Table with multiple columns containing numerical data and text descriptions. The table is highly structured and contains a large volume of data points.

Table with columns: ID, Amount, Date, Description, Status, and other fields. The table contains a large number of rows, each representing a transaction or record.

Table with 100 columns and 1000 rows. Columns 1-30 contain numerical values, column 31 contains text labels, and column 100 contains a final numerical value. The table contains a wide range of data points across these categories.

Table with 100 columns and 1000 rows. Columns 1-30 contain numerical values, column 31 contains text labels, and column 100 contains a final numerical value. This table appears to be a continuation or a related dataset to the one above.

Table with multiple columns: ID, Name, Date, Amount, Category, Status, etc. The table contains thousands of rows of data, organized in a structured grid format.

Table with columns: ID, Amount, Date, Description, and Category. The table contains a large number of rows, each representing a financial transaction or account entry. The columns are densely packed with data, including numerical values and alphanumeric codes.
