Thursday 8 June 2006****May Traffic Figures**

BAA's seven UK airports handled a total of 12.8 million passengers in May, an increase of 3.6% on the same month last year.

All major markets recorded growth, with the exception of European charter, which dropped 10.6%. European scheduled traffic was up 6.6%, whilst North Atlantic activity was 1.4% higher, and other long haul routes increased by a collective 11.0%. Among these the fastest growing were routes to India and China, which grew 58% and 49% respectively.

Of the individual airports, Aberdeen saw the largest gain at 13.1%, taking its annual total of passengers past the 3 million mark for the first time. Stansted was up 11.3%, Gatwick was up 4.3%, and Heathrow recorded a gain of 1.4%. Edinburgh's growth of 1.5% was helped by a 21% increase in both European scheduled and North Atlantic traffic. Glasgow saw a decrease of 1.9%

In total the number of air transport movements at BAA's UK airports increased by 2.9%. Cargo tonnage was down by 2.1%

Traffic figures, including passenger numbers and cargo tonnage, are not necessarily an indication of the financial performance of the Group and should not be considered in isolation; many other factors and events can impact the Group's operations and results. For the avoidance of doubt, traffic figures do not constitute a forecast of the profits of the Group.
