Dear Fellow Shareholder:

We are pleased to present ASB Financial Corp.'s Annual Report to Shareholders covering the fiscal year ended June 30, 2005.

Net earnings for the fiscal year ended June 30, 2005, totaled a record \$2.155 million, representing diluted earnings per share of \$1.27, an increase of \$145,000, or 7.2% from the \$2.010 million, or \$1.18 per diluted share in net earnings recorded for the fiscal year ended June 30, 2004. By June 30, 2005, total assets had also climbed to a record \$184.5 million, reflecting an increase of \$18.4 million, or 11.1% over June 30, 2004. Similarly, deposits increased by \$6.5 million, or 4.8%, during the fiscal year, reaching the unprecedented level of \$143.3 million at June 30, 2005.

Our Waverly branch has proven to be a significant source of growth for residential and commercial loan products, as well as deposits. We expect to see continued growth in that market in the future. Such success has led to further expansion of our geographic footprint.

We have purchased property in Wheelersburg and are currently constructing a new branch which is expected to be open within the next 60 days. We have received very favorable feedback from residents and merchants in that area and expect to see additional growth coming from our financial product offerings in that community.

During this past year, the Board and management of your Corporation determined that the costs associated with ASB Financial being an SEC-reporting company were no longer justified by the benefits. Obviously, based on the outcome of the vote, you as shareholders agreed with us. On July, 8, 2005, your Corporation conducted a reverse stock split to reduce the number of shareholders, which enabled us to terminate our registration with the Securities and Exchange Commission. This move is expected to provide substantial cost savings over the next few years.

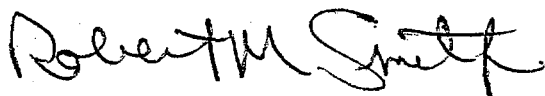

The reverse-split and deregistration removed ASB Financial Corp.'s stock from listing on NASDAQ. However, the shares can still be traded through a private market maker, Community Banc Investments, Inc. or via "Pink Sheets", which is the electronic quotation and trading system for "over the counter" securities. We have noticed no impediments thus far in trading our stock, and we believe this transaction enables our remaining shareholders to further enhance their participation in our Corporation's long-term success.

Your Board of Directors and management team remain committed to the communities we serve and to achieving growth and increasing shareholder returns in the years ahead.

Thank you for your continued support of ASB Financial Corp.

Very truly yours,

ASB FINANCIAL CORP.

BUSINESS OF ASB FINANCIAL CORP.

ASB Financial Corp. ("ASB" or the "Corporation"), a unitary savings and loan holding company incorporated under the laws of the State of Ohio, owns all of the outstanding common shares of American Savings Bank, fsb ("American" or the "Savings Bank"), a federal savings bank. Other than investing excess funds, ASB's activities have been limited primarily to holding the common shares of American.

Serving the Southern Ohio area since 1892, American conducts business from its main office at 503 Chillicothe Street in Portsmouth, Ohio and a drive-up/walk-up facility at 907 Chillicothe Street. American also has a branch office at 951 W. Emmitt Avenue in Waverly, Ohio and a new office under construction at 7920 Ohio River Road in Wheelersburg, Ohio. The principal business of American is the origination of loans secured by one- to four-family residential real estate located in American's primary market area, which consists of Scioto County and Pike County, Ohio. American also originates loans secured by multifamily residences (over four units) and nonresidential real estate and purchases interests in loans originated by other lenders secured by multifamily real estate and nonresidential real estate located outside of American's primary market area. In addition to real estate lending, American invests in mortgage-backed securities, U.S. Government and agency obligations and other investments. Funds for lending and other investment activities are obtained primarily from deposits, which are insured up to applicable limits by the Federal Deposit Insurance Corporation (the "FDIC"), and from borrowings from the Federal Home Loan Bank (the "FHLB") of Cincinnati.

ASB is subject to regulation, supervision and examination by the Office of Thrift Supervision of the United States Department of the Treasury (the "OTS"). American is subject to regulation, supervision and examination by the OTS and the FDIC. American is also a member of the FHLB of Cincinnati.

ASB's office is located at 503 Chillicothe Street, Portsmouth, Ohio 45662 and its telephone number is (740) 354-3177.

**MARKET PRICE OF ASB'S
COMMON SHARES AND RELATED SHAREHOLDER MATTERS**

There were 1,589,684 common shares of ASB outstanding on September 6, 2005, held of record by approximately 200 shareholders. Price information for ASB's common shares is quoted on "Pink Sheets," the electronic quotation system for OTC securities, under the symbol "ASBN."

The table below sets forth the high and low closing prices for the common shares of ASB, as quoted by Nasdaq, together with dividends declared per share, for each quarter of fiscal years ended June 30, 2005 and 2004.

Quarter ended	High close	Low close	Cash dividends declared
Fiscal 2005			
September 30, 2004	\$24.51	\$21.88	\$0.15
December 31, 2004	\$22.98	\$20.50	\$0.15
March 31, 2005	\$23.00	\$19.89	\$0.15
June 30, 2005	\$23.00	\$21.90	\$0.16
Fiscal 2004			
September 30, 2003	\$24.96	\$17.27	\$0.14

March 31, 2004	\$27.75	\$23.11	\$0.14
June 30, 2004	\$29.24	\$22.00	\$0.15

ASB's income on an unconsolidated basis consists of interest and dividends on investment and mortgage-backed and related securities and dividends periodically paid by American on the common shares held by ASB. In addition to certain federal income tax considerations, OTS regulations impose limitations on the payment of dividends and other capital distributions by savings associations.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

ASB was incorporated for the purpose of owning the outstanding common shares of American. As a result, the discussion and analysis that follows focuses primarily on the financial condition and results of operations of American. The following discussion and analysis of the consolidated financial condition and results of operations of ASB and American should be read in conjunction with, and with reference to, the Consolidated Financial Statements and the Notes thereto presented in this Annual Report.

Forward-Looking Statements are Subject to Change

Certain statements contained in this report that are not historical facts are forward looking statements that are subject to certain risks and uncertainties. When used herein, the terms "anticipates," "plans," "expects," "believes," and similar expressions as they relate to ASB or its management are intended to identify such forward looking statements. ASB's actual results, performance or achievements may materially differ from those expressed or implied in the forward-looking statements. Risks and uncertainties that could cause or contribute to such material differences include, but are not limited to, general economic conditions, interest rate environment, competitive conditions in the financial services industry, changes in law, governmental policies and regulations, and rapidly changing technology affecting financial services.

Critical Accounting Policies

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to use judgments in making estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. The following critical accounting policy is based upon judgments and assumptions by management that includes inherent risks and uncertainties.

The allowance for loan losses is an accounting estimate of probable but unconfirmed asset impairment that has occurred in the Corporation's loan portfolio as of the date of the consolidated financial statements before losses have been confirmed via a recorded charge-off or write-down. It is the Corporation's policy to provide valuation allowances for estimated losses on loans based upon past loss experience, adjusted for changes in trends and conditions of certain items, including:

- Local market areas and national economic developments;
- Levels of and trends in delinquencies and impaired loans;
- Levels of and trends in recoveries of prior charge-offs;
- Adverse situations that may affect specific borrowers' ability to repay;
- Effects of any changes in lending policies and procedures;
- Credit concentrations;
- Volume and terms of loans; and
- Current collateral values, where appropriate.

When the collection of a loan becomes doubtful, or otherwise troubled, the Corporation records a loan loss provision equal to the difference between the fair value of the property securing the loan and the loan's carrying value. Major loans and major lending areas are reviewed periodically to determine potential problems at an early date. The allowance for loan losses is increased by charges to earnings and decreased by charge-offs (net of recoveries).

The Corporation accounts for its allowance for losses on loans in accordance with Statement of Financial Accounting Standards ("SFAS") No. 5, "Accounting for Contingencies," and SFAS No. 114, "Accounting by Creditors for Impairment of a Loan." Both Statements require the Corporation to evaluate the collectibility of both contractual interest and principal loan payments. SFAS No. 5 requires the accrual of a loss when it is probable that a loan has been impaired and the amount of the loss can be reasonably estimated. SFAS No. 114 requires that impaired loans be measured based upon the present value of expected future cash flows discounted at the loan's effective interest rate or, as an alternative, at the loan's observable market price or fair value of the collateral.

A loan is impaired under SFAS No. 114 when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. In applying the provisions of SFAS No. 114, the Corporation considers its investment in one- to four-family residential loans and consumer loans to be homogeneous and therefore excluded from separate identification for evaluation of impairment. These homogeneous loan groups are evaluated for impairment in accordance with SFAS No. 5. With respect to nonresidential real estate and other loans, management believes such loans are adequately collateralized and as a result impaired loans are carried at the lower of cost or fair value.

It is the Corporation's policy to charge off unsecured credits that are more than ninety days delinquent. Similarly, once a collateral dependent loan becomes more than ninety days delinquent, it is considered to constitute more than a minimum delay in repayment and is evaluated for impairment under SFAS No. 114 at that time.

CHANGES IN FINANCIAL CONDITION FROM JUNE 30, 2004 TO JUNE 30, 2005

ASB's total assets amounted to \$184.8 million at June 30, 2005, an increase of \$18.4 million, or 11.1%, over 2004 levels. The increase in assets was comprised primarily of a \$16.3 million increase in loans, which was partially offset by decreases of \$2.2 million in mortgage-backed securities, and \$3.4 million in investment securities. The increase in assets was funded by increased deposits of \$6.5 million, increases in advances from the Federal Home Loan Bank of \$9.4 million and growth of \$1.8 million in shareholders' equity.

Cash and interest-bearing deposits totaled \$11.8 million at June 30, 2005, a increase of \$4.4 million, or 59.7%, from 2004 levels. Investment securities totaled \$9.0 million at June 30, 2005, a decrease of \$3.4 million, or 27.6%, compared to the balance at June 30, 2004. Mortgage-backed securities totaled \$9.6 million at June 30, 2005, a decrease of \$2.2 million, or 18.8%, year to year. During fiscal 2005, purchases of investment and mortgage-backed securities totaling \$3.7 million were more than offset by maturities, redemption, premium amortization and principal repayments of securities totaling \$9.6 million, and a reduction in the market value of investment and mortgage-backed securities of \$250,000.

Loans receivable increased by \$16.3 million, or 12.6%, to a total of \$146.1 million at June 30, 2005, compared to \$129.8 million at June 30, 2004. Loan disbursements of \$48.4 million exceeded principal repayments of \$32.0 million during fiscal 2005. The volume of loan disbursements in fiscal 2005 lagged that of fiscal 2004 by \$3.5 million, or 6.7%. Growth in loans secured by residential real estate, including construction loans, totaled \$9.0 million, or 9.4%, growth in loans secured by nonresidential real estate totaled \$5.6 million, or 29.8%, and the consumer loan portfolio decreased by \$2.8 million, or 12.9%, year to year.

At June 30, 2005, American's allowance for loan losses was \$1.3 million, representing .83% of total loans and 170.8% of nonperforming loans. At June 30, 2004, American's allowance for loan losses was \$1.0 million, representing .73% of total loans and 99.9% of nonperforming loans. Nonperforming loans totaled \$743,000 and \$1.0 million at June 30, 2005 and 2004, respectively. At June 30, 2005, nonperforming loans were comprised of \$565,000 of loans secured by one- to four-family residential real estate and \$178,000 of loans

secured by nonresidential property. The allowance for loan loss is determined as set forth under the aforementioned "Critical Accounting Policies" above. To the best of management's knowledge, all known losses as of June 30, 2005, have been recorded.

Deposits increased by \$6.5 million, or 4.8%, to a total of \$143.3 million at June 30, 2005. The increase in deposits consisted primarily of increases of \$7.3 million in certificates of deposit and \$1.7 in NOW accounts, which were partially offset by a decrease of \$2.6 million in money market deposit accounts. Growth in deposits was generally used to fund new loan originations.

Shareholders' equity totaled \$19.2 million at June 30, 2005, an increase of \$1.8 million, or 10.2%, over June 30, 2004 levels. The increase resulted primarily from net earnings of \$2.2 million, proceeds from stock option exercises of \$601,000, a \$165,000 increase in unrealized gains on available for sale securities and the effects of \$120,000 of amortization related to stock benefit plans, which were partially offset by dividends declared of \$1.0 million and treasury stock purchases of \$245,000. During fiscal 2005, the Corporation paid quarterly dividends totaling \$.61 per share.

COMPARISON OF OPERATING RESULTS FOR THE YEARS ENDED JUNE 30, 2005 AND 2004

General. Net earnings were \$2.2 million for the fiscal year ended June 30, 2005, an increase of \$145,000, or 7.2%, from fiscal 2004. The increase in earnings resulted primarily from increases of \$671,000 in other income and \$171,000 in net interest income, which were partially offset by increases of \$202,000 in the provision for losses on loans, \$353,000 in general, administrative and other expenses and \$142,000 in the provision for federal income taxes.

Net Interest Income. Total interest income was \$9.6 million for the fiscal year ended June 30, 2005, an increase of \$617,000, or 6.9%, from fiscal 2004. Interest income on loans totaled \$8.7 million in fiscal 2005, an increase of \$614,000, or 7.6%. This increase was due primarily to a \$15.2 million, or 12.2%, increase in the weighted-average balance of loans outstanding, partially offset by a 27 basis point decrease in the average yield, to 6.25% for the fiscal year ended June 30, 2005. Interest income on mortgage-backed securities increased by \$202,000, or 101.0 %, as a result of a 195 basis point increase in the average yield, which was partially offset by a \$611,000, or 5.3%, decrease in the weighted-average balance outstanding year to year. Interest income on investment securities and interest-bearing deposits decreased by \$199,000, or 30.5%, due primarily to an \$2.0 million, or 11.1%, decrease in the weighted average balance outstanding year to year and an 79 basis point decrease in the average yield, to 2.84% for fiscal 2005.

Interest expense totaled \$3.5 million for the fiscal year ended June 30, 2005, an increase of \$446,000, or 14.6%, from the \$3.1 million total recorded in fiscal 2004. Interest expense on deposits increased by \$147,000, or 5.1%, due primarily to a 2 basis point increase in the weighted-average cost of deposits, to 2.16% for fiscal 2005, coupled with a \$5.6 million, or 4.2%, increase in the weighted-average balance outstanding year to year. Interest expense on borrowings increased by \$299,000, or 158.2%, due primarily to a \$6.8 million, or 80.0%, increase in the weighted-average balance outstanding year to year and a 98 basis point increase in the average cost of borrowings, to 3.21% in fiscal 2005. Increases in the average yields on interest-earning assets and the average costs of interest-bearing liabilities were due primarily to the overall increase in interest rates in the economy.

As a result of the foregoing changes in interest income and interest expense, net interest income increased by \$171,000, or 2.9%, to a total of \$6.1 million for the fiscal year ended June 30, 2005, compared to \$5.9 million in fiscal 2004. The interest rate spread decreased by 19 basis points to 3.49% in fiscal 2005 from 3.68% in fiscal 2004, and the net interest margin decreased by 19 basis points to 3.65% in fiscal 2005 from 3.84% in fiscal 2004.

Provision for Losses on Loans. American charges a provision for losses on loans to earnings to bring the total allowance for loan losses to a level considered appropriate by management based on historical experience, the volume and type of lending conducted by American, the status of past due principal and interest payments, general economic conditions, particularly as such conditions relate to American's market area, and other factors related to the collectibility of American's loan portfolio. As a result of such analysis, management recorded a \$313,000 provision for losses on loans during the fiscal year ended June 30, 2005, an increase of \$202,000, or 182.0%, from fiscal 2004. The increase in the provision in fiscal 2005 is based upon management's analysis of the loan portfolio including nonperforming assets, as outlined in the "Critical Accounting Policies." There can be no assurance that the loan loss allowance will be adequate to absorb losses on known nonperforming assets or that the allowance will be adequate to cover losses on nonperforming assets in the future.

Other Income. Other income totaled \$1.4 million for the fiscal year ended June 30, 2005, an increase of \$671,000, or 95.2%, from the \$705,000 recorded in fiscal 2004. The increase resulted from a \$590,000 gain on redemption of investment securities and a \$179,000 increase in other operating income, which were partially offset by the absence of a \$58,000 gain on sale of office premises. The increase in other operating income was comprised primarily of increases in fees on loans and deposits transactions and earnings from bank owned life insurance.

General, Administrative and Other Expense. General, administrative and other expense totaled \$4.1 million for the fiscal year ended June 30, 2005, an increase of \$353,000, or 9.4%, over the total recorded in fiscal 2004. The increase resulted primarily from increases of \$302,000, or 15.0%, in employee compensation and benefits, \$29,000, or 6.7%, in data processing costs, \$27,000, or 11.5%, in occupancy and equipment, and \$9,000, or 5.3%, in franchise taxes, which were partially offset by a decrease of \$14,000, or 1.6%, in other operating expense. The increase in employee compensation and benefits was due primarily to normal merit increases and bonuses as well as increased costs related to employee health insurance premiums. The increase in data processing was due primarily to system upgrades, as well as increased costs related to American's growth in loans and deposits year to year. The increase in franchise taxes was due primarily to growth in ASB's equity year to year. The decrease in other operating expenses was due primarily to decreases in advertising and promotional costs.

Federal Income Taxes. The provision for federal income taxes totaled \$886,000 for the fiscal year ended June 30, 2005, an increase of \$142,000, or 19.1%, from the \$744,000 recorded in fiscal 2004. The increase was due primarily to a \$287,000, or 10.4%, increase in pre-tax earnings, which was partially offset by \$100,000 of New Markets tax credits. ASB's effective tax rates were 29.1% and 27.0% for the fiscal years ended June 30, 2005 and 2004, respectively. The difference between ASB's effective tax rate and the 34% statutory tax rate is primarily attributable to New Markets tax credits.

COMPARISON OF OPERATING RESULTS FOR THE YEARS ENDED JUNE 30, 2004 AND 2003

General. Net earnings were \$2.0 million for the fiscal year ended June 30, 2004, a decrease of \$51,000, or 2.5%, from fiscal 2003. The decline in earnings resulted primarily from a \$466,000 increase in general and administrative expense, which was partially offset by a \$215,000 increase in net interest income, a \$138,000 decrease in provision for losses on loans and a \$102,000 decrease in the provision for federal income taxes.

Net Interest Income. Total interest income was \$9.0 million for the fiscal year ended June 30, 2004, a decrease of \$622,000, or 6.5%, from fiscal 2003. Interest income on loans totaled \$8.1 million in fiscal 2004, a decrease of \$129,000, or 1.6%. This increase was due primarily to a 74 basis point decrease in the average yield, to 6.52% for the fiscal year ended June 30, 2004, which was partially offset by a \$10.8 million, or 9.5%,

increase in the weighted-average balance of loans outstanding. Interest income on mortgage-backed securities decreased by \$184,000, or 47.9%, as a result of a 218 basis point decrease in the average yield, which was partially offset by a \$1.7 million, or 17.5%, increase in the weighted-average balance outstanding year to year. Interest income on investment securities and interest-bearing deposits decreased by \$309,000, or 32.2%, due primarily to an \$8.0 million, or 30.8%, decrease in the weighted average balance outstanding year to year and an 8 basis point decrease in the average yield, to 3.63% for fiscal 2004.

Interest expense totaled \$3.1 million for the fiscal year ended June 30, 2004, a decrease of \$837,000, or 21.5%, from the \$3.9 million total recorded in fiscal 2003. Interest expense on deposits decreased by \$955,000, or 25.0%, due primarily to an 83 basis point decrease in the weighted-average cost of deposits, to 2.14% for fiscal 2004, which was partially offset by a \$5.1 million, or 4.0%, increase in the weighted-average balance outstanding year to year. Interest expense on borrowings increased by \$118,000, or 166.2%, due primarily to a \$4.1 million, or 94.3%, increase in the weighted-average balance outstanding year to year and a 60 basis point increase in the average cost of borrowings, to 2.23% in fiscal 2004. Decreases in the average yields on interest-earning assets and the average costs of interest-bearing liabilities were due primarily to the overall decrease in interest rates in the economy.

As a result of the foregoing changes in interest income and interest expense, net interest income increased by \$215,000, or 3.8%, to a total of \$5.9 million for the fiscal year ended June 30, 2004, compared to \$5.7 million in fiscal 2003. The interest rate spread increased by 18 basis points to 3.68% in fiscal 2004 from 3.50% in fiscal 2003, and the net interest margin increased by 3 basis points to 3.84% in fiscal 2004 from 3.81% in fiscal 2003.

Provision for Losses on Loans. American charges a provision for losses on loans to earnings to bring the total allowance for loan losses to a level considered appropriate by management based on historical experience, the volume and type of lending conducted by American, the status of past due principal and interest payments, general economic conditions, particularly as such conditions relate to American's market area, and other factors related to the collectibility of American's loan portfolio. As a result of such analysis, management recorded an \$111,000 provision for losses on loans during the fiscal year ended June 30, 2004, a decrease of \$138,000, or 55.4%, from fiscal 2003. The decrease in the provision in fiscal 2004 is based upon management's analysis of the loan portfolio including nonperforming assets, as outlined in "Critical Accounting Policies" above. There can be no assurance that the loan loss allowance will be adequate to absorb losses on known nonperforming assets or that the allowance will be adequate to cover losses on nonperforming assets in the future.

Other Income. Other income totaled \$705,000 for the fiscal year ended June 30, 2004, a decrease of \$40,000, or 5.4%, from the \$745,000 recorded in fiscal 2003. The decrease resulted from an \$116,000 decrease in gain on sale of investment securities, which was partially offset by a \$58,000 gain on sale of office premises and an increase of \$18,000, or 3.1%, in other operating income. The increase in other operating income was comprised primarily of increases in fees on loans and deposit transactions.

General, Administrative and Other Expense. General, administrative and other expense totaled \$3.7 million for the fiscal year ended June 30, 2004, an increase of \$466,000, or 14.2%, over the total recorded in fiscal 2003. The increase resulted primarily from increases of \$292,000, or 16.9%, in employee compensation and benefits, \$22,000, or 5.4%, in data processing costs, \$75,000, or 9.2%, in other operating expense, and \$40,000, or 31.0%, in franchise taxes. The increase in employee compensation and benefits was due primarily to normal merit increases and bonuses as well as increased costs related to employee health insurance premiums. The increase in data processing was due primarily to system upgrades, as well as increased costs related to American's growth in loans and deposits year to year. The increase in franchise taxes was due primarily to growth in ASB's equity year to year. The increase in other operating expense was due primarily to increased expense associated with the debit card program and pro-rata increases in operating costs due to the Corporation's overall growth year to year.

Federal Income Taxes. The provision for federal income taxes totaled \$744,000 for the fiscal year ended June 30, 2004, a decrease of \$102,000, or 12.1%, from the \$846,000 recorded in fiscal 2003. The decrease was due primarily to the \$153,000, or 5.3%, decrease in pre-tax earnings and \$100,000 of New Markets tax credits. ASB's effective tax rates were 27.0% and 29.1% for the fiscal years ended June 30, 2004 and 2003, respectively.

AVERAGE BALANCE, YIELD, RATE AND VOLUME DATA

The following table sets forth certain information relating to ASB's average balance sheet and reflects the average yield on interest-earning assets and the average cost of interest-bearing liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense by the average monthly balance of interest-earning assets or interest-bearing liabilities, respectively, for the periods presented. Average balances are derived from average monthly balances, which include nonaccruing loans in the loan portfolio, net of the allowance for loan losses.

The table below describes the extent to which changes in interest rates and changes in volume of interest-earning assets and interest-bearing liabilities have affected ASB's interest income and expense during the years indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in volume (change in volume multiplied by prior year rate), (ii) changes in rate (change in rate multiplied by prior year volume) and (iii) total changes in rate and volume. The combined effects of changes in both volume and rate, which cannot be separately identified, have been allocated proportionately to the change due to volume and the change due to rate.

ASSET AND LIABILITY MANAGEMENT

American, like other financial institutions, is subject to interest rate risk to the extent that its interest-earning assets reprice differently than its interest-bearing liabilities. As a part of its effort to monitor its interest rate risk, American reviews the reports of the OTS which set forth the application of the "net portfolio value" ("NPV") methodology used by the OTS.

Generally, NPV is the discounted present value of the difference between incoming cash flows on interest-earning and other assets and outgoing cash flows on interest-bearing liabilities. The methodology attempts to quantify interest rate risk as the change in the NPV which would result from theoretical changes in market interest rates.

The following table presents, at June 30, 2005 and 2004, an analysis of the interest rate risk of American, as measured by changes in NPV for instantaneous and sustained parallel shifts of 100 basis point movements in market interest rates. Decreases of greater than 100 basis points are not presented at June 30, 2005 and 2004, due to the low interest rate environment at those dates.

Changes in interest rate (basis points)	Board limit % changes	At June 30, 2005		At June 30, 2004	
		NPV as a % of PV of Assets Ratio	Change in NPV	NPV as a % of PV of Assets Ratio	Change in NPV
+300	(6)%	8.01%	(275) bp	9.26%	(256) bp
+200	(6)	9.17	(159)	10.45	(137)
+100	(6)	10.17	(59)	11.42	(40)
-	-	10.76	-	11.82	-
-100	6	10.69	(7)	11.60	(22)

The model reflects that American's NPV is more sensitive to an increase in interest rates than a decrease in interest rates. This occurs principally because, as rates rise, the market values of the Savings Bank's investments, adjustable-rate mortgage loans, fixed-rate loans and mortgage-backed securities decline due to the rate increases. The values of the Savings Bank's deposits and borrowings change in approximately the same proportion in rising or falling rate scenarios.

If interest rates rise from current levels, American's net interest income could be negatively affected. Moreover, rising interest rates could negatively affect American's earnings due to diminished loan demand.

As with any method of measuring interest rate risk, certain shortcomings are inherent in the method of analysis presented in the foregoing table. For example, although certain assets and liabilities may have similar maturities or periods of repricing, they do not all reprice simultaneously and they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind such changes. Additionally, certain assets, such as adjustable-rate loans, have features that restrict changes in interest rates on a short-term basis and over the life of the assets. Further, in the event of a change in interest rates, expected rates of prepayment on loans and early withdrawal from certificates could deviate significantly from those assumed in calculating the table.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity refers to the ability of an institution to generate sufficient cash to fund current loan demand, meet deposit withdrawals and pay operating expenses. Liquidity is influenced by financial market conditions, fluctuations in interest rates, general economic conditions and regulatory requirements. ASB's liquidity, primarily represented by cash and cash equivalents and investment securities available for sale, is a result of the operating, investing and financing activities of American.

These activities are summarized below on a consolidated basis for the years ended June 30, 2005, 2004, and 2003:

	2005	Year ended June 30, 2004 (In thousands)	2003

It is management's belief that there are no known trends, known demands, commitments or events that are likely to result in a material change in the Corporation's liquidity position.

American is required by OTS regulations to maintain specified minimum amounts of capital. The following table sets forth the amount and percentage level of American's regulatory capital at June 30, 2005, and the minimum requirement amounts. Tangible and core capital are reflected as a percentage of adjusted total assets. Risk-based (or total) capital, which consists of core and supplementary capital, is reflected as a percentage of risk-weighted assets. At June 30, 2005, American met the definition of a "well capitalized" institution under OTS regulations.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors
ASB Financial Corp.

We have audited the accompanying consolidated statements of financial condition of ASB Financial Corp. as of June 30, 2005 and 2004, and the related consolidated statements of earnings, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended June 30, 2005. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Corporation is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ASB Financial Corp. as of June 30, 2005 and 2004, and the results of its operations and its cash flows for each of the three years in the period ended June 30, 2005, in conformity with accounting principles generally accepted in the United States of America.

ASB FINANCIAL CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2005, 2004 and 2003

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ASB Financial Corp. (the "Corporation") is a savings and loan holding company whose primary activity is holding the stock of its wholly-owned subsidiary, American Savings Bank, fsb (the "Savings Bank"). The Savings Bank conducts a general banking business in southeastern Ohio which consists of attracting deposits from the general public and primarily applying those funds to the origination of loans for residential, consumer and nonresidential purposes. The Savings Bank's profitability is significantly dependent on net interest income, which is the difference between interest income generated from interest-earning assets (i.e. loans and investments) and the interest expense paid on interest-bearing liabilities (i.e. customer deposits and borrowed funds). Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities and the interest received or paid on these balances. The level of interest rates paid or received by the Savings Bank can be significantly influenced by a number of factors, such as governmental monetary policy, that are outside of management's control.

The consolidated financial information presented herein has been prepared in accordance with accounting principles generally accepted in the United States of America ("U. S. GAAP") and general accounting practices within the financial services industry. In preparing consolidated financial statements in accordance with U. S. GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from such estimates.

The following is a summary of the Corporation's significant accounting policies which have been consistently applied in the preparation of the accompanying consolidated financial statements.

Principles of Consolidation

The consolidated financial statements include the accounts of the Corporation, the Savings Bank, ASB Community Development Corp. and A.S.L. Services, Inc. ("A.S.L."), the Savings Bank's wholly-owned subsidiaries. ASB Community Development Corp. was formed in fiscal 2003 for the purpose of participating in a federal program designed to promote lending in new markets, which in turn provide federal income tax credits to the Savings Bank. A.S.L. was incorporated for the primary purpose of holding shares in the Savings Bank's data processing provider, Intrieve, Incorporated ("Intrieve"). The principal assets of A.S.L. at June 30, 2004, consisted of an investment in common stock of Intrieve and an intercompany cash balance totaling approximately \$130,000; A.S.L. had no liabilities and insignificant results of operations. In April 2005, Intrieve was acquired by John H. Harland Company. As a result, A.S.L. received cash consideration of approximately \$722,000 in redemption of its shares of Intrieve, resulting in a pretax gain totaling \$590,000. All significant intercompany balances and transactions have been eliminated.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Securities and Mortgage-Backed Securities

The Corporation accounts for investment and mortgage-backed securities in accordance with Statement of Financial Accounting Standards ("SFAS") No. 115 "Accounting for Certain Investments in Debt and Equity Securities." SFAS No. 115 requires that investments in debt and equity securities be categorized as held-to-maturity, trading, or available for sale. Securities classified as held-to-maturity are carried at cost only if the Corporation has the positive intent and ability to hold these securities to maturity. Trading securities and securities designated as available for sale are carried at fair value with resulting unrealized gains or losses recorded to operations or shareholders' equity, respectively. Realized gains and losses on sales of securities are recognized using the specific identification method.

At June 30, 2005 and 2004, the Corporation had designated all investment and mortgage-backed securities as available for sale.

Loans Receivable

Loans receivable are stated at the principal amount outstanding, adjusted for deferred loan origination fees and the allowance for loan losses. Interest is accrued as earned unless the collectibility of the loan is in doubt. Interest on loans that are contractually past due is charged off, or an allowance is established based on management's periodic evaluation. The allowance is established by a charge to interest income equal to all interest previously accrued, and income is subsequently recognized only to the extent that cash payments are received until, in management's judgment, the borrower's ability to make periodic interest and principal payments has returned to normal, in which case the loan is returned to accrual status. If the ultimate collectibility of the loan is in doubt, in whole or in part, all payments received on nonaccrual loans are applied to reduce principal until such doubt is eliminated.

Loan Origination Fees

The Savings Bank accounts for loan origination fees in accordance with SFAS No. 91 "Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Cost of Leases." Pursuant to the provisions of SFAS No. 91, origination fees received from loans, net of direct origination costs, are deferred and amortized to interest income using the level-yield method, giving effect to actual loan prepayments. Additionally, SFAS No. 91 generally limits the definition of loan origination costs to the direct costs of originating a loan, i.e., principally actual personnel costs. Fees received for loan commitments that are expected to be drawn upon, based on the Savings Bank's experience with similar commitments, are deferred and amortized over the life of the loan using the level-yield method. Fees for other loan commitments are deferred and amortized over the loan commitment period on a straight-line basis.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Allowance for Loan Losses

It is the Savings Bank's policy to provide valuation allowances for estimated losses on loans based on past loss experience, trends in the level of delinquent and problem loans, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral and current and anticipated economic conditions in the Savings Bank's primary lending area. When the collection of a loan becomes doubtful or otherwise troubled, the Savings Bank records a loan charge-off equal to the difference between the fair value of the property securing the loan and the loan's carrying value. Major loans (including development projects) and major lending areas are reviewed periodically to determine potential problems at an early date. The allowance for loan losses is increased by charges to earnings and decreased by charge-offs (net of recoveries).

The Savings Bank accounts for impaired loans in accordance with SFAS No. 114, "Accounting by Creditors for Impairment of a Loan," which requires that impaired loans be measured based upon the present value of expected future cash flows discounted at the loan's effective interest rate or, as an alternative, at the loan's observable market price or fair value of the collateral. The Savings Bank's current procedures for evaluating impaired loans result in carrying such loans at the lower of cost or fair value.

A loan is defined under SFAS No. 114 as impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. In applying the provisions of SFAS No. 114, the Savings Bank considers its investment in one- to four-family residential loans and consumer installment loans to be homogeneous and therefore excluded from separate identification for evaluation of impairment. With respect to the Savings Bank's investment in multi-family and nonresidential loans and its evaluation of impairment thereof, such loans are collateral dependent and, as a result, are carried as a practical expedient at the lower of cost or fair value.

It is the Savings Bank's policy to charge off unsecured credits that are more than ninety days delinquent. Similarly, collateral-dependent loans which are more than ninety days delinquent are considered to constitute more than a minimum delay in repayment and are evaluated for impairment under SFAS No. 114 at that time.

The Savings Bank's total impaired loans at June 30 were as follows:

	(In thousands)	
Impaired loans with related allowance	\$256	\$234
Impaired loans with no related allowance	—	—

Office Premises and Equipment

Office premises and equipment are carried at cost and include expenditures which extend the useful lives of existing assets. Maintenance, repairs and minor renewals are expensed as incurred. For financial reporting, depreciation and amortization are provided on the straight-line and accelerated methods over the useful lives of the assets, estimated to be forty years for buildings, ten to forty years for building improvements, and five to ten years for furniture and equipment. An accelerated method is used for tax reporting purposes.

Real Estate Acquired Through Foreclosure

Real estate acquired through foreclosure is carried at the lower of the loan's unpaid principal balance (cost) or fair value, less estimated selling expenses at the date of acquisition. A real estate loss provision is recorded if the property's fair value subsequently declines below the amount determined at the recording date. In determining the lower of cost or fair value at acquisition, costs relating to development and improvement of property are capitalized. Costs relating to holding real estate acquired through foreclosure, net of rental income, are charged against earnings as incurred.

Federal Income Taxes

The Corporation accounts for federal income taxes in accordance with the provisions of SFAS No. 109, "Accounting for Income Taxes." Pursuant to the provisions of SFAS No. 109, a deferred tax liability or deferred tax asset is computed by applying the current statutory tax rates to net taxable or deductible differences between the tax basis of an asset or liability and its reported amount in the consolidated financial statements that will result in taxable or deductible amounts in future periods. Deferred tax assets are recorded only to the extent that the amount of net deductible temporary differences or carryforward attributes may be utilized against current period earnings, carried back against prior years earnings, offset against taxable temporary differences reversing in future periods, or

utilized to the extent of management's estimate of future taxable income. A valuation allowance is provided for deferred tax assets to the extent that the value of net deductible temporary differences and carryforward attributes exceeds management's estimates of taxes payable on future taxable income. Deferred tax liabilities are provided on the total amount of net temporary differences taxable in the future.

The Corporation's principal temporary differences between pretax financial income and taxable income result from different methods of accounting for deferred loan origination fees and costs, Federal Home Loan Bank stock dividends, the general loan loss allowance, deferred compensation, and percentage of earnings bad debt deductions. Additional temporary differences result from depreciation computed using accelerated methods for tax purposes.

Salary Continuation Agreement

The Savings Bank has entered into salary continuation agreements with certain current and former key members of management. These agreements provide for continuation of compensation for up to 15 years under certain circumstances. Recognition of compensation expense related to these salary continuation agreements totaled \$133,000, \$24,000 and \$36,000 for the fiscal years ended June 30, 2005, 2004 and 2003, respectively.

Benefit Plans

The Corporation has an Employee Stock Ownership Plan ("ESOP") which provides retirement benefits for substantially all employees who have completed one year of service and have attained the age of 21. The Corporation accounts for the ESOP in accordance with Statement of Position ("SOP") 93-6, "Employers' Accounting for Employee Stock Ownership Plans." SOP 93-6 requires that compensation expense recorded by employers equal the fair value of ESOP shares allocated to participants during a given fiscal year. Expense related to the ESOP totaled approximately \$126,000, \$181,000 and \$165,000 for the fiscal years ended June 30, 2005, 2004 and 2003, respectively.

During fiscal 2003, the Corporation initiated a defined contribution 401(k) plan which provides matching contributions to employees' elective salary deferrals. Substantially all employees over the age of 21 are eligible to participate. Expense related to the 401(k) plan totaled approximately \$66,000, \$53,000 and \$8,000 for the fiscal years ended June 30, 2005, 2004 and 2003, respectively.

The Corporation also has a Management Recognition Plan ("MRP" or the "Plan") which provides for awards of 68,558 shares to members of the board of directors and management. Common shares awarded under the MRP vest over a five year period, commencing with the date of the award in fiscal 1996. Expense recognized under the MRP totaled approximately \$103,000, \$62,000 and \$80,000 for the fiscal years ended June 30, 2005, 2004 and 2003, respectively. As of June 30, 2005, all shares under the Corporation's MRP have been awarded.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Earnings Per Share

Basic earnings per share for the fiscal years ended June 30, 2005, 2004 and 2003 is based upon the weighted-average shares outstanding during the year, less 8,128 unallocated ESOP shares during fiscal 2003. Diluted earnings per share is computed taking into consideration common shares outstanding and dilutive potential common shares to be issued under the Corporation's stock option plan. The computations were as follows:

	2005	2004	2003
Weighted-average common shares outstanding (basic)	1,696,737	1,666,012	1,561,513
Dilutive effect of assumed exercise of stock options	<u>7,274</u>	<u>44,369</u>	<u>27,860</u>
Weighted-average common shares outstanding (diluted)	<u>1,704,011</u>	<u>1,710,381</u>	<u>1,589,373</u>

At June 30, 2005, 6,000 options with a weighted-average exercise price of \$26.00 were excluded from the computation of diluted earnings per share because the exercise price was greater than the average market price of the common shares.

Stock Option Plan

During fiscal 1996 the Board of Directors adopted the ASB Financial Corp. 1995 Stock Option and Incentive Plan (the "Plan") that provided for the issuance of 225,423 shares of authorized but unissued shares of common stock at fair value at the date of grant. In fiscal 1996, the Corporation granted 197,521 options which have an adjusted exercise price of \$7.64. The number of options granted and the exercise price have been adjusted to give effect to returns of capital and special dividend distributions paid by the Corporation. The Plan provides that one-fifth of the options granted become exercisable on each of the first five anniversaries of the date of grant.

The Corporation accounts for the Plan in accordance with SFAS No. 123, "Accounting for Stock-Based Compensation," which contains a fair value-based method for valuing stock-based compensation that entities may use, which measures compensation cost at the grant date based on the fair value of the award. Compensation is then recognized over the service period, which is usually the vesting period. Alternatively, SFAS No. 123 permits entities to continue to account for stock options and similar equity instruments under Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees." Entities that continue to account for stock options using APB Opinion No. 25 are required to make pro forma disclosures of net earnings and earnings per share, as if the fair value-based method of accounting defined in SFAS No. 123 had been applied.

The Corporation applies APB Opinion No. 25 and related Interpretations in accounting for the Plan. Accordingly, no compensation cost has been recognized for the Plan. Had compensation cost for the Corporation's stock option plan been determined based on the fair value at the grant dates for awards under the Plan consistent with the accounting method utilized in SFAS No. 123, the Corporation's net earnings and earnings per share would have been reported as the pro forma amounts indicated below:

Fair Value of Financial Instruments

SFAS No. 107, "Disclosures about Fair Value of Financial Instruments," requires disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated statement of financial condition, for which it is practicable to estimate that value. For financial instruments where quoted market prices are not available, fair values are based on estimates using present value and other valuation methods.

The methods used are greatly affected by the assumptions applied, including the discount rate and estimates of future cash flows. Therefore, the fair values presented may not represent amounts that could be realized in an exchange for certain financial instruments.

The following methods and assumptions were used by the Corporation in estimating its fair value disclosures for financial instruments at June 30, 2005 and 2004:

Cash and cash equivalents: The financial statement carrying amounts for cash and cash equivalents are deemed to approximate fair value.

Certificates of deposit in other financial institutions: The financial statement carrying amounts for certificates of deposit in other financial institutions are deemed to approximate fair value.

Investment and mortgage-backed securities: For investment and mortgage-backed securities, fair value is deemed to equal the quoted market price.

Loans receivable: The loan portfolio has been segregated into categories with similar characteristics, such as one- to four-family residential, multi-family residential and nonresidential real estate. These loan categories were further delineated into fixed-rate and adjustable-rate loans. The fair values for the resultant loan categories were computed via discounted cash flow analysis, using current interest rates offered for loans with similar terms to borrowers of similar credit quality. For loans on deposit accounts and consumer and other loans, fair values were deemed to equal the historic carrying values. The historical carrying amount of accrued interest on loans is deemed to approximate fair value.

Federal Home Loan Bank stock: The carrying amount presented in the consolidated statements of financial condition is deemed to approximate fair value.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair Value of Financial Instruments (continued)

Deposits: The fair values of NOW accounts, passbook accounts, money market demand accounts and advances by borrowers are deemed to approximate the amount payable on demand. Fair values for fixed-rate certificates of deposit have been estimated using a discounted cash flow calculation using the interest rates currently offered for deposits of similar remaining maturities.

Advances from the Federal Home Loan Bank: The fair value of these advances is estimated using the rates currently offered for similar advances with similar remaining maturities.

Commitments to extend credit: For fixed-rate and adjustable-rate loan commitments, the fair value estimate considers the difference between current levels of interest rates and committed rates. At June 30, 2005 and 2004, the difference between the fair value and notional amount of loan commitments was not material.

Based on the foregoing methods and assumptions, the carrying value and fair value of the Corporation's financial instruments at June 30 were as follows:

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Advertising

Advertising costs are expensed when incurred. The Corporation's advertising expense totaled \$98,000, \$111,000 and \$73,000 for the fiscal years ended June 30, 2005, 2004 and 2003, respectively.

Effects of Recent Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board (the "FASB") issued a revision to Statement of Financial Accounting Standards ("SFAS") No. 123 which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services, primarily on accounting for transactions in which an entity obtains employee services in share-based transactions. This Statement, SFAS No. 123(R), requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award, with limited exceptions. That cost will be recognized over the period during which an employee is required to provide services in exchange for the award – the requisite service period. No compensation cost is recognized for equity instruments for which employees do not render the requisite service. Employee share purchase plans will not result in recognition of compensation cost if certain conditions are met.

Initially, the cost of employee services received in exchange for an award of equity instruments will be measured based on current fair value; the fair value of that award will be remeasured subsequently at each reporting date through the settlement date. Changes in fair value during the requisite service period will be recognized as compensation cost over that period. The grant-date fair value of employee share options and similar instruments will be estimated using option-pricing models adjusted for the unique characteristics of those instruments (unless observable market prices for the same or similar instruments are available). If an equity award is modified after the grant date, incremental compensation cost will be recognized in an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification.

Excess tax benefits, as defined by SFAS No. 123(R) will be recognized as an addition to additional paid in capital. Cash retained as a result of those excess tax benefits will be presented in the statement of cash flows as financing cash inflows. The write-off of deferred tax assets relating to unrealized tax benefits associated with recognized compensation cost will be recognized as income tax expense unless there are excess tax benefits from previous awards remaining in additional paid in capital against which it can be offset.

Compensation cost is required to be recognized in the beginning of the annual period that begins after December 31, 2005, or July 1, 2006 as to the Corporation.

Management believes the effect on operations will approximate the annual economic effects set forth in the pro-forma stock option disclosure set forth above.

Proceeds from sales of investment securities amounted to \$559,000 and \$6.6 million during the fiscal years ended June 30, 2004 and 2003, respectively, and resulted in gross realized gains totaling \$40,000 and \$156,000, for those respective periods. The Corporation did not sell any investment securities during the fiscal year ending June 30, 2005.

The table below indicates the length of time individual securities have been in a continuous unrealized loss position at June 30, 2005 and 2004:

NOTE C - LOANS RECEIVABLE

The composition of the loan portfolio at June 30 is as follows:

	2005	2004
	(In thousands)	
Residential real estate		
One- to four- family	\$ 88,929	\$ 79,817
Multi-family	7,982	5,399

Deferred loan origination fees	225	194
Allowance for loan losses	<u>1,269</u>	<u>999</u>
	<u>\$146,134</u>	<u>\$129,821</u>

The Savings Bank's lending efforts have historically focused on one- to four-family and multi-family residential real estate loans, which comprised approximately \$96.9 million, or 63%, of the total loan portfolio at June 30, 2005, and \$85.2 million, or 62%, of the total loan portfolio at June 30, 2004. Generally, such loans have been underwritten on the basis of no more than an 80% loan-to-value ratio, which has historically provided the Savings Bank with adequate collateral coverage in the event of default. Nevertheless, the Savings Bank, as with any lending institution, is subject to the risk that real estate values could deteriorate in its primary lending area of southeastern Ohio, thereby impairing collateral values. However, management believes that residential real estate values in the Savings Bank's primary lending area are presently stable.

In the normal course of business, the Savings Bank makes loans to some of its directors, officers and employees. In the opinion of management, such loans are consistent with sound lending practices, are on market terms, and are within applicable regulatory lending limitations. The aggregate dollar amount of loans outstanding to directors and officers totaled approximately \$1.0 million at June 30, 2005 and 2004, respectively.

NOTE D - ALLOWANCE FOR LOAN LOSSES

The activity in the allowance for loan losses is summarized as follows for the years ended June 30:

NOTE D - ALLOWANCE FOR LOAN LOSSES (continued)

As of June 30, 2005, the Savings Bank's allowance for loan losses consisted of a general loan loss allowance, which is includible as a component of regulatory risk-based capital, totaling \$1.1 million, and specific allowances relating to impaired and nonperforming loans totaling \$157,000.

Nonperforming and nonaccrual loans totaled approximately \$743,000, \$1.0 million and \$1.2 million at June 30, 2005, 2004 and 2003, respectively.

Interest income that would have been recognized had such nonperforming and nonaccrual loans been performing in accordance with contractual terms totaled approximately \$69,000, \$66,000 and \$58,000 for the years ended June 30, 2005, 2004 and 2003, respectively.

Prior to fiscal 1997, the Savings Bank was allowed a special bad debt deduction, generally limited to 8% of otherwise taxable income, and subject to certain limitations based on aggregate loans and deposit account balances at the end of the year. If the amounts that qualified as deductions for federal income taxes are later used for purposes other than bad debt losses, including distributions in liquidation, such distributions will be subject to federal income taxes at the then current corporate income tax rate. Retained earnings at June 30, 2005 included approximately \$2.1 million for which federal income taxes have not been provided. The amount of unrecognized deferred tax liability relating to the cumulative bad debt deduction was approximately \$700,000 at June 30, 2005.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

June 30, 2005, 2004 and 2003

NOTE I - LOAN COMMITMENTS

The Savings Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers, including commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amount recognized in the consolidated statement of financial condition. The contract or notional amounts of the commitments reflect the extent of the Savings Bank's involvement in such financial instruments.

The Savings Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual notional amount of those instruments. The Savings Bank uses the same credit policies in making commitments and conditional obligations as those utilized for on-balance-sheet instruments.

At June 30, 2005, the Savings Bank had outstanding commitments to originate loans totaling approximately \$5.4 million. In addition, the Savings Bank had unused lines of credit for home equity loans and commercial loans totaling \$5.0 million and \$8.7 million, respectively. Further, the Savings Bank had outstanding commercial letters of credit totaling \$366,000. In the opinion of management, all loan commitments equaled or exceeded prevalent market interest rates as of June 30, 2005, and will be funded from normal cash flow from operations.

At June 30, 2005, the Savings Bank was constructing a new branch with a total remaining cash commitment totaling approximately \$500,000.

NOTE J - REGULATORY CAPITAL

The Savings Bank is subject to minimum regulatory capital standards promulgated by the Office of Thrift Supervision (the "OTS"). Failure to meet minimum capital requirements can initiate certain mandatory -- and possibly additional discretionary -- actions by regulators that, if undertaken, could have a direct material effect on the Corporation's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Savings Bank must meet specific capital guidelines that involve quantitative measures of the Savings Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Savings Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

The minimum capital standards of the OTS generally require the maintenance of regulatory capital sufficient to meet each of three tests, described below as the tangible capital requirement, the core capital requirement and the risk-based capital requirement. The tangible capital requirement provides for minimum tangible capital (defined as shareholders' equity less all intangible assets) equal to 1.5% of adjusted total assets. The core capital requirement provides for minimum core capital (tangible capital plus certain forms of supervisory goodwill and other qualifying intangible assets) generally equal to 4.0% of adjusted total assets, except for those associations with the highest examination rating and acceptable levels of risk. The risk-based capital requirement provides for the maintenance of core capital plus general loss allowances equal to 8.0% of risk-weighted assets. In computing risk-weighted assets, the Savings Bank multiplies the value of each asset on its statement of financial condition by a defined risk-weighting factor, e.g., one- to four-family residential loans carry a risk-weighting factor of 50%.

NOTE J - REGULATORY CAPITAL (continued)

During fiscal 2005, the Savings Bank was notified by the OTS that it was categorized as “well-capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well-capitalized” the Savings Bank must maintain the minimum capital ratios set forth in the following tables.

As of June 30, 2005 and 2004, management believes that the Savings Bank met all capital adequacy requirements to which it was subject.

	As of June 30, 2005				To be “well-capitalized” under prompt corrective action provisions	
	<u>Actual</u>		<u>For capital adequacy purposes</u>		<u>Amount</u>	<u>Ratio</u>
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)					
Tangible capital	\$14,851	8.2%	≥\$2,722	≥1.5%	≥\$ 9,073	≥ 5.0%
Core capital	\$14,851	8.2%	≥\$7,259	≥4.0%	≥\$10,888	≥ 6.0%
Risk-based capital	\$15,963	14.1%	≥\$9,058	≥8.0%	≥\$11,322	≥10.0%

	As of June 30, 2004				To be “well-capitalized” under prompt corrective action provisions	
	<u>Actual</u>		<u>For capital adequacy purposes</u>		<u>Amount</u>	<u>Ratio</u>
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)					
Tangible capital	\$15,366	9.3%	≥\$2,478	≥1.5%	≥\$ 8,259	≥ 5.0%
Core capital	\$15,366	9.3%	≥\$6,607	≥4.0%	≥\$ 9,910	≥ 6.0%
Risk-based capital	\$16,792	16.6%	≥\$8,088	≥8.0%	≥\$10,111	≥10.0%

The Savings Bank’s management believes that, under the current regulatory capital regulations, the Savings Bank will continue to meet its minimum capital requirements in the foreseeable future. However, events beyond the control of the Savings Bank, such as a protracted increase in interest rates or a downturn in the economy in the Savings Bank’s market area, could adversely affect future earnings and, consequently, the Savings Bank’s ability to meet future minimum regulatory capital requirements.

OTS regulations impose limitations on the payment of dividends and other capital distributions by savings associations. Generally, the Savings Bank's payment of dividends is limited, without prior OTS approval, to net earnings for the current calendar year plus the two preceding calendar years, less capital distributions paid over the comparable time period. Insured institutions are required to file an application with the OTS for capital distributions in excess of this limitation. Management does not believe this limitation will have an adverse effect on the Corporation's future liquidity position.

NOTE M - STOCK SPLITS

On July 8, 2005, the shareholders adopted a proposal to amend the Corporation's Articles of Incorporation to effect a 1-for-300 reverse stock split with the repurchase of all resulting fractional shares; followed immediately by a 300-for-1 forward stock split of the Corporation's common shares. As a result of the stock splits, each shareholder owning less than 300 common shares of the Corporation or common shares other than in a 300 share lot immediately prior to the stock split received \$23.00 per share in cash for each common share owned and was no longer a shareholder. The Corporation expended \$2.7 million in cash to redeem all fractional shares created by the 1-for-300 stock split resulting in a corresponding reduction of shareholders' equity.

The purpose of the stock splits were to enable the Corporation to deregister its common shares under the Securities and Exchange Act of 1934 (the Act), as amended. Management believes that deregistration of the Corporation's common shares will result in future cost savings that more than offset any benefits derived from maintaining registration of the Corporation's shares under the Act.
