INTERIM DIVIDEND

The Board does not recommend an interim dividend for the six months ended 30th June, 2006 (2005: nil).

FINANCIAL PERFORMANCE

For the six months ended 30th June, 2006, the Group recorded a loss attributable to equity holders of approximately US\$4.1 million. Compared with the same period in 2005, the total consolidated turnover decreased from US\$846.9 million to US\$789.3 million, representing a decrease of approximately 6.8% while overall gross profit margin decreased from 12.4% to 8.1%.

BUSINESS REVIEW

Agribusiness
 Compared with the same period in 2005, the consolidated turnover of the Group's agribusiness decreased by 6.8% to US\$789.3 million. The drop was due to the slowdown in the breeding and rearing industry in China, a reduction in the demand for feed and commercial day-old-chicks ("DOCs"), and also the changing business environment in the poultry meat business in China.

The Group's complementary agribusiness model has four major segments - feed, food integration, breeding and rearing, and biochemical.

Feed

In the first half of 2006, feed remained the largest contributor to the Group in sales, accounting for 57.0% of the Group's total turnover (2005: 56.8%). The Group's feed products include poultry, swine, aqua, duck and cattle feed, among which poultry and swine accounted for 50% and 38%, respectively, of the total feed sales. Growth in aqua sales increased to 6.3%, up to now, production volume of aqua feed has reached 91,000 tones.

Due to the diminishing return seen by the animal breeders, which reduced the demand for feed, and the drop in the China domestic market price of broilers and swine feed, the Group's consolidated turnover declined 6.4% from the same period last year while gross profit margin went down 2.8%, from 15.4% to 12.6%.

Food Integration

The food integration business accounted for about 27.9% of the Group's total consolidated turnover in the first half of 2006 (2005: 28.4%). Consolidated turnover in this segment fell by 8.5% compared with the same period last year.

The food integration business's products include raw food and cooked food, among which raw food constituted 74.3% of the consolidated sales volume. In the first half of 2006, sales volume of raw food rose by 10.9%, which is the initial result of the Group's intensive promotion of its food products under the brand name "Chia Tai". However, the selling price of poultry products entered into a slump under the taint of the bird flu pandemic looming across the industry. As a result, the gross profit of this segment was negatively affected.

On the other hand, business growth in the cooked food sector has improved considerably. Consolidated sales volume of cooked food edged up 32.1%, or 6,200 tones, as compared with the same period last year. Approximately 76.5% of the total cooked food products is for export, mainly to Japan. Compared to the same period last year, export volumes rose 39.6%, reaching a total of 19,000 tones.

The Group's cooked food products have been met with confidence by foreign importers. Since Japan introduced a "Positive List System for Agricultural Chemical Residues" across all imported poultry products, many other companies lost the exportation opportunity after failing to pass the requirements in breeding and rearing, as well as quarantine control.

The Group has adopted a completely closed management system for poultry breeding and a comprehensive quarantine control program; hence, the Group's product quality is unanimously affirmed by the Japanese importers.

Breeding and Rearing

Breeding and rearing accounted for 3.9% of the Group's total consolidated turnover (2005: 4.2%). During the period under review, the segment's consolidated sales dropped by 13.3% as market price was hampered by a slump in poultry meat market. Compared to the same period last year, the market price of DOCs dropped significantly. Market price per bird averaged RMB1.55, which is equivalent to a drop of 32.0% compared to that of the same period last year.

During the recent years, the Group has also expanded into swine rearing. For the first half of the year, the swine breeding and rearing business constituted 26.8% of the overall breeding and rearing business.

Biochemical

The Group's biochemical products include Chlortetracycline ("CTC"), Di-Calcium Phosphate and L-Lysine monohydrochloride ("L-Lysine"). In the first half of 2006, turnover of this segment accounted for 4.9% of the Group's total turnover (2005: 5.0%). During this period, the reduction in sales volume of Di-Calcium Phosphate and L-Lysine products affected the segment performance, while the sales volume and gross profit margin of CTC rose 9.7% and 28.7%, respectively. As a result, overall consolidated gross profit margin edged up slightly to 21.1% from 19.1% of last year.

Industrial Business

This business is operated by the Group's jointly controlled entities. Benefiting from the sustained growth in the China economy, the industrial business line reported a growth of 27.2% in turnover, from US\$121.5 million to US\$154.6 million, during the first half of this year compared with the same period in 2005. Overall, profit attributable to the equity holders from the industrial business amounted to US\$0.7 million, which was US\$0.1 million more than that of the same period last year.

LIQUIDITY AND FINANCIAL RESOURCES

As at 30th June, 2006, the Group had total assets of US\$922.5 million (31st December, 2005: US\$925.4 million). Total debt and debt to equity ratio (debt to equity ratio is calculated by dividing the total borrowings by the equity including minority interests) were US\$530.4 million and 505.8% respectively, as compared to US\$525.4 million and 347.4% as at 31st December, 2005.

Most of the borrowings by the Group are in U.S. dollars and RMB, and the interest rates ranged from 4.6% to 9.8% per annum for the period.

The Group had not engaged in any derivatives for hedging against both the interest and exchange rate.

Capital structure

The Group finances its working capital requirements through a combination of funds generated from operations and short term and long term bank loans. The Group had cash and cash equivalents of US\$35.4 million as at 30th June, 2006 (31st December, 2005: US\$66.0 million), a decrease of US\$30.6 million.

Charges on Group assets

As at 30th June, 2006, out of the total borrowings of US\$530.4 million (31st December, 2005: US\$525.4 million) obtained by the Group, only US\$169.1 million (31st December, 2005: US\$143.3 million) were secured and accounted for 31.9% (31st December, 2005: 27.3%) of the total. Certain of the Group's property, plant and equipment and land lease prepayments located in the PRC with net book value of US\$207.0 million (31st December, 2005: US\$218.7 million) have been pledged as security for various short and long term bank loans.

Contingent liabilities

As at 30th June, 2006, the guarantees provided by the Group were US\$19.4 million (31st December, 2005: US\$7.4 million).

Employee and remuneration policies

As at 30th June, 2006, the Group employed around 37,000 staff (including 10,000 staff from the jointly controlled entities and associates) in the PRC and Hong Kong. The Group remunerates its employees based on their performance, experience and prevailing market rate while performance bonuses are granted on a discretionary basis. Other employee benefits include insurance and medical coverage, subsidized training programmes, as well as a share option scheme.
