ANNUAL REPORT 2008

THE HOMEBUILDING INDUSTRY HAS ENDURED A DOWNTURN THAT HAPPENED QUICKER, WENT DEEPER, AND HAS LASTED LONGER THAN ANYONE ANTICIPATED. YET DURING THE WORST OF TIMES, THERE ARE OPPORTUNITIES. FOR THOSE WITH STRATEGIC VISION. FOR THOSE WITH ORGANIZATIONAL FLEXIBILITY. FOR THOSE WITH FINANCIAL STRENGTH. FOR A COMPANY LIKE BUILDERS FIRSTSOURCE.

OVER THE YEARS, BUILDERS FIRSTSOURCE HAS BECOME ONE OF THE NATION'S LEADING PROVIDERS OF BUILDING MATERIALS AND SERVICES. WE HAVE PURPOSEFULLY EXPANDED OUR PRODUCT MIX. WE HAVE STRATEGICALLY HONED OUR ASSETS. WE HAVE PROVEN THAT OUR BUSINESS MODEL IS SOUND.

ON A SOLID FOUNDATION, BUILDERS FIRSTSOURCE HAS LEVERAGED ITS STRENGTHS, CAPITALIZED ON MARKET CONDITIONS, AND BUILT A FRAMEWORK FOR THE FUTURE.

Headquartered in Dallas, Texas, Builders FirstSource is a leading supplier and manufacturer of structural and related building products for residential new construction. The company operates in 11 states, principally in the southern and eastern United States, and has 58 distribution centers and 57 manufacturing facilities, many of which are located on the same premises as our distribution facilities. Manufacturing facilities include plants that manufacture roof and floor trusses, wall panels, stairs, aluminum and vinyl windows, custom millwork and pre-hung doors. Builders FirstSource also distributes windows, interior and exterior doors, dimensional lumber and lumber sheet goods, millwork and other building products. For more information about Builders FirstSource, visit the company's web site at [www.bldr.com](http://www.bldr.com).

<sup>1</sup> Free cash flow is defined as operating cash flow less net capital expenditures.

## TO OUR STOCKHOLDERS

When I wrote to you at this time last year, Builders FirstSource anticipated that the harsh conditions in the residential construction industry would persist through 2008 and beyond. Of course, that has been the case. As I outlined in last year's annual report, we had developed a

**FLOYD F. SHERMAN**

President,  
Chief Executive Officer  
and Director

strategy to manage through the housing downturn with a goal of maximizing shareholder value without impairing our ability to compete and grow, all the while making the preservation of cash and liquidity a primary focus.

During fiscal 2008, our company continued the disciplined execution of our action plan. In difficult market conditions, Builders FirstSource was able to:

- Conserve cash
- Grow market share
- Manage gross margins
- Implement cost containment programs
- Flex our staffing levels
- Reduce physical capacity
- Prudently manage credit extended to customers

I am pleased to report that now, almost three years into the downturn, Builders FirstSource has maintained solid footing while continuing to serve the interests of our customers and our shareholders.

### INDUSTRY CONDITIONS

Our industry is facing exceptionally tough times. In 2008, total housing starts declined 33.2 percent. Single-family housing starts fell 40.5 percent to 622,400 units—the lowest level since 1958, according to data from the U.S. Census Bureau. Additionally, the credit markets that support mortgages and commercial lending were virtually frozen, placing additional pressure on the housing industry.

However, in spite of the dramatic downturn in housing starts in recent years, the fundamental need for housing will continue to grow along with the U.S. population. No one can predict when the housing industry will recover, but the Joint Center for Housing Studies of Harvard University, which analyzes demographic and industry data, has projected that new households in the U.S. will create demand for an average of 1.5 million new housing units annually in the decade ahead.

### 2008 FINANCIAL OVERVIEW

For fiscal 2008, Builders FirstSource sales were \$1.035 billion compared to \$1.531 billion in 2007. This represents a decrease of 32.4 percent; however, single-family housing starts in our markets decreased by an estimated 42.5 percent. We were able to mitigate some of the decline in single-family housing activity by growing market share and expanding into the light commercial segment.

During 2008 we reduced selling, general, and administrative (SG&A) expenses by \$66 million, or 18.4 percent. Compared to a sales volume decline of 30.4 percent, SG&A expenses decreased

61 percent variable with sales, exceeding our expectations. During the year we decreased net capital expenditures by 63 percent.

Gross margins were under pressure throughout 2008 due to the continued decline in year-over-year sales. Beginning in July, we established minimum margin standards that increased some of our pricing. This initiative was successful as we were able to increase product margins beginning in September. Overall gross margins declined 300 basis points to 21.6 percent for 2008.

As a result of the substantial decline in housing starts, lower commodity prices, and increased competitive pressures, Builders FirstSource ended fiscal 2008 with a loss from continuing operations of \$131.8 million, or \$3.70 per diluted share. These results compare to a loss from continuing operations of \$14.9 million, or \$0.43 per diluted share for fiscal 2007. After non-cash and non-recurring charges related to asset impairments, facility closure costs, and a valuation allowance on primarily all of our deferred tax assets our loss from continuing operations was \$58.8 million, or \$1.65 per diluted share, compared to a loss from continuing operations of \$3.2 million, or \$0.10 per diluted share for 2007.

**CONSERVING CASH**

Maintaining liquidity is an essential part of our strategy and is critical to negotiating the current difficult business environment. Early in the housing downturn, we redirected our focus to conserving cash.

Total cash used in 2008 was \$30.7 million. We significantly reduced our cash spending rate during the third and fourth quarters.

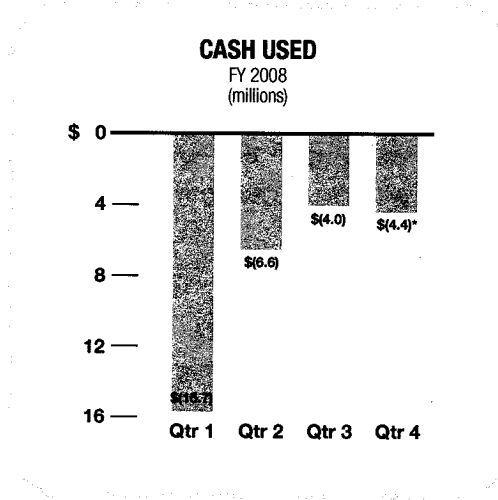

As of December 31, 2008, almost three years into the contraction of our industry, the company's cash balance was more than \$100 million.

The company expects income tax refunds of approximately \$35 million in 2009, which will further strengthen our liquidity.

**INCREASING MARKET SHARE**

In a market where overall industry sales are declining, we continue to focus on increasing our market share as a means of mitigating the negative impact of a shrinking market. Since the housing downturn began, Builders FirstSource has been able to achieve market share gains in every quarter. Market share growth contributed an estimated 10 percent to the company's revenue in 2008.

Builders FirstSource commands the number one or two market share position in nearly two-thirds of our local markets. We leverage our manufacturing, distribution, and installation capabilities to provide an unmatched level of customer service and superior value.

\*Includes \$2.0 million in abandoned acquisition expenses paid during the quarter.

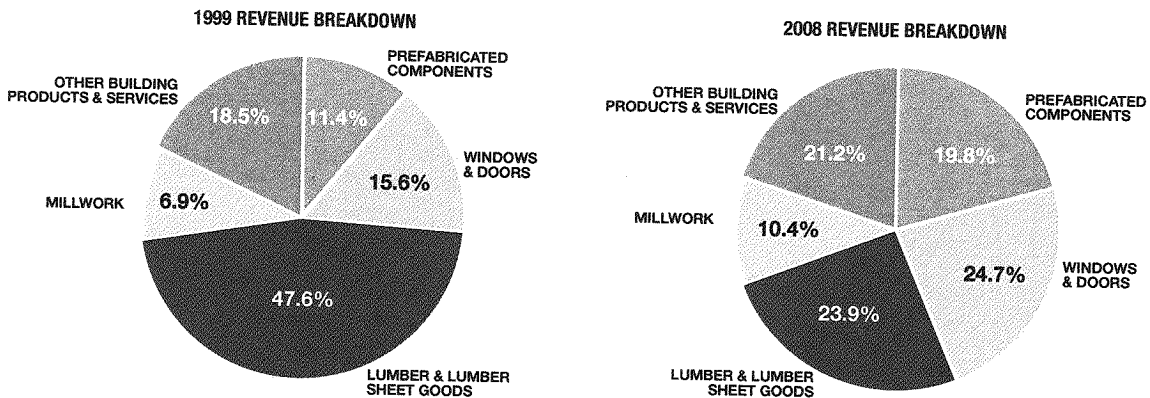

DURING FISCAL 2008, OUR COMPANY  
CONTINUED THE DISCIPLINED EXECUTION  
OF OUR ACTION PLAN.

Our primary customers are the nation's largest homebuilders, the "production builders," who have the geographical scope and financial resources that can better enable them to endure the industry's cyclical downturns. Our customer base is broadly diversified; our top ten customers accounted for approximately 19 percent of sales, with no single customer providing more than 5 percent of our total revenue in 2008. To further broaden our customer base we have expanded our efforts in the custom homebuilder market.

We established a commercial sales division in order to increase our presence in the multi-family and light commercial market segments. These segments grew to represent 5.2 percent of Builders FirstSource sales in 2008.

We enhanced our company's position as an industry leader by having our distribution centers become Certified Green Dealers™ in 2008. With environmental issues becoming increasingly important to society, consumers, and businesses, the green building sector is growing rapidly. Builders FirstSource is excited to be one of the first companies in our industry to train our entire sales force in the basics of green products and practices. Our builder customers look to us for more than just products and prices; they look to us for value-added solutions. This program will allow us to provide our customers cutting-edge green building solutions and will further differentiate us from others in our industry.

During 2008, our product mix continued to shift away from commodity lumber toward value added products such as prefabricated components, millwork, and windows and doors. Builders FirstSource has a greater concentration of these manufactured products than our competitors. Our manufactured components and turnkey installation services can help builders reduce their own costs for skilled labor, a primary concern in a tight market. This shift in sales mix was also driven by falling lumber and lumber sheet good prices, which were down on average 8.4% compared to 2007.

PAGE

**COST REDUCTIONS AND OPERATING EFFICIENCY**

In 2008 we continued to manage our business with flexibility to adjust quickly and appropriately to market conditions while still maintaining our competitiveness and ability to deliver value for the long term.

Compensation and benefits expense is our largest controllable cost. During 2008, we reduced full-time equivalents by 39.3 percent, correlating to the decrease in sales and our anticipation of a difficult beginning to 2009.

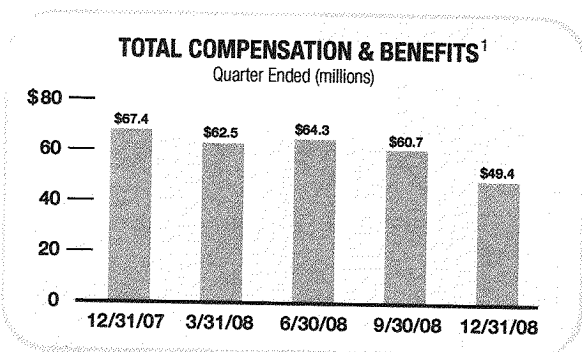

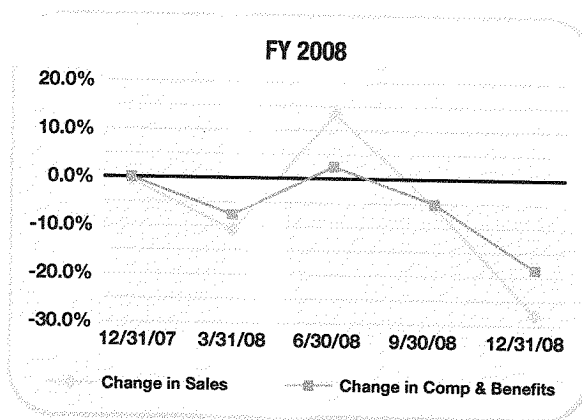

In 2007 we began the process of evaluating our facilities based on their contribution to the company's overall strength. In 2008, we closed 14 locations, ending the year with 86 total locations. At the end of 2008, we had identified additional facilities that were not providing a positive contribution toward fixed costs. We have action plans in place to improve the financial contribution of these facilities.

We decreased net capital expenditures to \$3.0 million in 2008 compared to \$8.0 million in 2007. The majority of capital expenditures were for equipment lease buyouts.

During the year we also implemented additional significant cost-control measures.

- Safety improvements – Casualty expense, which includes general liability, workers' compensation and auto, dropped \$5.7 million or 39 percent in 2008.
- Decreasing health insurance costs – Group health expense declined \$3.7 million or 27% percent during 2008 due to fewer participants and plan design changes.
- Reducing the use of consultants and third-party professionals – Our professional services decreased \$3.7 million or 39 percent from 2007 excluding costs for abandoned acquisitions.
- Lowering travel and entertainment expense – Travel and entertainment expense was down \$1.8 million or 35 percent from 2007.
- Reducing bonus and incentive expenses – total expense was down \$6.5 million or 68 percent from 2007. No bonuses were given to senior executives.
- Reducing lease expense – We redistributed or returned excess rolling stock and reduced lease expense by \$2.0 million or 11 percent.

Combined, these additional initiatives lowered operating costs by \$23.4 million in 2008.

<sup>1</sup> Includes total compensation & benefits recorded in both cost of sales and selling, general and administrative expenses, but excludes stock compensation expense

GE

OUR ACTION PLAN FOR 2009 WILL CONTINUE TO FOCUS ON OUR LIQUIDITY, IDENTIFYING COST EFFICIENCIES, AND GROWING OUR MARKET SHARE.

**OUTLOOK**

We expect the difficult market conditions will continue to negatively affect our operating results through 2009. I am pleased that our strategy has enabled us to weather the downturn to date, and we believe it will help us endure the conditions ahead. I firmly believe this strategy has been successful because of the efforts of our dedicated employees. We appreciate and count on our employees' continued commitment to Builders FirstSource to help us withstand this prolonged industry downturn.

Our action plan for 2009 will continue to focus on our liquidity, identifying cost efficiencies, and growing our market share. We continue to work from a position of strength in our industry, capitalizing on our competitive advantages:

- We have dominant positions in the markets we serve.
- We have fully integrated operations that deliver our full range of products and services efficiently and effectively.
- Our operating scale enables us to offer superior value.
- Our product mix spans the full spectrum needed to serve our customer base.
- We have liquidity that is vital to strategic management through uncertain times.
- We deploy capital intelligently and leverage our asset base strategically.
- Our proven performance and staying power can instill confidence for our investors and our customers.

Even though the current housing market is the most challenging since the end of World War II, I remain confident that our industry, our company, and our employees are up to the challenge. We will continue to work hard, to work smart, to work diligently and strategically, day by day, building a framework for the future.

I thank you for your continued support of our company.

Sincerely,

Floyd F. Sherman  
President, Chief Executive Officer, and Director

#### CAUTIONARY STATEMENT

Statements in this report which are not purely historical facts or which necessarily depend upon future events, including statements regarding our anticipations, beliefs, expectations, hopes, intentions or strategies for the future, may be forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. All forward-looking statements in this report are based upon information available to us on the date of this report. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. Any forward-looking statements made in this report involve risks and uncertainties that could cause actual events or results to differ materially from the events or results described in the forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements. In addition, oral statements made by our directors, officers and employees to the investment community, media representatives and others, depending upon their nature, may also constitute forward-looking statements. As with the forward-looking statements included in this report, these forward-looking statements are by nature inherently uncertain, and actual results may differ materially as a result of many factors. Further information regarding the risk factors that could affect our financial and other results are included as Item 1A of this annual report on Form 10-K.

#### OVERVIEW

Builders FirstSource, Inc. is a leading supplier and manufacturer of structural and related building products for residential new construction. We have operations principally in the southern and eastern United States with 58 distribution centers and 57 manufacturing facilities, many of which are located on the same premises as our distribution centers. We have successfully acquired and integrated 27 companies since our formation and are currently managed as three regional operating groups — Atlantic, Southeast and Central — with centralized financial and operational oversight. In this annual report, references to the “company,” “we,” “our,” “ours” or “us” refer to Builders FirstSource, Inc. and its consolidated subsidiaries, unless otherwise stated or the context otherwise requires.

Builders FirstSource, Inc. is a Delaware corporation formed in 1998, as BSL Holdings, Inc. On October 13, 1999, the company’s name changed to Builders FirstSource, Inc. Publicly held since 2005, our common stock is listed on the NASDAQ Stock Market LLC under the ticker symbol “BLDR”.

#### OUR INDUSTRY

We compete in the professional segment (“Pro Segment”) of the U.S. residential new construction building products supply market. According to the National Association of Home Builders, the single family residential construction market was an estimated \$186.7 billion in 2008. The Pro Segment of this market consists predominantly of small, privately owned companies including framing and shell construction contractors, local and regional materials distributors, single or multi-site lumberyards, and truss manufacturing and millwork operations. Because of the predominance of smaller privately owned companies and the overall size and diversity of the target customer market, the Pro Segment remains fragmented. There were only five building product suppliers in the Pro Segment that generated over \$1 billion in sales according to *ProSales* magazine’s 2007 ProSales 100 list. On this list, we were the fifth largest building product supplier in 2007.

Our industry is driven primarily by the residential new construction market, which is in turn dependent upon a number of factors, including demographic trends, interest rates, employment levels, supply and demand for housing stock, availability of credit, foreclosure rates, consumer confidence and the economy in general. The homebuilding industry is undergoing a significant and sustained downturn due to negative trends in many of the factors listed above. According to the U.S. Census Bureau, actual single family housing starts in the U.S. during 2008 declined 40.5% from 2007, and declined 28.6% during 2007 from 2006. Many homebuilders have significantly decreased their starts because of lower demand and an excess of both existing and new home inventory. The weakness in the homebuilding industry has resulted in a substantial reduction in the demand for our products and services during

2007 and 2008. We expect to see a continued decline in demand for our products in 2009. The National Association of Home Builders (“NAHB”) is predicting that housing starts will continue to decline in 2009 to approximately 461,000 single family housing starts. This level for 2009 would represent a 25.9% decline from 2008 actual housing starts. Additionally, the credit markets have experienced substantial disruption in 2007 and 2008. During 2007, the mortgage markets experienced substantial disruption due to increased defaults, primarily as a result of credit quality deterioration. This disruption precipitated evolving changes in the regulatory environment and reduced availability of mortgages for potential homebuyers due to an illiquid credit market and more restrictive standards to qualify for mortgages. During 2008, credit markets and the financial services industry experienced a significant crisis characterized by the bankruptcy and failure of various financial institutions and severe limitations on credit availability. As a result, the credit markets have become highly illiquid as financial and lending institutions have limited credit to conserve cash and protect their balance sheets. Because of the more restrictive standards on mortgages and the credit crisis, both potential homeowners and homebuilders have limited access to credit which is adding to the severity of the downturn in our industry. However, we believe there are several meaningful trends that indicate U.S. housing demand will likely remain healthy in the long term. These trends include relatively low interest rates, the aging of housing stock, and normal population growth due to birthrate exceeding death rate.

## **OUR CUSTOMERS**

We serve a broad customer base ranging from production homebuilders to small custom homebuilders. We believe we have a diverse geographic footprint as we serve 33 markets in 11 states. According to 2008 U.S. Census data, we have operations in 20 of the top 50 U.S. Metropolitan Statistical Areas, as ranked by single family housing permits in 2008. In addition, approximately 50% of U.S. housing permits in 2008 were issued in states in which we operate. Recently, we expanded into the multi-family and light commercial business in certain of our regions. Our Shelby, Alabama location, which we acquired in 2007, gives us the ability to manufacture steel roof trusses often used in multi-family and light commercial construction. This location also gives us a knowledge base in these types of construction. We plan on continuing to grow this business to further diversify our customer base and offset some of the declines in single family starts.

Our customer mix is a balance of large national homebuilders, regional homebuilders, and local builders. Our customer base is highly diversified. For the year ended December 31, 2008, our top 10 customers accounted for approximately 19.0% of sales, and no single customer accounted for more than 5% of sales. Our top 10 customers are comprised primarily of the largest production homebuilders, including publicly traded companies such as Beazer Homes USA, Centex Corporation, D.R. Horton, Inc., Hovnanian Enterprises, Inc., Pulte Homes, Inc., and The Ryland Group, Inc.

In addition to the largest production homebuilders, we also service and supply regional and local custom homebuilders. Custom homebuilders require high levels of service; our sales team must work very closely with the designers on a day-to-day basis in order to ensure the appropriate products are produced and delivered to the building site. To account for these increased service costs, pricing in the industry is generally commensurate with the level of service provided and the volumes purchased.

## **OUR PRODUCTS AND SERVICES**

We offer an integrated solution to our customers providing manufacturing, supply, and installation of a full range of structural and related building products. We distribute a wide variety of building products and services directly to homebuilder customers. In addition, we manufacture floor trusses, roof trusses, wall panels, stairs, millwork, windows, and doors. In addition to our full range of construction services, we offer a comprehensive offering of products that includes almost 80,000 stock keeping units (“SKUs”). We believe our broad product and service offering combined with our scale and experienced sales force have driven market share gains, particularly with production homebuilders, and will help us to maintain our customer base during the downturn in the housing industry.

We group our building products and services into five product categories: prefabricated components, windows & doors, lumber & lumber sheet goods, millwork, and other building products & services. Since 2004, the combined sales of our prefabricated components, windows & doors and millwork product categories have

increased from 47.1% to 54.9% of our total sales. Each of these categories includes both manufactured and distributed products. Products in these categories typically carry a higher margin and provide us with opportunities to cross-sell other products and services, thereby increasing customer penetration. Sales by product category for the years ended December 31, 2008, 2007 and 2006 can be found under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained in Item 7 of this annual report on Form 10-K.

*Prefabricated Components.* Prefabricated components are factory-built substitutes for job site-framing and include floor trusses, roof trusses, wall panels, stairs, and engineered wood that we design and cut for each home. Our manufactured prefabricated components allow builders to build higher quality homes more efficiently. Roof trusses, floor trusses, wall panels and stair units are built in an indoor, factory controlled environment. Engineered floors and beams are cut to the required size and packaged for the given application at many of our locations. Without prefabricated components, builders construct these items on site, where weather and variable labor quality can negatively impact construction cost, quality and installation time. In addition, engineered wood beams have greater structural strength than conventional framing materials, allowing builders to frame houses with more open space creating a wider variety of house designs. Engineered wood floors are stronger and straighter than conventionally framed floors.

Prior to the current housing downturn, homebuilders were increasingly using prefabricated components in order to realize increased efficiency and improved quality. Shortening cycle time from start to completion was a key imperative of the homebuilders during periods of strong consumer demand. With the current housing downturn, that trend has decelerated as cycle time has less relevance. Customers who traditionally used prefabricated components, for the most part still do. However, the conversion of customers to this product offering has slowed. We expect this trend to continue at least for the duration of this downturn. In response, we have reduced our manufacturing capacity and delayed plans to open new facilities.

*Windows & Doors.* The windows & doors category comprises the manufacturing, assembly and distribution of windows, and the assembly and distribution of interior and exterior door units. We manufacture aluminum and vinyl windows in our plant in Houston, Texas which allows us to supply builders, primarily in the Texas market, with an adequate supply of cost-competitive products. Our pre-hung interior and exterior doors consist of a door slab with hinges and door jambs attached, reducing on-site installation time and providing higher quality finished door units than those constructed on site. These products typically require a high degree of product knowledge and training to sell. As we continue to emphasize higher margin product lines, we expect value-added goods like windows & doors to increasingly contribute to our sales and overall profitability.

*Lumber & Lumber Sheet Goods.* Lumber & lumber sheet goods include dimensional lumber, plywood and oriented strand board ("OSB") products used in on-site house framing. This product line has declined as a percentage of our total sale over the last five years, as demonstrated by the fact that it represented 23.9% of total sales for the year ended December 31, 2008, compared to 39.2% of total sales in 2004. This change in product mix has been intentional as we have sought to shift builder demand toward higher margin prefabricated components for their framing needs. Despite this shift in product mix, we believe we have grown our market share for lumber & lumber sheet goods over this time period. We expect the lumber & lumber sheet goods business to remain a stable revenue source in the future, but to grow over the long-term at a slower rate than our other business lines.

*Millwork.* Millwork represents a small but profitable product category. This category includes interior trim, exterior trim, columns and posts that we distribute, as well as custom exterior features that we manufacture under the Synboard™ brand name. Synboard is produced from extruded PVC and offers several advantages over traditional wood features, such as greater durability and no ongoing maintenance such as periodic caulking and painting.

*Other Building Products & Services.* Other building products & services consist of various products, including cabinets, gypsum, roofing and insulation. This category also includes services such as turn-key framing, shell construction, design assistance and professional installation of products spanning all our product categories. We provide professional installation and turn-key services as a solution for our homebuilder customers. Through our installation services program, we help homebuilders realize efficiencies through improved scheduling, resulting in reduced cycle time and better cost controls. We believe these services require scale, capital and sophistication that smaller competitors do not possess.

## MANUFACTURING

Our manufacturing facilities utilize the latest technology and the highest quality materials to improve product quality, increase efficiency, reduce lead times and minimize production errors. As a result, we believe we incur significantly lower engineering and set-up costs than do our competitors, contributing to improved margins and customer satisfaction. We manufacture products within three of our product categories: prefabricated components, millwork, and windows and doors.

*Prefabricated Components — Trusses and Wall Panels.* Truss and wall panel production has two steps — design and fabrication. Each house requires its own set of designed shop drawings, which vary by builder type: non-custom versus custom builders. Non-custom builders use prototype house plans as they replicate houses. These house plans may be minimally modified to suit individual customer demand. The number of changes made to a given prototype house, and the number of prototype houses used, varies by builder and their construction and sales philosophy. We maintain an electronic master file of trusses and wall panels for each builder's prototype houses. There are three primary benefits to master filing. First, master filing is cost effective as the electronic master file is used rather than designing the components individually each time the prototype house is built. Second, it improves design quality as a house's design is based on the proven prototype except for any minor builder modifications. Third, master filing allows us to change one file and update all related prototype house designs automatically as we improve the design over time or as the builder modifies the base prototype house. We do not maintain a master file for custom builders who do not replicate houses, as it is not cost effective. For these builders, the components are designed individually for each house.

After we design shop drawings for a given house, we download the shop drawings into a proprietary software system to review the design for potential errors and to schedule the job for production. The fabrication process begins by cutting individual pieces of lumber to required lengths in accordance with the shop drawings. We download the shop drawings from our design department to computerized saws. We assemble the cut lumber to form roof trusses, floor trusses or wall panels, and store the finished components by house awaiting shipment to the job site.

We generate fabrication time standards for each component during the design step. We use these standards to measure efficiency by comparing actual production time with the calculated standard. Each plant's performance is benchmarked by comparing efficiency across plants.

*Prefabricated Components — Engineered Wood.* As with trusses and wall panels, engineered wood components have a design and fabrication step. We design engineered wood floors using a master filing system similar to the truss and wall panel system. Engineered wood beams are designed to ensure the beam will be structurally sound in the given application. After the design phase, a printed layout is generated. We use this layout to cut the engineered wood to the required length and assemble all of the components into a house package. We then install the components on the job site. We design and fabricate engineered wood at the majority of our distribution locations.

*Prefabricated Components — Stairs.* We manufacture box stairs at several of our locations. After a house is framed, our salesman takes measurements at the job site prior to manufacturing to account for any variation between the blueprints and the actual framed house. We fabricate box stairs based on these measurements.

*Custom Millwork.* Our manufactured custom millwork consists primarily of synthetic exterior trim, custom windows, features and box columns that we sell under our Synboard brand name. Synboard products are sold throughout our company and are manufactured at three locations.

We sand, cut, and shape sheets of 4 foot by 18 or 20 foot Celuka-blown, extruded PVC ("Synboard") to produce the desired product. We produce exterior trim boards by cutting the Synboard into the same industry-standard dimensions used for wood-based exterior trim boards. We form exterior features by assembling pieces of Synboard and other PVC-based moldings that have been cut, heated and bent over forms to achieve the desired shape. For custom windows, we build the frame from Synboard and glaze the glass into place. We fabricate box columns from sections of PVC that are cut on a 45 degree angle and mitered together.

*Windows.* We manufacture a full line of traditional aluminum and vinyl windows at an approximately 200,000 square foot manufacturing facility located in Houston, Texas. The process begins by purchasing aluminum and vinyl lineal extrusions. We cut these extrusions to size and join them together to form the window frame and

sash. We then purchase sheet glass and cut it to size. We combine two pieces of identically shaped glass with a sealing compound to create a glass unit with improved insulating capability. We then insert the sealed glass unit and glaze it into the window frame and sash. The unit is completed when we install a balance to operate the window and add a lock to secure the window in a closed position.

*Pre-hung Doors.* We pre-hang interior and exterior doors at many of our locations. We insert door slabs and pre-cut door jambs into a door machine, which bores holes into the doors for the door hardware and applies the jambs and hinges to the door slab. We then apply the casing that frames interior doors at a separate station. Exterior doors do not have a casing, and instead may have sidelights applied to the sides of the door, a transom attached over the top of the door unit and a door sill applied to the threshold.

## **OUR STRATEGY**

Our long-term strategy is to leverage our competitive strengths to grow sales, earnings, and cash flow and remain a preferred supplier to the homebuilding industry. We have modified our strategy in response to the declining macroeconomic factors that affect our industry. Our strategy during the housing downturn is to maximize financial performance without impairing our ability to compete and create value in the long term. We plan to implement this strategy through growing our market share, focusing on cost, working capital and operating improvements, and most importantly conserving cash.

*Grow Market Share.* In order to offset the decline in our sales, we have focused on growing our market share through expanding our current customer base and expanding into multi-family and light commercial business.

*Expand Current Customer Base.* In recent years, the homebuilding industry has undergone significant consolidation, with the larger homebuilders substantially increasing their market share. In accordance with this trend, our customer base has increasingly shifted to production homebuilders — the fastest growing segment of the residential homebuilders. We intend to leverage our business model, geographic breadth and scale to continue to grow our sales to the production homebuilders as they continue to gain market share. We have increased our sales to the 10 largest production homebuilders, as measured by homes sold, from 17.2% of our net sales in 2001 to 19.0% of our net sales, for the year ended December 31, 2008. However, during 2008 sales to our top 10 production homebuilders declined 43.6% compared to 2007. This decline is slightly greater than the overall decline in housing activity in our markets as this particular customer group has responded faster than many smaller homebuilders to excess housing inventory levels and sharply curtailed homebuilding activities. We expect that our ability to maintain strong relationships with the largest builders will be vital to our ability to grow and expand into new markets as well as maintain our current market share thorough the downturn. Additionally, during the downturn, we plan to prudently expand our presence in the custom homebuilder base while still adhering to our tight credit standards.

*Expand into Multi-Family and Light Commercial Business.* We believe we can diversify our customer base and grow our sales by expanding into multi-family and light commercial business. While we primarily serve the single family new home construction market, we have entered the multi-family and/or light commercial market in certain regions. Our Shelby, Alabama location gives us the ability to manufacture steel roof trusses often used in multi-family and light commercial construction.

*Focus on Cost, Working Capital and Operating Improvements.* We are extremely focused on expenses and working capital to remain a low cost supplier. We maintain a continuous improvement, “best practices” operating philosophy and regularly implement new initiatives to reduce costs, increase efficiency and reduce working capital. For example, we have linked our computer system to those of some customers to streamline the administrative aspects of the quoting, invoicing and billing processes. We also analyze our workforce productivity to determine the optimal labor mix that minimizes cost, and examine our logistics function to reduce the cost of inbound freight. Our focus on cost controls, working capital and operating improvements is particularly important during this downturn. Our largest controllable cost is our salaries and wages. Since the beginning of the housing downturn in March 2006, we have reduced our full time equivalent headcount by 40.0%. We have been thoughtful in reducing our headcount as a number of the reductions were the result of identifying and implementing operating efficiencies. We were also able to reduce office general and administrative expenses by \$11.3 million for 2008, among other reductions. We expect single family housing starts to continue to decline in 2009; therefore, we will continue to focus on flexing our variable costs with the decline in housing starts. Although our working capital percentage has experienced an

increase since December 2007, we are diligently focused on the controllable aspects of working capital, including days sales outstanding, inventory turns and accounts payable days outstanding.

*Conserve Cash.* During a downturn, we realize the importance of acting quickly to conserve capital. We have pulled back our capital expenditures in 2008 and 2007 to maintenance capital levels. We also manage our credit tightly, especially in these conditions. As industry conditions deteriorate, we know it is important to extend credit prudently for a higher probability of collection on our accounts receivable. Although our bad debt expense increased \$1.4 million in 2008 compared to 2007, this increase would have been greater had we not suspended business in advance of bankruptcies of a few of our larger customers. Additionally, in response to the unstable conditions within the financial markets, in September of 2008 we borrowed \$60 million under our revolving credit facility. We initiated the borrowings in response to this instability to make certain we would have ample cash liquidity for our long-term needs. We paid back \$20 million of the borrowed funds in the fourth quarter of 2008 leaving us with a cash balance of almost \$107 million at the end of December 2008.

*Pursue Strategic Acquisitions.* The highly fragmented nature of the Pro Segment of the U.S. residential new construction building products supply market presents substantial acquisition opportunities. Our acquisition strategy centers on the continued growth of our prefabricated components business and on the potential for geographic expansion. First, we will selectively seek to acquire companies that manufacture prefabricated components such as roof and floor trusses, wall panels, stairs, and engineered wood, as well as other building products such as millwork. We will also seek to acquire companies that present an opportunity to add manufacturing capabilities in a relatively short period of time. Second, there are a number of attractive homebuilding markets where we do not currently operate. We believe that our proven operating model can be successfully adapted to these markets and that the homebuilders in these markets, many of whom we currently serve elsewhere, would value our broad product and service offering, professional expertise, and superior customer service. When entering a new market, our strategy is to acquire market-leading distributors and subsequently expand their product offerings and/or add manufacturing facilities while integrating their operations into our centralized platform. This strategy allows us to quickly achieve the scale required to maximize profitability and leverage existing customer relationships in the local market. Our senior management team has the experience and ability to identify acquisition candidates and integrate acquisitions, having acquired and integrated 27 companies since 1998. The opportunities for industry consolidation in 2009 are likely to be great and we would like to be at the forefront of this trend. However, liquidity is our primary area of focus in 2009 and 2010. Therefore, any acquisition would have to fit our delineated strategy, be at distressed values and be constructed in a manner which would not decrease our liquidity.

## **SALES AND MARKETING**

We seek to attract and retain customers through exceptional customer service, leading product quality, broad product and service offerings, and competitive pricing. This strategy is centered on building and maintaining strong customer relationships rather than traditional marketing and advertising. We strive to add value for the homebuilders through shorter lead times, lower material costs, faster project completion and higher quality. By executing this strategy, we believe we will continue to gain market share.

Our experienced locally focused sales force is at the core of our sales effort. This sales effort involves deploying salespeople who are skilled in housing construction to meet with a homebuilder's construction superintendent, local purchasing agent, or local executive with the goal of becoming the primary product supplier. If selected by the homebuilder, the salesperson and his or her team of experts review blueprints for the contracted homes and advise the homebuilder in areas such as opportunities for cost reduction and regional aesthetic preferences. Next, the team determines the specific package of our products that are needed to complete the project and schedules a sequence of site deliveries. Our large delivery fleet and comprehensive inventory management system enable us to provide "just-in-time" product delivery, ensuring a smoother and faster production cycle for the homebuilder. Throughout the construction process, the salesperson makes frequent site visits to ensure timely delivery and proper installation and to make suggestions for efficiency improvements. We believe this level of service is highly valued by our customers and generates significant customer loyalty. At December 31, 2008, we employed approximately 416 outside sales representatives, who are typically paid a commission based on gross margin dollars collected and work with approximately 270 internal sales coordinators and product specialists.

## **BACKLOG**

Due to the nature of our business, backlog information is not meaningful. While our customers may provide an estimate of their future needs, we generally do not receive a firm order from them until just prior to the anticipated delivery dates. Accordingly, in many cases the time frame from receipt of a firm order and shipment generally does not exceed a few days.

## **MATERIALS AND SUPPLIER RELATIONSHIPS**

We purchase inventory primarily for distribution, some of which is also utilized in our manufacturing plants. The key materials we purchase include dimensional lumber, OSB, engineered wood, windows, doors, and millwork. Our largest suppliers are national lumber and wood products producers and distributors such as BlueLinX Holdings Inc., Boise Cascade Company, Georgia Pacific, Canfor Wood Products and Weyerhaeuser Company and building products manufacturers such as Masonite International Corporation, M I Windows and Doors and MW Manufacturers Inc. We believe there is sufficient supply in the marketplace to competitively source most of our requirements without reliance on any particular supplier and that our diversity of suppliers affords us purchasing flexibility. Due to our centralized oversight of purchasing and our large lumber and OSB purchasing volumes, we believe we are better able to maximize the advantages of both our and our suppliers' national footprints and negotiate purchases in multiple markets to achieve more favorable contracts with respect to price, terms of sale, and supply than our regional competitors. Additionally, for certain customers, we institute purchasing programs on raw materials such as OSB to align portions of our procurement costs with our pricing commitments. We balance our lumber and OSB purchases with a mix of contract and spot market purchases to ensure consistent quantities of product necessary to fulfill customer contracts, to source products at the lowest possible cost, and to minimize our exposure to the volatility of commodity lumber prices.

We currently source products from approximately 4,200 suppliers in order to reduce our dependence on any single company and to maximize purchasing leverage. Although no materials purchases from any single supplier represented more than 9% of our total materials purchases in 2008, we believe we are one of the largest customers for many suppliers, and therefore have significant purchasing leverage. We have found that using multiple suppliers ensures a stable source of products and the best purchasing terms as the suppliers compete to gain and maintain our business.

We maintain strong relationships with our suppliers, and we believe opportunities exist to improve purchasing terms in the future, including inventory storage or "just-in-time" delivery to reduce our inventory carrying costs. We believe we can obtain additional procurement cost savings and purchasing synergies which would further enhance our margins and cash flow.

## **COMPETITION**

Due to the decline in housing starts, we have and will continue to experience increased competition for homebuilder business. However, we believe we have a competitive advantage in our markets, especially in a housing downturn, as many of our competitors in the Pro Segment market are predominantly small, privately owned companies, including framing and shell construction contractors, local and regional materials distributors, single or multi-site lumberyards, and truss manufacturing and millwork operations. Most of these companies have limited access to capital and lack sophisticated information technology systems and large-scale procurement capabilities. Our largest competitors in our markets are 84 Lumber Co. (a privately held company), Stock Building Supply (a unit of U.K.-based Wolseley, plc) and Pro-Build Holdings, Inc. (a privately held company, formerly Strober Organization).

We compete in the Pro Segment of the U.S. residential new construction building products supply market. We focus on a distinctly different target market than the home center retailers such as The Home Depot and Lowe's, who currently primarily serve do-it-yourself and professional remodeling customers. By contrast, our customers consist of professional homebuilders and those that provide construction services to them, with whom we develop strong relationships. The principal methods of competition in the Pro Segment are the development of long-term relationships with professional builders and retaining such customers by delivering a full range of high-quality products on time and offering trade credit, competitive pricing, flexibility in transaction processing, and integrated service and product packages, such as turn-key framing and shell construction, as well as prefabricated components and installation. Though some of our competitors may have access to greater resources than we do, we believe our

geographic scope and the breadth of our product and service offerings position us well to meet the needs of our customers and retain an advantage over such competitors. In addition, our leading market positions in the highly competitive Pro Segment create economies of scale that allow us to cost-effectively supply our customers, which both enhances profitability and reduces the risk of losing customers to competitors.

Due in part to our long-standing customer relationships, local market knowledge and competitive pricing, we believe we have substantial competitive advantages over the small, privately owned companies with which we primarily compete. According to 2008 U.S. Census data, we have operations in 20 of the top 50 U.S. Metropolitan Statistical Areas, as ranked by single family housing permits, and approximately 50% of U.S. housing permits in 2008 were issued in states in which we operate.

## **EMPLOYEES**

At December 31, 2008, we had approximately 3,300 employees, none of whom were represented by a union. We believe that we have good relations with our employees.

## **INFORMATION TECHNOLOGY SYSTEMS**

Our primary enterprise resource planning (“ERP”) system, which we use for operations representing approximately 97% of our sales, is a proprietary system that has been highly customized by our computer programmers. The system has been designed to operate our businesses in a highly efficient manner. The materials required for thousands of standard builder plans are stored by the system for rapid quoting or order entry. Hundreds of price lists are maintained on thousands of SKUs, facilitating rapid price changes in changing product cost environments. A customer’s order can be tracked at each stage of the process and billing can be customized to reduce a customer’s administrative costs and speed payment.

We have a single financial reporting system that has been highly customized for our business. Consolidated financial, sales and workforce reporting is integrated using Hyperion Business Intelligence system, which aggregates data from our ERP systems along with workforce information from our third-party payroll administrator. This technology platform provides management with robust corporate and location level performance management by leveraging standardized metrics and analytics allowing us to plan, track and report performance and compensation measures.

We have developed a proprietary program for use in our component plants. This software reviews product designs for errors, schedules the plants and provides the data used to measure plant efficiency. In addition, we have purchased several software products that have been integrated with our primary ERP system. These programs assist in analyzing blueprints to generate material lists, configure kitchen cabinet orders to submit to manufacturers and purchase lumber products at the lowest cost.

## **SEASONALITY AND OTHER FACTORS**

Our first and fourth quarters have historically been, and are expected to continue to be, adversely affected by weather patterns in some of our markets, causing reduced construction activity. In addition, quarterly results historically have reflected, and are expected to continue to reflect, fluctuations from period to period arising from the following:

- The volatility of lumber prices;
- The cyclical nature of the homebuilding industry;
- General economic conditions in the markets in which we compete;
- The pricing policies of our competitors;
- The production schedules of our customers; and
- The effects of weather.

The composition and level of working capital typically change during periods of increasing sales as we carry more inventory and receivables. Working capital levels typically increase in the second and third quarters of the year

due to higher sales during the peak residential construction season. These increases have in the past resulted in negative operating cash flows during this peak season, which generally have been financed through available cash. Collection of receivables and reduction in inventory levels following the peak building and construction season have more than offset this negative cash flow. We have also from time to time utilized our credit facility to cover working capital needs if needed.

## **AVAILABLE INFORMATION**

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended, and in accordance therewith, we file reports, proxy and information statements and other information with the Securities and Exchange Commission (“SEC”). Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy and information statements and other information and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are available through the investor relations section of our Web site under the links to “SEC Filings.” Our Internet address is [www.bladr.com](http://www.bladr.com). Reports are available free of charge as soon as reasonably practicable after we electronically file them with, or furnish them to the SEC. In addition, our officers and directors file with the SEC initial statements of beneficial ownership and statements of change in beneficial ownership of our securities, which are also available on our Web site at the same location. We are not including this or any other information on our Web site as a part of, nor incorporating it by reference into, this Form 10-K or any of our other SEC filings.

In addition to our Web site, you may read and copy public reports we file with or furnish to the SEC at the SEC’s Public Reference Room at 100 F Street, N.E., Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains our reports, proxy and information statements, and other information that we file electronically with the SEC at [www.sec.gov](http://www.sec.gov).

## **EXECUTIVE OFFICERS**

*Floyd F. Sherman, Chief Executive Officer, President and Director, age 69.* Mr. Sherman has been our Chief Executive Officer and a director since 2001, when he joined the company. He served as President of the company from 2001 until October 2006 and from February 2008 to the present. Prior to joining the company, he spent 28 years at Triangle Pacific/Armstrong Flooring, the last nine of which he served as Chairman and Chief Executive Officer. Mr. Sherman is currently a director of PGT, Inc. and C.H.I. Overhead Doors, Inc. Mr. Sherman has over 40 years of experience in the building products industry. A native of Kerhonkson, New York and a veteran of the U.S. Army, Mr. Sherman is a graduate of the New York State College of Forestry at Syracuse University. He also holds an M.B.A. degree from Georgia State University.

*Charles L. Horn, Senior Vice President and Chief Financial Officer, age 48.* Mr. Horn joined the company in May 1999 as Vice President — Finance and Controller. He was promoted to Chief Financial Officer in May 2000. Prior to joining the company, Mr. Horn served in a variety of positions at Pier One Imports, most recently as Vice President and Treasurer. Prior to Pier One, he served as Vice President Finance/Chief Financial Officer of Conquest Industries. Mr. Horn also has seven years of public accounting experience with PriceWaterhouse. Mr. Horn is a C.P.A. and received his B.B.A. degree from Abilene Christian University and an M.B.A. from the University of Texas at Austin.

*Donald F. McAleenan, Senior Vice President and General Counsel, age 54.* Mr. McAleenan is a co-founder of the company and serves as General Counsel. Prior to co-founding the company, Mr. McAleenan served as Vice President and Deputy General Counsel of Fibreboard Corporation from 1992 to 1997. Mr. McAleenan was also Assistant General Counsel of AT&E Corporation and spent nine years as a securities lawyer at two New York City law firms. Mr. McAleenan has a B.S. from Georgetown University and a J.D. from New York University Law School.

*Morris E. Tolly, Senior Vice President — Operations, age 66.* Mr. Tolly has served as Senior Vice President — Operations of the company since January 25, 2007. Mr. Tolly has been with Builders FirstSource since 1998 when the company acquired Pelican Companies, Inc. (“Pelican”) and has over 40 years of experience in the building products industry. He served in a myriad of roles at Pelican, including sales, Sales Manager and General Manager. Mr. Tolly was an Area Vice President responsible for 12 locations at the time of Pelican’s acquisition. In 2000, he was promoted to President of the company’s Southeast Group, with responsibility for 48 locations.

*Frederick B. Schenkel, Vice President — Manufacturing, age 59.* Mr. Schenkel joined the company in 1998 when the company acquired Builders Supply and Lumber (“BSL”) from Pulte Home Corporation. He became Vice President of the company in 1999 and was promoted to Vice President — Manufacturing in 2002. Mr. Schenkel has more than 30 years of experience managing manufacturing facilities in the industry and, before joining BSL, held such positions as manufacturing manager for The Ryland Group, Inc., Vice President of Manufacturing for Diversified Homes Corporation of Maryland, and plant manager for Regional Building Systems, Inc. Mr. Schenkel holds a B.A. in accounting from Saint Bonaventure University.

#### **Item 1A. Risk Factors**

Risks associated with our business, an investment in our securities, and with achieving the forward-looking statements contained in this report or in our news releases, Web sites, public filings, investor and analyst conferences or elsewhere, include, but are not limited to, the risk factors described below. Any of the risk factors described below could cause our actual results to differ materially from expectations and could have a material adverse effect on our business, financial condition or operating results. We may not succeed in addressing these challenges and risks.

#### **The industry in which we operate is dependent upon the homebuilding industry, the economy, the credit markets, and other important factors.**

The building products industry is highly dependent on new home construction, which in turn is dependent upon a number of factors, including interest rates, consumer confidence, foreclosure rates, and the health of the economy and mortgage markets. Unfavorable changes in demographics, credit markets, consumer confidence, housing affordability or inventory levels, or weakening of the national economy or of any regional or local economy in which we operate could adversely affect consumer spending, result in decreased demand for homes, and adversely affect our business. Production of new homes may also decline because of shortages of qualified tradesmen, reliance on inadequately capitalized sub-contractors, and shortages of material. In addition, the homebuilding industry is subject to various local, state and federal statutes, ordinances, rules and regulations concerning zoning, building design and safety, construction, and similar matters, including regulations that impose restrictive zoning and density requirements in order to limit the number of homes that can be built within the boundaries of a particular area. Increased regulatory restrictions could limit demand for new homes and could negatively affect our sales and earnings. Because we have substantial fixed costs, relatively modest declines in our customers’ production levels could continue to have a significant adverse effect on our financial condition, operating results and cash flows.

The homebuilding industry is undergoing a significant and sustained downturn. According to the U.S. Census Bureau, actual single family housing starts in the U.S. during 2008 declined 40.5% from 2007 and declined 57.5% from 2006 to 2008. We believe that the market downturn is attributable to a variety of factors including: an economic recession; limited credit availability; excess home inventories; a substantial reduction in speculative home investment; a decline in consumer confidence; higher unemployment; and an industry-wide softening of demand. The downturn in the homebuilding industry has resulted in a substantial reduction in demand for our products and services, which in turn had a significant adverse effect on our business and operating results during fiscal 2007 and 2008.

In addition, beginning in 2007, the mortgage markets experienced substantial disruption due to increased defaults, primarily as a result of credit quality deterioration. The disruption has continued to date and has precipitated evolving changes in the regulatory environment and reduced availability of mortgages for potential homebuyers due to an illiquid credit market and more restrictive standards to qualify for mortgages. During 2008, the conditions in the credit markets worsened and the economy fell into a recession. In addition, the credit markets and the financial services industry recently experienced a significant crisis characterized by the bankruptcy or failure of various financial institutions and severe limitations on credit availability. As a result, the credit markets have become highly illiquid as financial and lending institutions severely restricted lending in order to conserve cash and protect their balance sheets. Although Congress and applicable regulatory authorities have enacted legislation and implemented programs designed to protect financial institutions and free up the credit markets, it is unclear whether these actions have been effective to date or will be effective in the future. As the housing industry is dependent upon the economy as well as potential homebuyers’ access to mortgage financing and homebuilders’

access to commercial credit, it is likely there will be further damage to an already weak housing industry until conditions in the economy and the credit markets substantially improve.

We cannot predict the duration of the current market conditions, or the timing or strength of a future recovery of housing activity in our markets, if any. We also cannot provide any assurances that the homebuilding industry will not weaken further, or that the operational strategies we have implemented to address the current market conditions will be successful. Continued weakness in the homebuilding industry would have a significant adverse effect on our business, financial condition and operating results.

**In view of the current housing downturn, we may be required to take additional impairment charges relating to our operations or close under-performing locations.**

During 2008, we recorded impairment charges related to the carrying value of goodwill for two of our reporting units and some of our assets. If the current weakness in the homebuilding industry continues, we may need to take additional goodwill and/or asset impairment charges relating to certain of our reporting units. Any such non-cash charges would have an adverse effect on our financial results. In addition, in response to industry and market conditions, we may have to close certain facilities in under-performing markets. Such facility closures could have a significant adverse effect on our financial condition, operating results and cash flows.

**We may have future capital needs and may not be able to obtain additional financing on acceptable terms.**

We are substantially reliant on our \$350 million revolving credit facility to provide working capital and fund our operations. Subsequent to year-end, we reduced our revolving credit facility from \$350 million to \$250 million as allowed under the credit facility agreement (see Note 9 included in Item 8 of this annual report on Form 10-K). Our inability to renew or replace this facility when required or when business conditions warrant, could have a material adverse effect on our business, financial condition and results of operations. The current economic conditions, credit market conditions, and economic climate affecting our industry, as well as other factors, may constrain our financing abilities. Our ability to secure additional financing, if available, and to satisfy our financial obligations under indebtedness outstanding from time to time will depend upon our future operating performance, the availability of credit generally, economic conditions and financial, business and other factors, many of which are beyond our control. The prolonged continuation or worsening of the current market and macroeconomic conditions that affect our industry could have a material adverse effect on our ability to secure financing on favorable terms, if at all.

We may be unable to secure additional financing or financing on favorable terms or our operating cash flow may be insufficient to satisfy our financial obligations under indebtedness outstanding from time to time, including our Second Priority Senior Secured Floating Rate Notes and our 2007 Senior Secured Credit Agreement. Furthermore, if financing is not available when needed, or is available on unfavorable terms, we may be unable to take advantage of business opportunities or respond to competitive pressures, any of which could have a material adverse effect on our business, financial condition and results of operations. If additional funds are raised through the issuance of additional equity or convertible debt securities, our stockholders may experience significant dilution.

**Our level of indebtedness could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, and prevent us from meeting our obligations under our debt instruments.**

As of December 31, 2008, our funded debt was \$315.0 million, of which \$40.0 million was under our revolving credit facility and \$275.0 million was under our Second Priority Senior Secured Floating Rate Notes due in 2012. In addition, we have significant obligations under ongoing operating leases which are not reflected in our balance sheet.

As of December 31, 2008, \$115.0 million of our debt was at a variable interest rate as we utilize interest rate swap agreements. In the event that interest rates rise, our interest expense would increase. However, our interest rate swap contracts fix interest rates on a portion of our outstanding long-term debt balances. Based on debt outstanding at December 31, 2008, a 1.0% increase in interest rates would result in approximately \$1.2 million of additional interest expense annually.

Our substantial debt could have important consequences to us, including:

- increasing our vulnerability to general economic and industry conditions;
- requiring a substantial portion of our cash flow used in operations to be dedicated to the payment of principal and interest on our indebtedness, therefore reducing our ability to use our cash flow to fund our operations, capital expenditures, and future business opportunities;
- exposing us to the risk of increased interest rates, and corresponding increased interest expense, because a significant portion of our borrowings are at variable rates of interest;
- limiting our ability to obtain additional financing for working capital, capital expenditures, debt service requirements, acquisitions, and general corporate or other purposes; and
- limiting our ability to adjust to changing market conditions and placing us at a competitive disadvantage compared to our competitors who have less debt.

In addition, some of our debt instruments, including those governing our senior secured credit facility and our notes, contain cross-default provisions that could result in our debt being declared immediately due and payable under a number of debt instruments, even if we default on only one debt instrument. In such event, it is unlikely that we would be able to satisfy our obligations under all of such accelerated indebtedness simultaneously.

#### **We may incur additional indebtedness.**

We may incur additional indebtedness under our senior secured credit facility, which provides for up to \$250.0 million of revolving credit borrowings. Given the severe housing downturn, we are currently substantially reliant on our cash on hand and our credit facility to fund our operations. In addition, we may be able to incur substantial additional indebtedness in the future, including collateralized debt, subject to the restrictions contained in the credit agreement governing our senior secured credit facility and the indenture relating to our notes (unless these instruments were restructured). If new debt is added to our current debt levels, the related risks that we now face could intensify.

#### **Our debt instruments contain various covenants that limit our ability to operate our business.**

Our financing arrangements, including our senior secured credit facility and the indenture governing our notes, contain various provisions that limit our ability to, among other things:

- transfer or sell assets, including the equity interests of our restricted subsidiaries, or use asset sale proceeds;
- incur additional debt;
- pay dividends or distributions on our capital stock or repurchase our capital stock;
- make certain restricted payments or investments;
- create liens to secure debt;
- enter into transactions with affiliates;
- merge or consolidate with another company or continue to receive the benefits of these financing arrangements under a “change in control” scenario (as defined in those agreements); and
- engage in unrelated business activities.

In addition, our senior secured credit facility requires us to meet a specified financial ratio. This financial ratio is a fixed charge coverage ratio of 1:1 that is triggered if our available borrowing capacity, as determined under the borrowing base formula, is less than \$35 million. The fixed charge coverage ratio is defined as the ratio of earnings before interest expenses, income taxes, depreciation and amortization expenses minus capital expenditures, cash taxes paid, dividends, distributions and share repurchases or redemptions to the sum of scheduled principal payments and interest expense on a trailing twelve month basis from the trigger date. These covenants may restrict our ability to expand or fully pursue our business strategies. Our ability to comply with these and other provisions of the indenture governing our notes and the senior secured credit facility may be affected by changes in our operating

and financial performance, changes in general business and economic conditions, adverse regulatory developments, a change in control or other events beyond our control. The breach of any of these covenants, including those contained in our senior secured credit facility and the indenture governing our notes, could result in a default under our indebtedness, which could cause those and other obligations to become due and payable. If any of our indebtedness is accelerated, we may not be able to repay it. At December 31, 2008, our net available borrowing capacity under our revolving credit facility in excess of the \$35 million liquidity covenant was zero due to a drop in our eligible borrowing base coupled with lower seasonal advance rates set forth under the credit agreement. Approximately \$12.8 million of cash on hand at year-end supported a short-fall in the calculation of the \$35 million minimum liquidity covenant contained in the credit agreement. This covenant calculates as eligible borrowing base less outstanding borrowings. The resulting amount must exceed \$35 million or we are required to meet a fixed charge coverage ratio, which we currently would not meet. Based on our 2009 forecast, we will not meet the fixed charge coverage ratio, but we anticipate that we would not fall below the \$35 million minimum liquidity covenant in 2009 and therefore, would not trigger the fixed charge coverage ratio requirement. The calculation allows cash on deposit with the agent to be included as eligible borrowing base. Absent the use of cash in the calculation, we would have been forced to repay \$12.8 million in borrowings to comply with the covenant.

**We occupy most of our facilities under long-term non-cancelable leases. We may be unable to renew leases at the end of their terms. If we close a facility, we are still obligated under the applicable lease.**

Most of our facilities are located in leased premises. Many of our current leases are non-cancelable and typically have terms ranging from 5 to 15 years and most provide options to renew for specified periods of time. We believe that leases we enter into in the future will likely be long-term and non-cancelable and have similar renewal options. If we close or idle a facility, we generally remain committed to perform our obligations under the applicable lease, which would include, among other things, payment of the base rent for the balance of the lease term. During 2007 and 2008, we closed or idled a number of facilities for which we remain liable on the lease obligations. Our obligation to continue making rental payments in respect of leases for closed or idled facilities could have a material adverse effect on our business and results of operations. Alternatively, at the end of the lease term and any renewal period for a facility, we may be unable to renew the lease without substantial additional cost, if at all. If we are unable to renew our facility leases, we may close or relocate a facility, which could subject us to construction and other costs and risks, and could have a material adverse effect on our business and results of operations. For example, closing a facility, even during the time of relocation, will reduce the sales that the facility would have contributed to our revenues. Additionally, the revenue and profit, if any, generated at a relocated facility may not equal the revenue and profit generated at the existing one.

**We are a holding company and conduct all of our operations through our subsidiaries.**

We are a holding company that derives all of our operating income from our subsidiaries. All of our assets are held by our direct and indirect subsidiaries. We rely on the earnings and cash flows of our subsidiaries, which are paid to us by our subsidiaries in the form of dividends and other payments or distributions, to meet our debt service obligations. The ability of our subsidiaries to pay dividends or make other payments or distributions to us will depend on their respective operating results and may be restricted by, among other things, the laws of their jurisdiction of organization (which may limit the amount of funds available for the payment of dividends and other distributions to us), the terms of existing and future indebtedness and other agreements of our subsidiaries, the senior secured credit facility, the terms of the indenture governing our notes, and the covenants of any future outstanding indebtedness we or our subsidiaries incur.

Our financial condition and operating performance and that of our subsidiaries is also subject to prevailing economic and competitive conditions and to certain financial, business, and other factors beyond our control. We cannot assure you that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, and interest on our indebtedness.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay capital expenditures, sell assets, seek additional capital, or restructure or refinance our indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. In the absence of such operating results and resources, we could face substantial liquidity problems and

might be required to dispose of material assets or operations to meet our debt service and other obligations. The credit agreement governing our senior secured credit facility and the indenture governing our notes restrict our ability to dispose of assets and use the proceeds from such disposition. We may not be able to consummate those dispositions or be able to obtain the proceeds that we could realize from them, and these proceeds may not be adequate to meet any debt service obligations then due.

**The building supply industry is cyclical and seasonal.**

The building products supply industry is subject to cyclical market pressures. Prices of building products are subject to fluctuations arising from changes in supply and demand, national and international economic conditions, labor costs, competition, market speculation, government regulation, and trade policies, as well as from periodic delays in the delivery of lumber and other products. For example, prices of wood products, including lumber and panel products, are subject to significant volatility and directly affect our sales and earnings. In particular, low market prices for wood products over a sustained period can adversely affect our financial condition, operating results and cash flows. For the year ended December 31, 2008, average prices for lumber and lumber sheet goods were 8.4% lower than the prior year. The current housing downturn has resulted in a prolonged period of relatively low market prices for wood products. Our lumber & lumber sheet goods product category represented 23.9% of total sales for the year ended December 31, 2008. We have no ability to control the timing and amount of pricing changes for building products. In addition, the supply of building products fluctuates based on available manufacturing capacity. A shortage of capacity or excess capacity in the industry can result in significant increases or declines in market prices for those products, often within a short period of time. Such price fluctuations can adversely affect our financial condition, operating results and cash flows.

In addition, although weather patterns affect our operating results throughout the year, adverse weather historically has reduced construction activity in the first and fourth quarters in our markets. To the extent that hurricanes, severe storms, floods, other natural disasters or similar events occur in the markets in which we operate, our business may be adversely affected. We anticipate that fluctuations from period to period will continue in the future.

**The loss of any of our significant customers could affect our financial health.**

Our 10 largest customers generated approximately 19.0% of our sales in the year ended December 31, 2008, and our largest customer accounted for less than 5.0% of our sales in that same period. We cannot guarantee that we will maintain or improve our relationships with these customers or that we will continue to supply these customers at historical levels. Due to the current housing downturn, many of our homebuilder customers have substantially reduced construction activity. Some homebuilder customers have exited or severely curtailed building activity in certain of our markets. This trend is likely to continue until there is a housing recovery in our markets. A prolonged housing downturn could have a significant adverse effect on our financial condition, operating results and cash flows.

In addition to these factors, production homebuilders and other customers may: (1) seek to purchase some of the products that we currently sell directly from manufacturers, (2) elect to establish their own building products manufacturing and distribution facilities, or (3) give advantages to manufacturing or distribution intermediaries in which they have an economic stake. In addition, continued consolidation among production homebuilders could also result in a loss of some of our present customers to our competitors. The loss of one or more of our significant customers or deterioration in our relations with any of them could significantly affect our financial condition, operating results and cash flows. Furthermore, our customers are not required to purchase any minimum amount of products from us. The contracts into which we have entered with most of our professional customers typically provide that we supply particular products or services for a certain period of time when and if ordered by the customer. Should our customers purchase our products in significantly lower quantities than they have in the past, such decreased purchases could have a material adverse effect on our financial condition, operating results and cash flows.

**Our industry is highly fragmented and competitive, and increased competitive pressure may adversely affect our results.**

The building products supply industry is highly fragmented and competitive. We face significant competition from local and regional building materials chains, as well as from privately-owned single site enterprises. Any of these

competitors may (1) foresee the course of market development more accurately than do we, (2) develop products that are superior to our products, (3) have the ability to produce similar products at a lower cost, (4) develop stronger relationships with local homebuilders, or (5) adapt more quickly to new technologies or evolving customer requirements than do we. As a result, we may not be able to compete successfully with them. In addition, home center retailers, which have historically concentrated their sales efforts on retail consumers and small contractors, may in the future intensify their marketing efforts to professional homebuilders. Furthermore, certain product manufacturers sell and distribute their products directly to production homebuilders. The volume of such direct sales could increase in the future. Additionally, manufacturers of products distributed by us may elect to sell and distribute directly to homebuilders in the future or enter into exclusive supplier arrangements with other distributors. Consolidation of production homebuilders may result in increased competition for their business. Finally, we may not be able to maintain our operating costs or product prices at a level sufficiently low for us to compete effectively. If we are unable to compete effectively, our financial condition, operating results and cash flows may be adversely affected.

**We are subject to competitive pricing pressure from our customers.**

Production homebuilders historically have exerted significant pressure on their outside suppliers to keep prices low because of their market share and their ability to leverage such market share in the highly fragmented building products supply industry. The current housing industry downturn has resulted in increased pricing pressures from production homebuilders and other customers. In addition, continued consolidation among production homebuilders, and changes in production homebuilders' purchasing policies or payment practices, could result in additional pricing pressure. If we are unable to generate sufficient cost savings to offset any price reductions, our financial condition, operating results and cash flows may be adversely affected. In addition, as a result of the housing downturn, several of our homebuilder customers have defaulted on amounts owed to us, or their payable days have become extended as a result of their financial condition. Such payment failures or delays may significantly adversely affect our financial condition, operating results and cash flows.

**We are subject to the listing requirements under NASDAQ Marketplace Rules. We may not be able to continue to comply with the listing requirements under these rules.**

Under NASDAQ Marketplace Rules, our common stock is required to maintain a minimum \$1 bid price in order to qualify for continued listing on the NASDAQ Stock Market LLC ("NASDAQ"). Failure to maintain the minimum bid price for a period of 30 consecutive business days would potentially result in delisting our common stock. Due to the recent unusual market conditions, the NASDAQ has suspended the minimum bid price requirement through April 20, 2009. For the month of December 2008, the bid price for our common stock on NASDAQ ranged from \$0.83 to \$2.18. Delisting of our common stock by NASDAQ could have a material adverse impact on the market value and liquidity of our stock. Certain institutional holders of our common stock may be prohibited from investing in our stock if it is delisted or fails to meet minimum liquidity or price requirements. No assurance can be given that our common stock will remain in compliance with NASDAQ's listing requirements.

**The ownership position of affiliates of JLL Partners and Warburg Pincus LLC limits other stockholders' ability to influence corporate matters.**

Affiliates of JLL Partners and Warburg Pincus LLC control Building Products, LLC, which owns approximately 50% of our outstanding common stock. Six of our 10 directors are employees of either JLL Partners or Warburg Pincus LLC. Accordingly, such affiliates of JLL Partners and Warburg Pincus LLC have significant influence over our management and affairs and over all matters requiring stockholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets. This concentrated ownership position limits other stockholders' ability to influence corporate matters and, as a result, we may take actions that some of our stockholders do not view as beneficial. Additionally, JLL Partners and Warburg Pincus LLC are in the business of making investments in companies and may, from time to time, acquire and hold interests in businesses that compete directly or indirectly with us. These entities may also pursue, for their own accounts, acquisition opportunities that may be complementary to our business, and as a result, those acquisition opportunities may not be available to us. Further, certain provisions of our amended and restated

certificate of incorporation and amended and restated bylaws may limit your ability to influence corporate matters and, as a result, we may take actions that some of our stockholders do not view as beneficial.

**Our continued success will depend on our ability to retain our key employees and to attract and retain new qualified employees.**

Our success depends in part on our ability to attract, hire, train, and retain qualified managerial, sales and marketing personnel. We face significant competition for these types of employees in our industry. We may be unsuccessful in attracting and retaining the personnel we require to conduct and expand our operations successfully. In addition, key personnel may leave us and compete against us. Our success also depends to a significant extent on the continued service of our senior management team. We may be unsuccessful in replacing key managers who either quit or retire. The loss of any member of our senior management team or other experienced, senior employees could impair our ability to execute our business plan, cause us to lose customers and reduce our net sales, or lead to employee morale problems and/or the loss of other key employees. In any such event, our financial condition, operating results and cash flows could be adversely affected.

**The nature of our business exposes us to product liability and warranty claims and other legal proceedings.**

We are involved in product liability and product warranty claims relating to the products we manufacture and distribute that, if adversely determined, could adversely affect our financial condition, operating results and cash flows. We rely on manufacturers and other suppliers to provide us with many of the products we sell and distribute. Because we do not have direct control over the quality of such products manufactured or supplied by such third party suppliers, we are exposed to risks relating to the quality of such products. In addition, we are exposed to potential claims arising from the conduct of homebuilders and their subcontractors, for which we may be contractually liable. Although we currently maintain what we believe to be suitable and adequate insurance in excess of our self-insured amounts, there can be no assurance that we will be able to maintain such insurance on acceptable terms or that such insurance will provide adequate protection against potential liabilities. Product liability claims can be expensive to defend and can divert the attention of management and other personnel for significant periods, regardless of the ultimate outcome. Claims of this nature could also have a negative impact on customer confidence in our products and our company. In addition, we are involved on an ongoing basis in other legal proceedings. We cannot assure you that any current or future claims will not adversely affect our financial condition, operating results and cash flows.

**Product shortages, loss of key suppliers, and our dependence on third-party suppliers and manufacturers could affect our financial health.**

Our ability to offer a wide variety of products to our customers is dependent upon our ability to obtain adequate product supply from manufacturers and other suppliers. Generally, our products are obtainable from various sources and in sufficient quantities. However, the loss of, or a substantial decrease in the availability of, products from our suppliers or the loss of key supplier arrangements could adversely impact our financial condition, operating results and cash flows.

Although in many instances we have agreements with our suppliers, these agreements are generally terminable by either party on limited notice. Failure by our suppliers to continue to supply us with products on commercially reasonable terms, or at all, could put pressure on our operating margins or have a material adverse effect on our financial condition, operating results and cash flows. Short-term changes in the cost of these materials, some of which are subject to significant fluctuations, are sometimes, but not always passed on to our customers. Our delayed ability to pass on material price increases to our customers could adversely impact our financial condition, operating results and cash flows.

**A range of factors may make our quarterly revenues and earnings variable.**

We have historically experienced, and in the future will continue to experience, variability in revenues and earnings on a quarterly basis. The factors expected to contribute to this variability include, among others: (1) the

volatility of prices of lumber and wood products, (2) the cyclical nature of the homebuilding industry, (3) general economic conditions in the various local markets in which we compete, (4) the pricing policies of our competitors, (5) the production schedules of our customers, and (6) the effects of the weather. These factors, among others, make it difficult to project our operating results on a consistent basis, which may affect the price of our stock.

**We may be adversely affected by any disruption in our information technology systems.**

Our operations are dependent upon our information technology systems, which encompass all of our major business functions. Our centralized financial reporting system currently draws data from our ERP systems. We rely upon such information technology systems to manage and replenish inventory, to fill and ship customer orders on a timely basis, and to coordinate our sales activities across all of our products and services. A substantial disruption in our information technology systems for any prolonged time period (arising from, for example, system capacity limits from unexpected increases in our volume of business, outages or delays in our service) could result in delays in receiving inventory and supplies or filling customer orders and adversely affect our customer service and relationships. Our systems might be damaged or interrupted by natural or man-made events or by computer viruses, physical or electronic break-ins or similar disruptions affecting the global Internet. As part of our continuing integration of our computer systems, we plan to integrate our ERPs into a single system. This integration may divert management's attention from our core businesses. In addition, we may experience delays in such integration or problems with the functionality of the integrated system, which could increase the expected cost of the integration. There can be no assurance that such delays, problems, or costs will not have a material adverse effect on our financial condition, operating results and cash flows.

**We may be adversely affected by any natural or man-made disruptions to our distribution and manufacturing facilities.**

We currently maintain a broad network of distribution and manufacturing facilities throughout the southern and eastern U.S. Any serious disruption to our facilities resulting from fire, earthquake, weather-related events, an act of terrorism or any other cause could damage a significant portion of our inventory and could materially impair our ability to distribute our products to customers. Moreover, we could incur significantly higher costs and longer lead times associated with distributing our products to our customers during the time that it takes for us to reopen or replace a damaged facility. In addition, any shortages of fuel or significant fuel cost increases could seriously disrupt our ability to distribute products to our customers. If any of these events were to occur, our financial condition, operating results and cash flows could be materially adversely affected.

**We may be unable to successfully implement our growth strategy, which includes increasing sales of our prefabricated components and other value-added products, pursuing strategic acquisitions and opening new facilities.**

Our strategy depends in part on growing our sales of prefabricated components and other value-added products and increasing our market share. If any of these initiatives are not successful, or require extensive investment, our growth may be limited, and we may be unable to achieve or maintain expected levels of growth and profitability.

Our long-term business plan also provides for continued growth through strategic acquisitions and organic growth through the construction of new facilities or the expansion of existing facilities. Failure to identify and acquire suitable acquisition candidates on appropriate terms could have a material adverse effect on our growth strategy. Moreover, a significant change in our business, the economy or the housing market, an unexpected decrease in our cash flow for any reason, or the requirements of our senior secured credit facility or the indenture governing the notes could result in an inability to obtain the capital required to effect new acquisitions or expansions of existing facilities. Our failure to make successful acquisitions or to build or expand facilities, including manufacturing facilities, produce saleable product or meet customer demand in a timely manner could result in damage to or loss of customer relationships, which could adversely affect our financial condition, operating results and cash flows. In addition, although we have been successful in the past in integrating 27 acquisitions, we may not be able to integrate the operations of future acquired businesses with our own in an efficient and cost-effective manner or without significant disruption to our existing operations. Acquisitions, moreover, involve significant risks and uncertainties, including difficulties integrating acquired personnel and corporate cultures into our business, the potential loss of key

employees, customers or suppliers, difficulties in integrating different computer and accounting systems, exposure to unforeseen liabilities of acquired companies, and the diversion of management attention and resources from existing operations. We may be unable to successfully complete potential acquisitions due to multiple factors, such as issues related to regulatory review of the proposed transactions. We may also be required to incur additional debt in order to consummate acquisitions in the future, which debt may be substantial and may limit our flexibility in using our cash flow from operations. Our failure to integrate future acquired businesses effectively or to manage other consequences of our acquisitions, including increased indebtedness, could prevent us from remaining competitive and, ultimately, could adversely affect our financial condition, operating results and cash flows.

**Federal, state, local and other regulations could impose substantial costs and/or restrictions on our operations that would reduce our net income.**

We are subject to various federal, state, local and other regulations, including, among other things, regulations promulgated by the Department of Transportation and applicable to our fleet of delivery trucks, work safety regulations promulgated by the Department of Labor's Occupational Safety and Health Administration, employment regulations promulgated by the United States Equal Employment Opportunity Commission, accounting standards issued by the Financial Accounting Standards Board or similar entities, and state and local zoning restrictions and building codes. More burdensome regulatory requirements in these or other areas may increase our general and administrative costs and adversely affect our financial condition, operating results, and cash flows. Moreover, failure to comply with the regulatory requirements applicable to our business could expose us to substantial penalties which could adversely affect our financial condition, operating results and cash flows.

**We are subject to potential exposure to environmental liabilities and are subject to environmental regulation.**

We are subject to various federal, state and local environmental laws, ordinances and regulations. Although we believe that our facilities are in material compliance with such laws, ordinances, and regulations, as owners and lessees of real property, we can be held liable for the investigation or remediation of contamination on such properties, in some circumstances, without regard to whether we knew of or were responsible for such contamination. No assurance can be provided that remediation may not be required in the future as a result of spills or releases of petroleum products or hazardous substances, the discovery of unknown environmental conditions or more stringent standards regarding existing residual contamination. More burdensome environmental regulatory requirements may increase our general and administrative costs and adversely affect our financial condition, operating results and cash flows.

**We may be adversely affected by uncertainty in the economy and financial markets, including as a result of terrorism and the war in the Middle East.**

Instability in the economy and financial markets, including as a result of terrorism and the war in the Middle East, may result in a decrease in housing starts, which would adversely affect our business. In addition, the war, related setbacks or adverse developments, including a retaliatory military strike or terrorist attack, may cause unpredictable or unfavorable economic conditions and could have a material adverse effect on our financial condition, operating results and cash flows. In addition, any shortages of fuel or significant fuel cost increases related to geopolitical conditions could seriously disrupt our ability to distribute products to our customers. Terrorist attacks similar to the ones committed on September 11, 2001, may directly affect our ability to keep our operations and services functioning properly and could have a material adverse effect on our financial condition, operating results and cash flows.

**Being a public company increases our administrative costs.**

As a public company, we incur significant legal, accounting, and other expenses that we did not incur as a private company. Under the SEC rules and regulations, as well as those of NASDAQ Stock Market LLC, our financial compliance costs have increased. Such rules may also make it more difficult and more expensive to obtain director and officer liability insurance. We may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. These rules and regulations could also make it more difficult for us to attract and retain qualified members of our board of directors, particularly to serve on our

audit committee, and qualified executive officers. Our strategy depends in part upon reducing and controlling operating expenses and upon working capital and operating improvements. We cannot assure you that our efforts will continue to result in the level of profitability, cost savings or other benefits that we expect.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

We have a broad network of distribution and manufacturing facilities in 11 states throughout the southern and eastern U.S. We have 58 distribution facilities and 57 manufacturing facilities many of which are co-located in the following markets:

<b>Alabama</b> Auburn Central Alabama	<b>Maryland/Virginia</b> Baltimore/Washington Northeast Maryland	<b>South Carolina</b> Anderson/Seneca Charleston Columbia Florence Grand Strand Greenville Southeast South Carolina
<b>Florida</b> Bunnell Emerald Coast Jacksonville Orlando South Florida Tampa	<b>North Carolina</b> Charlotte Fayetteville High Point Raleigh Washington Western North Carolina Wilmington	<b>Tennessee</b> Eastern Tennessee Knoxville Nashville
<b>Georgia</b> Atlanta Central Georgia Northern Georgia	<b>Kentucky/Ohio</b> Ohio Valley	<b>Texas</b> Dallas/Fort Worth San Antonio

Distribution centers typically include 15 to 25 acres of outside storage, a 60,000 square foot warehouse, 10,000 square feet of office space, and 30,000 square feet of covered storage. The outside area provides space for lumber storage and a staging area for delivery while the warehouse stores millwork, windows and doors. The distribution centers are generally located in industrial areas with low cost real estate and easy access to freeways to maximize distribution efficiency and convenience. A majority of the distribution centers are situated on rail lines for efficient receipt of goods.

Our manufacturing facilities produce trusses, wall panels, engineered wood, stairs, windows, pre-hung doors and custom millwork. They are generally located on the same premises as our distribution facilities. Truss and panel manufacturing facilities vary in size from 30,000 square feet to 60,000 square feet with 8 to 10 acres of outside storage for lumber and for finished goods. Our window manufacturing facility in Houston, Texas has approximately 200,000 square feet.

We lease 65 facilities and own 21 facilities. These leases generally have an initial operating lease term of 5 to 15 years and most provide options to renew for specified periods of time. A majority of our leases provide for fixed annual rentals. Certain of our leases include provisions for escalating rent, generally based on changes in the consumer price index. Most of the leases require us to pay taxes, insurance and common area maintenance expenses associated with the properties.

We operate a fleet of approximately 1,300 trucks to deliver products from our distribution and manufacturing centers to job sites. Through our emphasis on local market flexibility and strategically placed locations, we minimize shipping and freight costs while maintaining a high degree of local market expertise. Through knowledge of local homebuilder needs, customer coordination and rapid restocking ability, we reduce working capital requirements and guard against out-of-stock products. We believe that this reliability is highly valued by our customers and reinforces customer relationships.

### Item 3. *Legal Proceedings*

We are involved in various claims and lawsuits incidental to the conduct of our business in the ordinary course. We carry insurance coverage in such amounts in excess of our self-insured retention as we believe to be reasonable under the circumstances and that may or may not cover any or all of our liabilities in respect of claims and lawsuits. We do not believe that the ultimate resolution of these matters will have a material adverse effect on our consolidated financial position, cash flows or operating results.

Although our business and facilities are subject to federal, state and local environmental regulation, environmental regulation does not have a material effect on our operations. We believe that our facilities are in material compliance with such laws and regulations. As owners and lessees of real property, we can be held liable for the investigation or remediation of contamination on such properties, in some circumstances without regard to whether we knew of or were responsible for such contamination. Our current expenditures with respect to environmental investigation and remediation at our facilities are minimal, although no assurance can be provided that more significant remediation may not be required in the future as a result of spills or releases of petroleum products or hazardous substances or the discovery of unknown environmental conditions.

### Item 4. *Submission of Matters to a Vote of Security Holders*

None.

## PART II

### Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Our common stock has been traded on the NASDAQ Stock Market LLC under the symbol "BLDR" since June 22, 2005. On February 23, 2009, the closing price of our common stock as reported on the NASDAQ Stock Market LLC was \$1.99. The approximate number of stockholders of record of our common stock on that date was 109, although we believe that the number of beneficial owners of our common stock is substantially greater.

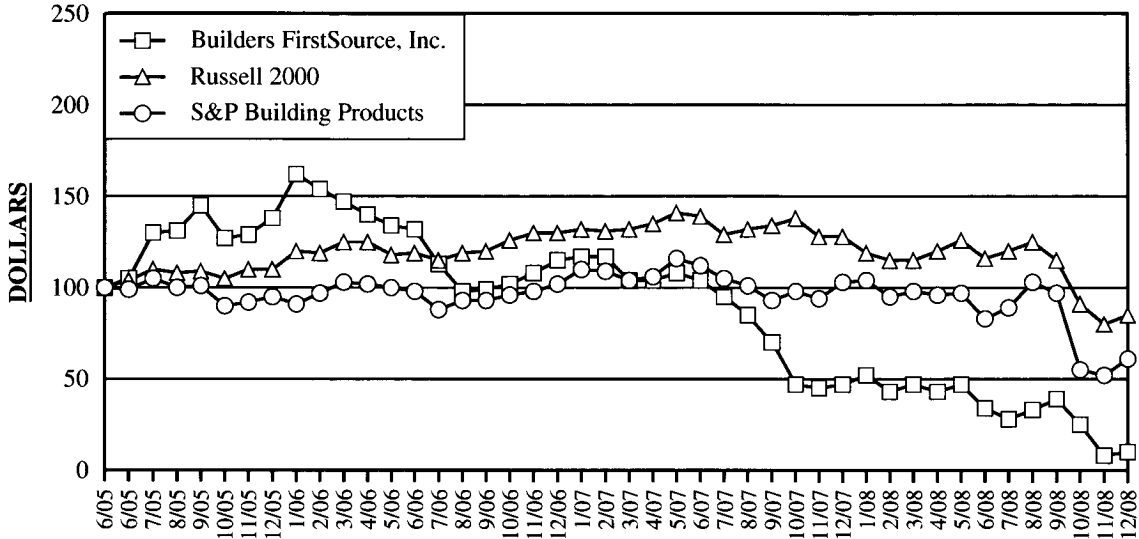

The table below sets forth the high and low sales prices of our common stock for the periods indicated:

	<u>High</u>	<u>Low</u>
<b>2008</b>		
First quarter . . . . .	\$ 8.18	\$ 5.72
Second quarter . . . . .	\$ 7.73	\$ 5.05
Third quarter . . . . .	\$ 6.50	\$ 3.86
Fourth quarter . . . . .	\$ 6.29	\$ 0.82
<b>2007</b>		
First quarter . . . . .	\$19.88	\$16.00
Second quarter . . . . .	\$17.53	\$15.78
Third quarter . . . . .	\$16.56	\$10.61
Fourth quarter . . . . .	\$11.44	\$ 6.20

We have not paid regular dividends in the past. Any future determination relating to dividend policy will be made at the discretion of our board of directors and will depend on a number of factors, including restrictions in our debt instruments, as well as our future earnings, capital requirements, financial condition, prospects and other factors that our board of directors may deem relevant. The terms of our \$250 million senior credit facility and the indenture governing our notes currently restrict our ability to pay dividends. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources" contained in Item 7 of this annual report on Form 10-K.

The following graph demonstrates the performance of the cumulative total return to the stockholders of our common stock during the 42-month period in comparison to the cumulative total returns of the Russell 2000 index and the S&P Building Products index. The graph tracks the performance of a \$100 investment in our common stock and in each of the indexes (with the reinvestment of all dividends) from June 30, 2005 to December 31, 2008. We became a public company on June 22, 2005.

The shares presented in the above table represent stock tendered in order to meet minimum withholding tax requirements for shares vested.

**Item 6. Selected Financial Data**

The following selected consolidated financial data for the years ended December 31, 2008, 2007 and 2006 and as of December 31, 2008 and 2007 were derived from our consolidated financial statements that have been audited by PricewaterhouseCoopers LLP, independent accountants, and are included as Item 8 of this annual report on Form 10-K. Selected consolidated financial data as of December 31, 2006 and as of and for the years ended December 31, 2005 and 2004 were derived from our consolidated financial statements that have been audited by PricewaterhouseCoopers LLP, but are not included herein.

The following data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contained in Item 7 of this annual report on Form 10-K and with our consolidated financial statements and related notes included as Item 8 of this annual report on Form 10-K.

(1) The year ended December 31, 2005 includes a cash payment (including applicable payroll taxes) of \$35.7 million made to stock option holders in lieu of adjusting exercise prices in conjunction with our refinancing transaction. The year ended December 31, 2004 includes a cash payment (including applicable payroll taxes) of \$0.4 million made to stock option holders in lieu of adjusting exercise prices in conjunction with our refinancing transaction. There were no similar payments for the years ended December 31, 2008, 2007 and 2006.

(2) (Loss) income from continuing operations included a valuation allowance of \$35.5 million against primarily all of our deferred tax assets for the year ended December 31, 2008, as discussed in Note 12 to the consolidated financial statements included in Item 8 of this annual report on Form 10-K.

(3) Reflects the impact of the 1-for-10 reverse stock split that occurred in May 2005.

## **Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion of our financial condition and results of operations should be read in conjunction with the selected financial data and the consolidated financial statements and related notes contained in Item 6. Selected Financial Data and Item 8. Financial Statements and Supplementary Data of this annual report on Form 10-K, respectively. See "Risk Factors" contained in Item 1A. Risk Factors of this annual report on Form 10-K and "Cautionary Statement" contained in Item 1. Business of this annual report on Form 10-K for a discussion of the uncertainties, risks and assumptions associated with these statements.

### **OVERVIEW**

We are a leading supplier and manufacturer of structural and related building products for residential new construction in the U.S. We offer an integrated solution to our customers providing manufacturing, supply and installation of a full range of structural and related building products. Our manufactured products include our factory-built roof and floor trusses, wall panels and stairs, aluminum and vinyl windows, custom millwork and trim, as well as engineered wood that we design and cut for each home. We also assemble interior and exterior doors into pre-hung units. Additionally, we supply our customers with a broad offering of professional grade building products not manufactured by us, such as dimensional lumber and lumber sheet goods, various window, door and millwork lines, as well as cabinets, roofing and gypsum wallboard. Our full range of construction-related services includes professional installation, turn-key framing and shell construction, and spans all our product categories.

We group our building products into five product categories:

- *Prefabricated Components.* Our prefabricated components consist of wood floor and roof trusses, steel roof trusses, wall panels, stairs, and engineered wood.
- *Windows & Doors.* Our windows & doors category is comprised of the manufacturing, assembly, and distribution of interior and exterior door units.
- *Lumber & Lumber Sheet Goods.* Lumber & lumber sheet goods include dimensional lumber, plywood, and OSB products used in on-site house framing.
- *Millwork.* Millwork includes interior trim, exterior trim, columns and posts that we distribute, as well as custom exterior features that we manufacture under the Synboard brand name.
- *Other building products & services.* Other building products & services are comprised of products such as cabinets, gypsum, roofing and insulation and services such as turn-key framing, shell construction, design assistance, and professional installation spanning all of our product categories.

Our operating results are dependent on the following trends, events and uncertainties, some of which are beyond our control:

- *Homebuilding Industry.* Our business is driven primarily by the residential new construction market, which is in turn dependent upon a number of factors, including interest rates, consumer confidence, foreclosure rates, and the health of the economy and mortgage markets. Over the past few years, many homebuilders significantly decreased their starts because of lower demand and an excess of home inventory. Due to the decline in housing starts and increased competition for homebuilder business, we have and will continue to experience increasing pressure on our margins. The decline in housing starts continues to be widespread and we expect this trend to continue through 2009 and possibly beyond. However, we still believe there are several meaningful trends that indicate U.S. housing demand will likely remain healthy in the long term and that the current downturn in the housing industry is likely a trough in the cyclical nature of the residential construction industry. These trends include relatively low interest rates, the aging of housing stock, and normal population growth due to birthrate exceeding death rate.
- *Targeting Large Production Homebuilders.* In recent years, the homebuilding industry has undergone significant consolidation, with the larger homebuilders substantially increasing their market share. We expect that trend to accelerate during this housing correction due to the better liquidity positions of the larger homebuilders relative to the smaller, less capitalized homebuilders. Our focus is on maintaining

relationships and market share with these customers while balancing the competitive pressures we are facing in our markets with certain profitability expectations. Our sales to the “Builder 100,” the country’s largest 100 homebuilders, fell 41.2% during 2008, consistent with the overall decline in housing activity in the United States. We expect that our ability to maintain strong relationships with the largest builders will be vital to our ability to grow and expand into new markets as well as maintain our current market share through the downturn. Additionally, during the downturn, we plan to prudently expand our custom homebuilder base while maintaining our tight credit standards.

- *Expand into Multi-Family and Light Commercial Business.* We believe we can diversify our customer base and grow our sales by further expanding into multi-family and light commercial business. While we primarily serve the single family new home construction market, we have entered the multi-family and/or light commercial market in certain regions. Our Shelby, Alabama location gives us the ability to manufacture steel roof trusses often used in multi-family and light commercial construction.
- *Use of Prefabricated Components.* Prior to the current housing downturn, homebuilders were increasingly using prefabricated components in order to realize increased efficiency and improved quality. Shortening cycle time from start to completion was a key imperative of the homebuilders during periods of strong consumer demand. With the current housing downturn, that trend has decelerated as cycle time has less relevance. Customers who traditionally used prefabricated components, for the most part, still do. However, the conversion of customers to this product offering has slowed. We expect this trend to continue at least for the duration of this downturn. In response, we have reduced our manufacturing capacity and delayed plans to open new facilities.
- *Economic Conditions.* Economic changes both nationally and locally in our markets impact our financial performance. The building products supply industry is highly dependent upon new home construction and subject to cyclical market changes. Our operations are subject to fluctuations arising from changes in supply and demand, national economic conditions, labor costs, competition, government regulation, trade policies and other factors that affect the homebuilding industry such as demographic trends, interest rates, single-family housing starts, employment levels, consumer confidence, and the availability of credit to homebuilders, contractors, and homeowners. During 2007, the mortgage markets experienced substantial disruption due to increased defaults, primarily as a result of credit quality deterioration. The disruption has continued and precipitated evolving changes in the regulatory environment and reduced availability of mortgages for potential homebuyers due to an illiquid credit market and more restrictive standards to qualify for mortgages. During 2008, the conditions in the credit markets and the economy worsened and the economy fell into a recession. The credit markets and financial services industry have recently experienced a significant crisis characterized by the bankruptcy or failure of various financial institutions and severe limitations on credit availability. As a result, the credit markets have become highly illiquid as financial and lending institutions have limited credit to conserve cash and protect their balance sheets. Although Congress and applicable regulatory authorities have enacted legislation and implemented policies and plans designed to free up the credit markets, it is unclear as to whether these actions have been effective to date or will be effective in the future. As the housing industry is dependent upon potential homebuyers’ access to mortgage financing and homebuilders’ access to commercial credit, it is likely there will be further damage to an already weak housing industry until conditions substantially improve.
- *Cost of Materials.* Prices of wood products, which are subject to cyclical market fluctuations, may adversely impact operating income when prices rapidly rise or fall within a relatively short period of time. We purchase certain materials, including lumber products, which are then sold to customers as well as used as direct production inputs for our manufactured and prefabricated products. Short-term changes in the cost of these materials, some of which are subject to significant fluctuations, are sometimes passed on to our customers, but our pricing quotation periods may limit our ability to pass on such price changes. We may also be limited in our ability to pass on increases on in-bound freight costs on our products due to the price of fuel. Competition within our markets limited our ability to pass on fuel price increases to our customers during the first three quarters of 2008. Our inability to pass on material price increases to our customers could adversely impact our operating income.

- *Controlling Expenses.* Another important aspect of our strategy is controlling costs and enhancing our status as a low-cost building materials supplier in the markets we serve. We pay close attention to managing our working capital and operating expenses. We have a “best practices” operating philosophy, which encourages increasing efficiency, lowering costs, improving working capital, and maximizing profitability and cash flow. We constantly analyze our workforce productivity to achieve the optimum, cost-efficient labor mix for our facilities. Further, we pay careful attention to our logistics function and its effect on our shipping and handling costs.

## **CURRENT OPERATING CONDITIONS AND OUTLOOK**

The deterioration of the housing industry continued throughout 2008. The annualized rate for single-family housings starts at the end of 2008 was 398,000, the lowest level since the U.S. Census Bureau began compiling the data in 1959. For the year, actual single-family housing starts were 622,400, down from 1,046,100 last year, a 40.5% decline. An already weak housing industry was further damaged in 2008 by the financial crisis which limited the availability of credit to homebuilders and potential homebuyers, and the general decline in the economy, among other factors. We felt the impact of these difficult conditions on our 2008 results although we were able to limit the impact through execution of our strategy. Our strategy principally consisted of growing market share, implementing cost containment programs which included reducing physical capacity and adjusting staffing levels, managing credit tightly and, most importantly, conserving cash. Overall, we feel these efforts were successful. We estimate that market share gains reduced our sales decline in 2008 by an estimated 10%. We closed or idled 14 facilities during 2008 including our New Jersey operations. The closures reduced our fixed operating costs and largely allowed us to redeploy sales to other locations to gain efficiencies. We lowered our average headcount by over 1,600, a decrease of 25.2%, from 2007. The reductions in payroll costs coupled with other cost reductions allowed us to reduce our selling, general and administrative expenses by 18.4%. Our bad debt expense in 2008 only increased \$1.4 million from 2007 despite the difficult economic conditions our customers faced. Because of these measures and others, we ended the year with almost \$107 million in cash. We believe these efforts will not only benefit us in the short-term but will allow us to be a more efficient organization in the long-term.

We expect 2009 to continue to be very difficult for the housing industry. In fact, the National Association of Home Builders is forecasting 461,000 single-family housing starts for 2009, a 25.9% decline from 2008. We believe our strategy remains relevant in these conditions and allows us to focus on conserving liquidity while maintaining a viable operating platform. We have aggressively but prudently cut costs during this downturn, and these efforts will continue in 2009. In addition, we believe we can cut costs, continue to offset declining sales through market share gains by expanding our presence in the light commercial and multi-family segments, as well as increasing penetration with our top customers. Finally, we will continue to focus on working capital, to diligently control credit to our customers and also work with our vendors to improve our payment terms and pricing on our products. As stated earlier, we ended 2008 with almost \$107 million in cash. We are also expecting approximately \$35 million in income tax refunds in 2009. The continued execution of our strategy coupled with our available cash and expected income tax refunds in 2009 should provide the liquidity to weather yet another year in this unprecedented downturn.

We still believe that the long-term outlook for the housing industry is positive due to growth in the underlying demographics. At this point, it is unclear if housing activity has hit bottom, but we believe our market leadership, financial strength and industry-leading scale afford us the ability to manage through the downturn. We will continue to work diligently to achieve the appropriate balance of short-term cost reductions while maintaining the expertise to grow the business when market conditions improve. We want to create long-term shareholder value and avoid taking steps that will limit our ability to compete.

## **SEASONALITY AND OTHER FACTORS**

Our first and fourth quarters have historically been, and are expected to continue to be, adversely affected by weather patterns in some of our markets, causing reduced construction activity. In addition, quarterly results historically have reflected, and are expected to continue to reflect, fluctuations from period to period arising from the following:

- The volatility of lumber prices;

- The cyclical nature of the homebuilding industry;
- General economic conditions in the markets in which we compete;
- The pricing policies of our competitors;
- The production schedules of our customers; and
- The effects of weather.

The composition and level of working capital typically change during periods of increasing sales as we carry more inventory and receivables. Working capital levels typically increase in the second and third quarters of the year due to higher sales during the peak residential construction season. These increases have in the past resulted in negative operating cash flows during this peak season, which generally have been financed through available cash. Collection of receivables and reduction in inventory levels following the peak building and construction season have more than offset this negative cash flow. We have also from time to time utilized our credit facility to cover working capital needs if needed.

## RECENT DEVELOPMENTS

### *Goodwill Impairment*

In the third quarter and fourth quarter of 2007, we recorded \$11.9 million and \$5.0 million, respectively, in goodwill impairments on our Ohio reporting unit as the macroeconomic factors relating to this reporting unit continued to decline. Since December 31, 2007, management has closely monitored trends in economic factors and their effects on operating results to determine if an impairment trigger was present that would warrant a reassessment of the recoverability of the carrying amount of goodwill prior to the required annual impairment test in accordance with Statement of Financial Accounting Standards (“SFAS”) No. 142, *Goodwill and Other Intangible Assets*. During the second quarter of 2008, the macroeconomic factors that drive our business declined further prompting management to revise its expectations and perform an interim impairment test related to our Ohio and Florida reporting units, which were significantly underperforming original expectations and which also had a smaller valuation surplus compared to our other reporting units. To determine the estimated fair value of goodwill, we utilized discounted future cash flows. Based on the results of this interim testing, management determined that the carrying value of goodwill for our Florida and Ohio reporting units exceeded their respective estimated fair values and recorded a \$7.5 million pre-tax impairment charge included in asset impairments. We performed our annual impairment test in the fourth quarter of 2008. As a result of a further decline in the macroeconomic factors that drive our business and a decline in the valuation surplus for one of our reporting units, we recorded an additional \$36.4 million pre-tax impairment charge for our Florida reporting unit. We also utilized discounted future cash flows to estimate the fair value of goodwill for our annual impairment test. We have no further goodwill value on the balance sheet for our Ohio and Florida reporting units. We will continue to monitor all of our reporting units that have goodwill, as continued declines in housing activity could result in additional impairment.

### *Long-lived Assets*

We evaluate our long-lived assets, other than goodwill, for impairment when events or changes in circumstances indicate, in management’s judgment, that the carrying value of such assets may not be recoverable. The unfavorable economic factors present throughout the second quarter prompted management to revise its expectations and assess the recoverability of our long-lived assets in certain of our markets in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. Based upon the results of this assessment, we determined the carrying amounts of certain assets exceeded their estimated fair values. We estimated fair value of the assets utilizing discounted future cash flows and other relevant market data and recorded impairment for the amount by which the carrying value exceeded the estimated fair value. We recorded a \$2.3 million charge related to leasehold improvements and a \$4.4 million charge related to customer relationship intangibles, both of which were taken in the second quarter of 2008. In the fourth quarter of 2008, we received an updated estimated market price on land that we currently have classified as held for sale included in other assets, net on the consolidated balance sheet. The fair market value of this land was lower than the carrying value; therefore, we recorded a \$0.4 million charge. We also recorded a \$0.4 million charge related to this land in 2007. We will

continue to evaluate the recoverability of our long-lived assets as continued declines in housing activity could result in additional impairment.

#### ***Valuation Allowance***

We have generated significant deferred tax assets partially due to various goodwill and other long-lived asset impairments that we recorded. We evaluate our deferred tax assets on a quarterly basis to determine whether a valuation allowance is required. In accordance with SFAS No. 109, Accounting for Income Taxes (“SFAS 109”), we assess whether a valuation allowance should be established based on our determination of whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. In light of the continued downturn in the housing market and the uncertainty as to its length and magnitude and the additional asset impairments recorded during 2008, we were in a three-year cumulative loss position. According to SFAS 109, cumulative losses in recent years represent significant negative evidence in considering whether deferred tax assets are realizable, and also generally preclude relying on projections of future taxable income to support the recovery of deferred tax assets. Therefore, during 2008, we recorded a valuation allowance totaling \$41.2 million against primarily all of our net deferred tax assets, of which \$35.5 million related to our continuing operations, \$3.0 million related to other comprehensive (loss) income and \$2.7 million related to our discontinued operations. We excluded the deferred tax liabilities related to certain indefinite lived intangibles when calculating the amount of valuation allowance needed as these liabilities cannot be considered as a source of income when determining the realizability of the net deferred tax assets. The valuation allowance was recorded as a reduction to income tax benefit.

The deferred tax assets for which there is no valuation allowance relate to amounts that can be realized through future reversals of existing taxable temporary differences or through the generation of sufficient taxable income. To the extent we generate sufficient taxable income in the future to fully utilize the tax benefits of the net deferred tax assets on which a valuation allowance was recorded, our effective tax rate may decrease as the valuation allowance is reversed.

#### ***Facility Closure Costs***

During 2008, we developed and executed a plan to close seven facilities located in Indiana, Ohio, North Carolina, Georgia and Texas. The facility closures were primarily due to the continued decline in economic conditions that affected these locations as well as the consolidation of locations in certain markets in an attempt to reduce operating costs. In conjunction with this plan, we began disposing of assets and severing employees. We sold owned real estate related to closed facilities for approximately \$0.9 million resulting in an immaterial loss on the sale. We completed the exit plan prior to December 31, 2008. During 2008, we recognized approximately \$5.0 million in expense related to closed facilities of which \$4.8 million was included in facility closure costs and \$0.2 million was included in interest expense, net in the accompanying consolidated statement of operations.

#### ***Discontinued Operations, net of tax***

In 2006, the specific business climate related to our New Jersey operations declined as housing activity softened and our competitors gained market share. Accordingly, we recognized a pre-tax goodwill impairment charge of \$6.8 million in the third quarter of 2006. We took certain actions including changing our operational management, reducing facilities, targeting new customers and commencing sales of prefabricated components in order to improve our operational performance in our New Jersey market. Despite these efforts, the housing activity and operating results for this reporting unit declined further in 2007. As such, we recorded an additional \$10.6 million pre-tax goodwill impairment and \$0.7 million in asset impairments on our New Jersey operations. As of December 31, 2007, we had no goodwill remaining in our New Jersey reporting unit. In October 2008, we announced our intent to exit the New Jersey market based upon several factors, including the unfavorable conditions that affect our industry and a poor competitive position which prevented us from generating profitable results. The cessation of operations in this market has been treated as a discontinued operation as it had distinguishable cash flow and operations that have been eliminated from our operations. As a result, the operating results of the New Jersey market for the current and prior periods have been aggregated and reclassified as discontinued operations in the consolidated statements of operations for the years ended December 31, 2008, 2007 and 2006. We will have no

further involvement in this market. We completed the exit plan prior to December 31, 2008. The goodwill impairment charges recorded in 2007 and 2006 and the asset impairment charge recorded in 2007 are included in loss from discontinued operations, net of tax in their respective years.

### *Acquisitions*

On December 21, 2007, we acquired certain assets of a distribution facility located in Chelsea, Alabama as a complement to our Bama Truss and Components, Inc. acquisition for cash consideration of \$1.7 million. Of this amount, \$0.1 million was allocated to customer relationships.

On July 31, 2007, we acquired the common stock of Bama Truss and Components, Inc. (“Bama”) for cash consideration of \$17.8 million (including certain adjustments). During 2008, we received \$0.7 million in cash related to the guarantee of acquired accounts receivable and a net tangible asset adjustment. Of the net \$17.1 million cash consideration, \$2.6 million was allocated to customer relationships and \$1.1 million to non-compete agreements, which are being amortized over nine years and two to five years, respectively. In addition, \$7.9 million was allocated to goodwill. Based in Shelby, Alabama, Bama is a market leader in multi-family and light commercial manufactured structural components. Its products include wood roof and floor trusses, wood panels, steel roof trusses and related building materials and services.

On November 3, 2006, we acquired the common stock of Waid Home Center, Inc. (“Waid”) for cash consideration of \$8.8 million (including certain adjustments). During 2007, we received \$1.2 million in cash related to the guarantee of acquired accounts receivable. Of the \$7.6 million net cash consideration, \$0.7 million was allocated to customer relationships and \$0.3 million was allocated to a non-compete agreement, which are being amortized over eight years and five years, respectively. In addition, \$3.3 million was allocated to goodwill. Based in Auburn, Alabama, Waid is a full-line building materials supplier. Its product offerings include: lumber, tools, windows, roofing, molding, paint, sheetrock and insulation.

On April 28, 2006, we acquired the common stock of Freeport Truss Company and certain assets and assumed liabilities of Freeport Lumber Company (collectively “Freeport”) for cash consideration of \$26.6 million (including certain adjustments). Of this amount, \$6.1 million was allocated to customer relationships and \$0.1 million was allocated to a non-compete agreement, which are being amortized over eight years and two years, respectively. In addition, \$13.0 million was allocated to goodwill, which was increased to \$14.2 million in 2007 for purchase price adjustments. Freeport is a market-leading truss manufacturer and building material distributor in the Florida panhandle area. Its products include manufactured roof and floor trusses, as well as other residential building products such as lumber and lumber sheet goods, hardware, millwork, doors and windows.

These acquisitions were accounted for by the purchase method, and accordingly the operating results are included in our consolidated financial statements from the acquisition date. Under this method, the purchase price was allocated to the assets acquired and liabilities assumed based on estimated fair values at the acquisition date. The excess of the purchase price over the estimated fair value of the net assets acquired and liabilities assumed was recorded as goodwill. Pro forma results of operations are not presented as these acquisitions are not material.

## RESULTS OF OPERATIONS

The following table sets forth the percentage relationship to sales of certain costs, expenses and income items for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Sales .....	100.0%	100.0%	100.0%
Cost of sales .....	<u>78.4%</u>	<u>75.4%</u>	<u>73.7%</u>
Gross margin .....	21.6%	24.6%	26.3%
Selling, general and administrative expenses .....	28.3%	23.4%	19.5%
Asset impairments .....	4.9%	1.1%	—%
Facility closure costs .....	<u>0.5%</u>	<u>0.0%</u>	<u>0.0%</u>
(Loss) income from operations .....	(12.1)%	0.1%	6.8%
Interest expense, net .....	2.5%	1.8%	1.3%
Income tax (benefit) expense .....	<u>(1.8)%</u>	<u>(0.7)%</u>	<u>2.1%</u>
(Loss) income from continuing operations .....	(12.8)%	(1.0)%	3.4%
Loss from discontinued operations, net of tax .....	<u>(0.7)%</u>	<u>(0.6)%</u>	<u>(0.2)%</u>
Net (loss) income .....	<u>(13.5)%</u>	<u>(1.6)%</u>	<u>3.2%</u>

### 2008 Compared with 2007

Macroeconomic factors continued to decline sharply in 2008 as both housing starts, and commodity lumber and lumber sheet goods prices, were down year-over-year. Housing starts in our markets decreased approximately 42.5% while market prices for lumber and lumber sheet goods were on average approximately 8.4% lower than 2007.

*Sales.* Sales for the year ended December 31, 2008, were \$1,034.5 million, a 32.4% decrease from sales of \$1,530.5 million for 2007. The decline in our sales was primarily due to the decline in single family housing starts in our markets. We were able to mitigate some of the decline by expanding into the multi-family and light commercial segment. Additionally, we were able to largely hold our share with our Builder 100 customers. Both of these items contributed to an approximate 10% market share growth in 2008. However, we were limited in growing our market share with custom builders due to our tight credit standards. Although these tight credit standards reduce our growth potential, they also limit our exposure to large write-offs in future quarters.

The following table shows sales classified by major product category (dollars in millions):

	<u>2008</u>		<u>2007</u>		<u>% Change</u>
	<u>Sales</u>	<u>% of Sales</u>	<u>Sales</u>	<u>% of Sales</u>	
Prefabricated components .....	\$ 204.7	19.8%	\$ 316.2	20.7%	(35.3)%
Windows & doors .....	255.9	24.7%	358.9	23.5%	(28.7)%
Lumber & lumber sheet goods .....	247.6	23.9%	406.0	26.5%	(39.0)%
Millwork .....	107.6	10.4%	151.8	9.9%	(29.1)%
Other building products & services .....	<u>218.7</u>	<u>21.2%</u>	<u>297.6</u>	<u>19.4%</u>	<u>(26.5)%</u>
Total sales .....	<u>\$1,034.5</u>	<u>100.0%</u>	<u>\$1,530.5</u>	<u>100.0%</u>	<u>(32.4)%</u>

We have felt the negative effect of decreased housing starts across all our product categories primarily due to volume declines. For the lumber & lumber sheet goods category, our unit volume accounted for 91.1% of our sales decline in this product category while our prices accounted for 8.9% of the decline. This equates to \$144.3 million and \$14.1 million in sales declines due to volume and price, respectively.

Our sales mix continued to shift toward manufactured and value added products and away from lumber & lumber sheet goods, which have fewer barriers to entry and therefore is more competitive. Other building products

and services has continued to increase as a percentage of total sales. This category grew due to expansion of our installation services in the multi-family and light commercial segments. We believe our installation business and our value-added products and services give us a competitive advantage helping us to attract new business during the down cycle.

*Gross Margin.* Gross margin decreased \$153.3 million to \$223.2 million. The gross margin percentage decreased from 24.6% in 2007 to 21.6% in 2008, a 3.0 percentage point decline. Our gross margin percentage decreased by 1.9 percentage points due to price, 0.9 percentage points due to volume (which is fixed costs within cost of goods sold) and 0.2 percentage points due to a shift in sales mix toward installed product sales, which carry a lower gross margin percentage. We experienced margin compression across all product categories due to competition and lower sales volumes against fixed costs in our manufacturing facilities; however, gross margins started to stabilize as the year progressed. If economic conditions continue to deteriorate, we could see further margin compression.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses decreased \$66.0 million, or 18.4%. Average full-time equivalent employee headcount decreased 21.9% compared to 2007, while our salaries and benefits, excluding stock compensation, decreased \$49.5 million, or 23.3%, compared to a 30.4% decline in sales volume. We will continue to consider in-market consolidations and facility closures based on specific market conditions. Additionally, our office general and administrative expense decreased \$11.3 million, which included a \$2.0 million decrease in professional services fees. As an offset to these declines, our stock comp expense increased \$1.5 million, transaction costs associated with cancelled acquisitions increased \$1.7 million, and our bad debt expense increased \$1.4 million as our customers were affected by the continued decline in housing starts and the limited availability of credit in the financial markets. We have responded to the increase in bad debt expense by continuing to tighten our credit standards, lowering credit limits, and in some cases requiring collateral.

As a percent of sales, selling, general and administrative expenses increased from 23.4% in 2007 to 28.3% in 2008. Salaries and benefit expense as a percentage of sales increased 1.9%, stock compensation expense increased 0.4%, occupancy by 0.8% due to the fixed nature of the category, and delivery costs by 1.3% due to higher fuel costs. We continue to monitor our operating cost structure closely and make adjustments as necessary.

*Interest Expense, net.* Interest expense was \$25.7 million in 2008, a decrease of \$2.1 million. The decrease was due to a combination of lower debt balances in 2008 and lower interest rates. Additionally, we wrote off approximately \$1.6 million of unamortized deferred debt issuance costs related to the repayment of a term loan and cancellation of the \$110 million revolving credit facility and \$15 million pre-funded letter of credit facility in 2007. These decreases to interest expense were partially offset by decreased interest income primarily due to lower interest rates in 2008.

*Income Tax (Benefit) Expense.* We recognized an income tax benefit of \$18.9 million, or a 12.5% tax benefit rate, and \$12.1 million, or a 44.8% tax benefit rate for the years ended December 31, 2008 and 2007, respectively. The income tax benefit rate in the current year was affected by a non-cash valuation allowance on continuing operations of \$35.5 million recorded as a reserve against primarily all of our net deferred tax assets. Excluding the effect of the valuation allowance, the effective tax rate for 2008 was 36.1% compared to an effective tax rate of 44.8% for 2007. During the second quarter of 2007, tax legislation was enacted in one of our filing jurisdictions that increased the tax rate at which loss carryforwards can be utilized in the future. We increased the value of our deferred tax asset related to these loss carryforwards by approximately \$1.4 million based on the provisions outlined in the legislation. The adjustment was recorded as an increase to income tax benefit for the year ended December 31, 2007.

### **2007 Compared with 2006**

Macroeconomic factors continued to decline sharply in 2007 as both housing starts and commodity lumber and lumber sheet goods prices were down year-over-year. This decline began in the second half of 2006 after record quarters in the first half of that year. In 2007, housing starts in our markets decreased approximately 35% and market prices for lumber and lumber sheet goods were on average approximately 14% lower than 2006.

*Sales.* Sales for the year ended December 31, 2007 were \$1,530.5 million, a 29.0% decrease from sales of \$2,156.2 million for 2006. The following table shows sales classified by major product category (dollars in millions):

	2007		2006		% Change
	Sales	% of Sales	Sales	% of Sales	
Prefabricated components . . . . .	\$ 316.2	20.7%	\$ 443.3	20.6%	(28.6)%
Windows & doors . . . . .	358.9	23.5%	461.1	21.4%	(22.2)%
Lumber & lumber sheet goods . . . . .	406.0	26.5%	688.5	31.9%	(41.0)%
Millwork . . . . .	151.8	9.9%	199.1	9.2%	(23.8)%
Other building products & services . . . . .	297.6	19.4%	364.2	16.9%	(18.3)%
Total sales . . . . .	<u>\$1,530.5</u>	<u>100.0%</u>	<u>\$2,156.2</u>	<u>100.0%</u>	<u>(29.0)%</u>

Our sales during the year were primarily effected by the decline in housing starts and to a lesser extent by commodity price deflation. We continued to improve our sales mix during the year, but felt the negative effect of decreased housing starts across all our product categories. Lumber & lumber sheet goods, and to a lesser extent prefabricated components, are heavily influenced by commodity price deflation. Lumber & lumber sheet goods market prices reduced our total sales by approximately 3%. The decline in housing activity within our markets prompted increased competitive conditions. We responded by lowering our prices to customers in the lumber & lumber sheet goods category, reducing total sales by an estimated 1.6% for the year ended December 31, 2007. For the lumber & lumber sheet goods category, our unit volume declined 27.7% compared to an estimated 34.6% decline in housing starts in our markets while our prices declined 13.3%. This equates to \$191.0 million and \$91.5 million in sales declines due to unit volumes and price, respectively.

Our focus on growing our manufactured windows and installation business mitigated some of the downward pressure from decreased housing activity. As our homebuilder customers downsized their operations, they increasingly utilized our turn-key installation services.

*Gross Margin.* Gross margin decreased \$189.9 million, or 33.5%. The gross margin percentage decreased from 26.3% in 2006 to 24.6% in 2007. The largest decline was in the lumber & lumber sheet goods category, which declined \$71.5 million. Our gross margin dollars decreased primarily due to lower sales volume and price concessions to our customers in response to increasingly competitive conditions. The de-leveraging of lower sales volumes to fixed costs of sales lowered our gross margins by approximately 0.9 percentage points. Lower prices on lumber & lumber sheet goods contributed 0.6 percentage points to the decline. In addition, the increased percentage of installed sales, which traditionally carry lower gross margins, had a negative impact on our gross margins in 2007. The overall decline in gross margin percentage was partially mitigated by a favorable change in sales mix toward higher margin products such as millwork and windows and doors.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses decreased \$62.1 million, or 14.8%. Our salaries and benefits expense, excluding stock-based compensation expense, decreased \$56.7 million, or 21.0%, while our full-time equivalent headcount decreased 18.3%. Part of this reduction in headcount was from the closing of some of our regional headquarters and idling production at certain facilities in our efforts to optimize efficiencies across the organization. Additionally, professional services fees decreased \$2.7 million, primarily related to the decrease in audit and other fees related to the implementation of Sarbanes Oxley in 2006. As an offset to these declines, we saw an increase in our bad debt expense of \$2.7 million as our customers work through the difficulties of the housing downturn. We have responded to the increase in bad debt expense by tightening our credit standards and lowering credit limits.

As a percent of sales, selling, general and administrative expenses increased from 19.5% in 2006 to 23.4% in 2007. Pricing on commodity lumber products had a negative effect in 2007 of approximately 1.3%. In addition, incremental stock compensation expense increased selling, general and administrative expenses as a percentage of sales by 0.3%. The remaining 2.3% increase is due to fixed costs, which do not adjust lower with declining sales volume.

*Interest Expense, net.* Interest expense was \$27.7 million in 2007, a decrease of \$1.0 million. The decrease was primarily attributable to \$2.4 million of increased interest income related to higher cash balances and

\$0.2 million of lower interest expense resulting from lower debt balances in 2007 which was partially offset by a \$1.6 million write-off of unamortized deferred debt issuance costs related to the repayment of the term loan and cancellation of the \$110 million revolving credit facility and \$15 million pre-funded letter of credit.

*Income Tax (Benefit) Expense.* The effective tax rate increased to 44.8% for the year ended December 31, 2007, compared to 37.9% for the year ended December 31, 2006. During the second quarter of 2007, tax legislation was enacted in one of our filing jurisdictions that increased the tax rate at which loss carryforwards can be utilized in the future. We increased the value of our deferred tax asset related to these loss carryforwards by approximately \$1.4 million based on the provisions outlined in the legislation. The adjustment was recorded as an increase to income tax benefit for the year ended December 31, 2007.

## **LIQUIDITY AND CAPITAL RESOURCES**

Our primary capital requirements are to fund working capital needs, meet required interest and principal payments, fund capital expenditures and acquisitions, and pay dividends, if any, on our common stock. In the past, our capital resources have primarily consisted of cash flows from operations and borrowings under our credit facility. The homebuilding industry and therefore our industry, have been in a severe and significant downturn for almost three years. We expect this downturn to continue through at least 2009. Beyond 2009, it is difficult for us to predict what will happen in our industry as a number of factors will determine the length of this downturn, including availability of credit for homebuilders and potential home buyers, potential foreclosures, existing home inventory, and interest rates. With the sustained downturn and the anticipated continued decline in macroeconomic conditions, our operations are no longer providing positive cash flows, and we are not expecting our cash flows from operations to be positive in the near term.

Our cash on hand was \$106.9 million at December 31, 2008. Our net borrowing availability in excess of the \$35 million liquidity covenant at December 31, 2008 was zero due to a combined 30% decline in accounts receivable and inventory balances (“borrowing base”), which are used to calculate the available borrowing capacity, coupled with lower seasonal advance rates set forth under the credit facility. Approximately \$12.8 million of cash on hand at year-end supported a short-fall in the calculation of the \$35 million minimum liquidity covenant contained in the credit facility. This covenant calculates as eligible borrowing base minus outstanding borrowings must exceed \$35 million or we are required to meet a fixed charge coverage ratio, which we currently would not meet. However, the calculation also allows cash on deposit with the agent to be included as eligible borrowing base. Absent the use of cash in the calculation, we would have been forced to repay \$12.8 million in borrowings in order to comply with the covenant. Accordingly, our available cash was \$94.1 million at December 31, 2008. We anticipate this shortfall in eligible borrowing base to dissipate by March 2009, when our advance rates increase in accordance with the credit facility.

Since the beginning of the housing downturn, a primary focus has been on protecting our liquidity. We have implemented an action plan consisting of growing market share, reducing physical capacity, adjusting staffing levels, implementing cost containment programs, managing credit tightly, and most importantly, conserving cash. Although we felt the impact of the difficult conditions, we were able to limit it through this action plan. Overall, we believe our efforts were successful as we ended 2008 with \$94.1 million in available cash. We will continue to execute this strategy in 2009. With this continued strategy execution, \$94.1 million in available cash and almost \$35 million in expected income tax refunds in 2009, we believe we will have sufficient capital to meet our anticipated short-term needs, including capital expenditures and debt obligations for 2009. Key assumptions considered in making this assessment were single-family housing starts ranging from 350,000 to 500,000, market share gains consistent with that achieved in 2008, market prices for commodity products stable with 2008, stable to only slight declines in product gross margins, continued ability to lower operating costs principally in salaries and benefits expense, timely receipt of our expected income tax refunds, and consistent advance rates under our credit facility year-over-year. Should housing conditions deteriorate greater than expected or other assumptions prove to be incorrect, our action plans will expand to include further facility closures, attempts to renegotiate leases, increased headcount reductions and the potential divestitures of non-core business.

Our focus on liquidity extends beyond just 2009. Although an improvement in housing activity is generally expected toward the end of 2009, we have set an action plan for 2009 designed to provide us with sufficient liquidity

to extend through 2010 even with no appreciable improvement in housing activity. However, there are no assurances that these steps will prove successful if the housing downturn is steeper or more protracted than general expectations. Should the current economic conditions continue beyond what we have planned in our 2009 action plan or deteriorate further, subsequent to 2009 we may be required to raise external funds through the sale of common stock or debt in the public capital markets or in privately negotiated transactions. There can be no assurance that any such financing would be available on favorable terms, if at all. In assessing our liquidity, key components include our net loss, current assets and current liabilities. For assessing our long-term liquidity, we also consider our debt and long-term liabilities.

### ***Consolidated Cash Flows***

Cash used in operating activities in 2008 was \$28.9 million compared to cash provided by operating activities in 2007 of \$71.5 million. The decline was essentially due to an increase in operating loss primarily as a result of the decrease in our sales and profitability. This decrease in operating cash provided by operating activities was also affected by changes in working capital. Although we continue to aggressively manage working capital, we have seen an increase in the number of days outstanding for our accounts receivable. This increase is directly related to the downturn in the homebuilding industry and the limited access to credit for our homebuilding customers. Our inventory turns decreased due to rapidly declining housing starts and increased difficulty matching our order quantities to obtain the best price with the much lower sales volumes in 2008. Our accounts payable days have increased slightly as we continue to work with our vendors to extend our payment terms. We expect to face similar asset management challenges in 2009, but we will continue to aggressively manage working capital.

Cash provided by operating activities decreased \$40.4 million, or 36.1%, in 2007 compared to 2006. The decrease was primarily due to a decrease from operating income to an operating loss primarily as a result of the decrease in our sales and profitability. This decrease in operating cash provided by operating activities was also affected by changes in working capital. Although we continue to aggressively manage working capital, we saw an increase in the number of days outstanding for our accounts receivable. This increase was directly related to the downturn in the homebuilding industry. Our inventory turns were slightly less as we tried to react responsively to the declining market conditions. Our accounts payable days increased as we continued to work with our vendors to extend our payment terms.

Cash used for investing activities decreased \$24.0 million in 2008 compared to 2007. The decrease was partially due to a \$1.9 million decrease in capital expenditures to a maintenance level to conserve capital. Additionally, we had an increase of \$3.2 million of proceeds from the sale of real estate from closed facilities and excess equipment as we reduce our fleet in response to the decline in demand. We also used \$18.3 million in cash to purchase a supplier of multi-family and light commercial manufactured structural components and a distribution facility in 2007 and made no acquisitions in 2008.

Cash used for investing activities decreased \$34.5 million in 2007 compared to 2006. The decrease was partially due to a \$17.1 million decrease in capital expenditures as we strive to conserve capital in the current operating environment. We used cash of \$18.3 million to purchase a supplier of multi-family and light commercial manufactured structural components and a distribution facility in 2007 compared to \$35.4 million to purchase suppliers of prefabricated components and building materials in 2006.

Net cash provided by financing activities was \$40.5 million in 2008 compared to net cash used in financing activities of \$40.9 million in 2007. The primary source of funds in 2008 was \$40.0 million in net borrowings under our revolving credit facility. The primary uses of cash in 2007 were the permanent retirement of the remaining balance of the term loan and payment of deferred loan costs related to the \$350 million revolving credit facility.

Net cash used in financing activities was \$40.9 million in 2007 compared to net cash provided by financing activities of \$11.5 million in 2006. The primary uses of cash in 2007 were the permanent retirement of the remaining balance of the term loan and payment of deferred loan costs related to the new revolving credit facility. Proceeds from the exercise of stock options provided cash of \$11.9 million in 2006 compared to \$4.2 million in 2007.

## *Capital Resources*

In December 2007, we entered into a \$350 million revolving credit facility (the "Facility") with a consortium of banks led by Wachovia Bank, N.A. Also participating in the facility are UBS Securities LLC and General Electric Capital Corporation. The Facility provides for a \$350 million revolving credit line which is available for working capital and general corporate purposes. The available borrowing capacity, or borrowing base, is derived primarily from a percentage of the Company's eligible accounts receivable and inventory, as defined by the agreement. The Facility is scheduled to mature five years from the date of execution and replaced the \$110 million long-term revolving credit line, which was scheduled to mature in February 2010, and the \$15 million pre-funded letter of credit facility, which was scheduled to mature in August 2011. Subsequent to year-end, we reduced the Facility from \$350 million to \$250 million as allowed by the revolving credit facility agreement. Our available borrowing capacity at December 31, 2008 would not have been affected by this reduction as eligible accounts receivable and inventory balances, which are used to calculate the available borrowing capacity, would not have supported borrowings of \$250 million. We do not anticipate that our borrowing base will support borrowings in excess of \$250 million at any point during the remaining life of the credit facility. This reduction will allow us to reduce our interest expense related to commitment fees. In the first quarter of 2009, we will expense \$1.2 million in unamortized debt issuance costs related to the reduction in the Facility.

Interest rates under the Facility are based on a base rate plus an applicable margin. The base rate is the larger of the rate determined by the administrative agent or the Federal Funds Rate plus one-half percent, as each term is defined by the agreement. A variable commitment fee, currently 0.425%, is charged on the unused amount of the revolver based on the most recent previous quarterly average excess availability. We had \$40.0 million in outstanding borrowings under the Facility at December 31, 2008. The weighted average interest rate on the borrowings outstanding under the Facility was 3.75% at December 31, 2008.

Loans are collateralized by substantially all of our assets, primarily accounts receivable and inventory, and are guaranteed by us and certain of our subsidiaries. The Facility has certain restrictive covenants, which, among other things, relate to the payment of dividends, incurrence of indebtedness, and asset sales. The Facility also has a fixed charge coverage ratio of 1:1 that is triggered if our available borrowing capacity, as determined under the borrowing base formula, is less than \$35 million. At December 31, 2008, our net available borrowing capacity in excess of the \$35 million minimum liquidity covenant was zero. Approximately \$12.8 million of cash on hand at year-end supported a short-fall in the calculation of the \$35 million minimum liquidity covenant. The covenant calculates as eligible borrowing base less outstanding borrowings. The calculation also allows cash on deposit with the agent to be included as eligible borrowing base. At December 31, 2008, we had cash on deposit with the agent to support the shortfall in the available borrowing capacity; therefore, the minimum liquidity covenant was not triggered. If the \$35 million minimum liquidity covenant would have been triggered, we would not have been able to meet the fixed charge coverage ratio in 2008. Based on our 2009 forecast, we will not meet the fixed charge coverage ratio, but we anticipate that we would not fall below the \$35 million minimum liquidity covenant in 2009; therefore, we would not trigger the fixed charge coverage ratio requirement.

On February 11, 2005, we issued \$275.0 million in aggregate principal amount of second priority senior secured floating rate notes due in 2012. Interest accrues on the floating rate notes at a rate of LIBOR plus 4.25% and is payable quarterly in arrears. The LIBOR rate is reset at the beginning of each quarterly period. At any time on or after February 15, 2007, we can redeem some or all of the notes at a redemption price equal to par plus a specified premium that declines ratably to par. In the event of a change in control (as defined in the indenture), we may be required to offer to purchase the notes at a purchase price equal to 101% of the principal, plus accrued and unpaid interest. We completed an exchange offer relating to the notes in 2005. As a result, the notes are registered under the Securities Act.

The floating rate notes are jointly and severally guaranteed by all of our subsidiaries and collateralized by (1) a pledge of the common stock of certain of our subsidiaries and (2) a security interest in substantially all tangible and intangible property and proceeds thereof now owned or hereafter acquired by us and substantially all our subsidiaries. The parent company has no independent assets or operations, and the guarantees are full and unconditional. The indenture governing the floating rate notes contains covenants that limit our ability and the ability of our restricted subsidiaries to, among other things: incur additional indebtedness, pay dividends or make other distributions, incur liens, enter into certain types of transactions with affiliates, encounter a change of control,

create restrictions on the payment of dividends or other amounts to us by our restricted subsidiaries and sell all or substantially all of our assets or merge with or into other companies.

In 2005, we entered into two interest rate swap agreements in order to obtain a fixed rate with respect to \$200.0 million of our outstanding floating rate debt and thereby reduce our exposure to interest rate volatility. The interest rate swaps qualified as fully effective, cash-flow hedging instruments. Therefore, all changes in fair value of the qualifying cash flow hedges were reported in other comprehensive (loss) income and reclassified into earnings in the same period in which the hedge transactions affect earnings. At December 31, 2007, the fair value of these interest rate swaps was a receivable of \$0.6 million. In January 2008, we cancelled one of the two interest rate swap agreements. We cancelled the agreement that started July 1, 2005 whereby we paid a fixed rate of 4.12% and received a variable rate at 90 day LIBOR. The settlement fees related to the cancellation of this interest rate swap agreement were minimal. The second swap agreement matured on May 15, 2008.

In the first quarter of 2008, we entered into three new interest rate swap agreements with notional amounts of \$100.0 million, \$50.0 million, and \$50.0 million, respectively. The swap agreements are three-year swaps that fix \$200.0 million of our outstanding floating rate notes at a weighted average interest rate of 7.41%, including an applicable margin. We are paying a fixed rate at 3.25%, 3.17% and 2.99%, respectively, on the swaps and receive a variable rate at 90 day LIBOR. The swaps were effective on May 15, 2008.

The interest rate swaps qualify as fully effective, cash-flow hedging instruments. Therefore, all changes in fair value of the qualifying cash flow hedges are reported in other comprehensive (loss) income and reclassified into earnings in the same period in which the hedge transactions affect earnings. At December 31, 2008, the fair value of the interest rate swaps was a payable of \$7.7 million. The weighted-average interest rate at December 31, 2008 for the floating rate notes was 7.14%, including the effect of the interest rate swaps.

Long-term debt consisted of the following as of December 31:

	<u>2008</u>	<u>2007</u>
	(In thousands)	
Revolving credit facility . . . . .	\$ 40,000	\$ —
Floating rate notes . . . . .	275,000	275,000
Other long-term debt* . . . . .	<u>4,226</u>	<u>4,266</u>
	319,226	279,266
Less: current portion of long-term debt . . . . .	<u>44</u>	<u>40</u>
Total long-term debt, net of current maturities* . . . . .	<u>\$319,182</u>	<u>\$279,226</u>

\* We completed construction on a new multi-purpose facility during 2006. Other long-term debt represents an unfunded lease obligation for this facility. For accounting purposes, we are deemed the owner. As a result, the building and the offsetting long-term lease obligation are included on the consolidated balance sheet as a component of fixed assets and other debt, respectively. The building is being depreciated over its useful life, and the lease obligation is being amortized such that there will be no gain or loss recorded if the lease is not extended at the end of the term.

**Capital Expenditures**

Capital expenditures vary depending on prevailing business factors, including current and anticipated market conditions. Historically, capital expenditures have for the most part remained at relatively low levels in comparison to the operating cash flows generated during the corresponding periods. In response to the continued decline in market conditions in 2008, we limited our capital expenditures to \$8.2 million in our efforts to conserve capital. Although we cannot predict the duration of the current market conditions, we anticipate that housing conditions will continue to be difficult in 2009. As a result, we expect our 2009 capital expenditures to be approximately \$2 to \$5 million. We anticipate that throughout the downturn capital expenditures will focus primarily on maintenance of our current assets.

## DISCLOSURES OF CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

The following summarizes the contractual obligations of the company as of December 31, 2008 (in thousands):

Contractual obligations	Total	Payments Due by Period				
		Less than 1 year	1-3 years	4 years	5 years	After 5 years
Long-term debt . . . . .	\$319,226	\$ 44	\$315,157	\$ 63	\$ 69	\$ 3,893
Interest on long-term debt(1) . . . .	71,299	22,114	46,410	370	363	2,042
Operating leases . . . . .	145,665	34,138	62,888	12,548	10,685	25,406
Uncertain tax positions(2) . . . . .	—	—	—	—	—	—
Total contractual cash obligations . . . . .	<u>\$536,190</u>	<u>\$56,296</u>	<u>\$424,455</u>	<u>\$12,981</u>	<u>\$11,117</u>	<u>\$31,341</u>

(1) Interest based on LIBOR rate of 1.24% and Prime rate of 3.25% at February 4, 2009. Interest on long-term debt reflects interest rate swap agreements effective through May 2011. Actual interest may differ from the amounts presented above based on LIBOR fluctuations.

(2) We have \$1.3 million of uncertain tax positions recorded in long-term liabilities or as a reduction to operating loss carryforwards. We also have \$0.3 million in interest and penalties accrued related to these uncertain tax positions. It is not reasonably possible to predict at this time when (or if) any of these amounts will be settled.

The amounts reflected in the table above for operating leases represent future minimum lease payments under non-cancelable operating leases with an initial or remaining term in excess of one year at December 31, 2008. Purchase orders entered into in the ordinary course of business are excluded from the above table because they are payable within one year. Amounts for which we are liable under purchase orders are reflected on our consolidated balance sheet as accounts payable and accrued liabilities.

## OTHER CASH OBLIGATIONS NOT REFLECTED IN THE BALANCE SHEET

In accordance with accounting principles generally accepted in the United States, commonly referred to as GAAP, our operating leases are not recorded in our balance sheet. In addition to the lease obligations included in the above table, we have residual value guarantees on certain equipment leases. Under these leases we have the option of (1) purchasing the equipment at the end of the lease term, (2) arranging for the sale of the equipment to a third party, or (3) returning the equipment to the lessor to sell the equipment. If the sales proceeds in either case are less than the residual value, then we are required to reimburse the lessor for the deficiency up to a specified level as stated in each lease agreement. The guarantees under these leases for the residual values of equipment at the end of the respective operating lease periods approximated \$7.8 million as of December 31, 2008.

Based upon the expectation that none of these leased assets will have a residual value at the end of the lease term that is materially less than the value specified in the related operating lease agreement, we do not believe it is probable that we will be required to fund any amounts under the terms of these guarantee arrangements. Accordingly, no accruals have been recognized for these guarantees.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Critical accounting policies are those that both are important to the accurate portrayal of a company's financial condition and results, and require subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

In order to prepare financial statements that conform to GAAP, we make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Certain estimates are particularly sensitive due to their significance to the financial statements and the possibility that future events may be significantly different from our expectations.

We have identified the following accounting policies that require us to make the most subjective or complex judgments in order to fairly present our consolidated financial position and results of operations.

*Vendor Rebates.* Many of our arrangements with our vendors provide for us to receive a rebate of a specified amount payable to us when we achieve any of a number of measures, generally related to the volume of purchases from our vendors. We account for these rebates as a reduction of the prices of the vendor's products, which reduces inventory until we sell the product, at which time these rebates reduce cost of sales. Throughout the year, we estimate the amount of rebates based upon our historical level of purchases. We continually revise these estimates to reflect actual purchase levels.

If market conditions were to change, vendors may change the terms of some or all of these programs. Although these changes would not affect the amounts which we have recorded related to product already purchased, it may impact our gross margins on products we sell or sales earned in future periods.

*Allowance for Doubtful Accounts and Related Reserves.* We maintain an allowance for doubtful accounts for estimated losses due to the failure of our customers to make required payments. We perform periodic credit evaluations of our customers and typically do not require collateral. However, as industry conditions have continued to decline, we have, in some cases, required customers to collateralize their debt to us. Consistent with industry practices, we generally require payment from most customers within 30 days. As our business is seasonal in certain regions, our customers' businesses are also seasonal. Sales are lowest in the winter months, and our past due accounts receivable balance as a percentage of total receivables generally increases during this time. Throughout the year, we record estimated reserves based upon our historical write-offs of uncollectible accounts, taking into consideration certain factors, such as aging statistics and trends, customer payment history, independent credit reports, and discussions with customers.

Periodically, we perform a specific analysis of all accounts past due and write off account balances when we have exhausted reasonable collection efforts and determined that the likelihood of collection is remote. We charge these write-offs against our allowance for doubtful accounts. Due to the current decline in the macroeconomic factors that affected our customers' business, we have experienced higher than normal past due account balances and have increased our allowance for doubtful accounts as a result. We anticipate that until the macroeconomic factors that affect our customers' businesses stabilize and improve, we may continue to see an increase in our allowance for doubtful accounts. In response to these conditions, we have tightened our credit standards, lowered credit limits to some of our customers, and in some cases discontinued allowing credit or required collateral to support outstanding receivable balances.

*Impairment of Long-Lived Assets.* Long-lived assets, including property and equipment, are reviewed for possible impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. Our judgment regarding the existence of impairment indicators is based on market and operational performance. Determining whether impairment has occurred typically requires various estimates and assumptions, including determining which cash flows are directly related to the potentially impaired asset, the useful life over which cash flows will occur, their amount, and the asset's residual value, if any. In turn, measurement of an impairment loss requires a determination of fair value, which is based on the best information available. We use internal cash flow estimates, quoted market prices when available and independent appraisals as appropriate to determine fair value. We derive the required cash flow estimates from our historical experience and our internal business plans and apply an appropriate discount rate. If these projected cash flows are less than the carrying amount, an impairment loss is recognized based on the fair value of the asset.

We recorded a \$2.3 million charge related to leasehold improvements and a \$4.4 million charge related to customer relationship intangibles in the second quarter of 2008. In the fourth quarter of 2008, we received an updated estimated market price on land that we currently have classified as held for sale included in other assets, net on the consolidated balance sheet. The fair market value of this land was lower than the carrying value; therefore, we recorded a \$0.4 million charge. We also recorded a \$0.4 million charge related to this land in 2007.

*Goodwill.* Goodwill represents the excess of the amount we paid to acquire businesses over the estimated fair value of tangible assets and identifiable intangible assets acquired, less liabilities assumed. At December 31, 2008, our goodwill balance was \$111.2 million, representing 21.3% of our total assets.

We test goodwill for impairment in the fourth quarter of each year or at any other time when impairment indicators exist by comparing the estimated implied value of a reporting units' goodwill to its book value. If its book

value of goodwill exceeds its estimated implied value of goodwill, we recognize the difference as an impairment loss in operating income. Examples of such indicators that could cause us to test goodwill for impairment between annual tests include a significant change in the business climate, unexpected competition, significant deterioration in market share or a loss of key personnel. Our industry has been in a significant and severe downturn for the past three years. In this environment, we have closely monitored the trends in economic factors and their effects on operating results to determine if an impairment trigger was present that would warrant a reassessment of the recoverability of the carrying amount of goodwill prior to the required annual impairment test in accordance with SFAS No. 142, Goodwill and Other Intangible Assets and performed interim impairment tests when warranted. The macroeconomic factors that affect our industry, primarily the continued decline in housing starts, have caused us to re-evaluate our expectations for a number of our reporting units. Housing starts are a significant sales driver for us. If there is a significant decline or an expected decline in housing starts, this could adversely affect our expectations for a reporting unit and the value of that reporting unit. Additionally, since September 30, 2008, our stock price has been adversely affected by the significant decline in the overall stock market. With the decline in our stock price, our market capitalization has also declined. For our 2008 annual impairment test, we believe that the decline in market capitalization was a contributing factor, but not the overriding factor in determining the need to recognize additional impairment. The overriding factor was the continued decline in the macroeconomic conditions that affect our industry, specifically housing starts in our markets which were down 42.5% from 2007 and 45.6% in the fourth quarter of 2008 compared to the fourth quarter of 2007. We recognized goodwill impairments of \$44.0 million and \$16.9 million which were included in asset impairments in our consolidated statements of operations in Item 8 on this annual report on Form 10-K in 2008 and 2007, respectively. We did not have any goodwill impairments for continuing operations in 2006.

The process of evaluating goodwill for impairment involves the determination of fair value of our reporting units. Inherent in such fair value determinations are certain judgments and estimates relating to future cash flows, including our interpretation of current economic indicators and market valuations and assumptions about our strategic plans with regard to our operations. Due to the uncertainties associated with such estimates, actual results could differ from such estimates resulting in further impairment of goodwill.

In performing our impairment analysis, we developed a range of fair values for our reporting units using a discounted cash flow methodology. The discounted cash flow methodology establishes fair value by estimating the present value of the projected future cash flows to be generated from the reporting unit. The discount rate applied to the projected future cash flows to arrive at the present value is intended to reflect all risks of ownership and the associated risks of realizing the stream of projected future cash flows. The discounted cash flow methodology uses our projections of financial performance for a five-year period. The most significant assumptions used in the discounted cash flow methodology are the discount rate, the terminal value and the expected future revenues, gross margins and operating margins, which vary among reporting units. Significant assumptions used in our financial projections include housing starts, lumber commodity prices, and market share gains.

*Deferred Income Taxes.* In accordance with SFAS No. 109, *Accounting for Income Taxes*, we assess whether it is more likely than not that some or all of our deferred tax assets will not be realized. We consider the reversal of existing deferred tax liabilities, future taxable income, and tax planning strategies in our assessment. We have certain state income tax carryforwards where we believe it is unlikely that we will realize the benefits associated with these tax carryforwards and have established a valuation allowance against our deferred tax assets. Changes in our estimates of future taxable income and tax planning strategies will affect our estimate of the realization of the tax benefits of these tax carryforwards. Additionally, in light of the continued downturn in the housing market and the uncertainty as to its length and magnitude, and due to the additional asset impairments recorded during 2008, we were in a three-year cumulative loss position. According to SFAS 109, cumulative losses in recent years represent significant negative evidence in considering whether deferred tax assets are realizable, and also generally preclude relying on projections of future taxable income to support the recovery of deferred tax assets. Therefore, during 2008, we recorded a valuation allowance totaling \$41.2 million against primarily all of our net deferred tax assets of which \$35.5 million related to our continuing operations, \$3.0 million related to other comprehensive (loss) income, and \$2.7 million related to our discontinued operations. Further declines in housing activity could cause us to establish additional valuation allowances. To the extent we generate sufficient taxable income in the

future to fully utilize the tax benefits of the related net deferred tax assets, we may reverse some or all of the valuation allowances.

*Insurance Deductible Reserve.* We have large deductibles for general liability, auto liability and workers' compensation insurance. The expected liability for unpaid claims falling within our deductible, including incurred but not reported losses, is determined using the assistance of a third-party actuary. This amount is reflected on our balance sheet as an accrued liability. Our accounting policy includes an internal evaluation and adjustment of our reserve for all insurance-related liabilities on a quarterly basis. At least on an annual basis, we engage an external actuarial professional to independently assess and estimate the total liability outstanding, which is compared to the actual reserve balance at that time and adjusted accordingly.

*Stock-Based Compensation.* Calculating stock-based compensation expense requires the input of subjective assumptions. We determine the fair value of each option grant using the Black-Scholes option-pricing model. Specific inputs to the model include: the expected life of the stock-based awards, stock price volatility, dividend yield and risk-free rate.

The expected life represents the period of time the options are expected to be outstanding. We consider the contractual term, the vesting period and the expected lives used by a peer group with similar option terms in determining the expected life assumption. As a newly public company, we supplement our own historical volatility with the volatility of a peer group over a recent historical period equal to the expected life of the option. The expected dividend yield is based on our history of not paying regular dividends in the past and our current intention to not pay regular dividends in the foreseeable future. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant and has a term equal to the expected life of the options. We record expense for the unvested portion of grants over the requisite service (i.e., vesting) periods.

## RECENTLY ISSUED ACCOUNTING STANDARDS

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* ("SFAS 157"), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of SFAS 157 relating to financial instruments were effective for us as of January 1, 2008. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which deferred the effective date of SFAS 157, for all non-financial assets and non-financial liabilities except those that are recognized or disclosed at fair value in the financial statements on a recurring basis. We partially adopted SFAS 157 as of January 1, 2008, as it relates to financial instruments. The partial adoption did not have a material effect on our consolidated financial statements (See Note 9). We are still assessing the effect that SFAS 157 will have on our nonrecurring measurements for non-financial assets and liabilities in 2009.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Liabilities — Including an amendment of FASB Statement No. 115* ("SFAS 159"), which permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 was effective as of January 1, 2008. We adopted SFAS 159 as of January 1, 2008, and we are not electing the fair value option for any of our eligible financial instruments and other items that are not already measured at fair value under existing standards.

In December 2007, the FASB issued SFAS No. 141 (revised 2007) ("SFAS 141R"), *Business Combinations*, which will change the accounting for business combinations. Under SFAS 141R, an acquiring entity will be required to recognize all assets acquired and liabilities assumed in a transaction at the acquisition date fair value with limited exceptions. Additionally, SFAS 141R will change the accounting treatment and disclosure for certain specific items in a business combination. This pronouncement requires prospective application and will be effective for us for acquisitions on or after January 1, 2009. We expect the application of SFAS 141R will have an effect on how we account for business combinations once adopted, but the effect of the impact on our consolidated financial statements will depend upon the acquisitions that occur after the effective date.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133* ("SFAS 161") which requires expanded disclosures about an entity's derivative instruments and hedging activities. SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on

derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments. This pronouncement requires comparative disclosures only for periods subsequent to initial adoption and is effective for us beginning January 1, 2009. We will include the required disclosures under SFAS 161 upon adoption.

In June 2008, the FASB issued Staff Position EITF 03-06-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities* (FSP EITF 03-06-1). According to FSP EITF 03-06-1, unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are considered participating securities under SFAS No. 128. As such, they should be included in the computation of basic earnings per share ("EPS") using the two-class method. This pronouncement requires retrospective application and will be effective for us after January 1, 2009. We do not expect the application of FSP EITF 03-06-1 to have a material impact on the computation of our EPS.

**Item 7A. *Quantitative and Qualitative Disclosures about Market Risk***

We experience changes in interest expense when market interest rates change. Changes in our debt could also increase these risks. We utilize interest rate swap contracts to fix interest rates on a portion of our outstanding long-term debt balances. Based on debt outstanding and interest rate swap contracts in place at December 31, 2008, a 1.0% increase in interest rates would result in approximately \$1.2 million of additional interest expense annually.

We purchase certain materials, including lumber products, which are then sold to customers as well as used as direct production inputs for our manufactured products that we deliver. Short-term changes in the cost of these materials and the related in-bound freight costs, some of which are subject to significant fluctuations, are sometimes, but not always, passed on to our customers. Our delayed ability to pass on material price increases to our customers can adversely effect our operating income.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Builders FirstSource, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, changes in stockholders' equity and cash flows present fairly, in all material respects, the financial position of Builders FirstSource, Inc. and its subsidiaries at December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 12 to the consolidated financial statements, the Company changed the manner in which it accounts for uncertain tax positions in 2007.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**1. Description of the Business**

Builders FirstSource, Inc., a Delaware corporation formed in 1998, is a leading supplier and manufacturer of structural and related building products for residential new construction in the United States. In this annual report, references to the “company,” “we,” “our,” “ours” or “us” refer to Builders FirstSource, Inc. and its consolidated subsidiaries, unless otherwise stated or the context otherwise requires.

We manage our business as three regional operating groups — Atlantic, Southeast and Central. We serve 33 markets in 11 states, principally in the southern and eastern United States. We have 58 distribution centers and 57 manufacturing facilities, many of which are located on the same premises as our distribution centers. We serve a broad customer base ranging from production homebuilders to small custom homebuilders.

**2. Summary of Significant Accounting Policies**

***Principles of Consolidation***

The consolidated financial statements present the results of operations, financial position, and cash flows of Builders FirstSource, Inc. and its wholly-owned subsidiaries. All significant intercompany transactions have been eliminated in consolidation.

***Accounting Estimates***

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Estimates are used when accounting for items such as revenue, vendor rebates, allowance for returns, discounts and doubtful accounts, employee compensation programs, depreciation and amortization periods, income taxes, inventory values, insurance programs, goodwill, other intangible assets and long-lived assets.

***Sales Recognition***

We recognize sales of building products upon delivery to the customer. For contracts with service elements, sales are generally recognized on the completed contract method as these contracts are usually completed within 30 days. Contract costs include all direct material and labor, equipment costs and those indirect costs related to contract performance. Provisions for estimated losses on uncompleted contracts are recognized in the period in which such losses are determined. Prepayments for materials or services are deferred until such materials have been delivered or services have been provided. All sales recognized are net of allowances for discounts and estimated returns, based on historical experience. We present all sales tax on a net basis in our consolidated financial statements.

***Cash and Cash Equivalents***

Cash and cash equivalents consist of cash on hand and all highly liquid investments with an original maturity date of three months or less.

***Financial Instruments***

We use financial instruments in the normal course of business as a tool to manage our assets and liabilities. We do not hold or issue financial instruments for trading purposes.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

On January 1, 2008, we partially adopted the provisions of SFAS No. 157, *Fair Value Measurements* (“SFAS 157”), for financial assets and liabilities. SFAS 157 became effective for financial assets and liabilities on January 1, 2008. On January 1, 2009, we will apply the provisions of SFAS 157 for non-recurring fair value measurements of non-financial assets and liabilities, such as goodwill, indefinite-lived intangible assets, and property, plant and equipment. SFAS 157 defines fair value, thereby eliminating inconsistencies in guidance found in various prior accounting pronouncements, and increases disclosures surrounding fair value calculations. The only financial instruments measured at fair value on a recurring basis are our interest rate swaps. Refer to Note 9 for further discussion surrounding fair value measurements of our financial instruments.

***Accounts Receivable***

We extend credit to qualified professional homebuilders and contractors, generally on a non-collateralized basis. The allowance for doubtful accounts is based on management’s assessment of the amount which may become uncollectible in the future and is estimated using specific review of problem accounts, overall portfolio quality, current economic conditions that may affect the borrower’s ability to pay, and historical experience. Accounts receivable are written off when deemed uncollectible.

Accounts receivable consisted of the following at December 31:

	2008	2007
	(In thousands)	
Trade receivables . . . . .	\$ 91,178	\$133,639
Less: allowance for returns and doubtful accounts . . . . .	6,194	7,209
Trade accounts receivable, net . . . . .	84,984	126,430
Income tax receivables . . . . .	35,268	13,276
Other . . . . .	6,248	9,776
Other receivables. . . . .	41,516	23,052
Accounts receivable, net . . . . .	\$126,500	\$149,482

***Inventories***

Inventories consist principally of materials purchased for resale, including lumber, sheet goods, windows, doors and millwork, as well as certain manufactured products and are stated at the lower of cost or market. Cost is determined using the weighted average method, the use of which approximates the first-in, first-out method. We accrue for shrink based on the actual historical shrink results of our most recent physical inventories adjusted, if necessary, for current economic conditions. These estimates are compared with actual results as physical inventory counts are taken and reconciled to the general ledger.

During the year, we monitor our inventory levels by market and record provisions for excess inventories based on slower moving inventory. We define potential excess inventory as the amount of inventory on hand in excess of the historical usage, excluding special order items purchased in the last three months. We then apply our judgment as to forecasted demand and other factors, including liquidation value, to determine the required adjustments to net realizable value. Our inventories are generally not susceptible to technological obsolescence.

Our arrangements with vendors provide for rebates of a specified amount of consideration, payable when certain measures, generally related to a stipulated level of purchases, have been achieved. We account for estimated rebates as a reduction of the prices of the vendor’s inventory until the product is sold, at which time such rebates reduce cost of sales in the accompanying consolidated statements of operations. Throughout the year we estimate the amount of the rebates based upon the expected level of purchases. We continually revise these estimates based on actual purchase levels.

**BUILDERS FIRTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Shipping and Handling Costs***

Handling costs incurred in manufacturing activities are included in cost of sales. All other shipping and handling costs are included in selling, general and administrative expenses on the accompanying consolidated statements of operations and aggregated \$69.8 million, \$87.3 million and \$93.3 million in 2008, 2007 and 2006, respectively.

***Income Taxes***

We account for income taxes utilizing the liability method described in Statement of Financial Accounting Standards (“SFAS”) No. 109, *Accounting for Income Taxes*. Deferred income taxes are recorded to reflect consequences on future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end based on enacted tax laws and statutory tax rates applicable to the periods in which differences are expected to affect taxable earnings. We record a valuation allowance to reduce deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. We recorded a valuation allowance of \$41.2 million in 2008 of which \$35.5 million related to our continuing operations, \$3.0 million related to other comprehensive (loss) income, and \$2.7 million related to our discontinued operations.

***Warranty Expense***

We have warranty obligations with respect to most manufactured products; however, the liability for the warranty obligations is not significant as a result of third-party inspection and acceptance processes.

***Deferred Loan Costs***

Loan costs are capitalized upon the issuance of long-term debt and amortized over the life of the related debt using the effective interest rate method for our term notes and the straight-line method for our revolving credit facility and non-amortizing floating rate notes. Amortization of deferred loan costs is included in interest expense. Upon changes to our debt structure, we evaluate debt issuance costs in accordance with Emerging Issues Task Force (“EITF”) Issue No. 96-19, *Debtor’s Accounting for a Modification or Exchange of Debt Instruments*, or EITF 98-14, *Debtor’s Accounting for Changes in Line-of-Credit or Revolving Debt Arrangements*. We adjust debt issuance costs as necessary based on the results of this evaluation.

***Property, Plant and Equipment***

Property, plant and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets. The estimated lives of the various classes of assets are as follows:

Buildings and improvements . . . . .	20 to 40 years
Machinery and equipment . . . . .	3 to 10 years
Furniture and fixtures . . . . .	3 to 5 years
Leasehold improvements . . . . .	The shorter of the estimated useful life or the remaining lease term, as defined by SFAS 13, as amended

Major additions and improvements are capitalized, while maintenance and repairs that do not extend the useful life of the property are charged to expense as incurred. Gains or losses from dispositions of property, plant and equipment are recorded in the period incurred.

We periodically evaluate the commercial and strategic operation of the land, related buildings and improvements of our facilities. In connection with these evaluations, some facilities may be consolidated, and others may be sold or leased. Net gains or losses related to the sale of real estate and equipment are recorded as selling, general and administrative expenses.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

We capitalize certain costs of computer software developed or obtained for internal use, including interest, provided that those costs are not research and development, and certain other criteria are met pursuant to Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*. The net carrying value of internal use software costs was \$1.1 million and \$1.5 million as of December 31, 2008 and 2007, respectively. These costs are included in furniture and fixtures in Note 3 and are amortized on a straight-line basis over a period of three years.

***Long-Lived Assets***

We evaluate our long-lived assets, other than goodwill, for impairment when events or changes in circumstances indicate, in management's judgment, that the carrying value of such assets may not be recoverable. The determination of whether impairment has occurred is based on management's estimate of undiscounted future cash flows before interest attributable to the assets as compared to the net carrying value of the assets. If impairment has occurred, the amount of the impairment recognized is determined by estimating the fair value of the assets based on estimated discounted future cash flows and recording a provision for loss if the carrying value is greater than estimated fair value. The net carrying value of assets identified to be disposed of in the future is compared to their estimated fair value, generally the quoted market price obtained from an independent third-party less the cost to sell, to determine if impairment exists. Until the assets are disposed of, an estimate of the fair value is reassessed when related events or circumstances change. For the years ended December 31, 2008 and 2007, we recorded asset impairment charges of \$2.7 million and \$0.4 million, respectively. These charges were included in asset impairments in the consolidated statements of operations in their respective years. We did not record any asset impairment charges for the year ended December 31, 2006.

***Insurance***

We have established insurance programs to cover certain insurable risks consisting primarily of physical loss to property, business interruptions resulting from such loss, workers' compensation, employee healthcare, and comprehensive general and auto liability. Third party insurance coverage is obtained for exposures above predetermined deductibles as well as for those risks required to be insured by law or contract. Provisions for losses are developed from valuations that rely upon our past claims experience, which considers both the frequency and settlement of claims. We discount our workers' compensation liability based upon estimated future payment streams at our risk-free rate.

***Net (Loss) Income per Common Share***

Net (loss) income per common share, or earnings per share ("EPS"), is calculated in accordance with SFAS No. 128, *Earnings per Share*, which requires the presentation of basic and diluted EPS. Basic EPS is computed using the weighted average number of common shares outstanding during the period. Diluted EPS is computed using the weighted average number of common shares outstanding during the period, plus the dilutive effect of potential common shares. For the purpose of computing diluted EPS, weighted average shares outstanding have been adjusted for common shares underlying options of 2.6 million for 2006. Weighted average shares outstanding have also been adjusted for 348,000 shares of restricted stock in 2006. Options to purchase 2,853,000, 2,975,000, and 536,000 shares of common stock were not included in the computations of diluted EPS in 2008, 2007, and 2006, respectively, because their effect was anti-dilutive. There were 389,000 and 589,000 restricted stock shares excluded from the computation of diluted EPS in 2008 and 2007, respectively, as their effect was anti-dilutive. No restricted stock shares were excluded from the computation of diluted EPS in 2006.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The table below presents a reconciliation of weighted average common shares used in the calculation of basic and diluted EPS for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
	(In thousands)		
Weighted average shares for basic EPS . . . . .	35,634	34,904	33,796
Dilutive effect of stock awards and options . . . . .	—	—	2,243
Weighted average shares for diluted EPS . . . . .	<u>35,634</u>	<u>34,904</u>	<u>36,039</u>

***Goodwill and Other Intangible Assets***

*Intangibles subject to amortization*

We recognize an acquired intangible asset apart from goodwill whenever the intangible asset arises from contractual or other legal rights, or whenever it can be separated or divided from the acquired entity and sold, transferred, licensed, rented, or exchanged, either individually or in combination with a related contract, asset or liability. Impairment losses are recognized if the carrying value of an intangible asset subject to amortization is not recoverable from expected future cash flows and its carrying amount exceeds its estimated fair value. We recorded impairments on intangibles subject to amortization of \$4.4 million in 2008 (see Note 7). This impairment was included in asset impairments on the consolidated statements of operations. We did not record any impairments on intangibles subject to amortization in 2007 or 2006.

*Goodwill*

We recognize goodwill as the excess cost of an acquired entity over the net amount assigned to assets acquired and liabilities assumed. Goodwill is tested for impairment on an annual basis and between annual tests whenever impairment is indicated. This annual test takes place as of December 31 each year. Impairment losses are recognized whenever the implied fair value of goodwill is less than its carrying value (see Note 6). For the years ended December 31, 2008 and 2007, we recorded \$44.0 million and \$16.9 million, respectively, in goodwill impairment charges. These goodwill impairments were included in asset impairments in the consolidated statements of operations in their respective years. We had no goodwill impairment charges for continuing operations for the year ended December 31, 2006.

***Stock-based Compensation***

We have three stock-based employee compensation plans (“Plans”), which are described more fully in Note 10. We issue new common stock shares upon exercises of stock options and grants of restricted stock.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Expected life . . . . .	5.0 years	4.4 years	5.0 years
Expected volatility . . . . .	42.3%	35.2%	40.9%
Expected dividend yield . . . . .	0.00%	0.00%	0.00%
Risk-free rate . . . . .	2.89%	4.47%	4.05%

The expected life represents the period of time the options are expected to be outstanding. We consider the contractual term, the vesting period and the expected lives used by a peer group with similar option terms in determining the expected life assumption. As a newly public company, we supplement our own historical volatility with the volatility of a peer group over a recent historical period equal to the expected life of the option. The expected dividend yield is based on our history of not paying regular dividends in the past and our current intention

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

to not pay regular dividends in the foreseeable future. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant and has a term equal to the expected life of the options.

***Recently Issued Accounting Pronouncements***

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (“SFAS 157”), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of SFAS 157 relating to financial instruments were effective for us as of January 1, 2008. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, Effective Date of FASB Statement No. 157, which deferred the effective date of SFAS 157, for all non-financial assets and non-financial liabilities except those that are recognized or disclosed at fair value in the financial statements on a recurring basis. We partially adopted SFAS 157 as of January 1, 2008, as it relates to financial instruments. The partial adoption did not have a material effect on our consolidated financial statements (See Note 9). We are still assessing the effect that SFAS 157 will have on our nonrecurring measurements for non-financial assets and liabilities in 2009.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Liabilities — Including an amendment of FASB Statement No. 115* (“SFAS 159”) which permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 was effective as of January 1, 2008. We adopted SFAS 159 as of January 1, 2008, and we are not electing the fair value option for any of our eligible financial instruments and other items that are not already measured at fair value under existing standards.

In December 2007, the FASB issued SFAS No. 141 (revised 2007) (“SFAS 141R”), *Business Combinations*, which will change the accounting for business combinations. Under SFAS 141R, an acquiring entity will be required to recognize all assets acquired and liabilities assumed in a transaction at the acquisition date fair value with limited exceptions. Additionally, SFAS 141R will change the accounting treatment and disclosure for certain specific items in a business combination. This pronouncement requires prospective application and will be effective for us for acquisitions on or after January 1, 2009. We expect the application of SFAS 141R will have an impact on how we account for business combinations once adopted, but the effect of the impact on our consolidated financial statements will depend upon the acquisitions that occur after the effective date.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133* (“SFAS 161”) which requires expanded disclosures about an entity’s derivative instruments and hedging activities. SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments. This pronouncement requires comparative disclosures only for periods subsequent to initial adoption and is effective for us beginning January 1, 2009. We will include the required disclosures under SFAS 161 upon adoption.

In June 2008, the FASB issued Staff Position EITF 03-06-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities*” (FSP EITF 03-06-1). According to FSP EITF 03-06-1, unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are considered participating securities under SFAS No. 128. As such, they should be included in the computation of basic earnings per share (“EPS”) using the two-class method. This pronouncement requires retrospective application and will be effective for us after January 1, 2009. We do not expect the application of FSP EITF 03-06-1 to have a material impact on the computation of our EPS.

***Comprehensive (Loss) Income***

Comprehensive (loss) income is defined as the change in equity (net assets) of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. It consists of net (loss) income and other gains and losses affecting stockholders’ equity that, under accounting principles generally accepted in the United States, are excluded from net income. The change in fair value of interest rate swaps is the

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

only item impacting our accumulated other comprehensive (loss) income of \$(7.4) million and \$0.3 million (net of income taxes of zero and \$0.2 million) as of December 31, 2008 and 2007, respectively.

***Reclassifications***

Certain prior year amounts have been reclassified to conform to the current year presentation.

**3. Property, Plant and Equipment**

Property, plant and equipment consisted of the following at December 31:

	2008	2007
	(In thousands)	
Land . . . . .	\$ 13,915	\$ 13,820
Buildings and improvements . . . . .	68,246	69,860
Machinery and equipment . . . . .	97,044	102,305
Furniture and fixtures . . . . .	25,620	27,509
Construction in progress . . . . .	936	1,057
Property, plant and equipment . . . . .	205,761	214,551
Less: accumulated depreciation . . . . .	125,387	118,193
Property, plant and equipment, net . . . . .	\$ 80,374	\$ 96,358

Depreciation expense was \$19.5 million, \$21.1 million and \$20.1 million, of which \$8.3 million, \$8.5 million and \$7.8 million was included in cost of sales, in 2008, 2007 and 2006, respectively.

**4. Acquisitions**

On December 21, 2007, we acquired certain assets of a distribution facility located in Chelsea, Alabama, as a complement to our Bama Truss and Components, Inc. acquisition for cash consideration of \$1.7 million. Of this amount, \$0.1 million was allocated to customer relationships.

On July 31, 2007, we acquired the common stock of Bama Truss and Components, Inc. (“Bama”) for cash consideration of \$17.8 million (including certain adjustments). During 2008, we received \$0.7 million in cash related to the guarantee of acquired accounts receivable and a net tangible asset adjustment. Of the \$17.1 million net cash consideration, \$2.6 million was allocated to customer relationships and \$1.1 million to non-compete agreements, which are being amortized over nine years and two to five years, respectively. In addition, \$7.9 million was allocated to goodwill. Based in Shelby, Alabama, Bama is a market leader in multi-family and light commercial manufactured structural components. Its products include wood roof and floor trusses, wood panels, steel roof trusses and related building materials and services.

On November 3, 2006, we acquired the common stock of Waid Home Center, Inc. (“Waid”) for cash consideration of \$8.8 million (including certain adjustments). During 2007, we received \$1.2 million in cash related to the guarantee of acquired accounts receivable. Of the \$7.6 million net cash consideration, \$0.7 million was allocated to customer relationships and \$0.3 million was allocated to a non-compete agreement, which are being amortized over eight years and five years, respectively. In addition, \$3.3 million was allocated to goodwill. Based in Auburn, Alabama, Waid is a full-line building materials supplier. Its product offerings include: lumber, tools, windows, roofing, molding, paint, sheetrock and insulation.

On April 28, 2006, we acquired the common stock of Freeport Truss Company and certain assets and assumed liabilities of Freeport Lumber Company (collectively “Freeport”) for cash consideration of \$26.6 million (including certain adjustments). Of this amount, \$6.1 million was allocated to customer relationships and \$0.1 million was allocated to a non-compete agreement, which are being amortized over eight years and two years, respectively. In

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

addition, \$13.0 million was allocated to goodwill, which was increased to \$14.2 million in 2007 for purchase price adjustments. Freeport is a market-leading truss manufacturer and building material distributor in the Florida panhandle area. Its products include manufactured roof and floor trusses, as well as other residential building products such as lumber and lumber sheet goods, hardware, millwork, doors and windows.

These acquisitions were accounted for by the purchase method, and accordingly the results of operations are included in our consolidated financial statements from the acquisition date. Under this method, the purchase price was allocated to the assets acquired and liabilities assumed based on estimated fair values at the acquisition date. The excess of the purchase price over the estimated fair value of the net assets acquired and liabilities assumed was recorded as goodwill. Pro forma results of operations are not presented as these acquisitions are not material.

**5. Discontinued Operations**

In 2006, the specific business climate related to our New Jersey operations declined as housing activity softened and our competitors gained market share. Accordingly, we recognized a pre-tax goodwill impairment charge of \$6.8 million in the third quarter of 2006. We took certain actions including changing our operational management, reducing facilities, targeting new customers and commencing sales of prefabricated components in order to improve our operational performance in our New Jersey market. Despite these efforts, the housing activity and operating results for this reporting unit declined further in 2007. As such, we recorded an additional \$10.6 million pre-tax goodwill impairment and \$0.7 million in asset impairments on our New Jersey operations. As of December 31, 2007, we had no goodwill remaining in our New Jersey reporting unit. In October 2008, we announced our intent to exit the New Jersey market based upon several factors including the unfavorable conditions that affect our industry and a poor competitive position which prevented us from generating profitable results. The cessation of operations in this market has been treated as a discontinued operation as it had distinguishable cash flow and operations that have been eliminated from our operations. As a result, the operating results of the New Jersey market for the current and prior years have been aggregated and reclassified as discontinued operations in the consolidated statements of operations for the years ended December 31, 2008, 2007 and 2006. We will have no further involvement in this market. We completed the exit plan prior to December 31, 2008. The goodwill impairment charges recorded in 2007 and 2006 and the asset impairment charge recorded in 2007 are included in loss from discontinued operations, net of tax in the consolidated statements of operations in their respective years.

As a result of the exit plan, we expensed \$3.3 million related to future lease obligations on closed facilities and recorded \$0.4 million related to employee severance. These amounts are included in loss from discontinued operations in the accompanying consolidated statements of operations for 2008. The facility and other exit cost reserves related to our discontinued operations were \$3.9 million at December 31, 2008, of which \$2.0 million is recorded as other long-term liabilities.

Sales and pre-tax loss attributable to the New Jersey operations, which are reported as discontinued operations, were as follows for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
	(In thousands)		
Sales . . . . .	\$37,761	\$ 61,936	\$83,215
Loss before income taxes . . . . .	\$(7,704)	\$(13,630)	\$(5,535)

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**6. Goodwill**

The changes in the carrying amount of goodwill for the years ended December 31, 2008 and 2007 were as follows:

	<b>2008</b>	<b>2007</b>
	(In thousands)	
Balance at beginning of year . . . . .	\$155,588	\$173,806
Acquisitions and other purchase price adjustments . . . . .	(422)	9,342
Impairment of goodwill . . . . .	(43,973)	(27,560)
Balance at end of year . . . . .	<b>\$111,193</b>	<b>\$155,588</b>

We recorded a \$(0.4) million and \$1.2 million adjustment to goodwill related to prior year acquisitions for 2008 and 2007, respectively.

In the third quarter and fourth quarter of 2007, we recorded \$11.9 million and \$5.0 million, respectively, in goodwill impairments on our Ohio reporting unit as the macroeconomic factors that drive our business as it relates to this reporting unit continued to decline. Since December 31, 2007, management has closely monitored trends in economic factors and their effects on operating results to determine if an impairment trigger was present that would warrant a reassessment of the recoverability of the carrying amount of goodwill prior to the required annual impairment test in accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*. During the second quarter of 2008, the macroeconomic factors that drive our business declined further prompting management to revise its expectations and perform an interim impairment test related to our Ohio and Florida reporting units which were significantly underperforming original expectations and which also had a smaller valuation surplus compared to our other reporting units. Based on the results of this interim testing, management determined that the carrying value of goodwill for our Florida and Ohio reporting units exceeded their respective estimated fair values and recorded a \$7.5 million pre-tax impairment charge included in asset impairments. We performed our annual impairment test in the fourth quarter of 2008. As a result of a further decline in the macroeconomic factors that drive our business and in the valuation surplus in one of our reporting units, we recorded an additional \$36.4 million pre-tax impairment charge for our Florida reporting unit. We have no further goodwill value on the balance sheet for our Ohio and Florida reporting units.

The process of evaluating goodwill for impairment involves the determination of fair value of our reporting units. Inherent in such fair value determinations are certain judgments and estimates relating to future cash flows, including our interpretation of current economic indicators and market valuations and assumptions about our strategic plans with regard to our operations. Due to the uncertainties associated with such estimates, actual results could differ from such estimates resulting in further impairment of goodwill.

In performing our impairment analysis, we developed a range of fair values for our reporting units using a discounted cash flow methodology. The discounted cash flow methodology establishes fair value by estimating the present value of the projected future cash flows to be generated from the reporting unit. The discount rate applied to the projected future cash flows to arrive at the present value is intended to reflect all risks of ownership and the associated risks of realizing the stream of projected future cash flows. The discounted cash flow methodology uses our projections of financial performance for a five-year period. The most significant assumptions used in the discounted cash flow methodology are the discount rate, the terminal value and the expected future revenues, gross margins and operating margins, which vary among reporting units. Significant assumptions used in our financial projections include housing starts, lumber commodity prices, and market share gains.

In 2007 and 2006, we recorded \$10.6 million and \$6.8 million, respectively in goodwill impairments for our New Jersey operations which are now included in loss from discontinued operations, net of tax as discussed in Note 5.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**7. Intangible Assets**

The following table presents intangible assets as of December 31:

	<u>2008</u>		<u>2007</u>	
	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>
	(In thousands)			
Customer relationships . . . . .	\$3,458	\$ (627)	\$ 9,554	\$(1,491)
Non-compete agreements . . . . .	<u>2,537</u>	<u>(1,328)</u>	<u>4,432</u>	<u>(1,927)</u>
Total intangible assets . . . . .	<u>\$5,995</u>	<u>\$(1,955)</u>	<u>\$13,986</u>	<u>\$(3,418)</u>

During 2008, we had two non-compete agreements expire. Additionally, due to the continued decline in the macroeconomic conditions that face our industry, we recorded a \$4.4 million charge to fully impair customer relationship intangibles as their carrying values are not expected to be recovered from future cash flows. In addition to non-compete agreements arising from acquisitions, the company entered into a non-compete agreement with a former employee during 2007. This agreement was valued at \$1.1 million and a portion was recorded as additional paid-in capital due to the related stock grants. During the years ended December 31, 2008, 2007 and 2006, we recorded amortization expense in relation to the above-listed intangible assets of \$2.1 million, \$2.2 million, and \$1.3 million, respectively. The following table presents the estimated amortization expense for these intangible assets for the years ending December 31 (in thousands):

2009 . . . . .	\$1,292
2010 . . . . .	548
2011 . . . . .	542
2012 . . . . .	449
2013 . . . . .	381

**8. Accrued Liabilities**

Accrued liabilities consisted of the following at December 31:

	<u>2008</u>	<u>2007</u>
	(In thousands)	
Accrued payroll and other employee related expenses . . . . .	\$ 8,217	\$16,333
Accrued taxes . . . . .	7,388	8,594
Insurance self-retention reserves . . . . .	9,591	12,138
Accrued interest . . . . .	2,435	3,063
Advances from customers . . . . .	1,569	1,739
Facility closure reserves . . . . .	3,270	309
Other . . . . .	<u>5,324</u>	<u>5,450</u>
Total accrued liabilities . . . . .	<u>\$37,794</u>	<u>\$47,626</u>

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**9. Long-Term Debt**

Long-term debt consisted of the following at December 31:

	2008	2007
	(In thousands)	
Revolving credit facility . . . . .	\$ 40,000	\$ —
Floating rate notes . . . . .	275,000	275,000
Other long-term debt . . . . .	4,226	4,266
	319,226	279,266
Less: current portion of long-term debt . . . . .	44	40
Total long-term debt, net of current maturities . . . . .	\$319,182	\$279,226

**2007 Senior Secured Credit Agreement**

In 2007, we entered into a \$350 million revolving credit facility (the “2007 Agreement”) with a consortium of banks. The available borrowing capacity, or borrowing base, under the \$350 million revolving credit line is derived primarily from a percentage of our eligible accounts receivable and inventory, as defined by the agreement. Subsequent to year-end, we reduced the 2007 Agreement from \$350 million to \$250 million as allowed by the 2007 Agreement. We do not anticipate that our borrowing base will support borrowings in excess of \$250 million at any point during the remaining life of the credit facility. This reduction will allow us to reduce our interest expense related to commitment fees. In the first quarter of 2009, we will expense approximately \$1.2 million of deferred financing costs related to this reduction.

Interest rates under the 2007 Agreement are based on a base rate plus an applicable margin. The base rate is the larger of the rate determined by the administrative agent (typically their prime rate) or the Federal Funds Rate plus one-half percent, as each term is defined by the agreement. A variable commitment fee, currently 0.425%, is charged on the unused amount of the revolver based on a quarterly average excess availability. The weighted-average interest rate at December 31, 2008 for borrowings outstanding under the 2007 Agreement was 3.75%. At December 31, 2008, we had outstanding letters of credit of approximately \$16.6 million.

Loans are collateralized by substantially all of our assets, primarily accounts receivable and inventory, and are guaranteed by us and certain of our subsidiaries. Our net borrowing availability in excess of the \$35 million liquidity covenant at December 31, 2008 was zero due to a drop in our eligible borrowing base coupled with lower seasonal advance rates set forth under the credit agreement. The 2007 Agreement has certain restrictive covenants, which, among other things, relate to the payment of dividends, incurrence of indebtedness, and asset sales. The 2007 Agreement also has a fixed charge coverage ratio of 1:1 that is triggered if our available borrowing capacity, as determined under the borrowing base formula, is less than \$35 million. The calculation allows cash on deposit with the agent to be included as eligible borrowing base. Approximately \$12.8 million of cash on hand at December 31, 2008 supported a short-fall in the calculation of the \$35 million minimum liquidity covenant. Absent the use of cash in the calculation, we would have been forced to repay \$12.8 million in borrowings to comply with the covenant. If the \$35 million minimum liquidity covenant was triggered in 2008, we would not have met the fixed charge coverage ratio. Based on our 2009 forecast, we will not meet the fixed charge coverage ratio, but we anticipate that we would not fall below the \$35 million minimum liquidity covenant in 2009; therefore, we would not trigger the fixed charge coverage ratio requirement. The fixed charge coverage ratio is defined as the ratio of earnings before interest expenses, income taxes, depreciation and amortization expenses minus capital expenditures, cash taxes paid, dividends, distributions and share repurchases or redemptions to the sum of scheduled principal payments and interest expense on a trailing twelve month basis from the trigger date.

The 2007 Agreement is scheduled to mature five years from the execution of the agreement and replaced a long-term revolver and a pre-funded letter of credit facility. Included in interest expense for the year ended December 31, 2007, was a \$1.6 million write-off of deferred financing fees related to the cancelled long-term revolver and pre-funded letter of credit facility. We capitalized \$4.8 million in deferred loan costs related to the 2007

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Agreement which are being amortized over the term of the 2007 Agreement. Additionally, the remaining \$0.7 million of unamortized deferred financing costs related to the 2005 Senior Secured Credit Agreement were included as a component of other assets, net and are being amortized over the term of the 2007 Agreement.

***2005 Senior Secured Credit Agreement***

On February 11, 2005, we entered into a \$350.0 million senior secured credit agreement (the “2005 Agreement”) with a syndicate of banks. The 2005 Agreement was initially comprised of a \$110.0 million long-term revolver due February 11, 2010; a \$225.0 million term loan due in quarterly installments of \$0.6 million beginning June 30, 2005 and ending June 30, 2011 and a final payment of \$210.9 million on August 11, 2011; and a \$15.0 million pre-funded letter of credit facility due August 11, 2011. We permanently retired the balance of the \$225.0 million term loan during 2007. As a result of this retirement and the replacement of the \$110 million long-term revolver, and \$15.0 million pre-funded letter of credit with the 2007 Agreement, there were no outstanding borrowings under the 2005 Agreement as of December 31, 2007.

Interest rates under the 2005 Agreement for the revolving loans and the term loan were based on the rate of interest determined by the administrative agent rate in the United States or LIBOR (plus a margin, based on leverage ratios, which is 0.75% for base rate revolving loans and 2.50% for term loans at December 31, 2006), at our option at the time of borrowing. A variable commitment fee based on the total leverage ratio was charged on the unused amount of the revolver.

***Second Priority Senior Secured Floating Rate Notes***

On February 11, 2005, we issued \$275.0 million in aggregate principal amount of second priority senior secured floating rate notes. The floating rate notes mature on February 15, 2012. Interest accrues at a rate of LIBOR plus 4.25%. LIBOR is reset at the beginning of each quarterly period. Interest on the floating rate notes is payable quarterly in arrears. At any time on or after February 15, 2007, we can redeem some or all of the notes at a redemption price equal to par plus a specified premium that declines ratably to par. In the event of a change in control, we may be required to offer to purchase the notes at a purchase price equal to 101% of the principal, plus accrued and unpaid interest. The notes are registered under the Securities Act.

The notes are jointly and severally guaranteed by all of the company’s subsidiaries and collateralized by a pledge of common stock of certain of our subsidiaries and by a second priority lien on substantially all tangible and intangible property and interests in property and proceeds thereof now owned or hereafter acquired by us and substantially all of our subsidiaries. The parent company has no independent assets or operations, and the guarantees are full and unconditional. The indenture covering the notes contains certain restrictive covenants, which, among other things, relate to the payment of dividends, incurrence of indebtedness, repurchase of common stock or other distributions, asset sales and investments.

In 2005, we entered into two interest rate swap agreements in order to obtain a fixed rate with respect to \$200.0 million of our outstanding floating rate debt and thereby reduce our exposure to interest rate volatility. In April 2005, we entered into an interest rate swap agreement to fix \$100.0 million of our outstanding floating rate notes at an effective interest rate of 8.37%, including applicable margin. The interest rate swap agreement was for three years starting July 1, 2005 whereby we paid a fixed rate of 4.12% and received a variable rate at 90 day LIBOR. In June 2005, we entered into another interest rate swap agreement to fix \$100.0 million of our outstanding floating rate notes at an effective interest rate of 8.27%, including applicable margin. The interest rate swap agreement was for three years starting June 10, 2005 whereby we paid a fixed rate of 4.02% and received a variable rate at 90 day LIBOR. Both swap agreements were set to expire in May 2008.

In January 2008, we cancelled the interest rate swap agreement that started July 1, 2005. The settlement fees related to the cancellation of this interest rate swap agreement were minimal. In the first quarter of 2008, we entered into three new interest rate swap agreements with notional amounts of \$100.0 million, \$50.0 million and

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

\$50.0 million, respectively, to replace the swap agreements that were to expire in 2008. The swap agreements are three year swaps that fix \$200.0 million of our outstanding floating rate notes at a weighted average interest rate of 7.41%, including an applicable margin. We are paying a fixed rate of 3.25%, 3.17% and 2.99%, respectively, on the swaps and receive a variable rate at 90 day LIBOR. The swaps were effective on May 15, 2008. The swaps are designated and qualify as fully effective cash flow hedges. All changes in fair value are recorded in accumulated other comprehensive (loss) income and subsequently reclassified into earnings when the related interest expense on the underlying borrowing is recognized. The weighted-average interest rate at December 31, 2008 for the floating rate notes was 7.14%, including the effect of interest rate swap agreements.

***Fair Value***

On January 1, 2008, we partially adopted the provisions of SFAS 157 for financial assets and liabilities. SFAS 157 became effective for financial assets and liabilities on January 1, 2008. On January 1, 2009, we will apply the provisions of SFAS 157 for non-recurring fair value measurements of non-financial assets and liabilities, such as goodwill, intangible assets, and property, plant and equipment. SFAS 157 defines fair value, thereby eliminating inconsistencies in guidance found in various prior accounting pronouncements, and increases disclosures surrounding fair value calculations.

SFAS 157 establishes a three-tiered fair value hierarchy that prioritizes inputs to valuation techniques used in fair value calculations. The three levels of inputs are defined as follows:

Level 1 — unadjusted quoted prices for identical assets or liabilities in active markets accessible by us

Level 2 — inputs that are observable in the marketplace other than those inputs classified as Level 1

Level 3 — inputs that are unobservable in the marketplace and significant to the valuation

SFAS 157 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs. If a financial instrument uses inputs that fall in different levels of the hierarchy, the instrument will be categorized based upon the lowest level of input that is significant to the fair value calculation.

The only financial instruments measured at fair value on a recurring basis are our interest rate swaps. The interest rate swaps are valued in the market using discounted cash flow techniques. These techniques incorporate Level 1 and Level 2 inputs. These market inputs are utilized in the discounted cash flow calculation considering the term, notional amount, discount rate, yield curve and credit risk of the financial instrument. Significant inputs to the derivative valuation for interest rate swaps are observable in the active markets and are classified as Level 2 in the hierarchy.

The following fair value hierarchy table presents information about the Company's financial instruments measured at fair value on a recurring basis using significant other observable inputs (Level 2) (in thousands):

	<u>Carrying Value as of December 31, 2008</u>	<u>Fair Value Measurement as of December 31, 2008</u>
Long-term interest rate swaps (included in Other long-term liabilities) . . . . .	\$7,667	\$7,667

We have elected to continue to report the value of our floating rate notes at amortized cost. The floating rate notes are registered and publicly traded. The fair value of the floating rate notes at December 31, 2008 based on the most recent trade price was approximately \$83.9 million. The carrying value of amounts outstanding under the revolving credit facility approximate fair value.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Other Long-Term Debt***

In 2006, we completed construction on a new multi-purpose facility. Based on the evaluation of the construction project in accordance with Emerging Issues Task Force No. 97-10, *The Effect of Lessee Involvement in Asset Construction*, the company was deemed the owner of the facility during the construction period. Effectively, a sale and leaseback of the facility occurred when construction was completed and the lease term began. Based on criteria outlined in SFAS No. 98, *Accounting for Leases*, this transaction did not qualify for sale-leaseback accounting. As a result, the building and the offsetting long-term lease obligation are included on the consolidated balance sheet as a component of fixed assets and other long-term debt, respectively. The building is being depreciated over its useful life, and the lease obligation is being amortized such that there will be no gain or loss recorded if the lease is not extended at the end of the term.

Future maturities of long-term debt as of December 31, 2008 were as follows (in thousands):

Year ending December 31,	
2009 .....	\$ 44
2010 .....	48
2011 .....	52
2012 .....	315,057
2013 .....	63
Thereafter .....	<u>3,962</u>
Total long-term debt (including current portion) .....	<u>\$319,226</u>

**10. Employee Stock-Based Compensation**

***2007 Incentive Plan***

Under our 2007 Incentive Plan (“2007 Plan”), the Company is authorized to grant awards in the form of incentive stock options, non-qualified stock options, restricted stock, other common stock-based awards and cash-based awards. The maximum number of common shares reserved for the grant of awards under the 2007 Plan is 2.5 million, subject to adjustment as provided by the 2007 Plan. No more than 2.5 million shares may be made subject to options or stock appreciation rights (“SARs”) granted under the 2007 Plan, and no more than 1.25 million shares may be made subject to stock-based awards other than options or SARs. Stock options and SARs granted under the 2007 Plan may not have a term exceeding 10 years from the date of grant. The 2007 Plan also provides that all awards will become fully vested and/or exercisable upon a change in control (as defined in the 2007 Plan). Other specific terms for awards granted under the 2007 Plan shall be determined by our Compensation Committee (or the board of directors if so determined by the board of directors). As of December 31, 2008, 2.0 million shares were available for issuance under the 2007 Plan, 1.1 million of which may be made subject to stock-based awards other than options or SARs.

***2005 Equity Incentive Plan***

Under its 2005 Equity Incentive Plan (“2005 Plan”), we are authorized to grant stock-based awards in the form of incentive stock options, non-qualified stock options, restricted stock and other common stock-based awards. The maximum number of common shares reserved for the grant of awards under the 2005 Plan is 2.2 million, subject to adjustment as provided by the 2005 Plan. No more than 2.2 million shares may be made subject to options or SARs granted under the 2005 Plan, and no more than 1.1 million shares may be made subject to stock-based awards other than options or SARs. Stock options and SARs granted under the 2005 Plan may not have a term exceeding 10 years from the date of grant. The 2005 Plan also provides that all awards will become fully vested and/or exercisable upon a change in control (as defined in the 2005 Plan). Other specific terms for awards granted under the 2005 Plan shall be determined by our board of directors (or a committee of its members). Historically, awards granted under the

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

2005 Plan generally vest ratably over a three-year period. As of December 31, 2008, 728,000 shares were available for issuance under the 2005 Plan, 539,000 of which may be made subject to stock-based awards other than options or SARs.

***1998 Stock Incentive Plan***

Under the Builders FirstSource, Inc. 1998 Stock Incentive Plan, we were authorized to issue shares of common stock pursuant to awards granted in various forms, including incentive stock options, non-qualified stock options and other stock-based awards. The 1998 Plan also authorized the sale of common stock on terms determined by our board of directors.

Stock options granted under the 1998 Plan generally cliff vest after a period of seven to nine years. A portion of certain option grants are subject to acceleration if certain financial targets are met. These financial targets include return on net assets and earnings before interest, taxes, depreciation and amortization. These targets are based on the performance of the operating group in which the employee performs their responsibilities and the performance of the Company as a whole. To date, these targets have generally been met. The expiration date is generally 10 years subsequent to date of issuance. As of January 1, 2005, no further grants will be made under the 1998 Plan.

On April 23, 2008, we filed a Tender Offer Statement on Schedule TO (the "Exchange Offer") with the Securities and Exchange Commission. The Exchange Offer was an offer by us to certain optionholders to exchange their outstanding stock option grants, whether vested or unvested, to purchase shares of our common stock, par value \$0.01 per share, granted under the 2005 Plan with an exercise price per share greater than or equal to \$17.90 for new option grants to be granted under the 2005 Plan. The Exchange Offer was made to employees who, as of the date the Exchange Offer commenced, were actively employed by us and held eligible option grants. The Exchange Offer was approved by our shareholders at our annual meeting on May 22, 2008. We accepted for cancellation, eligible option grants to purchase an aggregate of 943,200 shares of our common stock, representing 100% of the total shares of common stock underlying options eligible for exchange in the Exchange Offer on May 22, 2008, the expiration date of the Exchange Offer. Contemporaneous with the cancellation, our board of directors granted an equivalent number of stock options to the eligible employees on May 22, 2008 with an exercise price of \$7.15, which was the closing price of our common stock on that date.

The exchange of original options for new option grants was treated as a modification of the original options in accordance with SFAS No. 123 (revised 2004) *Share-Based Payment*. The remaining unamortized stock compensation expense related to the original options will continue to be amortized over the original vesting period related to those options. The compensation expense for the incremental difference between the fair value of the new options and the fair value of the original options on the date of modification, reflecting the current facts and circumstances on the modification date, will be amortized over the vesting period of the new option grants which vest ratably over a term of approximately three years. We estimate the incremental stock-based compensation expense related to the modification, net of estimated forfeitures, will be approximately \$2.1 million, of which \$0.6 million was expensed in the year ended December 31, 2008.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The following table summarizes our stock option activity:

	<u>Options</u> (In thousands)	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Years</u>	<u>Aggregate Intrinsic Value</u> (In thousands)
Outstanding at December 31, 2007 . . . . .	2,975	\$ 8.72		
Granted . . . . .	1,374	\$ 7.01		
Exercised . . . . .	(447)	\$ 2.94		
Forfeited . . . . .	(106)	\$10.01		
Cancelled . . . . .	(943)	\$20.24		
Outstanding at December 31, 2008 . . . . .	<u>2,853</u>	\$ 4.94	6.3	\$—
Exercisable at December 31, 2008 . . . . .	1,515	\$ 3.15	3.7	\$—

The outstanding options at December 31, 2008, include options to purchase 414,000 shares granted under the 2007 Plan, 910,000 shares granted under the 2005 Plan and 1,529,000 shares under the 1998 Plan. As of December 31, 2008, no shares were exercisable under the 2007 Plan and 2005 Plan and 1,515,000 shares were exercisable under the 1998 Plan. The weighted average grant date fair value of options granted during the years ended December 31, 2008, 2007, and 2006 was \$2.75 (excluding options re-granted in the Exchange Offer), \$6.50 and \$9.99 per share, respectively. The total intrinsic value of options exercised during the years ended December 31, 2008, 2007 and 2006 was \$1.5 million, \$6.9 million and \$27.1 million, respectively. We realized zero, \$2.6 million and \$7.0 million in tax benefits for stock options exercised during the years ended December 31, 2008, 2007, and 2006, respectively. All eligible options excluding options valued under the minimum value method that vested in 2008 were cancelled and re-granted pursuant to the Exchange Offer.

Outstanding and exercisable stock options at December 31, 2008 were as follows (shares in thousands):

<u>Range of Exercise Prices</u>	<u>Outstanding</u>			<u>Exercisable</u>	
	<u>Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Years</u>	<u>Shares</u>	<u>Weighted Average Exercise Price</u>
\$3.15 . . . . .	1,529	\$3.15	3.6	1,515	\$3.15
\$6.70 - \$7.15 . . . . .	<u>1,324</u>	\$7.01	9.3	—	\$ —
\$3.15 - \$7.15 . . . . .	<u>2,853</u>	\$4.94	6.3	<u>1,515</u>	\$3.15

The following table summarizes restricted stock activity for the year ended December 31, 2008 (shares in thousands):

	<u>Shares</u>	<u>Weighted Average Grant Date Fair Value</u>
Nonvested at December 31, 2007 . . . . .	589	\$17.96
Granted . . . . .	58	\$ 5.62
Vested . . . . .	(244)	\$19.86
Forfeited . . . . .	(14)	\$20.94
Nonvested at December 31, 2008 . . . . .	<u>389</u>	\$14.84

As of December 31, 2008, there was \$4.3 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Plans. That cost is expected to be recognized over a weighted-average period of 1.4 years.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Our results of operations included stock compensation expense of \$8.5 million (\$8.5 million net of taxes) and \$7.0 million (\$4.3 million net of taxes), and \$4.1 million (\$2.6 million net of taxes) for the years ended December 31, 2008, 2007 and 2006, respectively.

**11. Facility Closure Costs**

During 2008, we developed and executed a plan to close seven facilities located in Indiana, Ohio, North Carolina, Georgia and Texas. The facility closures were primarily due to the continued decline in economic conditions that affected these locations as well as the consolidation of locations in certain markets in an attempt to reduce operating costs. In conjunction with this plan, we began disposing of assets, and severing employees. We sold owned real estate related to closed facilities for approximately \$0.9 million resulting in an immaterial loss on the sale. We completed the exit plan prior to December 31, 2008. During 2008, we recognized approximately \$5.0 million in expense related to closed facilities of which \$4.8 million was included in facility closure costs and \$0.2 million was included in interest expense, net in the accompanying consolidated statement of operations.

During 2007, we developed and executed a plan to close a facility in South Carolina and sell land in Florida and South Carolina. In conjunction with this plan, we began pursuing the sale of real estate and disposal of assets. We recorded an impairment charge of approximately \$0.4 million to adjust the carrying value of the real estate to its estimated value, less reasonable direct selling costs. At December 31, 2007, we classified the carrying value of the real estate and related assets of \$2.7 million as held for sale, which was included as a component of other assets, net in the accompanying consolidated balance sheets. During 2008, we sold real estate related to the closed facility in South Carolina for approximately \$1.2 million resulting in an immaterial gain on the sale. We also recorded an additional \$0.4 million impairment charge to adjust the carrying value of the remaining land to its estimated fair value.

An analysis of our facility closure reserves for the periods reflected is as follows:

	<u>2006</u>	<u>Additions</u>	<u>Payments</u>	<u>2007</u>	<u>Additions</u>	<u>Payments</u>	<u>2008</u>
	(In thousands)						
Facility and other exit costs, net of estimated sub-lease rental income . . . . .	\$2,503	\$342	\$(723)	\$2,122	\$4,511	\$(1,099)	\$5,534
Employee severance and termination benefits . . . . .	<u>—</u>	<u>12</u>	<u>(12)</u>	<u>—</u>	<u>493</u>	<u>(342)</u>	<u>151</u>
Total facility closure reserve . . . . .	<u>\$2,503</u>	<u>\$354</u>	<u>\$(735)</u>	<u>\$2,122</u>	<u>\$5,004</u>	<u>\$(1,441)</u>	<u>\$5,685</u>

The facility and other exit cost reserves of \$5.7 million at December 31, 2008, of which \$4.3 million is recorded as other long-term liabilities, are primarily related to future minimum lease payments on vacated facilities.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**12. Income Taxes**

The components of income tax (benefit) expense were as follows for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
	(In thousands)		
Current:			
Federal .....	\$(36,724)	\$ (2,657)	\$39,709

Total deferred tax liabilities .....	<u>7,180</u>	<u>4,488</u>
Net deferred tax asset .....	<u>\$ (3,289)</u>	<u>\$16,244</u>

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

A reconciliation of the statutory federal income tax rate to the company's effective rate is provided below for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Statutory federal income tax rate . . . . .	35.0%	35.0%	35.0%
State income taxes, net of federal income tax . . . . .	2.7%	5.3%	2.0%
Effect of changes in tax law . . . . .	—%	5.3%	—%
Valuation allowance . . . . .	(23.6)%	—%	—%
Non-deductible goodwill impairment . . . . .	(1.9)%	—%	—%
Other . . . . .	<u>0.3%</u>	<u>(0.8)%</u>	<u>0.9%</u>
	<u>12.5%</u>	<u>44.8%</u>	<u>37.9%</u>

We have \$294.2 million of state operating loss carryforwards and \$2.9 million of state tax credit carryforwards expiring at various dates through 2029. We also have \$19.1 million of federal net operating loss carryforwards that will expire in 2029. The federal and state operating loss carryforwards include approximately \$1.5 million of gross windfall tax benefits from stock option exercises that have not been recorded as of December 31, 2008. These deferred tax assets will be recorded as an increase to additional paid in capital when the related tax benefits are realized. During the second quarter of 2007, tax legislation was enacted in one of our filing jurisdictions that increased the tax rate at which loss carryforwards can be utilized in the future. We increased the value of our deferred tax assets related to these loss carryforwards by approximately \$1.4 million based on the provisions outlined in the legislation. The adjustment was recorded as an increase to the income tax benefit.

We have generated significant deferred tax assets partially due to various goodwill and other long-lived asset impairments that we recorded. We evaluate our deferred tax assets on a quarterly basis to determine whether a valuation allowance is required. In accordance with SFAS No. 109, Accounting for Income Taxes ("SFAS 109"), we assess whether a valuation allowance should be established based on our determination of whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. In light of the continued downturn in the housing market and the uncertainty as to its length and magnitude and the additional asset impairments recorded during 2008, we were in a three-year cumulative loss position. According to SFAS 109, cumulative losses in recent years represent significant negative evidence in considering whether deferred tax assets are realizable, and also generally preclude relying on projections of future taxable income to support the recovery of deferred tax assets. Therefore, during 2008, we recorded a valuation allowance totaling approximately \$41.2 million against primarily all of our net deferred tax assets of which \$35.5 million related to our continuing operations, \$3.0 million related to other comprehensive (loss) income, and \$2.7 million related to our discontinued operations. We also utilized \$0.1 million of valuation allowance against our deferred tax assets. We excluded the deferred tax liabilities related to certain indefinite lived intangibles when calculating the amount of valuation allowance needed as these liabilities cannot be considered as a source of income when determining the realizability of the net deferred tax assets. The valuation allowance was recorded as a reduction to income tax benefit.

The deferred tax assets for which there is no valuation allowance relate to amounts that can be realized through future reversals of existing taxable temporary differences or through the generation of sufficient taxable income. To the extent we generate sufficient taxable income in the future to fully utilize the tax benefits of the net deferred tax assets on which a valuation allowance was recorded, our effective tax rate may decrease as the valuation allowance is reversed.

We adopted FASB Interpretation 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"), at the beginning of 2007. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition measurement, classification, interest and penalties, and disclosure requirements. The implementation

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

of FIN 48 did not have a significant impact on our financial position or results of operations. As a result of the adoption, we recognized a \$0.8 million increase to reserves for uncertain tax positions, which was accounted for as an adjustment to the beginning balance of retained earnings.

We accrue interest and penalties on our uncertain tax positions as a component of our provision for income taxes. We accrued interest and penalties of \$0.1 million in 2008 and \$0.3 million in 2007. We also reduced interest and penalties \$0.5 million in 2008 and \$0.1 million in 2007 due to settlements with taxing authorities and the lapse of applicable statutes of limitations. We had a total of \$0.3 million and \$0.7 million accrued for interest and penalties for our uncertain tax positions as of December 31, 2008 and 2007, respectively.

The following table shows the changes in the amount of our uncertain tax positions (exclusive of the effect of interest and penalties):

	<u>2008</u>	<u>2007</u>
	<u>(In thousands)</u>	
Balance at January 1, . . . . .	\$2,347	\$2,364
Tax positions taken in prior periods:		
Gross increases . . . . .	26	321
Gross decreases . . . . .	(63)	(507)
Tax positions taken in current period:		
Gross increases . . . . .	111	250
Additions for tax positions acquired in business combinations . . . . .	—	161
Settlements with taxing authorities . . . . .	(705)	(16)
Lapse of applicable statute of limitations . . . . .	<u>(425)</u>	<u>(226)</u>
Balance at December 31, . . . . .	<u>\$1,291</u>	<u>\$2,347</u>

If our uncertain tax positions were recognized, a benefit of \$0.8 million, net of any U.S. Federal tax benefit, would affect our effective income tax rate. We currently estimate that our unrecognized tax benefits will decrease by approximately \$0.2 million during the next twelve months due to the resolution of certain examination procedures and the expiration of statutes of limitations.

We are subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. Based on completed examinations and the expiration of statutes of limitations, we have concluded all U.S. federal income tax matters for years through 2004. The Company reports in 13 states with various years open to examination.

**13. Employee Benefit Plans**

We maintain one active defined contribution 401(k) plan. Employees of the Company are eligible after completing six months of employment to participate in the Builders FirstSource, Inc. 401(k) Plan. Participants can contribute up to 15% of their annual compensation, subject to federally mandated maximums. Participants are immediately vested in their own contributions. We match 50 cents of each pre-tax dollar contributed by participating employees, up to 6% of employees' contributions and subject to IRS limitations. The Company's matching contributions are subject to a pro-rata five-year vesting schedule. We recognized expense of \$2.5 million, \$3.1 million and \$3.6 million in 2008, 2007 and 2006, respectively, for contributions to the plan.

In light of the difficult macroeconomic conditions that affect us, we announced that in 2009 our match will be reduced to 25 cents of each pre-tax dollar contributed by participating employees, up to 6% of employees' contributions and subject to IRS limitations.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**14. Commitments and Contingencies**

We lease certain land, buildings and equipment used in operations. These leases are generally accounted for as operating leases with terms ranging from one to 20 years and generally contain renewal options. Certain operating leases are subject to contingent rentals based on various measures, primarily consumer price index increases. Total rent expense under operating leases was approximately \$36.7 million, \$38.1 million and \$36.2 million for the years ended December 31, 2008, 2007 and 2006, respectively.

In addition, we have residual value guarantees on certain equipment leases. Under these leases we have the option of (a) purchasing the equipment at the end of the lease term, (b) arranging for the sale of the equipment to a third party, or (c) returning the equipment to the lessor to sell the equipment. If the sales proceeds in any case are less than the residual value, we are required to reimburse the lessor for the deficiency up to a specified level as stated in each lease agreement. If the sales proceeds exceed the residual value, we are entitled to all of such excess amounts. The guarantees under these leases for the residual values of equipment at the end of the respective operating lease periods approximated \$7.8 million as of December 31, 2008. Based upon the expectation that none of these leased assets will have a residual value at the end of the lease term that is materially less than the value specified in the related operating lease agreement or that we will purchase the equipment at the end of the lease term, we do not believe it is probable that we will be required to fund any amounts under the terms of these guarantee arrangements. Accordingly, no accruals have been recognized for these guarantees.

Future minimum commitments for noncancelable operating leases with initial or remaining lease terms in excess of one year are as follows:

	<u>Related Party</u>	<u>Total*</u>
	(In thousands)	
Year ending December 31,		
2009 .....	\$1,347	\$ 34,138
2010 .....	1,024	27,496
2011 .....	756	20,861
2012 .....	756	14,531
2013 .....	499	12,548
Thereafter .....	227	36,091
	<u>\$4,609</u>	<u>\$145,665</u>

\* Includes related party future minimum commitments for noncancelable operating leases.

We have outstanding letters of credit totaling \$16.6 million that principally support our self-retention insurance programs.

We are a party to various legal proceedings in the ordinary course of business. Although the ultimate disposition of these proceedings cannot be predicted with certainty, management believes the outcome of any claim that is pending or threatened, either individually or on a combined basis, will not have a material adverse effect on our consolidated financial position, cash flows or results of operations. However, there can be no assurances that future costs would not be material to our results of operations or liquidity for a particular period.

**15. Segment and Product Information**

We have three regional operating segments — Atlantic, Southeast and Central — with centralized financial and operational oversight. We believe that these operating segments meet the aggregation criteria prescribed in SFAS No. 131, *Disclosure about Segments of an Enterprise and Related Information*, and thus have one reportable segment.

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Sales by product category were as follows for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
	(In thousands)		
Prefabricated components . . . . .	\$ 204,671	\$ 316,254	\$ 443,260
Windows & doors . . . . .	255,949	358,895	461,087
Lumber & lumber sheet goods . . . . .	247,569	405,991	688,534
Millwork . . . . .	107,612	151,802	199,145
Other building products & services . . . . .	<u>218,723</u>	<u>297,585</u>	<u>364,213</u>
Total sales . . . . .	<u>\$1,034,524</u>	<u>\$1,530,527</u>	<u>\$2,156,239</u>

**16. Related Party Transactions**

An affiliate of JLL Partners, Inc. is a principal beneficial owner of PGT, Inc. Mr. Sherman serves on the board of directors for PGT, Inc. We purchased windows from PGT, Inc. totaling \$2.8 million, \$2.7 million and \$4.9 million in 2008, 2007 and 2006, respectively. We had accounts payable to PGT, Inc. in the amounts of \$0.2 million and \$0.2 million as of December 31, 2008 and 2007, respectively.

In 2008, 2007 and 2006, we paid approximately \$1.4 million, \$1.3 million and \$1.1 million, respectively, in rental expense to employees or our non-affiliate stockholders for leases of land and buildings.

**17. Concentrations**

We maintain cash at financial institutions in excess of federally insured limits. Accounts receivable potentially expose us to concentrations of credit risk. We provide credit in the normal course of business to customers in the residential construction industry. We perform ongoing credit evaluations of our customers and maintain allowances for potential credit losses. Because customers are dispersed among our various markets, our credit risk to any one customer or state economy is not significant.

Our customer mix is a balance of large national homebuilders, regional homebuilders and local homebuilders. For the year ended December 31, 2008, our top 10 customers accounted for approximately 19% of our sales, and no single customer accounted for more than 5% of sales.

We source products from a large number of suppliers. No materials purchases from any single supplier represented more than 9% of our total materials purchases in 2008.

**18. Supplemental Cash Flow Information**

Supplemental cash flow information was as follows for the years ended December 31:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
	(In thousands)		
Cash payments for interest . . . . .	\$ 24,011	\$28,780	\$27,923
Cash (refunds) payments for income taxes . . . . .	(15,169)	1,168	49,754

**BUILDERS FIRSTSOURCE, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

- (3) Includes goodwill impairment of \$36.4 million as discussed in Note 6, asset impairment charge of \$0.4 million as discussed in Note 2, facility closures costs of \$0.5 million as discussed in Note 11, and a valuation allowance of \$8.2 million as discussed in Note 12.
- (4) Includes facility closure costs of \$3.7 million as discussed in Note 5 and a valuation allowance of \$2.7 million as discussed in Note 12.
- (5) Includes goodwill impairment of \$11.9 million as discussed in Note 6.
- (6) Includes goodwill impairment of \$5.0 million as discussed in Note 6, \$1.6 million write-off of deferred financing fees as discussed in Note 9, and includes an asset impairment charge of \$0.4 million.
- (7) Includes goodwill impairment of \$6.9 million as discussed in Note 5.
- (8) Includes goodwill impairment of \$3.7 million and asset impairment charges of \$0.7 million as discussed in Note 5.

In accordance with SFAS 128, earnings per share is computed independently for each of the quarters presented; therefore, the sum of the quarterly earnings per share may not equal the annual earnings per share.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures**

*Disclosure Controls Evaluation and Related CEO and CFO Certifications.* Our management, with the participation of our principal executive officer (“CEO”) and principal financial officer (“CFO”), conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this annual report. The controls evaluation was conducted by our Disclosure Committee, comprised of senior representatives from our finance, accounting, internal audit, and legal departments under the supervision of our CEO and CFO.

Certifications of our CEO and our CFO, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended (“Exchange Act”), are attached as exhibits to this annual report. This “Controls and Procedures” section includes the information concerning the controls evaluation referred to in the certifications, and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

*Limitations on the Effectiveness of Controls.* We do not expect that our disclosure controls and procedures will prevent all errors and all fraud. A system of controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Because of the limitations in all such systems, no evaluation can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Furthermore, the design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how unlikely. Because of these inherent limitations in a cost-effective system of controls and procedures, misstatements or omissions due to error or fraud may occur and not be detected.

*Scope of the Controls Evaluation.* The evaluation of our disclosure controls and procedures included a review of their objectives and design, the Company’s implementation of the controls and procedures and the effect of the controls and procedures on the information generated for use in this annual report. In the course of the evaluation, we sought to identify whether we had any data errors, control problems or acts of fraud and to confirm that appropriate corrective action, including process improvements, were being undertaken if needed. This type of evaluation is performed on a quarterly basis so that conclusions concerning the effectiveness of our disclosure controls and procedures can be reported in our quarterly reports on Form 10-Q. Many of the components of our disclosure controls and procedures are also evaluated by our internal audit department, our legal department and by personnel in our finance organization. The overall goals of these various evaluation activities are to monitor our disclosure controls and procedures on an ongoing basis, and to maintain them as dynamic systems that change as conditions warrant.

*Conclusions regarding Disclosure Controls.* Based on the required evaluation of our disclosure controls and procedures, our CEO and CFO have concluded that, as of December 31, 2008, we maintained disclosure controls and procedures that were effective in providing reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

*Management’s Report on Internal Control Over Financial Reporting.* Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. Under the supervision and with the participation of our management, including our CEO and CFO, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework set forth in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework set forth in

Internal Control — Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2008.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2008, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

*Changes in Internal Control over Financial Reporting.* During the quarter ended December 31, 2008, there were no changes in our internal control over financial reporting identified in connection with the evaluation described above that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. Other Information**

None.

**PART III**

**Item 10. Directors, Executive Officers and Corporate Governance**

The information required by this item appears in our definitive proxy statement for our annual meeting of stockholders to be held May 22, 2009 under the captions "Proposal 1 — Election of Directors," "Continuing Directors," "Information Regarding the Board and Its Committees — Director Nomination Process," "Information Regarding the Board and Its Committees — Audit Committee," "Corporate Governance — Code of Business Conduct and Ethics," "Section 16(a) Beneficial Ownership Reporting Compliance," and "Executive Officers of the Registrant," which information is incorporated herein by reference.

**Code of Business Conduct and Ethics**

Builders FirstSource, Inc. and its subsidiaries endeavor to do business according to the highest ethical and legal standards, complying with both the letter and spirit of the law. Our board of directors has approved a Code of Business Conduct and Ethics that applies to our directors, officers (including our principal executive officer, principal financial officer and controller) and employees. Our Code of Business Conduct and Ethics is administered by a Compliance Committee made up of representatives from our legal, human resources, finance and internal audit departments.

Our employees are encouraged to report any suspected violations of laws, regulations and the Code of Business Conduct and Ethics, and all unethical business practices. We provide continuously monitored hotlines for anonymous reporting by employees.

Our board of directors has also approved a Supplemental Code of Ethics for the chief executive officer, president, and senior financial officers of Builders FirstSource, Inc., which is administered by our general counsel.

Both of these policies are listed as exhibits to this annual report on Form 10-K and can be found in the "investors" section of our corporate Web site at: [www.blr.com](http://www.blr.com).

Stockholders may request a free copy of these policies by contacting the Corporate Secretary, Builders FirstSource, Inc., 2001 Bryan Street, Suite 1600, Dallas, Texas 75201, United States of America.

In addition, within five business days of:

- Any amendment to a provision of our Code of Business Conduct and Ethics or our Supplemental Code of Ethics for the chief executive officer, president and senior financial officers of Builders FirstSource, Inc. that applies to our chief executive officer, our chief financial officer or controller; or
- The grant of any waiver, including an implicit waiver, from a provision of one of these policies to one of these officers that relates to one or more of the items set forth in Item 406(b) of Regulation S-K.

We will provide information regarding any such amendment or waiver (including the nature of any waiver, the name of the person to whom the waiver was granted and the date of the waiver) on our Web site at the Internet address above, and such information will be available on our Web site for at least a 12-month period. In addition, we will disclose any amendments and waivers to our Code of Business Conduct and Ethics or our Supplemental Code of Ethics as required by the listing standards of the NASDAQ Stock Market LLC.

**Item 11. *Executive Compensation***

The information required by this item appears in our definitive proxy statement for our annual meeting of stockholders to be held May 22, 2009 under the captions “Executive Compensation and Other Information,” “Information Regarding the Board and its Committees — Compensation of Directors,” and “Compensation Committee Interlocks and Insider Participation,” which information is incorporated herein by reference.

**Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The information required by this item appears in our definitive proxy statement for our annual meeting of stockholders to be held on May 22, 2009 under the caption “Ownership of Securities” and “Equity Compensation Plan Information,” which information is incorporated herein by reference.

**Item 13. *Certain Relationships and Related Transactions, and Director Independence***

The information required by this item appears in our definitive proxy statement for our annual meeting of stockholders to be held May 22, 2009 under the caption “Election of Directors and Management Information,” “Information Regarding the Board and its Committees,” and “Certain Relationships and Related Party Transactions,” which information is incorporated herein by reference.

**Item 14. *Principal Accountant Fees and Services***

The information required by this item appears in our definitive proxy statement for our annual meeting of stockholders to be held May 22, 2009 under the caption “Proposal 2 — Ratification of Selection of Auditors — Fees Paid to PricewaterhouseCoopers LLP,” which information is incorporated herein by reference.

**PART IV**

**Cautionary Notice** Statements in this annual report that are not purely historical facts or that necessarily depend upon future events, including statements about forecasted financial performance or other statements about anticipations, beliefs, expectations, hopes, intentions or strategies for the future, may be forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Readers are cautioned not to place undue reliance on forward-looking statements. All forward-looking statements are based upon information available to Builders FirstSource, Inc. on the date this report was submitted. Builders FirstSource, Inc. undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Any forward-looking statements involve risks and uncertainties that could cause actual events or results to differ materially from the events or results described in the forward-looking statements, including risks or uncertainties related to the company's revenues and operating results being highly dependent on, among other things, the homebuilding industry, lumber prices and the economy. Builders FirstSource, Inc. may not succeed in addressing these and other risks. Further information regarding factors that could affect our financial and other results can be found in the risk factors section of our Form 10-K included in this annual report and filed with the Securities and Exchange Commission. Consequently, all forward-looking statements in this annual report are qualified by the factors, risks and uncertainties contained therein.
