Lonmin today announces its production report for the twelve months to 30 September 2006 (unaudited).

Brad Mills, Chief Executive Officer said:

"Our mining operations had a record year producing 1,017,137 Platinum ounces in concentrate ahead of our 1 million ounce target. Marikana continued to ramp up underground production with underground tonnes mined up 8.1% on last year. As planned we continued to scale back our opencast operations with Marikana's opencast tonnes mined down 23.4%. Limpopo delivered 50,404 Platinum ounces in concentrate for the year in line with our forecasts. In the last quarter of the year we achieved stable Smelter operations and the Process Division recovered quickly from September's fire in the Precious Metal Refinery. We recorded total sales for the year of 952,682 ounces of Platinum and 1,817,624 ounces of total Platinum Group Metals up 4.4% and 7.4% respectively on last year. During the year we sold approximately 20% of our full year's PGM sales as concentrate due to our Smelter rebuild programme and other processing outage issues. These sales carry a lower margin than refined metal sales. Cost pressures increased in the second half and we now believe that full year Marikana C1 costs of own production net of by-product credits will be around R2,400 to R2,450 per PGM ounce sold."

Mining

				12 months to 30 September 2006	12 months to 30 September 2005
