PRESS RELEASE

Gamesa Wind will supply to Shell WindEnergy a total of 132 Gamesa model G80-2.0 MW wind turbines

GAMESA SELLS 264 MW TO SHELL WINDENERGY

Vitoria, Spain – Gasteiz, 6 June 2006. Gamesa Wind US LLC., a subsidiary of Gamesa, a principal wind turbine manufacturer worldwide and market leader in Spain in the manufacturing, sale, and installation of wind turbines, strengthens its position in the wind turbine market with the signing of a new contract with project developer Shell WindEnergy Inc. for the supply of 132 turbines.

The **Gamesa** G80-2.0 MW wind turbines will comprise a total installed capacity of 264 MW and will be available to Shell's 2007 development program.

This agreement, which is worth US \$300 million, includes the supply, supervision of installation and commissioning of the wind turbines, as well as a 5-year warranty and the provision of operation and maintenance. Manufacture of the turbines is scheduled to begin during the third quarter of 2006.

The signing of this agreement reinforces **Gamesa**'s position in the United States, a strategic market for the Spanish company in its international expansion. Gamesa will soon have operational four advanced technology plants for the manufacturing of towers, blades and nacelle assembly in the USA.

Environmentally, these **Gamesa** wind turbines will generate a clean power supply, avoiding the emission of harmful atmospheric contaminants. The annual energy output of the 264 MW capability will replace 56.760 Tonnes of Equivalent Oil (TOE)/year, thus avoiding the release into the atmosphere of 396.000 tonnes of CO2/year.
