Press Release

SUPPL

Air Liquide acquires 100% of Japan Air Gases (JAG)

Air Liquide, which currently owns 55% of Japan Air Gases (JAG) and has operational management, announces the purchase of the remaining 45% currently held by The Linde Group, based on an enterprise value which represents 9.5x EBITDA. Consequently The Linde Group will receive €590M. The completion of this transaction is subject to approval by the European competition authorities. JAG total revenues are estimated in 2006 to be around €930M and are currently fully consolidated in the Group's accounts. This acquisition will have a positive impact on the Group's results from 2007.

Japan Air Gases (JAG) was created in January 2003 following the merger of the industrial and medical gas businesses of Air Liquide Japan and Osaka Sanso Kogyo (BOC's Japanese subsidiary). Following the successful integration, Japan Air Gases has become a significant player in the Japanese market, employing more than 2,000 people. Over the past four years, the company has made investments of more than 300 million euros, half during the course of 2006 alone, in order to accompany the development of its customers. Most recently, a promising partnership was established between JAG and Toshiba Corporation for the supply of services relating to the analysis and evaluation of products and equipment for the electronics industry.

Air Liquide has been present in Japan since 1907, supplying gas to the shipbuilding industry which required oxygen and acetylene welding and cutting techniques. Today, Japan is a strategic market for Air Liquide, where in addition to Japan Air Gases, it has a Research Center, an Engineering center and has also located its worldwide Electronics division management.

Benoit Potier, Chairman and Chief Executive Officer of the Air Liquide Group, declared: "This reinforcement of our position in Japan constitutes a new major strategic step forward for the Group in Asia, precisely when the Japanese market has returned to growth. From now on, thanks to Air Liquide's presence in more than 70 countries, Japan Air Gases will be able to accompany its customers in their developments throughout the world. Today, with nearly 20% of the Group's revenues, Asia lies at the heart of our growth strategy."

Present in 72 countries, Air Liquide is the world leader in industrial and medical gases and related services. The Group offers innovative solutions based on constantly enhanced technologies. These solutions, which are consistent with Air Liquide's commitment to sustainable development, help to protect life and enable our customers to manufacture many indispensable everyday products. Founded in 1902, Air Liquide has nearly 36,000 employees. The Group has successfully developed a long-term relationship with its shareholders built on trust and transparency and guided by the principles of corporate governance. Since the publication of its first consolidated financial statements in 1971, Air Liquide has posted strong and steady earnings growth. Sales in 2005 totaled 10,435 million euros, with sales outside France accounting for almost 80%. Air Liquide is listed on the Paris stock exchange and is a component of the CAC 40 and Eurostoxx 50 indices (ISIN code FR 0000120073).

Paris, December 19, 2006

Press Release
CORPORATE FINANCIAL**Australia: Three successes in the coal mining industry**

With 30% of the world total, Australia is the world's largest exporter of black coal which is Australia's largest export. In 2005/06 this was worth around 15 billion euros exports which is an increase of 43% over 2004/05. The mining industry is likely to remain a key driver in the continuing growth of Australia's business investment over the coming years.

In this context, Air Liquide has gained three nitrogen contracts for coal mine use with world leading mining companies for AMSA series Floxal units. In the AMSA units, nitrogen is extracted from the air directly on the customer site using selective polymer membranes.

Coal has a propensity to self heat during and after mining resulting sometimes in a "spontaneous combustion" event. Traditionally, in underground mines heating events mean that the mine must be evacuated, the seals shut and waiting for the problem to stabilise by itself – which may or may not occur. Air Liquide's AMSA Floxal units provide an effective mobile inerting system that reduces the localized concentration of oxygen. This prevents gas explosions in underground mines. The mobile system units offer the advantage of being used proactively, thus eliminating the risk of spontaneous combustion and at the same time providing unique benefits to the mines in terms of safety, reliability and cost-effectiveness. The units are unmanned and are remotely monitored using Air Liquide's tele-monitoring systems.

The first 55 tonnes per day mobile AMSA nitrogen unit went to Anglo Coal's Dartbrook mine near Newcastle 300km north of Sydney. This was innovative, being the first of its kind and size to be used for proactive inerting in coal mines around the world. The second unit was commissioned in October at the Austar mine 200km north of Sydney, and the third unit will be delivered to Xstrata Coal's Oaky Creek mine in Central Queensland next April.

Jean-Pierre Duprieu, Senior Vice-President Asia Pacific and member of Air Liquide's Executive Committee, stated: "*We support our customers in their development by offering innovative custom-made solutions which help them strengthen their efficiency and safety. Mining has been identified as a growth market in Australia and these important successes in this sector with this unique solution illustrate the Group's capacity to grow into new markets and territories.*"

Anglo Coal, a wholly owned division of Anglo American plc, is one of the largest private sector coal producers in the world. It produces high quality coking coal used for steel production as well as thermal coal for power generation and industrial applications. Austar is a wholly owned subsidiary of Yanzhou Coal Mining Company Limited (Yanzhou) of China. Yanzhou is one of the four largest coal miners in Eastern China, with six underground mines in Shandong Province producing more than 40 million tonnes per annum of coal. Xstrata is a major global diversified mining group headquartered in Switzerland. It produces in excess of 70 million tonnes of coal each year, of which more than 50 million (77%) comes from Australia.

Present in 72 countries, Air Liquide is the world leader in industrial and medical gases and related services. The Group offers innovative solutions based on constantly enhanced technologies. These solutions, which are consistent with Air Liquide's commitment to sustainable development, help to protect life and enable our customers to manufacture many indispensable everyday products. FORMULAIRE DE DECLARATION D'ACTIONS ET DE DROITS DE VOTEModèle à adresser en application de l'article L. 233-8 II du code de commerce à**AMF**

Autorité des marchés financiers

Direction des Emetteurs

17, place de la bourse

75002 PARIS

Tel : 01 53 45 62 77/48

Fax : 01 53 45 62 68

En application de l'article L. 233-8 II du code de commerce et de l'article 222-12-5 du règlement général de l'AMF, les sociétés dont des actions sont admises aux négociations sur un marché réglementé publient sur leur site Internet et transmettent à l'AMF, à la fin de chaque mois, le nombre total de droits de vote et le nombre d'actions composant le capital de la société s'ils ont varié par rapport à ceux publiés antérieurement. Ces sociétés sont réputées remplir l'obligation prévue au I de l'article L. 233-8 du code de commerce.

- Coordonnées de la personne chargée de suivre le présent dossier :

- * Nom et Prénom : ...**BURAY Geneviève**.....
- * Tel : 01 40 62 52 63... Fax : 01 40 62 54 65 Email : genevieve.buray@airliquide.com

- Société déclarante :

- * Denomination sociale : ...**L'AIR LIQUIDE**.....
- * Adresse du siège social : ...**75 Quai d'Orsay - 75007 PARIS**.....

- * Marché Réglementé (Eurolist) :

- Compartiment A Compartiment B Compartiment C

Nombre total d'actions composant le capital de la société déclarante : 121.149.189

Nombre total de droits de vote de la société déclarante : ...121.149.189.....
(comme le prévoit le dernier alinéa de l'article 222-12 du règlement général, le nombre total de droits de vote est calculé sur la base de l'ensemble des actions auxquelles sont attachés des droits de vote, y compris les actions privées de droit de vote).

- * Origine de la variation : ...**Levée d'options**.....
- * Date à laquelle cette variation a été constatée : ...**31/12/2006**.....

Lors de la précédente déclaration en date du ...**30/11/2006**.....

- * le nombre total d'actions était égal à**120.972.084**.....
- * le nombre total de droits de vote était égal à ...**120.972.084**.....

- Présence dans les statuts d'une clause imposant une obligation de déclaration de franchissement de seuil complémentaire de celle ayant trait aux seuils légaux

(cette information n'est pas exigée par la loi, elle sera donc donnée sur une base facultative, l'objectif de l'AMF étant de pouvoir signaler aux actionnaires des sociétés admises sur un marché réglementé l'existence de telles clauses)

- OUI L'Article 9 des Statuts stipule que : Outre les obligations légales de déclaration à la société, toute personne venant à posséder, directement ou indirectement, seul ou de concert, une fraction de capital ou des droits de vote de la société égale ou supérieure à 2% ou à un multiple de 2% du capital ou des droits de vote (y compris au-delà du seuil de 5%), est tenue d'informer la société dans le délai de quinze jours à compter de la date de franchissement du seuil, et ce indépendamment le cas échéant de la date du transfert effectif de la propriété des titres. Le déclarant devra indiquer le nombre de titres de capital et de valeurs mobilières donnant accès au capital qu'il a en sa possession à la date de sa déclaration. Tout franchissement à la baisse du seuil de 2% ou d'un multiple de 2% du capital ou des droits de vote devra être déclaré de la même manière.
