Central Bancorp

| **2007** | *annual report*

| 2007 | *profile*

In 1999, Central Bancorp, Inc. became the holding company for Central Bank, whose legal name is Central Co-operative Bank. The Bank was founded in 1915 as a Massachusetts chartered co-operative bank to provide savings deposits and originate mortgage loans. Between 1970 and 1982, the Bank grew through mergers with six other Massachusetts co-operative banks. In 1994, Central Bank acquired Metro Bancorp, Inc., the parent company of Metropolitan Bank and Trust Company.

In October 1986, Central Bank became a public company by converting to a capital stock co-operative bank. Central Bancorp's common stock is traded over-the-counter on the NASDAQ Global MarketSM. Central Bancorp has paid cash dividends quarterly to shareholders since implementing its dividend policy in October 1996.

Central Bank is a full-service community banking operation that provides a variety of deposit and lending services — including savings and checking accounts for retail and business customers, mortgage loans for constructing, purchasing and refinancing residential and commercial properties, and loans for other consumer and business purposes. Through an arrangement with a third party broker-dealer, the Bank also offers mutual funds and other investment products to its customers.

The Bank operates nine full-service offices in the Massachusetts communities of Somerville, Arlington, Burlington, Chestnut Hill, Malden, Medford, Melrose and Woburn (two branches), a limited service branch at Woburn High School, and a stand alone 24-hour automated teller machine in Somerville.

| *dear shareholder*

Fiscal 2007 earnings for Central Bancorp were \$1.02 million, or 70 cents per diluted share, compared to earnings of \$2.64 million, or \$1.84 per diluted share, in the prior fiscal year.

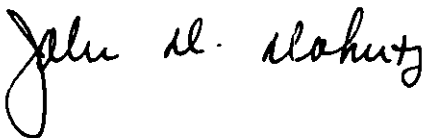

During the past two years, a very unfavorable flat to inverted yield curve and intensified competition in the markets we serve have continued to adversely affect our performance. These pressures have required us to offer higher rates on deposit accounts without proportionally increasing the rates we charge for residential and commercial loan products. Consequently, profit margins have been squeezed.

In response to this continuing environment, we've reduced certain operating expenses without jeopardizing the quality of our products or the customer service we provide. Furthermore, total assets of \$566.1 million and total loans of \$460.5 million at March 31, 2007 were both at the *highest* levels in our Company's history. Compared to March 31, 2006, total assets grew nearly \$19 million and total loans increased more than \$45 million. Through the use of aggressive liability management, we employed more cost effective Federal Home Loan Bank advances to fund loan growth, allowing more costly deposits to decline by \$5 million during the year.

Although we expect the flat to inverted yield curve to continue into the current fiscal year, we remain optimistic about our ability to improve shareholder value over the long-term. Our newest full-service branch office, which opened in June 2006, performed well in its first year of operations. All of our network branches enjoy an excellent reputation in the eight Massachusetts communities in which they operate. We are committed to closely monitoring our operating expenses while continuing to provide an outstanding array of products and services to our many customers.

In closing, I want to thank our employees at all levels of the Company for their continued hard work and dedication to helping make us a premier community bank. With their ongoing support, we move forward with confidence and diligence.

Sincerely,

John D. Doherty
Chairman, President & Chief Executive Officer

Note on Forward-Looking Statements

When used in this Annual Report on Form 10-K, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The Company cautions readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made, and advises readers that various factors, including changes in regional and national economic conditions, changes in local demographics, unfavorable judicial decisions, substantial changes in levels of market interest rates, technological innovations, credit and other risks of lending and investment activities and competitive and regulatory factors, could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from those anticipated or projected.

The Company does not undertake and specifically disclaims any obligation to update any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

Item 1. Business

General

The Company. Central Bancorp, Inc. (the "Company"), a Massachusetts corporation, was organized by Central Co-operative Bank ("Central" or the "Bank") on September 30, 1998, to acquire all of the capital stock of the Bank as part of its reorganization into the holding company form of ownership, which was completed on January 8, 1999. Upon completion of the holding company reorganization, the Company's common stock, par value \$1.00 per share (the "Common Stock"), became registered under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The Company is a registered bank holding company subject to regulation and examination by the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"). The Company has no significant assets other than a loan to the Employee Stock Ownership Plan ("ESOP") and subordinated debentures as well as common stock of the Bank and various other liquid assets in which it invests in the ordinary course of business. For that reason, substantially all of the discussion in this Annual Report on Form 10-K relates to the operations of the Bank and its subsidiaries.

The Bank. Central Co-operative Bank was organized as a Massachusetts chartered co-operative bank in 1915 and converted from mutual to stock form in 1986. The primary business of the Bank is to generate funds in the form of deposits and use the funds to make mortgage loans for the construction, purchase and refinancing of residential properties, and to make loans on commercial real estate in its market area. In addition, the Bank makes a limited amount of consumer loans including secured and unsecured personal loans, and commercial and industrial loans. The Bank sells some of its residential mortgage loan production in the secondary mortgage market. The Bank also maintains an investment portfolio of various types of debt securities, including corporate bonds and mortgage-backed securities, and a limited amount of equity securities. The Bank also offers investment services (including annuities) to its customers through a third party broker-dealer and its insurance affiliate.

The Bank is headquartered in Somerville, Massachusetts and its operations are conducted through nine full-service office facilities located in Somerville, Arlington, Burlington, Chestnut Hill, Malden, Medford, Melrose and Woburn, Massachusetts, a limited service high school branch in Woburn, Massachusetts, and a stand alone 24-hour automated teller machine ("ATM") in Somerville as well as over the Internet. Each full-service branch office also has a 24-hour ATM. The Bank is a member of the Federal Home Loan Bank ("FHLB") of Boston and its deposits are insured to applicable limits by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation ("FDIC").

All Massachusetts chartered co-operative banks are required to be members of the Share Insurance Fund. The Share Insurance Fund maintains a deposit insurance fund which insures all deposits in member banks which are not covered by federal insurance. In past years, a premium of 1/24 of 1% of insured deposits has been assessed annually on member banks such as the Bank for this deposit insurance. However, no premium has been assessed in recent years.

The main offices of the Company and Bank are located at 399 Highland Avenue, Somerville, Massachusetts 02144 and their telephone number is (617) 628-4000. The Bank also maintains a website at www.centralbk.com.

The operations of the Bank are generally influenced by overall economic conditions, the related monetary and fiscal policies of the federal government and the regulatory policies of financial institution regulatory authorities, including the Massachusetts Commissioner of Banks (the "Commissioner"), the Federal Reserve Board and the FDIC.

Market Area

All of the Bank's offices are located in the northwestern suburbs of Boston, which are its principal market area for deposits. The majority of the properties securing the Bank's loans are located in Middlesex County. The Bank's market area consists of established suburban areas and includes portions of the Route 128 high-technology corridor.

Competition

The Bank's competition for savings deposits has historically come from other co-operative banks, savings banks, credit unions, savings and loan associations and commercial banks located in Massachusetts generally, and in the Boston metropolitan area, specifically. With the advent of interstate banking the Bank also faces competition from out-of-state banking organizations. In the past, during times of high interest rates, the Bank has also experienced additional significant competition for investors' funds from short-term money market funds and other corporate and government securities. The Bank has faced continuing competition for deposits from other financial intermediaries, including those operating over the Internet.

The Bank competes for deposits principally by offering depositors a wide variety of savings programs, convenient branch locations, 24-hour automated teller machines, Internet banking, preauthorized payment and withdrawal systems, tax-deferred retirement programs and other miscellaneous services such as money orders, travelers' checks and safe deposit boxes. The Bank does not rely upon any individual, group or entity for a material portion of its deposits.

The Bank's competition for real estate loans comes principally from mortgage banking companies, co-operative banks and savings banks, credit unions, savings and loan associations, commercial banks, insurance companies and other institutional lenders. The Bank competes for loan originations primarily through the interest rates and loan fees it charges and the efficiency and quality of services it provides borrowers, real estate brokers and builders. The competition for loans encountered by the Bank, as well as the types of institutions with which the Bank competes, varies from time to time depending upon certain factors, including the general availability of lendable funds and credit, general and local economic conditions, current interest rate levels, volatility in the mortgage markets and other factors which are not readily predictable.

Changes in bank regulation, such as changes in the products and services banks can offer and involvement in non-banking activities by bank holding companies, as well as bank mergers and acquisitions, can affect the Bank's ability to compete successfully. Legislation and regulations have also expanded the activities in which depository institutions may engage. The ability of the Bank to compete successfully will depend upon how successfully it can respond to the evolving competitive, regulatory, technological and demographic developments affecting its operations.

Future Expansion Plans

In May 2004, the Board of Directors adopted a strategic plan to enhance long-term shareholder value through franchise growth. The plan has been updated each year to reflect changes in the local economy and the banking environment in general. The strategic plan calls for expansion and core deposit growth through marketing and de novo branching within the Bank's market area of Middlesex County in order to enable the Bank to take greater advantage of the opportunities afforded by the favorable demographics of this market. The strategic plan also calls for the Bank to continue to focus primarily on its traditional businesses of residential and commercial real estate lending and to grow its mortgage banking capabilities. The Board and management believe that an increased

asset size and greater access to deposits resulting from the proposed expansion will enable the Bank to better leverage operating efficiencies and technology without compromising its focus on personal service and relationships.

While the Board and management anticipate that its proposed expansion plans will enhance long-term shareholder value, new branches generally require a significant initial capital investment as well as increased marketing and operational expenses before they become profitable. As a result, management anticipates that, in the short-term, net income may be negatively affected as the Bank incurs significant capital expenditures and non-interest expenses in opening, operating and marketing new branches before these branches can produce sufficient net interest income to offset the increased expenses. In accordance with this plan, on June 1, 2006, the Bank opened a new branch office in Medford, Massachusetts.

Lending Activities

The Bank's lending focus is concentrated in real estate secured transactions, including residential mortgage and home equity loans, commercial mortgage loans and construction loans. For the year ended March 31, 2007, the Bank originated loans totaling \$129.5 million. Of the total loans originated during fiscal 2007, \$24.2 million, or 19%, were residential mortgage loans and \$105.3 million, or 81%, were commercial mortgage loans. During the years ended March 31, 2007 and 2006, the Bank sold \$6.9 million and \$19.5 million, respectively, of current year residential mortgage loan originations. The sale of loans in the secondary market allows the Bank to continue to make loans during periods when savings flows decline or funds are not otherwise available for lending purposes and to manage interest rate risk.

The Bank's loan portfolio increased by \$45.2 million, or 10.9%, to \$460.5 million at March 31, 2007 from \$415.3 million at March 31, 2006. The increase occurred primarily as a result of the continuing high level of loan refinancing activity, particularly residential mortgage loans, management's decision to sell many fixed-rate residential mortgages originated in fiscal 2007 and continued focus on commercial real estate lending.

While the loan portfolio increased overall, the most significant growth was in the commercial real estate portfolio which grew by \$21.6 million, or 10.1%, in fiscal 2007. This growth is consistent with management's strategic intent to grow its commercial mortgage portfolio due to the generally more favorable yields and repricing frequency of these assets, as compared to other interest-earning assets.

Loan Portfolio Composition. The following table summarizes the composition of the Bank's loan portfolio by type of loan and the percentage each type represents of the total loan portfolio at the dates indicated.

	At March 31,									
	2007		2006		2005		2004		2003

Loan Portfolio Sensitivity. The following table sets forth certain maturity information as of March 31, 2007 regarding the dollar amount of commercial and industrial loans as well as construction loans in the Bank's portfolio, including scheduled repayments of principal, based on contractual terms to maturity. Demand loans, loans having no schedule of repayments and no stated maturity and overdrafts are reported as due in one year or less.

	Due Within One Year	Due After One Through Five Years	Due After Five Years	Total
(In thousands)				
Commercial and industrial loans	\$ 5,316	\$ 863	\$ 426	\$ 6,605
Construction loans	<u>22,485</u>	<u>11,105</u>	<u>1,421</u>	<u>35,011</u>
Total	<u>\$ 27,801</u>	<u>\$11,968</u>	<u>\$ 1,847</u>	<u>\$ 41,616</u>

Of the \$41.6 million in construction, commercial and industrial loans noted above, \$23.0 million mature more than one year after March 31, 2007, of which \$5.6 million have fixed rates and \$17.4 million have floating or variable rates.

Residential Lending. The Bank's residential mortgage loans at March 31, 2007 totaled \$175.3 million, or 38.1%, of the total loan portfolio. Fixed-rate residential mortgages totaled \$111.3 million, or 63.5%, of the residential loan portfolio and adjustable-rate loans totaled \$64.0 million, or 36.5%, of the residential loan portfolio.

With the implementation of its mortgage banking initiative in fiscal 2003, whereby the Bank is seeking to increase its origination of residential mortgage loans and to generate additional noninterest income via loan sale gains, management regularly assesses the desirability of holding newly originated long-term, fixed-rate residential mortgage loans in its portfolio. A number of factors are evaluated to determine whether or not to hold such loans including, current and projected liquidity, current and projected interest rate risk profile, projected growth in other interest-earning assets, e.g., commercial real estate loans, and projected interest rates. With the rate on the 30-year fixed-rate residential mortgage loan reaching a 45-year low in 2003, the Company continued to experience high residential loan refinancing activity during fiscal 2004 and fiscal 2005. Customers who refinanced their mortgages generally refinanced their existing home loans with either a 15 or 30 year fixed-rate mortgage loan. This activity slowed during fiscal 2006 and fiscal 2007 as long-term rates increased, presenting homeowners fewer refinance opportunities.

The Bank's adjustable-rate residential mortgage loans have a maximum term of 30 years, and allow for periodic interest rate adjustments. The Bank prices the initial rate competitively, but generally avoids initial deep

discounts from contracted indices and margins. The Bank has adopted the U.S. Treasury Securities Index, adjusted to a constant maturity of one to three years, as its primary index. The margin at which adjustable-rate loans are generally set is 2.875 percentage points over the stated index. Interest rate adjustments on adjustable mortgage loans are capped at two percentage points per adjustment and six percentage points over the life of the loan.

Residential loans may be granted as construction loans or permanent loans on residential properties. Construction loans on owner-occupied residential properties may convert to residential loans at fixed or adjustable rates upon completion of construction. Loans secured by one- to four-family residential properties are typically written in amounts up to 80% of the appraised value of the residential property. The Bank generally requires private mortgage insurance for loans in excess of 80% of appraised value. The maximum loan-to-value ratio on owner occupied residential properties is 95%. The maximum loan-to-value ratio on nonowner-occupied residential properties is 80%.

Commercial Real Estate and Construction Lending. The Bank originates permanent commercial mortgages and construction loans on commercial and residential real estate projects. Commercial real estate loans are typically secured by income-producing properties such as apartment buildings, office buildings, industrial buildings and various retail properties and are written with either fixed or adjustable interest rates. Commercial real estate loans with fixed interest rates have terms generally ranging from one to five years while the interest rate on adjustable rate loans is generally set to the five year FHLB classic advance rate plus a margin of 1.75 to 2.50 percentage points. As of March 31, 2007, the Bank's commercial mortgage portfolio totaled \$235.5 million and constituted 51.0% of the total loan portfolio. The growth in the commercial mortgage loan portfolio in fiscal 2007, which totaled \$21.6 million, or 10.1%, is attributable to the continued focus by the Bank in the commercial mortgage market. This strategy was initiated in 2002 with the Bank's hiring of additional experienced commercial lenders and credit administration personnel. This planned growth was aided by opportunities created by the declining rate environment prevailing during the past three years.

Commercial real estate loans are generally made for up to 75% of the appraised value of the property. Commercial real estate loans currently offered by the Bank have terms of one to 20 years. Title insurance, fire, casualty insurance and flood insurance are required in amounts sufficient to protect the Bank's interest, where applicable. In some cases, commercial real estate loans are granted in participation with other lenders.

The Bank's construction loans totaled \$35.0 million, or 7.6%, of the Bank's loan portfolio at March 31, 2007. Construction loans are generally short-term in nature and have maturities ranging from six months to five years. The Bank grants loans to construct residential and commercial real estate, as well as land development for individual residential lots. The Bank also originates loans for the construction of single-family homes for resale by professional builders. Currently, construction loans are made for up to 75% of the projected value of the completed property, based on independent appraisals. Funds are disbursed based on a schedule of completed work presented to the Bank and confirmed by physical inspection of the property by a construction consultant and only after receipt of title updates.

Home Equity Lines of Credit. The Bank offers home equity lines of credit that are secured by the borrower's equity in his or her primary residence and may take the form of a first or second mortgage. Equity loans are made in amounts up to 80% of the appraised value less any first mortgage. Payment of interest is required monthly and the rate is adjusted monthly based on changes in the prime rate, as quoted in the *Wall Street Journal*. Loans are not contingent upon proceeds being used for home improvement. The Bank's home equity loans outstanding totaled \$6.9 million, or 1.5%, of the Bank's loan portfolio at March 31, 2007.

Commercial and Industrial, Consumer and Other Loans. The Bank's commercial and industrial, consumer and other loans totaled \$7.8 million, or 1.7%, of the total loan portfolio on March 31, 2007. The Bank's commercial and industrial portfolio consists primarily of time, demand and line-of-credit loans to a variety of local small businesses generally done on a secured basis. The Bank engages in consumer lending primarily as an accommodation to existing customers.

Risks of Commercial Real Estate, Construction and Commercial and Industrial Lending. Commercial real estate, construction and commercial and industrial lending entail significant additional risks compared to residential mortgage lending. The repayment of loans secured by income-producing properties is typically dependent on the successful operation of the properties and thus may be subject to a greater extent to adverse

conditions in the local real estate market or in the economy generally. Construction loans involve a higher degree of risk of loss than long-term financing on improved occupied real estate because of the uncertainties inherent in estimating construction costs, delays arising from labor problems, material shortages, and other unpredictable contingencies. Commercial and industrial loans are generally not secured by real estate and may involve greater risks than other types of lending. Because payments on such loans are often dependent on the successful operation of the business involved, repayment of such loans may be subject to a greater extent to adverse conditions in the economy. For more information see "Non-Performing Assets" below.

Origination Fees and Other Fees. The Bank currently collects origination fees on some of the real estate loan products offered. Fees to cover the cost of appraisals, credit reports and other direct costs are also collected. Loan origination fees collected vary in proportion to the level of lending activity, as well as competitive and economic conditions.

The Bank imposes late charges on all loan products it offers with the exception of equity lines of credit and loans secured by deposits. The Bank also collects prepayment premiums and partial release fees on commercial real estate and construction loans where such items are negotiated as part of the loan agreement.

Loan Solicitation and Processing. Loan originations come from a number of sources. Residential real estate loans are attributable to walk-in customers, existing customers, real estate brokers and builders as well as the purchase of residential loans from other financial institutions. During fiscal 2007, the Bank purchased \$14.2 million in residential whole loans and participated in \$13.5 million commercial real estate loans. The Bank also utilizes both in-house and traveling originators in the origination of residential real estate loans. Commercial real estate loans are originated by the Bank's team of commercial loan officers. Consumer loans result from walk-in customers and depositors.

Each loan originated by the Bank is underwritten by lending personnel of the Bank or, in the case of certain residential mortgage loans to be sold, qualified independent contract underwriters. Individual lending officers, a committee of loan officers and the Bank's Security Committee have the authority to approve loans up to various limits. Applications are received in each of the offices of the Bank. Independent certified and licensed appraisers are used to appraise the property intended to secure real estate loans. The Bank's underwriting criteria are designed to minimize the risks of each loan. There are detailed guidelines concerning the types of loans that may be made, the nature of the collateral, the information that must be obtained concerning the loan applicant and follow-up inspections of collateral after the loan is made.

Non-Performing Assets. The Bank notifies a borrower of a delinquency when any payment becomes 15 days past due. Repeated contacts are made if the loan remains delinquent for 30 days or more. The Bank will consider working out a payment schedule with a borrower to clear a delinquency, if necessary. If, however, a borrower is unwilling or unable to resolve such a default after 60 days, the Bank will generally proceed to foreclose and liquidate the property to satisfy the debt.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans and amortization of net deferred loan fees or costs are discontinued either when reasonable doubt exists as to the full and timely collection of interest or principal, or when a loan becomes contractually past due 90 days with respect to interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectable as to both principal and interest.

The Bank has instituted additional procedures to closely monitor loans and bring potential problems to management's attention early in the collection process. The Bank prepares a monthly watch list of potential problem loans including currently performing loans. The Senior Loan Officer reviews delinquencies with the Security Committee of the Board of Directors at least monthly. Due to the high priority given to monitoring asset quality, Senior Management is involved in the early detection and resolution of problem loans. Additionally, the Bank has a workout committee composed of the Senior Loan Officer and other lending personnel that meets regularly to discuss the ongoing resolution of any loans identified for special review.

The following table sets forth information with respect to the Bank's non-performing assets at the dates indicated.

	<u>At March 31,</u>				
	<u>2007</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>

At March 31, 2007, there were no loans that are not listed on the table above where known information about possible credit problems of borrowers causes management to have serious doubts as to the ability of such borrowers to comply with present loan repayment terms.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level which management considers adequate to provide for probable losses based on an evaluation of known and inherent risks in the portfolio. Such evaluation for each of the periods reported includes identification of adverse situations which may affect the ability of certain borrowers to repay, a review of overall portfolio size, quality, composition and an assessment of existing and anticipated economic conditions. Regular reviews of the loan portfolio are performed to identify loans for which specific allowance allocations are considered prudent. Specific allocations are made based on the risk classification assigned to individual loans. Additionally, general risk allocations are determined by a formula whereby the loan portfolio is stratified by loan type and by risk rating category. Loss factors are then applied to each strata based on various considerations including historical loss experience, delinquency trends, current economic conditions, collateral type, loan-to-value ratios, industry standards and regulatory guidelines. While management uses available information in establishing the allowance for loan losses, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluations. Additions to the allowance are charged to earnings and realized losses, net of recoveries, are charged to the allowance.

Various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to recognize additions to the allowance based on judgment different from those of management.

The following table presents activity in the allowance for loan losses during the years indicated.

Investment Activities

The primary objectives of the investment portfolio are to achieve a competitive rate of return over a reasonable period of time and to provide liquidity. As a Massachusetts chartered bank, the Bank is authorized to invest in various obligations of federal and state governmental agencies, corporate bonds and other obligations and, within certain limits, marketable equity securities. The Bank's investment policy requires that corporate debt securities be rated as "investment grade" at the time of purchase. A security that is downgraded below investment grade will require additional analysis relative to perceived credit quality, market price, and overall impact on capital/earnings before a decision is made as to hold or sell. For all sub-investment grade corporate holdings, additional analysis of credit worthiness is required. The Bank's investment in marketable equity securities is generally limited to large, well-known corporations whose shares are actively traded. The size of the Bank's holdings in an individual company's stock is also limited by policy. A portion of the Bank's investment portfolio consists of mortgage-backed securities which represent interests in pools of residential mortgages. Such securities include securities issued and guaranteed by the Federal National Mortgage Association ("FNMA"), Federal Home Loan Mortgage Corporation ("FHLMC") and the Government National Mortgage Association ("GNMA") as well as collateralized mortgage obligations ("CMOs") issued primarily by FNMA and FHLMC.

Investments are classified as "held to maturity," "available for sale," or "trading." Investments classified as trading securities are reported at fair value with unrealized gains and losses included in earnings. Investments classified as available for sale are reported at fair value, with unrealized gains and losses, net of taxes, reported as a separate component of stockholders' equity. Securities held to maturity are carried at amortized cost. At March 31, 2007, all of the Bank's marketable investments were classified as available for sale.

The following table sets forth a summary of the Bank's investment securities, as well as the percentage such investments comprise of the Bank's total assets, at the dates indicated.

	<u>At March 31,</u>

Deposits and Borrowed Funds

General. Savings accounts and other types of deposits have traditionally been an important source of the Bank's funds for use in lending and for other general business purposes. In addition to deposits, the Bank derives funds from loan repayments, loan sales, borrowings and from other operations. The availability of funds is influenced by the general level of interest rates and other market conditions. Scheduled loan repayments are a relatively stable source of funds while deposit inflows and outflows vary widely and are influenced by prevailing interest rates and market conditions. Borrowings may be used on a short-term basis to compensate for reductions in deposits or deposit inflows at less than projected levels and may be used on a longer term basis to support expanded lending activities. During fiscal 2003, the Bank entered into a retail CD brokerage agreement with a major brokerage firm and considers this arrangement to be a secondary source of liquidity.

Deposits. Consumer deposits are attracted principally from within the Bank's market area through the offering of a broad selection of deposit instruments including demand deposit accounts, NOW accounts, money market deposit accounts, regular savings accounts, term deposit accounts and retirement savings plans. The Bank has historically not actively solicited or advertised for deposits outside of its market area or solicited brokered deposits. The Bank attracts deposits through its branch office network, automated teller machines, the Internet and by paying rates competitive with other financial institutions in its market area.

Deposit Accounts. The following table shows the distribution of the average balance of the Bank's deposit accounts at the dates indicated and the weighted average rate paid for each category of account for the years indicated.

	<u>Years Ended March 31,</u>

Time Deposits in Excess of \$100,000. The following table indicates the amount of the Bank's time deposits of \$100,000 or more by time remaining until maturity as of March 31, 2007 (in thousands).

Maturity Period:	
Three months or less	\$31,462
Three through six months	26,414
Six through twelve months	19,644
Over twelve months	<u>4,639</u>
Total	<u>\$82,159</u>

Borrowings. From time to time, the Bank borrows funds from the FHLB of Boston. All advances from the FHLB of Boston are secured by a blanket lien on residential first mortgage loans, certain investment securities and commercial real estate loans and all the Bank's stock in the FHLB of Boston. At March 31, 2007, the Bank had advances outstanding from the FHLB of Boston of \$125.0 million and unused borrowing capacity, based on available collateral, of approximately \$43.8 million. Proceeds from these advances were primarily used to fund the Bank's loan growth. Additional sources of borrowed funds include The Co-operative Central Bank Reserve Fund and the Federal Reserve Bank.

The following table sets forth certain information regarding borrowings from the FHLB of Boston, including short-term borrowings under a line of credit, at the dates and for the periods indicated.

	At or for the Years Ended March 31,

Subsidiaries

In September 2004, the Company established Central Bancorp Capital Trust I (the "Trust"), a Delaware statutory trust. The Trust issued and sold \$5.1 million of trust preferred securities in a private placement and issued \$158,000 of trust common securities to the Company. The Trust used the proceeds of these issuances to purchase \$5,258,000 of the Company's floating rate junior subordinated debentures due September 16, 2034 (the Debentures). The interest rate on the Debentures and the trust preferred securities is variable and adjustable quarterly at 2.44% over the three month LIBOR. At March 31, 2007, the interest rate was 7.79%. On January 31, 2007, the Company completed a trust preferred securities financing in the amount of \$5.9 million. In the transaction, the Company formed a Connecticut statutory trust, known as Central Bancorp Statutory Trust II ("Trust II"). Trust II issued and sold \$5.9 million of trust preferred securities in a private placement and issued \$183,000 of trust common securities to the Company. Trust II used the proceeds of these issuances to purchase \$6,083,000 of the Company's floating rate junior subordinated debentures due March 15, 2037 (the "Trust II Debentures"). From January 31, 2007 until March 15, 2017 (the "Fixed Rate Period"), the interest rate on the Trust II Debentures and the trust preferred securities is fixed at 7.015% per annum. Upon the expiration of the Fixed Rate Period, the interest rate on the Trust II Debentures and the trust preferred securities will be at a variable per annum rate, reset quarterly, equal to three month LIBOR plus 1.65%. The Trust II Debentures are the sole assets of Trust II. The Trust II Debentures and the trust preferred securities each have 30-year lives. The trust preferred securities and the Trust II Debentures will each be callable by the Company or Trust II, at their respective option, after ten years, and sooner in certain specific events, including in the event that the securities are not eligible for treatment as Tier 1 capital, subject to prior approval by the Federal Reserve Board, if then required. Interest on the trust preferred securities and

the Trust II Debentures may be deferred at any time or from time to time for a period not exceeding 20 consecutive quarterly payments (five years), provided there is no event of default.

The Trust I Debentures and the Trust II Debentures are the sole assets of Trust I and Trust II respectively, and are subordinate to all of the Company's existing and future obligations for borrowed money.

The trust preferred securities generally rank equal to the trust common securities in priority of payment, but will rank prior to the trust common securities if and so long as the Company fails to make principal or interest payments on the Trust I Debentures and the Trust II Debentures. Concurrently with the issuance of the Trust I and Trust II Debentures and the trust preferred securities, the Company issued guarantees related to each trust's securities for the benefit of the holders of Trust I and Trust II.

In April 1998 and July 2003, the Bank established Central Securities Corporation and Central Securities Corporation II, respectively, Massachusetts corporations, as wholly owned subsidiaries of the Bank for the purpose of engaging exclusively in buying, selling and holding, on their own behalf, securities that may be held directly by the Bank. These subsidiaries hold government agency obligations, corporate bonds and mortgage-backed securities and qualify under Section 38B of Chapter 63 of the Massachusetts General Laws as Massachusetts securities corporations.

In July 1999, the Bank established Central Preferred Capital Corporation ("CPCC"), a Massachusetts corporation which elected to be taxed as a real estate investment trust ("REIT") for federal and Massachusetts tax purposes. CPCC held mortgage loans which were previously originated by the Bank. In December 2003, the Bank liquidated its REIT subsidiary in a tax-free transaction.

REGULATION AND SUPERVISION

Regulation and Supervision of the Company

General. The Company is a bank holding company subject to regulation by the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended (the "BHCA"). As a result, the activities of the Company are subject to certain limitations, which are described below. In addition, as a bank holding company, the Company is required to file annual and quarterly reports with the Federal Reserve Board and to furnish such additional information as the Federal Reserve Board may require pursuant to the BHCA. The Company is also subject to regular examination by and the enforcement authority of the Federal Reserve Board.

Activities. With certain exceptions, the BHCA prohibits a bank holding company from acquiring direct or indirect ownership or control of more than 5% of the voting shares of a company that is not a bank or a bank holding company, or from engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or providing services for its subsidiaries. The principal exceptions to these prohibitions involve certain non-bank activities which, by statute or by Federal Reserve Board regulation or order, have been identified as activities closely related to the business of banking. The activities of the Company are subject to these legal and regulatory limitations under the BHCA and the related Federal Reserve Board regulations. Notwithstanding the Federal Reserve Board's prior approval of specific nonbanking activities, the Federal Reserve Board has the power to order a holding company or its subsidiaries to terminate any activity, or to terminate its ownership or control of any subsidiary, when it has reasonable cause to believe that the continuation of such activity or such ownership or control constitutes a serious risk to the financial safety, soundness or stability of any bank subsidiary of that holding company.

Effective with the enactment of the Gramm-Leach-Bliley Act (the "G-L-B Act") on November 12, 1999, bank holding companies whose financial institution subsidiaries are well capitalized and well managed and have satisfactory Community Reinvestment Act ("CRA") records can elect to become "financial holding companies" which are permitted to engage in a broader range of financial activities than are permitted to bank holding companies, including investment banking and insurance companies. Financial holding companies are authorized to engage in, directly or indirectly, financial activities. A financial activity is an activity that is: (i) financial in nature; (ii) incidental to an activity that is financial in nature; or (iii) complementary to a financial activity and that does not

pose a safety and soundness risk. The G-L-B Act includes a list of activities that are deemed to be financial in nature. Other activities also may be decided by the Federal Reserve Board to be financial in nature or incidental thereto if they meet specified criteria. A financial holding company that intends to engage in a new activity or to acquire a company to engage in such an activity is required to give prior notice to the Federal Reserve Board. If the activity is not either specified in the G-L-B Act as being a financial activity or one that the Federal Reserve Board has determined by rule or regulation to be financial in nature, the prior approval of the Federal Reserve Board is required.

Acquisitions. Under the BHCA, a bank holding company must obtain the prior approval of the Federal Reserve Board before (1) acquiring direct or indirect ownership or control of any voting shares of any bank or bank holding company if, after such acquisition, the bank holding company would directly or indirectly own or control more than 5% of such shares; (2) acquiring all or substantially all of the assets of another bank or bank holding company; or (3) merging or consolidating with another bank holding company. Satisfactory financial condition, particularly with regard to capital adequacy, and satisfactory CRA ratings generally are prerequisites to obtaining federal regulatory approval to make acquisitions.

Under the BHCA, any company must obtain approval of the Federal Reserve Board prior to acquiring control of the Company or the Bank. For purposes of the BHCA, "control" is defined as ownership of more than 25% of any class of voting securities of the Company or the Bank, the ability to control the election of a majority of the directors, or the exercise of a controlling influence over management or policies of the Company or the Bank. In addition, the Change in Bank Control Act and the related regulations of the Federal Reserve Board require any person or persons acting in concert (except for companies required to make application under the BHCA) to file a written notice with the Federal Reserve Board before such person or persons may acquire control of the Company or the Bank. The Change in Bank Control Act defines "control" as the power, directly or indirectly, to vote 25% or more of any voting securities or to direct the management or policies of a bank holding company or an insured bank. There is a presumption of "control" where the acquiring person will own, control or hold with power to vote 10% or more of any class of voting security of a bank holding company or insured bank if, like the Company, the company involved has registered securities under Section 12 of the Securities Exchange Act of 1934.

Under Massachusetts banking law, prior approval of the Massachusetts Division of Banks is also required before any person may acquire control of a Massachusetts bank or bank holding company. Massachusetts law generally prohibits a bank holding company from acquiring control of an additional bank if the bank to be acquired has been in existence for less than three years or, if after such acquisition, the bank holding company would control more than 30% of the FDIC-insured deposits in the Commonwealth of Massachusetts.

Capital Requirements. The Federal Reserve Board has adopted guidelines regarding the capital adequacy of bank holding companies, which require bank holding companies to maintain specified minimum ratios of capital to total assets and capital to risk-weighted assets. See "Regulation and Supervision of the Bank—Capital Requirements."

Dividends. The Federal Reserve Board has the power to prohibit dividends by bank holding companies if their actions constitute unsafe or unsound practices. The Federal Reserve Board has issued a policy statement on the payment of cash dividends by bank holding companies, which expresses the Federal Reserve Board's view that a bank holding company should pay cash dividends only to the extent that the company's net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the company's capital needs, asset quality and overall financial condition. The Federal Reserve Board also indicated that it would be inappropriate for a bank holding company experiencing serious financial problems to borrow funds to pay dividends. Under the prompt corrective action regulations adopted by the Federal Reserve Board pursuant to the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), the Federal Reserve Board may prohibit a bank holding company from paying any dividends if the holding company's bank subsidiary is classified as "undercapitalized" or worse." See "Regulation and Supervision of the Bank -- Prompt Corrective Regulatory Action."

Stock Repurchases. Bank holding companies are required to give the Federal Reserve Board prior written notice of any purchase or redemption of its outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the

preceding 12 months, is equal to 10% or more of the Company's consolidated net worth. The Federal Reserve Board may disapprove such a purchase or redemption if it determines that the proposal would violate any law, regulation, Federal Reserve Board order, directive or any condition imposed by, or written agreement with, the Federal Reserve Board. This requirement does not apply to bank holding companies that are "well-capitalized," received one of the two highest examination ratings at their last examination and are not the subject of any unresolved supervisory issues.

The Sarbanes-Oxley Act of 2002 implemented legislative reforms intended to address corporate and accounting fraud. The Sarbanes-Oxley Act restricts the scope of services that may be provided by accounting firms to their public company audit clients and any non-audit services being provided to a public company audit client will require pre-approval by the company's audit committee. In addition, the Sarbanes-Oxley Act requires chief executive officers and chief financial officers, or their equivalents, to certify to the accuracy of periodic reports filed with the Securities and Exchange Commission, subject to civil and criminal penalties if they knowingly or willingly violate this certification requirement.

Under the Sarbanes-Oxley Act, bonuses issued to top executives before restatement of a company's financial statements are now subject to disgorgement if such restatement was due to corporate misconduct. Executives are also prohibited from insider trading during retirement plan "blackout" periods and loans to company executives (other than loans by financial institutions permitted by federal rules and regulations) are restricted. The legislation accelerates the time frame for disclosures by public companies of changes in ownership in a company's securities by directors and executive officers.

The Sarbanes-Oxley Act also increases the oversight of, and codifies certain requirements relating to audit committees of public companies and how they interact with the company's "registered public accounting firm." Among other requirements, companies must disclose whether at least one member of the audit committee is a "financial expert" (as such term is defined by the Securities and Exchange Commission) and if not, why not. Although the Company anticipates that it will incur additional expense in complying with the provisions of the Sarbanes-Oxley Act and the resulting regulations, management does not expect that such compliance will have a material impact on the Company's results of operations or financial condition.

On September 29, 2005, the SEC announced an extension of compliance dates for non-accelerated filers regarding internal controls over financials reporting requirements (Section 404 of the Sarbanes-Oxley Act of 2002). The Company is currently considered a non-accelerated filer with the SEC and, accordingly, must begin to comply with Section 404 requirements for its fiscal year ending on March 31, 2008.

Regulation and Supervision of the Bank

General. The Bank is subject to extensive regulation by the Massachusetts Commissioner of Banks ("Commissioner") and the FDIC. The lending activities and other investments of the Bank must comply with various regulatory requirements. The Commissioner and FDIC periodically examine the Bank for compliance with these requirements. The Bank must file reports with the Commissioner and the FDIC describing its activities and financial condition. The Bank is also subject to certain reserve requirements promulgated by the Federal Reserve Board. This supervision and regulation is intended primarily for the protection of depositors.

Massachusetts State Law. As a Massachusetts-chartered co-operative bank, the Bank is subject to the applicable provisions of Massachusetts law and the regulations of the Commissioner. The Bank derives its lending and investment powers from these laws, and is subject to periodic examination and reporting requirements by and of the Commissioner. Certain powers granted under Massachusetts law may be constrained by federal regulation. In addition, the Bank is required to make periodic reports to the Co-operative Central Bank. In 1990, legislation was enacted permitting banks nationwide to enter the Bank's market area and compete for deposits and loan originations. The approval of the Commissioner is required prior to any merger or consolidation, or the establishment or relocation of any branch office. Massachusetts cooperative banks are subject to the enforcement authority of the Commissioner who may suspend or remove directors or officers, issue cease and desist orders and appoint conservators or receivers in appropriate circumstances. Cooperative banks are required to pay fees and assessments to the Commissioner to fund that office's operations. The cost of state examination fees and assessments for the fiscal year ended March 31, 2007 was \$43,076.

Capital Requirements. Under FDIC regulations, state-chartered banks that are not members of the Federal Reserve System are required to maintain a minimum leverage capital requirement consisting of a ratio of Tier 1 capital to total assets of 3% if the FDIC determines that the institution is not anticipating or experiencing significant growth and has well-diversified risk, including no undue interest rate risk exposure, excellent asset quality, high liquidity, good earnings and, in general, a strong banking organization, rated composite 1 under the Uniform Financial Institutions Rating System (the CAMELS rating system) established by the Federal Financial Institutions Examination Council. For all but the most highly-rated institutions meeting the conditions set forth above, the minimum leverage capital ratio is not less than 4%. Tier 1 capital is the sum of common stockholders' equity, noncumulative perpetual preferred stock (including any related surplus) and minority interests in consolidated subsidiaries, minus all intangible assets (other than certain mortgage and non-mortgage servicing assets, purchased credit card relationships and qualifying supervisory goodwill) minus identified losses, disallowed deferred tax assets and investments in financial subsidiaries and certain non-financial equity investments.

In addition to the leverage ratio (the ratio of Tier 1 capital to total assets), state-chartered nonmember banks must maintain a minimum ratio of qualifying total capital to risk-weighted assets of at least 8%, of which at least half must be Tier 1 capital. Qualifying total capital consists of Tier 1 capital plus Tier 2 or supplementary capital items. Tier 2 capital items include allowances for loan losses in an amount of up to 1.25% of risk-weighted assets, cumulative preferred stock and preferred stock with a maturity of over 20 years, certain other capital instruments and up to 45% of pre-tax net unrealized holding gains on equity securities. The includable amount of Tier 2 capital cannot exceed the institution's Tier 1 capital. Qualifying total capital is further reduced by the amount of the bank's investments in banking and finance subsidiaries that are not consolidated for regulatory capital purposes, reciprocal cross-holdings of capital securities issued by other banks, most intangible assets and certain other deductions. Under the FDIC risk-weighting system, all of a bank's balance sheet assets and the credit equivalent amounts of certain off-balance sheet items are assigned to one of four broad risk weight categories from 0% to 100%, based on the risks inherent in the type of assets or item. The aggregate dollar amount of each category is multiplied by the risk weight assigned to that category. The sum of these weighted values equals the bank's risk-weighted assets.

At March 31, 2007, the Bank's ratio of Tier 1 capital to average assets was 6.69%, its ratio of Tier 1 capital to risk-weighted assets was 9.83% and its ratio of total risk-based capital to risk-weighted assets was 10.86%.

Dividend Limitations. The Bank may not pay dividends on its capital stock if its regulatory capital would thereby be reduced below the amount then required for the liquidation account established for the benefit of certain depositors of the Bank at the time of its conversion to stock form.

Earnings of the Bank appropriated to bad debt reserves and deducted for Federal income tax purposes are not available for payment of cash dividends or other distributions to stockholders without payment of taxes at the then current tax rate by the Bank on the amount of earnings removed from the reserves for such distributions. The Bank intends to make full use of this favorable tax treatment and does not contemplate use of any earnings in a manner which would limit the Bank's bad debt deduction or create federal tax liabilities.

Under FDIC regulations, the Bank is prohibited from making any capital distributions if, after making the distribution, the Bank would be "undercapitalized" within the meaning of the Prompt Corrective Action regulations. See "Regulation and Supervision of the Bank—Prompt Corrective Regulatory Action."

Investment Activities. Under federal law, all state-chartered FDIC-insured banks have generally been limited to activities as principal and equity investments of the type and in the amount authorized for national banks, notwithstanding state law. The Federal Deposit Insurance Corporation Improvement Act and the FDIC permit exceptions to these limitations. For example, state chartered banks, such as the Bank, may, with FDIC approval, continue to exercise grandfathered state authority to invest in common or preferred stocks listed on a national securities exchange or the NASDAQ National Market and in the shares of an investment company registered under federal law. In addition, the FDIC is authorized to permit such institutions to engage in state authorized activities or investments that do not meet this standard (other than non-subsiary equity investments) for institutions that meet all applicable capital requirements if it is determined that such activities or investments do not pose a significant risk to the Bank Insurance Fund. All non-subsiary equity investments, unless otherwise authorized or approved by the FDIC, must have been divested by December 19, 1996, under a FDIC-approved divestiture plan, unless such investments were grandfathered by the FDIC. The Bank has received grandfathering authority from the FDIC to

invest in listed stocks and/or registered shares. The maximum permissible investment is 100% of Tier 1 capital, as specified by the FDIC's regulations, or the maximum amount permitted by Massachusetts Banking Law, whichever is less. Such grandfathering authority may be terminated upon the FDIC's determination that such investments pose a safety and soundness risk to the Bank or if the Bank converts its charter or undergoes a change in control. As of March 31, 2007, the Bank had marketable equity securities, including money market preferred stocks, with a market value of \$ 4.9 million, which were held under such grandfathering authority.

Insurance of Deposit Accounts. The Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation. The Deposit Insurance Fund is the successor to the Bank Insurance Fund and the Savings Association Insurance Fund, which were merged in 2006. The Federal Deposit Insurance Corporation recently amended its risk-based assessment system for 2007 to implement authority granted by the Federal Deposit Insurance Reform Act of 2005 ("Reform Act"). Under the revised system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors. An institution's assessment rate depends upon the category to which it is assigned. Risk category I, which contains the least risky depository institutions, is expected to include more than 90% of all institutions. Unlike the other categories, Risk Category I contains further risk differentiation based on the Federal Deposit Insurance Corporation's analysis of financial ratios, examination component ratings and other information. Assessment rates are determined by the Federal Deposit Insurance Corporation and currently range from five to seven basis points for the healthiest institutions (Risk Category I) to 43 basis points of assessable deposits for the riskiest (Risk Category IV). The Federal Deposit Insurance Corporation may adjust rates uniformly from one quarter to the next, except that no single adjustment can exceed three basis points. No institution may pay a dividend if in default of the FDIC assessment.

The Reform Act also provided for a one-time credit for eligible institutions based on their assessment base as of December 31, 1996. Subject to certain limitations with respect to institutions that are exhibiting weaknesses, credits can be used to offset assessments until exhausted. The Bank's one-time credit is expected to approximate \$363,513. The Reform Act also provided for the possibility that the Federal Deposit Insurance Corporation may pay dividends to insured institutions once the Deposit Insurance fund reserve ratio equals or exceeds 1.35% of estimated insured deposits.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund. This payment is established quarterly and during the calendar year ending March 31, 2007 averaged 1.25 basis points of assessable deposits.

The Reform Act provided the Federal Deposit Insurance Corporation with authority to adjust the Deposit Insurance Fund ratio to insured deposits within a range of 1.15% and 1.50%, in contrast to the prior statutorily fixed ratio of 1.25%. The ratio, which is viewed by the Federal Deposit Insurance Corporation as the level that the fund should achieve, was established by the agency at 1.25% for 2007.

The Federal Deposit Insurance Corporation has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the Federal Deposit Insurance Corporation upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the Federal Deposit Insurance Corporation or the Office of Thrift Supervision. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

All Massachusetts chartered co-operative banks are required to be members of the Share Insurance Fund. The Share Insurance Fund maintains a deposit insurance fund which insures all deposits in member banks which are not covered by federal insurance. In past years, a premium of 1/24 of 1% of insured deposits has been assessed annually on member banks such as the Bank for this deposit insurance. However, no premium has been assessed in recent years.

Prompt Corrective Regulatory Action. Federal banking regulators are required to take prompt corrective action if an insured depository institution fails to satisfy certain minimum capital requirements, including a leverage limit, a risk-based capital requirement and any other measure deemed appropriate by the federal banking regulators for measuring the capital adequacy of an insured depository institution. All institutions, regardless of their capital levels, are restricted from making any capital distribution or paying any management fees if the institution would thereafter fail to satisfy the minimum levels for any of its capital requirements. An institution that fails to meet the minimum level for any relevant capital measure (an “undercapitalized institution”) may be: (i) subject to increased monitoring by the appropriate federal banking regulator; (ii) required to submit an acceptable capital restoration plan within 45 days; (iii) subject to asset growth limits; and (iv) required to obtain prior regulatory approval for acquisitions, branching and new lines of businesses. The capital restoration plan must include a guarantee by the institution’s holding company that the institution will comply with the plan until it has been adequately capitalized on average for four consecutive quarters, under which the holding company would be liable up to the lesser of 5% of the institution’s total assets or the amount necessary to bring the institution into capital compliance as of the date it failed to comply with its capital restoration plan. A “significantly undercapitalized” institution, as well as any undercapitalized institution that does not submit an acceptable capital restoration plan, may be subject to regulatory demands for recapitalization, broader application of restrictions on transactions with affiliates, limitations on interest rates paid on deposits, asset growth and other activities, possible replacement of directors and officers, and restrictions on capital distributions by any bank holding company controlling the institution. Any company controlling the institution may also be required to divest the institution or the institution could be required to divest subsidiaries. The senior executive officers of a significantly undercapitalized institution may not receive bonuses or increases in compensation without prior approval and the institution is prohibited from making payments of principal or interest on its subordinated debt. In their discretion, the federal banking regulators may also impose the foregoing sanctions on an undercapitalized institution if the regulators determine that such actions are necessary to carry out the purposes of the prompt corrective provisions.

Under the implementing regulations, the federal banking regulators generally measure an institution’s capital adequacy on the basis of its total risk-based capital ratio (the ratio of its total capital to risk-weighted assets), Tier 1 risk-based capital ratio (the ratio of its core capital to risk-weighted assets) and leverage ratio (the ratio of its core capital to adjusted total assets). The following table shows the capital ratios required for the various prompt corrective action categories.

	<u>Well Capitalized</u>	<u>Adequately Capitalized</u>	<u>Undercapitalized</u>	<u>Significantly Undercapitalized</u>
Total risk-based capital ratio	10.0% or more	8.0% or more	Less than 8.0%	Less than 6.0%
Tier 1 risk-based capital ratio	6.0% or more	4.0% or more	Less than 4.0%	Less than 3.0%
Leverage ratio	5.0% or more	4.0% or more *	Less than 4.0% *	Less than 3.0%

* 3.0% if the institution has a composite 1 CAMELS rating.

If an institution’s capital falls below the “critically undercapitalized” level, it is subject to conservatorship or receivership within specified time frames. A “critically undercapitalized” institution is defined as an institution that has a ratio of “tangible equity” to total assets of less than 2.0%. Tangible equity is defined as core capital plus cumulative perpetual preferred stock (and related surplus) less all intangible assets other than certain purchased mortgage servicing rights. The FDIC may reclassify a well capitalized depository institution as adequately capitalized and may require an adequately capitalized or undercapitalized institution to comply with the supervisory actions applicable to institutions in the next lower capital category (but may not reclassify a significantly undercapitalized institution as critically undercapitalized) if the FDIC determines, after notice and an opportunity for a hearing, that the savings institution is in an unsafe or unsound condition or that the institution has received and not corrected a less-than-satisfactory rating for any CAMELS rating category.

Loans to Executive Officers, Directors and Principal Stockholders. Loans to directors, executive officers and principal stockholders of a state non-member bank like the Bank must be made on substantially the same terms as those prevailing for comparable transactions with persons who are not executive officers, directors, principal stockholders or employees of the Bank unless the loan is made pursuant to a compensation or benefit plan that is

widely available to employees and does not favor insiders. Loans to any executive officer, director and principal stockholder, together with all other outstanding loans to such person and affiliated interests, generally may not exceed 15% of the bank's unimpaired capital and surplus, and aggregate loans to such persons may not exceed the institution's unimpaired capital and unimpaired surplus. Loans to directors, executive officers and principal stockholders, and their respective affiliates, in excess of the greater of \$25,000 or 5% of capital and surplus (and any loans aggregating \$500,000 or more) must be approved in advance by a majority of the board of directors of the bank with any "interested" director not participating in the voting. State non-member banks are prohibited from paying the overdrafts of any of their executive officers or directors unless payment is made pursuant to a written, pre-authorized interest-bearing extension of credit plan that specifies a method of repayment or transfer of funds from another account at the bank. Loans to executive officers may not be made on terms more favorable than those afforded other borrowers and are restricted as to type, amount and terms of credit. In addition, federal law prohibits extensions of credit to executive officers, directors and greater than 10% stockholders of a depository institution by any other institution which has a correspondent banking relationship with the institution, unless such extension of credit is on substantially the same terms as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features.

Transactions with Affiliates. A state non-member bank or its subsidiaries may not engage in "covered transactions" with any one affiliate in an amount greater than 10% of such bank's capital stock and surplus, and for all such transactions with all affiliates a state non-member bank is limited to an amount equal to 20% of capital stock and surplus. All such transactions must also be on terms substantially the same, or at least as favorable, to the bank or subsidiary as those provided to a non-affiliate. The term "covered transaction" includes the making of loans, purchase of assets, issuance of a guarantee and similar other types of transactions. Specified collateral requirements apply to certain covered transactions such as loans and issued guarantees on behalf of an affiliate. An affiliate of a state non-member bank is any company or entity which controls or is under common control with the state non-member bank and, for purposes of the aggregate limit on transactions with affiliates, any subsidiary that would be deemed a financial subsidiary of a national bank. In a holding company context, the parent holding company of a state non-member bank (such as the Company) and any companies which are controlled by such parent holding company are affiliates of the state non-member bank. Federal law further prohibits a depository institution from extending credit to or offering any other services, or fixing or varying the consideration for such extension of credit or service, on the condition that the customer obtain some additional service from the institution or certain of its affiliates or not obtain services of a competitor of the institution, subject to certain limited exceptions.

Enforcement. The FDIC has extensive enforcement authority over insured non-member banks, including the Bank. This enforcement authority includes, among other things, the ability to assess civil money penalties, to issue cease and desist orders and to remove directors and officers. In general, these enforcement actions may be initiated in response to violations of laws and regulations and unsafe or unsound practices.

The FDIC has authority under federal law to appoint a conservator or receiver for an insured bank under limited circumstances. The FDIC is required, with certain exceptions, to appoint a receiver or conservator for an insured state non-member bank if that bank was "critically undercapitalized" on average during the calendar quarter beginning 270 days after the date on which the institution became "critically undercapitalized." See "Prompt Corrective Regulatory Action." The FDIC may also appoint itself as conservator or receiver for an insured state non-member institution under specific circumstances on the basis of the institution's financial condition or upon the occurrence of other events, including: (1) insolvency; (2) substantial dissipation of assets or earnings through violations of law or unsafe or unsound practices; (3) existence of an unsafe or unsound condition to transact business; and (4) insufficient capital, or the incurring of losses that will deplete substantially all of the institution's capital with no reasonable prospect of replenishment without federal assistance.

Federal Reserve System. The Federal Reserve Board regulations require depository institutions to maintain noninterest-earning reserves against their transaction accounts (primarily NOW and regular checking accounts). The Federal Reserve Board regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: for that portion of transaction accounts aggregating \$45.8 million less an exemption of \$8.5 million (which may be adjusted by the Federal Reserve Board) the reserve requirement is 3%; and for accounts greater than \$45.8 million, the reserve requirements is 10% (which may be adjusted by the Federal Reserve

Board between 8% and 14%) of the portion in excess of \$48.3 million. The Bank is in compliance with these requirements.

Community Reinvestment Act. Under the Community Reinvestment Act, as implemented by FDIC regulations, a state non-member bank has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate-income neighborhoods. The Community Reinvestment Act neither establishes specific lending requirements or programs for financial institutions nor limits an institution's discretion to develop the types of products and services that it believes are best suited to its particular community. The Community Reinvestment Act requires the FDIC, in connection with its examination of an institution, to assess the institution's record of meeting the credit needs of its community and to consider such record when it evaluates applications made by such institution. The Community Reinvestment Act requires public disclosure of an institution's Community Reinvestment Act rating. The Bank's latest Community Reinvestment Act rating received from the FDIC was "satisfactory."

The Bank is also subject to similar obligations under Massachusetts Law. The Massachusetts Community Reinvestment Act requires the Massachusetts Banking Commissioner to consider a bank's Massachusetts Community Reinvestment Act rating when reviewing a bank's application to engage in certain transactions, including mergers, asset purchases and the establishment of branch offices or automated teller machines, and provides that such assessment may serve as a basis for the denial of such application. The Bank's latest Massachusetts Community Reinvestment Act rating received from the Massachusetts Division of Banks was "satisfactory."

Federal Home Loan Bank System. The Bank is a member of the Federal Home Loan Bank system, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. The Bank, as a member of the Federal Home Loan Bank of Boston, is required to acquire and hold shares of capital stock in the Federal Home Loan Bank of Boston. The Bank was in compliance with this requirement with an investment in Federal Home Loan Bank of Boston stock at March 31, 2007 of \$7.4 million.

The Federal Home Loan Banks are required to provide funds for certain purposes including contributing funds for affordable housing programs. These requirements could reduce the amount of dividends that the Federal Home Loan Banks pay to their members and result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members. For the years ended 2007, 2006 and 2005, cash dividends from the Federal Home Loan Bank of Boston to the Bank amounted to approximately \$403,000, \$360,000 and \$231,000, respectively. Further, there can be no assurance that the impact of recent or future legislation on the Federal Home Loan Banks will not also cause a decrease in the value of the Federal Home Loan Bank stock held by the Bank.

Employees

At March 31, 2007, the Company and the Bank employed 121 full-time and 32 part-time employees. The Company's and Bank's employees are not represented by any collective bargaining agreement. Management of the Company and Bank considers its relations with its employees to be good.

Item 1A. Risk Factors

An investment in shares of our common stock involves various risks. Before deciding to invest in our common stock, you should carefully consider the risks described below in conjunction with the other information in this annual report on Form 10-K and information incorporated by reference into this annual report on Form 10-K, including our consolidated financial statements and related notes. Our business, financial condition and results of operations could be harmed by any of the following risks or by other risks that have not been identified or that we may believe are immaterial or unlikely. The value or market price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. The risks discussed below also include forward-looking statements and our actual results may differ substantially from those discussed in these forward-looking statements.

Our nonresidential real estate and construction lending may expose us to a greater risk of loss and hurt our earnings and profitability.

Our business strategy centers, in part, on offering nonresidential real estate and construction loans in order to expand our net interest margin. These types of loans generally have higher risk-adjusted returns and shorter maturities than traditional one-to-four family residential mortgage loans. At March 31, 2007, nonresidential real estate and construction loans totaled \$270.5 million, which represented 58.7% of net total loans. If we continue to increase the level of our nonresidential real estate and construction loans, we will increase our credit risk profile relative to other financial institutions that have higher concentrations of one-to-four family residential mortgage loans.

Loans secured by commercial or nonresidential real estate properties are generally for larger amounts and involve a greater degree of risk than one-to-four family residential mortgage loans. Payments on loans secured by nonresidential real estate buildings generally are dependent on the income produced by the underlying properties which, in turn, depends on the successful operation and management of the properties. Accordingly, repayment of these loans is subject to adverse conditions in the real estate market or the local economy. While we seek to minimize these risks in a variety of ways, including limiting the size of our nonresidential real estate loans, generally restricting such loans to our primary market area and attempting to employ conservative underwriting criteria, there can be no assurance that these measures will protect against credit-related losses.

Construction financing typically involves a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan is largely dependent upon the accuracy of the initial estimate of the property's value at completion of construction and the bid price and estimated cost (including interest) of construction. If the estimate of construction costs proves to be inaccurate, the Bank may be required to advance funds beyond the amount originally committed to permit completion of the project. If the estimate of the value proves to be inaccurate, the Bank may be confronted, at or prior to the maturity of the loan, with a project whose value is insufficient to assure full repayment. When lending to builders, the cost of construction breakdown is provided by the builder, as well as supported by the appraisal. Although the Bank's underwriting criteria are designed to evaluate and minimize the risks of each construction loan, there can be no guarantee that these practices will safeguard against material delinquencies and losses to our operations.

Our business is subject to the success of the local economy in which we operate.

Because the majority of our borrowers and depositors are individuals and businesses located and doing business in the northwestern suburbs of Boston, our success depends to a significant extent upon economic conditions in that market area. Adverse economic conditions in our market area could reduce our growth rate, affect the ability of our customers to repay their loans and generally affect our financial condition and results of operations. Conditions such as inflation, recession, unemployment, high interest rates, short money supply, scarce natural resources, international disorders, terrorism and other factors beyond our control may adversely affect our profitability. We are less able than a larger institution to spread the risks of unfavorable local economic conditions across a large number of diversified economies. Any sustained period of increased payment delinquencies, foreclosures or losses caused by adverse market or economic conditions in the Commonwealth of Massachusetts could adversely affect the value of our assets, revenues, results of operations and financial condition. Moreover, we cannot give any assurance we will benefit from any market growth or favorable economic conditions in our primary market areas.

If the value of real estate in northwestern suburbs of Boston were to decline materially, a significant portion of our loan portfolio could become under-collateralized, which could have a material adverse effect on us.

With most of our loans concentrated in the northwestern suburbs of Boston, a decline in local economic conditions could adversely affect the value of the real estate collateral securing our loans. A decline in property values would diminish our ability to recover on defaulted loans by selling the real estate collateral, making it more likely that we would suffer losses on defaulted loans. Additionally, a decrease in asset quality could require additions to our allowance for loan losses through increased provisions for loan losses, which would hurt our profits. Also, a decline in local economic conditions may have a greater effect on our earnings and capital than on the earnings and capital of larger financial institutions whose real estate loan portfolios are more geographically diverse.

Real estate values are affected by various factors in addition to local economic conditions, including, among other things, changes in general or regional economic conditions, governmental rules or policies and natural disasters.

Our continued pace of growth may require us to raise additional capital in the future, but that capital may not be available when it is needed.

We are required by regulatory authorities to maintain adequate levels of capital to support our operations. We anticipate our capital resources will satisfy our capital requirements for the foreseeable future. We may at some point, however, need to raise additional capital to support our continued growth. If we raise capital through the issuance of additional shares of our common stock or other securities, it would dilute the ownership interests of current investors and may dilute the per share book value of our common stock. New investors may also have rights, preferences and privileges senior to our current shareholders, which may adversely impact our current shareholders.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside our control, and on our financial performance. Accordingly, we cannot assure you of our ability to raise additional capital, if needed, on terms acceptable to us. If we cannot raise additional capital when needed, our ability to further expand our operations through internal growth and acquisitions could be materially impaired.

Competition from financial institutions and other financial service providers may adversely affect our growth and profitability.

The banking business is highly competitive and we experience competition in each of our markets from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other super-regional, national and international financial institutions that operate offices in our primary market areas and elsewhere. We compete with these institutions both in attracting deposits and in making loans. This competition has made it more difficult for us to make new loans and has occasionally forced us to offer higher deposit rates. Price competition for loans and deposits might result in us earning less on our loans and paying more on our deposits, which reduces net interest income. While we believe we can and do successfully compete with these other financial institutions in our primary markets, we may face a competitive disadvantage as a result of our smaller size, smaller resources and smaller lending limits, lack of geographic diversification and inability to spread our marketing costs across a broader market. Although we compete by concentrating our marketing efforts in our primary markets with local advertisements, personal contacts, and greater flexibility and responsiveness in working with local customers, we can give no assurance this strategy will be successful.

Fluctuations in interest rates could reduce our profitability and affect the value of our assets.

Like other financial institutions, we are subject to interest rate risk. Our primary source of income is net interest income, which is the difference between interest earned on loans and investments and the interest paid on deposits and borrowings. We expect that we will periodically experience imbalances in the interest rate sensitivities of our assets and liabilities and the relationships of various interest rates to each other. Over any defined period of time, our interest-earning assets may be more sensitive to changes in market interest rates than our interest-bearing liabilities, or vice versa. In addition, the individual market interest rates underlying our loan and deposit products (e.g., prime) may not change to the same degree over a given time period. In any event, if market interest rates should move contrary to our position, our earnings may be negatively affected. In addition, loan volume and quality and deposit volume and mix can be affected by market interest rates. Changes in levels of market interest rates could materially adversely affect our net interest spread, asset quality, origination volume and overall profitability.

Interest rates have recently been at historically low levels. However, since June 30, 2004, the U.S. Federal Reserve has increased its target for the federal funds rate 17 times, from 1.00% to 5.25%. While these short-term market interest rates (which we use as a guide to price our deposits) have increased, longer-term market interest rates (which we use as a guide to price our longer-term loans) have not. This "flattening" of the market yield curve has had a negative impact on our interest rate spread and net interest margin to date. If short-term interest rates

continue to rise, and if rates on our deposits and borrowings continue to reprice upwards faster than the rates on our long-term loans and investments, we would experience further compression of our interest rate spread and net interest margin, which would have a negative effect on our profitability.

We principally manage interest rate risk by managing our volume and mix of our earning assets and funding liabilities. In a changing interest rate environment, we may not be able to manage this risk effectively. If we are unable to manage interest rate risk effectively, our business, financial condition and results of operations could be materially harmed.

Changes in the level of interest rates also may negatively affect our ability to originate real estate loans, the value of our assets and our ability to realize gains from the sale of our assets, all of which ultimately affect our earnings.

Our allowance for loan losses may prove to be insufficient to absorb losses in our loan portfolio.

Like all financial institutions, we maintain an allowance for loan losses to provide for loans in our portfolio that may not be repaid in their entirety. We believe that our allowance for loan losses is maintained at a level adequate to absorb probable losses inherent in our loan portfolio as of the corresponding balance sheet date. However, our allowance for loan losses may not be sufficient to cover actual loan losses, and future provisions for loan losses could materially adversely affect our operating results.

In evaluating the adequacy of our allowance for loan losses, we consider numerous quantitative factors, including our historical charge-off experience, growth of our loan portfolio, changes in the composition of our loan portfolio and the volume of delinquent and criticized loans. In addition, we use information about specific borrower situations, including their financial position and estimated collateral values, to estimate the risk and amount of loss for those borrowers. Finally, we also consider many qualitative factors, including general and economic business conditions, duration of the current business cycle, current general market collateral valuations, trends apparent in any of the factors we take into account and other matters, which are by nature more subjective and fluid. Our estimates of the risk of loss and amount of loss on any loan are complicated by the significant uncertainties surrounding our borrowers' abilities to successfully execute their business models through changing economic environments, competitive challenges and other factors. Because of the degree of uncertainty and susceptibility of these factors to change, our actual losses may vary from our current estimates.

At March 31, 2007, our allowance for loan losses as a percentage of total loans was 0.84%. Regulators periodically review our allowance for loan losses and may require us to increase our allowance for loan losses by recognizing additional provisions for loan losses charged to expense, or to decrease our allowance for loan losses by recognizing loan charge-offs, net of recoveries. Any such additional provisions for loan losses or charge-offs, as required by these regulatory agencies, could have a material adverse effect on our financial condition and results of operations.

We are dependent upon the services of our management team.

Our future success and profitability is substantially dependent upon the management and banking abilities of our senior executives. We believe that our future results will also depend in part upon our attracting and retaining highly skilled and qualified management. We are especially dependent on a limited number of key management personnel and the loss of our chief executive officer or other senior executive officers could have a material adverse impact on our operations because other officers may not have the experience and expertise to readily replace these individuals. Competition for such personnel is intense, and we cannot assure you that we will be successful in attracting or retaining such personnel. Changes in key personnel and their responsibilities may be disruptive to our business and could have a material adverse effect on our business, financial condition and results of operations.

Our failure to continue to recruit and retain qualified loan originators could adversely affect our ability to compete successfully and affect our profitability.

Our continued success and future growth depend heavily on our ability to attract and retain highly skilled and motivated loan originators and other banking professionals. We compete against many institutions with greater

financial resources, both within our industry and in other industries, to attract these qualified individuals. Our failure to recruit and retain adequate talent could reduce our ability to compete successfully and adversely affect our business and profitability.

We operate in a highly regulated environment and we may be adversely affected by changes in laws and regulations.

Central Co-operative Bank is subject to regulation, supervision and examination by the Massachusetts Commissioner of Banks and the Federal Deposit Insurance Corporation, as insurer of its deposits. Such regulation and supervision govern the activities in which a co-operative bank and its holding company may engage and are intended primarily for the protection of the deposit insurance funds and for the depositors of Central Co-operative Bank and are not intended to protect the interests of investors in our common stock. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on our operations, the classification of our assets and determination of the level of our allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory action, may have a material impact on our operations. In addition, the Sarbanes-Oxley Act of 2002, and the related rules and regulations promulgated by the Securities and Exchange Commission and NASDAQ that are applicable to us, have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices, including the costs of completing our audit and maintaining our internal controls.

We are subject to security and operational risks relating to our use of technology that could damage our reputation and our business.

Security breaches in our internet banking activities could expose us to possible liability and damage our reputation. Any compromise of our security also could deter customers from using our internet banking services that involve the transmission of confidential information. We rely on standard internet security systems to provide the security and authentication necessary to effect secure transmission of data. These precautions may not protect our systems from compromises or breaches of our security measures that could result in damage to our reputation and our business. Additionally, we outsource our data processing to a third party. If our third party provider encounters difficulties or if we have difficulty in communicating with such third party, it will significantly affect our ability to adequately process and account for customer transactions, which would significantly affect our business operations.

We may have fewer resources than many of our competitors to invest in technological improvements.

The financial services industry is undergoing rapid technological changes, with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success will depend, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

Our ability to service our debt, pay dividends and otherwise pay our obligations as they come due is substantially dependent on capital distributions from Central Co-operative Bank, and these distributions are subject to regulatory limits and other restrictions.

A substantial source of our income from which we service our debt, pay our obligations and from which we can pay dividends is the receipt of dividends from Central Co-operative Bank. The availability of dividends from Central Co-operative Bank is limited by various statutes and regulations. It is also possible, depending upon the financial condition of Central Co-operative Bank, and other factors, that the applicable regulatory authorities could assert that payment of dividends or other payments is an unsafe or unsound practice. In the event that Central Co-operative Bank is unable to pay dividends to us, we may not be able to service our debt, pay our obligations or pay dividends on our common stock. The inability to receive dividends from Central Co-operative Bank would adversely affect our business, financial condition, results of operations and prospects.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The Bank owns all its offices, except the Burlington, Malden and Woburn High School branch offices, the stand-alone ATM, the loan centers located in Somerville and the branch and operations center located in Medford. Net book value includes the cost of land, buildings and improvements as well as leasehold improvements, net of depreciation and amortization. At March 31, 2007, all of the Bank's offices were in reasonable condition and met the business needs of the Bank. The following table sets forth the location of the Bank's offices, as well as certain information relating to these offices as of March 31, 2007:

<u>Office Location</u>	<u>Year Opened</u>	<u>Net Book Value at March 31, 2007</u> (in thousands)
<i>Main Office</i> 399 Highland Avenue Somerville, MA (owned).....	1974	\$ 275
<i>Branch Offices:</i> 175 Broadway Arlington, MA (owned).....	1982	157
85 Wilmington Road Burlington, MA (leased).....	1978 (a)	111
1192 Boylston Street Chestnut Hill (Brookline), MA (owned).....	1954	127
137 Pleasant Street Malden, MA (leased).....	1975 (b)	55
846 Main Street Melrose, MA (owned).....	1994	227
275 Main Street Woburn, MA (owned).....	1980	463
198 Lexington Street Woburn, MA (owned).....	1974	202
Woburn High School Woburn, MA (leased).....	2002 (c)	40
<i>Stand Alone ATM:</i> 94 Highland Avenue Somerville, MA (leased).....	2004 (d)	96
<i>Loan Center</i> 401 Highland Avenue Somerville, MA (leased).....	2002 (e)	290
<i>Operations Center/Branch Office</i> 270 Mystic Avenue Medford, MA (leased).....	2006 (f)	720

- (a) The lease for the Burlington branch expires 10/31/2007 with a five-year renewal option.
- (b) The lease for the Malden branch expires 8/31/2015.
- (c) The lease for the Woburn High School branch is for one year, renewable annually on an automatic basis.
- (d) The lease for the stand alone ATM expires 11/30/07 with an option to extend for three three-year terms.
- (e) The lease for the Commercial Loan Center was scheduled to expire on 11/1/2006 with an option to extend for one three-year term. On May 1, 2006 this lease was terminated and re-written; adding more space and additional parking for the Bank's lending operations. The new lease is for ten years with two five year options to extend. The initial base rent is \$113,745 per year.
- (f) In March, 2005, the Bank signed a lease for a combined retail branch and operations center to be located at 270 Mystic Avenue, Medford. The lease was subsequently renegotiated and the Bank took occupancy in May 2006. The initial rent under the lease is for \$150,000 per year and the initial term is 10 years. There are options to extend the lease by two five-year terms.

At March 31, 2007, the net book value of the Bank's premises and equipment was \$4.8 million.

Item 3. Legal Proceedings

The Company from time to time is involved as a plaintiff or defendant in various legal actions incidental to its business, none of which are believed to be material, either individually or collectively, to the results of operations and financial condition of the Company

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

PART II

Item 5. Market for the Registrant's Common Equity and Related Stockholder Matters and Issuer Purchases of Securities

Market for Common Equity and Related Stockholder Matters

The Company's common stock is quoted on the NASDAQ Global MarketSM under the symbol "CEBK." At March 31, 2007, there were 1,639,951 shares of the common stock outstanding and approximately 227 holders of record. The foregoing number of holders does not reflect the number of persons or entities who held the stock in nominee or "street name" through various brokerage firms. In October 1996, the Company established a quarterly cash dividend policy and made its first dividend distribution on November 15, 1996; it has paid cash dividends on a quarterly basis since initiating the dividend program.

The following tables list the high and low prices for the Common Stock during each quarter of fiscal 2007 and fiscal 2006 as reported by NASDAQ, and the amounts and payable dates of the cash dividends paid during each quarter of fiscal 2007 and fiscal 2006. The stock quotations constitute interdealer prices without retail markups, markdowns or commissions, and may not necessarily represent actual transactions.

Common Stock Prices

Fiscal 2007	High	Low
6/30/06	\$36.20	\$28.25
9/30/06	33.46	30.00
12/31/06	33.90	30.50
3/31/07	32.80	30.02
Fiscal 2006	High	Low
6/30/05	\$29.97	\$25.20
9/30/05	28.67	25.25
12/31/05	30.87	27.00
3/31/06	29.97	28.25

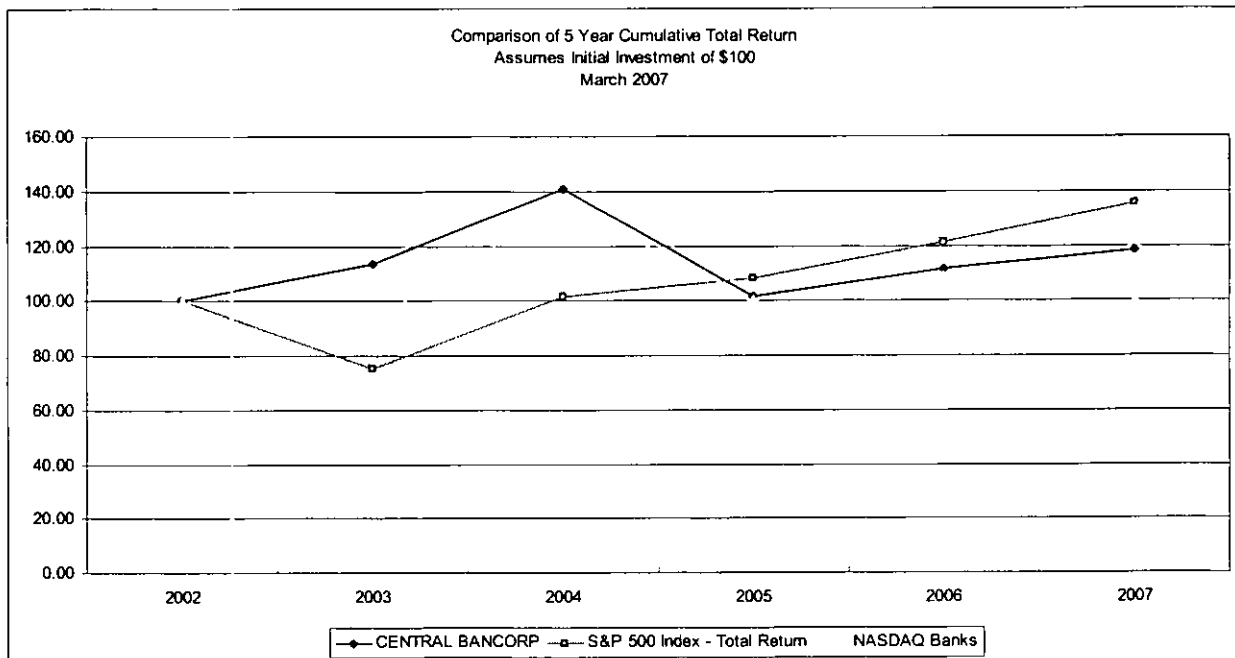

Cash Dividends (payable dates)

Fiscal 2007	Amount
5/19/06	\$ 0.18
8/18/06	0.18
11/17/06	0.18
2/16/07	0.18
Fiscal 2006	Amount
5/19/05	\$0.12
8/19/05	0.18
11/17/05	0.18
2/17/06	0.18

Stock Price Performance Graph

The graph and table which follow show the cumulative total return on the Common Stock of the Company from March 31, 2002 through March 31, 2007 compared with the cumulative total return of (i) an index of NASDAQ banks, and (ii) the S&P 500 Index (the "S&P 500"). Cumulative total return on the stock or the index equals the total increase in value since March 31, 2002, assuming reinvestment of all dividends paid on the stock or the index, respectively. The graph and table were prepared assuming that \$100 was invested at the closing price on March 31, 2002 in the Common Stock of the Company and in each index. The stockholder returns shown on the performance graph are not necessarily indicative of the future performance of the Common Stock or of any particular index.

CUMULATIVE TOTAL SHAREHOLDER RETURN COMPARED WITH PERFORMANCE OF SELECTED INDICES

Summary

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The operations of the Company and its subsidiary, the Bank, are generally influenced by overall economic conditions, the related monetary and fiscal policies of the federal government and the regulatory policies of financial institution regulatory authorities, including the Commissioner, the Federal Reserve Board and the FDIC.

The Bank monitors its exposure to earnings fluctuations resulting from market interest rate changes. Historically, the Bank's earnings have been vulnerable to changing interest rates due to differences in the terms to maturity or repricing of its assets and liabilities. For example, in a rising interest rate environment, the Bank's net interest income and net income could be negatively affected as interest-sensitive liabilities (deposits and borrowings) could adjust more quickly to rising interest rates than the Bank's interest-sensitive assets (loans and investments).

The following is a discussion and analysis of the Company's results of operations for the last three fiscal years and its financial condition at the end of fiscal years 2007 and 2006. Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying notes.

Application of Critical Accounting Policies

Management's discussion and analysis of the Company's financial condition and results of operations are based on the consolidated financial statements which are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of such financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates its estimates, including those related to the allowance for loan losses, income taxes, impairment of securities, derivative loan commitments, and stock options under SFAS 123R. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis in making judgments about the carrying values of assets that are not readily apparent from other sources. Actual results could differ from the amount derived from management's estimates and assumptions under different assumptions or conditions.

Management believes the allowance for loan losses policy is a critical accounting policy that requires the most significant estimates and assumptions used in the preparation of the consolidated financial statements. The allowance for loan losses is based on management's evaluation of the level of the allowance required in relation to the estimated loss exposure in the loan portfolio. Management believes the allowance for loan losses is a significant estimate and therefore regularly evaluates it for adequacy by taking into consideration factors such as prior loan loss experience, the character and size of the loan portfolio, business and economic conditions and management's estimation of inherent losses. The use of different estimates or assumptions could produce different provisions for loan losses. Refer to the discussion of "Allowance for Loan Losses" in "Item 1. Business" and Notes 1 and 4 to Consolidated Financial Statements for a detailed description of management's estimation process and methodology related to the allowance for loan losses.

Management periodically reviews the Bank's deferred tax asset and current income tax position using historical, current, and future pretax earnings. Adjustments to the deferred tax asset are recognized as deferred income tax expense or benefit based on management's judgments relating to the realizability of such asset. There can be no assurance, however that the Company will generate any earnings or any specific level of continuing earnings. Refer to "Income Taxes" Note 8 to the Consolidated Financial Statements for details concerning the Company's tax position.

Management believes that the measurement of impairment of securities requires an evaluation process that considers both the historical and current financial performance and environment of the security, credit worthiness of the issuer, and potential recovery measures of each impaired investment. Management periodically reviews all

securities to identify those that show signs of impairment. Once identified these securities are monitored and evaluated based upon the above considerations and if the decline in fair value below the cost basis of an investment is judged to be other-than-temporary, the cost basis is written down to the current fair value and the amount of the write-down is included in the results of operations.

The Company has derivatives consisting of forward commitments to sell loans in order to reduce market risk associated with commitments to fund loans held for sale. An increase in market interest rates between the time the Bank commits to terms on a loan and the time the loan is sold will generally have the effect of reducing the gain (or increasing the loss) recorded for the sale. Forward loan sale contracts and commitments to fund loans intended for sale are recorded at fair value. Management uses both a discounted cash flow analysis (which is dependent upon estimated future cash flows and the level of interest rates) and estimates based on outstanding investor commitments to calculate market value.

Results of Operations

Overview. The Company's results of operations during the past three fiscal years have been influenced by several significant factors. From a recurring operating perspective, the generally declining trend in yields earned and costs paid on both short and long-term assets and liabilities that began in January 2001 has had a significant impact on both the balance sheet and income statement. With home mortgage rates declining and ultimately hitting a 45 year low in 2003, consumers refinanced their mortgages, oftentimes on multiple occasions, to take advantage of the opportunity to lock in low rates for up to 30 years. Since the second half of fiscal 2003, the Company has sold the majority of its current originations of fixed-rate residential mortgage loans in order to better manage its exposure to changing rates and, as a result, has experienced a shift in its asset mix from residential to commercial mortgage loans. Management has favored commercial real estate lending in recent years due to the shorter repricing characteristics of these loans (generally every 5 years), acceptable yields and the favorable economic market conditions in the Company's lending area.

With the declining rate trend that occurred until fiscal year 2006 as referred to above, the Company experienced reductions in both its yield on interest-earning assets and its cost of interest-bearing liabilities each year since fiscal 2001. However, in fiscal years 2006 and 2007, the cost increase exceeded the yield increase, resulting in lower spreads, as summarized in the following table:

	<u>Yield</u>	<u>Cost</u>	<u>Spread</u>
Fiscal 2001	7.50%	4.70%	2.80%
Fiscal 2002	6.83	3.98	2.85
Fiscal 2003	6.48	3.19	3.29
Fiscal 2004	5.84	2.88	2.96
Fiscal 2005	5.62	2.77	2.85
Fiscal 2006	5.78	3.06	2.72
Fiscal 2007	5.99	3.78	2.21

As this table indicates, the declining rate trend had a favorable impact on the Company's net interest spread through fiscal 2003. This trend was also aided by the relatively high ratio of loans to interest-earning assets maintained during this entire period, especially through fiscal 2003. In fiscal 2004 and fiscal 2005, the favorable trend reversed as more assets were repriced downward (mostly due to loan prepayments and modifications) than were liabilities.

During fiscal years 2006 and 2007 rising interest rates increased both the Company's yield and cost and negatively affected the spread by 13 and 51 basis points, respectively, as liabilities repriced quicker than the Company's assets. In spite of the increases in shorter term interest rates, the Company attempts to hold the interest rates it pays on its deposits to the minimum amount it can pay in a competitive market. During fiscal 2005, the Bank maintained the interest rates it paid on the core deposit account, and introduced a promotional certificate for 13 months that was successful in drawing in new funds to the Bank. The Bank continued to offer various certificate promotions throughout fiscal 2006 and 2007. From time to time, the Bank uses long-term FHLB advances to fund growth or to replace deposits if the pricing of advances is more favorable than the all-in cost of raising deposits.

The ability to reduce deposit rates in the current year was limited, primarily as a result of competitive market factors in a rising short-term interest rate environment. Because of competitive pressures, the Bank was not able to raise the yield on our lending products that generally are priced based on longer term rates which have remained quite stable. This has resulted in a flat to inverted yield curve that negatively impacted earnings as the year progressed.

Interest Rate Spread. The Company's and the Bank's operating results are significantly affected by its net interest spread, which is the difference between the yield on loans and investments and the interest cost of deposits and borrowings. The interest spread is affected by economic conditions and market factors that influence interest rates, loan demand and deposit flows. Net interest spread and margin declined from 2.72% and 3.11% to 2.21% and 2.68%, respectively, from March 31, 2006 to March 31, 2007, primarily due to increases in the rates paid on interest bearing liabilities. The increase in the cost of interest bearing liabilities was greater than the increase in the yield on interest earning assets, primarily due to the increase in short-term interest rates and the resulting flat yield curve, as well as the Bank's ongoing campaign to increase certificates of deposit by offering aggressively priced promotional rates on these accounts. The following table presents average balances, interest income and expense and yields earned or rates paid on all interest-earning assets and interest-bearing liabilities for the years indicated.

	Years Ended March 31,

Rate/Volume Analysis. The effect on net interest income of changes in interest rates and changes in the amounts of interest-earning assets and interest-bearing liabilities is shown in the following table. Information is provided on changes for the fiscal years indicated attributable to changes in interest rates and changes in volume. Changes due to combined changes in interest rates and volume are allocated between changes in rate and changes in volume proportionally to the change due to volume and the change due to rate.

	2007 vs. 2006			2006 vs. 2005

Interest and Dividend Income. The Company experienced a decrease of \$1.9 million in net interest and dividend income for the year ended March 31, 2007 compared to fiscal 2006. The balance of average interest-earning assets increased by \$32.2 million to \$539.3 million. The Company's asset mix continued to shift of its asset mix towards commercial real estate lending in line with our business plan and residential lending levels as a percentage of our loan portfolio continued to decline as most new originations were sold in the econdary market. During fiscal 2007, \$6.9 million of such loans were sold. Additionally, in 2007, the Company purchased \$14.2 million of newly originated residential loans. Although these purchases were partially offset by the continued loan prepayments as customers refinance their mortgages at favorable rates, the average balance of residential mortgage loans increased by \$4.6 million in fiscal 2007. Additionally, the average balance of commercial real estate loans increased by \$ 13.1 million during fiscal 2007. The average balance of mortgage loans increased from \$400.6 million during fiscal 2006 to \$426.7 million for fiscal 2007 a change of \$26.1 million, or 6.5%.

Interest income on loans increased from fiscal 2006 to fiscal 2007 by \$2.3 million to \$27.2 million due to an increase in the average balance of loans of \$27.5 million to \$433.9 million. Interest income on investments decreased by \$371,000 in fiscal 2007 primarily due to a \$13.4 million decline in average balance of investments during fiscal 2007 as compared to fiscal 2006 offset by increasing rates on investments. In fiscal 2007 and 2006 excess short term funds were used to pay down FHLB advances. The yield on investments during fiscal 2007 and fiscal 2006 is 4.86% and 4.62%, respectively.

Interest Expense. Interest expense increased \$3.8 million from \$14.0 million in fiscal 2006 to \$17.8 million in fiscal 2007. This increase is attributable to a significant increase in rates paid as well as a \$13.7 million increase in the average balance of interest-bearing liabilities, primarily due to the increase in certificates of deposit, which increased in average balance by \$ 57.3 million from \$169.3 million during fiscal 2006 to \$ 226.6 million in fiscal 2007. The increase in certificates of deposit was primarily the result of the Bank's promotional campaign to increase these deposits by offering aggressively priced promotional rates on certificates of deposit coupled with increases in deposit interest rates in its market area. The increase in interest expense due to higher balances for certificates of deposit was partially offset by a decline in average balance for FHLB advances. The average balance for FHLB advances declined \$23.1 million from \$133.7 million during fiscal 2006 to \$110.6 million in fiscal 2007. The average cost of FHLB advances increased by 31 basis points in fiscal 2007. The increase in the average balance

of other borrowings of \$1.3 million was primarily due to the issuance of subordinated debentures by the Company in fiscal years 2007 and 2005 which contributed \$467,000 and \$316,000 to interest expense during fiscal year 2007 and 2006, respectively.

Provision for Loan Losses. During the fiscal year ended March 31, 2007, the Company provided \$80,000 for loan losses compared with a \$100,000 provision for the years ended March 31, 2006 and 2005. The Company's loan quality, as measured principally by delinquency rates, charge-offs and loan classifications continues to be strong with no significant shifts in allocation during the fiscal years ended March 31, 2007, 2006 and 2005.

Non-Interest Income.

2007 v. 2006

Total non-interest income remained relatively unchanged at \$ 2.0 million for fiscal 2007. Deposit service charges increased \$55,000 due in part to an overdraft protection program commenced in fiscal 2006. These increases were partially offset by decreases in gains on sales of loans and increased investment gains.

2006 v. 2005

Total non-interest income increased \$342,000, or 20.7%, in fiscal 2006 to \$2 million from \$1.7 million in fiscal 2005. The increase is primarily the result of an increase in fees for deposit accounts of \$320,000 from an overdraft protection program initiated in fiscal year 2006 and an increase in other income of \$100,000 primarily due to loan prepayment fees and increased fees from third party investment services. These increases were partially offset by decreases in gains on sales of loans and gains on sales of investment securities.

Non-Interest Expenses.

2007 v. 2006

Non-interest expenses increased \$673,000 during fiscal 2007, or 4.7%, to \$14.9 million as compared to \$14.2 million for the year ended March 31, 2006. The increase is principally due to increases in salaries and benefits of \$122,000. Other expenses increased \$102,000.

Salaries and employee benefits increased \$122,000, or 1.4%, to \$8.6 million in fiscal 2007 as compared to the prior year. This increase was primarily due to overall salary increases in the ordinary course of business and increased health care costs. The 2006 salary total was impacted by a previously announced branch staffing restructuring charge of \$282,000

Office occupancy and equipment expenses increased \$514,000, or 31.3%, to \$2.2 million in fiscal 2007 as compared to 2006. This increase was primarily due to costs associated with the opening of the bank's Medford operations center/branch, increased insurance and maintenance and repairs expense, along with increased depreciation of bank buildings and equipment and amortization of leasehold improvements.

Data processing servicing fees decreased by \$17,000, or 1.8%, to \$933,000 in fiscal 2007 as compared to the prior year. The decrease was primarily due to the fiscal 2006 renegotiation and extension of the contract with the Bank's primary data processing provider.

Professional fees increased \$127,000, or 17.1%, to \$869,000 in fiscal 2007 as compared to the prior year. The increase in 2007 was primarily due to an increase in legal fees of \$83,000 partly attributable to the trust preferred and ESOP stock purchase during fiscal 2007, and an increase of \$36,000 in examination and audit fees.

Marketing expenses decreased \$175,000 or 28.0% to \$449,000 in fiscal 2007 as compared to the prior year as the Bank undertook specific cost savings strategies concurrent with a temporary discontinuance of advertising of premium rates on certificates of deposit during fiscal 2007, opting instead to utilize FHLB advances to fund loan growth.

Other non-interest expenses increased by \$102,000, or 5.4%, to \$1.9 million in fiscal 2007 due primarily to an overall increase in general overhead costs, specifically office supplies, postage, telephone, record retention and other services provided to the Bank.

2006 v. 2005

Non-interest expenses increased \$665,000 during fiscal 2006, or 4.9%, to \$14.2 million as compared to \$13.5 million for the year ended March 31, 2006. The increase is principally due to an increase in salaries and benefits of \$783,000 and occupancy costs of \$279,000, partially offset by decreases in professional fees of \$258,000, other expense costs of \$121,000 and data processing costs of \$ 68,000.

Salaries and employee benefits increased \$783,000, or 10.2%, to \$8.5 million in fiscal 2006 as compared to the prior year. This increase was primarily due to an accrued severance expense of \$283,000 due to branch staffing restructuring, overall salary increases in the ordinary course of business, increases in staffing to support a larger asset base and increased health care costs.

Office occupancy and equipment expenses increased \$279,000, or 20.5%, to \$1.6 million in fiscal 2006 as compared to the prior year. This increase was primarily due to increased insurance and maintenance and repairs expense, along with increased depreciation of bank buildings and equipment and amortization of leasehold improvements.

Data processing servicing fees decreased by \$68,000, or 6.7%, to \$950,000 in fiscal 2006 as compared to the prior year. The decrease was primarily due to a renegotiation and extension of the contract with the Bank's primary data processing provider.

Professional fees decreased \$258,000, or 25.8%, to \$742,000 in fiscal 2006 as compared to the prior year. The decrease in 2006 was primarily due to a decrease in legal fees of \$139,000 and a decrease of \$103,000 in professional fees paid to outside consulting related to services utilized in 2005 that were absent in 2006.

Marketing expenses increased \$50,000, or 8.7%, to \$624,000 in fiscal 2006 as compared to the prior year as the Bank continued to aggressively market products to remain competitive in the market for deposit and loan customers.

Other non-interest expenses decreased by \$121,000, or 6.5%, to \$1.7 million in fiscal 2006 due primarily to an insurance settlement recovery of \$36,309 and an overall decrease in general overhead costs, specifically office supplies and other services provided to the Bank.

Financial Condition

Total assets at March 31, 2007 amounted to \$566.1 million, an increase of \$18.8 million, or 3.4%, from \$547.3 million at March 31, 2006. The growth in assets in 2007 was primarily caused by growth in the commercial real estate portfolio, which grew primarily as a result of continued focus on originating these loans. Total assets at March 31, 2006 amounted to \$547.3 million, an increase of \$26.2 million, or 5.0%, from \$521.1 million at March 31, 2005. The growth in assets in 2006 was primarily caused by growth in the commercial real estate portfolio.

Net loans increased \$45.1 million, or 11.0%, to \$456.7 million at March 31, 2007 from March 31, 2006. Net loans increased \$28.8 million, or 7.5%, to \$411.5 million at March 31, 2006 from March 31, 2005 primarily due to growth in the commercial real estate portfolio. These increases reflect management's decision to increase commercial real estate loans (which carry an interest rate that generally adjusts every five years based on the FHLB classic advance rate) as a percentage of the total loan portfolio. As of March 31, 2007, commercial mortgages represent 51.0% of the loan portfolio.

Total deposits decreased \$4.8 million, or 1.2%, to \$388.6 million at March 31, 2007, as compared to March 31, 2006, primarily due to the decision during the year to suspend advertising of premium rate term deposits and rely on more cost effective FHLB advances to fund loan growth. Total deposits increased \$60.2 million, or 18.1%, to

\$393.4 million at March 31, 2006, as compared to March 31, 2005, primarily due to an increase in certificates of deposits. Total certificates of deposit represented approximately 56.1% of total deposits at March 31, 2007. The Bank realized an increase of \$9.5 million in Money Market deposit accounts and decreases of \$845 thousand in demand deposits, \$1.3 million in NOW accounts and \$9.1 million in regular savings accounts during fiscal 2007.

Advances from the FHLB of Boston increased to \$125.0 million at March 31, 2007 from \$103.5 million at March 31, 2006. This is in line with the Company's decision noted above to shift funding from deposits to FHLB advances.

Stockholders' equity decreased to \$37.7 million at March 31, 2007 from \$39.2 million at March 31, 2006 due primarily to net earnings \$1.0 million, partially offset by dividends paid of \$1.0 million and an increase in unearned compensation, ESOP as a result of the ESOP stock purchase.

Liquidity

Liquidity is the ability to meet current and future financial obligations of a short-term nature. The Company's primary sources of liquidity are dividends from its bank subsidiary. In addition, the Company has access to the capital markets to raise additional equity. The Bank's principal sources of liquidity are customer deposits, repayments of loans and mortgage-backed securities, FHLB of Boston advances and maturities of various other investments. These various sources of liquidity, as well as the Bank's ability to sell residential mortgage loans in the secondary market, are used to fund deposit withdrawals, loan originations and investment purchases.

Deposits have been a relatively stable source of funds for the Bank despite significant competition. Although deposits declined slightly in fiscal year 2007, overall the Bank has increased deposits since March 31, 2005 by \$55.4 million to \$393.4 million at March 31, 2006. During fiscal years 2007 the Bank decreased deposits by \$4.8 million or 1.2%. In fiscal 2006, deposits increased by \$60.2 million, or 18.1%. Differences in deposit levels are primarily the result of management decisions to focus at various times on the use of deposits to fund growth while at other times to FHLB advances instead. These decisions are based on the relative interest rates of the various sources of funds at any particular time. Core deposits, consisting of non-interest bearing demand deposits, saving accounts, NOW accounts and money market accounts, represented approximately 60% of the Bank's total deposits in fiscal 2005 but declined to under 44% at March 31, 2006 and to 44% at March 31, 2007, as funds moved from money market and other core accounts to certificate accounts, to a great extent as a result of certificate of deposit promotions. Money market deposits had been the fastest growing component of core deposits but, as a result of the increase in the rates paid on all deposits by both the Bank and its competitors as shorter term interest rates increased, there was a shift out of the money market accounts, as well regular savings and NOW accounts into higher rate certificates. While the percentage of core deposits to total deposits has declined, balances in noninterest-earning demand deposits have decreased from \$40.9 million at March 31, 2006 to \$40.0 million at March 31, 2007.

The Bank is a voluntary member of the FHLB of Boston and has the ability to borrow from the FHLB of Boston for any sound business purpose for which the Bank has legal authority, subject to such regulations and limitations as may be prescribed. At March 31, 2007 and 2006, the Bank had outstanding FHLB of Boston advances of \$125.0 million and \$103.5 million, respectively. The FHLB of Boston advances are secured primarily by a blanket lien on residential first mortgage loans, U.S. Government and agency securities and all stock in the FHLB of Boston. At March 31, 2007, the Bank had approximately \$43.8 million in unused borrowing capacity at the FHLB of Boston.

The Bank also may obtain funds from the Federal Reserve Bank of Boston, the Co-operative Central Bank Reserve Fund and through a retail CD brokerage agreement with a major brokerage firm. The Bank views these borrowing facilities as secondary sources of liquidity and has had no need to use them.

Commitments, Contingencies and Off-Balance Sheet Risk

In normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles are not recorded in its financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments and lines of credit.

For the year ended March 31, 2007, the Company engaged in no off-balance sheet transactions reasonably likely to have a material effect on its financial condition, results of operations or cash flows.

Commitments to originate new loans or to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Loan commitments generally expire within 30 to 45 days. Most home equity line commitments are for a term of 15 years, and commercial lines of credit are generally renewable on an annual basis. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. At March 31, 2007, the Company had commitments to originate loans, unused outstanding lines of credit and undisbursed proceeds of loans totaling \$34.1 million. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower.

Commitments to sell loans held for sale are agreements to sell loans on a best efforts delivery basis to a third party at an agreed upon price.

On September 16, 2004 the Company completed a \$5.1 million trust preferred securities financing through Central Bancorp Capital Trust I. On January 31, 2007, the Company completed a trust preferred securities financing in the amount of \$5.9 million through Central Bancorp Statutory Trust II. Central Bancorp Capital Trust I and Central Bancorp Statutory Trust II are the Company's only special purpose subsidiaries. The Company, within the financing transactions and concurrent with the issuance of the junior subordinated debentures and the trust preferred securities, issued guarantees related to the trust securities of both trusts for the benefit of their respective holders. Refer to Note 1, "Subordinated Debentures," in Notes to the Consolidated Financial Statements for more detail.

Management believes that the Company and Bank have adequate sources of liquidity to fund these commitments.

Contractual Obligations and Commitments by Maturity

The following table sets forth information regarding the Company's contractual obligations and commitments as of March 31, 2007.

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	4-5 years	More than 5 years
	(In thousands)				
Deposits	\$388,573	\$373,888	\$ 13,874	\$ 811	\$ --

Total commitments	<u>\$35,854</u>	<u>\$20,090</u>	<u>\$ 1,129</u>	<u>\$ 3</u>	<u>\$ 14,632</u>

Impact of Inflation and Changing Prices

The consolidated financial statements and related data presented in this Form 10-K have been prepared in conformity with accounting principles generally accepted in the United States of America, which require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation. Unlike many industrial companies, substantially all of the assets and liabilities of the Bank are monetary in nature. As a result, interest rates have a more significant impact on the Bank's performance than the general level of inflation. Over short periods of time, interest rates may not necessarily move in the same direction or in the same magnitude as inflation.

Capital Resources

The Company and the Bank are required to maintain minimum capital ratios pursuant to federal banking regulations. The first standard establishes a risk-adjusted ratio relating capital to different categories of balance sheet assets and off-balance sheet obligations. Two categories of capital are defined: Tier 1 or core capital (stockholders' equity) and Tier 2 or supplementary capital. Total capital is the sum of both Tier 1 and Tier 2 capital. According to the standards, Tier 1 capital must represent at least 50% of qualifying total capital. At March 31, 2007, the minimum total risk-based capital ratio required was 8.00%. The Company's and the Bank's risk-based total capital ratios at March 31, 2007 were 13.09% and 10.86%, respectively.

To complement the risk-based standards, the FDIC adopted a leverage ratio (adjusted stockholders' equity divided by total average assets) of 3% for the most highly rated banks and 4% for all others. The leverage ratio is to be used in tandem with the risk-based capital ratios as the minimum standards for banks. The Company's and the Bank's leverage ratios were 8.21% and 6.69%, respectively, at March 31, 2007.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company's earnings are largely dependent on its net interest income, which is the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities. The Company seeks to reduce its exposure to changes in interest rate, or market risk, through active monitoring and management of its interest-rate risk exposure. The policies and procedures for managing both on- and off-balance sheet activities are established by the Bank's asset/liability management committee ("ALCO"). The Board of Directors reviews and approves the ALCO policy annually and monitors related activities on an ongoing basis.

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its lending, borrowing and deposit taking activities.

The main objective in managing interest rate risk is to minimize the adverse impact of changes in interest rates on the Bank's net interest income and preserve capital, while adjusting the Bank's asset/liability structure to control interest-rate risk. However, a sudden and substantial increase or decrease in interest rates may adversely impact earnings to the extent that the interest rates borne by assets and liabilities do not change at the same speed, to the same extent, or on the same basis.

The Company quantifies its interest-rate risk exposure using a sophisticated simulation model. Simulation analysis is used to measure the exposure of net interest income to changes in interest rates over a specific time horizon. Simulation analysis involves projecting future interest income and expense under various rate scenarios. The simulation is based on forecasted cash flows and assumptions of management about the future changes in interest rates and levels of activity (loan originations, loan prepayments, deposit flows, etc). The assumptions are inherently uncertain and, therefore, actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and strategies. The net interest income projection resulting from use of forecasted cash flows and management's assumptions is compared to net interest income projections based on immediate shifts of 200 basis points upward and 200 basis points downward for fiscal years 2007 and 2006. Internal guidelines on interest rate risk state that for every 100 basis points immediate shift in interest rates, estimated net interest income over the next twelve months should decline by no more than 5%.

The following table indicates the projected change in net interest income, and sets forth such change as a percentage of estimated net interest income, for the twelve-month period following the date indicated assuming an immediate and parallel shift for all market rates with other rates adjusting to varying degrees in each scenario based on both historical and expected spread relationships:

	<u>At March 31,</u>			
	<u>2007</u>		<u>2006</u>	
	<u>Amount</u>	<u>% Change</u>	<u>Amount</u>	<u>% Change</u>
	(Dollars in thousands)			
200 basis point increase in rates	\$ (1,956)	(13.39)%	\$(1,530)	(10.0)%
200 basis point decrease in rates.....	320	2.19	611	4.0

As noted, this policy provides broad, visionary guidance for managing the Bank's balance sheet, not absolute limits. When the simulation results indicate a variance from stated parameters, ALCO will intensify its scrutiny of the reasons for the variance and take whatever actions are deemed appropriate under the circumstances. The current simulation was negatively impacted by the current flat to inverted yield curve.

CENTRAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

March 31, 2007

Note 1. Summary of Significant Accounting Policies

The accompanying consolidated financial statements include the accounts of Central Bancorp, Inc. (the "Company"), a Massachusetts corporation, and its wholly owned subsidiary, Central Co-operative Bank (the "Bank"), as well as wholly owned subsidiaries of the Bank.

The Company was organized at the direction of the Bank in September 1998 to acquire all of the capital stock of the Bank upon the consummation of the reorganization of the Bank into the holding company form of ownership. This reorganization was completed in January 1999. The Bank was organized as a Massachusetts chartered co-operative bank in 1915 and converted from mutual to stock form in 1986. The primary business of the Bank is to generate funds in the form of deposits and use the funds to make mortgage loans for the construction, purchase and refinancing of residential properties, and to make loans on commercial real estate in its market area. The Bank is subject to competition from other financial institutions. The Company is subject to the regulations of, and periodic examinations by, the Federal Reserve Bank ("FRB"). The Bank is also subject to the regulations of, and periodic examination by, the Federal Deposit Insurance Corporation ("FDIC") and the Massachusetts Division of Banks. The Bank's deposits are insured by the Deposit Insurance Fund of the FDIC for deposits up to \$100,000 for most accounts and up to \$250,000 for retirement accounts and the Share Insurance Fund ("SIF") for deposits in excess of the FDIC limits.

The Company conducts its business through one operating segment, the Bank. Most of the Bank's activities are with customers located in eastern Massachusetts. As set forth in Note 3 herein, the Bank concentrates in real estate lending. Management believes that the Bank does not have any significant concentrations in any one customer or industry.

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. All significant intercompany balances and transactions have been eliminated in consolidation. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and income and expenses for the year. Actual results could differ from those estimates. Material estimates that are particularly susceptible to change relate to the determination of the allowance for loan losses.

The Company owns 100% of the common stock of Central Bancorp Capital Trust I and Central Bancorp Statutory Trust II, (the "Trusts") which have issued trust preferred securities to the public. In accordance with Financial Accounting Standards Board ("FASB") Interpretation ("FIN") No. 46 "Consolidation of Variable Interest Entities—an Interpretation of Accounting Research Bulletin No. 51," as revised by FIN No. 46R ("FIN 46R") issued in December 2002, the Trusts are not included in the Company's consolidated financial statements. (See Note 1 – *Subordinated Debentures*)

The following is a summary of the more significant accounting policies adopted by the Bank.

Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, money market mutual fund investments, federal funds sold and other short-term investments having an original maturity at date of purchase of 90 days or less.

The Bank is required to maintain cash and reserve balances with the Federal Reserve Bank. Such reserves are calculated based upon deposit levels and amounted to approximately \$1.1 million at March 31, 2007.

Investments

Debt securities that management has the positive intent and ability to hold to maturity are classified as held-to-maturity and reported at cost, adjusted for amortization of premiums and accretion of discounts, both computed by a method that approximates the effective yield method. Debt and equity securities that are bought and held principally for the purpose of selling them in the near term are classified as trading and reported at fair value, with

unrealized gains and losses included in earnings. Debt and equity securities not classified as either held-to-maturity or trading are classified as available-for-sale and reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity and comprehensive income.

Gains and losses on sales of securities are recognized when realized with the cost basis of investments sold determined on a specific-identification basis. Premiums and discounts on investment and mortgage-backed securities are amortized or accreted to interest income over the actual or expected lives of the securities using the level-yield method.

If a decline in fair value below the amortized cost basis of an investment is judged to be other-than-temporary, the cost basis of the investment is written down to fair value as a new cost basis and the amount of the write-down is included in the results of operations.

The Company's investments in the Federal Home Loan Bank of Boston and the Co-operative Central Bank Reserve Fund are accounted for at cost.

Loans

Loans are reported at the principal amount outstanding, adjusted by unamortized discounts, premiums, and net deferred loan origination costs and fees. Loans classified as held for sale are stated at the lower of aggregate cost or market value. The Company enters into forward commitments (generally on a best efforts delivery basis) to sell loans in order to reduce market risk associated with the origination of loans held for sale. Market value is estimated based on outstanding investor commitments. Net unrealized losses, if any, are provided for in a valuation allowance by charges to operations. Loans are sold on a servicing released basis.

Loan origination fees, net of certain direct loan origination costs, are deferred and are amortized into interest income over the contractual loan term using the level-yield method. At March 31, 2007 and 2006, net deferred loan fees of \$97,000 and \$272,000, respectively, were recorded with the related loan balances for financial presentation purposes.

Interest income on loans is recognized on an accrual basis using the simple interest method. Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans and amortization of net deferred loan fees or costs are discontinued either when reasonable doubt exists as to the full and timely collection of interest or principal, or when a loan becomes contractually past due 90 days with respect to interest or principal. The accrual on some loans, however, may continue even though they are more than 90 days past due if management deems it appropriate, provided that the loans are well secured and in the process of collection. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectible as to both principal and interest. The Bank records interest income on non-accrual and impaired loans on the cash basis of accounting.

Loans are classified as impaired when it is probable that the Bank will not be able to collect all amounts due in accordance with the contractual terms of the loan agreement. Impaired loans, except those loans that are accounted for at fair value or at lower of cost or fair value, are accounted for at the present value of the expected future cash flows discounted at the loan's effective interest rate or as a practical expedient in the case of collateral dependent loans, the lower of the fair value of the collateral or the recorded amount of the loan. Management considers the payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Impaired loans are charged off when management believes that the collectibility of the loan's principal is remote. Management considers non-accrual loans, except for smaller balance, homogeneous residential mortgage loans, to be impaired.

Subordinated Debentures

On September 16, 2004, Central Bancorp, Inc. (the "Company") completed a trust preferred securities financing in the amount of \$5.1 million. In the transaction, the Company formed a Delaware statutory trust, known as Central Bancorp Capital Trust I ("Trust I"). Trust I issued and sold \$5.1 million of trust preferred securities in a private placement and issued \$158,000 of trust common securities to the Company. Trust I used the proceeds of these issuances to purchase \$5,258,000 of the Company's floating rate junior subordinated debentures due September 16, 2034 (the "Trust I Debentures"). The interest rate on the Trust I Debentures and the trust preferred securities is variable and adjustable quarterly at 2.44% over three-month LIBOR. At March 31, 2007 the interest rate was 7.79%. The Trust I Debentures are the sole assets of Trust I and are subordinate to all of the Company's existing and future obligations for borrowed money.

On January 31, 2007, the Company completed a trust preferred securities financing in the amount of \$5.9 million. In the transaction, the Company formed a Connecticut statutory trust, known as Central Bancorp Statutory Trust II ("Trust II"). Trust II issued and sold \$5.9 million of trust preferred securities in a private placement and issued \$183,000 of trust common securities to the Company. Trust II used the proceeds of these issuances to purchase \$6,083,000 of the Company's floating rate junior subordinated debentures due March 15, 2037 (the "Trust II Debentures"). From January 31, 2007 until March 15, 2017 (the "Fixed Rate Period"), the interest rate on the Trust II Debentures and the trust preferred securities is fixed at 7.015% per annum. Upon the expiration of the Fixed Rate Period, the interest rate on the Trust II Debentures and the trust preferred securities will be at a variable per annum rate, reset quarterly, equal to three month LIBOR plus 1.65%. The Trust II Debentures are the sole assets of Trust II. The Trust II Debentures and the trust preferred securities each have 30-year lives. The trust preferred securities and the Trust II Debentures will each be callable by the Company or Trust II, at their respective option, after ten years, and sooner in certain specific events, including in the event that the securities are not eligible for treatment as Tier I capital, subject to prior approval by the Federal Reserve Board, if then required. Interest on the trust preferred securities and the Trust II Debentures may be deferred at any time or from time to time for a period not exceeding 20 consecutive quarterly payments (five years), provided there is no event of default.

The trust preferred securities generally rank equal to the trust common securities in priority of payment, but will rank prior to the trust common securities if and so long as the Company fails to make principal or interest payments on the Trust I and/or the Trust II Debentures. Concurrently with the issuance of the Trust I and/or the Trust II Debentures and the trust preferred securities, the Company issued guarantees related to each trust's securities for the benefit of the respective holders of Trust I and Trust II.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level determined to be adequate by management to absorb probable losses based on an evaluation of known and inherent risks in the portfolio. This allowance is increased by provisions charged to operating expense and by recoveries on loans previously charged off, and reduced by charge-offs on loans.

Arriving at an appropriate level of allowance for loan losses necessarily involves a high degree of judgment. The allowance for loan losses is evaluated on a quarterly basis. Primary considerations in this evaluation are prior loan loss experience, the character and size of the loan portfolio, business and economic conditions, loan growth, delinquency trends, nonperforming loan trends and other asset quality factors. The Bank evaluates specific loan status reports on certain commercial and commercial real estate loans rated "substandard" or worse. Estimated reserves for each of these credits is determined by reviewing current collateral value, financial information, cash flow, payment history and trends and other relevant facts surrounding the particular credit. The remaining commercial and commercial real estate loans are provided for as part of pools of similar loans based on a combination of historical loss experience and qualitative adjustments including collateral type and loan-to-value ratios. Smaller balance, homogeneous loans, including residential real estate loans and consumer loans, are evaluated as a group by applying estimated charge off and recovery percentages, based on historical experience and certain qualitative factors, to the current outstanding balance in each category. Based on these analyses, the resulting allowance is deemed adequate to absorb all probable credit losses in the portfolio.

Although management uses available information to establish the appropriate level of the allowance for loan losses, future additions to the allowance may be necessary based on estimates that are susceptible to change as a result of changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral

part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination. Changes in estimates are provided currently in earnings.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the accounting basis and the tax basis of the Bank's assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled. The Bank's deferred tax asset is reviewed periodically and adjustments to such asset are recognized as deferred income tax expense or benefit based on management's judgments relating to the realizability of such asset.

Banking Premises and Equipment

Land is stated at cost. Buildings, leasehold improvements and equipment are stated at cost, less allowances for depreciation and amortization. Depreciation and amortization are computed on the straight-line method over the estimated useful lives of the assets or terms of the leases, if shorter.

Goodwill

In June 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142") which is effective for fiscal years beginning after December 15, 2001. The Company adopted SFAS 142 as of April 1, 2002. SFAS 142 addresses the method of identifying and measuring goodwill and other intangible assets having indefinite lives acquired in a business combination, eliminates further amortization of goodwill, and requires periodic impairment evaluations of goodwill using a fair value methodology prescribed in the statement. As a result of adopting SFAS 142, the Company no longer amortizes the goodwill balance of \$2.2 million. Impairment testing is required at least annually or more frequently as a result of an event or change in circumstances (e.g., recurring operating losses by the acquired entity) that would indicate an impairment adjustment may be necessary. Annual Impairment testing was performed during each year and in each analysis, it was determined that an impairment charge was not required.

Pension Benefits

The Bank provides pension benefits for its employees in a multi-employer pension plan through membership in the Co-operative Banks Employees Retirement Association. Pension costs are funded as they are accrued and are accounted for on a defined contribution plan basis.

Stock-Based Compensation

Effective April 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 123 (Revised 2004), Share-Based Payment, ("SFAS 123R"), using the statement's modified prospective application method. Prior to April 1, 2006, the Company followed SFAS No. 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, an amendment to FASB Statement No. 123, which required entities to recognize as expense over the vesting period the fair value of stock-based awards on the date of grant or measurement date. For employee stock-based awards, however, SFAS Nos. 123 and 148 allowed entities to continue to apply the intrinsic value method under the provisions of Accounting Principles Board ("APB") Opinion No. 25 and provide pro forma net earnings disclosures as if the fair-value-based method defined in SFAS No. 123 had been applied. The Company elected to apply the provisions of APB Opinion No. 25 and provide the pro forma disclosures of SFAS Nos. 123 and 148 for periods as required prior to April 1, 2006.

The Company uses the Black-Scholes option pricing model as its method for determining fair value of stock option grants, which was also used by the Company for its pro forma information disclosures of stock-based compensation expense prior to the adoption of SFAS No. 123. The Company has previously adopted two qualified Stock Options Plans for the benefit of officers and other employees under which an aggregate of 281,500 shares have been reserved for issuance. One of these plans expired in 1997 and the other plan expires in 2009. However, all awards under the plan that expires in 2009 were granted by the end of 2005. Awards will become available again if any participants forfeit awards under the plan prior to its expiration in 2009. Accordingly, the Company may not currently make additional grants under these plans. However, grants outstanding at the time the plans expire will continue to remain outstanding according to their terms.

On July 31, 2006, the Company's stockholders approved the Central Bancorp, Inc. 2006 Long-Term Incentive Plan (the "Incentive Plan") at the annual meeting of stockholders. Under the Incentive Plan, 150,000 shares have been reserved for issuance as options to purchase stock, restricted stock, or other stock awards. The exercise price of an option may not be less than the fair market value of the Company's common stock on the date of grant of the option and may not be exercisable more than ten years after the date of grant. As of March 31, 2007 91,000 shares remained unissued under the Incentive Plan.

SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates in order to derive the Company's best estimate of awards ultimately expected to vest. Forfeitures represent only the unvested portion of a surrendered option and are typically estimated based on historical experience. Based on an analysis of the Company's historical data, the Company applied a forfeiture rate of 0% to stock options outstanding in determining its SFAS 123(R) stock compensation expense for the year ended March 31, 2007, which it believes is a reasonable forfeiture estimate for the period. In the Company's pro forma information required under SFAS 123(R) for the periods prior to 2006, the Company accounted for forfeitures as they occurred.

Under the provisions of SFAS 123R, the Company recognizes the estimated fair value of stock based compensation in the consolidated statement of operations over the requisite service period of each option granted. Under the modified prospective application method of SFAS 123R, the Company applies the provisions of SFAS 123R to all awards granted or modified after April 1, 2006 as well as unvested awards issued in a prior period. The Company had no unvested stock options outstanding at March 31, 2006 and awarded options to purchase 10,000 shares and stock grants for 49,000 restricted shares in the year ended March 31, 2007. The options and restricted shares granted in fiscal 2007 vest over a five-year life. Compensation expense recorded for the year ended March 31, 2007 totaled \$134,000. The fair value of the options granted in 2007 was \$9.04 per share and the fair value of the restricted stock granted in 2007 was \$ 31.20 per share.

The range of exercise prices, weighted average remaining contractual lives of outstanding stock options and aggregate intrinsic value at March 31, 2007 are as follows:

	<u>Number of Shares</u>	<u>Weighted Average Exercise Price</u>
Balance March 31, 2004	<u>28,950</u>	\$18.581
Exercised	(775)	19.796
Granted	<u>33,299</u>	28.990
Balance March 31, 2005	<u>61,474</u>	24.204
Exercised	<u>(1,583)</u>	18.471
Balance March 31, 2006	<u>59,891</u>	24.356
Exercised	<u>(770)</u>	18.489
Granted	<u>10,000</u>	<u>31.200</u>
Balance at March 31, 2007	<u>69,121</u>	<u>\$25.411</u>

As of March 31, 2007, the unrecognized compensation costs related to options and restricted stock vesting will be primarily recognized over a period of approximately 5 years.

<u>Fiscal year ending</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>TOTAL</u>
Compensation Expense	322,000	322,000	322,000	322,000	188,000	1,476,000

The Company had previously followed the disclosure-only provisions of SFAS No. 123 "Accounting for Share-Based Compensation," as amended by SFAS No. 148, "Accounting for Share-Based Compensation—Transition and Disclosure".

Upon adoption of SFAS 123R, in accordance with Staff Accounting Bulletin No. 107, the Company selected the Black-Scholes option pricing model as the most appropriate method for determining the estimated fair value for the stock awards. The Black-Scholes method of valuation requires several assumptions. The assumptions used in this valuation are for the 2007 grants are: (1) the expected term of the stock award, 6.5 years, (2) the expected future stock volatility over the expected term, 26.22%, (3) the dividend yield, 2.22%, and (4) risk-free interest rate, 4.6%. The expected term represents the expected period of time the Company believes the options will be outstanding based on historical information. Estimates of expected future stock price volatility are based on the historic volatility of the Company's common stock and the risk-free interest rate is based on the U.S. Zero-Bond rate. The Company's estimated forfeiture rate is zero.

The range of exercise prices, weighted average remaining contractual lives of outstanding stock options and aggregate intrinsic value at March 31, 2007 are as follows:

	<u>Exercise Price</u>	<u>Number of Shares Outstanding</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Weighted Average Exercise Price</u>	<u>Aggregate Intrinsic Value (1)</u>
	\$16.625	12,077 (2)	3.9	\$16.625	\$161,771
	20.250	13,745 (2)	2.8	20.250	134,289
	28.990	33,299 (2)	8.1	28.990	34,298
	31.200	10,000 (3)	9.7	31.200	(11,800)
Average/Total	<u>\$25.411</u>	<u>69,121</u>	<u>6.6</u>	<u>\$25.411</u>	<u>\$318,558</u>

- (1) Represents the total intrinsic value, based on the Company's closing stock price of \$30.02 as of March 31, 2007, which would have been received by the option holders had all option holders exercised their options as of that date. The total intrinsic value of options exercised during the year ended March 31, 2007 was approximately \$11,000.
- (2) Fully vested and exercisable at the time of grant.
- (3) Subject to vesting over five years, 0% vested at March 31, 2007.

On November 10, 2005, the Financial Accounting Standards Board ("FASB") issued FASB Staff Position SFAS 123R-3 "Transition Election Related to Accounting for Tax Effects of Share-Based Payment Awards." The Company has elected to adopt the alternative transition method provided by the FASB Staff Position for calculating the tax effects (if any) of stock-based compensation expense pursuant to Statement 123(R). The alternative transition method includes simplified methods to establish the beginning balance of the additional paid-in capital pool related to the tax effects of employee stock-based compensation, and to determine the subsequent impact to the additional paid-in capital pool and the consolidated statements of operations and cash flows of the tax effects of employee stock-based compensation awards that are outstanding upon adoption of Statement 123(R).

Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options, were exercised or converted into common stock. Unallocated ESOP shares are not treated as being outstanding in the computation of either basic or diluted EPS. At March 31, 2007, 2006 and 2005, there were approximately 249,000, 154,000 and 170,000 unallocated ESOP shares, respectively.

The following depicts a reconciliation of basic and diluted earnings per share:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
	(Amounts in thousands, except per share amounts)		
Net income available to common stockholders	<u>\$ 1,020</u>	<u>\$ 2,643</u>	<u>\$ 2,463</u>
Weighted average number of common shares outstanding	1,640	1,590	1,624
Weighted average number of unallocated ESOP shares	<u>(221)</u>	<u>(161)</u>	<u>(142)</u>
Weighted average number of common shares outstanding used in calculation of basic earnings per share	1,419	1,429	1,482
Incremental shares from the assumed exercise of dilutive stock options	<u>33</u>	<u>9</u>	<u>11</u>
Weighted average number of common shares outstanding used in calculating diluted earnings per share	<u>1,452</u>	<u>1,438</u>	<u>1,493</u>
Earnings per share:			
Basic	\$ 0.72	\$ 1.85	\$ 1.66
Diluted	\$ 0.70	\$ 1.84	\$ 1.65

At March 31, 2007, 2006 and 2005, 10,000, 33,299 and 33,299 shares, respectively, were antidilutive and were excluded from the above calculation.

Other Comprehensive Income (Loss)

The Company has established standards for reporting and displaying comprehensive income, which is defined as all changes to equity except investments by, and distributions to, shareholders. Net income is a component of comprehensive income, with all other components referred to, in the aggregate, as other comprehensive income.

Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board ("FASB") issued Financial Accounting Standards Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes". FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprises' financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes". FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 is effective for fiscal years beginning after December 15, 2006. Management does not expect that the adoption of this standard will have a material impact on the Bank's consolidated financial statements.

In September 2006, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 108 ("SAB 108"). Due to diversity in practice among registrants, SAB 108 expresses SEC staff views regarding the process by which misstatements in financial statements are evaluated for purposes of determining whether financial statement restatement is necessary. SAB 108 is effective for fiscal years ending after November 15, 2006, and early application is encouraged. SAB 108 did not have a material impact on our results from operations or financial position.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments" ("SFAS 155"). SFAS 155 allows any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," to be carried at fair value in its entirety, with changes in fair value recognized in earnings. In addition, SFAS 155 requires that beneficial interests in securitized financial assets be analyzed to determine whether they are freestanding derivatives or contain embedded derivatives. SFAS 155 also eliminates a prior restriction on the types of passive derivatives that a qualifying special purpose entity is permitted to hold. SFAS 155 is applicable to new or modified financial instruments in fiscal years beginning after September 15, 2006, though the provisions related to fair value accounting for hybrid financial instruments can also be applied to existing instruments. The adoption of SFAS 155 is not expected to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value under other accounting pronouncements that permit or require fair value measurements, changes the methods used to measure fair value and expands disclosures about fair value measurements. In particular, disclosures are required to provide information on the extent to which fair value is used to measure assets and liabilities; the inputs used to develop measurements; and the effect of certain of the measurements on earnings (or changes in net assets). SFAS 157 also nullifies the specific guidance in EITF Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities" which prohibited the recognition of gains and losses at the inception of a derivative transaction in the absence of observable market data. SFAS 157 eliminates the use of a blockage factor for fair value measurements of financial instruments trading in an active market. SFAS 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Early adoption, as of the beginning of an entity's fiscal year, is also permitted, provided interim financial statements have not yet been issued. We are currently evaluating the potential impact, if any, that the adoption of SFAS 157 will have on our consolidated financial statements.

In September 2006, FASB issued Statement No. 158 (SFAS 158), "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 38, 106, and 132(R)". SFAS 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. This Statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions. An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006. The Company has adopted SFAS No 158. See Note 11 of the Notes to Consolidated Financial Statements for the effect the adoption of SFAS No. 158 had on the consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Standards No. 159 ("FASB 159"), "The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115". This Statement provides companies with an option to measure, at specified election dates, many financial instruments and certain other items at fair value that are not currently measured at fair value. A company that adopts SFAS 159 will report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. This Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. This Statement is effective for fiscal years beginning after November 15, 2007. The Company does not believe that the adoption of SFAS 159 will have a material impact on our results of operations or financial condition.

Note 2. Investments (Dollars in Thousands)

The amortized cost and fair value of investments securities available for sale are summarized as follows:

	March 31, 2007			
	Amortized Cost	Gross Unrealized		Fair Value
		Gains	Losses	
		(Dollars in Thousands)		
U.S. Government and agency obligations	\$ 19,984	\$ --	\$ (216)	\$19,768
Corporate bonds	13,565	250	(118)	13,697
Mortgage-backed securities	<u>27,829</u>	<u>61</u>	<u>(503)</u>	<u>27,387</u>
Total debt securities	61,378	311	(837)	60,852
Marketable equity securities	<u>4,655</u>	<u>293</u>	<u>(37)</u>	<u>4,911</u>
Total	<u>\$ 66,033</u>	<u>\$ 604</u>	<u>\$ (874)</u>	<u>\$65,763</u>

	March 31, 2006			
	Amortized Cost	Gross Unrealized		Fair Value
		Gains	Losses	
		(Dollars in Thousands)		
U.S. Government and agency obligations	\$25,973	\$ --	\$ (566)	\$ 25,407
Corporate bonds	28,558	175	(436)	28,297
Mortgage-backed securities	<u>40,115</u>	<u>61</u>	<u>(1,228)</u>	<u>38,948</u>
Total debt securities	94,646	236	(2,230)	92,652
Marketable equity securities	<u>4,513</u>	<u>140</u>	<u>(110)</u>	<u>4,543</u>
Total	<u>\$99,159</u>	<u>\$ 376</u>	<u>\$ (2,340)</u>	<u>\$97,195</u>

Gross unrealized losses and fair value at March 31, 2007, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position follows:

	Less Than 12 Months		Greater Than 12 Months	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(Dollars in Thousands)			
U.S. Government and agency obligations	\$ --	\$ --	\$19,768	\$ (216)
Corporate bonds	--	--	4,412	(118)
Mortgage-backed securities	--	--	25,072	(503)
Marketable equity securities	<u>908</u>	<u>(37)</u>	<u>--</u>	<u>--</u>
Total temporarily impaired securities	<u>\$ 908</u>	<u>\$ (37)</u>	<u>\$49,252</u>	<u>\$ (837)</u>

As of March 31, 2007, securities held in the investment portfolio with unrealized losses have been evaluated by management and management has concluded that an other-than-temporary impairment does not exist at March 31, 2007. The primary reason these securities are in an unrealized loss position is due to changes in market conditions and interest rates. Most of the securities are debt securities whose values fluctuate daily based on the current interest rate environment. Management considers the credit worthiness of the issuer in evaluating impairment.

The maturity distribution (based on contractual maturities) and annual yields of debt securities at March 31, 2007 are as follows:

	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Annual Yield</u>
	(Dollars in Thousands)		
Due within one year	\$ 3,000	\$ 2,974	3.92%
Due after one year but within five years	30,605	30,546	5.12
Due after five years but within ten years	13,297	12,970	4.22
Due after ten years	<u>14,476</u>	<u>14,362</u>	4.99
	<u>\$ 61,378</u>	<u>\$ 60,852</u>	

Mortgage-backed securities are shown at their contractual maturity dates but actual maturities may differ as borrowers have the right to prepay obligations without incurring prepayment penalties.

Proceeds from sales of investment securities and related gains and losses for the years ended March 31, 2007, 2006 and 2005 (all classified as available for sale) were as follows:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
	(Dollars in Thousands)		
Proceeds from sales	\$17,405	\$4,400	\$6,875
Gross gains	674	508	536
Gross losses	93	89	14
Other than temporary impairments	--	--	<u>42</u>
Net realized gains (losses)	<u>\$ 581</u>	<u>\$ 419</u>	<u>\$ 453</u>

For the year ended March 31, 2005 the Bank recognized write-downs in certain equity securities totaling \$42,000, as a result of declines in the fair value of such securities judged to be other-than-temporary. During the years ended March 31, 2007 and 2006 the Bank did not recognize any write-downs for equity securities. The write-downs are included in the preceding table.

Mortgage-backed securities with an amortized cost of \$1,616 million and fair value of \$1,652 million at March 31, 2007, was pledged to provide collateral for certain customers. In addition, investment securities carried at \$61.4 million were pledged under a blanket lien to partially secure the Bank's advances from the Federal Home Loan Bank of Boston ("FHLB of Boston").

As a member of the FHLB of Boston, the Bank was required to invest in stock of the FHLB of Boston in an amount which, until April 2004, was equal to 1% of its outstanding home loans or 1/20th of its outstanding advances from the FHLB of Boston, whichever was higher. In April 2004, the FHLB of Boston amended its capital structure at which time the Company's FHLB of Boston stock was converted to Class B stock. Such stock is redeemable at par value five years after filing for redemption or upon termination of membership. The FHLB of Boston may, but is not obligated to, repurchase Class B stock prior to expiration of the five-year redemption notice. Under the new capital structure, the Bank's stock investment requirement is an amount equal to the sum of 0.35% of certain specified assets (such assets totaled \$265.0 million at the time of the change in capital structure) plus 4.5% of the Bank's advances and certain other specified items. In connection with the adoption of the new capital structure, the Bank was not required to increase its investment in FHLB stock.

The Co-operative Central Bank Reserve Fund (the "Fund") was established for liquidity purposes and consists of deposits required of all insured co-operative banks in Massachusetts. The Fund is used by The Co-operative Central Bank to advance funds to member banks or to make other investments.

Note 3. Loans (In Thousands)

Loans as of March 31, 2007 and 2006 are summarized below:

	<u>2007</u>	<u>2006</u>
Real estate loans:		
Residential real estate	\$175,259	\$160,381
Commercial real estate	235,535	213,935
Construction	35,011	27,680
Home equity lines of credit	<u>6,901</u>	<u>7,505</u>
Total real estate loans	<u>452,706</u>	<u>409,051</u>
Commercial loans	6,605	4,457
Consumer loans	<u>1,231</u>	<u>1,360</u>
Total loans	460,542	415,318
Less: allowance for loan losses	<u>(3,881)</u>	<u>(3,788)</u>
Total loans, net	<u>\$456,661</u>	<u>\$411,530</u>

The Bank had one loan on non-accrual status totaling \$330 as of March 31, 2007 and two loans on non-accrual status totaling \$1,220 as of March 31, 2006. During the years ended March 31, 2007 and 2006, there were no impaired loans other than non-accrual loans. No reserves were required for impaired loans.

Mortgage loans, including residential and commercial, serviced by the Bank for others amounted to \$12.1 million and \$11.5 million at March 31, 2007 and 2006, respectively.

The Bank's lending activities are conducted principally in communities of suburban Boston area. The Bank grants mortgage loans on residential property, commercial real estate, and construction of residential homes, second mortgages, home equity and other loans. Substantially all loans granted by the Bank are secured by real estate collateral. The ability and willingness of residential mortgage borrowers to honor their repayment commitments are generally impacted by the level of overall economic activity within the borrowers' geographic areas and real estate values. The ability and willingness of commercial real estate and construction loan borrowers to honor their repayment commitments are generally impacted by the health of the real estate market in the borrowers' geographic area and the general economy.

During fiscal 2007, the Bank purchased \$14.2 million in residential whole loans and participated in \$13.5 million commercial real estate loans.

The following summarizes the activity with respect to loans made to directors and officers and their related interests for the years ended March 31:

	<u>2007</u>	<u>2006</u>
Balance at beginning of year	\$ 702	\$ 1,019
New loans	--	16
Repayment of principal	<u>(48)</u>	<u>(333)</u>
Balance at end of year	<u>\$ 654</u>	<u>\$ 702</u>

Loans included above were made in the Bank's ordinary course of business, on substantially the same terms, including interest rates and collateral requirements, as those prevailing at the time for comparable transactions with unrelated persons. All loans included above are performing in accordance with the terms of the respective loan agreement.

Note 4. Allowance for Loan Losses (In Thousands)

A summary of changes in the allowance for loan losses follows:

	<u>Years Ended March 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Balance at beginning of year	\$ 3,788	\$ 3,681	\$ 3,537
Provision charged to expense	80	100	100
Amounts charged-off	(48)	(39)	(3)
Recoveries on accounts previously charged-off	61	46	47
Balance at end of year	<u>\$ 3,881</u>	<u>\$ 3,788</u>	<u>\$ 3,681</u>

Note 5. Banking Premises and Equipment (In Thousands)

A summary of cost, accumulated depreciation and amortization of banking premises and equipment at March 31 follows:

	<u>2007</u>	<u>2006</u>	<u>Estimated Useful Lives</u>
Land	\$ 589	\$ 589	
Buildings and improvements	2,162	3,059	50 years
Furniture and fixtures	3,093	7,887	3-5 years
Leasehold improvements	<u>1,538</u>	<u>998</u>	5-6 years
	7,382	12,533	
Less accumulated depreciation and amortization	<u>(2,626)</u>	<u>(8,663)</u>	
Total	<u>\$ 4,756</u>	<u>\$ 3,870</u>	

Depreciation and amortization for the years ended March 31, 2007, 2006 and 2005 amounted to \$835,000, \$572,000 and \$427,000, respectively, and is included in occupancy and equipment expense in the accompanying consolidated statements of income.

A summary of minimum rentals of banking premises for future periods under non-cancelable operating leases follows:

<u>Years Ending March 31,</u>	
2008	\$ 330
2009	322
2010	322
2011	322
2012	322
Thereafter	1,238

Certain leases contain renewal options the potential impact of which is not included above. Rental expense for the years ended March 31, 2007, 2006 and 2005 was \$338,000, \$181,000 and \$152,000, respectively, and is included in occupancy and equipment expense in the accompanying consolidated statements of income.

Note 6. Deposits (Dollars in Thousands)

Deposits at March 31 are summarized as follows:

	<u>2007</u>	<u>2006</u>
Demand deposit accounts	\$ 40,026	\$ 40,871
NOW accounts	28,591	29,902
Passbook and other savings accounts	56,495	65,546
Money market deposit accounts	<u>45,586</u>	<u>36,051</u>
Total non certificate accounts	<u>170,698</u>	<u>172,370</u>
Term deposit certificates		
Certificates of \$100 and above	82,159	84,028
Certificates less than \$100	<u>135,716</u>	<u>137,015</u>
Total term deposit certificates	<u>217,875</u>	<u>221,043</u>
	<u>\$388,573</u>	<u>\$ 393,413</u>

Contractual maturities of term deposit certificates with weighted average interest rates at March 31, 2007 are as follows:

	<u>Amount</u>	<u>Rate</u>
Within 1 year	\$ 203,190	4.55%
Over 1 to 3 years	13,874	2.65
Over 3 years	<u>811</u>	3.62
	<u>\$ 217,875</u>	

Note 7. Federal Home Loan Bank Advances (Dollars in Thousands)

A summary of the maturity distribution of FHLB of Boston advances (based on final maturity dates) with weighted average interest rates at March 31, 2007 and March 31, 2006 follows:

	<u>2007</u>		<u>2006</u>	
	<u>Amount</u>	<u>Rate</u>	<u>Amount</u>	<u>Rate</u>
Within 1 year	\$ 36,000	5.34%	\$ 13,500	3.71%
1-2 years	10,000	5.46	22,000	5.36
2-3 years	20,000	5.97	15,000	5.13
3-4 years	20,000	5.81	20,000	5.97
4-5 years	-	-	24,000	5.61
Over 5 to 10 years	<u>39,000</u>	4.02	<u>9,000</u>	3.83
	<u>\$125,000</u>	5.11%	<u>\$103,500</u>	5.15%

At March 31, 2007, advances totaling \$107.0 million are callable during fiscal 2008 prior to their scheduled maturity. The Bank is subject to a substantial penalty in the event it elects to prepay any of its FHLB of Boston advances.

The FHLB of Boston is authorized to make advances to its members subject to such regulations and limitations as the Federal Home Loan Bank Board may prescribe. The advances are secured by FHLB of Boston stock and a blanket lien on certain qualified collateral, defined principally as 90% of the fair value of U.S. Government and federal agency obligations and 75% of the carrying value of first mortgage loans on owner-

occupied residential property. In addition, certain multi-family property loans are pledged to secure FHLB advances. The Bank's unused borrowing capacity with the FHLB of Boston was approximately \$43.8 million at March 31, 2007.

Note 8. Income Taxes (Dollars in Thousands)

The components of the provision for income taxes for the years indicated are as follows:

	<u>Years Ended March 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Current			
Federal	\$ 726	\$ 1,446	\$ 1,332
State	<u>127</u>	<u>76</u>	<u>74</u>
Total current provision	853	1,522	1,406
Deferred (prepaid)	<u>(366)</u>	<u>(134)</u>	<u>(101)</u>
	<u>\$ 487</u>	<u>\$ 1,388</u>	<u>\$ 1,305</u>

The provision for income taxes for the periods presented is different from the amounts computed by applying the statutory Federal income tax rate to income before income taxes. The differences between expected tax rates and effective tax rates are as follows:

	<u>Years Ended March 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Statutory Federal tax rate	34.0%	34.0%	34.0%
Items affecting Federal income tax rate:	--	--	--
Dividends received deduction	(2.2)	(0.6)	(0.7)
Stock buyback costs	--	--	1.5
State income taxes	0.1	0.7	0.2
ESOP expense	---	--	(0.5)
Other	<u>0.4</u>	<u>0.3</u>	<u>0.1</u>
Effective tax rate	<u>32.3%</u>	<u>34.4%</u>	<u>34.6%</u>

The components of gross deferred tax assets and gross deferred tax liabilities that have been recognized as of March 31, 2007 and 2006 are as follows:

	<u>2007</u>	<u>2006</u>
Deferred tax assets:		
Allowance for loan losses	\$1,267	\$ 975
Deferred loan origination fees	--	10
Depreciation	418	353
Post-employee retirement benefit accrual	246	253
Write-down of investments	43	24
Unrealized loss on securities, net	195	696
Capital loss carry forward	202	273
Other	<u>103</u>	<u>69</u>
Gross deferred tax asset	<u>2,474</u>	<u>2,653</u>
Deferred tax liabilities:		
Accrued dividend receivable	--	44
Deferred loan origination costs	262	262
Gross deferred tax liability	<u>--</u>	<u>306</u>
Net deferred tax asset	<u>\$2,212</u>	<u>\$ 2,347</u>

Based on the Company's historical and current pre-tax earnings, management believes it is more likely than not that the Company will realize the net deferred tax asset existing at March 31, 2007. Further, management believes the existing net deductible temporary differences will reverse during periods in which the Company generates net taxable income. At March 31, 2007, recoverable income taxes, plus estimated taxes for fiscal 2007, exceed the amount of the net deferred tax asset. There can be no assurance, however, that the Company will generate any earnings or any specific level of continuing earnings.

The unrecaptured base year tax bad debt reserves will not be subject to recapture as long as the Company continues to carry on the business of banking. In addition, the balance of the pre-1988 bad debt reserves continues to be subject to provision of present law that requires recapture in the case of certain excess distributions to shareholders. The tax effect of pre-1988 bad debt reserves subject to recapture in the case of certain excess distributions is approximately \$1.3 million.

Note 9. Financial Instruments with Off-Balance Sheet Risk (In Thousands)

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include unused lines of credit, unadvanced portions of commercial and construction loans, and commitments to originate loans. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the balance sheets. The amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to its financial instruments is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Financial instruments with off-balance sheet risks as of March 31, 2007 and 2006 included the following:

	<u>2007</u>	<u>2006</u>
Unused home equity and personal lines of credit	\$17,164	\$ 18,563
Unadvanced portions of construction loans	5,552	8,011
Unadvanced portions of commercial loans	1,296	838
Commitments to originate commercial mortgage loans	6,894	3,684
Commitments to originate residential mortgage loans	3,152	1,776
Commitments to sell residential mortgage loans	<u>1,796</u>	<u>2,518</u>
Total off-balance sheet commitments	<u>\$35,854</u>	<u>\$35,390</u>

Commitments to originate loans, unused lines of credit and unadvanced portions of commercial and construction loans are agreements to lend to a customer, provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the borrower.

Note 10. Stockholders' Equity (Dollars in Thousands, except per share amount)

The Company and the Bank may not declare or pay cash dividends on their stock if the effect thereof would cause capital to be reduced below regulatory requirements, or if such declaration and payment would otherwise violate regulatory requirements.

In October 1991, the Company adopted a Shareholder Rights Agreement ("Rights Plan") entitling each shareholder, other than an Acquiring Person or an Adverse Person as defined below, to purchase the Company's stock at a discounted price in the event any person or group of persons exceeded predetermined ownership limitations of the Company's outstanding common stock (an "Acquiring Person") and, in certain circumstances, engaged in specific activities deemed adverse to the interests of the Company's shareholders (an "Adverse Person"). The Rights Plan was due to expire in October 2001, but was renewed by the Board of Directors during fiscal 2002 and is now scheduled to expire in October 2011.

In fiscal 2005, the Commonwealth of Massachusetts adopted legislation that eliminated treasury stock, including treasury stock that was present at the effective date. As a result of this change, the presentation of treasury stock in the equity section of the balance sheet is no longer permitted for Massachusetts corporations. Shares that have been or will be repurchased are restored to the status of authorized but unissued shares.

The Corporation (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Corporation's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies. The minimum core (leverage) capital ratio required for banks with the highest overall rating from bank regulatory agencies is 3.00% and is 4.00% for all others. The Bank must also have a minimum total risk-based capital ratio of 8.00% (of which 4.00% must be Tier I capital, consisting of common stockholders' equity). As of March 31, 2007, the Bank met all capital adequacy requirements to which it is subject.

The most recent notification from the FDIC categorized the Bank as “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized,” the Bank must maintain minimum risk-weighted capital, Tier 1 capital and tangible capital ratios as set forth in the table. There are no conditions or events, since that notification that management believes would cause a change in the Bank's categorization. No deduction was taken from capital for interest-rate risk. The Company's and the Bank's Tier 1 leverage, Tier 1 risk-based and total risk-based capital ratios together with related regulatory minimum requirements are summarized below:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2007:						
Company (consolidated)						
Total capital	\$50,455	13.09%	\$30,836	≥8.00%	N/A	N/A
Tier 1 capital	46,459	12.05	15,422	≥4.00	N/A	N/A
Tier 1 leverage capital	46,459	8.21	22,635	≥4.00	N/A	N/A
Bank						
Total capital	\$41,822	10.86%	\$30,808	≥8.00%	\$38,510	≥10.00%
Tier 1 capital	37,826	9.83	15,392	≥4.00	23,088	≥6.00
Tier 1 leverage capital	37,826	6.69	22,616	≥4.00	28,271	≥5.00
As of March 31, 2006:						
Company						
Total capital	\$47,139	13.09%	\$28,816	≥8.00%	N/A	N/A
Tier 1 capital	43,337	12.03	14,408	≥4.00	N/A	N/A
Tier 1 leverage capital	43,337	7.93	21,858	≥4.00	N/A	N/A
Bank						
Total capital	\$43,684	12.15%	\$28,755	≥8.00%	\$35,944	≥10.00%
Tier 1 capital	39,882	11.10	14,378	≥4.00	21,566	≥6.00
Tier 1 leverage capital	39,882	7.31	21,826	≥4.00	27,283	≥5.00

Note 11. Employee Benefits (dollars in thousands, except per share data)

Pension and Savings Plans

As a participating employer in the Cooperative Banks Employees Retirement Association (“CBERA”), a multi-employer plan, the Bank has in effect a noncontributory defined benefit plan (“Pension Plan”) and a defined contribution plan (“Savings Plan”) covering substantially all eligible employees.

Benefits under the Pension Plan are determined at the rate of 1% and 1.5%, respectively, of certain elements of final average pay times years of credited service and are generally provided at age 65 based on years of service and the average of the participants' three highest consecutive years of compensation from the Bank. Employee contributions are made to a Savings Plan which qualifies under section 401(k) of the Internal Revenue Code of 1986, as amended. The Bank matches 50% of an eligible deferral contribution on the first 5% of the deferral amount subject to the maximum allowable under federal regulations. Pension benefits and employer contributions to the Savings Plan become vested over six years.

Expenses for the Pension Plan and the Savings Plan were \$497,000, \$441,000 and \$441,000, for the years ended March 31, 2007, 2006 and 2005, respectively. Forfeitures are used to reduce expenses of the plans.

Employee Stock Ownership Plan

The Bank maintains an Employee Stock Ownership Plan ("ESOP") that is authorized to purchase shares of outstanding common stock of the Company from time to time in the open market or in negotiated transactions. The ESOP is a tax-qualified defined contribution plan established for the exclusive benefit of the Bank's employees. All full-time employees who have completed one year of service with the Bank are eligible to participate in the ESOP.

Through October 2003, the ESOP repaid its loans to the Company with funds from the Bank's contributions to the ESOP along with dividends on unallocated ESOP shares. These loans had terms of up to 20 years. In October 2003, the ESOP refinanced these loans from the Company with a third party lender. In connection with this refinancing, the Company received proceeds of \$3,506,000, of which \$2,250,000 was contributed to the Bank's capital. The loan bears interest at the prevailing prime rate plus 1/2% and matures in March 2012. Principal payments of \$97,000 are to be made each quarter. The loan is collateralized by the ESOP's unallocated Company stock, a certificate of deposit of \$627,000 and a pledge of the Company's stock in the Bank. In addition, the Company guarantees repayment of the loan.

On January 31, 2007, the Central Co-operative Bank Employee Stock Ownership Plan (the "ESOP") completed the purchase of 109,600 shares of the Company's common stock, of which 6,100 shares were purchased with cash accumulated through allocations to participants' accounts. The ESOP purchased the shares pursuant to the terms of the Stock Purchase Agreement, dated January 25, 2007, by and among the Company and the ESOP and Mendon Capital Advisors Corp., Moors & Mendon Master Fund, L/P., Mendon ACAM Master Fund, Ltd. and Burnham Financial Services Fund (collectively, "Mendon"). In conjunction with this transaction, the ESOP refinanced the above noted third party loan with a loan from the Company with the same terms as the third party loan. Additionally, the ESOP borrowed \$3,416,000 from the Company related to this purchase. This loan will be repaid in quarterly installments of principal and interest of \$90,800 over 20 years.

Compensation expense is recognized as the shares are allocated to participants based upon the fair value of the shares at the time they are allocated. As a result, changes in the market value of the Company's stock have an effect on the Company's results of operations but have no effect on stockholders' equity. ESOP expense for fiscal 2007, 2006 and 2005 amounted to \$ 505,000, \$439,000 and \$455,000, respectively.

Stock Option and Long-Term Incentive Plans

The Company has adopted three equity based compensation plans for the benefit of officers and other employees under which an aggregate of 431,500 shares had been reserved for issuance. One of these plans terminated in 1997 and there are currently no shares available for issuance under the 1999 plan. A Long-term Incentive Compensation Plan was approved at the 2006 annual meeting of the Company and reserved 150,000 shares for the grant of equity-based compensation, including stock options and restricted stock awards.

See Note 1 for further information on stock options and compensation.

The exercise price of an option may not be less than the fair market value of the Company's common stock on the date of grant of the option and may not be exercisable more than ten years after the date of grant. As of March 31, 2007, 91,000 shares remained unissued under the 2006 Long-term Incentive Plan.

Other Post-Retirement Benefits

The Bank maintains a post-retirement medical insurance plan and life insurance plan for certain individuals. The following tables summarize the funded status and the actuarial benefit obligations of these plans for fiscal 2007 and 2006.

	2007		2006	
	Life	Medical	Life	Medical
Actuarial present value of benefits obligation:				
Retirees	\$ (230)	\$ (199)	\$ (258)	\$ (210)

Transition Liability (Asset)	<u>25</u>	<u>9</u>	n/a	n/a
	(\$4)	\$ 1		

The plan is unfunded and the Company accrues actuarial determined benefit costs over the estimated service period of the employees in the plan. The Company follows SFAS No. 132, as revised in December 2003, "Employers' Disclosures about Pensions and Other Post-retirement Benefits" and SFAS No. 158, "Employers Accounting for Defined Benefit Pension and Other Post-retirement Plans-an amendment of FASB Statements No. 87, 88, 106 and 132(R). SFAS No. 132 revised employers' disclosures about pension and other post-retirement benefit plans. It requires additional information about changes in the benefit obligation and the fair values of plan assets to be disclosed. It also standardized the requirements for pensions and other postretirement benefit plans to the extent possible, and illustrates combined formats for the presentation of pension plan and other post-retirement benefit plan disclosures. SFAS 158 requires an employer to recognize the over funded or under funded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income.

The incremental effect of apply SFAS No. 158 on individual line items in the Consolidated Balance Sheets is as follows (In Thousands):

	Before Application of <u>SFAS # 158</u>	<u>Adjustments</u>	After Application of <u>SFAS # 158</u>
Deferred income taxes	\$ 2,212	\$ --	\$ 2,212
Total Assets	566,140	--	566,140
Other liabilities	1,762	179	1,583
Total liabilities	528,617	179	528,438
Retained Income	40,398	4	40,394
Accumulated other comprehensive loss	20,150	(183)	20,333
Total shareholders' equity	\$ 37,523	(179)	\$ 37,702

Note 12. Legal Proceedings (In Thousands)

The Bank from time to time is involved as plaintiff or defendant in various legal actions incident to its business. None of these actions are believed to be material, either individually or collectively, to the results of operations and financial condition of the Company or any subsidiary.

Note 13. Fair Values of Financial Instruments (In Thousands)

Fair value estimates are based on existing on and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include the intangible value inherent in deposit relationships (*i.e.*, core deposits) and banking premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair values and have not been considered in any of the estimates. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Corporation or Company.

The following methods and assumptions were used by the Bank in estimating fair values of its financial instruments:

Cash and Due from Banks

The carrying values reported in the balance sheet for cash and due from banks approximate their fair value because of the short maturity of these instruments.

Short-term Investments and Certificate of Deposit

The carrying values reported in the balance sheet for short-term investments and the certificate of deposit approximate fair value because of the short maturity of these investments.

Investment and Mortgage-Backed Securities

The fair values presented for investment and mortgage-backed securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments.

Loans and Loans Held for Sale

The fair values of loans are estimated using discounted cash flow analysis, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The incremental credit risk for nonperforming loans has been considered in the determination of the fair value of loans. The fair value of loans held for sale is determined based on the unrealized gain or loss on such loans.

Accrued Interest Receivable

The carrying value reported in the balance sheet for accrued interest receivable approximates its fair value because of the short maturity of these accounts.

Stock in FHLB of Boston

The carrying amount reported in the balance sheet for FHLB stock approximates its fair value. If redeemed, the Bank will receive an amount equal to the par value of the stock.

The Co-operative Central Bank Reserve Fund

The carrying amount reported in the balance sheet for the Co-operative Central Bank Reserve Fund approximates its fair value.

Deposits

The fair values of deposits (excluding term deposit certificates) are, by definition, equal to the amount payable on demand at the reporting date. Fair values for term deposit certificates are estimated using a discounted cash flow technique that applies interest rates currently being offered on certificates to a schedule of aggregated monthly maturities on time deposits with similar remaining maturities.

Advances from FHLB of Boston

Fair values of non-callable advances from the FHLB of Boston are estimated based on the discounted cash flow of scheduled future payments using the respective year-end published rates for advances with similar terms and remaining maturities. Fair values of callable advances from the FHLB of Boston are estimated using the prepayment fee payable to the FHLB of Boston assuming all such advances were prepaid on the reporting date.

Short-term Borrowings, Advance Payments by Borrowers for Taxes and Insurance and Accrued Interest Payable

The carrying values reported in the balance sheet for short-term borrowings, advance payments by borrowers for taxes and insurance and accrued interest payable approximate their fair value because of the short maturity of these accounts.

Off-Balance Sheet Instruments

The Bank's commitments for unused lines of credit and unadvanced portions of loans are at floating rates, which approximate current market rates, and, therefore, no fair value adjustment has been made.

The estimated carrying amounts and fair values of the Bank's financial instruments are as follows:

	<u>March 31, 2007</u>		<u>March 31, 2006</u>	
	<u>Carrying Amount</u>	<u>Estimated Fair Value</u>	<u>Carrying Amount</u>	<u>Estimated Fair Value</u>
Assets				
Cash and due from banks	\$ 6,147	\$ 6,147	\$ 6,590	\$ 6,590

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Central Bancorp, Inc.:

We have audited the accompanying balance sheets of Central Bancorp, Inc. and subsidiary (the "Company") as of March 31, 2007 and 2006, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended March 31, 2007. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Central Bancorp, Inc and subsidiary as of March 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, effective April 1, 2006 the Company adopted the provisions of Statement of Financial Accounting Standard No. 123R "Share-Based Payment" and Statement of Financial Accounting Standard No. 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)".

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

As of the end of the period covered by this report, management of the Company carried out an evaluation, under the supervision and with the participation of the Company's principal executive officer and principal financial officer, of the effectiveness of the Company's "disclosure controls and procedures", as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934, as amended, (1) is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. It should be noted that the design of the Company's disclosure controls and procedures is based in part upon certain reasonable assumptions about the likelihood of future events, and there can be no reasonable assurance that any design of disclosure controls and procedures will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. The Company's principal executive and financial officers have concluded that the Company's disclosure controls and procedures are, in fact, effective at a reasonable assurance level.

There have been no changes in the Company's internal control over financial reporting (to the extent that elements of internal control over financial reporting are subsumed within disclosure controls and procedures) identified in connection with the evaluation described in the above paragraph that occurred during the Company's last fiscal quarter, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Directors

The information contained under the section captioned "Proposal 1 -- Election of Directors" in the Company's definitive proxy statement for the Company's 2007 Annual Meeting of Stockholders (the "Proxy Statement") is incorporated herein by reference.

Executive Officers

The information contained under the sections captioned "Proposal 1 -- Election of Directors -- Executive Officers Who Are Not Directors" in the Proxy Statement is incorporated herein by reference.

Compliance with Section 16(a) of the Exchange Act

The information contained under the section captioned "Section 16(a) Beneficial Ownership Reporting Compliance" in the Proxy Statement is incorporated herein by reference.

Code of Ethics

The Company has adopted a Code of Ethics that applies to the Company's officers, directors and employees.

Corporate Governance

For information regarding the audit committee and its composition and the audit committee financial expert, the sections captioned "Meetings of and Committees of the Board of Directors – Audit Committee" in the Proxy Statement is incorporated herein by reference.

Item 11. Executive Compensation

Executive Compensation

The information required by this item is incorporated herein by reference to the sections titled "Compensation Discussion and Analysis", "Executive Compensation" and "Director Compensation" in the Proxy Statement.

Corporate Governance

The information required by this item is incorporated herein by reference to the sections titled "Meetings and Committees of the Board of Directors – Compensation Committee" and "Compensation Committee Report" in the Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

(a) Security Ownership of Certain Beneficial Owners

The information required by this item is incorporated herein by reference to the section captioned "Principal Holders of Voting Securities" in the Proxy Statement.

(b) Security Ownership of Management

The information required by this item is incorporated herein by reference to the section captioned "Proposal I--Election of Directors--Security Ownership of Management" in the Proxy Statement.

(c) Changes in Control

Management of the Company knows of no arrangements, including any pledge by any person of securities of the Company, the operation of which may at a subsequent date result in a change in control of the Company.

(d) Equity Compensation Plans

The Company has adopted the 1999 Stock Option and Incentive Plan and the 2006 Long-Term Incentive Plan, pursuant to which equity may be awarded to participants. Both plans have been approved by stockholders.

The following table sets forth certain information with respect to the Company's equity compensation plan as of March 31, 2007.

<u>Plan Category</u>	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plan (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	69,121	\$25.411	91,000
Equity compensation plans not approved by security holders	<u>—</u>	<u>—</u>	<u>—</u>
Total (1)	<u>69,121</u>	<u>\$ 25.411</u>	<u>91,000</u>

(1) The 1999 Stock Option Plan and the 2006 Long-Term Incentive Plan provides for a proportionate adjustment to the number of shares reserved thereunder in the event of a stock split, stock dividend, reclassification or similar event.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Certain Relationships and Related Transactions

The information required by this item is incorporated herein by reference to the section titled "Certain Transactions" in the Proxy Statement.

Director Independence

The information related to director independence required by this item is incorporated herein by reference to the section titled "Proposed 1 – Election of Directors" in the Proxy Statement.

Item 14. Principal Accounting Fees and Services

The information required by this item is incorporated herein by reference to the section captioned "Independent Auditors" in the Proxy Statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this Annual Report on Form 10-K.

(1) **Financial Statements**

For the Financial Statements filed as part of this Annual Report on Form 10-K, reference is made to "Item 8 -- Financial Statements and Supplementary Data."

(2) **Financial Statement Schedules**

All financial statement schedules have been omitted as not applicable or not required or because they are included in the financial statements appearing at Item 8.

(3) **Exhibits**

The exhibits required by Item 601 of Regulation S-K are either filed as part of this Annual Report on Form 10-K or incorporated by reference herein.

The following exhibits are filed as exhibits to this report.

<u>Exhibit No.</u>	<u>Description</u>

Certification

I, John D. Doherty, certify that:

1. I have reviewed this Annual Report on Form 10-K of Central Bancorp, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (c) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Stockholder Information

Annual Meeting. The Annual Meeting of Stockholders of Central Bancorp, Inc. will be held at 11:00 a.m. on July 26, 2007, at the Holiday Inn, 30 Washington Street, Somerville, MA 02143.

Investor Inquiries. Investors and other parties interested in obtaining information or who have questions about the Company should contact William P. Morrissey, Executive Vice President, 399 Highland Avenue, Somerville, MA 02144, (617) 628-4000.

Additional copies of the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2007, are available without charge.

Common Stock. On January 8, 1999, Central Bancorp, Inc. became the holding company for Central Bank, whose legal name is Central Co-operative Bank. The Bank became a public company on October 24, 1986 by issuing 1,840,000 shares of common stock at \$7.50 a share. Central Bancorp's common stock is traded over-the-counter on the NASDAQ Global MarketSM under the symbol "CEBK." At March 31, 2007, there were 1,639,951 shares of common stock outstanding and approximately 227 holders of record of the common stock. This total does not reflect the number of persons or entities who held the stock in nominee or "street name" through various brokerage firms.

In October 1996, the Company established a quarterly cash dividend policy and made its first dividend distribution of 8 cents a share on November 15, 1996; it has paid cash dividends on a quarterly basis since initiating the dividend program.

The following tables list the high and low prices for Central Bancorp's common stock during each quarter of fiscal 2007 and fiscal 2006 as reported by the NASDAQ Global MarketSM, and the amounts and payable dates of the cash dividends paid during each quarter of fiscal 2007 and fiscal 2006. The stock quotations constitute interdealer prices without retail markups, mark-downs or commissions, and may not necessarily represent actual transactions.

Common Stock Prices
