#### Management's Discussion and Analysis

For the Period Ended May 31, 2006

#### **Overview**

This Management's Discussion and Analysis (MD&A) of the financial position and results of operations of Soho Resources Corp. ("Soho") includes its wholly-owed subsidiary Samarkand de Mexico S.A. de C.V. ("Samarkand") and its 90% owned subsidiary, Sacramento de la Plata S.A. de C.V. ("Sacramento"), (collectively referred to as the "Company"). The MD&A should be read in conjunction with the unaudited interim consolidated financial statements for the period ended May 31, 2006 and the audited consolidated financial statements for the fiscal year ended February 28, 2006. The information in this MD&A contains forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those included in the forward-looking statements. The forward-looking statements are only made as of the date of this MD&A, July 27, 2006.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of the amounts shown for resource properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete development, and upon future profitable production.

#### **Summary of Operations**

Soho's principal business activity is the acquisition and exploration of resource properties. The Company, through its Mexican subsidiaries, owns a majority interest in a mineral exploration and mining project located in Durango State, Mexico. The Company is a reporting issuer in the provinces of British Columbia and Alberta, Canada, and trades on the TSX Venture Exchange under the symbol "SOH". Additional information may be obtained from the Company's web site (www.sohoresources.ca) and SEDAR (www.sedar.com).

In the spring of 2004, the Company began an exploration program on its Mexican Tahuehueto mineral property. This program consisted of induced polarization geophysical surveying, geological mapping and sampling and grid establishment, and detailed sampling of exploration adits in several zones. During June 2005 the Company completed a 4,000 meter reverse circulation drill program to drill test possible extensions along mineralised trends and follow up induced polarization anomalies delineated during previous exploration. In June 2005 the Company commenced a 5,000 meter diamond core drilling program which was completed in December 2005.

The Company re-commenced exploration activities in mid-January 2006. Under the current drilling program the Company plans 18,000 metres of drilling using two diamond drills to test five mineralized structures.

During the period ended May 31, 2006 the Company has raised \$5,947,144 through equity private placements and the exercise of previously outstanding warrants and stock options.

At May 31, 2006 the Company had working capital of \$4,503,498. The operations of the Company have primarily been funded by the issuance of capital stock and loans from related parties. The Company's ability to continue as a going concern is dependent on obtaining continued financial support, completing public equity financing or generating profitable operations in the future.

Long-term debt	-	-	-	-	-	-	-	-

The fiscal 2005 Q2, and Q3 losses and total assets have been amended from the amounts previously reported as a result of adjustments relating to the calculation of stock-based compensation. The Q2 losses increased by \$54,689, the Q3 loss decreased by \$14,027, and the Q3 total assets increased by \$998 as a result of these adjustments.

The losses for each of the 2005/2006 fiscal periods fiscal period have increased generally as a result of the increased business activities associated with new equity financings and the exploration of the Company's Tahuehueto mineral property.

In the quarter ended November 30, 2004, the net loss includes a write-down of \$330,922 associated with the subsequent disposal of its oil and gas properties in December 2004.

During the period ended May 31, 2005, the Company raised approximately \$1,928,000 in cash by the issuance of 6,040,976 common shares and equity units, before paying cash commissions of \$112,500.

In the third quarter ended November 30, 2005 the Company received \$112,543 from the issuances of shares pursuant to the exercise of options and warrants, and raised a further \$640,000 by way of share subscriptions received in advance for a private placement financing completed on December 1, 2005. During this quarter the Company spent a further \$633,903 on the exploration of its Tahuehueto mineral property.

During the 2006 Q4 period the Company engaged two new consultants, increasing consulting and investor, relations fees by \$27,000. Also during this quarter, management and consultants made several trips to the USA, eastern Canada, Mexico and Europe to promote the Company's business and obtain financing. These trips resulted in increased travel costs of \$95,000.

Also during the 2005/2006 fiscal periods, the Company granted stock options resulting in new charges to the Statement of Operations not incurred in the previous fiscal 2004 quarters. In fiscal 2005, the quarterly losses include stock-based compensation charges totaling \$345,519 and \$443,434 in the year ended February 28, 2006 for the fair value of stock options granted. A large part of the 2006 options were granted in the Q4 period resulting in a \$120,000 increase in stock-based compensation expense compared to the expense incurred in each of the first three quarters of fiscal 2006.

In the 2006 Q4 period, total assets increased approximately \$906,000. This is primarily a result of the Company incurring a further \$538,000 of deferred exploration costs, a net increase in exploration advances of \$15,300, an increase in prepaid and receivables of \$29,400, and a net increase in cash of approximately \$330,000. During the same time, deferred financing costs and equipment decreased by \$6,100.

During the 2006 Q4 period the company received gross cash proceeds of \$1,365,000, excluding the \$640,000 share subscriptions received in Q3 as mention above, and issued 6,623,750 shares pursuant to private placement-financings, and the exercise of options and warrants.

During the period ended May 31, 2006, the Company has raised approximately \$5,947,000 in cash by the issuance of 10,633,152 common shares and equity units, excluding any finders' fee shares.

The 2007 Q1 loss increase is due to the further increase in business activities resulting in higher administrative expenses. These costs include increased professional fees for legal, accounting, and audit services of \$54,000; and communications costs associated with website maintenance, corporate brochures, and presentations of \$11,000. During this quarter, management and consultants made several trips to the USA, eastern Canada, Mexico and Europe to promote the Company's business and obtain financing resulting in travel costs increasing by \$20,000; business promotion cost increases of \$4,000; and investor relations cost increases of \$50,000, including the additional consultants referred to above in 2006 Q4. The Company has also hired two more administrative employees resulting in both wages expense and general office increasing by \$16,000.

# Resource Properties and Investments Tahuehueto Mine Project, Mexico

and the second

#### Overview

Through a 90%-owned Mexican subsidiary, Soho Resources Corp. controls 100% of the Tahuehueto project situated in a historic mining district of northwestern Durango State. The 2,062-hectare property covers at least 12 known mineralized zones hosted within a structurally controlled epithermal system that has been traced for more

Tahuehueto lies within the prolific Sierra Madre mineral belt, which hosts a series of historic and producing mines and most of Mexico's active exploration and development projects. The project is situated approximately 100 kilometres southwest of silver mines in the Guanacevi region, and about 25 kilometres north of the silver mines at Topia.

Access to the property is by road, about nine hours from Durango City, or by fixed-wing aircraft to the Company's on-site landing strip, which is currently being upgraded. The project site is remote, with only a few small villages in this portion of the Municipality of Tepehuanes.

Spanish explorers were the first to discover the gold-silver veins at Tahuehueto, but were unable to process the sulphide mineralization. Various companies explored the property, starting in the early 1900s, leading to development of underground workings and limited historic production. Soho acquired rights to the project in 1997, shortly after the Mexican government reformed its mining laws and adopted new policies aimed at attracting foreign investment to the mining sector. The Company was attracted to Mexico because of its vast geological potential and favorable investment climate, and to the Tahuehueto project because of the evidence of a highly mineralized epithermal system, past exploration activity, and excellent potential for significant new-discoveries. It was also noted that geologically similar deposits in nearby districts have produced millions of ounces of gold and silver, along with associated base metals in some cases, from multiple zones and structures. One such example is the La Cienega mine, owned and operated by Penoles, Mexico's largest mining company. This large-scale underground mine hosts more than one million ounces of gold in reserves, and also produces silver, lead and zinc. Another is San Dimas, which hosts several large underground mines that have produced more than 9 million ounces gold and 700 million ounces silver from about 22 structures. Goldcorp Inc. controls the San Dimas mine and surrounding district through its subsidiary Luismin Mines.

#### **Exploration Highlights**

Soho's exploration programs have significantly enhanced the overall potential of the Tahuehueto property. The Company is particularly encouraged by the strength of the mineralization, the continuity and number of structures, and the widths of the mineralized veins within the structures tested to date. Since December 2004 the Company has drilled approximately 90 holes totaling 9,000 metres. Analytical results for these holes are available for viewing on the Company's web site.

At El Creston, the most exposed and currently the largest and most advanced zone, drilling and sampling programs have revealed evidence of at least a 2.5-km mineralized structure with potential over a minimum 4-km length, while returning positive results, including some "bonanza-type" grades. Significant results include: 15.43 grams gold and 61.57 grams silver per tonne, 0.39% copper, 1.85% lead and 3.84% zinc over 12.8 metres from Hôle RC-18; and 7.2 grams gold, 52.08 grams silver, 0.42% copper, 1.07% lead and 2.68% zinc over 11.94 metres from DDH 05-29. Several recent drill holes returned significant gold and silver values while also extending the important El 1225 ore-shoot. The highlight was an 8.54-metre intersection of 12.5 grams gold and 79.2 grams silver per tonne.

Ongoing drilling is aimed at defining indicated and inferred resources at this important polymetallic zone, which is believed to be related to several other prospective zones that are yet to be fully explored.

Soho has also encountered success while exploring other known zones at Tahuehueto. An underground channelsampling program returned significant values for precious and base metals from the prospective El Rey zone, situated about 465 metres east of El Creston. The program also demonstrated good continuity of mineralization within the zone, and potential for expansion along strike, and down and up-dip.

The underground channel-sampling program at El Rey was the first ever conducted by the Company to test the zone, which had been previously developed on four levels. Channels were cut every 4 metres across the structure from Level 1. A total of 98 samples were collected in 38 channels over a strike length of 152 metres. Samples collected at El Rey averaged 1.92 grams gold and 220 grams silver per tonne, plus 0.019% copper, 4.09% lead and 7.16% zinc, with an average width of 1.23 metres. The best assay values to date from El Rey are 8.98 grams gold, 3,900 grams silver, 0.6% copper, 19.1% lead and 28.7% zinc.

A recent channel-sampling program at Level 2 confirmed mineralization-trending for than 173 metres, with an average grade of 0.86 gram gold, 208.3 grams silver, 0.19% copper, 3.07% lead, and 5.27% zinc over an average width of 1.72 metres. Initial sampling programs from Level 3 also returned positive results, white two holes drilled from Level 2 intersected targeted mineralization at depth, 50 metres below Level 4.

The El Rey zone remains open for expansion and will be further tested from three additional levels, some larger than Level 1. Rehabilitation work to access Level 4 and a portion of Level 3 will be carried out in the coming months. As at El Creston, ongoing drilling at the priority El Rey zone is aimed at defining indicated and inferred resources.

A surface channel-sampling program was conducted at the Santiago Zone, situated more than 1 km northeast of the El Creston Zone. The program returned gold and silver values that also confirmed the potential of the northeastern portion of the Tahuehueto project. Unlike El Creston, which hosts gold-silver mineralization with associated base metals. Santiago is one of several gold-silver zones in the northeastern portion of the Tahuehueto project that are yet to be fully explored.

Highlights of the program include: 3.11 grams gold and 76.65 grams silver over 15 metres; 3.64 grams gold and 25.05 grams silver over 18 metres; and 4.94 grams gold and 194.97 grams silver over 4.5 metres.

A total of 124 samples were collected from 8 channels cut across the Santiago Zone, which has an exposed potential length of 180 metres and was sampled along a length of 128 metres. The zone ranges in width from 16.5 metres to 7 metres, with widths diminishing down-slope as the zone disappears under cover, and remains open in both directions, as well as down-dip. Additional mapping, channel sampling and drilling are planned to test the zone, which may be an extension of the nearby Perdido zone.

#### Expanded 2006 Program – Goals and Objectives

Grant Bright Control of the Control

and the state of t

Sono intends to use the proceeds of a \$5.52-million, institution-led private-placement financing to accelerate the pace of exploration at Tahuehueto. This major financing combined with highly encouraging results of recent exploration programs have allowed the Company to set new growth-oriented objectives that better reflect the property's potential for multiple deposits and discoveries. The initial goal was to define resources at El Creston, but the focus has since broadened to include other priority zones that will be tested in an expanded \$3.8-million work program planned for the balance of 2006. This shift in strategy is aimed at adding value to the property through a program specifically focused on defining resources as efficiently as possible.

At least 18,000 metres of drilling using two diamond drills are now planned to test five mineralized structures. The primary goal of the expanded program is to outline indicated and inferred resources at the advanced El Creston Zone through 5,500 metres of drilling, and also at the El Rey Zone, where 3,500 metres of drilling are planned. Another important goal is to define inferred resources at three other zones, with 2,000 metres of drilling planned for Cinco de Mayo, 4,000 metres for El Creston South Extension, and 3,000 metres at the Santiago Zone.

Soho also plans to carry out a regional program that will include geological and structural mapping and airborne geophysical surveys to better determine the extent and potential of other zones at Tahuehueto. The results of this regional work will added to the growing geological database that will guide future exploration program.

To support the accelerated work program, camp facilities will be upgraded and expanded, along with infrastructure such as the airstrip and access roads. These improvements will set the stage for future development and preproduction programs, and also demonstrate the Company's long-term commitment to Tahuehueto and surrounding district.

#### **Environment and Community**

Soho conducts its exploration and development activities in a socially and environmentally progressive manner consistent with the principles of Sustainable Development. Particular emphasis is placed on establishing good relationships with community leaders and state authorities to ensure citizens are kept informed of our activities.

As the Tahuehueto project advances from exploration and development to the pre-feasibility stage, environmental baseline studies will lay the foundation for more detailed programs examining all aspects of potential mine

development to ensure the highest standards of environmental protection. The Company will continue to comply with all regulations and closely monitor its activities to minimize damage to the ecosystem.

Soho participates in a range of social initiatives in support of local communities, and has already helped to establish schools and improve electrical, water supply and sanitation facilities. Local hiring and procurement policies have been adopted to ensure that benefits flow to the communities and region surrounding the project.

#### **Financing Activities**

During the period ended May 31, 2006, pursuant to a private placement financing, and the exercise of options and warrants, the company received gross cash proceeds of \$5,962,144 and issued 10,683,512 shares at an average price of \$0.56. This includes 50,000 shares issued for cash proceeds of \$15,000, subsequent to May 31, 2006 pursuant to the exercise of stock options.

Details of the above mentioned share issuances are available in the notes to the Company's financial statements for the period ended May 31, 2006.

Proceeds from the warrant, options, and private placement financings were utilized in the Company's Mexican operations and for general working capital purposes. All of the above financing transactions have received regulatory approval where applicable.

#### Liquidity

At May 31, 2006, the Company had working capital of \$4,503,498. Recent financings have eliminated the working capital deficiency that existed at the February 28, 2006 year end, and have provided funds both for the Company to continue its exploration program and for general working capital purposes. However, the Company's ability to, continue as a going concern is dependent on obtaining continued financial support, completing public equity financing of generating profitable operations in the near future.

#### **Investor Relations**

In addition to other management services, Frank Port is currently handling investor relation activities. (See above section on Management Agreements)

#### **Related Party Transactions**

In addition to certain related party transactions mentioned above, the Company had additional significant transactions with related parties, as are summarized below.

CMB Investments Ltd (CMB), a company controlled by a director, charged the Company a total of \$22,500 for management services. This is compensation for time spent on administrative, financial, and operational affairs of the Company. In September 2004 Soho entered into a management services contract with CMB. Under the terms of this agreement, CMB is charging Soho a management fee in the amount of \$7,500 per month.

The Company also paid fees for investor relations of \$15,000 to a company controlled by Mr. Port, an officer of the Company.

The Company had experienced past difficulties in securing drilling contractor services, with the appropriate equipment, on a timely basis. As a result, in April 2005, the Company entered into an agreement with Mexcore S.A. de C.V. ("Mexcore"), a Mexican based drilling company a company controlled by Mr. Shearing, a director. Mexcore had a suitable diamond drill and heavy equipment available to meet the Company's immediate needs. Pursuant to this agreement, the Company has agreed to pay Mexcore for drilling services rendered, and equipment rental, under terms and at rates consistent with those charged by third parties within the drilling industry. During the period ended May 31, 2006, Mexcore has charged the Company \$198,307 for drilling services and \$34,300 for equipment rental.

These transactions are in the normal course of operations and are measured at the exchange amount which is the amount established and agreed to by the related parties.

#### **Results of Operations**

The Company incurred \$422,093 in general and administrative plus interest expenses during the period ending May 31, 2006. Generally, expenses increased as a result of the increase in business activities compared to the prior fiscal period.

Professional fees include legal, accounting, and audit fees. Legal and accounting fees increased as a result of the increase in corporate filings, contracts, and agreements. These transactions also account for the increase in regulatory fees as the Company was required to submit many of these transactions to regulatory authorities for approvals. Furthermore the overall increase in the volume of transactions has increased administrative costs including current accounting fees and other and the accrual of the estimated audit cost for the 2007 fiscal year.

Consulting fees include fees paid for corporate communication services and financial consulting associated with the Company's on going search for additional sources of financing.

Communications expense includes the costs of Soho's office telephones, fax, mobile phones, web site design and maintenance, web hosting and internet access services.

Wages and benefits increased as the Company hired two more full time administrative personnel.

Travel expenses include the costs of vehicles, airfares, accommodation, and meals for a variety of business trips related to securing financing and meetings connected with the Tahuehueto property.

Except as may be otherwise indicated, all of the above noted transactions have received regulatory approvals, where required.

#### Critical Accounting Estimate

#### Asset Retirement Obligation

The Company estimates its asset retirement obligation at the Tahuehueto property based on its understanding of its requirements to reclaim the currently disturbed areas. The Company has accrued \$37,500 as a retirement obligation. The asset retirement obligation is considered to be present value.

The asset retirement obligation accrual required management to make significant estimates and assumptions. Actual results could differ from these estimates.

#### **Internal Controls**

Management maintains a system of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Company is recorded, processed, summarized and reported on a timely basis. Based on an evaluation performed for the year ended February 28, 2006, the Company's certifying officer has concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report to provide reasonable assurance of the achievement of these objectives.

Management has not made any change in the Company's system of internal controls over financial reporting during the most recent interim period that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

#### **Financial Instruments**

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities, obligation under share purchase agreement, loans payable and due to related parties. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

Supplemental disclosure with respect to cash flows (Note 6)

The accompanying notes are an integral part of these interim consolidated financial statements.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS MAY 31, 2006

(Unaudited – prepared by management)

#### 1. NATURE AND CONTINUANCE OF OPERATIONS

The Company is incorporated under the laws of British Columbia. Its principal business activities consist of the acquisition and exploration of resource properties.

The accompanying unaudited interim consolidated financial statements of Soho Resources Corp. include the accounts of the Company and its wholly-owed subsidiary, Samarkand de Mexico S.A. de C.V. ("Samarkand") and its 90% owned subsidiary, Sacramento de la Plata S.A. de C.V. ("Sacramento"), (collectively referred to as the "Company"). All inter-company transactions and balances have been eliminated upon consolidation.

These financial statements should be read in conjunction with the Company's annual audited consolidated financial statements for the fiscal year ended February 28, 2006. All material adjustments which, in the opinion of management, are necessary for a fair presentation of the results of the interim periods have been reflected. The results for the three month period ended May 31, 2006 are stated utilizing the same accounting policies and methods of application as the most recent annual financial statements, but are not necessarily indicative of the results to be expected for the full year.

The Company follows the current rate method of translation, which translates foreign assets and liabilities at the rate of exchange at the balance sheet date. Revenues and expenses are translated into Canadian dollars at the average rate of exchange throughout the period. Gains and losses arising from translation of the financial statements are deferred and disclosed as a separate component of shareholder's equity. These financial statements are stated in Canadian dollars. Transactions associated with the Company's Mexican resources properties are measured in both Canadian dollars and Mexican pesos, depending on the nature and source of the transaction.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of the amounts shown for resource properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production.

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the on-going assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company have primarily been funded by the issuance of capital stock and loans from related parties. The Company's ability to continue as a going concern is dependent on obtaining continued financial support, completing public equity financing or generating profitable operations in the future.

#### 3. **MINERAL PROPERTIES**

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

### Tahuehueto Project

In 1997, pursuant to a share purchase agreement the Company acquired, through its wholly-owned Mexican subsidiary Samarkand de Mexico, 90% of the issued and outstanding capital stock of Sacramento Sacramento holds a 100% interest in the Tahuehueto mineral property, located in Durango State, Mexico. The property is subject to a 2% net smelter returns royalty.

Pursuant to the share purchase agreement, the Company is obligated to make a final payment of US\$250,000 (Cdn\$285,000) to the vendors of the Sacramento shares.

Mineral property costs incurred on the Tahuehueto Project were incurred as follows:

#### Asset retirement obligation

The Company estimates its asset retirement obligation at the Tahuehueto property based on its understanding of its requirements to reclaim the currently disturbed areas. The Company has accrued \$37,500 as a retirement obligation. The asset retirement obligation is considered to be present value.

The asset retirement obligation accrual required management to make significant estimates and assumptions. Actual results could differ from these estimates.

On May 16, 2006 the Company completed a non-brokered private placement of 9,200,000 units at \$0.60 per unit for total proceeds of \$5,520,000. Each unit consisted of one common share and one transferable share purchase warrant. Each share purchase warrant is exercisable for a period of two years at a price of \$0.80 per share. The Company issued 276,000 units as finders' fees.

### 5. STOCK OPTIONS AND WARRANTS

The Company is authorized to grant options to executive officers, directors, employees and consultants enabling them to acquire up to 20% of the issued and outstanding common stock of the Company, on a fixed basis. Options may be granted at an exercise price of no less than a 25% discount of the market price on the date of the grant, or such higher price as determined by the board of directors. Options can be granted for a maximum term of 5 years. The options vest 25% upon the date of grant, and then at a rate of 12.5% to 25% every 3 months thereafter.

In December 2005 the Board of Directors approved a new 2006 Stock Option Plan. Under the 2006 plan, the Company is authorized to grant options to executive officers, directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company, on a rolling basis. Options may be granted at an exercise price of no less than a 25% discount of the market price on the date of the grant, or such higher price as determined by the board of directors. Options can be granted for a maximum term of 5 years. Vesting is not required but may be set on an individual basis as determined by the board of directors. The 2006 plan is subject to shareholder approval.

#### Stock-based compensation

The Company has granted an additional 1,588,002 options that will become effective on the date of shareholder approval of the 2006 Stock Option Plan, These options vest 25% upon the date of grant, and then at a rate of 25% every 3 months thereafter, until fully vested. These options are subject to shareholder approval; accordingly they have been excluded in these financial statements.
