P 500 Index and Nasdaq Composite, were stronger.

The Federal Open Market Committee's (FOMC) five rate increases in 2004, which lifted the fed fund's rate target from 1.00% to 2.25%, failed to dampen the economic boost provided by firm stock prices, low long-term interest rates, tight yields among bonds of various qualities, and a falling dollar. Consumer and housing demand continue to draw support from job gains, income growth, and low interest rates. Resilient profit margins, steady cash flow, and rising utilization rates underpin capital expenditures.

While employment gains have been somewhat choppy, we believe they are strong enough to gradually reduce the unemployment rate over time. An upturn in the growth of labor costs and higher import prices, driven by a weak dollar, are generating a cyclical rise in inflation. That said, inflation remains relatively low in historical terms, allowing the FOMC to continue to tighten monetary policy gradually in coming months.

The past year ended on a positive note as consumer confidence recovered to the level attained in mid-summer. The weakness in recent months was most likely related to uncertainty about employment prospects, spiking oil prices, and uneasiness surrounding the election — concerns that moderated during the

final weeks of the year. We anticipate continuing economic growth in 2005.

The T. Rowe Price Equity Income Portfolio posted strong absolute results and significantly outpaced the S&P 500 Stock Index for the twelve-month period due to several factors, including a significant underweight in information technology (IT) and strong stock selection plus an underweight in health care. Due to concerns about tech companies' ability to meet second-half earnings projections, IT traded significantly lower in the third quarter and was one of the worst-performing S&P 500 sectors during 2004.

Health care badly lagged the market as pharmaceutical stocks were impaired by limited growth prospects, generic competitive pressures, and more recently by Merck's problems with Vioxx and Pfizer's with Celebrex. Within the sector, health care insurer CIGNA boosted relative results because of an improvement in the firm's fundamentals and stronger-than-anticipated performance in its health care business. Cardinal Health, a new portfolio position, rebounded following a series of negative events that drove the stock down in the second and third quarters.

Energy was the best-performing sector in the Index in 2004, thanks to rising energy prices and improved investor sentiment, and an overweight position benefited relative performance. In addition, strong stock selection in the utilities sector enhanced our return versus the benchmark. TXU benefited from a new management team and the sale of non-core assets to improve the company's balance sheet. On a negative note, stock selection in the consumer discretionary sector detracted slightly as New York Times, Dow Jones, and Knight-Ridder were hurt by sluggish advertising trends.

We are cautious heading into 2005. The market is fairly valued and the corporate profit outlook appears to be moderating; earnings have reached record levels over the past year, and profit growth will likely be pressured by relatively high energy prices and higher short-term interest rates. Additionally, the trade and budget deficits, along with the ongoing war in Iraq, could make for a tougher environment. Nevertheless, despite these headwinds, we continue to view the economic environment as favorable; corporate balance sheets appear strong with healthy levels of cash, and value stocks should benefit from favorable tax treatments for dividends and capital gains.

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 5/1/03 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 billion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Equity Income Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that, by prospectus language and portfolio practice, seek relatively high current income and growth of income by investing primarily in dividend-paying equity securities. These funds' gross or net yield must be at least 125% of the average gross or net yield of the U.S. diversified equity fund universe. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,101.81	\$3.49
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.51	\$3.36

* Expenses are equal to the Fund's annualized expense ratio of 0.66%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

Index 500 Stock Portfolio

Objective:

Long-term capital appreciation through cost-effective participation in broad market performance

Portfolio Strategy:

Invest in a portfolio designed to approximate the composition and returns of the S&P 500 Index.

Net Assets:

\$1.9 billion

The Index 500 Stock Portfolio seeks investment results that approximate the performance of the Standard & Poor's 500 Composite Stock Price Index. The S&P 500® Index is composed of 500 common stocks representing approximately three-fourths of the total market value of all publicly traded common stocks in the U.S. The Portfolio's strategy is to capture broad market performance by investing in a portfolio modeled after a broadly based stock index. The Portfolio invests in stocks included in the S&P 500 Index in proportion to their weightings in the Index, and may buy or sell securities after announced changes in the Index but before or after the effective date of the changes to attempt to achieve higher correlation with the Index. The Index 500 Stock Portfolio is not managed in the traditional sense using economic, financial and market analysis. A computer program is used to determine which stocks are to be purchased or sold to achieve the Portfolio's objective. Therefore, the Portfolio remains neutral relative to the benchmarks in terms of economic sectors, market capitalization, and the growth and value styles of investing. The Portfolio will, to the extent feasible, remain fully invested, and may purchase Index futures contracts in amounts approximating the cash held in the Index.

For the year ended December 31, 2004, the Portfolio had a total return of 10.70%, slightly lagging the S&P 500 Index, which returned 10.88%. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) Portfolio performance slightly lagged the S&P 500 Index due to transaction costs, administrative expenses, cash flow effects and holdings of stock index futures contracts. The average return for the Portfolio's peer group, S&P Index 500 Objective Funds, was 10.35% for the twelve months ended December 31, 2004, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

Following a spectacular year for stocks in 2003, the U.S. stock market experienced very nice gains again for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%. The higher risk segments of the market posted even larger gains: the S&P SmallCap 600 Index gained 22.65% and the S&P MidCap 400 Index gained 16.49% for the year. The majority of the gains in 2004, however, came in the fourth quarter alone. Earlier in the year

the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.79%.

For 2004, all ten of the sectors within the S&P 500 Index had positive returns. The strongest sectors were Energy (up 28.77%), Utilities (up 19.60%), Telecommunications (up 15.98%), and Industrials (up 15.95%). Energy stocks enjoyed the best gains as oil prices rose dramatically throughout most of the year before backing off in the fourth quarter. Other sectors that performed well included Consumer Discretionary (up 12.15%), Materials (up 10.88%), and Financials (up 8.23%). Although still positive, the remaining sectors had smaller gains: Consumer Staples (up 6.04%), Information Technology (up 2.13%), and Health Care (up 0.24%). The worst performing sector — Health Care — was adversely affected during the year by negative news on a number of prescription drugs.

The Fund seeks to track the performance and weightings of stocks in the S&P 500 Index. Accordingly, changes are made to the Fund's holding as the Index changes. Such changes occur as companies go public or private, merge, divest or have major changes in market capitalization. Additionally, Standard & Poor's adjusts the Index to better reflect the companies that are most representative of the composition of the U.S. economy. During 2004, there were 20 companies added to the Index. Those added during the fourth quarter were XTO Energy, Compass Bancshares, Archstone-Smith Trust, News Corp., Freescale Semiconductor Inc., L-3 Communications Holdings, Laboratory Corp of America Holdings and CIT Group. There were 20 companies eliminated from the Index during the year. During the fourth quarter the stocks eliminated were PeopleSoft Inc., Worthington Industries, Crane Co., Deluxe Corp., Winn-Dixie, WellPoint Health Networks, South Trust Corp., and AT&T Wireless.

Index 500 Stock Portfolio

Relative Performance

Average Annual Total Return For Periods Ended December 31, 2004

	1 Year	5 Years	10 Years
Index 500 Stock Portfolio	10.70%	-2.28%	12.02%
S&P 500 Index	10.88%	-2.30%	12.07%
S&P 500 Index Objective Funds Lipper Average	10.35%	-2.64%	11.69%

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) S&P 500 Index Objective Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that are passively managed and commit by prospectus language to replicate the performance of the S&P 500 Index, including reinvested dividends. In addition, S&P 500 Index funds have limited expenses (advisor fee no higher than 0.50%). Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on equities.

Sector Allocation and Top 10 Holdings are subject to change.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,071.40	\$1.05
Hypothetical (5% return before expenses)	\$1,000.00	\$1,023.81	\$1.03

* Expenses are equal to the Fund's annualized expense ratio of 0.20%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

The Accompanying Notes are an Integral Part of the Financial Statements

Asset Allocation Portfolio

Objective:

Realize highest total return, including current income and capital appreciation, consistent with reasonable investment risk

Portfolio Strategy:

Flexible policy of allocating assets among stocks, bonds and cash, with mix adjusted to capitalize on changing financial markets and economic conditions.

Net Assets:

\$197 million

The investment objective of the Asset Allocation Portfolio is to realize as high a level of total return as is consistent with reasonable investment risk. The Portfolio will follow a flexible policy for allocating assets among equity securities, debt investments, and cash or cash equivalents. The Asset Allocation Portfolio invests in six categories of assets: large capitalization stocks, small capitalization stocks, foreign stocks, investment grade bonds, below investment grade bonds, and cash equivalents. The proportion of investments in each category is adjusted as appropriate to take advantage of market trends and opportunities, and securities within each category are actively managed by an investment professional with expertise in that category. The Portfolio is managed to maintain broad diversification, while blending asset classes to achieve both capital appreciation and current income.

Comparison of returns of the Asset Allocation Portfolio with stock or bond indices is of limited usefulness because there is no index that includes both equity and debt securities. The Portfolio's performance is generally a blend of stock and bond performance. For the year ended December 31, 2004, the Asset Allocation Portfolio had a total return of 10.02%. The return was below the return of 10.88% for the S&P 500 Index, but above the return of the bond benchmark, the Merrill Lynch Domestic Master Index, which had a return of 4.34%. (These indices are unmanaged, cannot be invested in directly, and do not include administrative expenses or sales charges.) The Portfolio outperformed its peer group, Flexible Portfolio Funds, which had an average return of 8.25% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

Stocks, which had a spectacular year in 2003, experienced very nice gains again for the year ended December 31, 2004. As the cyclical recovery continued, returns on large capitalization stocks lagged for the second year in a row, as investors sought higher returns in riskier equities including small cap and international stocks. The majority of the gains in all segments of the market came in the fourth quarter alone. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%.

Bonds also posted positive returns in 2004, and high yield bonds significantly outperformed investment grade bonds for the second year in a row. The bond market experienced significant fluctuations

during the year, however. Short-term interest rates began to rise in April, after a sustained period in which they had remained at 45-year lows, and the second quarter of 2004 was the worst quarter for bond returns since 1980. Reversing course in the third quarter — an unusual time in which bond prices rose while short-term interest rates were moving up — bonds had their best quarter in two years. The fourth quarter of 2004 was typified by generally rising yields, with the rise most acute at the front end of the yield curve, and the yield curve continued to flatten. With the economy seemingly on stable footing — growing not too fast and not too slow — the incremental yields of both high grade corporates and high yield bonds looked appealing. Overall for the year, the Treasury yield curve flattened and corporate credit spreads tightened as bond investors looking for higher yields took on more credit risk rather than locking in longer term bonds.

Adding to the Portfolio's return in 2004 was an overweight position in foreign stocks, which benefited from strength in most international stock markets and from the weaker dollar. International stocks, as measured by the MSCI EAFE (Europe, Australasia, Far East) Index, returned 20.70% for the year. Seeing more potential in international stocks than in domestic stocks, we made a conscious decision to add to this position, and at year end, 16% of the Portfolio was invested in foreign stocks compared to 15.0% at the beginning of the year. A substantial position in small-capitalization stocks (12.8% of assets at year end) also helped the Portfolio's performance, as riskier securities outperformed high quality stocks for the year. Small cap stocks were the best performing asset class in 2004, as measured by the S&P 600 SmallCap Index, which gained 22.65% for the year. A neutral weighting in large cap domestic stocks (32%, including futures, at year end), which underperformed riskier small-cap and mid-cap stocks during the year, was a slight drag on performance. The Portfolio's weighting in investment grade bonds, which was too high given the environment that rewarded riskier assets, was also a negative for the year. At year end, the Portfolio held approximately 28% of its assets in investment grade bonds and approximately 7% in below-investment grade bonds.

As we enter the first quarter of 2005, we see no obvious valuation anomalies among asset classes, and the Portfolio is staying close to neutral. A modest overweight position in equities is an indication of the team's view that stocks still look relatively inexpensive compared to bonds. The variability of returns in many asset classes in recent years provides convincing evidence of the advantage of a diversified portfolio. This Portfolio gives investors the advantage of ongoing analysis of all market sectors, with shifts among sectors as appropriate for market conditions. We will continue to evaluate each asset class individually and comparatively, and choose the asset allocation we believe is likely to maximize overall long-term returns.

Asset Allocation Portfolio

Relative Performance

Average Annual Total Return For Periods Ended December 31, 2004

	1 Year	Since Inception*
Asset Allocation Portfolio	10.02%	4.59%
S&P 500 Index	10.88%	1.72%
Merrill Lynch Domestic Master Index	4.34%	6.20%
Merrill Lynch Three Months T-Bill Index	1.33%	1.65%
Flexible Portfolio Funds Lipper Average	8.25%	-

*inception date of 7/31/01

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 7/31/01 (commencement of the Portfolio's operations). Returns shown reflect fee waivers, deductions for management and other Portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account Report.

In the graph, the Portfolio is compared against three indices representing the three major components of the Fund: equities, fixed income and cash equivalent investments. The indices cannot be invested in directly and do not include sales charges.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Merrill Lynch Domestic Master Index is an unmanaged market value weighted index comprised of U.S. Government, mortgage and investment-grade corporate bonds. The Index measures the income provided by, and the price changes of, the underlying securities.

The Merrill Lynch Three Months T-Bill Index is comprised of a single issue purchased at the beginning of each month and held for a full month. The issue selected at each month-end rebalancing is the outstanding Treasury bill that matures closest to, but not beyond, three months from the rebalancing date.

The Lipper Variable Insurance Products (VIP) Flexible Portfolio Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that allocate investments across various asset classes, including domestic common stocks, bonds, and money market instruments with a focus on total return. Source: Lipper, Inc.

Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. These include the risks of currency fluctuation, of political and economic instability and of less well-developed government supervision and regulation of business and industry practices, as well as differences in accounting standards. Small-cap stocks also may carry additional risk. Small or newer issuers are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Investments in such companies can be both more volatile and more speculative.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.
Sector Allocation is subject to change.

No investment strategy can guarantee a profit or protect against a loss.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,078.00	\$3.31
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.64	\$3.22

* Expenses are equal to the Fund's annualized expense ratio of 0.63%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

144A after the name of a security represents a security exempt from registration under Rule 144A of the securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2004, the value of these securities was 8,939, representing 4.55% of net assets.

(a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$174,760 and the net unrealized appreciation of investments based on that cost was \$21,640 which is comprised of \$22,884 aggregate gross unrealized appreciation and \$1,244 aggregate gross unrealized depreciation.

(b) All or a portion of the securities have been committed as collateral for open futures positions or when-issued securities. Information regarding open futures contracts as of period end is summarized below.

Issuer (000's)	Number of Contracts	Expiration Date	Unrealized Appreciation/ Depreciation (000's)
S&P 500 Index Futures (Total Notional Value at December 31, 2004, \$15,047)	51	3/05	\$428
US Ten Year Treasury Note (Total Notional Value at December 31, 2004, \$225)	2	3/05	\$ 1

(d) Defaulted Security

(e) Step bond security that presently receives no coupon payments. At the predetermined date, the stated coupon rate becomes effective.

Balanced Portfolio

Objective:

A high level of current income and capital growth with a low risk profile

Portfolio Strategy:

Achieve consistent returns and low volatility by diversifying among assets.

Net Assets:

\$3.0 billion

The investment objective of the Balanced Portfolio is to realize as high a level of long-term total rate of return as is consistent with prudent investment risk. The Portfolio's total rate of return consists of current income, including dividends, interest and discount accruals, and capital appreciation. The assets of the Balanced Portfolio will be invested in the following three market sectors: common stock and other equity securities including the securities in which the Index 500 Stock Portfolio invests; bonds and other debt securities with maturities generally exceeding one year, including the securities in which the Select Bond Portfolio invests; and money market instruments and other debt securities with maturities generally not exceeding one year including the securities in which the Money Market Portfolio invests. The Balanced Portfolio seeks to achieve its investment objectives by adjusting the mix of investments among the three market sectors. The manager attempts to capitalize on variation in return potential produced by the interaction of changing financial markets and economic conditions.

The Balanced Portfolio differs from the Asset Allocation Portfolio in several ways. It invests in just three asset classes, while the Asset Allocation Portfolio utilizes six categories of assets, including riskier securities such as small-cap stocks, foreign stocks and high yield bonds. The equity portion of the Balanced Portfolio is indexed, while the equities in the Asset Allocation Portfolio are actively managed. The Balanced Portfolio is therefore designed to be a lower risk portfolio, with less volatility than the Asset Allocation Portfolio. In a market in which riskier investments are rewarded, the Balanced Portfolio will normally underperform the Asset Allocation Portfolio. The fact that the Balanced Portfolio cannot own small cap or international stocks had a negative influence on performance in 2004, a year in which those asset classes outperformed the broad stock market.

Definition of an appropriate benchmark for comparison of returns of the Balanced Portfolio is difficult because there is no index that includes both equity and debt securities. Accordingly, comparisons are provided with three different indices: the S&P 500 Index for stocks, Merrill Lynch Domestic Master Index for bonds, and the Merrill Lynch Three-Month U.S. Treasury Bill Index for short-term investments. As expected, the Balanced Portfolio's performance for the year ended December 31, 2004 was a blend of stock and bond performance. The Portfolio had a total return of 7.89%, below the return of 10.88% on the S&P 500, but above the return of the bond benchmark, the Merrill Lynch Domestic Master Index, which had a return of 4.34%, and the Merrill Lynch Three-Month U.S. Treasury Bill Index, which had a return of 1.33%. (These indices are unmanaged, cannot be invested in directly, and do not include administrative expenses or sales charges.) The Portfolio underperformed its peer group, Flexible Portfolio Funds, which had an average return of 8.25% for the same period, according to Lipper

Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The Portfolio's slight underperformance relative to its peer group resulted mainly from its inability to own riskier assets — particularly small cap and foreign stocks and high yield bonds — as they moved up sharply during the fourth quarter of 2004. The Portfolio was above the peer group performance for the first nine months of the year, and then slipped in the last quarter as the riskiest, highest beta assets outperformed.

In general, stocks performed nicely for the year ended December 31, 2004. The S&P 500 Index posted a gain of 10.88%, while the higher risk segments of the market posted even larger gains. Small cap stocks, as measured by the S&P SmallCap 600 Index, gained 22.65%, and mid cap stocks, as measured by the S&P MidCap 400 Index, gained 16.49% for the year. The majority of the gains across all sectors came in the fourth quarter of 2004. Earlier in the year the stock market languished, as a number of economic concerns dampened investors' spirits. A combination of rising oil prices, a weakening dollar, rising interest rates, the Iraqi war, and the upcoming presidential election put a drag on the economy and the market. But in the fourth quarter, especially following the November elections, the market experienced a dramatic turnaround. A significant drop in oil prices beginning in October also served as a catalyst for the change, and the gains made during the fourth quarter accounted for most of the gain for the year. The fourth quarter alone accounted for 9.23% of the S&P 500 Index's 2004 annual gain of 10.88%.

Bonds also posted positive returns for the year and added to the Balanced Portfolio's performance. The Merrill Lynch Domestic Master Index had a return of 4.34% for the year, although the higher risk segments of the bond market — as in the stock market — posted much higher returns. High yield bonds, as measured by the Lehman Intermediate High Yield Index, gained 10.85% in 2004.

The target asset mix for the Balanced Portfolio is established and adjusted with input from an asset valuation model designed to gauge the relative attractiveness of stocks versus bonds. Changes are at the margin, so that there are always core positions in both asset classes. During 2004, the asset mix was changed several times to take advantage of market moves. Equities were reduced in the first quarter of 2004, and remained at an average to below average weighting through the third quarter, as stocks languished. Heading into the fourth quarter of 2004, the stock weighting was increased and the Portfolio was in a good position to take advantage of the fourth quarter rally. At year end, the Portfolio's stock exposure was at an above neutral weighting of approximately 57% as the rally subsided, and investment grade bonds made up 42% of the Portfolio.

Balanced Portfolio

Relative Performance

Sector Allocation 12/31/04

Sector allocation is based on Net Assets.
Sector allocation is subject to change.

Average Annual Total Return
For Periods Ended December 31, 2004

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

In the graph, the Portfolio is compared against three indices representing the three major components of the Portfolio: equities, fixed income and cash equivalent investments. The indices cannot be invested in directly and do not include sales charges.

The Merrill Lynch Domestic Master Index is an unmanaged market value weighted index comprised of U.S. Government, mortgage and investment-grade corporate bonds. The Index measures the income provided by, and the price changes of, the underlying securities.

The Merrill Lynch Three Months T-Bill Index is comprised of a single issue purchased at the beginning of each month and held for a full month. The issue selected at each month-end rebalancing is the outstanding Treasury bill that matures closest to, but not beyond, three months from the rebalancing date.

The Standard & Poor's 500 Composite Stock Price Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. As of December 31, 2004, the 500 companies in the composite had a median market capitalization of \$10.6 billion and a total market value of \$11.2 trillion. The S&P 500 represents approximately 60.2% of the market value of the Compustat's database of about 9,381 equities. The index cannot be invested in directly and does not include sales charges.

The Lipper Variable Insurance Products (VIP) Flexible Portfolio Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that allocate investments across various asset classes, including domestic common stocks, bonds, and money market instruments with a focus on total return. Source: Lipper, Inc.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,060.00	\$1.55
Hypothetical (5% return before expenses)	\$1,000.00	\$1,023.32	\$1.53

* Expenses are equal to the Fund's annualized expense ratio of 0.30%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

Balanced Portfolio

Northwestern Mutual Series Fund, Inc.

(b) All or a portion of the securities have been committed as collateral for open futures positions or when-issued securities. Information regarding open futures contracts as of period end is summarized below.

Issuer (000's)	Number of Contracts	Expiration Date	Unrealized Appreciation/Depreciation (000's)
S&P 500 Index Futures (Total Notional Value at December 31, 2004, \$265,239)	899	3/05	\$7,540
US Ten Year Treasury Note (Total Notional Value at December 31, 2004, \$11,248)	100	3/05	\$ 55

(d) Defaulted Security

(f) All or a portion of the securities have been loaned.
See Note 6.

The Accompanying Notes are an Integral Part of the Financial Statements

High Yield Bond Portfolio

Objective:

High current income and capital appreciation with moderate risk.

Portfolio Strategy:

Generate superior performance by investing in a diversified mix of fixed income securities rated below investment grade.

Net Assets:

\$229 million

The investment objective of the High Yield Bond Portfolio is to achieve high current income and capital appreciation. The Portfolio invests primarily in debt securities that are rated below investment grade by at least one major rating agency. High yield debt securities are often called "junk bonds."

For the year ended December 31, 2004, the Portfolio had a total return of 12.76%, outperforming its benchmark, the Lehman High Yield Intermediate Index, which returned 10.85%. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The average return for the Portfolio's peer group, High Current Yield Funds, was 9.84% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The High Yield Bond Portfolio has performed better than the Index since inception (May 3, 1994). The Portfolio's outperformance during 2004 can be attributed to a combination of quality mix, industry sector exposure and individual credit selections.

Following an exceptional year in 2003, the High Yield Bond Portfolio once again reported double digit returns in 2004. During the first half of 2004, the Federal Reserve Board outlined a measured approach to raising interest rates; high yield credit spreads tightened and high yield bonds performed well in an environment of rising interest rates. For the year overall, high yield bonds benefited from a strengthening economy, which is positive for earnings and cash flow of the leveraged companies that issue high yield bonds. Technical factors also supported the high yield market, as investors seeking yield in a low interest rate environment demonstrated a willingness to take on more risk. Although the expectation for high yield bonds in 2004 was good, gains were even better than expected. Overall, the high yield sector was the best performing domestic fixed income sector for the year. The reason

lies in good fundamentals. High yield bonds perform best when things are going well in the economy. That was true in 2004, when we experienced good growth, good corporate earnings, and good cash flow. Very low default rates (less than 3%, according to Moody's) also helped, with more positive credit rating changes reported for the year than negative.

The Portfolio's outperformance in 2004 was the result of three factors: a moderately aggressive quality mix, industry sector selection and individual credit selection. The Portfolio's emphasis on B-rated, rather than higher quality, bonds helped its performance as lower quality bonds outperformed. The Portfolio also had good exposure to several industry sectors that turned in good performance for the year, including Telecom-Wireline, Financial Services, Cable TV and Satellite, and Chemicals. In addition, very few bonds in the Portfolio disappointed, as there were relatively few credit problems during 2004. Individual credit selections that performed particularly well during 2004 included AT&T, Huntsman Chemical, Appleton Papers, Playtex Products and Kabel Deutschland.

In 2003, and again in 2004, high yield bonds produced above-average returns. That level of return should not be anticipated for future periods. As we enter 2005, we will look for long-term interest rates to rise moderately with continued growth in the economy, and we also expect that high yield credit spreads will be maintained, given the strong fundamentals in the corporate sector.

We will continue to look for opportunities to achieve the Portfolio's primary investment strategy of achieving high current income and capital appreciation by investing in industries and individual companies that are attractively priced relative to the overall high yield market.

High Yield Bond Portfolio

Relative Performance

Average Annual Total Return
For Periods Ended December 31, 2004

	1 Year	5 Years	10 Years
High Yield Bond Portfolio	12.76%	7.21%	8.41%
Lehman Brothers High Yield Intermediate Market Index	10.85%	6.23%	7.59%
Citigroup High Yield Cash Pay Index	10.51%	7.75%	8.62%
High Current Yield Funds Lipper Average	9.84%	4.95%	7.14%

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

Bonds and other debt obligations are affected by changes in interest rates, inflation risk and the creditworthiness of their issuers. High yield bonds generally have greater price swings and higher default risks than investment grade bonds. Return of principal is not guaranteed. In contrast to owning individual bonds, there are ongoing fees and expenses associated with owning shares of bond funds.

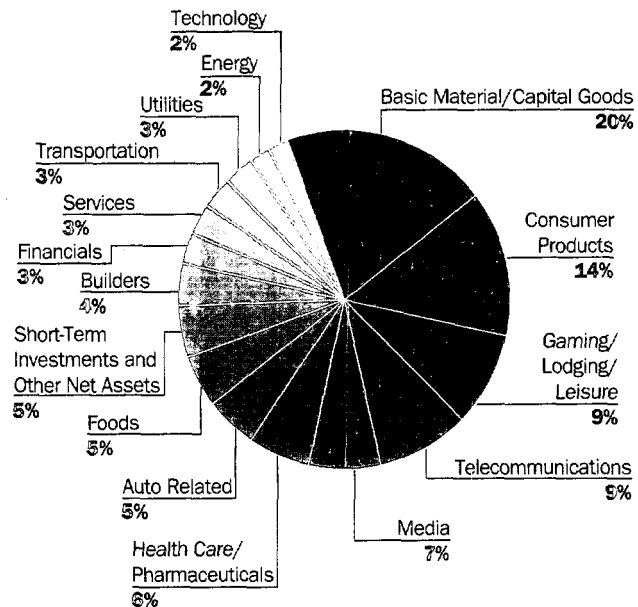

The total return performance for the High Yield Bond Portfolio has been shown in comparison with the Lehman Brothers High Yield Intermediate Market Index. The Lehman Brothers index is one of several appropriate measures of portfolio performance since it has a quality and maturity profile that resembles the High Yield Bond Portfolio. The index cannot be invested in directly and does not include sales charges. The Lehman Brothers High Yield Intermediate Market Index is made up of dollar-denominated, nonconvertible, SEC publicly registered fixed rate noninvestment grade issues. The bonds will have remaining maturities of between one and ten years and have an outstanding par value of at least \$100 million. Yankee and global bonds (SEC registered) of issuers in G-7 countries are included. Original issue zero coupon bonds and step-up coupon structures are also included; however, the index excludes pay-in-kind (PIK) bonds. Each bond must be rated Ba1 or lower by Moody's Investor Service. If a Moody's rating is unavailable, the bonds must be rated BB+ or lower by Standard & Poor's, or by Fitch if an S&P rating is unavailable. A few unrated bonds are included in the index; to be eligible they must have previously held a high yield rating or have been associated with a high yield issuer. The index is an unmanaged market value weighted index and measures the income provided by, and the price changes of, the underlying securities.

The Citigroup High Yield Cash Pay Index captures the performance of below-investment-grade debt issued by corporations domiciled in the United States or Canada. The index includes only cash-pay bonds (both registered and Rule 144A) with maturities of at least one year and a minimum amount outstanding of US\$100 million.

The fund is changing its benchmark index from the Lehman Brothers High Yield Intermediate Market Index to the Citigroup High Yield Cash Pay Index because the Citigroup Index provides greater transparency as to the composition and characteristics of the index than does the Lehman Brothers Index. The greater transparency allows the fund to enhance its analysis of performance relative to the benchmark.

The Lipper Variable Insurance Products (VIP) High Current Yield Funds Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that aim at high (relative) current yields from fixed income securities, have no quality or maturity restrictions, and tend to invest in lower grade debt issues. Source: Lipper, Inc.

Sector Allocation 12/31/04

Sector Allocation is based on Net Assets.
Sector Allocation is subject to change.

There are greater risks inherent in a fund that primarily invests in high yield bonds.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,096.80	\$2.58
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.37	\$2.49

* Expenses are equal to the Fund's annualized expense ratio of 0.49%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

144A after the name of a security represents a security exempt from registration under Rule 144A of the securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2004, the value of these securities was \$91,674, representing 39.98% of net assets.

- (a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$217,005 and the net unrealized appreciation of investments based on that cost was \$9,076 which is comprised of \$10,806 aggregate gross unrealized appreciation and \$1,730 aggregate gross unrealized depreciation.
- (b) All or a portion of the securities have been committed as collateral for open futures or when-issued securities.
- (d) Defaulted Security
- (e) Step bond security that presently receives no coupon payment. At the predetermined date, the stated coupon rate becomes effective.

The Accompanying Notes are an Integral Part of the Financial Statements

Select Bond Portfolio

Objective:

A stable and relatively high level of long-term total return and preservation of capital

Portfolio Strategy:

Invest in high grade corporate bonds, U.S. government bonds and bonds of government agencies.

Net Assets:

\$661 million

The primary investment objective of the Select Bond Portfolio is to realize as high a level of total return as is consistent with prudent investment risk. A secondary objective is to seek preservation of shareholders' capital. The Select Bond Portfolio's assets are invested primarily in debt securities that are rated investment grade by at least one major rating agency.

For the year ended December 31, 2004, the Select Bond Portfolio had a total return of 4.75%, outperforming the Merrill Lynch Domestic Master Index (a broadly-based bond index), which returned 4.34% for the year. (This Index is unmanaged, cannot be invested in directly and does not include administrative expenses or sales charges.) The average return for the Portfolio's peer group, Corporate Debt Funds A Rated, was 4.22% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency.

The bond market posted positive returns in 2004, and high yield bonds significantly outperformed investment grade bonds for a second year in a row. However, there were significant fluctuations in bond returns during the course of the year. Beginning in April of 2004, short-term interest rates began to rise after a sustained period in which they had remained at 45-year lows. With rates on the rise, the second quarter of 2004 was the worst quarter for bond returns since 1980. Bonds reversed course in the third quarter — an unusual time in which bond prices rose while short-term interest rates were moving up — and after delivering negative returns the previous quarter, bonds had their best quarter in two years.

The fourth quarter of 2004 was typified by generally rising yields, with the rise most acute at the front end of the yield curve, and the yield curve continued to flatten. With the economy seemingly on stable footing — growing not too fast and not too slow — the incremental yields of both high grade corporates and high yield bonds looked appealing. Overall for the year, the Treasury yield curve flattened and corporate credit spreads tightened as bond investors looking for higher yields took on more credit risk rather than locking in longer term bonds.

The Select Bond Portfolio's outperformance compared to the Index can be attributed in large part to maintaining a more favorable bias in favor of lower interest rates. Early in 2004, the consensus expectation was for higher interest rates. While the bond market experienced volatility during the year, rates ended the year slightly lower from the beginning of the year. Consequently, the Portfolio's longer duration added value this year. The Portfolio's favorable interest rate positioning was slightly offset by its underweight to corporate bonds which outperformed during 2004. Within the corporate sector, the Portfolio was positioned in higher quality corporates at a time when lower quality bonds performed better. Being underweight mortgage-backed securities also negatively impacted the performance of the Portfolio, but individual security selections in the mortgage-backed sector outperformed.

At year end 2004, the Portfolio had a higher weighting in corporate bonds and mortgage-backed securities, a slightly more aggressive quality mix of corporate bonds and a slightly shorter duration. As of December 31, 2004, 36% of the Select Bond Portfolio's assets were in Government and Government Agency securities, 42% in Corporate Bonds, 4% in Short-term Investments and Other Assets, and 18% in Mortgage-Backed and Asset-Backed securities.

Heading into 2005, we see the fundamentals in the economy as sound, and the major sectors of the fixed income market appear to be fully valued on a spread basis. Corporate earnings are good and the default risk is low, and we believe spreads will be maintained and interest rates will rise only modestly in the early part of the year. We will continue to look for opportunities to effectuate the Portfolio's primary investment strategy — to actively manage the Portfolio to take advantage of changes in interest rates and sector, quality, and maturity spread differentials of fixed income securities as we seek as high a level of total return as is consistent with prudent investment risk.

Select Bond Portfolio

Relative Performance

Average Annual Total Return
For Periods Ended December 31, 2004

	1 Year	5 Years	10 Years
Select Bond Portfolio	4.75%	8.54%	7.96%
Merrill Lynch Domestic Master Index	4.34%	7.74%	7.74%
Citigroup Broad Investment Grade Index	4.48%	7.73%	7.74%
Corporate Debt Funds A Rated Funds			
Lipper Average	4.22%	7.06%	7.22%

The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information, visit www.nmfn.com.

This chart assumes an initial investment of \$10,000 made on 12/31/94. Returns shown include deductions for management and other portfolio expenses, and reinvestment of all dividends. Returns exclude deductions for separate account sales loads and account fees. Total returns, which reflect deduction of charges for the separate account are shown beginning on page iv of the Performance Summary of the Separate Account report.

Bonds and other debt obligations are affected by changes in interest rates, inflation risk and the creditworthiness of their issuers. High yield bonds generally have greater price swings and higher default risks than investment grade bonds. Return of principal is not guaranteed. In contrast to owning individual bonds, there are ongoing fees and expenses associated with owning shares of bond funds.

Since the Portfolio invests broadly in U.S. Government, mortgage and corporate bonds, a useful basis for comparing returns has been the Merrill Lynch Domestic Master Index. The Merrill Lynch Domestic Master Index is an unmanaged market value weighted index comprised of U.S. Government, mortgage and investment-grade corporate bonds. The Index measures the income provided by, and the price changes of, the underlying securities. The Index cannot be invested in directly and does not include sales charges.

The fund is changing its benchmark index from the Merrill Lynch Domestic Master Index to the Citigroup U.S. Broad Investment Grade Bond Index because the Citigroup Index provides greater transparency as to the composition and characteristics of the index than does the Merrill Lynch Index. The greater transparency allows the fund to enhance its analysis of performance relative to the benchmark.

The Citigroup U.S. Broad Investment Grade Bond Index is designed to track the performance of bonds issued in the U.S. investment-grade bond market. The index is market-capitalization-weighted and includes fixed-rate Treasury, government-sponsored, mortgage, asset-backed, and investment-grade (BBB-/Baa3) issues with a maturity of one year or longer and a minimum amount outstanding of US\$1 billion for Treasuries, US\$5 billion for mortgages, and US\$200 million for credit, asset-backed, and government-sponsored issues.

The Lipper Variable Insurance Products (VIP) Corporate Debt Funds A Rated Average is calculated by Lipper Analytical Services, Inc. and reflects the average investment return of portfolios underlying variable life and annuity products. The category consists of Funds that invest primarily in corporate debt issues rated "A" or better or government issues.

Source: Lipper, Inc.

Sector Allocation 12/31/04

Percentage Holdings are based on Net Assets.
Percentage Holdings are subject to change.

The Corporate Bonds sector includes bonds of companies headquartered outside the United States. The Government and Government Agencies category includes taxable bonds of domestic and foreign governments. Consistent with the Portfolio's stated parameters, no more than 10% of the Portfolio is invested in foreign securities, and no more than 10% is invested in high-yield securities.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,046.00	\$1.54
Hypothetical (5% return before expenses)	\$1,000.00	\$1,023.32	\$1.53

* Expenses are equal to the Fund's annualized expense ratio of 0.30%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

144A after the name of a security represents a security exempt from registration under Rule 144A of the securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2004, the value of these securities was \$44,905, representing 6.79% of net assets.

IO — Interest Only Security

RB — Revenue Bond

(a) At December 31, 2004 the aggregate cost of securities for federal tax purposes (in thousands) was \$738,383 and the net unrealized depreciation of investments based on that cost was \$1,549 which is comprised of \$10,951 aggregate gross unrealized appreciation and \$12,500 aggregate gross unrealized depreciation.

(b) All or a portion of the securities have been committed as collateral for open futures positions or when-issued securities. Information regarding open futures contracts as of period end is summarized below.

Issuer (000's)	Number of Contracts	Expiration Date	Unrealized Appreciation/ Depreciation (000's)

Money Market Portfolio

Objective: Maximum current income consistent with liquidity and stability of capital	Portfolio Strategy: Achieve stability of capital by investing in short-term debt securities.	Net Assets: \$344 million
--	--	-------------------------------------

The Money Market Portfolio's investment objective is to generate maximum current income consistent with liquidity and stability of capital. The Money Market Portfolio, which invests only in high quality commercial paper and other short-term debt securities with maturities generally not exceeding one year, is the least risky of the Portfolios, providing a moderate return in line with prevailing short-term interest rates. The Portfolio will attempt to maximize its return by trading to take advantage of changing money market conditions and trends.

The Money Market Portfolio will also trade to take advantage of what are believed to be disparities in yield relationships between different money market instruments. This procedure may increase or decrease the Portfolio's yield depending upon management's ability to correctly time and execute such transactions. The Money Market Portfolio intends to purchase only securities that mature within a year except for securities which are subject to repurchase agreements. Accordingly, the level of purchases will be relatively high. However, as transaction costs on Money Market Portfolio investments are generally not substantial, the high level of purchases will not adversely affect the Portfolio's net asset value or net income.

The main determinant of returns from the Money Market Portfolio is short-term interest rates in general. For the year ended December 31, 2004, the return on the Portfolio was 1.43%. The Portfolio outperformed its peer group, Money Market Funds, which had an average return of 0.83% for the same period, according to Lipper Analytical Services, Inc. ("Lipper"), an independent mutual fund ranking agency. The Portfolio's outperformance relative to the Index resulted mainly from a management fee waiver of 30 basis points during all of 2004, which ended on December 31, 2004.

Throughout the first five months of 2004, short-term interest rates remained at their lowest levels in many years. But in an effort to moderate economic growth, the Federal Reserve began increasing short-term rates in June, when it raised the federal funds rate by 25 basis points. By year end, the Federal Reserve had raised rates a total of five times, and the fed funds rate, which stood at 1.00% in January, ended the year at 2.25%.

The Federal Reserve governors believe short-term rates are at a level that encourages above average economic activity. They have been methodically raising these short-term interest rates to bring them to a level consistent with moderate economic growth and thereby reducing inflationary pressures.

The increase in short-term rates has not impacted the supply of money market eligible securities. Rather, stability in long-term interest rates has had a larger effect as companies have been able to extend the maturities of their debt to take advantage of the low rate environment, thereby reducing their short-term debt.

Compared to its benchmark, the Money Market Portfolio had a slightly longer average maturity earlier in 2004. The Portfolio's barbell composition (with a large portion of assets invested very short-term) provided the liquidity to reinvest in higher yielding securities as rates were on the rise, which allowed the Portfolio returns to keep pace with the increase in short-term interest rates. At the end of 2004, the average maturity of the Portfolio was in line with its benchmark.

Anticipating more rate increases going forward, we are slowly increasing the Portfolio's average maturity to take advantage of the steepness of the yield curve.

AN INVESTMENT IN THE MONEY MARKET PORTFOLIO IS NEITHER INSURED NOR GUARANTEED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENT AGENCY. ALTHOUGH THE PORTFOLIO SEEKS TO PRESERVE THE VALUE OF YOUR INVESTMENT AT \$1.00 PER SHARE, THERE IS NO ASSURANCE THAT THE PORTFOLIO WILL BE ABLE TO MAINTAIN A STABLE NET ASSET VALUE SO IT IS POSSIBLE TO LOSE MONEY BY INVESTING IN THE PORTFOLIO.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period July 1, 2004 to December 31, 2004*
Actual	\$1,000.00	\$1,008.70	\$0.00
Hypothetical (5% return before expenses)	\$1,000.00	\$1,024.83	\$0.00

* Expenses are equal to the Fund's annualized expense ratio of 0.00%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). For periods after December 31, 2004, the Fund's Investment Adviser is no longer waiving its 0.30% management fee. In the absence of such fee waiver, the ending account value and expenses paid during the period would have been \$1,008.70 and \$1.51, respectively, for the actual expense example and \$1,023.32 and \$1.53, respectively, for the hypothetical expense example.

- (d) Total Return includes deductions for management and other fund expenses; excludes deductions for sales loads and account fees, not annualized for period less than one year. For the Money Market Portfolio, total return includes the effect of a management fee waiver from December 2, 2002 through December 31, 2004, which ended on December 31, 2004. In the absence of such fee waiver, the total return would be less.
- (f) For the Money Market Portfolio, expense ratios reflect total expenses before a management fee waiver in effect for the period December 2, 2002 through December 31, 2004 ("Gross Expense Ratio") and after such waiver ("Net Expense Ratio"). The fee waiver ended on December 31, 2004.

The Accompanying Notes are an Integral Part of the Financial Statements.

Notes to Financial Statements

Northwestern Mutual Series Fund, Inc.

December 31, 2004

Note 1 — Northwestern Mutual Series Fund, Inc. (the “Series Fund”) is registered as a diversified open-end investment company under the Investment Company Act of 1940. The Series Fund consists of the Small Cap Growth Stock Portfolio, T. Rowe Price Small Cap Value Portfolio, Aggressive Growth Stock Portfolio, International Growth Portfolio, Franklin Templeton International Equity Portfolio, AllianceBernstein Mid Cap Value Portfolio, Index 400 Stock Portfolio, Janus Capital Appreciation Portfolio, Growth Stock Portfolio, Large Cap Core Stock Portfolio, Capital Guardian Domestic Equity Portfolio, T. Rowe Price Equity Income Portfolio, Index 500 Stock Portfolio, Asset Allocation Portfolio, Balanced Portfolio, High Yield Bond Portfolio, Select Bond Portfolio and the Money Market Portfolio (the “Portfolios”). Shares are presently offered only to The Northwestern Mutual Life Insurance Company (“Northwestern Mutual”) and its segregated asset accounts.

Note 2 — The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principal accounting policies are summarized below.

Note 3 — Stocks listed on a national or foreign stock exchange are generally valued at the last sale price on the exchange on which the security is principally traded. Stocks listed on the NASDAQ Stock Market, Inc. (“NASDAQ”) for which a NASDAQ Official Closing Price (“NOCP”) is available are valued at the NOCP. If there has been no sale on such exchange or on NASDAQ, the security is valued at the prior day’s price. Stocks traded only in the over-the-counter market and not on a securities exchange or NASDAQ are valued at the latest bid price. Bonds are valued on the basis of prices furnished by a service which determines prices for normal institutional-size trading units of bonds. Securities for which current market quotations are not readily available are valued at fair value determined by procedures approved by the Board of Directors. The fair value procedure is used if a significant event that is likely to have affected the value of the securities takes place after the time of the most recent market quotations or the market quotations for other reasons do not reflect information material to the value of those securities. Generally, money market investments, other than in the Money Market Portfolio, with maturities exceeding sixty days are valued by marking to market on the basis of an average of the most recent bid prices or yields. Generally, money market investments with maturities of sixty days or less and all securities in the Money Market Portfolio are valued on an

amortized cost basis or, if the current market value differs substantially from the amortized cost, by marking to market.

Note 4 — Certain of the Portfolios may have securities and other assets and liabilities denominated in foreign currencies which are translated into U.S. dollar amounts on the date of valuation. Purchases and sales of securities and income items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. When the Portfolios purchase or sell a foreign security they may enter into a foreign currency exchange contract to minimize market risk from the trade date to the settlement date of such transaction. Such foreign currency exchange contracts are marked to market daily.

The Portfolios may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Contracts are valued at the contractual forward rate and are marked to market daily, with the change in market value recorded as an unrealized gain or loss. When the contracts are closed, a realized gain or loss is recorded. Risks may arise from changes in market value of the underlying instruments and from the possible inability of counterparties to meet the terms of their contracts.

The Portfolios do not separately report the results of operations due to changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized or unrealized gain or loss from investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade date and the settlement date on security transactions, and the differences between the amounts of dividends and foreign withholding taxes recorded on the Portfolio’s books and the U.S. dollar equivalent of the amounts actually received or paid.

Note 5 — The Small Cap Growth Stock, Aggressive Growth Stock, Index 400 Stock, Growth Stock, Index 500 Stock, Asset Allocation, Balanced and Select Bond Portfolios invest in futures contracts as an alternative to investing in individual securities and could be exposed to market risk due to changes in the value of the underlying securities or due to an illiquid secondary market. Futures contracts are marked to market daily based upon quoted settlement prices. The Portfolios receive from or pay to brokers an amount of cash equal to the daily fluctuation in the value of the contracts. Such receipts or payments, known as the “variation margin”, are recorded by the Portfolios as unrealized gains or losses. When a contract is closed, the Portfolios record a realized gain or loss

Notes to Financial Statements

equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

For federal income tax purposes, net unrealized appreciation (depreciation) on open futures contracts is generally required to be treated as realized gains (losses).

Note 6 — The Series Fund has a securities lending program that enables each Portfolio, except the Money Market Portfolio, to loan securities to approved broker-dealers. The Portfolio receives cash (U.S. currency), U.S. Government or U.S. Government agency obligations as collateral against the loaned securities. To the extent that a loan is collateralized by cash, such collateral shall be invested by the Portfolio to earn interest in accordance with the Portfolio's investment policies. For the year ended December 31, 2004, the Balanced and Select Bond Portfolios earned \$668,836 and \$237,170, respectively, in interest from securities lending activity. The collateral received under the securities lending program is recorded on the Portfolio's statement of assets and liabilities along with the related obligation to return the collateral.

Income generated from the investment of cash collateral, less negotiated rebate fees paid to participating brokers and transaction costs, is recorded as income for the Portfolio. All collateral received will be in an amount at least equal to 102% (for loans of U.S. securities) or 105% (for non-U.S. securities) of the market value of the loaned securities at the inception of each loan. Thereafter, each loan must be continuously secured by collateral at least equal at all times to the value of the securities lent. In addition, the Portfolio is

Note 8 — Interest income is recorded daily on the accrual basis and dividend income is recorded on the ex-dividend date or as soon as information from foreign issuers is available. Where applicable, dividends are recorded net of foreign dividend tax. Discounts and premiums on securities purchased are amortized over the life of the respective

entitled to terminate a securities loan at any time. As of December 31, 2004, the value of outstanding securities on loan and the value of collateral amounted to the following:

Portfolio	Value of Securities on Loan	Value of Collateral
Balanced	\$165,690,223	\$169,514,375
Select Bond	60,110,744	61,538,750

As of December 31, 2004, collateral received for securities on loan is invested in money market instruments and included in Investments on the Portfolio's Statement of Assets and Liabilities.

Note 7 — The Asset Allocation, Balanced and Select Bond Portfolios have entered into mortgage dollar rolls. Dollar roll transactions consist of the sale by a portfolio to a bank or broker/dealer (the "counterparty") of mortgage-backed securities together with a commitment to purchase from the counterparty similar, but not identical, securities at a future date, at a similar price. As of December 31, 2004, the following mortgage dollar rolls were outstanding:

Portfolio	Cost	Value	Obligation Liability
Asset Allocation	\$ 832,344	\$ 829,520	\$ 834,235
Balanced	28,369,720	28,271,061	28,434,401
Select Bond	19,601,555	19,530,944	19,646,540

The obligation liability is included in Due on Purchase of Securities and Securities Lending Collateral on the Portfolio's Statement of Assets and Liabilities. Securities subject to these agreements had a contractual maturity of 1/1/35. The weighted average interest rate was 5.04% for the Asset Allocation Portfolio, 5.01% for the Balanced Portfolio, and 4.97% for the Select Bond Portfolio.

securities using the effective interest method. Securities transactions are accounted for on trade date. The basis for determining cost on sale of securities is identified cost. For the year ended December 31, 2004, transactions in securities other than money market investments were:

Portfolio	Total Security Purchases	U.S. Govt. Security Purchases	Total Security Sales/Maturities	U.S. Govt. Security Sales/Maturities
			<i>(Amounts in thousands)</i>	
Small Cap Growth Stock	\$ 327,093	\$ —	\$ 327,606	\$ —
T. Rowe Price Small Cap Value	70,599	—	28,459	—
Aggressive Growth Stock	823,943	—	883,547	—
International Growth	79,845	—	56,396	—
Franklin Templeton International Equity	186,334	—	151,580	—
AllianceBernstein Mid Cap Value	34,268	—	17,203	—
Index 400 Stock	65,804	—	57,144	—
Janus Capital Appreciation	14,908	—	9,657	—
Growth Stock	217,166	—	243,022	—
Large Cap Core Stock	146,925	—	155,679	—
Capital Guardian Domestic Equity	94,874	—	51,359	—
T. Rowe Price Equity Income	40,085	—	9,582	—
Index 500 Stock	60,801	—	66,318	—

Select Bond	806,314	545,150	686,775	599,409

Notes to Financial Statements

Note 9 — The Series Fund and its Portfolios are parties to annually renewable contracts pursuant to which each Portfolio pays a charge for investment management and administrative services. Certain Portfolios, listed below, pay at a fixed annual rate based on the average daily net asset values of the Portfolio.

Portfolio	Fee
T. Rowe Price Small Cap Value	.85%
AllianceBernstein Mid Cap Value	.85%
Index 400 Stock	.25%
Index 500 Stock	.20%
Balanced	.30%
Select Bond	.30%
Money Market	.30%

For the other Portfolios the rate for the investment advisory fee is graded by the asset size of the Portfolio according to the following schedules:

Portfolio	First \$50 Million	Next \$50 Million	Excess
Small Cap Growth Stock	.80%	.65%	.50%
Aggressive Growth Stock	.80%	.65%	.50%
Franklin Templeton International Equity Growth Stock	.85%	.65%	.65%
Large Cap Core Stock	.60%	.50%	.40%
High Yield Bond	.60%	.50%	.40%

Portfolio	First \$100 Million	Next \$150 Million	Excess
International Growth	.75%	.65%	.55%
Capital Guardian Domestic Equity	.65%	.55%	.50%
Asset Allocation	.60%	.50%	.40%

Portfolio	First \$500 Million	Excess
T. Rowe Price Equity Income	.65%	.60%

Portfolio	First \$100 Million	Next \$400 Million	Excess
Janus Capital Appreciation	.80%	.75%	.70%

Mason Street Advisors, LLC ("MSA"), a wholly owned subsidiary of Northwestern Mutual and the manager and investment adviser of the Series Fund, contractually agreed to waive the management fee and absorb certain other operating expenses to the extent necessary so that Total Operating Expenses will not exceed the following amounts:

Portfolio	Rate	Expiration
T. Rowe Price Small Cap Value	1.00%	December 31, 2006
International Growth	1.10%	December 31, 2006
AllianceBernstein Mid Cap Value	1.00%	December 31, 2008
Janus Capital Appreciation	0.90%	December 31, 2008
Capital Guardian Domestic Equity	0.75%	December 31, 2006
T. Rowe Price Equity Income	0.75%	December 31, 2008
Asset Allocation	0.75%	December 31, 2006

MSA voluntarily waived its management fee from December 2, 2002 to December 31, 2004 for the Money Market Portfolio.

The investment advisory fee is paid to MSA. Other costs for each Portfolio are paid either by the Portfolios or MSA depending upon the applicable agreement in place.

All of the Portfolios, except for the Balanced, Select Bond and Money Market Portfolios, pay their own custodian fees. Certain Portfolios, listed below, pay a portion of their custodian fees indirectly through expense offset arrangements. Custodian fees are reduced for Portfolios that maintain compensating balances in non-interest bearing accounts. These Portfolios could have invested the assets used to pay for the custodian fees, had the assets not been used in the expense offset arrangements. For the year ended December 31, 2004, the amounts paid through expense offset arrangements were as follows:

Portfolio	Amount
Small Cap Growth Stock	\$1,098
T. Rowe Price Small Cap Value	646
Aggressive Growth Stock	4,204
AllianceBernstein Mid Cap Value	610
Index 400 Stock	904
Janus Capital Appreciation	343
Growth Stock	610
Large Cap Core Stock	834
Capital Guardian Domestic Equity	834
T. Rowe Price Equity Income	198
Index 500 Stock	454
Asset Allocation	905
High Yield Bond	2,535

T. Rowe Price Associates, Inc. ("T. Rowe Price"), Templeton Investment Counsel, LLC. ("Templeton Counsel"), Alliance Capital Management L.P., ("Alliance Capital Management"), Janus Capital Management, LLC ("Janus Capital") and Capital Guardian Trust Company ("Capital Guardian") have been retained under investment subadvisory agreements to provide investment advice and, in general, to conduct the management investment programs of the T. Rowe Price Small Cap Value and T. Rowe Price Equity Income Portfolios, the Franklin Templeton International Equity Portfolio, the AllianceBernstein Mid Cap Value Portfolio, the Janus Capital Appreciation Portfolio and the Capital Guardian Domestic Equity Portfolio, respectively. MSA pays T. Rowe Price an annual rate of .60% of the T. Rowe Price Small Cap Value Portfolio's average daily net assets. MSA pays Templeton Counsel .50% on the first \$100 million of combined net assets for all funds managed for Northwestern Mutual by Templeton Counsel and .40% in excess of \$100 million. MSA pays Alliance Capital Management .72% on the first \$25 million of the Portfolio's assets, .54% on the next \$225 million, and .50% in excess of \$250 million, with a minimum amount of \$16,000. MSA pays Janus Capital .55% on the first \$100 million of the Portfolio's assets, .50% on the next \$400 million, and .45% on assets in excess of \$500 million. MSA pays Capital Guardian a flat annual fee of \$375,000 on the Portfolio's assets of \$100 million or less and .275% on net assets in excess of \$100 million. For the

Notes to Financial Statements

T. Rowe Price Equity Income Portfolio, MSA pays T. Rowe Price .40% of the Portfolio's assets, reduced to .35% on assets in excess of \$500 million.

Commissions paid on Portfolio transactions to an affiliated broker for the year ended December 31, 2004, were as follows:

Portfolio	Amount
Small Cap Growth Stock	\$19,510
T. Rowe Small Cap Value	165
Aggressive Growth Stock	61,610
AllianceBernstein Mid Cap Value	30,068
T. Rowe Price Equity Income	440

Note 10 — Each of the Portfolios of the Series Fund has elected to be taxed as a regulated investment company meeting certain requirements under the Internal Revenue Code. Since each expects to distribute all net investment income and net realized capital gains, the Portfolios anticipate incurring no federal income taxes.

Taxable distributions from net investment income and realized capital gains in the Portfolios may differ from book amounts earned during the period due to differences in the timing of capital gains recognition and due to the reclassification of certain gains or losses between capital and income. The differences between cost amounts for book purposes and tax purposes are primarily due to treatment of deferred losses.

It is the policy of the Portfolios to reclassify the net effect of permanent differences between book and taxable income to capital accounts on the Statements of Assets and Liabilities.

Certain losses incurred by the Portfolios after October 31st are deferred and deemed to have occurred in the next fiscal year for income tax purposes. Net realized capital losses for federal income tax purposes are carried forward to offset future net realized gains. A summary of the Portfolios' post-October losses and capital loss carryovers as of December 31, 2004 is provided below:

Portfolio	Post-October Losses		Capital Loss Carryovers		
	Capital	Foreign Currency	Amount	Expiration	Utilized in 2004
	<i>(Amounts in Thousands)</i>				
Small Cap Growth Stock	\$ —	\$ —	\$ —	—	\$25,605
T. Rowe Price Small Cap Value	—	—	—	—	—
Aggressive Growth Stock	—	—	108,215	2010-2011	95,296
International Growth	—	—	597	2011	4,716
Franklin Templeton International Equity	—	24	66,733	2010-2011	53,475
AllianceBernstein Mid Cap Value	—	—	—	—	—
Index 400 Stock	—	—	—	—	—
Janus Capital Appreciation	40	—	507	2012	—
Growth Stock	—	—	65,078	2009-2010	30,055

Capital Guardian Domestic Equity	—	—	—	—	3,619
T. Rowe Price Equity Income	—	—	—	—	—
Index 500 Stock	—	—	—	—	—
Asset Allocation	—	—	—	—	556
Balanced	—	—	—	—	—
High Yield Bond	—	—	65,399	2007-2010	11,029
Select Bond	1,092	—	—	—	—

Note 11 — Dividends from net investment income and net realized capital gains are declared each business day for the Money Market Portfolio and at least annually for the remaining portfolios of the Series Fund when applicable.

Note 12 — Northwestern Mutual voluntarily reimburses the Franklin Templeton International Equity and International Growth Portfolios for the benefit Northwestern Mutual receives from foreign dividend taxes charged against the Portfolios. The amounts reimbursed represent approximately 65% of the foreign dividend taxes withheld from the

Portfolios. Reimbursements are recorded when foreign dividend taxes are accrued. Voluntary reimbursements for the year ended December 31, 2004 and the year ended December 31, 2003 are summarized below:

Portfolio	2004 Reimbursements	2003 Reimbursements
International Growth	\$ 101,251	\$ 68,922
Franklin Templeton International Equity	1,778,426	1,469,313

Notes to Financial Statements

Note 13 — Distributions to Shareholders

When applicable, each of the Portfolios made distributions during the year of ordinary income and long-term capital gains. The tax character of distributions paid for the periods ended December 31, 2004 and December 31, 2003 were as follows:

Portfolio	2004 Distributions Paid From:		2003 Distributions Paid From:	
	Ordinary Income	Long-term Capital Gain	Ordinary Income	Long-term Capital Gain
	<i>(Amounts in Thousands)</i>			
Small Cap Growth Stock	\$ —	\$ —	\$ —	\$ —
T. Rowe Price Small Cap Value	902	1,354	—	—
Aggressive Growth Stock	—	—	—	—
International Growth	625	—	420	—
Franklin Templeton International Equity	14,573	—	11,039	—
AllianceBernstein Mid Cap Value	2,223	2,546	541	—
Index 400 Stock	2,523	2,269	1,934	—
Janus Capital Appreciation	51	—	91	—
Growth Stock	4,542	—	4,774	—
Large Cap Core Stock	4,200	—	3,770	—
Capital Guardian Domestic Equity	2,660	2,783	1,804	—
T. Rowe Price Equity Income	2,041	1,278	651	—

To the Shareholders and Board of Directors of
Northwestern Mutual Series Fund, Inc.

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the Small Cap Growth Stock Portfolio, T. Rowe Price Small Cap Value Portfolio, Aggressive Growth Stock Portfolio, International Growth Portfolio, Franklin Templeton International Equity Portfolio, AllianceBernstein Mid Cap Value Portfolio, Index 400 Stock Portfolio, Janus Capital Appreciation Portfolio, Growth Stock Portfolio, Large Cap Core Stock Portfolio, Capital Guardian Domestic Equity Portfolio, T. Rowe Price Equity Income Portfolio, Index 500 Stock Portfolio, Asset Allocation Portfolio, Balanced Portfolio, High Yield Bond Portfolio, Select Bond Portfolio and Money Market Portfolio (constituting Northwestern Mutual Series Fund, Inc., hereafter referred to as the "Fund") at December 31, 2004, the results of each of their operations, the changes in each of their net assets and their financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with standards set forth by the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2004 by correspondence with the custodians and brokers, provide a reasonable basis for our opinion.

Proxy Voting and Portfolio Holdings

Proxy Voting Guidelines

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling toll free 1-888-455-2232. It is also available on the Securities and Exchange Commission's website at <http://www.sec.gov>.

Information regarding how the fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available without charge, upon request, by calling toll free 1-888-455-2232. It is also available on the Securities and Exchange Commission's website at <http://www.sec.gov>.

Quarterly Filing of Portfolio Holdings

The Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q filings are available (i) on the Commission's website at <http://www.sec.gov> and (ii) at the Commission's Public Reference Room.

Director and Officer Information (Unaudited)

Northwestern Mutual Series Fund, Inc.

The name, age and address of the directors, as well as their affiliations, positions held with the Fund, principal occupations during the past five years and the number of portfolios overseen in the Northwestern Mutual fund complex, are shown below as of February 1, 2005. Effective May 1, 2003, each director shall serve for a twelve-year term commencing May 1, 2003 or until their earlier death, resignation, retirement or removal from office and election and qualification of their successors. The statement of additional information contains additional information about Fund directors and is available without charge, upon request, by calling 1-888-627-6678.

Forms N-Q are available on the SEC's web site at <http://www.sec.gov>. A fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information regarding the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330. For a complete list of a fund's portfolio holdings, view the most recent quarterly holdings report, semiannual report, or annual report on Fidelity's web site at <http://www.advisor.fidelity.com>.

NOT FDIC INSURED • MAY LOSE VALUE • NO BANK GUARANTEE

Neither the fund nor Fidelity Distributors Corporation is a bank.

Fidelity Variable Insurance Products: Mid Cap Portfolio Performance: The Bottom Line

Average annual total return reflects the change in the value of an investment, assuming reinvestment of the class' dividend income and capital gains (the profits earned upon the sale of securities that have grown in value) and assuming a constant rate of performance each year. During periods of reimbursement by Fidelity, a fund's total return will be greater than it would be had the reimbursement not occurred. Performance numbers are net of all underlying fund operating expenses, but do not include any insurance charges imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total returns would have been lower. How a fund did yesterday is no guarantee of how it will do tomorrow.

Average Annual Total Returns

Periods ended December 31, 2004

	Past 1 year	Past 5 years	Life of fund ^A
Fidelity [®] VIP: Mid Cap Portfolio — Initial Class	24.92%	15.11%	20.74%
Fidelity VIP: Mid Cap Portfolio — Service Class ^B	24.77%	14.98%	20.61%
Fidelity VIP: Mid Cap Portfolio — Service Class 2 ^C	24.60%	14.81%	20.46%

^A From December 28, 1998.

^B Performance for Service Class shares reflects an asset based distribution fee (12b-1).

^C The initial offering of Service Class 2 shares took place January 12, 2000. Performance for Service Class 2 shares reflects an asset based distribution fee (12b-1 fee). Returns from December 28, 1998 to January 12, 2000 are those of Service Class which reflect a different 12b-1 fee. Had Service Class 2's 12b-1 fee been reflected, returns prior to January 12, 2000 would have been lower.

\$10,000 Over Life of Fund

Let's say hypothetically that \$10,000 was invested in Fidelity[®] Variable Insurance Products: Mid Cap Portfolio — Initial Class on December 28, 1998, when the fund started. The chart shows how the value of your investment would have changed, and also shows how the S&P[®] MidCap 400 Index performed the same period.

Fidelity Variable Insurance Products: Mid Cap Portfolio

Management's Discussion of Fund Performance

Comments from Thomas Allen, Portfolio Manager of Fidelity® Variable Insurance Products: Mid Cap Portfolio

The year ending December 31, 2004, generally was positive for equity investors, as many stock market benchmarks produced double-digit gains. Broad-based themes included the continued dominance of small-cap stocks, which outperformed large-caps for the sixth consecutive year. The small-cap Russell 2000® Index was up 18.33% in 2004, while the larger-cap Standard & Poor's 500SM Index rose 10.88%. Value stocks ended the year well ahead of growth stocks: The Russell 3000® Value Index advanced 16.94%, compared to 6.93% for the Russell 3000 Growth Index. Energy and basic materials stocks led the market upward. Energy stocks were boosted by record-high oil prices, while strong demand from China helped support commodity prices. The health care sector was among the market's weakest performers. Technology also fell off the pace, though it was helped by a rally late in the year. The tech-heavy NASDAQ Composite® Index returned 9.15%, thanks primarily to a 14.87% jump in the fourth quarter. Elsewhere, the Dow Jones Industrial AverageSM gained 5.37% for the year.

For the 12-month period that ended December 31, 2004, the fund solidly outperformed both the Standard & Poor's® MidCap 400 Index, which gained 16.48%, and the LipperSM Variable Annuity Mid-Cap Funds Average, which rose 15.30%. Rising oil prices helped boost many energy stocks during the period, and the fund was fortunate to own some of those that rose more than others, including Southwestern Energy and PetroKazakhstan, based in the former Soviet Union. Favorable stock selection in health care equipment and services companies, such as pharmacy benefits manager Caremark Rx, also helped the fund beat its index, as did an underweighting in the weak semiconductor group. The fund's overweighting in materials turned out to be a double-edged sword: Steel stocks worked very well, driven by tight supply, increasing demand from emerging markets and a moderately weaker U.S. dollar, while our gold-related holdings performed poorly, including such names as Newmont Mining, Buenaventura Mining and Harmony Gold.

The views expressed in this statement reflect those of the portfolio manager only through the end of the period of the report as stated on the cover and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.

Fidelity Variable Insurance Products: Mid Cap Portfolio

Shareholder Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2004 to December 31, 2004).

Actual Expenses

The first line of the table below for each class of the Fund provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000.00 (for example, an \$8,600 account value divided by \$1,000.00 = 8.6), then multiply the result by the number in the first line for a class of the Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower.

Hypothetical Example for Comparison Purposes

The second line of the table below for each class of the Fund provides information about hypothetical account values and hypothetical expenses based on a Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

	Beginning Account Value July 1, 2004	Ending Account Value December 31, 2004	Expenses Paid During Period* July 1, 2004 to December 31, 2004
Initial Class			
Actual	\$ 1,000.00	\$ 1,176.60	\$ 3.94
Hypothetical ^A	\$ 1,000.00	\$ 1,021.52	\$ 3.66
Service Class			
Actual	\$ 1,000.00	\$ 1,175.50	\$ 4.48
Hypothetical ^A	\$ 1,000.00	\$ 1,021.01	\$ 4.17
Service Class 2			
Actual	\$ 1,000.00	\$ 1,175.00	\$ 5.30
Hypothetical ^A	\$ 1,000.00	\$ 1,020.26	\$ 4.93

^A 5% return per year before expenses

* Expenses are equal to each Class' annualized expense ratio (shown in the table below); multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

	Annualized Expense Ratio
Initial Class72%
Service Class82%
Service Class 297%

Portfolio turnover rate	55%	51%	135%	144%	245%

^A Total returns do not reflect charges attributable to your insurance company's separate account. Inclusion of these charges would reduce the total returns shown.

^B Total returns would have been lower had certain expenses not been reduced during the periods shown.

^C Calculated based on average shares outstanding during the period.

^D Expense ratios reflect operating expenses of the class. Expenses before reductions do not reflect amounts reimbursed by the investment adviser or reductions from brokerage service arrangements or other expense offset arrangements and do not represent the amount paid by the class during periods when reimbursements or reductions occur. Expenses net of any voluntary waivers reflect expenses after reimbursement by the investment adviser but prior to reductions from brokerage service arrangements or other expense offset arrangements. Expenses net of all reductions represent the net expenses paid by the class.

^E Amount represents less than \$.01 per share.

^F As the result of a correction made in the classification of distributions received on securities representing realized gains for the year ended December 31, 2003, amounts previously reported have been reclassified. The impact of this correction was a decrease in net investment loss of \$0.01 per share and a corresponding decrease in net realized and unrealized gain (loss). The ratio of net investment loss to average net assets decreased from (0.04)% to 0.00%. The reclassification had no impact on total net assets or total return of the class.

Expenses before reductions do not reflect amounts reimbursed by the investment adviser or reductions from brokerage service arrangements or other expense offset arrangements and do not represent the amount paid by the class during periods when reimbursements or reductions occur. Expense ratios before reductions for start-up periods may not be representative of longer-term operating periods. Expenses net of any voluntary waivers reflect expenses after reimbursement by the investment adviser but prior to reductions from brokerage service arrangements or other expense offset arrangements. Expenses net of all reductions represent the net expenses paid by the class.
^F As the result of a correction made in the classification of distributions received on securities representing realized gains for the year ended December 31, 2003, amounts previously reported have been reclassified. The impact of this correction was a decrease in net investment loss of \$0.01 per share and a corresponding decrease in net realized and unrealized gain (loss). The ratio of net investment loss to average net assets decreased from (0.29)% to (0.25)%. The reclassification had no impact on total net assets or total return of the class.

See accompanying notes which are an integral part of the financial statements.

Notes to Financial Statements

For the period ended December 31, 2004

1. Significant Accounting Policies.

Mid Cap Portfolio (the fund) is a fund of Variable Insurance Products Fund III (the trust) (referred to in this report as Fidelity Variable Insurance Products: Mid Cap Portfolio) and is authorized to issue an unlimited number of shares. The trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust. Shares of the fund may only be purchased by insurance companies for the purpose of funding variable annuity or variable life insurance contracts. The fund offers the following classes of shares: Initial Class shares, Service Class shares and Service Class 2 shares. All classes have equal rights and voting privileges, except for matters affecting a single class. Investment income, realized and unrealized capital gains and losses, the common expenses of the fund, and certain fund-level expense reductions, if any, are allocated on a pro rata basis to each class based on the relative net assets of each class to the total net assets of the fund. Each class differs with respect to distribution and service plan fees incurred. Certain expense reductions also differ by class.

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which require management to make certain estimates and assumptions at the date of the financial statements. The following summarizes the significant accounting policies of the fund:

Security Valuation. Net asset value per share (NAV calculation) is calculated as of the close of business of the New York Stock Exchange, normally 4:00 p.m. Eastern time. Equity securities, including restricted securities, for which market quotations are available are valued at the last sale price or official closing price (closing bid price or last evaluated quote if no sale has occurred) on the primary market or exchange on which they trade. If prices are not readily available or do not accurately reflect fair value for a security, or if a security's value has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded, that security may be valued by another method that the Board of Trustees believes accurately reflects fair value. A security's valuation may differ depending on the method used for determining value. Price movements in futures contracts and ADRs, market and trading trends, the bid/ask quotes of brokers and off-exchange institutional trading may be reviewed in the course of making a good faith determination of a security's fair value. Short-term securities with remaining maturities of sixty days or less for which quotations are not readily available are valued on the basis of amortized cost. Investments in open-end investment companies are valued at their net asset value each business day.

Foreign Currency. The fund uses foreign currency contracts to facilitate transactions in foreign-denominated securities. Losses from these transactions may arise from changes in the value of the foreign currency or if the counterparties do not perform under the contracts' terms.

Foreign-denominated assets, including investment securities, and liabilities are translated into U.S. dollars at the exchange rate at period end. Purchases and sales of investment securities, income and dividends received and expenses denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The effects of exchange rate fluctuations on investments are included with the net realized and unrealized gain (loss) on investment securities. Other foreign currency transactions resulting in realized and unrealized gain (loss) are disclosed separately.

Investment Transactions and Income. Security transactions are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds received from litigation. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the fund is informed of the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/or as a realized gain. The fund estimates the components of distributions received that may be considered return of capital distributions or capital gain distributions. Interest income is accrued as earned. Interest income includes coupon interest and amortization of premium and accretion of discount on debt securities. Investment income is recorded net of foreign taxes withheld where recovery of such taxes is uncertain.

Reclassification of Financial Information. As the result of a correction made in the classification of distributions received on securities representing realized gains for the year ended December 31, 2003, amounts previously reported have been reclassified. Net investment loss for the fund decreased by \$669,090, with a corresponding decrease to net realized gain. The reclassification has no impact on total net assets or total return of the fund.

Expenses. Most expenses of the trust can be directly attributed to a fund. Expenses which cannot be directly attributed are apportioned among the funds in the trust.

Income Tax Information and Distributions to Shareholders. Each year, the fund intends to qualify as a regulated investment company by distributing all of its taxable income and realized gains under Subchapter M of the Internal Revenue Code. As a result, no provision for income taxes is required in the accompanying financial statements. Foreign taxes are provided for based on the fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Distributions are recorded on the ex-dividend date.

1. Significant Accounting Policies – continued

Income Tax Information and Distributions to Shareholders – continued

Income dividends and capital gain distributions are declared separately for each class. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Temporary book-tax differences will reverse in a subsequent period.

Book-tax differences are primarily due to foreign currency transactions, passive foreign investment companies (PFIC), partnerships, net operating losses, capital loss carryforwards and losses deferred due to wash sales.

The tax-basis components of distributable earnings and the federal tax cost as of period end were as follows:

Unrealized appreciation	\$	1,164,223,599
Unrealized depreciation		(20,489,077)
Net unrealized appreciation (depreciation)		1,143,734,522
Undistributed long-term capital gain		68,763,219
Cost for federal income tax purposes	\$	2,884,816,139

The tax character of distributions paid was as follows:

	December 31, 2004	December 31, 2003
Ordinary Income	\$ —	\$ 5,082,393

2. Operating Policies.

Repurchase Agreements. Fidelity Management & Research Company (FMR) has received an Exemptive Order from the Securities and Exchange Commission (the SEC) which permits the fund and other affiliated entities of FMR to transfer uninvested cash balances into joint trading accounts. These accounts are then invested in repurchase agreements that are collateralized by U.S. Treasury or Government obligations. The fund may also invest directly with institutions, in repurchase agreements that are collateralized by commercial paper obligations and corporate obligations. Collateral is held in segregated accounts with custodian banks and may be obtained in the event of a default of the counterparty. Collateral is marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest).

3. Purchases and Sales of Investments.

Purchases and sales of securities, other than short-term securities and U.S. government securities, aggregated \$2,400,817,321 and \$1,622,172,637, respectively.

4. Fees and Other Transactions with Affiliates.

Management Fee. FMR and its affiliates provide the fund with investment management related services for which the fund pays a monthly management fee. The management fee is the sum of an individual fund fee rate that is based on an annual rate of .30% of the fund's average net assets and a group fee rate that averaged .28% during the period. The group fee rate is based upon the average net assets of all the mutual funds advised by FMR. The group fee rate decreases as assets under management increase and increases as assets under management decrease. For the period, the total annual management fee rate was .57% of the fund's average net assets.

Distribution and Service Plan. In accordance with Rule 12b-1 of the 1940 Act, the fund has adopted separate 12b-1 Plans for each Service Class of shares. Each Service Class pays Fidelity Distributors Corporation (FDC), an affiliate of FMR, a service fee. For the period, the service fee is based on an annual rate of .10% of Service Class' average net assets and .25% of Service Class 2's average net assets.

For the period, each class paid FDC the following amounts, all of which were re-allowed to insurance companies for the distribution of shares and providing shareholder support services:

Service Class	\$	665,057
Service Class 2		3,940,232
	\$	<u>4,605,289</u>

4. Fees and Other Transactions with Affiliates – continued

Transfer Agent Fees. Fidelity Investments Institutional Operations Company, Inc. (FIIOC), an affiliate of FMR, is the fund's transfer, dividend disbursing, and shareholder servicing agent. FIIOC receives an asset-based fee with respect to each account. FIIOC pays a portion of the expenses related to the typesetting, printing and mailing of shareholder reports, except proxy statements. Each class pays a transfer agent fee, excluding out of pocket expenses, equal to an annual rate of .07% of their month end net assets. For the period, the total transfer agent fees paid by each class to FIIOC, including out of pocket expenses, were as follows:

Initial Class	\$	517,432
Service Class		449,572
Service Class 2		1,077,978
	\$	<u>2,044,982</u>

Accounting and Security Lending Fees. Fidelity Service Company, Inc. (FSC), an affiliate of FMR, maintains the fund's accounting records. The accounting fee is based on the level of average net assets for the month. Under a separate contract, FSC administers the security lending program. The security lending fee is based on the number and duration of lending transactions.

Central Funds. The fund may invest in affiliated Central Funds managed by Fidelity Investments Money Management, Inc. (FIMM), an affiliate of FMR. The Central Funds are open-end investment companies available only to investment companies and other accounts managed by FMR and its affiliates. The Central Funds seek preservation of capital and current income and do not pay a management fee. Income distributions earned by the fund are recorded as income in the accompanying financial statements and totaled \$803,656 for the period.

Brokerage Commissions. The fund placed a portion of its portfolio transactions with brokerage firms which are affiliates of the investment adviser. The commissions paid to these affiliated firms were \$171,170 for the period.

Interfund Lending Program. Pursuant to an Exemptive Order issued by the SEC, the fund, along with other registered investment companies having management contracts with FMR, may participate in an interfund lending program. This program provides an alternative credit facility allowing the funds to borrow from, or lend money to, other participating funds. The fund's activity in this program during the period was as follows:

Borrower or Lender	Average Daily Loan Balance	Weighted Average Interest Rate	Interest Earned (included in interest income)	Interest Expense
Borrower	\$ 11,369,500	1.12%	—	\$ 709

5. Committed Line of Credit.

The fund participates with other funds managed by FMR in a \$4.2 billion credit facility (the "line of credit") to be utilized for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity purposes. The fund has agreed to pay commitment fees on its pro rata portion of the line of credit. During the period, there were no borrowings on this line of credit.

6. Security Lending.

The fund lends portfolio securities from time to time in order to earn additional income. The fund receives collateral (in the form of U.S. Treasury obligations, letters of credit and/or cash) against the loaned securities and maintains collateral in an amount not less than 100% of the market value of the loaned securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the fund and any additional required collateral is delivered to the fund on the next business day. If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, a fund could experience delays and costs in recovering the securities loaned or in gaining access to the collateral. Cash collateral is invested in cash equivalents. The value of loaned securities and cash collateral at period end are disclosed on the fund's Statement of Assets and Liabilities.

7. Expense Reductions.

Many of the brokers with whom FMR places trades on behalf of the fund provided services to the fund in addition to trade execution. These services included payments of certain expenses on behalf of the fund totaling \$739,274 for the period. In addition, through arrangements with the fund's custodian, credits realized as a result of uninvested cash balances were used to reduce the fund's expenses. During the period, these credits reduced the fund's custody expenses by \$3,283.

8. Other Information

At the end of the period, FMR or its affiliates were the owners of record of 19% of the total outstanding shares of the fund and two otherwise unaffiliated shareholders were the owners of record of 42% of the total outstanding shares of the fund.

Report of Independent Registered Public Accounting Firm

To the Trustees of Variable Insurance Products Fund III and the Shareholders of Mid Cap Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Mid Cap Portfolio (a fund of Variable Insurance Products Fund III) at December 31, 2004 and the results of its operations, the changes in its net assets and the financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Mid Cap Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2004 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

Trustees and Officers

The Trustees, Member of the Advisory Board, and executive officers of the trust and fund, as applicable, are listed below. The Board of Trustees governs the fund and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who meet periodically throughout the year to oversee the fund's activities, review contractual arrangements with companies that provide services to the fund, and review the fund's performance. Except for William O. McCoy, Dennis J. Dirks, and Kenneth L. Wolfe, each of the Trustees oversees 301 funds advised by FMR or an affiliate. Mr. McCoy oversees 303 funds advised by FMR or an affiliate. Mr. Dirks and Mr. Wolfe oversee 233 funds advised by FMR or an affiliate.

The Trustees hold office without limit in time except that (a) any Trustee may resign; (b) any Trustee may be removed by written instrument, signed by at least two-thirds of the number of Trustees prior to such removal; (c) any Trustee who requests to be retired or who has become incapacitated by illness or injury may be retired by written instrument signed by a majority of the other Trustees; and (d) any Trustee may be removed at any special meeting of shareholders by a two-thirds vote of the outstanding voting securities of the trust. In any event, each non-interested Trustee shall retire not later than the last day of the calendar year in which his or her 72nd birthday occurs. The executive officers and Advisory Board Member hold office without limit in time, except that any officer and Advisory Board Member may resign or may be removed by a vote of a majority of the Trustees at any regular meeting or any special meeting of the Trustees. Except as indicated, each individual has held the office shown or other offices in the same company for the past five years.

The fund's Statement of Additional Information (SAI) includes more information about the Trustees. To request a free copy, call Fidelity at 1-800-544-5429.

Interested Trustees*:

Correspondence intended for each Trustee who is an "interested person" (as defined in the 1940 Act) may be sent to Fidelity Investments, 82 Devonshire Street, Boston, Massachusetts 02109.

Name, Age; Principal Occupation

Edward C. Johnson 3d (74)**

Year of Election or Appointment: 1994

Mr. Johnson is Chairman of the Board of Trustees. Mr. Johnson serves as Chief Executive Officer, Chairman, and a Director of FMR Corp.; a Director and Chairman of the Board and of the Executive Committee of FMR; Chairman and a Director of Fidelity Management & Research (Far East) Inc.; Chairman (1998) and a Director of Fidelity Investments Money Management, Inc.; and Chairman (2001) and a Director (2000) of FMR Co., Inc.

Abigail P. Johnson (43)**

Year of Election or Appointment: 2001

Senior Vice President of VIP Mid Cap (2001). Ms. Johnson also serves as Senior Vice President of other Fidelity funds (2001). She is President and a Director of FMR (2001), Fidelity Investments Money Management, Inc. (2001), FMR Co., Inc. (2001), and a Director of FMR Corp. Previously, Ms. Johnson managed a number of Fidelity funds.

Laura B. Cronin (50)

Year of Election or Appointment: 2003

Ms. Cronin is an Executive Vice President (2002) and Chief Financial Officer (2002) of FMR Corp. and is a member of the Fidelity Management Committee (2003). Previously, Ms. Cronin served as Vice President of Finance of FMR (1997-1999), and Chief Financial Officer of FMR (1999-2001), Fidelity Personal Investments (2001), and Fidelity Brokerage Company (2001-2002).

Robert L. Reynolds (52)

Year of Election or Appointment: 2003

Mr. Reynolds is a Director (2003) and Chief Operating Officer (2002) of FMR Corp. and is the head of the Fidelity Management Committee (2003). He also serves on the Board at Fidelity Investments Canada, Ltd. (2000). Previously, Mr. Reynolds served as President of Fidelity Investments Institutional Retirement Group (1996-2000).

* Trustees have been determined to be "Interested Trustees" by virtue of, among other things, their affiliation with the trust or various entities under common control with FMR.

** Edward C. Johnson 3d, Trustee, is Abigail P. Johnson's father.

Non-Interested Trustees:

Correspondence intended for each non-interested Trustee (that is, the Trustees other than the Interested Trustees) may be sent to Fidelity Investments, P.O. Box 55235, Boston, Massachusetts 02205-5235.

Name, Age; Principal Occupation

Dennis J. Dirks (56)

Year of Election or Appointment: 2005

Mr. Dirks also serves as a Trustee (2005) or Member of the Advisory Board (2004) of other investment companies advised by FMR. Prior to his retirement in May 2003, Mr. Dirks was Chief Operating Officer and a member of the Board of The Depository Trust & Clearing Corporation (DTCC) (1999-2003). He also served as President, Chief Operating Officer, and Board member of The Depository Trust Company (DTC) (1999-2003) and President and Board member of the National Securities Clearing Corporation (NSCC) (1999-2003). In addition, Mr. Dirks served as Chief Executive Officer and Board member of the Government Securities Clearing Corporation (2001-2003) and Chief Executive Officer and Board member of the Mortgage-Backed Securities Clearing Corporation (2001-2003).

Robert M. Gates (61)

Year of Election or Appointment: 1997

Dr. Gates is Vice Chairman of the non-interested Trustees (2005). Dr. Gates is President of Texas A&M University (2002). He was Director of the Central Intelligence Agency (CIA) from 1991 to 1993. From 1989 to 1991, Dr. Gates served as Assistant to the President of the United States and Deputy National Security Advisor. Dr. Gates is a Director of NACCO Industries, Inc. (mining and manufacturing), Parker Drilling Co., Inc. (drilling and rental tools for the energy industry, 2001), and Brinker International (restaurant management, 2003). He also serves as a member of the Advisory Board of VoteHere.net (secure Internet voting, 2001). Previously, Dr. Gates served as a Director of LucasVarity PLC (automotive components and diesel engines), a Director of TRW Inc. (automotive, space, defense, and information technology), and Dean of the George Bush School of Government and Public Service at Texas A&M University (1999-2001). Dr. Gates also is a Trustee of the Forum for International Policy.

George H. Heilmeier (68)

Year of Election or Appointment: 2004

Dr. Heilmeier is Chairman Emeritus of Telcordia Technologies (communication software and systems), where prior to his retirement, he served as company Chairman and Chief Executive Officer. He currently serves on the Boards of Directors of The Mitre Corporation (systems engineering and information technology support for the government), INET Technologies Inc. (telecommunications network surveillance, 2001), Teletech Holdings (customer management services), and HRL Laboratories (private research and development, 2004). He is Chairman of the General Motors Technology Advisory Committee and a Life Fellow of the Institute of Electrical and Electronics Engineers (IEEE) (2000). Dr. Heilmeier is a member of the Defense Science Board and the National Security Agency Advisory Board. He is also a member of the National Academy of Engineering, the American Academy of Arts and Sciences, and the Board of Overseers of the School of Engineering and Applied Science of the University of Pennsylvania. Previously, Dr. Heilmeier served as a Director of TRW Inc. (automotive, space, defense, and information technology, 1992-2002), Compaq (1994-2002), and Automatic Data Processing, Inc. (ADP) (technology-based business outsourcing, 1995-2002).

Marie L. Knowles (58)

Year of Election or Appointment: 2001

Prior to Ms. Knowles' retirement in June 2000, she served as Executive Vice President and Chief Financial Officer of Atlantic Richfield Company (ARCO) (diversified energy, 1996-2000). From 1993 to 1996, she was a Senior Vice President of ARCO and President of ARCO Transportation Company. She served as a Director of ARCO from 1996 to 1998. She currently serves as a Director of Phelps Dodge Corporation (copper mining and manufacturing) and McKesson Corporation (healthcare service, 2002). Ms. Knowles is a Trustee of the Brookings Institution and the Catalina Island Conservancy and also serves as a member of the Advisory Board for the School of Engineering of the University of Southern California.

Ned C. Lautenbach (60)

Year of Election or Appointment: 2000

Mr. Lautenbach has been a partner of Clayton, Dubilier & Rice, Inc. (private equity investment firm) since September 1998. Previously, Mr. Lautenbach was with the International Business Machines Corporation (IBM) from 1968 until his retirement in 1998. He was most recently Senior Vice President and Group Executive of Worldwide Sales and Services. From 1993 to 1995, he was Chairman of IBM World Trade Corporation, and from 1994 to 1998 was a member of IBM's Corporate Executive Committee. Mr. Lautenbach serves as Co-Chairman and a Director of Covansys, Inc. (global provider of business and technology solutions, 2000). In addition, he is a Director of Italtel Holding S.p.A. (telecommunications (Milan, Italy), 2004) and Eaton Corporation (diversified industrial) as well as the Philharmonic Center for the Arts in Naples, Florida (1999). He also is a member of the Council on Foreign Relations.

Trustees and Officers – continued

Name, Age; Principal Occupation

Marvin L. Mann (71)

Year of Election or Appointment: 1994

Mr. Mann is Chairman of the non-interested Trustees (2001). He is Chairman Emeritus of Lexmark International, Inc. (computer peripherals), where he served as CEO until April 1998, retired as Chairman May 1999, and remains a member of the Board. Prior to 1991, he held the positions of Vice President of International Business Machines Corporation (IBM) and President and General Manager of various IBM divisions and subsidiaries. He is a member of the Executive Committee of the Independent Director's Council of the Investment Company Institute. In addition, Mr. Mann is a member of the President's Cabinet at the University of Alabama and the Board of Visitors of the Culverhouse College of Commerce and Business Administration at the University of Alabama.

William O. McCoy (71)

Year of Election or Appointment: 1997

Prior to his retirement in December 1994, Mr. McCoy was Vice Chairman of the Board of BellSouth Corporation (telecommunications) and President of BellSouth Enterprises. He is currently a Director of Liberty Corporation (holding company), Duke Realty Corporation (real estate), and Progress Energy, Inc. (electric utility). He is also a partner of Franklin Street Partners (private investment management firm) and a member of the Research Triangle Foundation Board. In addition, Mr. McCoy served as the Interim Chancellor (1999-2000) and a member of the Board of Visitors (1994-1998) for the University of North Carolina at Chapel Hill and currently serves on the Board of Directors of the University of North Carolina Health Care System and the Board of Visitors of the Kenan-Flagler Business School (University of North Carolina at Chapel Hill). He also served as Vice President of Finance for the University of North Carolina (16-school system, 1995-1998).

Cornelia M. Small (60)

Year of Election or Appointment: 2005

Ms. Small is a member (2000) and Chairperson (2002) of the Investment Committee, and a member (2002) of the Board of Trustees of Smith College. Previously, she served as Chief Investment Officer (1999-2000), Director of Global Equity Investments (1996-1999), and a member of the Board of Directors of Scudder, Stevens & Clark (1990-1997) and Scudder Kemper Investments (1997-1998). In addition, Ms. Small served as Co-Chair (2000-2003) of the Annual Fund for the Fletcher School of Law and Diplomacy.

William S. Stavropoulos (65)

Year of Election or Appointment: 2002

Mr. Stavropoulos is Chairman of the Board (2000), CEO (2002), a position he previously held from 1995-2000, Chairman of the Executive Committee (2000), and a Member of the Board of Directors of The Dow Chemical Company. Since joining The Dow Chemical Company in 1967, Mr. Stavropoulos served in numerous senior management positions, including President (1993-2000; 2002-2003). Currently, he is a Director of NCR Corporation (data warehousing and technology solutions), BellSouth Corporation (telecommunications), Chemical Financial Corporation, and Maersk Inc. (industrial conglomerate, 2002). He also serves as a member of the Board of Trustees of the American Enterprise Institute for Public Policy Research. In addition, Mr. Stavropoulos is a member of The Business Council, J.P. Morgan International Council and the University of Notre Dame Advisory Council for the College of Science.

Kenneth L. Wolfe (65)

Year of Election or Appointment: 2005

Mr. Wolfe also serves as a Trustee (2005) or Member of the Advisory Board (2004) of other investment companies advised by FMR. Prior to his retirement in 2001, Mr. Wolfe was Chairman and Chief Executive Officer of Hershey Foods Corporation (1993-2001). He currently serves as a member of the boards of Adelphia Communications Corporation (2003), Bausch & Lomb, Inc., and Revlon Inc. (2004).

Advisory Board Member and Executive Officers:

Correspondence intended for each executive officer and Mr. Lynch may be sent to Fidelity Investments, 82 Devonshire Street, Boston, Massachusetts 02109.

Name, Age; Principal Occupation

Peter S. Lynch (61)

Year of Election or Appointment: 2003

Member of the Advisory Board of Variable Insurance Products Fund III. Vice Chairman and a Director of FMR, and Vice Chairman (2001) and a Director (2000) of FMR Co., Inc. Previously, Mr. Lynch served as a Trustee of the Fidelity funds (1990-2003). Prior to May 31, 1990, he was a Director of FMR and Executive Vice President of FMR (a position he held until March 31, 1991), Vice President of Fidelity[®] Magellan[®] Fund and FMR Growth Group Leader, and Managing Director of FMR Corp. Mr. Lynch was also Vice President of Fidelity Investments Corporate Services. In addition, he serves as a Trustee of Boston College, Massachusetts Eye & Ear Infirmary, Historic Deerfield, John F. Kennedy Library, and the Museum of Fine Arts of Boston.

John B. McDowell (46)

Year of Election or Appointment: 2002

Vice President of VIP Mid Cap. Mr. McDowell also serves as Vice President of certain Equity Funds (2002). He is Senior Vice President of FMR (1999), FMR Co., Inc. (2001), and Fidelity Management Trust Company (FMTC). Since joining Fidelity Investments in 1985, Mr. McDowell has worked as a research analyst and manager.

Thomas J. Allen (44)

Year of Election or Appointment: 2003

Vice President of VIP Mid Cap. Mr. Allen also serves as Vice President of other funds advised by FMR. Prior to assuming his current responsibilities, Mr. Allen managed a variety of Fidelity funds.

Eric D. Roiter (56)

Year of Election or Appointment: 1998

Secretary of VIP Mid Cap. He also serves as Secretary of other Fidelity funds; Vice President, General Counsel, and Secretary of FMR Co., Inc. (2001-present) and FMR; Vice President and Secretary of FDC; Assistant Secretary of Fidelity Management & Research (U.K.) Inc. (2001-present), Fidelity Management & Research (Far East) Inc. (2001-present), and Fidelity Investments Money Management, Inc. (2001-present). Mr. Roiter is an Adjunct Member, Faculty of Law, at Boston College Law School (2003-present).

Stuart Fross (45)

Year of Election or Appointment: 2003

Assistant Secretary of VIP Mid Cap. Mr. Fross also serves as Assistant Secretary of other Fidelity funds (2003) and is an employee of FMR.

Christine Reynolds (46)

Year of Election or Appointment: 2004

President, Treasurer, and Anti-Money Laundering (AML) officer of VIP Mid Cap. Ms. Reynolds also serves as President, Treasurer, and AML officer of other Fidelity funds (2004) and is a Vice President (2003) and an employee (2002) of FMR. Before joining Fidelity Investments, Ms. Reynolds worked at PricewaterhouseCoopers LLP (PwC) (1980-2002), where she was most recently an audit partner with PwC's investment management practice.

Timothy F. Hayes (54)

Year of Election or Appointment: 2002

Chief Financial Officer of VIP Mid Cap. Mr. Hayes also serves as Chief Financial Officer of other Fidelity funds (2002). Recently he was appointed President of Fidelity Service Company (2003) where he also serves as a Director. Mr. Hayes also serves as President of Fidelity Investments Operations Group (FIOG, 2002), which includes Fidelity Pricing and Cash Management Services Group (FPCMS), where he was appointed President in 1998. Previously, Mr. Hayes served as Chief Financial Officer of Fidelity Investments Corporate Systems and Service Group (1998) and Fidelity Systems Company (1997-1998).

Kenneth A. Rathgeber (57)

Year of Election or Appointment: 2004

Chief Compliance Officer of VIP Mid Cap. Mr. Rathgeber also serves as Chief Compliance Officer of other Fidelity funds (2004) and Executive Vice President of Risk Oversight for Fidelity Investments (2002). Previously, he served as Executive Vice President and Chief Operating Officer for Fidelity Investments Institutional Services Company, Inc. (1998-2002).

Trustees and Officers - continued

Name, Age; Principal Occupation

John R. Hebble (46)

Year of Election or Appointment: 2003

Deputy Treasurer of VIP Mid Cap. Mr. Hebble also serves as Deputy Treasurer of other Fidelity funds (2003), and is an employee of FMR. Before joining Fidelity Investments, Mr. Hebble worked at Deutsche Asset Management where he served as Director of Fund Accounting (2002-2003) and Assistant Treasurer of the Scudder Funds (1998-2003).

Kimberley H. Monasterio (41)

Year of Election or Appointment: 2004

Deputy Treasurer of VIP Mid Cap. Ms. Monasterio also serves as Deputy Treasurer of other Fidelity funds (2004) and is an employee of FMR (2004). Before joining Fidelity Investments, Ms. Monasterio served as Treasurer (2000-2004) and Chief Financial Officer (2002-2004) of the Franklin Templeton Funds and Senior Vice President of Franklin Templeton Services, LLC (2000-2004).

John H. Costello (58)

Year of Election or Appointment: 1998

Assistant Treasurer of VIP Mid Cap. Mr. Costello also serves as Assistant Treasurer of other Fidelity funds and is an employee of FMR.

Peter L. Lydecker (50)

Year of Election or Appointment: 2004

Assistant Treasurer of VIP Mid Cap. Mr. Lydecker also serves as Assistant Treasurer of other Fidelity funds (2004) and is an employee of FMR.

The Prospectus should be read carefully before an investment is made. The performance quoted represents past performance and the investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. International markets entail different risks than those typically associated with domestic markets, including currency fluctuations, political and economic instability, accounting changes and foreign taxation. Securities may be less liquid and more volatile. Please see the Prospectus for further detail. Russell Fund Distributors, Inc., is the distributor of Russell Investment Funds.

To Our Clients:

Thank you for selecting Russell to help provide for your financial security. As you read Russell Investment Funds' 2004 Annual Report, we ask that you take this opportunity to review the value Russell's investment approach provides.

Today, as well as tomorrow, our approach remains consistent. We continue to maintain our long-term focus, strategic diversification, active management, and goal-oriented planning.

In 2005, and beyond, our commitment to you remains the same. Our mutual funds offer the Russell approach to investors of all types. Our purpose is to be one of the reasons that you and your family view the future with confidence.

Thank you for your continued support and for choosing Russell, GLOBAL LEADERS IN MULTI-MANAGER™ INVESTING.

Russell Investment Funds

Market Summary as of December 31, 2004

U.S. Equity Markets

Stock prices were largely unchanged during the first nine months of the year but rose significantly following the election to finish the year with solid gains. The Russell 3000® Index returned 11.95% for the year ended December 31, 2004. Investors remained on the sidelines for much of the year, pending the outcome of the election and waiting for clarity on the direction of oil prices, and the war in Iraq. Economic growth remained impressive and corporate profits rose sharply. Falling oil prices and conclusion of the election led investors to become increasingly confident in the strength of the economy and the outlook for corporate profits. In this environment, investors responded by purchasing stocks.

There were several noteworthy themes to market performance in 2004. Smaller capitalization companies substantially outperformed larger capitalization companies, as measured by the 18.33% return of the Russell 2000® Index versus the 11.41% return for the Russell 1000® Index for the year ended December 31, 2004. Smaller capitalization companies benefited from the continued narrowing of credit spreads in the bond market. Narrower credit spreads allow small capitalization companies to borrow money at more favorable rates than when the credit spreads are greater.

Style also played an important role in equity returns. Value stocks outperformed growth stocks with the Russell 1000® Value Index returning 16.49% versus the 6.30% return of the Russell 1000® Growth Index for the year ended December 31, 2004. The market's preference for value stocks resulted from investor caution throughout the year, declining interest rates and strength in commodities such as oil and metals. This created a favorable environment for utilities, REITs and financial stocks. Meanwhile, growth stocks were hurt by disappointing results from the technology and pharmaceutical sectors.

The year 2004 was challenging for active managers, especially those following core or value investment strategies. The Lipper® Large-Cap Core Funds Average trailed the Russell 1000® Index by 3.59% and the Lipper® Large-Cap Value Funds Average lagged the Russell 1000® Value Index by 4.63%. The market environment was more favorable for active growth strategies, with the Lipper® Large-Cap Growth Funds Average outperforming the Russell 1000® Growth Index by 0.88%. The Lipper returns are net of fees while the index returns are gross of fees.

U.S. Real Estate Markets

The public real estate investment trust (REIT) market continued its strong advance in 2004. The NAREIT Equity REIT Index returned 31.57% for the year. This was the second consecutive year that the Index returned over 30%. Cash flow into REITs from both retail and institutional investors was strong during the year and was driven largely by yield-oriented investors.

The REIT market was subject to higher than normal volatility during 2004. While the performance of the REIT market has not historically been highly correlated to interest rates, the direction and magnitude of long-term interest rate movements contributed to short-term variability in share prices. REIT prices tended to move inversely with interest rates during the year. A sharp increase in long-term interest rates in early-April

Russell Investment Funds

resulted in a correction in the REIT market. However, the REIT market resumed its upward trend in May. This upward trend continued for the balance of the year as long-term interest rates moderated.

Improvements in real estate supply and demand fundamentals resulted in generally higher occupancy rates and rents which contributed to modest growth in REIT earnings. The regional malls sector was the strongest performing property type in 2004. This sector benefited from strong earnings growth supported by positive retail sales and occupancy trends. Other sectors that outperformed the benchmark included shopping centers, industrial, apartments and lodging. The weakest performing sectors were manufactured homes, health care, office and specialty.

The market generally favored larger capitalization REITs during 2004. The NAREIT Real Estate 50, a benchmark of larger and more frequently traded REITs, outperformed the broader NAREIT Equity REIT Index by 3.43%. These larger capitalization companies tend to be favored by active managers due to their liquidity, stronger balance sheets and perceived stronger earnings growth prospects.

Global Equity Markets

Global equity markets made significant gains in 2004 despite an abundance of potentially problematic trends. While market returns were good in absolute terms, the underlying investment environment was characterized by quite narrow leadership. There were several threats to market stability. Negative market sentiment prevailed over much of the year with concerns over terrorism, election-year uncertainty, sporadic indications of both weak and strong economic growth and a rather extreme increase in the price of oil having a strong influence on investors' expectations for market trends. Consequently, the global equity markets favored stocks with more defensive attributes, particularly those with higher dividend yields and highly visible earnings.

Style influences were dominant with value-oriented investment strategies faring well, while growth-oriented investment strategies faced a challenging environment. Non U.S. value stocks, as measured by the MSCI EAFE Value Index, outperformed non U.S. growth stocks as measured by the MSCI EAFE Growth Index by 9.89% over the 12 month period. Smaller capitalization companies continued to perform well. It was a challenging environment for trend following investment strategies given frequent changes in market leadership. These leadership changes were directly tied to sentiment swings in response to economic or geopolitical news rather than to changes in underlying earnings prospects.

Regionally, strong currencies often dominated local market stock performance, making currency strategies just as critical, if not more critical, than stock or country selection. While Pacific market stocks outperformed European counterparts, the gains of the Euro and the British pound resulted in stronger gains to European stocks if measured in local currencies. The MSCI EAFE Index gained 13.09% if measured in local currencies and 20.70% if measured in U.S. dollars with much of the tailwind of foreign currency appreciation occurring in the fourth quarter.

Sector performance paralleled the U.S. market for much of the year. Higher yielding utility stocks were the best performers in the MSCI EAFE Index; with the energy sector a close second. Strong gains to commodity cyclicals, including materials, were another noteworthy trend for most of the year. Trends changed in the fourth quarter as falling energy prices and slower economic activity slowed growth in the cyclical sectors. At this point, telecommunications and financial services stocks assumed market leadership.

U.S. Fixed Income Markets

Over the year, interest rates were volatile as bond markets reacted to erratic employment numbers, election uncertainties, commodity price increases, geopolitical risk in Iraq and a generally mixed economy that provided no clear direction on where rates were headed. The ten year Treasury bond started and ended the

Russell Investment Funds

year with virtually the same yield, but its yield ranged widely over the course of the year. Yields on the ten year Treasury bond started the year at 4.25%, moved lower in the first quarter in response to weaker payroll numbers and reached its lowest point of 3.68% in March. Yields on the ten year Treasury bond reversed in April, May and June on news of stronger payrolls, resulting in a peak in yields of 4.87%. Over the second half of the year, yields on the ten year Treasury bond were more stable but steadily declined to end at 4.22%.

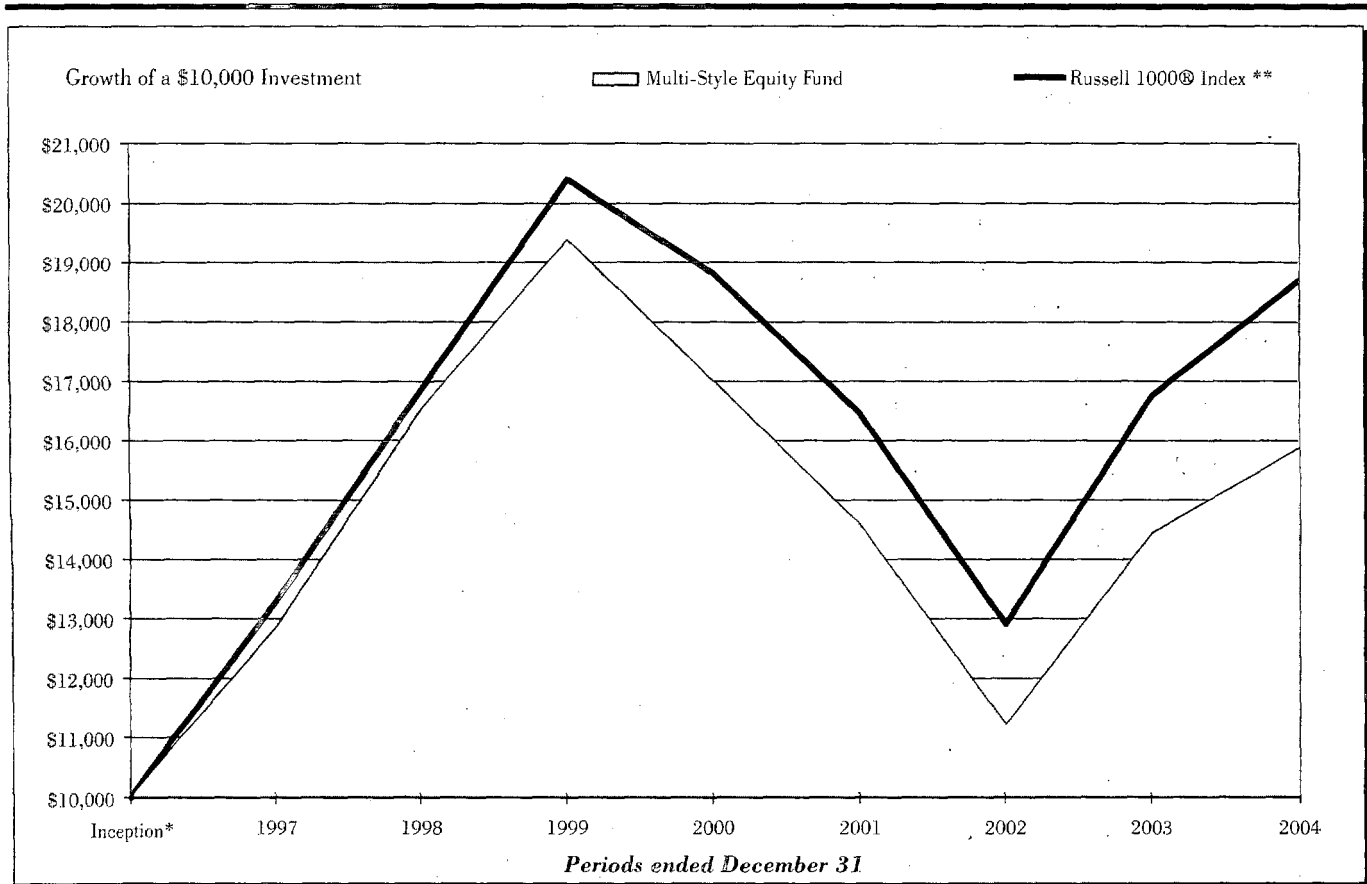

Short term interest rates moved over the year in response to the tightening cycle initiated by the Federal Reserve. After cutting the overnight federal funds rate aggressively from 6.50% in 2001 to 1.00% in 2003, in 2004, the Federal Reserve reversed course and began raising the federal funds overnight rate in June. At the end of the year, overnight rates had moved up from 1.00% to 2.25% and the market, as represented by trading in futures contracts, anticipated further increases in the overnight rate by the Federal Reserve in 2005.

Intermediate and long term interest rates were nearly flat over the year and, with short term rates increasing, the yield curve flattened from a historically steep level.

Within sectors, riskier bonds outperformed as a result of better fundamentals and large investor appetite for yield. Despite a 28% return in the high yield bond sector in 2003, the high yield sector also delivered good results in 2004 as defaults declined due to better economic growth which allowed companies to pay down debt. The high yield bond sector, as represented by the Lehman Brothers U.S. Corporate High Yield Index, returned 11.13% over the year, which compared to Treasuries returning 3.5% over the year, as represented by the Lehman U.S. Treasury Index. Investment grade corporate bonds also did well as a result of the same factors driving the high yield market. For the year, the Lehman U.S. Credit Index returned 5.5%. Mortgages performed well over the year despite volatility, returning 4.7%, as represented by the MBS fixed rate component of the Lehman U.S. Aggregate Index, and outperformed equivalent duration Treasuries by 1.42%. As the year ended, the yield spreads between Treasuries, corporates and mortgages were tight, reflecting an improving economy and large market demand for yield.

Russell Investment Funds

Multi-Style Equity Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

What is the Fund's investment objective?

The Fund seeks to provide long term capital growth.

How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2004?

For the fiscal year ended December 31, 2004, the Multi-Style Equity Fund gained 9.81%. This compared to the Russell 1000® Index, which gained 11.41% during the same period. The Fund's performance is net of operating expenses of 0.87%. Index returns do not reflect deduction for fees or expenses. Index returns do not include fair valuation adjustments which may be included in fund returns.

How did the market conditions, as described starting on page 4 of this report, affect the Fund's performance?

Market conditions were unfavorable to the Fund's positioning for most of the year. The market was led by defensive, lower risk stocks while Fund positioning reflected an optimistic view of the market and economy. The Fund was invested in companies with above-market forecasted growth rates while the market favored value-oriented companies. The market environment did not favor active core and value managers.

What were the primary contributors and detractors to the Fund's performance during the last 12 months?

The Fund's emphasis on companies with above-average growth and earnings cyclicity contributed to underperformance. Money managers were optimistic toward the economy and positioned their portfolios accordingly. Below-average performance from Brandywine Asset Management (due to aggressive positioning in a defensive market) and Montag & Caldwell (due to weakness in the health care and consumer staples sectors) also contributed negatively to Fund performance. Finally, stock selection was below expectations in the period due to factors such as underweighting Exxon Mobil and AT&T, Wireless and overweighting Boston Scientific, Pfizer, Amgen, Císcó, and Paychex.

Fund performance benefited from favorable sector positioning due to an underweight in the technology sector and an overweight in the materials and consumer discretionary sectors.

An overweight to stocks with low price/book ratios also contributed positively to performance as depressed industrial

cyclical stocks performed strongly in the period. An overweight to agriculture stocks (e.g. Archer Daniels Midland and Monsanto) and to Verisign, Ebay, Tyco, Qualcomm and Marriott helped performance.

How did the investment strategies and techniques employed by the Fund and its money managers affect its performance?

The largest factor contributing to relative underperformance was positioning for continued economic growth and rising stock prices. The Fund was situated contrary to market leadership. The market favored high yield and defensive stocks and penalized stocks with above-average growth prospects. Although sector allocations added value, stock selection detracted from performance due to the emphasis on undervalued growth stocks.

Describe any changes to the Fund's structure or the money manager line-up.

Barclays Global Investors, a structured value manager, was replaced with two more concentrated value managers, Institutional Capital Corporation and DePrince, Race & Zollo. This change is intended to increase stock-specific risk (i.e., concentration) in the Fund. Additionally, Turner's growth assignment was broadened to include medium capitalization stocks. Finally, Brandywine Asset Management was terminated.

Money Managers as of December 31, 2004

Styles

Alliance Capital Management L.P., which acts as money manager to the Fund through its Bernstein Investment Research and Management Unit	Value
Ark Asset Management Co., Inc.	Growth
DePrince, Race & Zollo, Inc.	Value
Institutional Capital Corporation	Value
Jacobs Levy Equity Management, Inc.	Market-Oriented
Montag & Caldwell, Inc.	Growth
Turner Investment Partners, Inc.	Growth

* The Fund commenced operations on January 2, 1997. Index comparison began January 1, 1997.

** Russell 1000® Index includes the 1,000 largest companies in the Russell 3000® Index. The Russell 1000® Index represents the universe of stocks from which most active money managers typically select. The Russell 1000® Index return reflects adjustments for income dividends and capital gains distributions reinvested as of the ex-dividend dates.

§ Annualized.

Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results.

Multi-Style Equity Fund

Shareholder Expense Example — December 31, 2004 (Unaudited)

Fund Expenses

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Annual Report. Please refer to this information when reviewing the Expense Example for a Fund.

Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees; and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2004 to December 31, 2004.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2004	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2004	\$ 1,065.60	\$ 1,020.63
Expenses Paid During Period*	\$ 4.52	\$ 4.42

* Expenses are equal to the Fund's annualized expense ratio of 0.87%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). Reflects amounts waived and/or reimbursed by the investment adviser. Without the waiver and/or reimbursement, expenses would have been higher.

Russell Investment Funds

Aggressive Equity Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

What is the Fund's investment objective?

The Fund seeks to provide long term capital growth.

How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2004?

For the fiscal year ended December 31, 2004, the Aggressive Equity Fund gained 14.73%. This compared to the Russell 2500™ Index, which gained 18.29% during the same period. The Fund's performance is net of operating expenses of 1.05%. Index returns do not reflect deduction for fees or expenses. Index returns do not include fair valuation adjustments which may be included in fund returns.

How did the market conditions, as described starting on page 4 of this report, affect the Fund's performance?

A difficult market environment for the Fund led to significant underperformance relative to the benchmark. In particular, the market's unfavorable treatment of stocks with higher levels of expected growth, positive earnings estimate revisions and/or lower yields and reward of higher dividend yielding stocks posed performance challenges for the Fund. The Fund's portfolio had valuation characteristics similar to those of the benchmark. However, the Fund's simultaneous emphasis of stocks with higher than benchmark expected growth and lower than benchmark dividend yields resulted in the Fund's significant relative underperformance.

What were the primary contributors and detractors to the Fund's performance during the last 12 months?

Security selection was the primary cause of the Fund's relative underperformance for the year. In particular, security selection in the technology, health care and consumer discretionary sectors was particularly poor and almost entirely responsible for the Fund's relative underperformance.

How did the investment strategies and techniques employed by the Fund and its money managers affect its performance?

While the Fund's relative underperformance is attributable mostly to security selection, this resulted not from the investment strategies employed by the money managers in stock picking, but rather from very defensive market conditions. These market conditions led to unprecedented returns for value stocks relative to growth stocks, contracting valuation multiples, extremely cheap pure growth stocks and extremely expensive higher yielding stocks.

Of the Fund's eight money managers, only Geewax Terker and Goldman Sachs outperformed the benchmark for the year. Geewax outperformed primarily as a result of its emphasis on higher financial quality stocks and stocks with lower relative stock valuation. Goldman Sachs outperformed largely as a result of holding a handful of stocks that performed very well possibly due to the timing of cash flows allocated to this money manager.

The Fund's other money managers underperformed the benchmark. CapitalWorks underperformed significantly as a result of its emphasis on higher expected growth stocks. David J. Greene only slightly underperformed because its emphasis on deep cyclical stocks caused its holdings to rally in the fourth quarter. TimesSquare underperformed largely due to its emphasis on higher expected growth stocks. Jacobs Levy underperformed as a consequence of its sector allocation decisions, in particular, an overweight to the technology sector and an underweight to the other energy sector. Suffolk Capital Management and Systematic Financial Management (money managers terminated in May 2004) significantly underperformed as a result of their emphasis on higher relative growth stocks and positive earnings fundamentals.

Describe any changes to the Fund's structure or the money manager line-up.

In May 2004, Nicholas Applegate Capital Management replaced Systematic Financial Management and Gould Investment Partners replaced Suffolk Capital. The Fund's investment strategies, risk parameters and portfolio characteristics such as valuation, sector exposure and growth relative to the benchmark did not materially change as a result of these changes.

Like Suffolk, Gould pursues a relatively aggressive earnings momentum growth strategy. A key to Gould's success investing in higher valuation growth stocks is a very aggressive sell discipline. Consequently, Gould's portfolios tend to have very high turnover rates. Their portfolio tends to be concentrated among a few sectors in which companies with accelerating earnings are more prevalent such as technology, healthcare and producer durables.

Nicholas-Applegate pursues a small capitalization value strategy incorporating a quantitative model with the fundamental insights of the portfolio manager. Consequently, the investment approach is a blend of quantitative and qualitative approaches to security selection. Nicholas-Applegate's portfolio capitalization, valuation, sector and growth traits closely resemble the Russell 2000® Value Index, with moderate deviations based on bottom-up stock preferences.

In December 2004, approximately 4% of Fund assets were reallocated from value money managers to growth money managers as a result of Frank Russell Investment Management Company's belief that small capitalization growth stocks were attractively valued relative to small capitalization value stocks. The reallocation resulted in a very minor tilt toward growth stocks relative to benchmark and a small increase in forecasted tracking error.

Shareholder Expense Example — December 31, 2004 (Unaudited)

Fund Expenses

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Annual Report. Please refer to this information when reviewing the Expense Example for a Fund.

Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees; and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2004 to December 31, 2004.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2004	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2004	\$ 1,100.00	\$ 1,019.72
Expenses Paid During Period*	\$ 5.54	\$ 5.33

* Expenses are equal to the Fund's annualized expense ratio of 1.05%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). Reflects amounts waived and/or reimbursed by the investment adviser. Without the waiver and/or reimbursement, expenses would have been higher.

Russell Investment Funds

Non-U.S. Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

What is the Fund's investment objective?

The Fund seeks to provide long term capital growth.

How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2004?

For the fiscal year ended December 31, 2004, the Non-U.S. Fund gained 18.30%. This compared to its benchmark, the MSCI EAFE Index, which gained 20.70%. The Fund's performance is net of operating expenses of 1.15%. Index returns do not reflect deduction for fees or expenses. Index returns do not include fair valuation adjustments which may be included in fund returns.

How did the market conditions, as described starting on page 4 of this report, affect the Fund's performance?

The Fund's money managers maintained investment disciplines. The money managers' analysis of fundamentals frequently supported continued investment in companies they believed most likely to benefit from improving economic trends. Money managers often favored companies undergoing restructuring activity which they believed would lead to market recognition. Money managers increased exposure to Japan over the course of the year, moving from a modest underweight to a modest overweight. Investments in the markets of the Pacific region, particularly in Hong Kong-listed companies, were generally predicated on the expectation that recovering U.S. economic activity and strong growth in China would lead to earnings-driven gains in the Pacific region markets. The Fund's more momentum-driven money managers, whose strategies rely on positive (or negative) pricing trends as a signal of the market's increased (or decreased) interest in a stock, country or sector, rotated into several stocks and/or sectors experiencing positive pricing trends. However, frequent rotations in market leadership in response to new developments, including economic and political news, proved frustrating for momentum-driven decisions. This environment was not favorable for investment strategies relying on the persistence of price movements. This had a particularly negative affect on Oechsle's results during the year, but also negatively impacted the other money managers' results to a lesser degree.

What were the primary contributors and detractors to the Fund's performance during the last 12 months?

The Fund's emphasis on stocks with above-average forecasted long-term earnings growth and positive price momentum

proved ineffective and detracted from Fund performance relative to benchmark. This was reflected in the Fund's limited effectiveness in stock selection, which accounted for most of the Fund's shortfall relative to the benchmark. However, sector and country allocations also contributed to the Fund's underperformance. From a sector perspective, an underweight to utilities and consumer staples stocks, and a modest overweight to the technology sector contributed to the underperformance relative to the benchmark. In addition, the Fund's overweight to more cyclical regions, Hong Kong and Japan in particular, and underweight to Australia and the United Kingdom were also detractors from performance.

How did the investment strategies and techniques employed by the Fund and its money managers affect its performance?

The Fund maintained a style-balanced profile over the period. This proved critical given the poor market climate for growth style investing. Growth stocks generally lagged value stocks during the year. The MSCI EAFE Value Index gained 24.88% in US dollars and the MSCI EAFE Growth Index gained 16.48% for the year ended December 31, 2004.

Strategic constraints on the Fund's country and sector positioning limited the impact on Fund results. From a country perspective, underweight positions in Australia and Austria resulted in an opportunity cost given strong gains in these two markets. An overweight position in Germany also detracted from Fund performance given that market's weak performance.

Overall sector positioning had a positive impact on performance.

Describe any changes to the Fund's structure or the money manager line-up.

The assignment for Oechsle International Advisors, LLC, one of the Fund's growth-oriented money managers, was changed in June from a moderate-risk investment strategy to a more concentrated, aggressive investment strategy. This change was made to attempt to capitalize on the strengths of Oechsle's research and to shift reliance for investment decision-making from a team of Oechsle's investment professionals to a single key individual.

* The Fund commenced operations on January 2, 1997. Index comparison began January 1, 1997.

** Morgan Stanley Capital International Europe, Australia, Far East (MSCI EAFE) Index is an index composed of an arithmetic, market value-weighted average of the performance of approximately 1,600 securities listed on the stock exchange of the countries of Europe, Australia, and the Far East. The index is calculated on a total-return basis, which includes reinvestment of gross dividends before deduction of withholding taxes.

§ Annualized.

Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results.

Investments in securities of non-US issuers and foreign currencies involve investment risks different from those of US issuers. The Prospectus contains further information and details regarding these risks.

Shareholder Expense Example — December 31, 2004 (Unaudited)

Fund Expenses

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Annual Report. Please refer to this information when reviewing the Expense Example for a Fund.

Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees; and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2004 to December 31, 2004.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	<u>Actual Performance</u>	<u>Hypothetical Performance (5% return before expenses)</u>
Beginning Account Value		
July 1, 2004	\$ 1,000.00	\$ 1,000.00
Ending Account Value		
December 31, 2004	\$ 1,133.40	\$ 1,019.22
Expenses Paid During Period*	\$ 6.17	\$ 5.84

* Expenses are equal to the Fund's annualized expense ratio of 1.15%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). Reflects amounts waived and/or reimbursed by the investment adviser. Without the waiver and/or reimbursement, expenses would have been higher.

Russell Investment Funds

Real Estate Securities Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

What is the Fund's investment objective?

The Fund seeks to provide current income and long term capital growth.

How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2004?

For the fiscal year ended December 31, 2004, the Real Estate Securities Fund gained 34.88%. This compared to the NAREIT Equity REIT Index, which gained 31.57% during the same period. The Fund's performance is net of operating expenses of 0.92%. Index returns do not reflect deduction for fees or expenses. Index returns do not include fair valuation adjustments which may be included in fund returns.

How did the market conditions, as described starting on page 4 of this report, affect the Fund's performance?

The money managers positioned the Fund to benefit from perceived strengthening economic conditions and real estate market recoveries by maintaining the largest overweight positions in the regional malls, industrial and lodging sectors. The money managers maintained smaller overweight positions in the office and apartments sectors due to concerns about weaker fundamentals in these sectors. As more fully described below, sector positioning was a major contributor to the Fund's performance during the year.

The Fund maintained a primary focus on larger capitalization and more liquid REITs during the year. As this segment of the market outperformed the broader REIT market, the Fund benefited from this trend.

What were the primary contributors and detractors to the Fund's performance during the last 12 months?

Both stock and property sector selection contributed positively to performance during the year relative to benchmark. The Fund maintained its largest overweight positions in the regional malls, industrial and lodging sectors, each of which outperformed the benchmark during the year. The Fund also benefited from a small overweight position in the apartments sector. Underweight positions in the manufactured homes, self storage, health care and specialty sectors contributed positively to performance relative to benchmark. The Fund's slight overweight position in the office sector and underweight positions in the shopping centers and diversified sectors detracted from performance.

How did the investment strategies and techniques employed by the Fund and its money managers affect its performance?

INVESCO maintains a broadly diversified portfolio with exposure to all major property sectors. Their investment style incorporates fundamental property market research and bottom-up quantitative securities analysis. Of the Fund's three managers, INVESCO contributed the strongest performance relative to benchmark. INVESCO's performance benefited from effective sector positioning and positive stock selection within sectors. INVESCO's largest overweight position was in the regional malls sector, which was the strongest performing property sector during the year. Their stock selection was particularly strong in the office sector.

RREEF's style emphasizes a top-down approach to property sector weights, based on an assessment of property market fundamentals. RREEF outperformed the benchmark during the year due to positive stock and property sector selection. RREEF's analysis of property market conditions resulted in an overweight position in the outperforming regional malls sector and an underweight position in the underperforming office sector which contributed positively to Fund performance relative to benchmark.

AEW's style is more value-oriented than either INVESCO or RREEF, with a primary focus on underlying real estate net asset value. AEW's property sector weightings tend to track relatively closely to the benchmark sector weights. AEW outperformed the benchmark during the year, primarily due to positive stock selection.

Describe any changes to the Fund's structure or the money manager line-up.

No changes to the Fund's structure or its money manager line-up were made during the year.

Money Managers

as of December 31, 2004

Money Managers	Styles
AEW Management and Advisors, L.P.	Value
INVESCO Institutional (N.A.), Inc., which acts as a money manager to the Fund through its INVESCO Real Estate division	Market-Oriented
RREEF America L.L.C.	Market-Oriented

* Real Estate Securities Fund assumes initial investment on April 30, 1999, NAREIT Index comparison for the initial investment began May 1, 1999.

** National Association of Real Estate Investment Trusts (NAREIT) Equity REIT Index is an index composed of all the data based on the last closing price of the month for all tax-qualified REITs listed on the New York Stock Exchange, American Stock Exchange, and the NASDAQ National Market System. The data is market value-weighted. The total-return calculation is based upon whether it is 1-month, 3-months or 12-months. Only those REITs listed for the entire period are used in the total return calculation.

§ Annualized.

Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results.

Real Estate Securities Fund

Shareholder Expense Example — December 31, 2004 (Unaudited)

Fund Expenses

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Annual Report. Please refer to this information when reviewing the Expense Example for a Fund.

Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees; and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2004 to December 31, 2004.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value		
July 1, 2004	\$ 1,000.00	\$ 1,000.00
Ending Account Value		
December 31, 2004	\$ 1,263.50	\$ 1,020.37
Expenses Paid During Period*	\$ 5.23	\$ 4.67

* Expenses are equal to the Fund's annualized expense ratio of 0.92%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). Reflects amounts waived and/or reimbursed by the investment adviser. Without the waiver and/or reimbursement, expenses would have been higher.

Russell Investment Funds

Core Bond Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

What is the Fund's investment objective?

The Fund seeks to provide current income and the preservation of capital.

How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2004?

For the fiscal year ended December 31, 2004, the Core Bond Fund gained 4.66%. This compared to its benchmark, the Lehman Brothers Aggregate Bond Index, which gained 4.34%. The Fund's performance is net of operating expenses of 0.70%. Index returns do not reflect deduction for fees or expenses. Index returns do not include fair valuation adjustments which may be included in fund returns.

How did the market conditions, as described starting on page 4 of this report, affect the Fund's performance?

Over the course of the year, short-term interest rates increased due to tightening by the Federal Reserve and interest rates on bonds with maturities of 10 years or longer remained relatively unchanged. This resulted in nominal returns for the year being similar to yields. For the second year in a row, the best performing sector within the Lehman Brothers Aggregate Bond Index was the investment grade corporate sector. This sector benefited from better economic growth making it easier for corporate issuers to pay down debt. The Fund had a slight overweight to the investment grade corporate bond sector at the beginning of the year which contributed positively to performance. However, as prices of investment grade corporate bonds increased, money managers sold these bonds resulting in an underweight in this sector for most of 2004.

The Fund was overweight to the high yield bond sector for much of the year. After posting a 29.0% return in 2003, the high yield bond market, as represented by the Lehman Brothers High Yield Index, rose 11.13% in 2004. The Fund started the year with a 6% allocation to high yield bonds. As prices of high yield bonds rose, money managers sold these bonds and took profits and the Fund ended the year with a 2.5% allocation to high yield bonds. The high yield bonds owned by the Fund were of higher average quality than the total high yield market, averaging BB.

The emerging market debt sector had returns similar to that of the high yield bond sector. The Fund's exposure to the emerging markets debt sector declined from 1.7% to 1.3% over the year.

What were the primary contributors and detractors to the Fund's performance during the last 12 months?

Overweight positions in the high yield bond and emerging markets debt sector contributed positively to performance relative to the benchmark.

Investment in short duration fixed income securities decreased the Fund's total return relative to benchmark. Certain of the

Fund's money managers, expecting that interest rates would rise uniformly across maturities, held overweight positions in shorter maturity bonds which are less sensitive to a rise in interest rates. However, as the yield curve flattened as short term interest rates rose, bonds with longer maturities increased in price, while bonds with shorter maturities fell in price.

A tactical allocation to Treasury Inflation Protected Securities (TIPS) contributed positively to performance relative to benchmark. Over the year, higher commodity prices led to expectations of higher inflation. TIPS provide higher yields in an inflationary environment. As a result, TIPS generally outperformed Treasury bonds during the year. The Fund held a 5% to 6% weighting to TIPS over the year.

How did the investment strategies and techniques employed by the Fund and its money managers affect its performance?

Generally, investors were rewarded for owning riskier bonds over the last 12 months. During the Fund's fiscal year ended December 31, 2004, investors' bid-up prices on high yield bonds, investment grade corporate bonds and emerging markets debt. As the prices of the Fund's holdings in high yield bonds, investment grade corporate bonds and emerging market debt increased, the Fund's money managers considered the possibility of a market sell-off in these fixed income sectors. As a result of very little yield compensation for holding bonds in these riskier sectors, the Fund's money managers reduced the Fund's portfolio weighting to these sectors by reducing the Fund's exposure to the high yield bond, investment grade corporate bond and emerging markets debt sectors and moved to higher quality fixed income instruments that they felt were less susceptible to a market sell-off.

As expected, interest rates impacted the fixed income markets during 2004. The interest rate environment was quite volatile. Although the yield on the ten year U.S. Treasury Bond started and ended at close to the same level, 4.25% and 4.22%, respectively, ten year U.S. Treasury Bond yields ranged from 3.68% to 4.87%. As rates fell to new lows in March, the Fund's money managers moved to a more defensive position by selling bonds with longer maturities which are more sensitive to rising rates. This positioned the Fund's money managers to benefit from the rise in interest rates in April as measured by ten-year U.S. Treasury Bond yields moving up to over 4.87% in June. Despite opportunistic positioning of the Fund during volatile periods, the Fund's defensive position throughout much of the year detracted slightly from results. As the year ended, the Fund's money managers continued to hold defensive portfolios with respect to interest rates (i.e. shorter duration in the expectation of rising interest rates), with an average duration of 4.0 years, slightly below the 4.3 year average duration of the Lehman Brothers U.S. Aggregate Index.

Russell Investment Funds

Core Bond Fund

Portfolio Management Discussion, continued — December 31, 2004 (Unaudited)

Describe any changes to the Fund's structure or the money manager line-up.

No changes were made to the Fund's money manager lineup during the fiscal year ended December 31, 2004. However, one of the Fund's money managers, TimesSquare Capital Management, Inc. ("TimesSquare"), underwent an internal organizational change that resulted in its parent company exiting the institutional asset management business. TimesSquare's fixed income managers moved to Bear Stearns Asset Management Inc. ("Bear Stearns") as a result of its

purchase of TimesSquare. There is no impact on the Fund, and the allocation to this manager remains the same.

**Money Managers
as of December 31, 2004****Styles**

Bear Stearns Asset Management Inc.	Sector Rotation
Pacific Investment Management Company LLC	Sector Rotation

* The Fund commenced operations on January 2, 1997. Index comparison began January 1, 1997.

** Lehman Brothers Aggregate Bond Index is composed of securities from Lehman Brothers Government/Corporate Bond Index, Mortgage-Backed Securities Index, and the Asset-Backed Securities Index. Total return comprises price appreciation/depreciation and income as a percentage of the original investment. Indexes are rebalanced monthly by market capitalization.

§ Annualized.

Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results.

Core Bond Fund

Shareholder Expense Example — December 31, 2004 (Unaudited)

Fund Expenses

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Annual Report. Please refer to this information when reviewing the Expense Example for a Fund.

Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees; and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2004 to December 31, 2004.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	<u>Actual Performance</u>	<u>Hypothetical Performance (5% return before expenses)</u>
Beginning Account Value July 1, 2004	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2004	\$ 1,043.00	\$ 1,021.48
Expenses Paid During Period*	\$ 3.59	\$ 3.56

* Expenses are equal to the Fund's annualized expense ratio of 0.70%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period). Reflects amounts waived and/or reimbursed by the investment adviser. Without the waiver and/or reimbursement, expenses would have been higher.

Russell Investment Funds

Notes to Schedules of Investments — December 31, 2004

Footnotes:

- (Æ) Nonincome-producing security.
- (ö) Real Estate Investment Trust (REIT).
- (§) Held as collateral in connection with futures contracts purchased (sold), options written, or swaps entered into by the Fund.
- (z) Rate noted is yield-to-maturity from date of acquisition.
- (ç) At amortized cost, which approximates market.
- (Ê) Adjustable or floating rate security. Rate shown reflects rate in effect at period end.
- (I) Forward commitment.
- (f) Perpetual floating rate security. Rate shown reflects rate in effect at period end.
- (μ) Bond is insured by a guarantor.
- (Å) This security has been valued by the Security Valuation Committee. It is possible that the estimated value may differ significantly from the amount that might ultimately be realized.
- (æ) Pre-refunded: These bonds are collateralized by US Treasury securities, which are held in escrow by a trustee and used to pay principal and interest in the tax-exempt issue and to retire the bonds in full at the earliest refunding date. The rate noted is for descriptive purposes; effective yield may vary.
- (Ø) In default.
- (ß) Illiquid security.
- (×) The security is purchased with the cash collateral from the securities loaned.
- (Ñ) All or a portion of the shares of this security are on loan.
- (P) Restricted security. Security may have contractual restrictions on resale, may have been offered in a private placement transaction, and may not be registered under the Securities Act of 1933.

Abbreviations:

ADR - American Depositary Receipt
GDR - Global Depositary Receipt
ADS - American Depositary Share
CMO - Collateralized Mortgage Obligation
CVO - Contingent Value Obligation
144A - Represents private placement security for qualified buyers according to rule 144A of the Securities Act of 1933.
GDS - Global Depositary Share
LIBOR - London Interbank Offered Rate
PIK - Payment in Kind
FDIC - Federal Deposit Insurance Company
REMIC - Real Estate Mortgage Investment Conduit
STRIP - Separate Trading of Registered Interest and Principal of Securities
TBA - To Be Announced Security

Foreign Currency Abbreviations:

ARS - Argentine peso	GBP - British pound sterling	PEN - Peruvian nouveau sol
AUD - Australian dollar	HKD - Hong Kong dollar	PHP - Philippine peso

Russell Investment Funds

Notes to Financial Statements — December 31, 2004

1. Organization

Russell Investment Funds (the "Investment Company") is a series mutual fund with five investment portfolios, referred to as "Funds." These financial statements report on the Funds, each of which has distinct investment objectives and strategies. These Funds are offered at net asset value to qualified insurance company separate accounts offering variable insurance products. The Investment Company is registered under the Investment Company Act of 1940, as amended, as a diversified, open-end management investment company. It is organized and operates as a Massachusetts business trust under a master trust agreement dated July 11, 1996. The Investment Company's master trust agreement permits the Board of Trustees to issue an unlimited number of full and fractional shares of beneficial interest at a \$.01 par value.

2. Significant Accounting Policies

The following is a summary of the significant accounting policies consistently followed by the Fund in the preparation of these financial statements. These policies are in conformity with generally accepted accounting principles ("GAAP") for investment companies. The presentation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Security valuation

United States equity securities listed and traded principally on any national securities exchange are valued on the basis of the last sale price or, if there were no sales on that day, at the last reported price, on the primary exchange on which the security is traded. Equity securities traded on Nasdaq or in a U.S. OTC market will be valued at the official closing price (NOCP) as of the close of the market's regular trading hours.

Fixed-income securities listed and traded principally on any national securities exchange are valued at the evaluated bid price or, if there were no sales on that day, at the last reported bid price, on the primary exchange on which the security is traded. Over-the-counter fixed-income securities and options are valued on the basis of the last sale price. Many fixed-income securities do not trade each day, and thus last sale or bid prices are frequently not available. Accordingly, fixed-income securities may be valued using prices provided by a pricing service approved by the Board of Trustees when such prices are believed to reflect the market value of such securities.

Futures contracts are valued on the basis of the last sales price. Exchange listed futures contracts are valued on a basis of the last quoted daily settlement prices established by the exchange on which they trade. If there were no sales, futures are valued at the last reported bid price.

Investments in other mutual funds are valued at their net asset value per share, calculated at 4:00pm Eastern time or as of the close of the NYSE, whichever is earlier.

The value of swap agreements are equal to the Funds' obligation (or rights) under swap contracts which will generally be equal to the net amounts to be paid or received under the contracts based upon the relative values of the positions held by each party to the contracts.

International equity securities traded on a foreign national securities exchange or an over-the-counter market (foreign or domestic) are valued on the basis of the official closing price, or, lacking the official closing price, at the last sale price on the primary exchange on which the security is traded.

Short-term investments purchased by the Funds and maturing within 60 days at the time of purchase are valued at "amortized cost" unless the Board of Trustees determines that amortized cost does not represent fair value.

If market quotations are not readily available for a security or if subsequent events suggest that a market quotation is not reliable, the Funds will use the security's fair value, as determined in accordance with Fair Value Procedures. The effect of fair value pricing is that securities may not be priced on the basis of quotations from the primary market in which they are traded, but rather may be priced by another method that the Funds' Board of Trustees believes reflects fair value. This policy is intended to assure that the Funds' net asset value fairly reflects security values as of the time of pricing. Events or circumstances affecting the values of fund securities that occur between the closing of the principal markets on which they trade and the time the net asset value of fund shares is determined may be reflected in the calculation of net asset values for each applicable fund when a particular event or circumstance would materially affect such fund's net asset value.

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

Because foreign securities can trade on non-business days, the net asset value of a fund's portfolio that includes foreign securities may change on days when shareholders will not be able to purchase or redeem fund shares.

Investment transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the basis of specific identified cost incurred by each money manager within a particular Fund.

Investment income

Dividend income is recorded net of applicable withholding taxes on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the Funds are informed of the ex-dividend date. Interest income is recorded on the accrual basis. The Core Bond Fund classifies gains and losses realized on prepayments received on mortgage-backed securities as part of interest income. All premiums and discounts, including original issue discounts, are amortized/accreted using the interest method.

Federal income taxes

Since the Investment Company is a Massachusetts business trust, each Fund is a separate corporate taxpayer and determines its net investment income and capital gains (or losses) and the amounts to be distributed to each Fund's shareholders without regard to the income and capital gains (or losses) of the other Funds.

It is each Fund's intention to qualify as a regulated investment company and distribute all of its taxable income and capital gains. Therefore, no federal income tax provision was required for the Funds.

Dividends and distributions to shareholders

For all Funds, income dividends and capital gain distributions, if any, are recorded on the ex-dividend date. Dividends are generally declared and paid quarterly, except for the Non-U.S. Fund, which generally declares and pays dividends annually. Capital gain distributions are generally declared and paid annually. An additional distribution may be paid by the Funds to avoid imposition of federal income and excise tax on any remaining undistributed capital gains and net investment income.

The timing and characterization of certain income and capital gain distributions are determined in accordance with federal tax regulations which may differ from GAAP. As a result, net investment income and net realized gain (or loss) on investment and foreign currency-related transactions for a reporting period may differ significantly from distributions during such period. The differences between tax regulations and GAAP primarily relate to investments in options, futures, forward contracts, swap contracts, passive foreign investment companies, foreign-denominated investments, mortgage-backed securities, certain securities sold at a loss and capital loss carryforwards.

Expenses

The Funds will pay their own expenses other than those expressly assumed by Frank Russell Investment Management Company ("FRIMCo" or "Advisor"). Most expenses can be directly attributed to the individual Funds. Expenses which cannot be directly attributed to a specific Fund are allocated among all Funds principally based on their relative net assets.

Foreign currency translations

The books and records of the Funds are maintained in US dollars. Foreign currency amounts and transactions of the Funds are translated into US dollars on the following basis:

- (a) Market value of investment securities, other assets and liabilities at the closing rate of exchange on the valuation date.
- (b) Purchases and sales of investment securities and income at the closing rate of exchange prevailing on the respective trade dates of such transactions.

Reported net realized gains or losses from foreign currency-related transactions arise from: sales and maturities of short-term securities; sales of foreign currencies; currency gains or losses realized between the trade and settlement dates on securities transactions; the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Non-U.S. Fund's books and the US dollar equivalent of the amounts actually received or paid. Net unrealized gains or losses from foreign

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

currency-related transactions arise from changes in the value of assets and liabilities, other than investments in securities, at year end, as a result of changes in the exchange rates.

The Funds do not isolate that portion of the results of operations of the Fund that arises as a result of changes in exchange rates from that portion that arises from changes in market prices of investments during the year. Such fluctuations are included with the net realized and unrealized gain or loss from investments. However, for federal income tax purposes the Funds do isolate the effects of changes in foreign exchange rates from the fluctuations arising from changes in market prices for realized gain (or loss) on debt obligations.

Derivatives

To the extent permitted by the investment objectives, restrictions and policies set forth in the Funds' Prospectus and Statement of Additional Information, the Funds may participate in various derivative-based transactions. Derivative securities are instruments or agreements whose value is derived from an underlying security or index. They include options, futures, swaps, forwards, structured notes and stripped securities. These instruments offer unique characteristics and risks that assist the Funds in meeting their investment strategies.

The Funds typically use derivatives in three ways: cash equitization/monetization, hedging, and return enhancement. Cash equitization/monetization is a technique that may be used by certain Funds through the use of options and futures to earn "market-like" returns with their excess and liquidity reserve cash balances. Hedging is used by some Funds to limit or control risks, such as adverse movements in exchange rates and interest rates. Return enhancement can be accomplished through the use of derivatives in a Fund. By purchasing certain instruments, Funds may more effectively achieve the desired portfolio characteristics that assist them in meeting their investment objectives. Depending on how the derivatives are structured and utilized, the risks associated with them may vary widely. These risks are generally categorized as market risk, liquidity risk and counterparty or credit risk.

Foreign currency exchange contracts

In connection with portfolio purchases and sales of securities denominated in a foreign currency, the Non-U.S. and Core Bond Funds may enter into foreign currency exchange spot contracts and forward foreign currency exchange contracts ("contracts"). Contracts are recorded at market value. Certain risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and are generally limited to the amount of unrealized gain on the contracts, if any, that is recognized in the Statement of Assets and Liabilities. Realized gains or losses arising from such transactions are included in net realized gain (or loss) from foreign currency-related transactions. Open contracts at December 31, 2004 are presented on the Schedule of Investments for the Non-U.S. and Core Bond Funds.

Forward commitments

The Funds may contract to purchase securities for a fixed price at a future date beyond customary settlement time (not to exceed 120 days) consistent with a Fund's ability to manage its investment portfolio and meet redemption requests. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated. The Funds may dispose of a forward commitment transaction prior to settlement if it is appropriate to do so and realize short-term gains (or losses) upon such sale. When effecting such transactions, cash or liquid high-grade debt obligations of the Fund in a dollar amount sufficient to make payment for the portfolio securities to be purchased will be segregated on the Fund's records at the trade date and maintained until the transaction is settled. A forward commitment transaction involves a risk of loss if the value of the security to be purchased declines prior to the settlement date or the other party to the transaction fails to complete the transaction.

Options

The Funds may purchase and sell (write) call and put options on securities and securities indices, provided such options are traded on a national securities exchange or in an over-the-counter market. The Funds may also purchase and sell call and put options on foreign currencies. The domestic equity Funds may utilize options to equitize liquidity reserve balances.

The Funds will not enter into any such transactions unless it owns (1) an offsetting ("covered") position in securities, currencies or other options, futures contracts or forward contracts or (2) cash or liquid assets with a value, marked to market daily, sufficient to cover their obligations to the extent not covered as provided in (1) above. The Funds will comply with SEC

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

guidelines regarding cover for these instruments and will, if the guidelines so require, designate the prescribed amount of cash or liquid assets as segregated.

When a Fund writes a covered call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of Assets and Liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. The Fund receives a premium on the sale of a call option but gives up the opportunity to profit from any increase in stock value above the exercise price of the option, and when the Fund writes a put option it is exposed to a decline in the price of the underlying security.

Whether an option which the Fund has written either expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund realizes a capital gain or loss from the sale of the underlying security, and the proceeds from such sale are increased by the premium originally received. When a put option which a Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Fund purchases upon exercise of the option. Realized gains (losses) on purchased options are included in net realized gain (loss) from investments.

The Funds' use of written options involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statement of Assets and Liabilities. The face or contract amounts of these instruments reflect the extent of the Funds' exposure to market risk. The risks may be caused by an imperfect correlation between movements in the price of the instrument and the price of the underlying securities and interest rates.

Future contracts

The Funds utilize futures contracts to equitize uninvested cash balances. The face or contract amounts of these instruments reflect the extent of the Funds' exposure to off balance sheet risk. The primary risks associated with the use of futures contracts are an imperfect correlation between the change in market value of the securities held by the Fund and the prices of futures contracts and the possibility of an illiquid market. Upon entering into a futures contract, the Funds are required to deposit with a broker an amount, termed the initial margin, which typically represents 5% of the purchase price indicated in the futures contract. Payments to and from the broker, known as variation margin, are required to be made on a daily basis as the price of the futures contract fluctuates. Changes in initial settlement value are accounted for as unrealized appreciation (depreciation) until the contracts are terminated, at which time realized gains and losses are recognized.

Swap agreements

The Funds may enter into swap agreements as an additional equitization vehicle for uninvested cash balances held by the Funds or to effect investment transactions consistent with the Funds' investment objectives and strategies. Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard swap transaction, the two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular investments or instruments. The returns to be exchanged between the parties are calculated with respect to a "notional amount" (i.e. a specified dollar amount that is hypothetically invested in a "basket" of securities representing a particular index). Amounts paid to and received from the swap counterparties representing capital appreciation and depreciation on the underlying securities and accrued interest expense and interest income are recorded as net realized gain (loss). The Fund is exposed to credit risk in the event of non-performance by the swap counterparties; however, the Fund does not anticipate non-performance by the counterparties.

Investment in international markets

Investing in international markets may involve special risks and considerations not typically associated with investing in the United States markets. These risks include revaluation of currencies, high rates of inflation, repatriation, restrictions on income and capital, and future adverse political and economic developments. Moreover, securities issued in these markets may be less liquid, subject to government ownership controls, delayed settlements, and their prices more volatile than those of comparable securities in the United States.

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

Guarantees

In the normal course of business the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds expect the risk of loss to be remote.

3. Investment Transactions

Securities

For the period ended December 31, 2004, purchases and sales of investment securities (excluding US Government and Agency obligations, short-term investments, options, futures and repurchase agreements) were as follows:

Funds	Purchases	Sales
Multi-Style Equity	\$ 375,875,295	\$ 357,961,743
Aggressive Equity	257,990,260	251,151,885
Non-U.S.	170,334,825	150,332,945
Real Estate Securities	174,949,773	139,062,847
Core Bond	103,607,858	85,976,250

Purchases and sales of US Government and Agency obligations (excluding short-term investments, options, futures and repurchase agreements) were as follows:

Fund	Purchases	Sales
Core Bond	\$ 152,258,590	\$ 142,653,504

Written Options Contracts

Fund transactions in written options for the period ended December 31, 2004 were as follows:

	Non-U.S.		Core Bond	
	Number of Contracts	Premiums Received	Number of Contracts	Premiums Received
Outstanding December 31, 2003	101	\$ 846,267	47	\$ 88,977
Opened	1,547	17,952,119	425	215,076
Closed	(1,543)	(17,910,215)	(39)	(31,348)
Expired	—	—	(311)	(230,020)
Outstanding December 31, 2004	<u>105</u>	<u>\$ 888,171</u>	<u>122</u>	<u>\$ 42,685</u>

Securities Lending

The Investment Company has a securities lending program whereby each Fund can loan securities with a value up to 33 $\frac{1}{3}$ % of its total assets to certain brokers. The Fund receives cash (US currency), US Government or US Government agency obligations as collateral against the loaned securities. To the extent that a loan is collateralized by cash, such collateral shall be invested by the securities lending agent, State Street Bank and Trust Company ("State Street"), in money market mutual funds and such other short-term investments, provided the investments meet certain quality and diversification requirements. The collateral received is recorded on the Fund's statement of assets and liabilities along with the related obligation to return the collateral.

Income generated from the investment of cash collateral, less negotiated rebate fees paid to participating brokers and transaction costs, is divided between the Fund and State Street and is recorded as income for the Fund. To the extent that a loan is secured by non-cash collateral, brokers pay the Fund negotiated lenders' fees, which are divided between the Fund and State Street and are recorded as securities lending income for the Fund. All collateral received will be in an amount at least equal to 102% (for loans of US securities) or 105% (for non-US securities) of the market value of the loaned securities at the inception of each loan. The market value of the loaned securities is determined at the close of business of the Funds and any additional required collateral is delivered to the Fund the next day. Should the borrower of the securities fail financially, there is a risk of delay in recovery of the securities or loss of rights in the collateral. Consequently, loans are made only to borrowers which are

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

deemed to be of good financial standing. As of December 31, 2004, the value of outstanding securities on loan and the value of collateral amounted to as follows:

Funds	Value of Securities on Loan	Value of Cash Collateral
Multi-Style Equity	\$ 869,103	\$ 889,250
Aggressive Equity	21,386,600	22,022,331
Non-U.S.	19,629,669	20,647,080
Real Estate Securities	2,935	2,925

As of December 31, 2004, there was no non-cash collateral received for the securities on loan.

4. Related Party Transactions, Fees and Expenses

Manager

FRIMCo advises and administers all of the Funds which comprise the Investment Company. FRIMCo is a wholly-owned subsidiary of Frank Russell Company, a wholly-owned subsidiary of The Northwestern Mutual Life Insurance Company. Frank Russell Company researches and recommends to FRIMCo, and to the Investment Company, one or more investment management organizations to manage the portfolio of each Fund.

The Funds are permitted to invest their cash reserves (i.e., monies awaiting investment in portfolio securities suitable for the Funds' objectives), and a portion of the collateral received from the Investment Company's securities lending program in the Frank Russell Investment Company Money Market Fund. As of December 31, 2004, \$80,681,000 of the Money Market Fund's net assets represents investments by the Funds.

For the period ended December 31, 2004, the management fee paid to FRIMCo, for the Funds listed below, in accordance with the Investment Company's Management Agreement with that firm, amounted to \$9,768,338 before waivers and/or reimbursements. Such fee is payable monthly and is equal to the annual rate, by Fund, shown in the following table, of the average daily net assets of the applicable Fund.

Funds	Annual Rate
Multi-Style Equity	0.78%
Aggressive Equity	0.95
Non-U.S.	0.95
Real Estate Securities	0.85
Core Bond	0.60

FRIMCo has contractually agreed to waive a portion of its management fee for each Fund, up to the full amount of its fee, to the extent the Fund's operating expenses exceed specified limits imposed by FRIMCo on an annual basis. Additionally, FRIMCo has contractually agreed to reimburse each Fund for all remaining expenses, after fee waivers, that still exceed their respective expense caps. There were no reimbursements for the period ended December 31, 2004.

FRIMCo does not have the ability to recover amounts waived or reimbursed from previous periods.

The expense caps and waivers were as follows:

Funds	Expense Cap	Manager Fees Waived
Multi-Style Equity	0.87%	\$ 42,289
Aggressive Equity	1.05	215,126
Non-U.S.	1.15	287,356
Real Estate Securities	1.10	—
Core Bond	0.70	52,142

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

Custodian

The Funds have entered into arrangements with their Custodian whereby custody credits realized as a result of uninvested cash balances were used to reduce a portion of the Funds' expenses. For the period ended December 31, 2004, the Funds' custodian fees were reduced by the following amounts under these arrangements:

Funds	Custody Credit Amount
Multi-Style Equity	\$ 400
Aggressive Equity	443
Non-U.S.	513
Real Estate Securities	541
Core Bond	2,685

FRIMCo waived a portion of its advisory fee for the following Funds to provide the benefit of brokerage commission rebates from a non-affiliated broker to these Funds in the following amounts:

Funds	Amount Paid
Multi-Style Equity	\$ 623
Aggressive Equity	859
Real Estate Securities	2,438

Analytic services

Fees for analytic services provided to the Funds are paid or accrued to Russell/Mellon Analytical Services, an affiliate of FRIMCo. Russell/Mellon Analytical Services provided TruVP System to the Funds. The TruVP System provides investment analytics. Effective June 1, 2004, the Funds discontinued paying Russell/Mellon Analytical Services for use of the TruVP System and FRIMCo has agreed to pay these fees going forward. Total fees for the Funds reported herein for the period ended December 31, 2004 were \$37,718.

Distributor

Russell Fund Distributors, Inc. (the "Distributor"), a wholly-owned subsidiary of FRIMCo, is the principal Distributor for Investment Company shares. The Distributor receives no compensation from the Investment Company for its services.

Brokerage commissions

The Funds may effect portfolio transactions through Frank Russell Securities, Inc., an affiliate of the Manager, when a money manager determines that the Fund will receive competitive execution, price and commissions. Amounts retained by Frank Russell Securities, Inc. for the period ended December 31, 2004 were as follows:

Funds	Amount
Multi-Style Equity	\$ 14,302
Aggressive Equity	6,927
Non-U.S.	17,451
Real Estate Securities	3,595

Additionally, the Funds paid brokerage commissions to non-affiliated brokers who provided brokerage and research services to the Manager.

Accrued fees payable to affiliates as of December 31, 2004 were as follows:

	Multi-Style Equity	Aggressive Equity	Non-U.S.	Real Estate Securities	Core Bond
Management fees	\$ 221,307	\$ 154,695	\$ 205,063	\$ 274,348	\$ 88,251
Transfer agent fees	1,612	583	1,084	1,963	678
	<u>\$ 222,919</u>	<u>\$ 155,278</u>	<u>\$ 206,147</u>	<u>\$ 276,311</u>	<u>\$ 88,929</u>

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

Board of Trustees

The Russell Fund Complex consists of Frank Russell Investment Company ("FRIC"), which has 34 funds, and Russell Investment Funds ("RIF"), which has five funds. Each of the trustees is a trustee of both FRIC and RIF. The Russell Fund Complex pays each of its Trustees not affiliated with FRIMCo a retainer of \$52,000 per year, \$5,000 for each regular quarterly meeting attended in person, \$2,000 for each special meeting attended in person, and \$2,000 for each Joint Audit Committee meeting or Nominating and Governance Committee or any other committee meeting established and approved by the Board that is attended in person. Each Trustee will receive a \$500 fee for attending the meetings (quarterly, special, committee) by phone instead of receiving the full fee had the member attended in person. Out of pocket expenses are also paid by the Russell Fund Complex. The Lead Trustee is paid a fee of \$10,000 per year. The Audit Committee chair is paid a fee of \$12,000 per year and the Nominating and Governance Committee chair is paid a fee of \$6,000 per year.

5. Federal Income Taxes

At December 31, 2004, the following Funds had net tax basis capital loss carryforwards which may be applied against any net realized taxable gains in each succeeding year or until their respective expiration dates, whichever occurs first. Available capital loss carryforwards and expiration dates are as follows:

Capital loss carryforward

	12/31/09	12/31/10	12/31/11	Totals
Multi-Style Equity	\$ 32,384,952	\$ 42,288,325	\$ 3,302,725	\$ 77,976,002
Non-U.S.	12,093,749	25,579,757	5,528,524	43,202,030

At December 31, 2004, the cost of investments, net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

	Multi-Style Equity	Aggressive Equity	Non-U.S.	Real Estate Securities	Core Bond
Cost of Investments	\$ 291,827,512	\$ 185,511,622	\$ 229,052,059	\$ 267,557,473	\$ 208,857,846
Unrealized Appreciation	44,516,644	34,009,828	51,114,258	118,624,275	3,550,284
Unrealized Depreciation	(3,006,257)	(1,699,635)	(1,875,083)	(82,391)	(676,823)
Net Unrealized Appreciation (Depreciation)	\$ 41,510,387	\$ 32,310,193	\$ 49,239,175	\$ 118,541,884	\$ 2,873,461
Undistributed Ordinary Income	\$ 1,321,016	\$ —	\$ 2,235,713	\$ 1,663,422	\$ 1,358,318
Undistributed Long-Term Gains (Capital Loss Carryforward)	(77,976,002)	5,956,305	(43,202,030)	4,869,229	667,820
Tax Composition of Distributions					
Ordinary Income	\$ 2,310,844	\$ 292,847	\$ 4,649,250	\$ 8,052,521	\$ 5,842,093
Long Term Capital Gains	\$ —	\$ 6,583,523	\$ —	\$ 19,794,147	\$ 1,174,404

As permitted by tax regulations, the Core Bond Fund intends to defer a net realized capital loss of \$39,714 incurred from November 1, 2004 to December 31, 2004.

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

6. Fund Share Transactions (amounts in thousands)

7. Beneficial Interest

As of December 31, 2004, the following table includes shareholders with shares of beneficial interest greater than 10% of the total outstanding shares of each respective Fund. Northwestern Mutual Life Insurance Company was the largest client in each Fund.

Funds	# of Shareholders	%
Multi-Style Equity	3	85.8
Aggressive Equity	3	84.0
Non-U.S.	3	87.8
Real Estate Securities	3	88.5
Core Bond	3	91.9

Russell Investment Funds

Notes to Financial Statements, continued — December 31, 2004

8. Illiquid or Restricted Securities

A Fund may invest a portion of its net assets not to exceed 15% in securities that are illiquid. Illiquid securities are securities that may not be readily marketable, and that cannot be sold within seven days in the ordinary course of business at the approximate amount at which the Fund has valued the securities. Illiquid and restricted securities may be priced by the Funds using fair value procedures approved by the Board of Trustees. Restricted securities are subject to contractual limitations on resale, are often issued in private placement transactions, and are not registered under the Securities Act of 1933 (the "Act"). The most common types of restricted securities are those sold under Rule 144A of the Act and commercial paper sold under Section 4(2) of the Act. Such restricted securities are not subject to the 15% limitation if the Adviser, under supervision of the Board of Trustees, determines that a liquid trading market exists. Information concerning illiquid and restricted securities held by the Funds is as follows:

Pursuant to guidelines established by the Board of Trustees, the Adviser has determined that a liquid trading market exists for the following restricted securities held as of December 31, 2004:

Restricted Securities (144A)

Fund - % of Net Assets Securities	Acquisition Date	Principal Amount (\$) or Shares	Cost per Unit \$	Cost (000) \$	Market Value (000) \$

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders
of Russell Investment Funds:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Multi-Style Equity Fund, Aggressive Equity Fund, Non-U.S. Fund, Core Bond Fund, and Real Estate Securities Fund (constituting the Russell Investment Funds, hereafter referred to as the "Funds") at December 31, 2004, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Funds' management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2004 by correspondence with the custodian, brokers and transfer agent, provide a reasonable basis for our opinion.

(1) Division commenced operations on July 31, 2001.

(2) Division commenced operations on May 1, 2003.

(3) Year ended 12/31/03 unit value ranges revised from previous annual report.

(4) Year ended 12/31/01 revised from previous reports.

(5) Total Return includes deductions for management and other expenses; excludes deductions for sales loads and other charges. Returns are not annualized for periods less than one year.

The Accompanying Notes are an Integral Part of the Financial Statements

Notes to Financial Statements

NML Variable Annuity Account A

December 31, 2004

Note 1 — NML Variable Annuity Account A (the "Account") is a segregated asset account of The Northwestern Mutual Life Insurance Company ("Northwestern Mutual") used to fund variable annuity contracts ("contracts") for HR-10 and corporate pension and profit-sharing plans which qualify for special tax treatment under the Internal Revenue Code. Currently, two versions of the contract are offered: Front Load contracts with a sales charge up to 4.5% of purchase payments and Back Load contracts with a withdrawal charge of 0-6%.

Note 2 — The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Principal accounting policies are summarized below.

Note 3 — All assets of each Division of the Account are invested in shares of the corresponding Portfolio of Northwestern Mutual Series Fund, Inc., Fidelity Variable Insurance Products Fund III and the Russell Investment Funds (collectively known as "the Funds"). The shares are valued at the Funds' offering and redemption prices per share. The Funds are open-end investment companies registered under the Investment Company Act of 1940.

Note 4 — Annuity reserves are based on published annuity tables with age adjustment and benefit payments which reflect actual investment experience. For variable payment plans issued prior to January 1, 1974, annuity reserves are based on the 1955 American Annuity Table with assumed interest rates of 3% or 5%. For variable payment plans issued on or after January 1, 1974 and before January 1, 1985, annuity reserves are based on the 1971 Individual Annuity Mortality Table with assumed interest rates of 3.5% or 5%. For variable payment plans issued on or after January 1, 1985 and before January 1, 2002, annuity reserves are based on the 1983 Annuity Table a, adjusted with assumed interest rates of 3.5% or 5%. For variable payment plans issued on or after January 1, 2002, annuity reserves are based on the 2000 Annuity Table with assumed interest rates of 3.5% or 5%.

Note 5 — Dividend income and distributions of net realized gains from the Funds are recorded on the ex-date of the dividends. Transactions in the Funds' shares are accounted for on the trade date. The basis for determining cost on sale of the Funds' shares is identified cost. Purchases and sales of

the Funds' shares for the year ended December 31, 2004 by each Division are shown as follows: (*in thousands*)

Russell Real Estate Securities	4,610	1,225

Note 6 — A deduction for annuity rate and expense guarantees is determined daily and paid to Northwestern Mutual as compensation for assuming the risk that annuity payments will continue for longer periods than anticipated because the annuitants as a group live longer than expected, and the risk that the charges made by Northwestern Mutual may be insufficient to cover the actual costs incurred in connection with the contracts.

For contracts issued prior to December 17, 1981, the deduction is at an annual rate of 0.75% of the net assets of each Division attributable to these contracts. For these contracts, the rate may be increased or decreased by the Board of Trustees of Northwestern Mutual not to exceed a 1% annual rate.

For contracts issued after December 16, 1981 and prior to March 31, 1995, the deduction is at an annual rate of 1.25% of the net assets of each Division attributable to these contracts. For these contracts, the rate may be increased or decreased by the Board of Trustees of Northwestern Mutual not to exceed a 1.5% annual rate.

For contracts issued on or after March 31, 1995 and prior to March 31, 2000, for the Front Load version and the Back Load version, the deduction for annuity rate and expense guarantees is determined daily at annual rates of .4% and 1.25%, respectively, of the net assets of each Division

Notes to Financial Statements

attributable to these contracts and is paid to Northwestern Mutual. For these contracts, the rates may be increased or decreased by the Board of Trustees of Northwestern Mutual not to exceed 0.75% and 1.5%, respectively.

For contracts issued on or after March 31, 2000, for the Front Load version and the Back Load version, the deduction for annuity rate and expense guarantees is determined daily at annual rates of 0.5% and 1.25%, respectively, of the net assets of each Division attributable to these contracts and is paid to Northwestern Mutual. For these contracts, the rates may be increased or decreased by the Board of Trustees of Northwestern Mutual not to exceed 0.75% and 1.5% annual rate, respectively. The current charges will not be increased for five years from the date of the most recent Prospectus.

Since 1995, Northwestern Mutual has paid a dividend to certain contracts. The dividend is reinvested in the Account and has been reflected as a Contract Owners' Net Payment in the accompanying financial statements.

Note 7 — Northwestern Mutual is taxed as a "life insurance company" under the Internal Revenue Code and the operations of the Account form a part of and are taxed with those of Northwestern Mutual. Under current law, no federal income taxes are payable with respect to the Account. Accordingly, no provision for any such liability has been made.

To The Northwestern Mutual Life Insurance Company and
Contract Owners of NML Variable Annuity Account A

In our opinion, the accompanying statement of assets and liabilities, the related statements of operations, and of changes in equity and the financial highlights present fairly, in all material respects, the financial position of the NML Variable Annuity Account A and its Small Cap Growth Stock Division, T. Rowe Price Small Cap Value Division, Aggressive Growth Stock Division, International Growth Division, Franklin Templeton International Equity Division, AllianceBernstein Mid Cap Value Division, Index 400 Stock Division, Janus Capital Appreciation Division, Growth Stock Division, Large Cap Core Stock Division, Capital Guardian Domestic Equity Division, T. Rowe Price Equity Income Division, Index 500 Stock Division, Asset Allocation Division, Balanced Division, High Yield Bond Division, Select Bond Division, Money Market Division, Fidelity VIP Mid Cap Division, Russell Multi-Style Equity Division, Russell Aggressive Equity Division, Russell Non-U.S. Division, Russell Core Bond Division, and Russell Real Estate Securities Division at December 31, 2004, and the results of each of their operations, the changes in each of their equity and their financial highlights for the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of The Northwestern Mutual Life Insurance Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included direct confirmation of securities owned at December 31, 2004 with Northwestern Mutual Series Fund, Inc., Fidelity VIP Mid Cap Portfolio and the Russell Investment Funds, provide a reasonable basis for our opinion.

A handwritten signature in black ink, which appears to read "PricewaterhouseCoopers" followed by a stylized monogram or initials.

Milwaukee, Wisconsin
