Reference is made to PTTEP Hoan Vu Company Limited and PTTEP Hoang Long Company Limited, subsidiaries of PTT Exploration and Production Public Company Limited (PTTEP), which have participation interests in the Vietnam 9-2 project and Vietnam 16-1 project. PTTEP wishes to announce the drilling results as follows:

1. Vietnam 9-2 Project: The company began drilling the appraisal well, CNV-4X ST, in Ca Ngu Vang Structure, on June 5th, 2006. The well was drilled to a total depth of 6,330 meters, resulting in petroleum discoveries, with a total combined flow rate of approximately 7,050 barrels of oil equivalent per day (BOED), comprising 5,330 barrels of oil per day and 10.30 million standard cubic feet of natural gas per day.
2. Vietnam 16-1 Project: The company drilled the appraisal well, TGT-4X, in sub structure of Te Giac Trang prospect, on August 31, 2006. The well was drilled to a total depth of 3,537 meters, resulting with a flow rate of approximately 600 barrels of oil pay day. The trap had been breached and only residual oil was encountered.
