4. Subordination

Overcollateralization Amount:

The Overcollateralization Amount with respect to any Payment Date is the excess, if any, of (i) the aggregate principal balance of the Mortgage Loans over (ii) the sum of the aggregate Note Balance of the Offered Notes, after taking into account the payments of principal to be made on such Payment Date.

Overcollateralization Target Amount:

With respect to any Payment Date, (i) prior to the Stepdown Date, an amount equal to approximately 3.60% of the aggregate principal balance of the Mortgage Loans as of the Cut-off Date, (ii) on or after the Stepdown Date provided a Trigger Event is not in effect, the greater of (x) 7.20% of the then current aggregate outstanding principal balance of the Mortgage Loans as of the last day of the related Due Period and (y) approximately $10,401,150 or (iii) on or after the Stepdown Date and if a Trigger Event is in effect, the Overcollateralization Target Amount for the immediately preceding Payment Date. The Overcollateralization Target Amount for the Offered Notes will be fully funded on the Closing Date.

Stepdown Date:

The earlier of (i) the first Payment Date on which the aggregate Note Balance of the Class A Notes has been reduced to zero and (ii) the later to occur of (x) the Payment Date occurring in September 2008 and (y) the first Payment Date on which the Credit Enhancement Percentage for the Class A Notes (calculated for this purpose only after taking into account payments of principal on the Mortgage Loans, but prior to any payment of the Group I Principal Payment Amount and the Group II Principal Payment Amount to the holders of the Notes then entitled to payments of principal on such Payment Date) is greater than or equal to approximately 45.80%.

Credit Enhancement Percentage:

The Credit Enhancement Percentage for any class of Offered Notes for any Payment Date is the percentage obtained by dividing (x) the aggregate Note Balance of the class or classes subordinate thereto and the Overcollateralization Amount by (y) the aggregate principal balance of the Mortgage Loans, calculated after taking into account payments of principal on the Mortgage Loans and payment of the Group I Principal Payment Amount and the Group II Principal Payment Amount to the holders of the Notes then entitled to payments of principal on such Payment Date.

A Trigger Event will have occurred with respect to any Payment Date on or after the Stepdown Date if (x) the Rolling Three Month Delinquency Rate as of the last day of the immediately preceding calendar month exceeds [42%] of the Credit Enhancement Percentage for the Class A Notes, or if (y) the aggregate amount of realized losses incurred since the Cut-off Date through the last day of the related Due Period divided by the aggregate principal balance of the Mortgage Loans as of the Cut-off Date exceeds the applicable percentages set forth below with respect to such Payment Date:

Payment Date Occurring in	**Percentage**
September 2007 through August 2008	[1.45%] for the first month, plus an additional 1/12th of [1.80%] for each month thereafter

For any calendar month, a fraction, expressed as a percentage, the numerator of which is the aggregate principal balance of all Mortgage Loans 60 or more days delinquent (including all foreclosures, loans subject to bankruptcy proceedings, and REO Properties) as of the close of business on the last day of such month, and the denominator of which is the aggregate principal balance of the Mortgage Loans as of the close of business on the last day of such month.

Rolling Three Month Delinquency Rate:

With respect to any Payment Date, the average of the Delinquency Rates for each of the three (or one and two, in the case of the first and second Payment Dates) immediately preceding calendar months.

Generally, any realized losses on the Mortgage Loans will be absorbed first, by the Excess Spread, second, by Prepayment Penalties, and third, by the Overcollateralization Amount and fourth, by the Class M Notes in reverse numerical order.

Interest Payment Priority:

On each Payment Date, the Interest Remittance Amount will be paid in the following order of priority:

(i) from the Group I Interest Remittance Amount, to the holders of each class of Group I Notes the Senior Interest Payment Amount allocable to such Notes; from the Group II Interest Remittance Amount, to the holders of each class of Group II Notes, on a pro rata basis based on the entitlement of each such class, the Senior Interest Payment Amount allocable to such Notes. Expense Adjusted Mortgage Rate: The applicable mortgage rate on each Mortgage Loan as of the first day of the related Due Period minus the Administrative Fees.

Available Funds Cap: The Available Funds Cap for any Payment Date and:

(i) the Group I Notes is a rate per annum (adjusted for the actual number of days in the related Interest Accrual Period) equal to the weighted average of the Expense Adjusted Mortgage Rates on the then outstanding Group I Mortgage Loans multiplied by a fraction the numerator of which is the aggregate principal balance of the Group I Mortgage Loans and Group II Mortgage Loans as of the last day of the prior Due Period and the denominator of which is the aggregate Note Balance of the Class A Notes and Class M Notes immediately prior to such payment date;

(ii) the Group II Notes is a rate per annum (adjusted for the actual number of days in the related Interest Accrual Period) equal to the weighted average of the Expense Adjusted Mortgage Rates on the then outstanding Group II Mortgage Loans multiplied by a fraction the numerator of which is the aggregate principal balance of the Group I Mortgage Loans and Group II Mortgage Loans as of the last day of the prior Due Period and the denominator of which is the aggregate Note Balance of the Class A Notes and Class M Notes immediately prior to such payment date; and

(iii) the Class M Notes is a rate per annum (adjusted for the actual number of days in the related Interest Accrual Period) equal to the product of (i) the weighted average of the Expense Adjusted Mortgage Rates on the then outstanding Group I Mortgage Loans and Group II Mortgage Loans, less the sum of (x) the weighted average Note Rate for the Group I Notes for such payment date multiplied by a fraction, the numerator of which is the Note Balance of the Group I Notes immediately prior to such payment date and the denominator of which is the principal balance of the Group I Mortgage Loans and the Group II Mortgage Loans as of the last day of the prior Due Period and (y) the weighted average Note Rate for the Group II Class A Notes for such payment date multiplied by a fraction, the numerator of which is the aggregate Note Balance of the Group II Notes immediately prior to such payment date and the denominator of which is the principal balance of the Group I Mortgage Loans and the Group II Mortgage Loans as of the last day of the prior Due Period, and (ii) a fraction the numerator of which is the aggregate principal balance of the Group I Mortgage Loans and Group II Mortgage Loans as of the last day of the prior Due Period and the denominator of which is the aggregate Note Balance of the Class M Notes immediately prior to such payment date.

Note Rate: The Note Rate on any Payment Date for each class of Offered Notes will equal the least of:

(a) One-Month LIBOR plus related margin;
(b) The related Available Funds Cap; and
(c) 12.50%;

Interest Carry Forward Amount: For each class of Offered Notes, and on any Payment Date, the sum of (i) the excess of (A) the accrued Note Interest for such Class with respect to the prior Payment Date (excluding any Basis Risk Carryover Amount with respect to such class), plus any unpaid Interest Carry Forward Amount from the prior Payment Date, over (B) the amount actually paid to such class with respect to interest on such prior Payment Date and (ii) interest on such excess at the Note Rate for such class.

The information herein has been prepared solely for informational purposes and is not an offer to buy or sell or a solicitation of an offer to buy or sell any security or instrument or to participate in any trading strategy. No representation or warranty can be given with respect to the accuracy or completeness of the information herein, or that any future offer of securities, instruments or transactions will conform to the terms hereof. Please refer to the important information and qualifications on the second page hereof when reviewing this information.

Interest Payment Amount: The Interest Payment Amount for the Offered Notes of any class on any Payment Date is equal to interest accrued at the Note Rate for that class during the related Interest Accrual Period on the Note Balance of that class immediately prior to the Payment Date.

Senior Interest Payment Amount: The Senior Interest Payment Amount for any Payment Date is equal to the Interest Payment Amount for such Payment Date for the related Class A Notes and the Interest Carry Forward Amount, if any, for that Payment Date for the related Class A Notes.

Basis Risk Carryover Amount: The Basis Risk Carryover Amount for any Payment Date and any class of Offered Notes is the excess of (i) the amount of interest such class would have accrued for such Payment Date had the applicable Note Rate not been subject to the Available Funds Cap, over (ii) the amount of interest such class of Notes accrued for such Payment Date based on the Available Funds Cap, together with the unpaid portion of any such amounts from the prior Payment Date (and accrued interest thereon at the then applicable Note Rate, without giving effect to the Available Funds Cap). The ratings on each Class of Notes do not address the likelihood of the payment of any Basis Risk Carryover Amount.

Basis Risk Shortfall: Because each Mortgage Loan has a mortgage rate that is either fixed or adjustable, and most of the adjustable-rate Mortgage Loans will adjust based on six-month LIBOR after an initial period of two, three, or five years following the date of origination, and the Note Rates on the Offered Notes are based on one-month LIBOR, the application of the Available Funds Cap could result in shortfalls of interest otherwise payable on those Notes in certain periods. This may also occur if six-month LIBOR and one-month LIBOR rise quickly since the Mortgage Loan adjustments are constrained by certain interim caps. If basis risk interest shortfalls occur, they will be carried forward and will be paid from Net Monthly Excess Cashflow on a subordinated basis on the same Payment Date or in any subsequent period.

To mitigate the effect of such basis risk shortfalls, the Offered Notes will benefit from three interest rate caps pledged to the Indenture Trustee. The notional schedules for the interest rate caps are available below.

Step-up Coupon: If the Optional Redemption is not exercised on the first Payment Date following the Stepdown Date on which it could have been exercised, the margins on each of the Class A Notes will increase to 2.0 times their related initial margin and the margins on each of the Class M Notes will increase to 1.5 times their related initial margins.
