# MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

During the first quarter of 2007, as expected, crude oil production averaged 3,158 Mbd, 6% less than the 3,345 Mbd produced during the first quarter of 2006. Production of heavy crude oil decreased by 11%, while light and extra-light crude oil production increased by 7% and 16%, respectively. Heavy crude oil production decreased primarily due to the decline in production of Cantarell, which was partially offset by an 88 Mbd production increase in the Ku-Maloob-Zaap project, due to the installation of the PB-KU-M platform in January 2007. The increase in light and extra-light crude oil production was due to the completion and workover of wells in the Litoral de Tabasco and Abkatún-Pol-Chuc projects, located in the Southwest Marine Region.

During the first quarter of 2007, an unprecedented natural gas production level was recorded, averaging 5,816 MMcfd, 14% greater than the average production recorded in the first quarter of 2006. On March 30, 2007, natural gas production registered a new record of 6,005 MMcfd. The increase in non associated natural gas production was primarily due to the activity in the Northern Region. In March 2007, the Burgos and Veracruz assets registered new monthly records of non associated natural gas production of 1,397 and 893 MMcfd, respectively. The production of associated natural gas increased by 253 MMcfd, due to greater production in the Crudo Marino Ligero and Ixtal-Manik projects, located in the Southwest Marine Region.

During the first quarter of 2007, total crude oil processing increased by 5%, as compared to the same period of the previous year. The increase was due primarily to the maintenance during 2006, which decreased production during that period. The 0.4% decrease in heavy crude oil processing and the 9% increase in light crude oil processing during the first quarter of 2007 reflected our strategy to maximize diesel and gasoline production and to minimize fuel oil production.

During the first quarter of 2007, production of refined products increased by 42 Mbd, as compared to the same period of 2006, reaching an average of 1,584Mbd. Gasoline and diesel production increased by 5% and by 11%, respectively, whereas fuel oil production decreased by 4%, due to higher crude oil processing, an increase in the coking capacity utilization and fewer programmed downtimes during 2007, as compared to programmed maintenance during the first quarter of 2006.

During the first quarter of 2007, total petrochemicals production was 2,914 thousand tons (Mt), 11% greater than the production recorded in the same quarter of 2006. This increase was primarily driven by: greater production of aromatics such as toluene, benzene and paraxylene, due to maintenance during 2006 which caused production during that period to fall below normal levels; greater production of derivatives of aromatics (hydrogen and BTX liquids –benzene, toluene and xylene–) for the same reason; and greater production of ethylene oxide, due to a catalyst renovation and lower maintenance. This increase was partially offset by a decrease in ammonia and carbon dioxide production, due to higher natural gas prices, and a decrease in vinyl chloride, due to programmed maintenance in February 2007.

During the first quarter of 2007, crude oil exports averaged 1,711 Mbd, 15% less than the volume recorded during the first quarter of 2006, as a result of a decrease in crude oil production and shipment delays due to adverse weather conditions in January 2007.

Approximately 85% of total crude oil exports were heavy crude oil (Maya); the remainder were light and extra-light crude oil (Isthmus and Olmeca). 81% of total crude oil exports were delivered to the United States, while the remaining 19% was distributed among Europe (8%), the rest of the Americas (8%) and the Far East (4%). The weighted average export price of the Mexican crude oil basket was US\$47.3 per barrel, as compared to US\$50.2 per barrel, in the first quarter of 2006; hence, representing a 6% decrease in the first quarter of 2007.

As a consequence of the increase in natural gas production, exports reached 187 MMcfd during the first quarter of 2007, as compared to 26 MMcfd recorded during the same period in 2006.

Exports of refined products averaged 213 Mbd, 29% greater than during the first quarter of 2006, primarily due to an increase in exports of fuel oil. Long residue and fuel oil were the main exported refined products.

# MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Petrochemical exports decreased by 11%, or 22 Mt, totaling 184 Mt., due to lower exports of ammonia and polyethylene. Ethylene and sulphur were the main exported products.

In the first quarter of 2007, natural gas imports averaged 328 MMcfd, 11% less than those recorded during the same period in 2006, primarily due to higher natural gas production.

Imports of refined products decreased by 8%, from 448 to 411 Mbd. This decrease was primarily attributable to an increase in imports of fuel oil, residual fuel oil, diesel and regular gasoline which was partially offset by an increase in imports of premium gasoline. During the first quarter of 2007, the main imported products were gasoline and diesel.

Petrochemical imports decreased by 21%, to 110 Mt, primarily due to lower methanol, ammonia and aromatics (toluene, xylene mix and butane mix) imports. The main imported products were methanol and butane mix.

During the first quarter of 2007, total sales decreased by 6% in constant pesos, as compared to the first quarter of 2006, from Ps. 251.6 to Ps. 235.9 billion. This decrease was primarily due to lower volumes and prices of crude oil exports.

In the first quarter of 2007, costs and operating expenses increased by 9%, or Ps. 8.3 billion, as compared to the first quarter of 2006, to Ps. 106.2 billion (US\$9.6 billion), primarily due to an increase in depreciation and amortization, and in the cost of reserve for retirement payments and indemnities.

In the first quarter of 2007, operating income totaled Ps. 129.7 billion (US\$11.8 billion), 16% less than operating income for the first quarter of 2006 of Ps. 153.7 billion.

During the first quarter of 2007, comprehensive financing cost increased by Ps. 6.4 billion from Ps. 3.8 to Ps. 10.2 billion (US\$0.9 billion). This increase was primarily caused by: a decrease of Ps. 5.6 billion in monetary gain, an increase of Ps. 3.4 billion in foreign exchange losses, and a decrease of Ps. 2.5 billion in net interest and financial products expense.

In the first quarter of 2007, other net revenues totaled Ps. 4.4 billion (US\$0.4 billion), as compared to Ps. 6.7 billion during the first quarter of 2006, primarily due to a reduction in income attributable to the negative IEPS tax.

During the first quarter of 2007, income before taxes and duties was Ps. 123.8 billion (US\$11.2 billion), as compared to Ps. 156.6 billion recorded in 2006. The 21% decrease was primarily the result of: a decrease of Ps. 24.0 billion in operating income, an increase of Ps. 6.4 billion in comprehensive financing cost, and a decrease of Ps. 2.3 billion in other net revenues.

During the first quarter of 2007, taxes and duties paid decreased by 10%, from Ps. 148.5 to Ps. 134.0 billion, considering the inflationary effect, primarily due to a decrease in the operational income.

During the first quarter of 2007, PEMEX recorded a net loss of Ps. 10.1 billion (US\$0.9 billion), as compared to net income of Ps. 8.1 billion during the first quarter of 2006. The Ps. 18.2 billion reduction in net income is primarily explained by the effect of non cash charges: a Ps.5.2 billion increase in depreciation and amortization, a Ps. 2.0 billion increase in the cost of reserve for retirement payments and indemnities, a Ps. 3.4 billion increase in foreign exchange loss, and a Ps. 5.6 billion decrease in monetary gain.

As of March 31, 2007, our assets totaled Ps. 1,205.9 billion (US\$109.3 billion), representing a 4% increase, or Ps. 45.0 billion, as compared to total assets as of March 31, 2006.

Total liabilities decreased by 0.4%, to Ps. 1,172.1 billion (US\$106.2 billion): short-term liabilities decreased by 15%, or Ps. 28.0 to Ps. 164.7 billion (US\$14.9 billion), primarily as a result of a decrease in taxes and duties payable, which was partially offset by an increase in the current portion of long-term debt, i. e. remaining maturities of less than twelve months; long term liabilities increased by 2%, or Ps. 23.2 to Ps. 1,007.5 billion (US\$91.3 billion), primarily due to the increase in the reserve for retirement payments, which was partially

offset by a 9% decrease in long-term debt. The reserve for retirement payments increased by 16%, from Ps. 407.1billion to Ps. 473.1 billion (US\$42.9 billion) according to actuarial studies.

Equity increased by Ps. 49.8 billion, from Ps. (16.0) billion at March 31, 2006 to Ps. 33.8 billion (or US\$ 3.1 billion at March 31, 2007). The variation in equity was primarily due to: a payment from the government to PEMEX in the amount of Ps. 46.8 billion, paid in accordance with the Federal Expenditure Budget for the 2006 fiscal year, a decrease of Ps. 18.4 billion in the negative effect of the reserve for retirement payments.

#### FINANCIAL STATEMENTS NOTES

(Figures in thousands of pesos with the acquisition power of March 31, 2007 and in thousands of dollars)

#### 1. Basis of presentation

The consolidated financial statement of Petróleos Mexicanos, Subsidiary Entities and Subsidiary Companies ("PEMEX"), as of March 31, 2007 and 2006 and for the three month periods ended on these dates are not audited. In the Management opinion, all adjustments (mainly consisting in recurrent adjustments) that are necessary for a fair presentation of the consolidated financial statements have been included. The interim results of the periods are not necessarily an indicative of the whole year.

For the purposes of these non audited interim consolidated financial statements, certain information and disclosure that are usually included in the financial statements prepared under Financial Reporting Standard (NIF) in Mexico, have been condensated or omitted. These non-audited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and their notes, as of December 31, 2006.

### 2. Significant accounting policies

The accompanying consolidated financial statements have been prepared in conformity with NIF as issuedby the Consejo Mexicano para la Investigación y Desarrollo de Normas de Información Financiera ("CINIF"). Until 2003, the recognition of inflation was taken in accordance with the Financial Reporting Standard ("NIF") 06-BIS "A" Section A, as issued by the Ministry of Finance and Public Credit ("SHCP") and by the General Comptroller's Office ("SFP"), which forced PEMEX to adopt the Bulletin B-10, "Recognition of the inflation effects on the financial information" ("Bulletin B-10") at the end of the year. In accordance with the mentioned rules the Consolidated Financial Information as of March 31, 2006, are presented on the same bases of 2007.

Since 2004, PEMEX has changed the accounting policies for registrying operations related to the exploration and wells drilling activities, instead of applying through the exploration and depletion reserve. Since January 1st, 2004, the dispositions of Bulletin C-15 "Impairment of fixed assets of long life and their duration", went into effect, as issued by MIPA.
