Electrocomponents plc - Trading Update

Electrocomponents plc, the leading international high-service distributor of electronic, electrical and industrial supplies, is today giving a trading update ahead of its results for the year ending 31 March 2006.

In the second half of the year, Group sales (adjusted for exchange rates and trading days) continued to strengthen with sales growth of 7% compared with 3% growth in the first half. Within this, the International business has grown by 15% (compared with 9% in the first half) with improvements in all regions, most notably in Europe and North America. The UK declined at 2% (compared with a decline of 4% in the first half).

Gross margin is expected to be around 51% in the second half of the year, down from 52% in the first half due to changes in selling prices, targeted customer discounts and product mix.

The Enterprise Business System went live in the UK in December and has successfully supported the UK business and the Group hub since then. At around £25m, EBS costs for the financial year are in line with expectations.

At the half year, the Group anticipated that the forthcoming RoHS Directive could require an additional stock provision of up to £4m and this

will now be provided for in the full year accounts.

The programme to create a lower cost infrastructure continues and reorganisation costs of around £4m have been incurred in the full year, which are expected to have an annualised benefit of around £4.5m.

The Board expects that Group profit (before tax, reorganisation costs, and the one off provision for the RoHS directive) for the year ended 31 March 2006 will be in line with current market expectations.

The full results for the year will be announced on 1 June 2006.

There will be a telephone conference call today at 09.00am for analysts and investors. Dial-in instructions are set out below.
