Annual Report

CRA Charles River
Associates

Charles River Associates

Charles River Associates® is a global consulting firm specializing in litigation, regulatory, and financial consulting, and management consulting. CRA advises clients on economic and financial matters pertaining to litigation and regulatory proceedings, and guides corporations through critical business strategy and performance-related issues. Since 1965, clients have engaged CRA for its unique combination of functional expertise and industry knowledge, and for its objective solutions to complex problems. Headquartered in Boston, CRA has offices throughout North America, Europe, the Middle East, and Asia. Charles River Associates is a registered trade name of CRA International, Inc.

To Our Shareholders:

We began fiscal 2009 managing through the economic downturn by focusing on our strategy for long-term growth. Although the long-term trends are positive for CRA, fiscal 2009 was one of the most challenging in our 45-year history as demand for litigation, regulatory, financial, and management consulting services was adversely impacted by the economy.

In response, we took steps to create a more competitive organization that we believe will enable us to rapidly grow profitability as business conditions improve. We divested underperforming business areas, lowered our cost structure, and enhanced the efficiency of our internal operations. Our entire team did an excellent job in this area, and we exited fiscal 2009 a leaner and more efficient organization.

At the same time, our financial position remained strong, and we continued to generate healthy cash flow. To provide continued liquidity, we amended the revolving line of credit with our bank in August and extended the maturity until April 30, 2012.

We also took steps to help grow the business in the future, recruiting a number of senior-level consultants with deep expertise and wide practice networks to generate additional revenue across our portfolio. Our Aerospace and Defense, Competition, Energy and Environment, Global Industrial Consulting, Life Sciences, and Transfer Pricing Practices all made notable hires throughout the year. In addition, our acquisition of Marakon, a leading strategy consulting firm, added an entirely new dimension to our management consulting offerings.

CRA remains well-positioned in the markets we serve. We reclaimed the name Charles River Associates in fiscal 2009 to strengthen awareness of our brand and reinforce critical points of differentiation in our marketing and business development. Our consultants advised on some of the world's most innovative consulting projects during the year.

For example, in the Middle East, we advised government agencies and private enterprises across the region on such issues as diversifying their economies, privatizing and regulating oil and gas resources, and developing basic infrastructure for utilities. In the United States, our Energy and Environment team advised on several projects to help the country move toward a clean energy future. In Europe, we worked on a number of significant mergers and antitrust projects. These included advising one of the world's leading airlines during the European Commission's review of its acquisitions of two airlines, and advising on a landmark pharmaceutical acquisition.

Our strategy in fiscal 2010 will build upon this past year's focus with an emphasis on four key elements: (1) leveraging what makes CRA distinct—our ability to combine functional capabilities and industry insight to solve the business issues at stake for our clients; (2) capitalizing on the diversity of our platform to meet the broadest range of our clients' needs; (3) investing in the professional development and growth of our people; and (4) creating a highly efficient and scalable infrastructure that minimizes costs and fosters increased productivity.

CRA is at the forefront of our industry thanks to the vision and foresight of our exceptional team. It is an honor to lead this organization. I look forward to creating new opportunities for our clients and employees, and to delivering exceptional value to our shareholders in the year ahead.

Sincerely,

A handwritten signature in black ink, appearing to read "P. Maleh".

Paul Maleh
President and Chief Executive Officer

Remembering a Leader—Carl Kaysen

Photo Credit: Martha Stewart, courtesy of the American Academy of Arts and Sciences

A long-time friend of CRA, Carl Kaysen, recently passed away. Carl was involved with CRA's Board—as both a member and as Chairman—for more than 18 years, but his role in shaping the company spanned a much longer period of time.

Carl held many roles throughout his life—economist, national security expert, adviser to President John F. Kennedy, and economics professor at Harvard and at MIT, to name just a few. During the Kennedy presidency, he advised JFK on a wide variety of topics, including disarmament, national security policy, and balance of payments. Carl was admired by many people, not only for the great things he accomplished but also for the modest and quiet way in which he accomplished them.

Carl's first involvement with CRA came in the mid-1960s, shortly after the company was founded. He suggested to President Lyndon Johnson's administration that CRA should do econometric studies of the markets for the goods in strategic stockpile that the government wanted to draw down without disrupting those markets.

In 1970, Carl was asked by Nicholas DeB. Katzenbach, then the general counsel for IBM, what economist IBM should retain as its expert witness. Carl recommended CRA, giving the company its start in antitrust litigation. Later, Carl served on the board of Polaroid and brought CRA into the Polaroid-Kodak patent litigation, another major case.

In 1986, Carl became a director of CRA and, in 1992, became CRA's first outside Chairman of the Board, a position he held for five years. He presided at a time of transition in leadership. He had a rare combination of first-class intellect, patience, understanding, and humility—traits that were appreciated, admired, and needed during a period of great change. Carl was measured and wise with his actions, and a great listener. He always showed excellent judgment and care for CRA and its people. He had good humor, was calm in crises, and generous with his time.

CRA is tremendously fortunate to have known Carl. He will long be remembered as a trusted friend and advisor to CRA.

Our website provides a link to a third-party website through which our annual, quarterly, and current reports, and amendments to those reports, are available free of charge. We believe these reports are made available as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. We do not maintain or provide any information directly to the third-party website, and we do not check its accuracy.

Our website also includes information about our corporate governance practices. The Investor Relations page of our website provides a link to a web page where you can obtain a copy of our code of ethics applicable to our principal executive officer, principal financial officer, and principal accounting officer.

Introduction

We are a leading global consulting firm that offers economic, financial, and business management consulting expertise and applies advanced analytic techniques and in-depth industry knowledge to complex engagements for a broad range of clients. Founded in 1965, we work with major law firms, businesses, accounting firms, and governments in providing original, authoritative advice and a wide range of services. We combine economic and financial analysis with expertise in litigation and regulatory support, business strategy and planning, market and demand forecasting, policy analysis, and engineering and technology strategy. We are often retained in high-stakes matters, such as multibillion-dollar mergers and acquisitions, new product introductions, major strategy and capital investment decisions, and complex litigation, the outcomes of which often have significant consequences for the parties involved. These matters often require independent analysis, and as a result companies must rely on outside experts. Our analytical strength enables us to reach objective, factual conclusions that help clients make important business and policy decisions and resolve critical disputes. Companies turn to us because we can provide large teams of highly credentialed and experienced economic and finance experts to address critical, tough assignments with high-stakes outcomes.

We offer consulting services in two broad areas: litigation, regulatory, and financial consulting and management consulting. These two areas represented approximately 97% of our consolidated revenues in fiscal 2009. The remaining 3% came from our NeuCo subsidiary. We provide our services primarily through our highly credentialed and experienced staff of employee consultants. As of November 28, 2009, we employed 586 consultants, including approximately 125 employee consultants with doctorates and approximately 237 employee consultants with other advanced degrees. Our employee consultants have backgrounds in a wide range of disciplines, including economics, business, corporate finance, materials sciences, accounting, and engineering. We are extremely selective in our hiring of consultants, recruiting from leading universities, industry, and government. Many of our employee consultants are nationally or internationally recognized as experts in their respective fields and have published scholarly articles, lectured extensively, and have been quoted in the press. To enhance the expertise we provide

to our clients, we maintain close working relationships with a select group of renowned academic and industry non-employee experts.

Our business is diversified across multiple dimensions, including service offerings and vertical industry coverage, as well as areas of functional expertise, client base, and geography. Through 21 offices located around the world, we provide multiple services across 21 areas of functional expertise to hundreds of clients across 17 vertical industries. We believe this diversification reduces our dependence on any particular market, industry, or geographic area.

We provide consulting services to corporate clients and attorneys in a wide range of litigation and regulatory proceedings, providing high-quality research and analysis, expert testimony, and comprehensive support in litigation and regulatory proceedings in all areas of finance, accounting, economics, insurance, and forensic accounting and investigations. We also use our expertise in economics, finance, and business to offer law firms, businesses, and government agencies services related to class certification, damages analysis, expert reports and testimony, regulatory analysis, strategy development, valuation of tangible and intangible assets, risk management, and transaction support. In our management consulting services, we use our expertise in economics, finance, and business analysis to offer our clients such services as strategy development, performance improvement, corporate portfolio analysis, estimation of market demand, new product pricing strategies, valuation of intellectual property and other assets, assessment of competitors' actions, and analysis of new sources of supply. Our analytical expertise in advanced economic and financial methods is complemented by our in-depth expertise in specific industries, including aerospace and defense; banking and capital markets; chemicals; energy and utilities; financial services; healthcare; insurance; manufacturing; media; mining, metals and materials; oil and gas; pharmaceuticals; real estate; retail; sports; telecommunications; and transportation.

We have completed thousands of engagements for clients around the world, including domestic and foreign companies; federal, state, and local domestic government agencies; governments of foreign countries; public and private utilities; and national and international trade associations. Our clients come from a broad range of industries, with our top 10 clients in fiscal 2009, fiscal 2008, and fiscal 2007 accounting for approximately 14%, 18%, and 19% of our revenues, respectively, and no single client accounting for more than 5% of our revenues. We also work with many of the world's leading law firms. We experience a high level of repeat business; in both fiscal 2009 and fiscal 2008, approximately 91%, and in fiscal 2007 approximately 89% of our revenues resulted from either ongoing engagements or new engagements for existing clients.

We deliver our services through a global network of 21 coordinated offices. Headquartered in Boston, we have offices throughout North America, Europe, the Middle East, and Asia.

Industry Overview

Businesses are operating in an increasingly complex economic, legal and regulatory environment. Our changing world economy has created immense challenges and opportunities for businesses. Companies across industry sectors are seeking new strategies appropriate for the current recessionary environment, as well as greater operational efficiencies. To accomplish these objectives, they must constantly gather, analyze, and use information wisely to assure that business decisions are well-informed. In addition, markets have become increasingly global, offering companies the opportunity to expand their presence throughout the world and exposing them to increased competition and the uncertainties of foreign operations. Further, companies are increasingly relying on technological and business innovations to improve efficiency, thus increasing the importance of strategically analyzing their businesses and developing and protecting new technology. The increasing complexity and changing nature of the business environment are also forcing governments to modify their regulatory strategies. These constant changes in the regulatory environment have led to frequent litigation and interaction with government agencies as companies attempt to interpret and react to the implications of this changing environment. Furthermore, as the general business and regulatory environment becomes more

complex, corporate litigation has also become more complicated, protracted, expensive, and important to the parties involved.

As a result, companies are increasingly relying on sophisticated economic and financial analysis to solve complex problems and improve decision-making. Economic and financial models provide the tools necessary to analyze a variety of issues confronting businesses, such as interpretation of sales data, effects of price changes, valuation of assets, assessment of competitors' activities, evaluation of new products, and analysis of supply limitations. Governments are also relying, to an increasing extent, on economic and finance theory to measure the effects of anticompetitive activity, evaluate mergers and acquisitions, change regulations, implement auctions to allocate resources, and establish transfer pricing rules. Finally, litigants and law firms are using economic and finance theory to help determine liability and to calculate damages in complex and high-stakes litigation. As the need for complex economic and financial analysis becomes more widespread, companies and governments are turning to outside consulting firms, such as ours, for access to the independent, specialized expertise, experience, and prestige that are not available to them internally.

Lastly, the marketplace has become more global over time, resulting in consulting firms expanding overseas to continue to address the needs of clients and to provide more sophisticated solutions to complex issues that cross global boundaries.

Competitive Strengths

Since 1965, we have been committed to providing sophisticated consulting services to our clients. We believe that the following factors have been critical to our success.

Strong Reputation for High-Quality Consulting; High Level of Repeat Business. For more than 40 years, we have been a leader in providing sophisticated economic analysis and original, authoritative advice to clients involved in complex litigation and regulatory proceedings. As a result, we believe we have established a strong reputation among leading law firms and business clients as a preferred source of expertise in economics, finance, business, and strategy consulting, as evidenced by our high level of repeat business. In both fiscal 2009 and fiscal 2008, approximately 91% of our revenues and in fiscal 2007 approximately 89% of our revenues resulted from ongoing engagements or new engagements from repeat clients. In addition, we believe our significant name recognition, which we developed as a result of our work on many high-profile litigation and regulatory engagements, has enhanced the development of our management consulting practice.

Highly Educated, Experienced, and Versatile Consulting Staff. We believe our most important asset is our base of employee consultants, particularly our senior consultants. Of our 586 employee consultants as of November 28, 2009, 449 were either vice presidents, principals, associate principals, senior associates, or consulting associates, of whom approximately 76% have a doctorate or other advanced degree. Many of these senior employee consultants are nationally or internationally recognized as experts in their respective fields. In addition to their expertise in a particular field, most of our employee consultants are able to apply their skills across numerous practice areas. This flexibility in staffing engagements is critical to our ability to apply our resources as needed to meet the demands of our clients. As a result, we seek to hire consultants who not only have strong analytical skills but who are also creative, intellectually curious, and driven to develop expertise in new practice areas and industries.

Global Presence. We deliver our services through a global network of 21 coordinated offices. Headquartered in Boston, we have offices throughout North America, Europe, the Middle East, and Asia. Many of our clients are multi-national firms with issues that cross international boundaries, and we believe our global presence provides us with a competitive advantage to address complex issues that span countries and continents. Our global presence also gives us access to many of the leading experts around the world on a variety of issues, allowing us to expand our knowledge base and areas of functional expertise.

Diversified Business. Our business is diversified across multiple dimensions, including service offerings, vertical industry coverage, areas of expertise, client base, and geography. By maintaining expertise in multiple industries, we are able to offer clients creative and pragmatic advice tailored to their specific markets. By offering clients economic, financial, and management consulting services, we are able to satisfy an array of client needs, ranging from expert testimony for complex lawsuits to designing global business strategies. This broad range of expertise enables us to take an interdisciplinary approach to certain engagements, combining economists and experts in one area with specialists in other disciplines. We believe this diversification reduces our dependence on any particular market, industry, or geographic area. Furthermore, our litigation, regulatory, and financial consulting businesses are driven primarily by regulatory changes and high-stakes legal proceedings. Our diversity also enhances our expertise and the range of issues that we can address on behalf of clients.

Integrated Business. We manage our business on an integrated basis through our global network of 21 offices and 21 areas of functional expertise. Each of our practice areas operates and is managed across geographic borders and has representative officers and other consultants in several of our offices. We view these cross-border practices as integral to our success and key to our management approach. Our practices share not only staff extensively but also consulting approaches, technical data and analysis, research, and marketing strategies across borders. When we acquire companies, our practice is to rapidly integrate systems, procedures, and people into our business model. In addition to sharing our intellectual property assets globally, we encourage geographic collaboration among our practices by including a consultant's overall contribution to our practices as a factor in determining a consultant's annual bonus.

Diversified Client Base. We have completed thousands of engagements for clients in a broad range of industries around the world. In fiscal 2009, fiscal 2008, and fiscal 2007, our top 10 clients accounted for approximately 14%, 18%, and 19% of our revenues, respectively, with no single client accounting for more than 5% of our revenues. Our clients include major firms across a multitude of industries that include: aerospace and defense; banking and capital markets; chemicals; energy and utilities; financial services; healthcare; insurance; manufacturing; media; mining, metals, and materials; oil and gas; pharmaceuticals; real estate; retail; sports; telecommunications; and transportation.

Established Corporate Culture. Our success results in part from our established corporate culture. We believe we attract consultants because of our more than 40-year history, our strong reputation, the credentials, experience, and reputations of our employee consultants, the opportunity to work on an array of matters with a broad group of renowned non-employee experts, and our collegial atmosphere where teamwork and collaboration are emphasized and valued by many clients. We believe our corporate culture also contributes to our ability to successfully integrate our acquisitions.

Access to Leading Academic and Industry Experts. To enhance the expertise we provide to our clients and the depth and breadth of our insights, we maintain close working relationships with a select group of non-employee experts. Depending on client needs, we use non-employee experts for their specialized expertise, assistance in conceptual problem-solving, and expert witness testimony. We work regularly with renowned professors at such institutions as Cornell University, Georgetown University, Harvard University, the Massachusetts Institute of Technology, Stanford University, Texas A&M University, the University of California at Berkeley, the University of California at Los Angeles, the University of Chicago, the University of Toronto, the University of Virginia, and other leading universities. These experts also generate business for us and provide us access to other leading academic and industry experts. By establishing affiliations with these prestigious experts, we further enhance our reputation as a leading source of sophisticated economic and financial analysis. We have exclusive relationships with 43 non-employee experts and non-exclusive relationships with numerous other experts.

Services

We offer services in two broad areas: litigation, regulatory, and financial consulting and management consulting. Engagements in our two service areas often involve similar areas of expertise and address related issues, and it is common for our consultants to work on engagements in both service areas. Together, these two service areas comprised approximately 97% of our consolidated revenues in fiscal 2009, and approximately 3% came from our NeuCo subsidiary.

Litigation, Regulatory, and Financial Consulting

In our litigation, regulatory, and financial consulting practices, we typically work closely with law firms on behalf of one or more companies involved in litigation or regulatory proceedings in such areas as antitrust, damages, labor and employment, and product liability. Many of the lawsuits and regulatory proceedings in which we are involved are critical assignments with high-stakes outcomes, such as obtaining regulatory approval of a pending merger or analyzing possible damages awards in a securities fraud case. The ability to formulate and effectively communicate powerful economic and financial arguments to courts and regulatory agencies is often critical to a successful outcome in litigation and regulatory proceedings. Our consultants combine uncommon analytical rigor with practical experience and in-depth understanding of industries and markets. Our analytical strength enables us to reach objective, factual conclusions that help our clients make important business and policy decisions and resolve critical disputes. Our consultants work with law firms, corporate counsel, and regulatory agencies to assist in developing the theory of the case and in preparing the testimony of expert witnesses from among our employees and from among our non-employee experts and others in academia. In addition, our consultants provide general litigation support, including reviewing legal briefs and assisting in the appeals process.

The following is a summary of the areas of functional expertise that we offer in litigation, regulatory, and financial consulting engagements.

<u>Areas of Functional Expertise</u>	<u>Description of Services</u>
Financial Accounting & Valuation	Advise corporate clients on commercial and shareholder disputes; corporate finance damages advisory; corporate investigations; due diligence; financial accounting; valuation and litigation support and expert testimony, including both liability and damages.
Financial Economics	Consulting and expert testimony regarding regulatory and litigation matters pertaining to financial markets. Areas of expertise include regulatory analyses and litigation support for financial institutions in areas of fair lending compliance, credit risk, credit scoring, consumer and mortgage lending, housing markets, international mortgage markets, and securitization. Analyses also include valuations and estimates of damages associated with breaches of contract, national laws, and international treaties and the effects of market rules, processes, and contracts on prices and competition.
Financial Markets	Provide sophisticated consulting services to corporate clients, attorneys, and government agencies, and apply the tools, principles, and findings of financial economics and accounting to complex litigation and business problems. Service offerings include the areas of securities litigation; securities markets and financial institutions; valuation and damages; and other types of financial litigation.

<u>Areas of Functional Expertise</u>	<u>Description of Services</u>
Forensic Services	Provide written and oral expert evidence, professional investigations, and technical litigation support services to major law firms, regulators, wealthy individuals, and corporations. Advise in the areas of complex accounting issues, significant quantum of loss calculations, economic and financial crime, fraud, corruption, bribery, and other issues that threaten the integrity or reputation of organizations.
Global Antitrust & Competition Economics	Provide expert economic testimony and analysis on behalf of law firms and their clients involved in antitrust litigation. Areas of expertise include economic analysis of the competitive effects of alleged collusion and cartels, monopolization, abuse of dominance, monopsony, and vertical restrictions.
Insurance Economics	Advise insurers, regulators, and legislators in areas of management, insurance products, and litigation and regulation.
Intellectual Property	Provide valuation, litigation, transaction, and strategic advisory services related to all types of intellectual property assets including patents, trade secrets, copyrights, and trademarks. Services include expert testimony regarding economic damages in intellectual property litigation, valuations of intellectual property assets for strategic and regulatory purposes, and transactional advisory services for licensing and other intellectual property-rich transactions.
International Arbitration	Provide economic expertise in international arbitration cases brought under bilateral investment treaties and arbitration clauses in contracts between firms. Assist clients and counsel in assessing causation and quantifying damages using sophisticated modeling and analytical techniques and presenting findings to arbitration authorities.
Labor & Employment	Provide expert witness and litigation support services across all economic facets of employment litigation including equal employment opportunity claims under Title VII, the Age Discrimination in Employment Act (ADEA), the Equal Pay Act (EPA), and the Americans with Disabilities Act (ADA). Services include conducting proactive analyses of employment and contracting practices, monitoring consent decrees and settlement agreements, designing information systems to track relevant employment data, and analyzing liability and assessing damages under the Fair Labor Standards Act (FLSA), California overtime laws, and state-specific wage and hour laws.
Litigation & Arbitration Support	Provide expert witness testimony for and advise law firms, corporate counsel, and regulatory agencies on litigation and regulatory proceedings in areas of antitrust, damages, labor and employment, and product liability. Additionally, advise insured parties, underwriters, and their counsel with comprehensive services, including merit assessment, quantum analysis, presentation of findings, and assistance in settlement negotiations on commercial, institutional, and capital-intensive projects.

<u>Areas of Functional Expertise</u>	<u>Description of Services</u>
Mergers & Acquisitions . . .	Provide economic analysis to assist clients in obtaining domestic and foreign regulatory approvals in proceedings before government agencies such as the U.S. Federal Trade Commission, the U.S. Department of Justice, the Merger Task Force at the European Commission, and the Canadian Competition Bureau. Analyses include simulating the effects of mergers on prices, estimating demand elasticities, designing and administering customer and consumer surveys, and studying possible acquisition-related synergies.
Regulation	Provide and support expert witness testimony in regulatory proceedings, assist clients in understanding and mitigating regulatory risks and exposures, prepare policy studies that help develop the basis for sound regulatory policy, assist counsel with drafting regulatory filings, and advise on regulations pertaining to environmental protection, employment, and health and safety.
Transfer Pricing	Provide expert analysis and testimony to support law firms and other clients in all phases of the tax cycle, including planning, documentation, and tax valuation. Also provide audit defense and support in advanced pricing agreements, alternative dispute resolution or litigation in proceedings involving the Internal Revenue Service, the Tax Division of the U.S. Department of Justice, state and municipal tax authorities, and foreign tax entities.

Management Consulting

Our management consulting practices offer a unique mix of industry and functional expertise to help companies address and solve their most difficult and complex business problems. We advise clients in a broad range of industries on how to succeed in uncertain, rapidly-changing environments by generating growth, creating value, and enhancing shareholder wealth.

Additionally, we challenge clients to develop fresh approaches by sharing industry insights, focusing on facts, and questioning tradition. We support clients in implementation by setting priorities, focusing resources, and aligning operations; and we get results by helping clients make distinctive, substantial improvements in their organizations' performance.

The following is a summary of the areas of functional expertise that we offer in management consulting.

<u>Areas of Functional Expertise</u>	<u>Description of Services</u>
Auctions & Competitive Bidding	Provide auction and market design, implementation, and monitoring services, as well as bidding support services, for businesses, industry organizations, and governments in various industries around the world including commodities, energy and utilities, telecommunications, transportation, healthcare, and aerospace & defense.

Areas of Functional Expertise	Description of Services
Corporate & Business Strategy	Advise on business strategy, corporate revitalizations, and organizational effectiveness by bringing new ways of thinking to companies and new ways of working to develop better strategies over time and identify the highest-value opportunities for clients, address their most critical challenges, and transform their business. Advise CEOs and executive management teams on corporate and business unit strategy, market analysis, portfolio management, pricing strategy, and product positioning. Areas of expertise include strategy, execution, organic growth, growth through acquisition, productivity, risk management, leadership and organization, and managing for value.
Enterprise Risk Management	Provide expert witness testimony for and advise large financial institutions and corporations in areas of governance and strategy; process; analytics; and technology related to risk management.
Environmental Strategy	Provide expert witness testimony for and advise companies on corporate strategy to address risks and uncertainties surrounding greenhouse gas policy and other environmental policy developments; business models that adapt to future environmental policy; investment decision-making processes that account for environmental policy uncertainty; environmental strategic compliance options with regulations/legislation; emissions trading planning surrounding cap-and-trade policies; regulatory/litigation support in conflict situations involving costs/damages resulting from claims related to the environment; and identification of business opportunities that could relate to environmental trends.
Intellectual Property & Technology Management	Advise top management, investors, and boards on technology strategy and planning, R&D management, commercialization, technology market evaluation, intellectual property management, and portfolio and resource management.
Organization & Performance Improvement	Advise corporate clients in areas of revenue growth drivers; operating margin drivers; asset efficiency drivers; key enablers; and performance management and metrics.
Public Policy & Regulatory Economics	Provide public policy, expert witness testimony, and other support in regulatory proceedings by assisting clients in understanding and mitigating regulatory risks and exposures, preparing policy studies that help develop the basis for sound regulatory policy, assisting counsel with drafting regulatory filings, and advising on regulations pertaining to environmental protection, employment, and health and safety.
Transaction Advisory Services	Advise business leaders, including buyers and sellers, in the areas of due diligence; mergers and acquisitions; private equity; and valuation.

During fiscal 2008, we operated under three platforms: (i) finance, (ii) litigation and applied economics, and (iii) business consulting. Our finance platform provided services in enterprise risk management, financial accounting and valuation, financial markets, forensic services, insurance economics, and legal business consulting. Our litigation and applied economics platform provided services in financial economics, global antitrust and competition economics, intellectual property,

international arbitration, international trade, labor and employment, mergers and acquisitions, regulation, and services to financial institutions. Our business consulting platform offered services in auctions and competitive bidding, competitive strategy, environmental strategy, intellectual property and technology management, litigation and arbitration support, organization and performance improvement, public policy and regulatory economics, risk management, and transaction advisory services. In 2008, we discontinued our capital projects and legal business consulting services.

Industry Expertise

We believe our ability to combine expertise in advanced economic and financial methods with in-depth knowledge of particular industries is one of our key competitive strengths. By maintaining expertise in certain industries, we provide clients practical advice tailored to their specific markets. This industry expertise, which we developed over decades of providing sophisticated consulting services to a diverse group of clients in many industries, differentiates us from many of our competitors. We believe that we have developed a strong reputation and substantial name recognition within specific industries, which has led to repeat business and new engagements from clients in those markets. While we provide services to clients in a wide variety of industries, we have particular expertise in the following industries:

- Aerospace & Defense
- Banking & Capital Markets
- Chemicals
- Energy and Utilities
- Financial Service
- Healthcare
- Insurance
- Manufacturing
- Media
- Mining, Metals, and Materials
- Oil & Gas
- Pharmaceuticals
- Real Estate
- Retail
- Sports
- Telecommunications
- Transportation

Clients

We have completed thousands of engagements for clients around the world, including domestic and foreign corporations; federal, state, and local domestic government agencies; governments of foreign countries; public and private utilities; accounting firms; and national and international trade associations. Very frequently, we work with major law firms who approach us on behalf of their clients. While we have particular expertise in a number of industries, we provide services to a diverse group of clients in a broad range of industries. No single client accounted for more than 5% of our revenues in fiscal 2009, fiscal 2008, or fiscal 2007. Our policy is to keep the identities of our clients confidential unless our work for the client is already publicly disclosed. See Note 14 of our Notes to Consolidated Financial Statements for a breakdown of our revenue by country.

Software Subsidiary

NeuCo, Inc. develops and markets a family of neural network software tools and complementary application consulting services that are currently focused on electric utilities. Although NeuCo had its origins in one of our consulting engagements, it is primarily a software company that operates independently from our consulting business. NeuCo's products and services are designed to help utilities optimize the use of their power plants by improving heat rate, reducing emissions, overcoming operating constraints, and increasing output capability.

In fiscal 2007, and the majority of fiscal 2008, our interest in NeuCo was 36.4%. As such, we accounted for our investment in NeuCo under the equity method of accounting. During the fourth quarter of fiscal 2008, NeuCo acquired 100% of Rio Tinto Energy America Services Company's investment in NeuCo. As a result of this transaction, our ownership interest in NeuCo increased to 49.15% and combined with our officers holding three Board of Director seats, and other considerations, our ownership constitutes control under GAAP. NeuCo's financial results since this transaction have been consolidated with ours and the portion of the results of operations of NeuCo allocable to its other owners is shown as "minority interest". NeuCo's revenues included in our consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$8.9 million and \$0.8 million, respectively. NeuCo's net loss included in our consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$1.5 million and \$71,000, respectively. NeuCo's net loss, net of amounts allocable to its other owners, included in our consolidated statements of income for fiscal 2009 and fiscal 2008 totaled \$0.8 million and \$0.4 million, respectively.

Human Capital

On November 28, 2009, we had 777 employees, including 586 employee consultants, comprising 143 vice presidents, 306 other senior employee consultants (either principals, associate principals, senior associates, or consulting associates) and 137 junior consultants (either associates, analysts, or staff), as well as 191 administrative staff members. Vice presidents and principals generally work closely with clients, supervise junior consultants, provide expert testimony on occasion, and seek to generate business for CRA. Principals, associate principals, senior associates, and consulting associates typically serve as project managers and handle complex research assignments. Consulting associates, associates, and analysts gather and analyze data sets and complete statistical programming and library research.

We derive most of our revenues directly from the services provided by our employee consultants. Our employee consultants were responsible for securing engagements that accounted for approximately 83%, 82%, and 86% of our total revenues in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. Our top five employee consultants generated approximately 11% of our total revenues in fiscal 2009 and fiscal 2008, respectively, and 11% of our total revenues in fiscal 2007. Our employee consultants have backgrounds in many disciplines, including economics, business, corporate finance, accounting, materials sciences, and engineering. Approximately 76% of our senior employee consultants, consisting of vice presidents, principals, associate principals, senior associates, and consulting associates, have either a doctorate or another advanced degree in addition to substantial management, technical, or industry expertise. Of our total senior employee consulting staff of 449 as of November 28, 2009, approximately 125 have doctorates, and approximately 218 have other advanced degrees. We believe our financial results and reputation are directly related to the number and quality of our employee consultants.

We are highly selective in our hiring of consultants, recruiting primarily from a select group of leading universities and degree programs, industry, and government. We believe consultants choose to work for us because of our strong reputation; the credentials, experience, and reputations of our consultants; the opportunity to work on a diverse range of matters and with renowned non-employee experts; and our collegial atmosphere where teamwork and collaboration are emphasized and valued by many clients. We use a decentralized, team hiring approach. Our training and career development program for our employee consultants focuses on three areas: supervision, seminars, and scheduled courses. This program is designed to complement on-the-job experience and an employee's pursuit of his or her own career development. New employee consultants participate in a structured program in

which they are partnered with an assigned mentor. Through our ongoing seminar program, outside speakers make presentations and conduct discussions with our employee consultants on various topics. In addition, employee consultants are expected to present papers, discuss significant projects and cases, or outline new analytical techniques or marketing opportunities periodically at in-house seminars. We also provide scheduled courses designed to improve an employee's professional skills, such as presentation and sales and marketing techniques, and business development. We also encourage our employee consultants to pursue their academic interests by writing articles for economic and other journals.

Many of our vice presidents have signed non-solicitation agreements, which generally prohibit the employee from soliciting our clients or soliciting and/or hiring our employees for one year or longer following termination of the person's employment with us. In addition, many of the stock options we have issued since 2004 contain a provision that they may only be exercised upon the execution of a non-competition agreement. We seek to align each vice president's interest with our overall interests, and most of our vice presidents have an equity interest in us.

We maintain a discretionary bonus program through which we grant performance-based bonuses to our officers and other employees. In addition, during fiscal 2009, we implemented a long-term incentive program for certain key employees. Under this program, participants are eligible for stock options, restricted stock units, and performance based restricted stock units. The program is designed to reward key employees and provide participants the opportunity to share in the long-term growth of our business. The Compensation Committee of our Board of Directors, in its discretion, determines the bonuses to be granted to our officers, and our chief executive officer, in his discretion and in consultation with the Compensation Committee of our Board of Directors, approves the bonuses to be granted to our other employees, based on recommendations of the various committees supervising the employees' work. In fiscal 2007, our shareholders approved a performance-based plan for executive officers that allows us to deduct certain compensation paid to executive officers that would not otherwise be deductible under Section 162(m) of the Internal Revenue Code.

In addition, we work closely with a select group of non-employee experts from leading universities and industry. These experts supplement the work of our employee consultants and generate business for us. In fiscal 2009, fiscal 2008, and fiscal 2007, five of our exclusive non-employee experts were responsible for securing engagements that accounted for approximately 9%, 11%, and 11% of our revenues in those years. We believe these experts choose to work with us because of the interesting and challenging nature of our work, the opportunity to work with our quality-oriented consultants, and the financially rewarding nature of the work. Forty-three non-employee experts, generally comprising the more active of those with whom we work, have entered into restrictive covenant contracts, which, in some cases, include non-competition agreements, of varying lengths with us as of November 28, 2009.

Marketing and Business Development

We rely to a significant extent on the efforts of our employee consultants, particularly our vice presidents and principals, to market our services. We encourage our employee consultants to generate new business from both existing and new clients, and we reward our employee consultants with increased compensation and promotions for obtaining new business. In pursuing new business, our consultants emphasize our institutional reputation and experience, while also promoting the expertise of the particular employees who will work on the matter. Many of our consultants have published articles in industry, business, economic, legal, and scientific journals, and have made speeches and presentations at industry conferences and seminars, which serve as a means of attracting new business and enhancing their reputations. On occasion, employee consultants work with one or more non-employee experts to market our services.

We supplement the personal marketing efforts of our employee consultants with firm-wide initiatives. We rely primarily on our reputation and client referrals for new business and undertake traditional marketing activities. We regularly organize seminars for existing and potential clients featuring panel members that include our consultants, non-employee experts, and leading government

officials. We have an extensive set of brochures organized around our service areas, which describe our experience and capabilities. We also provide information about our services on our corporate website. We distribute publications to existing and potential clients highlighting emerging trends and noteworthy engagements. Because existing clients are an important source of repeat business and referrals, we communicate regularly with our existing clients to keep them informed of developments that affect their markets and industries.

We derive the majority of new business from new engagements from existing clients. We have worked with leading law firms across the globe and believe we have developed a reputation among law firms as a preferred source of sophisticated economic advice for litigation and regulatory work. For our management consulting services, we also rely on referrals from existing clients, but supplement referrals with a significant amount of direct marketing to new clients through conferences, seminars, publications, presentations, and direct solicitations.

It is important to us that we conduct business ethically and in accordance with industry standards and our own rigorous professional standards. We carefully consider the pursuit of each specific market, client, and engagement.

Competition

The market for economic and management consulting services is intensely competitive, highly fragmented, and subject to rapid change. In general, there are few barriers to entry into our markets, and we expect to face additional competition from new entrants into the economic and management consulting industries. In the litigation, regulatory, and financial consulting markets, we compete primarily with other economic consulting firms and individual academics. We believe the principal competitive factors in this market are reputation, analytical ability, industry expertise, size, and service. In the management consulting market, we compete primarily with other business and management consulting firms, specialized or industry-specific consulting firms, the consulting practices of large accounting firms, and the internal professional resources of existing and potential clients. We believe the principal competitive factors in this market are reputation, industry expertise, analytical ability, service, and price.

Item 1A—Risk Factors

Our operations are subject to a number of risks. You should carefully read and consider the following risk factors, together with all other information in this report, in evaluating our business. If any of these risks, or any risks not presently known to us or that we currently believe are not significant, develops into an actual event, then our business, financial condition, and results of operations could be adversely affected. If that happens, the market price of our common stock could decline, and you may lose all or part of your investment.

Continuing deterioration of global economic conditions, global market and credit conditions, and regulatory and legislative changes affecting our clients, practice areas, competitors, or staff could have an impact on our business

Overall global economic conditions and global market and credit conditions in the industries we service have negatively impacted the market for our services and could continue to do so. A number of factors outside of our control include the availability of credit, the costs and terms of borrowing, merger and acquisition activity, and general economic factors and business conditions. For example, the current global economic recession has resulted in, and may continue to result in, reduced merger and acquisition activity levels.

Similarly, many of our clients are in highly regulated industries. Regulatory and legislative changes in these industries could also impact the market for our service offerings and could render our current service offerings obsolete, reduce the demand for our services, or impact the competition for consulting and expert services. For example, potential changes in the patent laws could have a significant impact

on our intellectual property practice. We are not able to predict the positive or negative effects that future events or changes to the U.S. or international business environment could have on our operations.

We depend upon key employees to generate revenue

Our business consists primarily of the delivery of professional services, and accordingly, our success depends heavily on the efforts, abilities, business generation capabilities, and project execution capabilities of our employee consultants. In particular, our employee consultants' personal relationships with our clients are a critical element in obtaining and maintaining client engagements. If we lose the services of any employee consultant or group of employee consultants, or if our employee consultants fail to generate business or otherwise fail to perform effectively, that loss or failure could adversely affect our revenues and results of operations. Our employee consultants generated engagements that accounted for approximately 83%, 82%, and 86% of our revenues in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. Our top five employee consultants generated approximately 11% of our revenues in fiscal 2009 and fiscal 2008, respectively, and 10% of our revenues in fiscal 2007.

We do not have non-competition agreements with the majority of our employee consultants, and they can terminate their relationships with us at will and without notice. The non-competition and non-solicitation agreements that we have with some of our employee consultants offer us only limited protection and may not be enforceable in every jurisdiction. In the event that employees leave, such clients may decide that they prefer to continue working with the employee rather than with us. In the event an employee departs and acts in a way that we believe violates their non-competition or non-solicitation agreement, we will consider any legal remedies we may have against such person on a case-by-case basis. We may decide that preserving cooperation and a professional relationship with the former employee or client, or other concerns, outweigh the benefits of any possible legal recovery.

Competition from other economic, litigation support, and management consulting firms could hurt our business

The market for economic, litigation support, and management consulting services is intensely competitive, highly fragmented, and subject to rapid change. We may be unable to compete successfully with our existing competitors or with any new competitors. In general, there are few barriers to entry into our markets, and we expect to face additional competition from new entrants into the economic and management consulting industries. In the litigation, regulatory, and financial consulting markets, we compete primarily with other economic and financial consulting firms and individual academics. In the management consulting market, we compete primarily with other business and management consulting firms, specialized or industry-specific consulting firms, the consulting practices of large accounting firms, and the internal professional resources of existing and potential clients. Many of our competitors have national or international reputations as well as significantly greater personnel, financial, managerial, technical, and marketing resources than we do, which could enhance their ability to respond more quickly to technological changes, finance acquisitions, and fund internal growth. Some of our competitors also have a significantly broader geographic presence and resources than we do.

Our international operations create special risks

Our international operations carry special financial and business risks, including:

- greater difficulties in managing and staffing foreign operations;
- difficulties in maintaining world-wide utilization levels;
- lower margins;
- currency fluctuations that adversely affect our financial position and operating results;
- unexpected changes in trading policies, regulatory requirements, tariffs, and other barriers;

- different practices in collecting accounts receivable;
- increased selling, general, and administrative expenses associated with managing a larger and more global organization;
- longer sales cycles;
- restrictions on the repatriation of earnings;
- potentially adverse tax consequences, such as trapped foreign losses;
- the impact of differences in the governmental, legal and regulatory environment in foreign jurisdictions, as well as U.S. laws and regulations related to our foreign operations;
- less stable political and economic environments; and
- civil disturbances or other catastrophic events that reduce business activity.

We conduct a portion of our business in the Middle East. At times, the ongoing turmoil in the region could interrupt our business operations in that region and slow the flow of new opportunities and proposals, which can ultimately affect our revenues and results of operations.

If our international revenues increase relative to our total revenues, these factors could have a more pronounced effect on our operating results.

Maintaining our professional reputation is crucial to our future success

Our ability to secure new engagements and hire qualified consultants as employees depends heavily on our overall reputation as well as the individual reputations of our employee consultants and principal non-employee experts. Because we obtain a majority of our new engagements from existing clients, any client that is dissatisfied with our performance on a single matter could seriously impair our ability to secure new engagements. Given the frequently high-profile nature of the matters on which we work, including work before and on behalf of government agencies, any factor that diminishes our reputation or the reputations of any of our employee consultants or non-employee experts could make it substantially more difficult for us to compete successfully for both new engagements and qualified consultants.

Our business could suffer if we are unable to hire and retain additional qualified consultants as employees

Our business continually requires us to hire highly qualified, highly educated consultants as employees. Our failure to recruit and retain a significant number of qualified employee consultants could limit our ability to accept or complete engagements and adversely affect our revenues and results of operations. Relatively few potential employees meet our hiring criteria, and we face significant competition for these employees from our direct competitors, academic institutions, government agencies, research firms, investment banking firms, and other enterprises. Many of these competing employers are able to offer potential employees significantly greater compensation and benefits or more attractive lifestyle choices, career paths, or geographic locations than we can. Competition for these employee consultants has increased our labor costs, and a continuation of this trend could adversely affect our margins and results of operations.

In addition, we utilize loans with some of our employees and non-employee experts, other than our executive officers, as a way to attract and retain them. A portion of these loans are collateralized. Defaults under these loans could have a material adverse affect on our consolidated statements of income, financial condition and liquidity.

Our failure to execute our business strategy or manage future growth successfully could adversely affect our revenues and results of operations

Any failure on our part to execute our business strategy or manage future growth successfully could adversely affect our revenues and results of operations. In the future, we could open offices in

new geographic areas, including foreign locations, and expand our employee base as a result of internal growth and acquisitions. Opening and managing new offices often requires extensive management supervision and increases our overall selling, general, and administrative expenses. Expansion creates new and increased management, consulting, and training responsibilities for our employee consultants. Expansion also increases the demands on our internal systems, procedures, and controls, and on our managerial, administrative, financial, marketing, and other resources. We depend heavily upon the managerial, operational, and administrative skills of our executive officers to manage our expansion and business strategy. New responsibilities and demands may adversely affect the overall quality of our work.

We depend on our non-employee experts

We depend on our relationships with our exclusive non-employee experts. In fiscal 2009, fiscal 2008, and fiscal 2007, five of our exclusive non-employee experts generated engagements that accounted for approximately 9%, 11%, and 11% of our revenues in those years, respectively. We believe that these experts are highly regarded in their fields and that each offers a combination of knowledge, experience, and expertise that would be very difficult to replace. We also believe that we have been able to secure some engagements and attract consultants in part because we could offer the services of these experts. Most of these experts can limit their relationships with us at any time for any reason. These reasons could include affiliations with universities with policies that prohibit accepting specified engagements, the pursuit of other interests, and retirement.

As of November 28, 2009, we had restrictive covenant contracts, which in some cases include non-competition agreements, with 43 of our non-employee experts. The limitation or termination of any of their relationships with us, or competition from any of them after these agreements expire, could harm our reputation, reduce our business opportunities and adversely affect our revenues and results of operations. The non-competition agreements that we have with some of our non-employee experts offer us only limited protection and may not be enforceable in every jurisdiction. In the event that non-employee experts leave, such clients may decide that they prefer to continue working with the non-employee expert rather than with us. In the event a non-employee expert departs and acts in a way that we believe violates their non-competition agreement, we will consider any legal remedies we may have against such person on a case-by-case basis. We may decide that preserving cooperation and a professional relationship with the former non-employee expert or client, or other concerns, outweigh the benefits of any possible legal recovery.

To meet our long-term growth targets, we need to establish ongoing relationships with additional non-employee experts who have reputations as leading experts in their fields. We may be unable to establish relationships with any additional non-employee experts. In addition, any relationship that we do establish may not help us meet our objectives or generate the revenues or earnings that we anticipate.

We depend on our antitrust and mergers and acquisitions consulting business

We derive a significant amount of our revenues from engagements related to antitrust and mergers and acquisitions activities. Any substantial reduction in the number or size of our engagements in these areas could adversely affect our revenues and results of operations. Adverse changes in general economic conditions, particularly conditions influencing the merger and acquisition activity of larger companies, could adversely affect engagements in which we assist clients in proceedings before the U.S. Department of Justice, the U.S. Federal Trade Commission, and various foreign antitrust authorities. For example, the current global economic recession has resulted in, and may continue to result in, reduced merger and acquisition activity levels. These reductions in activity level would adversely affect our revenues and results of operations.

We derive our revenues from a limited number of large engagements

We derive a portion of our revenues from a limited number of large engagements. If we do not obtain a significant number of new large engagements each year, our business, financial condition, and results of operations could suffer. Our ten largest engagements accounted for approximately 11%, 12%, and 11% of our revenues in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. Our ten largest clients accounted for approximately 14%, 18%, and 19% of our revenues in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. No single client accounted for more than 5% of our revenues in fiscal 2009, fiscal 2008, or fiscal 2007. In general, the volume of work we perform for any particular client varies from year to year, and due to the specific engagement nature of our practice, a major client in one year may not hire us in the following year.

Clients can terminate engagements with us at any time

Many of our engagements depend upon disputes, proceedings, or transactions that involve our clients. Our clients may decide at any time to seek to resolve the dispute or proceeding, abandon the transaction, or file for bankruptcy. Our engagements can therefore terminate suddenly and without advance notice to us. If an engagement is terminated unexpectedly, our employee consultants working on the engagement could be underutilized until we assign them to other projects. In addition, because much of our work is project-based rather than recurring in nature, our consultants' utilization depends on our ability to secure additional engagements on a continual basis. Accordingly, the termination or significant reduction in the scope of a single large engagement could reduce our utilization and have an immediate adverse impact on our revenues and results of operations.

Acquisitions may disrupt our operations or adversely affect our results

We regularly evaluate opportunities to acquire other businesses. The expenses we incur evaluating and pursuing acquisitions could adversely affect our results of operations. If we acquire a business, we may be unable to manage it profitably or successfully integrate its operations with our own. Moreover, we may be unable to realize the financial, operational, and other benefits we anticipate from these acquisitions or any other acquisition. Many potential acquisition targets do not meet our criteria, and for those that do, we face significant competition for these acquisitions from our direct competitors, private equity funds, and other enterprises. Competition for future acquisition opportunities in our markets could increase the price we pay for businesses we acquire and could reduce the number of potential acquisition targets. Further, acquisitions may involve a number of special financial and business risks, such as:

- diversion of our management's time, attention, and resources;
- decreased utilization during the integration process;
- loss of key acquired personnel;
- increased costs to improve or coordinate managerial, operational, financial, and administrative systems including compliance with the Sarbanes-Oxley Act of 2002;
- dilutive issuances of equity securities, including convertible debt securities;
- the assumption of legal liabilities;
- amortization of acquired intangible assets;
- potential write-offs related to the impairment of goodwill, including if our enterprise value declines below certain levels;
- difficulties in integrating diverse corporate cultures; and
- additional conflicts of interests.

Our entry into new lines of business could adversely affect our results of operations

If we attempt to develop new practice areas or lines of business outside our core economic, financial, and management consulting services, those efforts could harm our results of operations. Our efforts in new practice areas or new lines of business involve inherent risks, including risks associated with inexperience and competition from mature participants in the markets we enter. Our inexperience in these new practice areas or lines of business may result in costly decisions that could harm our business.

Fluctuations in the types of service contracts we enter into may adversely impact revenue and results of operations

We derive a portion of our revenues from fixed-price contracts. In fiscal 2009, fiscal 2008, and fiscal 2007, we derived 12.4%, 8.3%, and 6.6% of our revenues from fixed-price engagements, respectively. These contracts are more common in our management consulting practice, and would likely grow in number with any expansion of that practice. Fluctuations in our mix between time-and-material or fixed-price contracts or arrangements with fees tied to performance-based criteria, may result in fluctuations of revenue and results of operations. In addition, if we fail to estimate accurately the resources required for a fixed-price project or fail to satisfy our contractual obligations in a manner consistent with the project budget, we might generate a smaller profit or incur a loss on the project. On occasion, we have had to commit unanticipated additional resources to complete projects, and we may have to take similar action in the future, which could adversely affect our revenues and results of operations.

Our engagements may result in professional liability

Our services typically involve difficult analytical assignments and carry risks of professional and other liability. Many of our engagements involve matters that could have a severe impact on the client's business, cause the client to lose significant amounts of money, or prevent the client from pursuing desirable business opportunities. Accordingly, if a client is dissatisfied with our performance, the client could threaten or bring litigation in order to recover damages or to contest its obligation to pay our fees. Litigation alleging that we performed negligently, disclosed client confidential information, or otherwise breached our obligations to the client could expose us to significant liabilities to our clients and other third parties and tarnish our reputation.

Potential conflicts of interests may preclude us from accepting some engagements

We provide our services primarily in connection with significant or complex transactions, disputes, or other matters that are usually adversarial or that involve sensitive client information. Our engagement by a client may preclude us from accepting engagements with the client's competitors or adversaries because of conflicts between their business interests or positions on disputed issues or other reasons. Accordingly, the nature of our business limits the number of both potential clients and potential engagements. Moreover, in many industries in which we provide consulting services, such as in the telecommunications industry, there has been a continuing trend toward business consolidations and strategic alliances. These consolidations and alliances reduce the number of potential clients for our services and increase the chances that we will be unable to continue some of our ongoing engagements or accept new engagements as a result of conflicts of interests.

Our clients may be unable or unwilling to pay us for our services

Our clients include some companies that may from time to time encounter financial difficulties, particularly during a downward trend in the economy or may dispute the services we provide. If a client's financial difficulties become severe or a dispute arises, the client may be unwilling or unable to pay our invoices in the ordinary course of business, which could adversely affect collections of both our accounts receivable and unbilled services. On occasion, some of our clients have entered bankruptcy, which has prevented us from collecting amounts owed to us. The bankruptcy of a client with a

substantial account receivable could have a material adverse effect on our financial condition and results of operations. A small number of clients who have paid sizable invoices later declared bankruptcy, and a court determination that we were not properly entitled to that payment may require repayment of some or all of the amount we received, which could adversely affect our financial condition and results of operations.

We may need to take material write-offs for the impairment of goodwill and other intangible assets if our market capitalization declines

As further described in Note 1 of our Notes to Consolidated Financial Statements, goodwill and intangible assets with indefinite lives are monitored annually for impairment, or more frequently, if there are indicators of impairment. In performing the first step of the goodwill impairment testing and measurement process, we compare our entity-wide estimated fair value to net book value to identify potential impairment. We estimate the entity-wide fair value utilizing our market capitalization, plus an appropriate control premium. We have utilized a control premium which considers appropriate industry, market and other pertinent factors, including indications of such premiums from data on recent acquisition transactions. If we determine through the impairment evaluation process that goodwill has been impaired, we would record the impairment charge in our consolidated statement of operations.

There were no impairment losses related to goodwill or intangible assets during fiscal 2009. Our entity-wide fair value currently exceeds net book value, and therefore, there has not been an indication of impairment. However, at various points during fiscal 2009, our stock price declined from previous levels. We will continue to closely monitor our market capitalization and in the event that our average stock price subsequently declines and our market capitalization plus control premium declines below net book value and remains below book value for a period we consider to be other-than-temporary, we will perform an evaluation of the carrying value of goodwill and other intangibles.

Fluctuations in our quarterly revenues and results of operations could depress the market price of our common stock

We may experience significant fluctuations in our revenues and results of operations from one quarter to the next. If our revenues or net income in a quarter fall below the expectations of securities analysts or investors, the market price of our common stock could fall significantly. Our results of operations in any quarter can fluctuate for many reasons, including:

- our ability to implement rate increases;
- the number of weeks in our fiscal quarter;
- the number, scope, and timing of ongoing client engagements;
- the extent to which we can reassign our employee consultants efficiently from one engagement to the next;
- the extent to which our employee consultants take holiday, vacation, and sick time, including traditional seasonality related to summer vacation and winter holiday schedules;
- employee hiring;
- the extent of revenue realization or cost overruns;
- fluctuations in the results and continuity of the operations and management of our software subsidiary, NeuCo;
- fluctuations in our provision for income taxes due to changes in income arising in various tax jurisdictions, valuation allowances, non-deductible expenses, and changes in estimates of our uncertain tax positions;
- fluctuations in interest rates;

- severe weather conditions and other factors affecting employee productivity; and
- collectibility of receivables and unbilled work in process.

Because we generate the majority of our revenues from consulting services that we provide on an hourly fee basis, our revenues in any period are directly related to the number of our employee consultants, their billing rates, and the number of billable hours they work in that period. We have a limited ability to increase any of these factors in the short term. Accordingly, if we underutilize our consultants during one part of a fiscal period, we may be unable to compensate by augmenting revenues during another part of that period. In addition, we are occasionally unable to utilize fully any additional consultants that we hire, particularly in the quarter in which we hire them. Moreover, a significant majority of our operating expenses, primarily office rent and salaries, are fixed in the short term. As a result, if our revenues fail to meet our projections in any quarter, that could have a disproportionate adverse effect on our net income. For these reasons, we believe our historical results of operations are not necessarily indicative of our future performance.

We could incur substantial costs protecting our proprietary rights from infringement or defending against a claim of infringement

As a professional services organization, we rely on non-competition and non-solicitation agreements with many of our employees and non-employee experts to protect our proprietary rights. These agreements, however, may offer us only limited protection and may not be enforceable in every jurisdiction. In addition, we may incur substantial costs trying to enforce these agreements.

Our services may involve the development of custom business processes or solutions for specific clients. In some cases, the clients retain ownership or impose restrictions on our ability to use the business processes or solutions developed from these projects. Issues relating to the ownership of business processes or solutions can be complicated, and disputes could arise that affect our ability to resell or reuse business processes or solutions we develop for clients.

In recent years, there has been significant litigation in the U.S. involving patents and other intellectual property rights. We could incur substantial costs in prosecuting or defending any intellectual property litigation, which could adversely affect our operating results and financial condition.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to obtain and use information that we regard as proprietary. Litigation may be necessary in the future to enforce our proprietary rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others or to defend against claims of infringement or invalidity. Any such resulting litigation could result in substantial costs and diversion of resources and could adversely affect our business, operating results and financial condition. Any failure by us to protect our proprietary rights could adversely affect our business, operating results and financial condition.

The market price of our common stock may be volatile

The market price of our common stock has fluctuated widely and may continue to do so. For example, from November 30, 2008, to November 28, 2009, the trading price of our common stock ranged from a high of \$31.47 per share to a low of \$16.77 per share. Many factors could cause the market price of our common stock to rise and fall. Some of these factors are:

- variations in our quarterly results of operations;
- the hiring or departure of key personnel or non-employee experts;
- changes in our professional reputation;
- the introduction of new services by us or our competitors;
- acquisitions or strategic alliances involving us or our competitors;

- changes in accounting principles or methods, such as Accounting Standards Codification 470-20, “Debt with Conversion and Other Options,” (formerly FASB Staff Position Accounting Principles Board Opinion 14-1);
- changes in estimates of our performance or recommendations by securities analysts;
- future sales of shares of common stock in the public market; and
- market conditions in the industry and the economy as a whole.

In addition, the stock market often experiences significant price and volume fluctuations. These fluctuations are often unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the market price of our common stock. When the market price of a company’s stock drops significantly, shareholders often institute securities class action litigation against that company. Any litigation against us could cause us to incur substantial costs, divert the time and attention of our management and other resources, or otherwise harm our business.

We may not be successful in obtaining approval from shareholders to increase the number of common shares issuable under our equity incentive plans

As of November 28, 2009, we have approximately 177,000 common shares available for new grants under our 2006 Equity Incentive Plan. We plan to seek shareholder approval of an amendment to the plan to increase the number of common shares available for issuance to meet future needs. We may not be successful in obtaining approval from our shareholders to increase the number of common shares issuable for future awards. This could adversely affect our ability to recruit and retain our employees, non-employee experts, and the members of our Board of Directors.

Our debt obligations may adversely impact our financial performance

In 2004, we issued a total of \$90.0 million of 2.875% convertible senior subordinated debentures due 2034. We had previously operated with little or no debt, and our previous payments of interest had not been material. The interest we are required to pay on these debentures reduces our net income each year and will continue to do so until the debentures are no longer outstanding. The terms of the debentures also include provisions that could accelerate our obligation to repay all amounts outstanding under the debentures if certain events happen, such as our failure to pay interest in a timely manner, failure to pay principal upon redemption or repurchase, failure to deliver cash, shares of common stock, or other property upon conversion and other specified events of default. In addition, on June 15, 2011, June 15, 2014, June 15, 2019, June 15, 2024 and June 15, 2029, or following specified fundamental changes, holders of the debentures may require us to repurchase their debentures for cash. On December 14, 2004, we irrevocably elected to settle with cash 100% of the principal amount of the debentures upon conversion thereof, and holders of the debentures may convert them if our stock price exceeds \$50 per share for at least 20 out of the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter. The market price conversion trigger was not met during the fourth quarter of fiscal 2009 or first quarter of fiscal 2010. Therefore, holders of the debentures are not able to exercise their right to convert the bonds during the first and second quarters of fiscal 2010. This test is repeated each fiscal quarter. To date, no holders have exercised their right to convert the bonds. However, during fiscal 2009 and fiscal 2008, we repurchased convertible debentures in the principal amount of \$17.3 million and \$10.2 million, respectively, on the open market.

We have a revolving line of credit for \$60.0 million, to mitigate the potential liquidity risk, and to provide funding if required, in the event of conversion by the debenture holders. We intend to use the amounts available under our bank revolving line of credit, current cash balances, and cash generated from operations in the event debenture holders exercise their rights to convert. The amounts available under our bank revolving line of credit are constrained by various financial covenants and reduced by certain letters of credit outstanding. Our loan agreement will mature on April 30, 2012. The degree to which we are leveraged could adversely affect our ability to obtain further financing for working capital, acquisitions or other purposes and could make us more vulnerable to industry downturns and

competitive pressures. Our ability to secure short-term and long-term debt or equity financing in the future, will depend on several factors, including our future profitability, the levels of our debt and equity, restrictions under our existing revolving line of credit and the overall credit and equity market environments.

Our reported earnings per share may be more volatile because of the accounting standards, rules, and regulations as they relate to our convertible senior subordinated debentures

Holders of our 2.875% convertible senior subordinated debentures due 2034 may convert the debentures only under certain circumstances, including certain stock price-related conversion contingencies. As further described in Note 11 of our Notes to Consolidated Financial Statements, we determine the effect of the debentures on earnings per share under the treasury stock method of accounting. The treasury stock method of accounting allows us to report dilution only when our average stock price per share for the reporting period exceeds the \$40 conversion price and only to the extent of the additional shares we may be required to issue in the event our conversion obligation exceeds the principal amount of the debentures converted. Accordingly, volatility in our stock price could cause volatility in our reported diluted earnings per share.

The FASB recently issued Accounting Standards Codification Topic 470-20, “Debt with Conversion and Other Options,” (“ASC Topic 470-20”) (formerly FASB Staff Position Accounting Principles Board Opinion 14-1), which applies to any convertible debt instrument that may be settled in whole or in part with cash upon conversion, including our 2.875% debentures. Under ASC Topic 470-20, we will be required to recognize non-cash interest expense on our convertible senior subordinated debentures based on the market rate for similar debt instruments without the conversion feature. ASC Topic 470-20 is effective for fiscal years beginning on or after December 15, 2008, which is our fiscal 2010, and must be applied on a retrospective basis. Upon retroactive adoption of ASC 470-20 in fiscal 2010, we expect to record a cumulative adjustment for prior years that is estimated as an approximately \$6.5 million non-cash decrease in retained earnings through fiscal 2009. Also, on the date of issuance, the carrying amount of the convertible debentures is expected to be retroactively adjusted to reflect a discount of approximately \$12.6 million and a reduction of deferred financing costs by approximately \$0.5 million, with offsetting increases in common stock of approximately \$7.0 million and deferred tax liability of \$5.1 million. Under 470-20, in fiscal 2010, we expect to record incremental non-cash interest expense of approximately \$1.4 million.

Our charter and by-laws, Massachusetts law and the terms of our convertible debentures may deter takeovers

Our amended and restated articles of organization and amended and restated by-laws and Massachusetts law contain provisions that could have anti-takeover effects and that could discourage, delay, or prevent a change in control or an acquisition that our shareholders and debenture holders may find attractive. These provisions may also discourage proxy contests and make it more difficult for our shareholders to take some corporate actions, including the election of directors. In addition, the terms of our convertible debentures provide that we may be required to pay a make-whole premium to the holders of our convertible debentures upon a change of control. These provisions could limit the price that investors might be willing to pay for shares of our common stock.

Item 1B—Unresolved Staff Comments

Not applicable.

Item 2—Properties

In the aggregate, as of November 28, 2009, we lease approximately 444,740 square feet of office space in locations around the world. Of this total, we have subleased to other companies approximately 38,487 square feet of our office space. During fiscal 2009, we closed the office in Cambridge, MA, and reduced office space in Pasadena, California, Boston, Massachusetts, and Houston, Texas in order to

more closely align consultant staffing levels to current workload demand. In addition, we opened an office in Riyadh, Saudi Arabia.

All of our offices are electronically linked and have access to our core consulting tools. We believe our existing facilities are adequate to meet our current requirements and that suitable space will be available as needed.

Item 3—*Legal Proceedings*

None.

Item 4—*Submission of Matters to a Vote of Security Holders*

No matters were submitted to a vote of our shareholders during the fourth quarter of fiscal 2009.

PART II

Item 5—Market for Registrant’s Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information. We first offered our common stock to the public on April 23, 1998. Our common stock is traded on the NASDAQ Global Select Market under the symbol CRAI. The following table provides the high and low sales prices of our common stock as reported on the NASDAQ Global Select Market for the periods indicated.

<u>Fiscal Year Ended November 29, 2008</u>	<u>High</u>	<u>Low</u>
November 25, 2007 to February 15, 2008	\$50.20	\$40.00
February 16, 2008 to May 9, 2008	\$42.72	\$22.11
May 10, 2008 to August 29, 2008	\$43.01	\$32.54
August 30, 2008 to November 29, 2008	\$44.95	\$22.84
<u>Fiscal Year Ended November 28, 2009</u>	<u>High</u>	<u>Low</u>
November 30, 2008 to February 20, 2009	\$29.52	\$20.43
February 21, 2009 to May 15, 2009	\$24.16	\$16.77
May 16, 2009 to September 4, 2009	\$31.47	\$22.28
September 5, 2009 to November 28, 2009	\$28.55	\$20.67

Shareholders. We had approximately 170 holders of record of our common stock as of January 28, 2010. This number does not include shareholders for whom shares were held in a “nominee” or “street” name.

Dividends. We have not paid any cash dividends in the past and we do not anticipate paying any cash dividends in the foreseeable future. In addition, the terms of our bank line of credit place restrictions on our ability to pay cash dividends on our common stock.

Repurchases of Equity Securities. The following table provides information about our repurchases of shares of our common stock during the twelve weeks ended November 28, 2009. During that period, we did not act in concert with any affiliate or any other person to acquire any of our common stock and, accordingly, we do not have any purchases by any affiliate or other person (if any) that are reportable in the following table. For purposes of this table, we have divided the quarter into three periods.

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs(3)	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs(3)
September 5, 2009, to October 2, 2009	—	—	—	215,718
October 3, 2009, to October 30, 2009	637 shares(1) \$9,553,000 principal amount of convertible debentures(2)	\$25.55 per share(1) \$0.96 per \$1.00 principal amount(2)	—	215,718
October 31, 2009, to November 28, 2009 . . .	1,132 shares(1) \$697,000 principal amount of convertible debentures(2)	\$25.69 per share(1) \$0.99 per \$1.00 principal amount(2)	—	215,718

- (1) During the indicated periods, we accepted 1,595 shares of our common stock as a tax withholding from certain of our employees, in connection with the vesting of restricted shares that occurred during the indicated period, pursuant to the terms of our 2006 equity incentive plan, at an average share price of \$25.82, and we repurchased 174 shares of our common stock from an employee, based on the contractual right of first refusal contained in the employee's restricted share agreements with us, at an average share price of \$23.97 per share.
- (2) During the indicated periods, we repurchased convertible debentures in the principal amount of \$10.3 million, on the open market, for \$10.0 million. In addition, when the convertible debentures were repurchased, we paid accrued interest through the purchase date of approximately \$0.1 million.
- (3) On June 14, 2007, we issued a press release announcing that our board of directors approved the repurchase from time to time of up to 1,500,000 shares of our common stock, of which 1,284,282 shares of common stock were purchased in prior quarters and 215,718 shares of our common stock remain available for purchase. During the fourth quarter of fiscal 2009, we did not purchase any shares authorized under this plan.

Shareholder Return Performance Graph. The graph below compares our cumulative 5-year total shareholder return on common stock with the cumulative total returns of the NASDAQ Composite index, and a customized peer group of five companies that includes Duff & Phelps Corp., LECG Corp., Navigant Consulting Inc., FTI Consulting Inc., and Huron Consulting Group Inc. The addition of Duff & Phelps Corp. represents a change from the peer group we used in our annual report on Form 10-K for fiscal 2008. We believe that adding Duff & Phelps Corp. makes the new peer group a broader and more relevant comparison to our business model and industry than the former peer group. The graph tracks the performance of a \$100 investment in our common stock, in each of the peer groups, and the index (with the reinvestment of all dividends) from November 27, 2004 to November 28, 2009. We paid no cash dividends during the period shown. The performance of the market index and the peer group indices is shown on a total return (dividends reinvested) basis. The inclusion of Duff & Phelps, Corp. in the peer group begins with the date of its initial public offering on September 28, 2007.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN
Among CRA International, Inc., The NASDAQ Composite Index,
An Old Peer Group And A New Peer Group

—■— CRA International, Inc. —▲— NASDAQ Composite --○-- Old Peer Group —*— New Peer Group

	11/27/04	11/26/05	11/25/06	11/24/07	11/29/08	11/28/09
CRA International, Inc.	100.00	106.00	120.91	108.87	67.14	56.16
NASDAQ Composite	100.00	105.35	117.80	128.17	73.25	103.36
Old Peer Group	100.00	111.76	117.95	170.07	151.20	108.91
New Peer Group	100.00	111.76	117.95	170.07	149.19	111.21

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Item 6—Selected Financial Data

The following selected consolidated financial data as of and for each of the fiscal years in the five-year period ended November 28, 2009, has been derived from our audited consolidated financial statements.

	Fiscal Year Ended				
	November 28, 2009 (52 weeks)	November 29, 2008 (53 weeks)(4)	November 24, 2007 (52 weeks)(4)	November 25, 2006 (52 weeks)(4)	November 26, 2005 (52 weeks)
	(In thousands, except per share data)				
Consolidated Statement of					
Income Data(1):

Consolidated Balance Sheet Data:					
Working capital	\$150,690	\$143,097	\$150,785	\$158,676	\$148,382
Total assets	422,130	444,665	451,662	446,454	387,545
Total long-term debt	64,935	82,498	90,000	87,000	90,242
Total shareholders' equity	252,897	234,402	248,823	247,987	204,620

(1) During the past five fiscal years, we made the following acquisitions:

- June 9, 2009, substantially all of the assets of Marakon Associates, Inc.
- May 23, 2006, certain assets of The Ballentine Barbera Group.
- June 16, 2005, the equity of Economics of Competition and Litigation Limited, formerly known as Lexecon Ltd.
- April 27, 2005, the equity of Lee & Allen Consulting Limited.

Each of these acquisitions was accounted for under the purchase accounting method, and the results of operations for each of these acquisitions have been included in the accompanying statements of operations from the respective dates of acquisition.

- (2) In fiscal 2008, fiscal 2007, fiscal 2006, and fiscal 2005, “depreciation and amortization” was included with “selling, general and administrative expenses”. These expenses have been reclassified from “selling, general and administrative expenses” to conform to the current year’s presentation within the consolidated statements of income.
- (3) Basic net income per share represents net income divided by the weighted average shares of common stock outstanding during the period. Diluted net income per share represents net income divided by the weighted average shares of common stock and common stock equivalents outstanding during the period. Weighted average shares used in diluted net income per share include common stock equivalents arising from stock options, unvested restricted stock, and shares underlying our debentures using the treasury stock method.
- (4) These amounts are revised by an immaterial amount based upon our completion of an independent, voluntary review of our historical practices regarding our accounting for acquisition-related earn-out payments. Further information related to this voluntary review can be found in Note 2 of our Notes to Consolidated Financial Statements.

Item 7—Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a worldwide leading economic, financial, and management consulting firm that applies advanced analytic techniques and in-depth industry knowledge to complex engagements for a broad range of clients.

We derive revenues principally from professional services rendered by our employee consultants. In most instances, we charge clients on a time-and-materials basis and recognize revenues in the period when we provide our services. We charge consultants’ time at hourly rates, which vary from consultant to consultant depending on a consultant’s position, experience, expertise, and other factors. We derive a portion of our revenues from fixed-price contracts. Revenues from fixed-price engagements are recognized using a proportional performance method based on the ratio of costs incurred, substantially all of which are labor-related, to the total estimated project costs. We derived 12.4%, 8.3%, and 6.6% of our revenues from fixed-price engagements in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. We generate substantially all of our professional services fees from the work of our own employee consultants and a portion from the work of our non-employee experts. Factors that affect our professional services revenues include the number and scope of client engagements, the number of consultants we employ, the consultants’ billing rates, and the number of hours our consultants work. Revenues also include reimbursements, which includes travel and other out-of-pocket expenses, outside consultants, and other reimbursable expenses.

Our costs of services include the salaries, bonuses, share-based compensation expense, and benefits of our employee consultants. Our bonus program awards discretionary bonuses based on our revenues and profitability and individual performance. Costs of services also include out-of-pocket and other expenses, and the salaries of support staff whose time is billed directly to clients, such as librarians, editors, and programmers. Selling, general, and administrative expenses include salaries, bonuses, share-based compensation expense, and benefits of our administrative and support staff, fees to non-employee experts for generating new business, office rent, marketing, and other costs.

Economic Conditions

Our business has been affected by the global economic slowdown, as clients for some of our larger litigation cases requested us to slow down the pace of work, and some of our management consulting clients delayed new projects. In the face of declining revenues in fiscal 2009 and fiscal 2008, we completed a series of initiatives to reduce operating expenses and improve our utilization rate. These initiatives included reducing our workforce, consolidating, reducing, moving, or closing some of our offices, divesting some of our underperforming practices, and eliminating other expenses based on an evaluation of our current administrative practices and infrastructure. The fiscal 2009 initiatives are more fully discussed in Note 18 to our Notes to Consolidated Financial Statements.

Utilization and Seasonality

Because we derive the majority of our revenues from hourly billings by our employee consultants, our utilization of those employee consultants is one key indicator that we use to measure our operating performance. We calculate utilization by dividing the total hours worked by our employee consultants on engagements during the measurement period by the total number of hours that our employee consultants were available to work during that period. Utilization was 69% for fiscal 2009, 71% for fiscal 2008, and 75% for fiscal 2007.

We experience certain seasonal effects that impact our revenue. Because our revenues depend on the number of hours worked by our employee consultants, concurrent vacations or holidays taken by a large number of consultants can adversely impact our revenue. Historically, we experience lower utilization in the first quarter, which includes the holiday season, and in the third quarter, which is a 16-week period, and includes the summer vacation season for most of our offices.

Fiscal Periods

Our fiscal year ends on the last Saturday in November, and accordingly, our fiscal year will periodically contain 53 weeks rather than 52 weeks. In particular, fiscal 2008 contained 53 weeks. The additional week of operations in the fiscal year 2008 will affect the comparability of results of operations of this fiscal year with other fiscal years. Historically, we have managed our business based on 13 four-week billing cycles to clients and, consequently, have established quarters that are divisible by four-week periods. As a result, the first, second, and fourth quarters of each fiscal year are 12-week periods, and the third quarter of each fiscal year is a 16-week period. In those years when our fiscal year contains 53 weeks, such as in fiscal 2008, our fourth quarter is a 13-week period. Accordingly, period-to-period comparisons of our results of operations are not necessarily meaningful if the periods being compared have different lengths.

The terms “fiscal 2009” and “fiscal 2007” refer to the 52-week periods ended November 28, 2009 and November 24, 2007, respectively. The term “fiscal 2008” refers to the 53-week period ended November 29, 2008.

Acquisitions and International Operations

On June 9, 2009, we acquired substantially all of the assets of Marakon Associates, a leading strategy consulting firm known for pioneering value-based management. Under the terms of the transaction, we acquired substantially all of the assets of Marakon Associates, including certain intangible assets, accounts receivable, and all client projects currently underway. As a result of this acquisition, we added 48 employee consultants, who are based in our London, Chicago, and New York offices. The acquisition was not material.

Revenues from our international operations accounted for 25.6%, 22.0%, and 26.7% of our total revenues in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. Revenue by country is detailed in Note 14 to our Notes to Consolidated Financial Statements.

NeuCo Interest

In fiscal 2007, and the majority of fiscal 2008, our interest in NeuCo was 36.4%. As such, we accounted for our investment in NeuCo under the equity method of accounting. During the fourth quarter of fiscal 2008, NeuCo acquired 100% of Rio Tinto Energy America Services Company's investment in NeuCo. As a result of this transaction, our ownership interest in NeuCo increased to 49.15% and combined with our officers holding three Board of Director seats, and other considerations, our ownership constitutes control under GAAP. NeuCo's financial results since this transaction have been consolidated with ours and the portion of the results of operations of NeuCo allocable to its other owners is shown as “minority interest”. NeuCo's revenues included in our consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$8.9 million and \$0.8 million, respectively. NeuCo's net loss included in our consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$1.5 million and \$71,000, respectively. NeuCo's net loss, net of amounts allocable to its other owners, included in our consolidated statement of income for fiscal 2009 and fiscal 2008 totaled \$0.8 million and \$0.4 million, respectively.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make significant estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses, as well as related disclosure of contingent assets and liabilities. Estimates in these consolidated financial statements include, but are not limited to, accounts receivable allowances, revenue recognition on fixed price contracts, depreciation of property and equipment, share-based compensation, valuation of acquired intangible assets, impairment of long lived assets, goodwill, accrued

and deferred income taxes, valuation allowances on deferred tax assets, accrued bonuses, accrued exit costs, and other accrued expenses. These items are monitored and analyzed by management for changes in facts and circumstances, and material changes in these estimates could occur in the future. Changes in estimates are recorded in the period in which they become known. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from our estimates if our assumptions based on past experience or our other assumptions do not turn out to be substantially accurate.

A summary of the accounting policies that we believe are most critical to understanding and evaluating our financial results is set forth below. This summary should be read in conjunction with our consolidated financial statements and the related notes included in Item 8 of this annual report on Form 10-K.

Revenue Recognition and Accounts Receivable Allowances. We derive substantially all of our revenues from the performance of professional services. The contracts that we enter into and operate under specify whether the engagement will be billed on a time-and-materials or fixed-price basis. These engagements generally last three to six months, although some of our engagements can be much longer in duration. Each contract must be approved by one of our vice presidents.

We recognize substantially all of our revenues under written service contracts with our clients where the fee is fixed or determinable, as the services are provided, and only in those situations where collection from the client is reasonably assured. In certain cases we provide services to our clients without sufficient contractual documentation, or fees are tied to performance-based criteria, which require us to defer revenue in accordance with U.S. GAAP. In these cases, these amounts are fully reserved until all criteria for recognizing revenue are met.

Most of our revenue is derived from time-and-materials service contracts. Revenues from time-and-materials service contracts are recognized as the services are provided based upon hours worked and contractually agreed-upon hourly rates, as well as a computer services fee based upon hours worked.

Revenues from the majority of our fixed-price engagements are recognized on a proportional performance method based on the ratio of costs incurred, substantially all of which are labor-related, to the total estimated project costs. Project costs are based on the direct salary of the consultants on the engagement plus all direct expenses incurred to complete the engagement that are not reimbursed by the client. The proportional performance method is used since reasonably dependable estimates of the revenues and costs applicable to various stages of a contract can be made, based on historical experience and terms set forth in the contract, and are indicative of the level of benefit provided to our clients. Fixed-price contracts generally include a termination provision that converts the agreement to a time-and-materials contract in the event of termination of the contract. Our management maintains contact with project managers to discuss the status of the projects and, for fixed-price engagements, management is updated on the budgeted costs and resources required to complete the project. These budgets are then used to calculate revenue recognition and to estimate the anticipated income or loss on the project. In the past, we have occasionally been required to commit unanticipated additional resources to complete projects, which have resulted in lower than anticipated income or losses on those contracts. We may experience similar situations in the future. Provisions for estimated losses on contracts are made during the period in which such losses become probable and can be reasonably estimated. To date, such losses have not been significant.

Revenues also include reimbursements, which include travel and other out-of-pocket expenses, outside consultants, and other reimbursable expenses. These reimbursable expenses are as follows (in thousands):

	Year Ended		
	November 28, 2009 (52 weeks)	November 29, 2008 (53 weeks)	November 24, 2007 (52 weeks)
Reimbursable expenses	\$43,961	\$48,739	\$50,034

Our normal payment terms are 30 days from invoice date. For fiscal 2009 and fiscal 2008, our average days sales outstanding (DSOs) were 97 days and 98 days, respectively. We calculate DSOs by dividing the sum of our accounts receivable and unbilled services balance, net of deferred revenue, at the end of the fiscal quarter by average daily revenues. Average daily revenues are calculated by dividing quarter revenues by the number of days in a quarter. Our project managers and finance personnel monitor payments from our clients and assess any collection issues. We maintain accounts receivable allowances for estimated losses resulting from the inability of our clients to make required payments. We base our estimates on our historical collection experience, current trends, and credit policy. In determining these estimates, we examine historical write-offs of our receivables and review client accounts to identify any specific customer collection issues. If the financial condition of our customers were to deteriorate or disputes were to arise regarding the services provided, resulting in an impairment of their ability or intent to make payment, additional allowances may be required. A failure to estimate accurately the accounts receivable allowances and ensure that payments are received on a timely basis could have a material adverse effect on our business, financial condition, and results of operations. As of November 28, 2009 and November 29, 2008, \$6.8 million and \$10.7 million, was provided for accounts receivable allowances, respectively.

Share-Based Compensation Expense. Share-based compensation cost is estimated at the grant date based on the fair value of the award and is recognized as expense over the requisite service period of the award. We recognize share-based compensation expense using the straight-line attribution method. We use the Black-Scholes option-pricing model to estimate the fair value of share-based awards. Option valuation models require the input of assumptions, including the expected life of the share-based awards, the expected stock price volatility, the risk-free interest rate, and the expected dividend yield. The expected volatility and expected life are based on our historical experience. The risk-free interest rate is based on U.S. Treasury interest rates whose term is consistent with the expected life of the share-based award. Expected dividend yield was not considered in the option pricing formula since we do not pay dividends and have no current plans to do so in the future. We will update these assumptions if changes are warranted. The forfeiture rate is based upon historical experience. We adjust the estimated forfeiture rate based upon our actual experience. In addition, we have performance based awards that are valued at the fair value of shares as of the grant date and expense is recognized based on the number of shares expected to vest under the terms of the award under which they are granted. The fair value determination requires significant assumptions, including estimating future revenues and profits.

The amount of share-based compensation expense recognized at any date must at least equal the portion of grant date value of the award that is vested at that date. In the fourth quarter of fiscal 2009, we discovered a computational error in the third-party software used to calculate the share-based compensation expense whereby the expense recognized for each vested portion of the award was less than the grant date fair value of the vested portion of the award. The error resulted in an understatement of share-based compensation expense in fiscal 2006, fiscal 2007, fiscal 2008, and the first quarter of fiscal 2009 and an overstatement of share-based compensation expense in the second and third quarters of fiscal 2009. In accordance with SEC Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements," we evaluated the materiality of the error from qualitative and quantitative perspectives, and concluded that the error was immaterial to any prior year financial statements.

Valuation of Goodwill and Other Intangible Assets. We account for our acquisitions under the purchase method of accounting. Goodwill represents the purchase price of acquired businesses in excess of the fair market value of net assets acquired. Intangible assets consist principally of non-competition agreements, which are amortized on a straight-line basis over the related estimated lives of the agreements (eight to ten years), as well as customer relationships, customer lists, trade marks, backlog, and developed technology, which are amortized on a straight-line basis over their remaining useful lives (two to fifteen years).

In accordance with ASC Topic 350, "Intangibles-Goodwill and Other", goodwill and intangible assets with indefinite lives are not subject to amortization, but are monitored annually for impairment, or more frequently, if there are indicators of impairment. Any impairment would be measured based upon the fair value of the related asset. Under ASC Topic 350, in performing the first step of the goodwill impairment testing and measurement process, we compare our entity-wide estimated fair value to net book value to identify potential impairment. We estimate the entity-wide fair value utilizing our market capitalization, plus an appropriate control premium. We have utilized a control premium which considers appropriate industry, market and other pertinent factors, including indications of such premiums from data on recent acquisition transactions. If we determine through the impairment evaluation process that goodwill has been impaired, we would record the impairment charge in our consolidated statement of income. At November 28, 2009, based upon our estimated entity-wide fair value, the fair value of our goodwill is substantially in excess of its carrying value.

The net amount of goodwill was approximately \$142.0 million as of November 28, 2009. The goodwill amount for acquisitions is initially recorded based upon a preliminary estimated purchase price allocation and is subject to change. Any preliminary purchase price allocation is based upon our estimate of fair value, and is finalized as we receive other information relevant to the acquisition, such as exit costs related to lease obligations.

We assess the impairment of amortizable intangible assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors we consider important that could trigger an impairment review include the following:

- a significant underperformance relative to expected historical or projected future operating results;
- a significant change in the manner of our use of the acquired asset or the strategy for our overall business;
- a significant negative industry or economic trend; and
- our entity-wide fair value relative to net book value.

If we were to determine that an impairment review is required, we would review the expected future undiscounted cash flows to be generated by the assets. If we determine that the carrying value of intangible assets may not be recoverable, we measure any impairment based on a projected discounted cash flow method using a discount rate determined by our management to be commensurate with the risk inherent in our current business model. The net amount of intangible assets was approximately \$6.2 million as of November 28, 2009.

There were no impairment losses related to goodwill or intangible assets in fiscal 2009 and fiscal 2007. In connection with the sale of certain assets in Australia, fiscal 2008 included approximately \$1.4 million in charges related to the write-off of goodwill and intangible assets.

Accounting for Income Taxes. We record income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized based upon anticipated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The

effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Our financial statements contain certain deferred tax assets and liabilities that result from temporary differences between book and tax accounting, as well as net operating loss carryforwards. ASC Topic 740, "Income Taxes," requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities, and any valuation allowance recorded against our net deferred tax assets. We evaluate the weight of all available evidence to determine whether it is more likely than not that some portion or all of the deferred income tax assets will not be realized. The decision to record a valuation allowance requires varying degrees of judgment based upon the nature of the item giving rise to the deferred tax asset. As a result of operating losses incurred in certain of our foreign subsidiaries, and uncertainty as to the extent and timing of profitability in future periods, we recorded valuation allowances in these foreign subsidiaries based on the facts and circumstances affecting each subsidiary. Furthermore, during fiscal 2009, we recorded a deferred tax asset for foreign tax credit carryforwards resulting from the election to credit foreign taxes on our fiscal 2008 U.S. tax return. This carryforward was substantially offset by a valuation allowance, since the future utilization of these credits is uncertain. Had we not recorded these allowances of approximately \$1.7 million and \$2.1 million in fiscal 2009 and fiscal 2008, respectively, we would have reported a lower effective tax rate than that recognized in our statements of income in fiscal 2009 and fiscal 2008. If the realization of deferred tax assets in the future is considered more likely than not, an adjustment to the deferred tax assets would increase net income in the period such determination was made. The amount of the deferred tax asset considered realizable is based on significant estimates, and it is possible that changes in these estimates in the near term could materially affect our financial condition and results of operations.

Our effective tax rate may vary from period to period based on changes in estimated taxable income or loss, changes to the valuation allowance, changes to federal, state, or foreign tax laws, future expansion into areas with varying country, state, and local income tax rates, deductibility of certain costs, uncertain tax positions, and expenses by jurisdiction, and as a result of acquisitions. Our effective tax rate was 52.9% in fiscal 2009 and 62.2% in fiscal 2008. The fiscal 2009 effective tax rate was impacted by tax charges relating to the liquidation of the Company's Australian-based operations, charges by NeuCo, and continued losses in certain foreign locations for which no tax benefit was provided. These charges were partially offset by the utilization of net operating losses in the United Kingdom and the partial release of related valuation allowances. Our effective tax rate in fiscal 2008 was higher compared to statutory rates primarily due to continued losses in foreign locations that resulted in a lower tax benefit or provided no tax benefit, combined with a reduced level of taxable income in North America.

The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations in several different tax jurisdictions. We are periodically reviewed by domestic and foreign tax authorities regarding the amount of taxes due. These reviews include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. In evaluating the exposure associated with various filing positions, we record estimated reserves for probable exposures. Based on our evaluation of current tax positions, we believe we have appropriately accrued for probable exposures.

Recent Accounting Pronouncements

In July 2009, the FASB Accounting Standards Codification (the "Codification") officially became the single source of authoritative nongovernmental U.S. GAAP, superseding existing FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force, and related accounting literature. Going forward, only one level of authoritative GAAP will exist. All other accounting literature will be considered non-authoritative. The Codification reorganizes the thousands of GAAP pronouncements into roughly 90 accounting topics and displays them using a consistent structure. Also

included in the Codification is relevant SEC guidance organized using the same topical structure in separate sections within the Codification. The Codification was effective for interim and annual periods ending after September 15, 2009. We adopted the Codification during the fourth quarter of fiscal 2009. The impact on our financial statements is limited to disclosures. All references to authoritative accounting literature will now be referenced in accordance with the Codification.

In May 2009, the FASB issued guidance included in ASC Topic 855, “Subsequent Events” (formerly Statements of Financial Accounting Standards (“SFAS”) No. 165). The new provisions of ASC Topic 855 establishes general accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. The provisions of the new standard also outline the circumstances under which an entity would need to record transactions occurring after the balance sheet date in the financial statements. These new disclosures will identify the date through which the entity has evaluated subsequent events. We adopted the new provisions of ASC Topic 855 and it did not have a material impact on our consolidated statement of operations and financial condition. We have evaluated subsequent events for recognition or disclosure through the date we filed this Form 10-K with the SEC.

In May 2008, the FASB issued guidance included in ASC Topic 470-20, “Debt” (formerly FASB Staff Position No. Accounting Principles Board Opinion 14-1, “Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)”), which changes the accounting treatment for convertible debt instruments that allow for either mandatory or optional cash settlements. The new provisions of ASC Topic 470 will require us to recognize non-cash interest expense on our convertible senior subordinated debentures based on the market rate for similar debt instruments without the conversion feature. The new provisions of ASC Topic 470 are effective for fiscal years beginning on or after December 15, 2008, which is our fiscal 2010, and must be applied on a retrospective basis. Upon retroactive adoption of ASC 470-20 in fiscal 2010, we expect to record a cumulative adjustment for prior years that is estimated as an approximately \$6.5 million non-cash decrease in retained earnings through fiscal 2009. Also, on the date of issuance, the carrying amount of the convertible debentures is expected to be retroactively adjusted to reflect a discount of approximately \$12.6 million and a reduction of deferred financing costs by \$0.5 million, with offsetting increases in common stock of approximately \$7.0 million and deferred tax liability of \$5.1 million. Under 470-20, in fiscal 2010, we expect to record incremental non-cash interest expense of approximately \$1.4 million.

In December 2007, the FASB issued guidance included in ASC Topic 805, “Business Combinations” (formerly FASB Staff Position SFAS No. 141R-1), which amends and clarifies SFAS No. 141R, “Business Combinations”). The new provisions of ASC Topic 805 require the acquiring entity in a business combination to record all assets acquired and liabilities assumed at their respective acquisition-date fair values if fair value can be reasonably estimated, changes the recognition of assets acquired and liabilities assumed arising from contingencies, changes the recognition and measurement of contingent consideration, and requires the expensing of acquisition-related costs as incurred. If fair value cannot be reasonably estimated, the asset or liability would generally be recognized in accordance with ASC Topic 450, “Contingencies”. ASC Topic 805 also requires additional disclosure of information surrounding a business combination, such that users of the entity’s financial statements can fully understand the nature and financial impact of the business combination. The new provisions of ASC Topic 805 applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, which is our fiscal 2010. An entity may not apply the new provisions of ASC Topic 805 before that date. We will adopt the new provisions of ASC Topic 805 in fiscal 2010. For business combinations completed on or subsequent to the adoption date, the application of the new provisions of this topic could have a significant impact on our consolidated statement of operations and financial condition, the magnitude of which will depend on the specific terms and conditions of the transactions.

In December 2007, the FASB issued guidance included in ASC Topic 810, “Consolidation” (formerly SFAS No. 160). ASC Topic 810 establishes accounting and reporting standards for

noncontrolling interests (previously referred to as “minority interests”) in a subsidiary and for the deconsolidation of a subsidiary, to ensure consistency with the requirements of ASC Topic 805. ASC Topic 810 states that noncontrolling interests should be classified as a separate component of equity, and establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. The new provisions of ASC Topic 810 are effective for financial statements issued for fiscal years beginning after December 15, 2008, which is our fiscal 2010. Early adoption is prohibited and the new provisions will be applied prospectively except for the presentation and disclosure requirements, which will be applied retrospectively for all periods presented. We do not expect the new provisions of ASC Topic 810 to have a material impact on our consolidated statement of operations and financial condition.

Revised Financial Statements

During the third quarter of fiscal 2009, we discovered errors related to our accounting for acquisition-related earnout payments that were made in connection with the acquisition of a business in fiscal 2006. An error occurred as a result of a \$5 million earnout payment made by us to the seller of the business we acquired, which then was subsequently re-distributed by the seller to certain continuing employees of the acquired business. This payment was initially accounted for as additional purchase price and included in goodwill. In the third quarter of fiscal 2009, we determined that the \$5 million had not been distributed by the seller in accordance with its initial ownership percentage interests and that this amount should be re-characterized as compensation expense and should be charged to income over the period the earnout payment was earned pursuant to the terms of the acquisition agreement. The \$5 million earnout payment was earned over the two-year period beginning in May 2006 or the eight consecutive quarters beginning in the third quarter of fiscal 2006. The \$5 million was paid to the seller in July 2007, as agreed to in the purchase agreement with the seller, however, the retention of the \$5 million by the seller was based on the financial performance of the acquired business over the two-year period beginning in May 2006. Accordingly, the \$5 million should have been charged to compensation expense over that two-year period on a level basis. Furthermore, in May 2009, a payment of \$10.3 million was placed in escrow as a progress payment related to a possible future earnout amount that the seller of the acquired business referenced above could earn. The \$10.3 million progress payment was calculated and paid into an escrow account pursuant to the terms of the purchase agreement. This amount was not earned by the seller, as the performance targets that need to be achieved are not expected to be met, and we expect the entire \$10.3 million placed in escrow to be returned to us.

We assessed the materiality of these errors in accordance with SEC Staff Accounting Bulletin No. 108, “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,” and determined that the errors were immaterial to the previously reported amounts contained in our periodic reports and we will correct the errors through subsequent periodic filings. The immaterial corrections have no effect on fiscal 2009 results of operations, cash, or cash flows from operations. For fiscal 2008 and fiscal 2007, we have adjusted our costs of services and provision for income taxes to reflect the adjusted amounts. See Note 2 to our Consolidated Financial Statements for further discussions related to the revision of the immaterial prior period errors.

Results of Operations

The following table provides operating information as a percentage of revenues for the periods indicated:

	Fiscal Year Ended		
	November 28, 2009 (52 weeks)	November 29, 2008 (53 weeks)	November 24, 2007 (52 weeks)
Revenues	100.0%	100.0%	100.0%
Costs of services	<u>66.3</u>	<u>66.7</u>	<u>63.0</u>
Gross profit	33.7	33.3	37.0
Selling, general and administrative expenses	25.2	24.6	22.8
Depreciation and amortization	<u>2.8</u>	<u>3.4</u>	<u>2.5</u>
Income from operations	5.7	5.3	11.7
Interest income	0.2	0.8	1.4
Interest expense	(1.0)	(0.9)	(0.9)
Gain on extinguishment of convertible debentures	0.2	0.3	—
Other income (expense)	<u>—</u>	<u>0.4</u>	<u>(0.1)</u>
Income before provision for income taxes, minority interest and equity method investment gain (loss)	5.1	5.9	12.1
Provision for income taxes	<u>2.7</u>	<u>3.7</u>	<u>4.7</u>
Income before minority interest and equity method investment gain (loss)	2.4	2.2	7.4
Minority interest	0.2	—	—
Equity method investment gain (loss), net of tax	<u>—</u>	<u>(0.1)</u>	<u>0.5</u>
Net income	<u>2.6%</u>	<u>2.1%</u>	<u>7.9%</u>

Fiscal 2009 Compared to Fiscal 2008

Revenues. Revenues decreased \$75.1 million, or 19.9%, to \$301.6 million for fiscal 2009 from \$376.8 million for fiscal 2008. Our revenue decline was primarily the result of a decrease in market demand and the global economic crisis. In addition, our revenue decline was due in part to the divestiture of our Australian-based operations and the divestiture of our capital projects, legal business consulting, forensic computing and investigations, and other small practices during fiscal 2008. The divested operations generated approximately \$16.5 million of revenue during fiscal 2008. In addition, the reported amount of our foreign currency denominated revenue declined in the fiscal 2009 because of the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. Another factor contributing to our revenue decline was the decrease in client reimbursable expenses. Client reimbursable expenses are pass-through expenses that carry little to no margin. Also, there was an additional week of revenue in fiscal 2008 as compared to fiscal 2009. These decreases in revenue were partially offset by an increase in revenue of \$8.1 million due to the consolidation of NeuCo, Inc., a subsidiary in which we have a 49.15% interest and ownership control under GAAP, and increased billing rates for our employee consultants, which were in effect at the beginning of the first quarter of fiscal 2009. In addition, revenue generated by our acquisition of Marakon Associates partially offset our overall revenue decline.

The total number of employee consultants decreased to 586 as of the end of fiscal 2009 from 610 as of the end of fiscal 2008, which is primarily due to workforce reductions completed during fiscal 2009, offset by an increase in employee consultants due to the Marakon Associates acquisition. The total number of employee consultants of 610 as of the end of fiscal 2008 had declined from 692 as of the end of third quarter of fiscal 2008 primarily due to workforce reductions completed in the fourth quarter of fiscal 2008. Utilization decreased slightly to 69% for fiscal 2009 from 71% for fiscal 2008.

In fiscal 2009, nearly all of our practices experienced revenue declines compared to fiscal 2008. Specifically, revenues for our competition practice decreased by approximately 25% compared to fiscal 2008 due to a decrease in market demand for our services, the divestiture of our Australian-based operations and the closure of our Dallas office in fiscal 2008, and the strengthening of the U.S. dollar relative to the British pound and other foreign currencies in fiscal 2009. Our competition practice continues to be our largest practice in terms of revenue. In our finance practice, revenues decreased nearly 35% in fiscal 2009 compared to fiscal 2008. The decrease is primarily due to the conclusion or reduction in scale of some major projects that have not been replaced by projects of comparable scale because many of our clients in the financial services industry are carefully managing their cash and are postponing discretionary expenditures. Our intellectual property practice revenues decreased approximately 25% in fiscal 2009 compared to fiscal 2008 due to a decrease in market demand. Revenues from our global industrial consulting practice declined approximately 25% in fiscal 2009 compared to fiscal 2008 due primarily to a decrease in market demand for our services in this practice due to the impact of the economic crisis on the chemicals industry, as well as the economic impact on oil companies facing low oil prices and high uncertainty, particularly in the U.S. The decrease in our global industrial consulting practice revenue is also partially attributed to the strengthening of the U.S. dollar relative to the British pound and other foreign currencies in fiscal 2009. These declines were partially offset by an increase in activity related to large global industrial consulting projects in the Middle East region. Revenue generated by our acquisition of Marakon Associates partially offset our overall revenue decline.

Overall, revenues outside of the U.S. represented approximately 26% of total revenues for fiscal 2009, compared with 22% of total revenues for fiscal 2008. Revenues derived from fixed-price engagements increased to 12.4% of total revenues for fiscal 2009 compared with 8.3% for fiscal 2008. The increase in international revenues as a percentage of revenues, and the increase in revenues from fixed-price engagements, is due primarily to an increase in activity related to large global industrial consulting projects in the Middle East region, an area where we have been focusing our business development efforts for several quarters, and the acquisition of Marakon Associates.

Costs of Services. Costs of services decreased \$51.4 million, or 20.5%, to \$199.9 million for fiscal 2009 from \$251.3 million for fiscal 2008. Included in costs of services are \$4.0 million and \$0.2 million in costs of services in fiscal 2009 and fiscal 2008, respectively, due to the consolidation of NeuCo, including \$0.2 million and \$26,000 in fiscal 2009 and fiscal 2008, respectively, of client reimbursable expenses for NeuCo. The decrease in costs of services is mainly due to a decrease in compensation expense for our employee consultants of \$50.3 million, or 24.8%. The decrease in compensation expense is due to a decrease in the average number of employee consultants, \$5.5 million in additional retention incentive bonus for key officers that was accrued for during fiscal 2008 without a corresponding accrual in fiscal 2009, and a decrease in the reported amount of costs of services due to the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. In addition, client reimbursable expenses decreased \$4.8 million, or 9.8%, to \$44.0 million for fiscal 2009 from \$48.7 million for fiscal 2008. Included in costs of services are \$2.0 million and \$5.2 million in restructuring charges recognized during fiscal 2009 and fiscal 2008, respectively. The restructuring charges for fiscal 2009 are principally associated with employee workforce reductions. The restructuring charges for fiscal 2008 are associated with employee workforce reductions and the divestiture or shutting down of the majority of our Australian and New Zealand-based operations. As a percentage of revenues, costs of services decreased to 66.3% for fiscal 2009 from 66.7% for fiscal 2008. The decrease in costs of services as a percentage of revenue is due to a decrease in compensation expense of 3.3%, attributable to a decrease in restructuring charges and additional retention incentive bonus accrual in fiscal 2008 without a corresponding accrual in fiscal 2009, offset by increases in client reimbursable expenses of 1.6% and NeuCo's costs of services of 1.2%. The increase in reimbursable expenses as a percentage of revenues is due to a decrease in revenue as well as an increase in the use of outside consultants in fiscal 2009 compared to fiscal 2008.

Selling, General, and Administrative Expenses. Selling, general, and administrative expenses decreased by \$16.7 million, or 18.0%, to \$76.1 million for fiscal 2009 from \$92.8 million for fiscal 2008. Included in selling, general, and administrative expenses are \$5.4 million and \$1.0 million for fiscal 2009 and fiscal 2008, respectively, related to the consolidation of NeuCo. The decrease in selling, general, and administrative expenses, is largely due to a decrease in compensation expense due to a reduction in support staff, reductions in travel and recruiting expenses due to a company-wide effort to reduce expenses, a decrease in commissions to non-employee experts, a decrease in rent expense that reflect the savings from office closures, consolidations, reductions, and moves, and a decrease in the reported amount of selling, general, and administrative expenses due to the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. Included in selling, general, and administrative expenses are \$3.1 million and \$5.4 million in restructuring charges recognized during fiscal 2009 and fiscal 2008, respectively. The restructuring charges for fiscal 2009 are principally associated with employee workforce reductions and office space reductions and moves. The restructuring charges for fiscal 2008 are associated with employee workforce reductions, office space reductions, and the divestiture or shutting down of the majority of our Australian and New Zealand-based operations and capital projects practice. As a percentage of revenues, selling, general, and administrative expenses increased to 25.2% for fiscal 2009 from 24.6% for fiscal 2008. The increase was due primarily to a 1.5% increase due to the consolidation of NeuCo and rent expense which decreased at a slower rate than revenues, partially offset by the decreases described above.

Depreciation and Amortization. Depreciation and amortization decreased by \$4.2 million, or 32.9%, to \$8.5 million for fiscal 2009 from \$12.7 million for fiscal 2008. Included in depreciation and amortization in fiscal 2009 are \$0.8 million in restructuring charges recognized associated with office space reductions and moves and \$0.6 million of depreciation and amortization related to NeuCo. This compares with \$3.7 million associated with restructuring charges in fiscal 2008 associated with office closures and the divestiture or shutting down of the majority of our Australian and New Zealand-based operations and \$0.3 million of depreciation and amortization related to NeuCo. The decrease was mainly due to a decrease in depreciation and amortization expense related to a decrease in leasehold improvements and computer equipment as a result of office closures and reduced headcount.

Interest Income. Interest income decreased by \$2.7 million to \$0.5 million for fiscal 2009 from \$3.1 million for fiscal 2008. This decrease was mainly due to lower interest rates. Our weighted average interest rate yield for the fiscal year ended November 28, 2009 on our average cash and cash equivalent and short-term investment balances was approximately 0.4% compared with approximately 2.8% for the fiscal year ended November 29, 2008.

Interest Expense. Interest expense decreased by \$0.6 million to \$2.9 million for fiscal 2009 from \$3.5 million for fiscal 2008. Interest expense primarily represents interest incurred on our outstanding 2.875% convertible debt, and the amortization of debt issuance costs. The decrease was mainly due to convertible debentures repurchased in fiscal 2009 and fiscal 2008.

Gain on Extinguishment of Convertible Debentures. During fiscal 2009, the Company repurchased convertible debentures in the principle amount of \$17.3 million, on the open market, for approximately \$16.7 million, resulting in a \$0.6 million gain on a pre-tax basis. During fiscal 2008, the Company repurchased convertible debentures in the principal amount of approximately \$10.2 million, on the open market, for approximately \$9.2 million, resulting in a \$1.0 million gain on a pre-tax basis.

Other Income (Expense). Other income decreased by \$1.4 million to \$44,000 for fiscal 2009 from \$1.4 million for fiscal 2008. Other income (expense) consists primarily of foreign currency exchange transaction gains and losses. The gain in fiscal 2009 was offset by the cumulative foreign currency exchange loss of \$0.4 million recognized due to the liquidation of our Australian based-operations. The gain in fiscal 2008 was largely attributable to recording the cumulative foreign currency exchange gain of \$0.5 million as income due to the liquidation of our New Zealand based-operations and the strengthening of the U.S. dollar compared to the British pound. We continue to manage our foreign currency exchange exposure through frequent settling of intercompany account balances and by

self-hedging movements in exchange rates between the value of the dollar and foreign currencies and the Euro and the British pound.

Provision for Income Taxes. The provision for income taxes decreased \$5.7 million, to \$8.1 million for fiscal 2009 from \$13.8 million for fiscal 2008. Our effective income tax rate was 52.9% for fiscal 2009 and 62.2% for fiscal 2008. The lower effective tax rate in fiscal 2009 is primarily due to improved performance in Europe and the Middle East region which enabled us to record a benefit from the utilization of foreign net operating loss carryforwards. The higher effective tax rate compared to statutory rates in fiscal 2008 is primarily due to continued losses in foreign locations that resulted in a lower tax benefit or provided no tax benefit, and a reduced level of taxable income in North America.

Minority Interest. Starting in the fourth quarter of fiscal 2008, our ownership interest in NeuCo increased to 49.15% and combined with our officers holding three Board of Director seats, and other considerations, our ownership constitutes control under GAAP. As a result, NeuCo's financial results since this transaction have been consolidated with ours and allocations of the minority share of NeuCo's net income result in deductions to our net income, while allocations of the minority share of NeuCo's net loss result in additions to our net income, as more fully described in Note 1 to our Notes to Consolidated Financial Statements. Minority interest in the results of operations of NeuCo allocable to its other owners was a net loss of \$0.6 million for fiscal 2009 and \$36,000 for fiscal 2008.

Net Income. Net income decreased by \$0.2 million, or 2.6%, to \$7.8 million for fiscal 2009 from \$8.0 million for fiscal 2008. Diluted net income per share decreased 1.4% to \$0.73 per share for fiscal 2009 from \$0.74 per share for fiscal 2008. Net income decreased at a greater rate than diluted net income per share because diluted weighted average shares outstanding decreased 186,000 shares, or 1.7%, to approximately 10,718,000 for fiscal 2009 from approximately 10,904,000 for fiscal 2008. The decrease in diluted weighted average shares outstanding for fiscal 2009 is primarily due to a decrease in common stock equivalents from employee stock option and restricted share awards and shares underlying our convertible debt due to the decline in our stock price.

Fiscal 2008 Compared to Fiscal 2007

Revenues. Revenues decreased \$17.9 million, or 4.5%, to \$376.8 million for fiscal 2008 from \$394.6 million for fiscal 2007. Our revenue decline was in part due to the divestiture of our Australian and New Zealand-based operations and the divestiture of our capital projects, legal business consulting, forensic computing and investigations, and a few other small practices during fiscal 2008. The divested operations generated approximately \$14.8 million of revenue during the fifty-three weeks ended November 29, 2008 and \$29.9 million of revenue during the fifty-two weeks ended November 24, 2007. In addition, the reported amount of our foreign currency denominated revenue declined in fiscal 2008 because of the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. Also, our client reimbursable expenses decreased. Client reimbursable expenses are pass-through expenses that carry little to no margin. These decreases in revenue were partially offset by an increase in revenue due to the consolidation of NeuCo of \$0.8 million, increased billing rates for our employee consultants, which were in effect at the beginning of the first quarter of fiscal 2008, and an additional week of revenue in fiscal 2008 as compared to fiscal 2007.

Revenues for our litigation and applied economics platform were approximately the same in fiscal 2008 and fiscal 2007 reflecting declines in our transfer pricing practice, offset by an increase in our labor and employment practice, as well as increased billing rates for our employee consultants. The labor and employment practice was new in fiscal 2007. Our competition practice continues to be our largest practice in terms of revenue. The competition practice revenues were approximately the same in fiscal 2008 and fiscal 2007 despite the effect of the divestiture of our Australian and New Zealand-based operations, which decreased competition practice revenues by approximately \$7.3 million compared to fiscal 2007.

Revenues for our business consulting platform decreased by approximately 5% compared to fiscal 2007 reflecting declines in our global industrial consulting, capital projects, and energy and environment

practices, offset by increases in our life sciences, metals, and aerospace and defense practices. We divested the capital projects practice during the fourth quarter of fiscal 2008, which represented approximately \$3.4 million in revenue in fiscal 2008 and \$6.5 million in fiscal 2007. Revenues for our global industrial consulting practice, which is our largest practice within the business consulting platform, declined in fiscal 2008 compared to fiscal 2007 because of the strengthening of the U.S. dollar relative to the British pound and other foreign currencies in fiscal 2008 and this practice was adversely affected by the completion of several long-running projects in the Middle East at the beginning of fiscal 2008 and were not fully replaced by new projects during fiscal 2008. The decline in energy and environment practice revenues is in part due to the divestiture of our Australian and New Zealand-based operations and the postponement of revenues from some major clients in the Middle East until fiscal 2009. Revenues in our life sciences practice increased because we benefited from our involvement in four on-going new product launches, global interest in new pricing paradigms for pharmaceutical products, and challenges posed by specialty pharmaceuticals in the U.S. The metals and aerospace and defense practice revenues increased due to an increase in the demand for our services.

Revenues for our finance platform decreased approximately 20% from fiscal 2007. The decrease is primarily due to a decrease in U.S. finance litigation practice revenue because we continue to be adversely affected on a year-over-year basis by the conclusion or reduction in scale of some major projects that have not yet been replaced by projects of comparable scale. In addition, the decrease in finance platform revenues is due to the decrease in forensic practice revenue attributable to our decision during fiscal 2008 to divest certain non-core components of this business and the effect of reducing headcount in underperforming locations.

Overall, revenues outside of the U.S. represented approximately 22% of total revenues in fiscal 2008, compared with 27% of total revenues for fiscal 2007. The decline in international revenues is due primarily to the divestiture of our Australian and New Zealand-based operations during the second quarter of fiscal 2008, which generated approximately \$17.7 million of revenue during the fifty-two weeks ended November 24, 2007. In addition, international revenues decreased because the U.S. dollar strengthened relative to the British pound and other foreign currencies during fiscal 2008, resulting in a decrease in the reported amount of foreign currency denominated revenue, and due to a decrease in the demand for our services in our international offices.

The total number of employee consultants decreased to 610 as of the end of fiscal 2008 from 771 as of the end of fiscal 2007, which is primarily due to workforce reductions and the divestiture of our Australia and New Zealand based-operations and capital projects practice completed during fiscal 2008. Utilization was 71% for fiscal 2008 compared with 75% for fiscal 2007. Revenues derived from fixed-price engagements increased to 8.3% of total revenues for fiscal 2008 compared with 6.6% for fiscal 2007.

Costs of Services. Costs of services increased \$2.7 million, or 1.1%, to \$251.3 million for fiscal 2008, including \$0.2 million related to NeuCo, from \$248.5 million for fiscal 2007. The increase in cost of services was due mainly to an increase in compensation expense for our employee consultants of \$3.9 million or 1.9%. The increase includes \$5.5 million in incentive bonus that was accrued as additional retention incentive for key officers, salary increases since the prior year, and approximately \$5.2 million in employee separation and other compensation costs related to the workforce reduction completed during fiscal 2008, offset partially by a decrease in compensation due to a decrease in the average number of employee consultants and a decrease in the reported amount of cost of services due to the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. Client reimbursable expenses included in costs of services decreased \$1.3 million, or 2.6%, to \$48.7 million for fiscal 2008 from \$50.0 million for fiscal 2007. As a percentage of revenues, cost of services increased to 66.7% for fiscal 2008 from 63.0% for fiscal 2007. Of the 3.7% increase as a percentage of revenues, 3.4% was due primarily to restructuring charges and increased compensation expense and related fringe costs for our employee consultants, which increased at greater rates than revenues due to the incentive bonus and employee separation costs noted above, and 0.3% was due to an increase in client reimbursable expenses.

Selling, General, and Administrative Expenses. Selling, general, and administrative expenses increased by \$2.7 million, or 3.0%, to \$92.8 million for fiscal 2008, including \$1.0 million related to NeuCo, from \$90.1 million for fiscal 2007. The increase in selling, general, and administrative expenses is largely due to \$5.4 million in employee separation costs, office space reduction costs, and the divestiture of our Australia and New Zealand-based operations and capital projects practice included in selling, general and administrative expenses in fiscal 2008. These increases are partially offset by a decrease in recruiting and travel expenses and a decrease in the reported amount of selling, general, and administrative expenses due to the strengthening of the U.S. dollar relative to the British pound and other foreign currencies. As a percentage of revenues, selling, general, and administrative expenses increased to 24.6% for fiscal 2008 from 22.8% for fiscal 2007. The increase was due primarily to employee separation costs, office space reduction costs, and the divestiture of our Australia and New Zealand-based operations and capital projects practice and the consolidation of NeuCo.

Depreciation and Amortization. Depreciation and amortization increased by \$2.9 million, or 29.8%, to \$12.7 million for fiscal 2008 from \$9.8 million for fiscal 2007. Included in depreciation and amortization are \$3.7 million in restructuring charges recognized in fiscal 2008 associated with office closures and the divestiture or shutting down of the majority of our Australian and New Zealand-based operations and \$0.3 million of depreciation and amortization related to NeuCo. This increase is partially offset by a decrease in depreciation and amortization expense primarily due to related to a decrease in leasehold improvements and computer equipment as a result of due to office closures and reduced headcount.

Interest Income. Interest income decreased by \$2.4 million to \$3.1 million for fiscal 2008 from \$5.5 million for fiscal 2007. This decrease was mainly due to lower interest rates. Our weighted average interest rate yield for the fiscal year ended November 29, 2008 on our average cash and cash equivalent balances was approximately 2.8% compared with approximately 4.8% for the fiscal year ended November 24, 2007.

Interest Expense. Interest expense increased by \$0.1 million to \$3.5 million for fiscal 2008 from \$3.3 million for fiscal 2007. Interest expense primarily represents interest incurred on our outstanding 2.875% convertible debt, and the amortization of debt issuance costs.

Gain on Extinguishment of Convertible Debentures. During fiscal 2008, the Company repurchased convertible debentures in the principal amount of approximately \$10.2 million, on the open market, for approximately \$9.2 million, resulting in a \$1.0 million gain on a pre-tax basis.

Other Income (Expense). Other income increased by \$1.9 million to \$1.4 million for fiscal 2008 from a net expense of \$0.4 million for fiscal 2007. Other income (expense) consists primarily of foreign currency exchange transaction gains and losses. The gain in fiscal 2008 was largely attributable to recording the cumulative foreign currency exchange gain of \$0.5 million as income due to the liquidation of our New Zealand based-operations and the strengthening of the U.S. dollar compared to the British pound. We continue to manage our foreign currency exchange exposure through frequent settling of intercompany account balances and by self-hedging movements in exchange rates between the value of the dollar and foreign currencies and the Euro and the British pound.

Provision for Income Taxes. The provision for income taxes decreased \$4.9 million, to \$13.8 million for fiscal 2008 from \$18.7 million for fiscal 2007. Our effective income tax rate was 62.2% for fiscal 2008 and 38.9% for fiscal 2007. The higher effective tax rate compared to statutory rates in fiscal 2008 is primarily due to continued losses in foreign locations that resulted in a lower tax benefit or provided no tax benefit, and a reduced level of taxable income in North America. The lower effective tax rate compared to statutory rates in fiscal 2007 was primarily due to the signing of an advance pricing agreement we entered into with the Internal Revenue Service during fiscal 2007, in connection with intercompany transfer pricing arrangements beginning in fiscal 2004. As a result of the agreement, we reduced our income tax contingency reserves, resulting in an income tax benefit of \$1.8 million.

Minority Interest. Starting in the fourth quarter of fiscal 2008, our ownership interest in NeuCo increased to 49.15% and combined with our officers holding three Board of Director seats, and other considerations, our ownership constitutes control under GAAP. As a result, NeuCo's financial results since this transaction have been consolidated with ours and allocations of the minority share of NeuCo's net income result in deductions to our net income, while allocations of the minority share of NeuCo's net loss result in additions to our net income, as more fully described in Note 1 to our Notes to Consolidated Financial Statements. Minority interest in the results of operations of NeuCo allocable to its other owners was net loss of \$36,000 for fiscal 2008.

Equity Method Investment Gain (Loss), Net of Tax. For fiscal 2007 and through October 2008, we accounted for our investment in NeuCo under the equity method of accounting. We recorded our share in the income or losses of NeuCo as equity method investment gain (loss) in the statements of income. For fiscal 2008, our equity in the losses of NeuCo was \$0.4 million, net of income tax. For fiscal 2007, our equity in the profits of NeuCo was \$1.8 million, net of income tax. This includes approximately \$2.1 million after income tax, which represents our share of a \$10.0 million benefit related to the licensing of intellectual property rights by NeuCo.

Net Income. Net income decreased by \$23.1 million, or 74.2%, to \$8.0 million for fiscal 2008 from \$31.1 million for fiscal 2007. The decrease in net income is due primarily to the charges related to employee separation, office space reductions, and the divestiture of our Australia and New Zealand based-operations and capital projects practice, as well as a decrease in revenue and utilization. Diluted net income per share decreased 71.1% to \$0.74 per share for fiscal 2008 from \$2.56 per share for fiscal 2007. Net income decreased at a greater rate than diluted net income per share because diluted weighted average shares outstanding decreased 1,245,000 shares, or 10.3%, to approximately 10,904,000 for fiscal 2008 from approximately 12,149,000 for fiscal 2007. The decrease in diluted weighted average shares outstanding for fiscal 2008 is primarily a result of repurchases of common stock during fiscal 2008 under our share repurchase programs and a decrease in common stock equivalents from employee stock option and restricted share awards and shares underlying our convertible debt due to the decline in our stock price, partially offset by stock issued due to stock option exercises.

Liquidity and Capital Resources

General. In fiscal 2009, we had a net decrease in cash and cash equivalents of \$36.5 million. We completed the year with cash and cash equivalents of \$82.8 million, short term investments of \$23.7 million, and working capital (defined as current assets less current liabilities) of \$150.7 million. As of November 28, 2009, approximately \$30.2 million was accrued for fiscal 2009 performance bonuses. We anticipate that the majority of these bonuses will be paid during the second quarter of fiscal 2010.

We believe that current cash and short-term investment balances, cash generated from operations, and amounts available under our bank line of credit will be sufficient to meet our anticipated working capital and capital expenditure requirements for at least the next 12 months.

Sources and Uses of Cash in Fiscal 2009. During fiscal 2009, net cash provided by operations was \$21.7 million. The primary sources of cash from operations include net income of \$7.8 million, an increase in deferred rent of \$2.1 million, share-based compensation expense of \$6.8 million, a decrease in deferred income taxes of \$7.0 million, depreciation and amortization expense of \$7.8 million, and decreases in unbilled services of \$7.7 million and accounts receivable of \$10.3 million due to a decrease in revenue. The sources of cash in operations were offset by increases in prepaid expenses and other assets of \$4.7 million and a decrease in accounts payable, accrued expenses, and other liabilities of \$23.3 million. The decrease in accounts payable, accrued expenses, and other liabilities is due to the payment of fiscal 2008 bonuses totaling approximately \$44.7 million, offset by current year compensation-related accruals yet to be paid.

We used \$41.2 million of net cash for investing activities during fiscal 2009, which included uses of cash of \$2.2 million for capital expenditures, \$15.7 million of net acquisition consideration payments

and an escrowed deposit, and \$23.3 million to purchase short-term investments to achieve higher returns on our invested balances.

We used \$17.7 million of cash for financing activities during fiscal 2009. Cash used in financing activities was primarily used to repurchase convertible debentures in the principal amount of approximately \$17.3 million for a repurchase price of approximately \$16.5 million.

Private Placement of Convertible Debt. In 2004, we completed a private placement of \$90.0 million of 2.875% convertible senior subordinated debentures due 2034. The debentures are our direct, unsecured senior subordinated obligations and rank junior in right of payment to our existing bank line of credit and any future secured indebtedness that we may designate as senior indebtedness. Interest of approximately \$0.9 million is payable semi-annually on June 15 and December 15 on the \$62.5 million principal amount of convertible debentures outstanding as of November 28, 2009.

As a result of our election on December 14, 2004, we must settle the conversion of the debentures, as follows: (i) \$1,000 in cash per \$1,000 principal amount of debentures converted; and (ii) in cash or shares of our common stock (at our further election, except for cash in lieu of fractional shares), any conversion obligation that exceeds the principal amount of the debentures converted.

The market price conversion trigger was not met during the fourth quarter of fiscal 2009 or the first quarter of fiscal 2010. Therefore, holders of the debentures are not able to exercise their right to convert the bonds during the first or second quarters of fiscal 2010. This test is repeated each fiscal quarter. To date, no conversions have occurred. However, during fiscal 2009 and fiscal 2008, we repurchased \$17.3 million and \$10.2 million in principal amount of our convertible bonds, on the open market, at a discount. We believe that in the event the contingent conversion trigger price is met, it is unlikely that a significant percentage of bondholders will exercise their right to convert because the debentures have traded at a premium over their conversion value. Since the holders of the debentures are not able to exercise their right to convert the bonds as of November 28, 2009, we have classified the \$62.5 million convertible debt as long-term debt as of November 28, 2009, in the accompanying consolidated balance sheet. Our revolving line of credit to borrow up to \$60.0 million expires on April 30, 2012 and it is our intention to renew or replace the line of credit, as desirable and available, which would allow us to continue to classify our convertible debentures as long-term debt, rather than short-term in future periods. In addition, the line of credit gives us additional flexibility to meet any unforeseen financial requirements.

As early as June 15, 2011 or upon certain specified fundamental changes, we may be required to repurchase all or any portion of the debentures, at the option of each holder, which, in the event of a fundamental change involving a change of control of our firm, may include the payment of a make-whole premium.

Borrowings under the Revolving Line of Credit. We are party to a senior loan agreement with our bank for a \$60.0 million revolving line of credit with a maturity date of April 30, 2012. Subject to the terms of the agreement, we may use borrowings under this revolving line of credit for acquisition financing, working capital, general corporate purposes, letters of credit, and foreign exchanges contracts. The available revolving line of credit is reduced, as necessary, to account for certain outstanding letters of credit. The \$60.0 million credit facility allows us to mitigate the potential liquidity risk, and to provide funding if required, in the event of conversion by the debenture holders. Funds available under the facility currently allows us to continue to classify our convertible debentures as long-term debt, rather than short-term, even if the convertible debentures have a right to convert in the short-term because the contingent conversion trigger price discussed above is met, so long as the line of credit, is at that time, classified as long-term debt. The revolving line of credit also gives us additional flexibility to meet any unforeseen financial requirements. The amounts available under our bank line of credit are constrained by various financial covenants and reduced by certain outstanding letters of credit. As of November 28, 2009, there were no amounts outstanding under this revolving line of credit and \$5.0 million in letters of credit were outstanding.

Borrowings under our credit facility bear interest, at LIBOR plus an applicable margin. Applicable margins range from 2.0% to 3.5%, depending on the ratio of our consolidated total debt to consolidated earnings before interest, taxes, depreciation and amortization, or EBITDA, for the preceding four fiscal quarters, subject to various adjustments stated in the senior loan agreement. These margins are adjusted both quarterly and each time we borrow under the credit facility. Interest is payable monthly. A commitment fee of 0.25% is payable on the unused portion of the credit facility. Borrowings under the credit facility are secured by 100% of the stock of certain of our U.S. subsidiaries and 65% of the stock of our foreign subsidiaries, which represents approximately \$73.3 million in net assets as of November 28, 2009.

Debt Restrictions. Under our senior loan agreement, we must comply with various financial and non-financial covenants. The financial covenants require us to maintain a minimum consolidated working capital of \$25.0 million and require us to comply with a consolidated total debt to EBITDA ratio of not more than 3.5 to 1.0 and a consolidated senior debt to EBITDA ratio of not more than 2.0 to 1.0. Compliance with these financial covenants is tested on a fiscal quarterly basis. The definition of “current liabilities” included in the working capital covenant of the senior loan agreement excludes any convertible subordinated debt for which we have not been notified of the intention to convert. The non-financial covenants of the senior loan agreement place restrictions on our ability to incur additional indebtedness, engage in acquisitions or dispositions, and enter into business combinations. We also may not pay dividends or repurchase our common stock if there is a stated event of default or the issuance of dividends or repurchase of our common stock would create an event of default. Any indebtedness outstanding under the senior credit facility may become immediately due and payable upon the occurrence of stated events of default, including our failure to pay principal, interest or fees or a violation of any financial covenant. As of November 28, 2009, we were in compliance with our covenants under the senior loan agreement.

Other Matters. As part of our business, we regularly evaluate opportunities to acquire other consulting firms, practices or groups or other businesses. In recent years, we have typically paid for acquisitions with cash, or a combination of cash and our common stock, and we may continue to do so in the future. To pay for an acquisition, we may use cash on hand, cash generated from our operations or borrowings under our revolving credit facility, or we may pursue other forms of financing. Our ability to secure short-term and long-term debt or equity financing in the future, including our ability to refinance our current senior loan agreement, will depend on several factors, including our future profitability, the levels of our debt and equity, restrictions under our existing line of credit and the overall credit and equity market environments.

In June 2007, we announced that our Board of Directors authorized a share repurchase program of up to a total of 1,500,000 shares of our common stock. We will finance the repurchase program with available cash and cash from future operations. We may repurchase shares in open market purchases or in privately negotiated transactions in accordance with applicable insider trading and other securities laws and regulations. To date, we have repurchased 1,284,282 shares under this plan for approximately \$55.3 million. We expect to continue to repurchase shares under the share repurchase program.

During fiscal 2009 and fiscal 2008, we also repurchased approximately \$17.3 million and \$10.2 million principal amount of our convertible debentures, respectively, on the open market, at a purchase price of approximately \$16.7 million and \$9.2 million, respectively. We may from time to time seek to retire or repurchase additional portions of our 2.875% convertible debentures through cash purchases and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved may be material.

Contingencies. In connection with an acquisition we completed in fiscal 2009, we agreed to pay incentive performance awards to certain employees of the acquired business, if specific performance targets are met in fiscal 2010 through fiscal 2012. In addition, in connection with an acquisition completed during fiscal 2006, we agreed to pay additional consideration, contingent upon the achievement of specific performance targets. We believe that we will have sufficient funds to satisfy any obligations related to the incentive performance awards and contingent consideration. We expect to fund these payments, if any, from existing cash resources, cash generated from operations, or financing transactions.

Impact of Inflation. To date, inflation has not had a material impact on our financial results. There can be no assurance, however, that inflation will not adversely affect our financial results in the future.

Contractual Obligations

The following table presents information about our known contractual obligations as of November 28, 2009. It does not reflect contractual obligations that may have arisen or may arise after that date. Except for historical facts, the information in this section is forward-looking information.

Contractual Obligations	Total	Fiscal 2010	Payments due by period		
			Fiscal 2011-2012	Fiscal 2013-2014	After Fiscal 2014
(in thousands)					
Debt obligations:					
Notes payable to sellers(1) . . .	\$ 3,085	\$ 1,435	\$ 950	\$ 700	\$ —
Convertible debentures payable(2)	62,530	—	62,530	—	—
Deferred compensation	2,413	889	1,524	—	—
Total debt obligations	68,028	2,324	65,004	700	—
Capital lease obligations	—	—	—	—	—
Operating lease obligations	96,904	20,114	32,738	30,610	13,442
Purchase obligations(3)	—	—	—	—	—
Other long-term liabilities(4)(5)	1,196	150	1,046	—	—
Total	<u>\$166,128</u>	<u>\$22,588</u>	<u>\$98,788</u>	<u>\$31,310</u>	<u>\$13,442</u>

(1) “Notes payable to sellers” includes \$0.9 million in contingent consideration for an acquisition we completed in fiscal 2005 and \$2.2 million due to a former shareholder of NeuCo. The value of the \$2.2 million note includes \$0.3 million for future interest accretion and the value of this note on the balance sheet has been discounted.

(2) As set forth in the indenture governing the convertible debentures, the debenture holder must wait until June 2011 to redeem the debentures and, in the absence of our stock price reaching \$50 per share for a specified period of time prior to June 2011, to convert the debenture to our shares, with the principal amount of the debenture to be settled with cash. In addition, interest of approximately \$0.9 million, is payable semi-annually on June 15 and December 15. We will also be required to pay contingent interest on the applicable interest payment date to the holders of the debentures for the period commencing June 20, 2011, and ending December 14, 2011, if the average trading price of the debentures for each of the last five trading days immediately preceding June 20, 2011, equals 125% or more of the principal amount of the debentures. Thereafter, we will pay contingent interest on the interest payment date for a six-month interest period if the average trading price of the debentures during the five trading day period immediately preceding the first day of the applicable six-month interest period equals or exceeds 125% of the principal amount of the debentures. The contingent interest payable per debenture will equal 0.25% of the average trading price of such debenture during the applicable five trading day reference period.

- (3) In connection with an acquisition we completed in fiscal 2006, we agreed to pay additional consideration, contingent upon the achievement of specific performance targets. At this time, payments of additional amounts are not expected, although it is not possible to know this for certain until the full contingency period has expired.
- (4) NeuCo received a cash advance from a customer in exchange for a note. There are no specified repayment dates in the note agreement, except that the principal balance of the note becomes due upon demand at the termination of the blanket contract between NeuCo and the customer. NeuCo will repay the note by allowing the customer to deduct 50% of the total amount of all future invoices that are payable to NeuCo, in lieu of sending cash. As of November 28, 2009, based on estimated future invoices for this customer, NeuCo estimated that \$0.2 million of the note will be paid in fiscal 2010 and has been classified as current in our consolidated balance sheet. NeuCo is unable to estimate when the remaining balance will mature beyond fiscal 2010. As a result, we have included the remaining balance in the fiscal 2011 to fiscal 2012 amount above.
- (5) In connection with an acquisition we completed in fiscal 2009, we agreed to pay incentive performance awards to certain employees of the acquired business, if specific performance targets are met in fiscal 2010 through fiscal 2012. Since it is not possible to estimate if or when the performance targets will be met, the maximum liability has not been included in the table above.

We are party to standby letters of credit with Citizens Bank of Massachusetts in support of the minimum future lease payments under leases for permanent office space and bonds required per the terms of certain project proposals and contracts amounting to \$5.0 million as of November 28, 2009.

Factors Affecting Future Performance

Item 1A of this annual report sets forth risks and uncertainties that could cause actual results to differ materially from the results contemplated by the forward-looking statements contained in this annual report. If any of these risks, or any risks not presently known to us or that we currently believe are not significant, develops into an actual event, then our business, financial condition, and results of operations could be adversely affected.

Item 7A—Quantitative and Qualitative Disclosure About Market Risk

Foreign Exchange Risk

The majority of our operations are based in the U.S., and accordingly, the majority of our transactions are denominated in U.S. dollars. However, we have foreign-based operations where transactions are denominated in foreign currencies and are subject to market risk with respect to fluctuations in the relative value of foreign currencies. Our primary foreign currency exposures relate to our short-term intercompany balances with our foreign subsidiaries and accounts receivable and cash valued in the United Kingdom in U.S. dollars or Euro. Our primary foreign subsidiaries have functional currencies denominated in the British pound and Euro, and foreign denominated assets and liabilities are remeasured each reporting period with any exchange gains and losses recorded in our consolidated statements of operations. We continue to manage our foreign currency exchange exposure through frequent settling of intercompany account balances and by self-hedging movements in exchange rates between the value of the dollar and foreign currencies and the Euro and the British Pound. Although fluctuations in foreign exchange rates may impact reported revenues and expenses significantly, based on currency exposures existing at November 28, 2009, a hypothetical 10% movement in foreign exchange rates would not expose us to significant gains or losses in net earnings or cash flows.

From time to time, we may use derivative instruments to manage the risk of exchange rate fluctuations. However, at November 28, 2009, we had no outstanding derivative instruments. We do not use derivative instruments for trading or speculative purposes.

Interest Rate Risk

We maintain an investment portfolio consisting mainly of U.S. government obligations, funds holding only U.S. and Canadian government obligations, and corporate obligations with maturities of less than a year. These held-to-maturity securities are subject to interest rate risk. However, a hypothetical change in the interest rate of 10% would not have a material impact to the fair values of these securities at November 28, 2009 primarily due to their short maturity.

Item 8—Financial Statements and Supplementary Data

We have included our consolidated financial statements in this annual report starting on page FS-1. We have provided an index to our consolidated financial statements on Page FS-1.

Item 9—Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A—Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Chief Financial Officer, we evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our President and Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that we record, process, summarize and report the information we must disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended, within the time periods specified in the SEC's rules and forms.

Evaluation of Changes in Internal Control over Financial Reporting

During the fourth quarter of fiscal 2009, we adopted certain changes to our internal control procedures in connection with mergers and acquisitions to address our accounting for earnout payments. Under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Chief Financial Officer, we have determined that, during the fourth quarter of fiscal 2009, there were no other changes in our internal control over financial reporting that have affected, or are reasonably likely to affect, materially our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Chief Financial Officer, we assessed the effectiveness of our internal control over financial reporting as of the end of the period covered by this report based on the framework in "Internal Control—Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, our President and Chief Executive Officer and our Chief Financial Officer concluded that our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of our financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Our independent registered public accounting firm, KPMG LLP, has issued an attestation report on their assessment of the Company's internal control over financial reporting. The attestation report is included herein.

Important Considerations

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, there can be no assurance that any system of disclosure controls and procedures or internal control over financial reporting will be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.

Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting

The Board of Directors and Shareholders of CRA International, Inc.:

We have audited CRA International, Inc.'s internal control over financial reporting as of November 28, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). CRA International, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, CRA International, Inc. maintained, in all material respects, effective internal control over financial reporting as of November 28, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of CRA International, Inc. as of November 28, 2009 and November 29, 2008, and the related consolidated statements of income, cash flows and shareholders' equity for each of the fiscal years in the three-year period ended November 28, 2009, and our report dated January 29, 2010 expressed an unqualified opinion on those consolidated financial statements.

Item 9B—Other Information

None.

PART III

We have omitted the information required in Part III of this annual report because we intend to include that information in our definitive proxy statement for our 2010 annual meeting of shareholders, which we expect to file before 120 days after the end of fiscal 2009. We incorporate that information in this annual report by reference to our 2010 proxy statement.

Item 10—*Directors, Executive Officers and Corporate Governance*

We incorporate the information required by this item by reference to the sections captioned “Executive Officers and Directors”, “Corporate Governance”, and “Section 16(a) Beneficial Ownership Reporting Compliance” in our 2010 annual proxy statement.

Item 11—*Executive Compensation*

We incorporate the information required by this item by reference to the section captioned “Compensation of Directors and Executive Officers” in our 2010 annual proxy statement.

Item 12—*Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters*

We incorporate the information required by this item by reference to the sections captioned “Security Ownership of Certain Beneficial Owners and Management” and “Equity Compensation Plans” in our 2010 annual proxy statement.

Item 13—*Certain Relationships and Related Transactions and Director Independence*

We incorporate the information required by this item by reference to the sections captioned “Transactions with Related Parties” and “Corporate Governance” in our 2010 annual proxy statement.

Item 14—*Principal Accountant Fees and Services*

We incorporate the information required by this item by reference to the section captioned “Principal Accountant Fees and Services” in our 2010 annual proxy statement.

PART IV

Item 15—*Exhibits and Financial Statement Schedules*

(a) *Financial Statements, Schedules, and Exhibits.* We have listed our consolidated financial statements filed as part of this annual report in the index to consolidated financial statements on page FS-1. We have listed the exhibits filed as part of this annual report in the accompanying exhibit index, which follows the signature page to this annual report.

(b) *Exhibits.* We have listed the exhibits filed as part of this annual report in the accompanying exhibit index, which follows the signature page to this annual report.

(c) *Financial Statement Schedules.* We have omitted all financial statement schedules because they are not applicable or not required or because we have included the necessary information in our consolidated financial statements or related notes.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of CRA International, Inc.

We have audited the accompanying consolidated balance sheets of CRA International, Inc. and subsidiaries as of November 28, 2009 and November 29, 2008, and the related consolidated statements of income, cash flows and shareholders' equity for each of the fiscal years in the three-year period ended November 28, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of CRA International, Inc. and subsidiaries as of November 28, 2009 and November 29, 2008, and the consolidated results of their operations and their cash flows for each of the fiscal years in the three-year period ended November 28, 2009, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), CRA International, Inc.'s internal control over financial reporting as of November 28, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated January 29, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

See accompanying notes to the consolidated financial statements.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Description of Business

CRA International, Inc. (the “Company,” or “CRA”), is a worldwide leading economic, financial, and management consulting services firm that applies advanced analytic techniques and in-depth industry knowledge to complex engagements for a broad range of clients. CRA offers services in two broad areas: litigation, regulatory, and financial consulting and management consulting. CRA operates in one business segment, which is consulting services. As of September 1, 2009, CRA operates its business under its registered trade name, Charles River Associates.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. In addition, as more fully explained below, the consolidated financial statements include the Company’s interest in NeuCo, Inc. (“NeuCo”). All significant intercompany accounts have been eliminated.

NeuCo Interest

In fiscal 2007, and the majority of fiscal 2008, the Company’s interest in NeuCo was 36.4%. As such, the investment in NeuCo was accounted for under the equity method of accounting. During the fourth quarter of fiscal 2008, NeuCo acquired 100% of Rio Tinto Energy America Services Company’s investment in NeuCo. As a result of this transaction, the Company’s ownership interest in NeuCo increased to 49.15% and combined with CRA’s officers holding three Board of Director seats, and other considerations, CRA’s ownership constitutes control under GAAP. NeuCo’s financial results since this transaction have been consolidated with CRA’s and the portion of the results of operations of NeuCo allocable to its other owners is shown as “minority interest”. NeuCo’s revenues included in the consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$8.9 million and \$0.8 million, respectively. NeuCo’s net loss included in the consolidated statement of income for fiscal 2009 and fiscal 2008 totaled approximately \$1.5 million and \$71,000, respectively. NeuCo’s net loss, net of amounts allocable to its other owners, included in CRA’s consolidated statement of income for fiscal 2009 and fiscal 2008 totaled \$0.8 million and \$0.4 million, respectively.

NeuCo’s interim reporting schedule is on a calendar month end basis, but its fiscal year ends on the last Saturday of November. The first three quarters of CRA’s fiscal year could include up to a three-week reporting lag between CRA’s quarter end and the most recent financial statements available from NeuCo. CRA does not believe the reporting lag has a significant impact on CRA’s consolidated statements of income or financial condition.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make significant estimates and judgments that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Estimates in these consolidated financial statements include, but are not limited to, accounts receivable allowances, revenue recognition on fixed price contracts, depreciation of property and equipment, share-based compensation, valuation of acquired intangible assets, impairment of long lived assets, goodwill, accrued and deferred income taxes, valuation allowances on deferred tax assets, accrued bonuses, accrued exit costs, and other accrued expenses. These items are monitored and analyzed by the Company for changes in facts and circumstances, and material changes in these estimates could

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

occur in the future. Changes in estimates are recorded in the period in which they become known. CRA bases its estimates on historical experience and various other assumptions that CRA believes to be reasonable under the circumstances. Actual results may differ from those estimates if CRA's assumptions based on past experience or other assumptions do not turn out to be substantially accurate.

Reclassifications

In fiscal 2008 and fiscal 2007, "depreciation and amortization" was included with "selling, general and administrative expenses". These expenses have been reclassified from "selling, general and administrative expenses" to conform to the current year's presentation within the consolidated statements of income.

Fiscal Year

CRA's fiscal year ends on the last Saturday in November and, accordingly, its fiscal year will periodically contain 53 weeks rather than 52 weeks. Fiscal 2009 and fiscal 2007 were 52-week years and fiscal 2008 was a 53-week year.

Revenue Recognition

CRA derives substantially all of its revenues from the performance of professional services. The contracts that CRA enters into and operates under specify whether the engagement will be billed on a time-and-materials or a fixed-price basis. These engagements generally last three to six months, although some of CRA's engagements can be much longer in duration. Each contract must be approved by one of CRA's vice presidents.

CRA recognizes substantially all of its revenues under written service contracts with its clients where the fee is fixed or determinable, as the services are provided, and only in those situations where collection from the client is reasonably assured and sufficient contractual documentation has been obtained. In certain cases CRA provides services to its clients without sufficient contractual documentation, or fees are tied to performance-based criteria, which require the Company to defer revenue in accordance with U.S. GAAP. In these cases, these amounts are fully reserved until all criteria for recognizing revenue are met.

Most of CRA's revenue is derived from time-and-materials service contracts. Revenues from time-and-materials service contracts are recognized as services are provided based upon hours worked and contractually agreed-upon hourly rates, as well as a computer services fee based upon hours worked.

Revenues from the majority of the Company's fixed-price engagements are recognized on a proportional performance method based on the ratio of costs incurred, substantially all of which are labor-related, to the total estimated project costs. CRA derived 12.4% and 8.3% of revenues from fixed-price engagements in fiscal 2009 and fiscal 2008, respectively. Project costs are based on the direct salary of the consultants on the engagement plus all direct expenses incurred to complete the engagement that are not reimbursed by the client. The proportional performance method is used since reasonably dependable estimates of the revenues and costs applicable to various stages of a contract can be made, based on historical experience and terms set forth in the contract, and are indicative of the level of benefit provided to CRA's clients. Fixed-price contracts generally include a termination provision that converts the agreement to a time-and-materials contract in the event of termination of the contract. CRA's management maintains contact with project managers to discuss the status of the projects and, for fixed-price engagements, management is updated on the budgeted costs and resources required to complete the project. These budgets are then used to calculate revenue recognition and to

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

estimate the anticipated income or loss on the project. CRA has occasionally been required to commit unanticipated additional resources to complete projects, which have resulted in lower than anticipated income or losses on those contracts. CRA may experience similar situations in the future. Provisions for estimated losses on contracts are made during the period in which such losses become probable and can be reasonably estimated. To date, such losses have not been significant.

Revenues also include reimbursable expenses, which include travel and other out-of-pocket expenses, outside consultants, and other reimbursable expenses. These reimbursable expenses are as follows (in thousands):

	Year Ended		
	November 28, 2009 (52 weeks)	November 29, 2008 (53 weeks)	November 24, 2007 (52 weeks)
Reimbursable expenses	\$43,961	\$48,739	\$50,034

CRA maintains accounts receivable allowances for estimated losses resulting from clients' failure to make required payments. The Company bases its estimates on historical collection experience, current trends, and credit policy. In determining these estimates, CRA examines historical write-offs of its receivables and reviews client accounts to identify any specific customer collection issues. If the financial condition of CRA's customers were to deteriorate or disputes were to arise regarding the services provided, resulting in an impairment of their ability or intent to make payment, additional allowances may be required.

Unbilled services represent revenue recognized by CRA for services performed but not yet billed to the client. Deferred revenue represents amounts billed or collected in advance of services rendered.

CRA collects goods and services and value added taxes from customers and records these amounts on a net basis, which is within the scope of ASC Topic 605-45, "Principal Agent Considerations".

Cash Equivalents and Investments

Cash equivalents consist principally of U.S. government obligations, funds holding only U.S. government obligations, money market funds, commercial paper, bankers' acceptances, certificates of deposit, and corporate obligations with maturities when purchased of three months or less. Short-term investments generally consist of U.S. and Canadian government bonds and have maturities when purchased of more than three months and less than one year. These short-term investments are classified as held-to-maturity. The carrying amount of these investments are stated at amortized cost, which approximates fair value. As of November 28, 2009, short-term investments included \$19.0 million in U.S. government bonds and \$4.7 million in Canadian government bonds. Long-term investments, if any, are intended to be held to maturity, and generally consist of government bonds with maturities of more than one year but less than two years.

If a decline in fair value below the amortized cost basis of an investment is judged to be other-than-temporary, the cost basis of the investment is written down to fair value. For those investments for which the fair value of the investment is less than its amortized cost, the Company does not intend to sell such investment and it is more likely than not that it will not be required to sell such investment prior to the recovery of its amortized cost basis less any current period credit losses, the credit-related portion of other-than-temporary impairment losses is recognized in earnings while the noncredit-related portion is recognized in other comprehensive income, net of related taxes. During fiscal 2009, the Company did not write-down any investment balances.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Fair Value of Financial Instruments

The Company's financial instruments, including cash, cash equivalents, investments, accounts receivable, receivables from employees and non-employee experts, accounts payable, and accrued expenses are carried at cost, which approximates their fair value because of the short-term maturity of these instruments or the stated interest rates are indicative of market interest rates. The fair value of the Company's convertible debentures payable at November 28, 2009 was approximately \$61.6 million based upon dealer quotes. The carrying value of the Company's convertible debentures payable was \$62.5 million as of November 28, 2009.

Goodwill

In accordance with ASC Topic 350, "Goodwill and Other Intangible Assets", goodwill is not subject to amortization, but is monitored at least annually for impairment, or more frequently, as necessary, if there are other indicators of impairment. Any impairment would be measured based upon the fair value of the related asset. Under ASC Topic 350, in performing the first step of the goodwill impairment testing and measurement process, the Company compares its entity-wide estimated fair value to net book value to identify potential impairment. Management estimates the entity-wide fair value utilizing the Company's market capitalization, plus an appropriate control premium. The Company has utilized a control premium which considers appropriate industry, market and other pertinent factors, including indications of such premiums from data on recent acquisition transactions. If the Company determines through the impairment evaluation process that goodwill has been impaired, an impairment charge would be recorded in the consolidated statement of income. The Company completed the annual impairment test required as of November 28, 2009 and determined that there was no impairment.

Intangible Assets

Intangible assets that are separable from goodwill and have determinable useful lives are valued separately and amortized over their estimated useful lives. Intangible assets consist principally of non-competition agreements, which are amortized on a straight line basis over the related estimated lives of the agreements (eight to ten years), as well as customer relationships, customer lists, developed technology, and trade names, which are amortized on a straight-line basis over their remaining useful lives (two to fifteen years).

Property and Equipment

Property and equipment are recorded at cost. Depreciation is calculated using the straight-line method based on the estimated useful lives of three years for computer equipment, three to five years for computer software, and ten years for furniture and fixtures. Amortization of leasehold improvements is calculated using the straight-line method over the shorter of the lease term or the estimated useful life of the leasehold improvements. Expenditures for maintenance and repairs are expensed as incurred. Expenditures for renewals and betterments are capitalized.

Leases and Deferred Rent

The Company leases all of its office space. Leases are evaluated and classified as operating or capital leases for financial reporting purposes. For leases that contain rent escalations and rent holidays, the Company records the total rent payable during the lease term, as determined above, on a straight-line basis over the term of the lease and records the difference between the rents paid and the straight-line rent as deferred rent. Additionally, any tenant improvement allowances received from the lessor are recorded as a reduction to deferred rent.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Impairment of Long-Lived Assets

The Company reviews the carrying value of its long-lived assets (primarily property and equipment, receivables from employees and non-employee experts, and intangible assets) to assess the recoverability of these assets whenever events indicate that impairment may have occurred. Factors CRA considers important that could trigger an impairment review include the following:

- a significant underperformance relative to expected historical or projected future operating results;
- a significant change in the manner of CRA's use of the acquired asset or the strategy for CRA's overall business;
- a significant negative industry or economic trend; and
- CRA's entity-wide fair value relative to net book value.

If CRA determines that an impairment review is required, CRA would review the expected future undiscounted cash flows to be generated by the assets. If CRA determines that the carrying value of long-lived assets may not be recoverable, CRA would measure any impairment based on a projected discounted cash flow method using a discount rate determined by CRA to be commensurate with the risk inherent in CRA's current business model. If impairment is indicated through this review, the carrying amount of the asset would be reduced to its estimated fair value.

Concentration of Credit Risk

The Company's billed and unbilled receivables consist of a broad range of clients in a variety of industries located throughout the U.S. and in other countries. The Company performs a credit evaluation of its clients to minimize its collectibility risk. Periodically, the Company will require advance payment from certain clients. However, the Company does not require collateral or other security. Historically, the Company has not experienced significant write-offs. The Company maintains accounts receivable allowances for estimated losses resulting from a clients' failure to make required payments. The Company bases its estimates on historical collection experience, current trends, and credit policy. In determining these estimates, CRA examines historical write-offs of its receivables and reviews client accounts to identify any specific customer collection issues. If the financial condition of CRA's customers were to deteriorate, resulting in an impairment of their ability or intent to make payment, additional allowances may be required.

A rollforward of the accounts receivable allowances is as follows:

	Fiscal Year		
	2009	2008	2007
	(In thousands)		
Balance at beginning of period	\$10,715	\$10,573	\$ 6,324
Acquired NeuCo reserve balance	—	151	—
Change related to NeuCo	11	—	—
Additions charged to revenues	4,765	5,756	7,994
Amounts written off	(8,679)	(5,765)	(3,745)
Balance at end of period	\$ 6,812	\$10,715	\$10,573

Amounts deemed uncollectible, either due to the client's inability or unwillingness to pay, are recorded as a reduction to revenues.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Share-Based Compensation

CRA accounts for equity-based compensation using a fair value based recognition method. Under the fair value recognition requirements of ASC Topic 718, "Compensation-Stock Compensation", share-based compensation cost is estimated at the grant date based on the fair value of the award and is recognized as expense over the requisite service period of the award. The amount of share-based compensation expense recognized at any date must at least equal the portion of grant date value of the award that is vested at that date. In the fourth quarter of fiscal 2009, the Company discovered a computational error in the third-party software used by the Company to calculate the share-based compensation expense whereby the expense recognized for each vested portion of the award was less than the grant date fair value of the vested portion of the award. The error resulted in an understatement of share-based compensation expense in fiscal 2006, fiscal 2007, fiscal 2008, and the first quarter of fiscal 2009 and an overstatement of share-based compensation expense in the second and third quarters of fiscal 2009. In accordance with SEC Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements," the Company evaluated the materiality of the error from qualitative and quantitative perspectives, and concluded that the error was immaterial to any prior year financial statements.

For share-based awards granted to non-employee experts, CRA accounts for the compensation under variable accounting in accordance with ASC Topic 718 and ASC Topic 505-50, "Equity-Based Payments to Non-Employees" (formerly Emerging Issues Task Force ("EITF") 96-18, "Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services"), and recognizes the cost over the related vesting period.

Deferred Compensation

Deferred compensation included in liabilities represents amounts owed to executive officers for fiscal 2006 bonuses.

Income Taxes

The Company accounts for income taxes using the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities are recognized based upon anticipated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets if it is more likely than not that such assets will not be realized.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in several different tax jurisdictions. The Company records liabilities for estimated tax obligations resulting in a provision for taxes that may become payable in the future. In June 2006, ASC Topic 740-10, "Income Taxes" (formerly FASB Interpretation 48, "Accounting for Uncertainty in Income Taxes"), was issued. ASC Topic 740-10 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC Topic 740-10 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. CRA adopted ASC Topic 740-10 in the first quarter of fiscal 2008 and the

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

adoption resulted in an increase in the liability for uncertain tax positions of \$1.1 million and a reduction in deferred tax liabilities. There was no impact on retained earnings.

CRA includes accrued interest and penalties, if any, related to uncertain tax positions in income tax expense.

Foreign Currency Translation

Balance sheet accounts of the Company's foreign subsidiaries are translated into U.S. dollars at year-end exchange rates and operating accounts are translated at average exchange rates for each year. The resulting translation adjustments are recorded in shareholders' equity as a component of accumulated other comprehensive income (loss). Foreign currency transactions are translated at current exchanges rates, with adjustments recorded in income. The effect of transaction gains and losses recorded in income amounted to a gain of \$44,000 for fiscal 2009, a gain of \$1.4 million for fiscal 2008, and a loss of \$441,000 for fiscal 2007.

Accounting Pronouncements

In July 2009, the FASB Accounting Standards Codification (the "Codification") officially became the single source of authoritative nongovernmental U.S. GAAP, superseding existing FASB, American Institute of Certified Public Accountants, EITF, and related accounting literature. Going forward, only one level of authoritative GAAP will exist. All other accounting literature will be considered non-authoritative. The Codification reorganizes the thousands of GAAP pronouncements into roughly 90 accounting topics and displays them using a consistent structure. Also included in the Codification is relevant SEC guidance organized using the same topical structure in separate sections within the Codification. The Codification was effective for interim and annual periods ending after September 15, 2009. The Company adopted the Codification during the fourth quarter of fiscal 2009. The impact on its financial statements is limited to disclosures. All references to authoritative accounting literature will now be referenced in accordance with the Codification.

In May 2009, the FASB issued guidance included in ASC Topic 855, "Subsequent Events" (formerly Statements of Financial Accounting Standards ("SFAS") No. 165). The new provisions of ASC Topic 855 establishes general accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. The provisions of the new standard also outline the circumstances under which an entity would need to record transactions occurring after the balance sheet date in the financial statements. These new disclosures will identify the date through which the entity has evaluated subsequent events. The Company adopted the new provisions of ASC Topic 855 and it did not have a material impact on the Company's consolidated statement of operations and financial condition. CRA has evaluated subsequent events for recognition or disclosure through the date this Form 10-K was filed with the SEC.

In May 2008, the FASB issued guidance included in ASC Topic 470-20, "Debt" (formerly FASB Staff Position ("FSP") No. Accounting Principles Board Opinion 14-1, "Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)"), which changes the accounting treatment for convertible debt instruments that allow for either mandatory or optional cash settlements. The new provisions of ASC Topic 470 will require the Company to recognize non-cash interest expense on the convertible senior subordinated debentures based on the market rate for similar debt instruments without the conversion feature. The new provisions of ASC Topic 470 are effective for fiscal years beginning on or after December 15, 2008, which is the Company's fiscal 2010, and must be applied on a retrospective basis. Upon retroactive adoption of ASC 470-20 in fiscal 2010, the Company expects to record a cumulative adjustment for prior years that is estimated as an approximately \$6.5 million non-cash decrease in retained earnings

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

through fiscal 2009. Also, on the date of issuance, the carrying amount of the convertible debentures is expected to be retroactively adjusted to reflect a discount of approximately \$12.6 million and a reduction of deferred financing costs of approximately \$0.5 million, with offsetting increases in common stock of approximately \$7.0 million and deferred tax liability of \$5.1 million. Under 470-20, in fiscal 2010, the Company expects to record incremental non-cash interest expense of approximately \$1.4 million.

In December 2007, the FASB issued guidance included in ASC Topic 805, "Business Combinations" (formerly FSP SFAS No. 141R-1), which amends and clarifies SFAS No. 141R, "Business Combinations". The new provisions of ASC Topic 805 require the acquiring entity in a business combination to record all assets acquired and liabilities assumed at their respective acquisition-date fair values if fair value can be reasonably estimated, changes the recognition of assets acquired and liabilities assumed arising from contingencies, changes the recognition and measurement of contingent consideration, and requires the expensing of acquisition-related costs as incurred. If fair value cannot be reasonably estimated, the asset or liability would generally be recognized in accordance with ASC Topic 450, "Contingencies". ASC Topic 805 also requires additional disclosure of information surrounding a business combination, such that users of the entity's financial statements can fully understand the nature and financial impact of the business combination. The new provisions of ASC Topic 805 applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, which is the Company's fiscal 2010. An entity may not apply the new provisions of ASC Topic 805 before that date. The Company will adopt the new provisions of ASC Topic 805 in fiscal 2010. For business combinations completed on or subsequent to the adoption date, the application of the new provisions of this topic could have a significant impact on the Company's consolidated statement of operations and financial condition, the magnitude of which will depend on the specific terms and conditions of the transactions.

In December 2007, the FASB issued guidance included in ASC Topic 810, "Consolidation" (formerly SFAS No. 160). ASC Topic 810 establishes accounting and reporting standards for noncontrolling interests (previously referred to as "minority interests") in a subsidiary and for the deconsolidation of a subsidiary, to ensure consistency with the requirements of ASC Topic 805. ASC Topic 810 states that noncontrolling interests should be classified as a separate component of equity, and establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. The new provisions of ASC Topic 810 are effective for financial statements issued for fiscal years beginning after December 15, 2008, which is the Company's fiscal 2010. Early adoption is prohibited and the new provisions will be applied prospectively except for the presentation and disclosure requirements, which will be applied retrospectively for all periods presented. The Company does not expect the new provisions of ASC Topic 810 to have a material impact on the Company's consolidated statement of operations and financial condition.

2. Correction of Immaterial Errors

During the third quarter of fiscal 2009, the Company discovered errors related to its accounting for acquisition-related earnout payments that were made in connection with the acquisition of a business in fiscal 2006. An error occurred as a result of a \$5 million earnout payment made by the Company to the seller of the business it acquired, which then was subsequently re-distributed by the seller to certain continuing employees of the acquired business. This payment was initially accounted for as additional purchase price and included in goodwill. In the third quarter of fiscal 2009, the Company determined that the \$5 million had not been distributed by the seller in accordance with its initial ownership percentage interests and that this amount should be re-characterized as compensation expense and

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

should be charged to income over the period the earnout payment was earned pursuant to the terms of the acquisition agreement. The \$5 million earnout payment was earned over the two-year period beginning in May 2006 or the eight consecutive quarters beginning in the third quarter of fiscal 2006. The \$5 million was paid to the seller in July 2007, as agreed to in the purchase agreement with the seller, however, the retention of the \$5 million by the seller was based on the financial performance of the acquired business over the two-year period beginning in May 2006. Accordingly, the \$5 million should have been charged to compensation expense over that two-year period on a level basis. Furthermore, in May 2009, a payment of \$10.3 million was placed in escrow as a progress payment related to a possible future earnout amount that the seller of the acquired business referenced above could earn. The \$10.3 million progress payment was calculated and paid into an escrow account pursuant to the terms of the purchase agreement. At the time it was calculated, the \$10.3 million was recorded as goodwill but should have been recorded as an “other asset” in the accompanying condensed consolidated balance sheets. This amount was not earned by the seller, as the performance targets that need to be achieved are not expected to be met, and the Company expects the entire \$10.3 million placed in escrow to be returned to the Company.

The Company assessed the materiality of these errors in accordance with SEC Staff Accounting Bulletin No. 108, “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,” and determined that the errors were immaterial to the previously reported amounts contained in its periodic reports and the Company will correct the errors through subsequent periodic filings. The immaterial corrections have no effect on fiscal 2009 results of operations, cash, or cash flows from operations. The effect of recording these immaterial corrections in the consolidated statements of income for fiscal 2008 and fiscal 2007 is included in the accompanying financial statements as follows:

<u>(in thousands, except per share data)</u>	For the Year Ended November 29, 2008		For the Year Ended November 24, 2007	
	As Reported	As Revised	As Reported	As Revised
Costs of services	\$250,109	\$251,263	\$246,014	\$248,514
Gross profit	126,642	125,488	148,631	146,131
Income from operations	21,146	19,992	48,770	46,270
Provision for income taxes	(14,236)	(13,761)	(19,697)	(18,667)
Net income	\$ 8,704	\$ 8,025	\$ 32,602	\$ 31,132
Net income per share:				
Basic	\$ 0.82	\$ 0.76	\$ 2.91	\$ 2.77
Diluted	\$ 0.80	\$ 0.74	\$ 2.68	\$ 2.56

The effect of recording these immaterial corrections in the consolidated balance sheet at November 29, 2008 is included in the following table (in thousands):

	As Reported	As Revised
Goodwill	\$154,029	\$138,772
Other assets	11,743	22,000
Deferred income taxes, net of current portion	3,453	1,391
Retained earnings	158,341	155,403
Total equity	\$237,340	\$234,402

3. Business Acquisition

On June 9, 2009, the Company acquired substantially all of the assets of Marakon Associates, a leading strategy consulting firm known for pioneering value-based management. Under the terms of the

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

transaction, CRA acquired substantially all of the assets of Marakon Associates, including certain intangible assets, accounts receivable, and all client projects currently underway. As a result of this acquisition, CRA added 48 employee consultants, who are based in CRA's London, Chicago, and New York offices. The acquisition was not material. The acquisition has been accounted for under the purchase method of accounting, and the results of operations have been included in the accompanying statements of income from the date of acquisition. The allocation of the purchase price for the acquisition will be finalized as CRA receives other information relevant to the acquisition and completes its analysis of other transaction-related costs.

4. Goodwill and Intangible Assets

The changes in the carrying amount of goodwill for fiscal 2009 and fiscal 2008 are as follows (in thousands):

Balance at November 24, 2007	\$147,216
Goodwill acquired from consolidation of NeuCo	4,467
Goodwill adjustments related to acquisitions completed in fiscal 2005 and fiscal 2004 and Australia divestiture	753
Effect of foreign currency translation	<u>(13,664)</u>
Balance at November 29, 2008	\$138,772
Goodwill adjustments related to acquisitions completed in fiscal 2009 and fiscal 2005	2,235
Goodwill adjustments related to NeuCo	(1,071)
Effect of foreign currency translation and other adjustments	<u>2,028</u>
Balance at November 28, 2009	<u>\$141,964</u>

On March 24, 2008, the Company sold the majority of its Australian-based operations. The amount of goodwill allocated to the sale was approximately \$0.7 million, which along with certain business assets and certain liabilities associated with the Company's Australian competition practice was sold for approximately \$1.9 million and a loss of \$0.5 million was realized. The Company also assessed its intangible assets in Australia for impairment and recorded expenses of \$0.9 million for the write-off of intangible assets in selling, general and administrative expenses in the consolidated statement of income during fiscal 2008.

The net amount of goodwill as of November 28, 2009, includes the following amounts (in thousands):

Goodwill attributable to the acquisition of Marakon	\$ 1,075
Goodwill attributable to NeuCo	3,396
Goodwill attributable to acquisitions that occurred prior to fiscal 2007	<u>137,493</u>
Goodwill balance at November 28, 2009	<u>\$141,964</u>

Intangible assets that are separable from goodwill and have determinable useful lives are valued separately and amortized over their expected useful lives.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The components of acquired identifiable intangible assets are as follows (in thousands):

	November 28, 2009	November 29, 2008
Non-competition agreements, net of accumulated amortization of \$1,929 and \$2,954, respectively	\$2,421	\$2,373
Customer relationships, net of accumulated amortization of \$1,424 and \$1,832, respectively	1,904	2,173
Trademarks, net of accumulated amortization of \$948 and \$1,081, respectively	427	272
Developed technology, net of accumulated amortization of \$490 and \$251, respectively	1,328	1,524
Other intangible assets, net of accumulated amortization of \$414 and \$1,216, respectively	82	30
	\$6,162	\$6,372

The decrease in intangible assets from fiscal 2008 to fiscal 2009 was due to amortization partially offset by an increase of \$1.0 million due to the intangibles acquired from Marakon.

Amortization expense of intangible assets was \$1.4 million, \$2.4 million, and \$1.6 million in fiscal 2009, fiscal 2008, and fiscal 2007, respectively. Amortization expense of intangible assets held at November 28, 2009, for the next five fiscal years is expected to be as follows (in thousands):

Fiscal Year	Amortization Expense
2010	\$1,170
2011	1,011
2012	933
2013	933
2014	842
	\$4,889

5. Property and Equipment

Property and equipment consist of the following:

	November 28, 2009	November 29, 2008
	(In thousands)	
Computer and office equipment and software	\$16,596	\$18,980
Leasehold improvements	27,115	27,338
Furniture	10,001	10,344
	53,712	56,662
Accumulated depreciation and amortization	34,662	32,947
	\$19,050	\$23,715

Depreciation expense, including amounts recorded in costs of services, was \$7.4 million in fiscal 2009, \$10.7 million in fiscal 2008, and \$8.6 million in fiscal 2007.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. Accrued Expenses

Accrued expenses consist of the following:

	November 28, 2009	November 29, 2008
	(In thousands)	
Compensation and related expenses	\$47,010	\$64,806
Payable to former shareholders	885	11,180
Income taxes payable	1,254	912
Accrued interest	859	1,106
Other	6,943	6,555
	\$56,951	\$84,559

7. Asset Retirement Obligations

CRA records asset retirement obligations for which the liability's fair value can be reasonably estimated. CRA recognizes asset retirement obligations related to lease restoration obligations if required by a lease agreement. The asset retirement obligations consist primarily of the costs associated with restoring leased space to the condition it was in prior to CRA's occupancy or to pay the landlord for the cost to do so.

The changes in the carrying amount of asset retirement obligations for fiscal 2009 are as follows (in thousands):

Balance at November 29, 2008	\$806
Accretion	35
Effect of foreign currency translation	40
Balance at November 28, 2009	\$881

Asset retirement obligations are recorded within "accrued expenses" and "deferred rent and other non-current liabilities" on the balance sheet.

8. Private Placement of Convertible Debt and Other Financing

Private Placement of Convertible Debt. In 2004, CRA completed a private placement of \$90.0 million of 2.875% convertible senior debentures due 2034. If the last reported sale price of CRA's common stock is greater than or equal to 125% of the conversion price for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter, holders of the debentures may convert them. In addition, there are additional circumstances under which holders of the debentures may convert, which are outlined in the terms of the indenture governing the debentures.

During fiscal 2008, the Company repurchased convertible debentures in the principal amount of approximately \$10.2 million, on the open market, for approximately \$9.2 million, resulting in a \$1.0 million gain on a pre-tax basis. During fiscal 2009, the Company repurchased convertible debentures in the principal amount of approximately \$17.3 million on the open market, for approximately \$16.7 million, resulting in a \$0.6 million gain on a pre-tax basis. As of November 28, 2009 the principal amount of the convertible debentures totaled \$62.5 million.

As a result of its election on December 14, 2004, CRA must settle the conversion of the debentures, as follows: (i) \$1,000 in cash per \$1,000 principal amount of debentures converted; and

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(ii) in cash or shares of CRA common stock (at CRA's further election, except for cash in lieu of fractional shares), any conversion obligation that exceeds the principal amount of the debentures converted.

The market price conversion trigger was not met during the fourth quarter of fiscal 2009 or the first quarter of fiscal 2010. Therefore, holders of the debentures are not able to exercise their right to convert the bonds during the first or second quarters of fiscal 2010. This test is repeated each fiscal quarter. To date, no conversions have occurred.

The Company has a \$60.0 million revolving line of credit to mitigate the potential liquidity risk, and to provide funding if required, in the event of conversion by the debenture holders. The amounts available under the bank revolving line of credit are constrained by various financial covenants and reduced by certain letters of credit outstanding. CRA believes that in the event the contingent conversion trigger price is met, it is unlikely that a significant percentage of bondholders will exercise their right to convert because the debentures have traded at a premium over their conversion value. Since holders of the debentures are not able to exercise their right to convert the bonds as of November 28, 2009, CRA has classified the remaining \$62.5 million convertible debt as long-term debt as of November 28, 2009 in the accompanying consolidated balance sheet. In addition, the line of credit gives CRA additional flexibility to meet any unforeseen financial requirements.

The debentures are CRA's direct, unsecured senior subordinated obligations and rank junior in right of payment to its existing bank line of credit and any future secured indebtedness that CRA may designate as senior indebtedness. Interest of approximately \$0.9 million, is payable semi-annually on June 15 and December 15. CRA will also be required to pay contingent interest on the applicable interest payment date to the holders of the debentures for the period commencing June 20, 2011, and ending December 14, 2011, if the average trading price of the debentures for each of the last five trading days immediately preceding June 20, 2011, equals 125% or more of the principal amount of the debentures. Thereafter, CRA will pay contingent interest on the interest payment date for a six-month interest period if the average trading price of the debentures during the five trading day period immediately preceding the first day of the applicable six-month interest period equals or exceeds 125% of the principal amount of the debentures. The contingent interest payable per debenture will equal 0.25% of the average trading price of such debenture during the applicable five trading day reference period.

CRA may elect to redeem all or any portion of the debentures on or after June 20, 2011, at a repurchase price equal to 100% of the principal amount of the debentures, plus accrued and unpaid interest. CRA may be required to repurchase all or any portion of the debentures, at the option of each holder, on June 15, 2011, June 15, 2014, June 15, 2019, June 15, 2024, and June 15, 2029, or upon certain specified fundamental changes, at a price equal to 100% of the principal amount of the debentures, plus accrued and unpaid interest. Upon a fundamental change involving a change of control of CRA, the Company may also be required to pay a make-whole premium, which in some cases could be substantial and which may be paid in cash, shares of common stock, or a combination thereof, to the holders of debentures who elect to require CRA to repurchase or convert debentures.

The debt issuance costs have been capitalized and are amortized as a component of interest expense on a straight-line basis over seven years, through 2011, which is the first year in which CRA may be required to repurchase all or any portion of the debentures. These debt issuance costs totaling \$0.5 million, net of accumulated amortization, are included in other assets in the consolidated balance sheet as of November 28, 2009.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The contingent interest feature included in the debenture represents an embedded derivative that must be recorded at fair value. The Company has determined that the fair value of the contingent interest feature is *de minimis* as of November 28, 2009, based upon economic, market and other conditions in effect as of this date. There are no other embedded derivatives associated with the Company's convertible debentures.

The Company has agreed with the debenture holders to reserve the maximum number of shares of common stock that may be issued upon conversion of the debentures.

Borrowings under the Revolving Line of Credit. CRA has a senior loan agreement with RBS Citizens, N.A. Subject to the terms of the agreement, CRA may use borrowings under this line of credit for acquisition financing, working capital, general corporate purposes, letters of credit, and foreign exchanges contracts. In addition, funds available under the facility will allow CRA to continue to classify its convertible debentures as long-term debt, rather than short-term, and will give CRA additional flexibility to meet any unforeseen financial requirements. The available line of credit is reduced, as necessary, to account for certain letters of credit outstanding and may be limited if the Company violates the covenants. As of November 28, 2009, there were no amounts outstanding under this line of credit and \$5.0 million in letters of credit were outstanding, which reduces the line of credit available. The letters of credit support minimum future lease payments under leases for office space and bonds required per the terms of certain project proposals and contracts.

On August 18, 2009, the Company amended its loan agreement dated as of January 14, 2004 with RBS Citizens, N.A. The amendment reduced the revolving line of credit from \$90.0 million to \$60.0 million, extended the termination date of the loan agreement from April 30, 2010 to April 30, 2012, and raised the commitment fee payable on the unused portion of the credit facility from 0.165% to 0.25%. In addition, under the amended credit facility, interest on borrowings is based upon LIBOR, instead of LIBOR or the prime rate at CRA's option, and is calculated using a margin over LIBOR ranging from 2.0% to 3.5%, an increase from the prior range of 0.75% to 1.5%. Borrowings under the credit facility are secured by 100% of the stock of certain of CRA's U.S. subsidiaries and 65% of the stock of CRA's foreign subsidiaries, which represents approximately \$73.3 million in net assets as of November 28, 2009.

As of November 28, 2009, the Company was in compliance with the covenants under the senior loan agreement.

9. Employee Benefit Plans

The Company maintains qualified defined-contribution plans under Section 401(k) of the Internal Revenue Code, covering substantially all U.S. employees who meet specified age and service requirements. Company contributions are made at the discretion of the Company, and cannot exceed the maximum amount deductible under applicable provisions of the Internal Revenue Code. Company contributions under these plans amounted to approximately \$2.2 million for fiscal 2009, \$2.7 million for fiscal 2008, and \$2.4 million for fiscal 2007.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. Leases

At November 28, 2009, the Company had the following minimum rental commitments for office space and equipment leases, all of which are under non-cancelable operating leases (in thousands):

<u>Fiscal Year</u>	<u>Rental Commitments</u>
2010	\$20,114
2011	16,845
2012	15,893
2013	15,585
2014	15,025
Thereafter	13,442
	<u>\$96,904</u>
Future minimum rentals under sublease arrangements	<u>(5,841)</u>
	<u><u>\$91,063</u></u>

Certain office leases contain renewal options which the Company may exercise at its discretion, which were not included in the amounts above. Rent expense was approximately \$21.5 million for fiscal 2009, \$23.4 million in fiscal 2008, and \$19.3 million in fiscal 2007.

The Company is party to standby letters of credit with its bank in support of the minimum future lease payments under leases for office space amounting to \$0.5 million as of November 28, 2009.

11. Net Income Per Share

Basic net income per share represents net income divided by the weighted average shares of common stock outstanding during the period. Diluted net income per share represents net income divided by the weighted average shares of common stock and common stock equivalents outstanding during the period. Common stock equivalents arise from stock options, unvested restricted shares, and shares underlying CRA's debentures using the treasury stock method. Under the treasury stock method, the amount the Company will receive for the stock awards, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of tax benefits that would be recorded in common stock when the award becomes deductible are assumed to be used to repurchase shares at the average share price for each fiscal period. A reconciliation of basic to diluted weighted average shares of common stock outstanding is as follows (in thousands):

	<u>Fiscal Year</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Basic weighted average shares outstanding	10,608	10,610	11,220
Common stock equivalents:			
Stock options and restricted stock	110	237	459
Shares underlying the debentures	—	57	470
Diluted weighted average shares outstanding	<u>10,718</u>	<u>10,904</u>	<u>12,149</u>

The primary reason for the decrease in basic weighted average shares outstanding for the fifty-three weeks ended November 29, 2008 is the weighted average impact of the repurchase of 370,265 shares by CRA during fiscal 2008.

Since CRA is obligated to settle the par value of the convertible debentures in cash, the Company is not required to include any shares underlying the convertible debentures in its diluted weighted

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

average shares outstanding until the average stock price per share for the quarter exceeds the \$40 conversion price and only to the extent of the additional shares CRA may be required to issue in the event CRA's conversion obligation exceeds the principal amount of the debentures converted. At such time, only the number of shares that would be issuable (under the "treasury" method of accounting for share dilution) are included, which is based upon the amount by which the average stock price exceeds the conversion price. Based on 1,563,250 shares underlying the convertible debentures as of November 28, 2009, for the first \$1 per share that CRA's average stock price exceeds the \$40 conversion price of the debentures, CRA will include approximately 38,000 additional shares in CRA's diluted share count. For the second \$1 per share that CRA's average stock price exceeds the \$40 conversion price, CRA will include approximately 37,000 additional shares, for a total of approximately 74,000 shares, in CRA's diluted share count, and so on, with the additional shares' dilution falling for each \$1 per share that CRA's average stock price exceeds \$40 if the stock price rises further above \$40 (see table below).

"TREASURY" METHOD OF ACCOUNTING FOR SHARE DILUTION

Conversion Price: **\$40**
Number of Underlying Shares: **1,563,250**

Formula: Number of extra dilutive shares created
 = ((Stock Price – Conversion Price) * Underlying Shares)/
 Stock Price

Condition: Only applies when share price exceeds \$40

<u>Stock Price</u>	<u>Conversion Price</u>	<u>Price Difference</u>	<u>Include in Share Count</u>	<u>Per \$1 Share Dilution</u>
\$40.	\$40.	\$ 0.	—	—
\$41.	\$40.	\$ 1.	38,128	38,128
\$42.	\$40.	\$ 2.	74,440	37,220
\$45.	\$40.	\$ 5.	173,694	34,739
\$50.	\$40.	\$10.	312,650	31,265
\$55.	\$40.	\$15.	426,341	28,423
\$60.	\$40.	\$20.	521,083	26,054
\$65.	\$40.	\$25.	601,250	24,050
\$70.	\$40.	\$30.	669,964	22,332

The number of shares underlying the debentures for fiscal 2007 and the twelve weeks ended February 15, 2008 were based on 2,250,000 shares underlying the convertible debentures. The average stock price for fiscal year ending November 28, 2009 was \$25 per share. For the fiscal year ending November 28, 2009, there were no diluted weighted average shares outstanding for the underlying debentures because the average stock price was below \$40 for each fiscal quarter of fiscal 2009. The average stock price for the fiscal year ending November 29, 2008 was \$36 per share. Included in the diluted weighted average shares outstanding for the fiscal year ending November 29, 2008 were 57,000 shares underlying the debentures because the average stock price for the twelve weeks ended February 15, 2008 was \$45, while in the remaining quarters of fiscal 2008, the average stock price was below \$40. The average stock price for the fiscal year ending November 24, 2007 was approximately \$51 per share. Therefore, 470,000 shares underlying the debentures were included in the diluted weighted average shares outstanding for the fiscal year ending November 24, 2007.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the years ended November 28, 2009, November 29, 2008, and November 24, 2007, the anti-dilutive share-based awards were 977,954, 632,452, and 326,482, respectively.

12. Common Stock

Issuances of Common Stock in Connection with Business Acquisitions. The Company issued common stock in connection with the acquisitions completed in fiscal 2009, fiscal 2008, and fiscal 2007. The following is a summary of common stock issued in connection with business acquisitions including shares issued pursuant to earn-out arrangements:

<u>Issuance</u>	Fiscal Year		
	2009	2008	2007
	(in thousands, except per share data)		
Shares	11,201	15,046	12,688
Amount	\$ 280	\$ 542	\$ 618

The restricted shares issued in connection with all of these acquisitions are fully vested and held in escrow until the sales restrictions placed on them have lapsed.

Share-Based Compensation. Approximately \$6.5 million, \$6.3 million, and \$5.5 million of share-based compensation expense was recorded in fiscal 2009, fiscal 2008, and fiscal 2007, respectively, as an increase to common stock for share-based payment awards made to the Company's employees and directors, based on the estimated grant date fair values of stock options and restricted stock awards vesting during the period.

CRA also recorded \$0.2 million, \$0.4 million, and \$72,000 for fiscal 2009, fiscal 2008, and fiscal 2007, respectively, in stock compensation expense for options granted to non-employee experts.

Restricted Share Vesting. In fiscal 2009, fiscal 2008 and fiscal 2007, 107,794, 55,435 and 29,321 restricted shares vested, respectively. CRA redeemed 33,091, 8,520 and 8,087 of the restricted shares that vested from the holders in order to pay \$0.8 million, \$0.7 million, and \$0.4 million of employee minimum tax withholdings.

Common Stock Repurchases and Retirements. In July 2006 and June 2007, the Company announced that its Board of Directors authorized a multi-year stock repurchase program of up to a total of 500,000 and 1,500,000 shares of its common stock, respectively. During fiscal 2008 and fiscal 2007, the Company repurchased 369,047 and 1,172,286 shares of its common stock under the stock repurchase programs at an aggregate price of approximately \$11.8 million and \$56.7 million, respectively. In addition, during fiscal 2009, fiscal 2008, and fiscal 2007, the Company repurchased 4,087, 1,218, and 14,899 shares of its common stock from non-employee experts or employees, respectively, based on the contractual right of first purchase contained in the shareholders' stock purchase agreement with the Company.

Exercise of Stock Options. During fiscal 2009, 5,000 options were exercised for \$0.1 million of proceeds. During fiscal 2008, 96,794 options were exercised for \$2.2 million of proceeds. During fiscal 2007, 455,123 options were exercised for \$11.7 million of proceeds.

Tax Benefit (Deficit) on Stock Option Exercises and Restricted Share Vesting. The Company recorded a tax deficit on stock options exercises and restricted share vestings of \$0.6 million as a decrease to its common stock in fiscal 2009. The Company recorded a tax benefit on stock option exercises and restricted share vestings of \$0.2 million and \$3.4 million as an increase to common stock in fiscal 2008 and fiscal 2007, respectively.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. Share-Based Compensation

CRA utilizes the straight-line attribution method for recognizing share-based compensation expense. CRA recorded \$6.6 million, \$6.3 million, and \$5.5 million of compensation expense in fiscal 2009, fiscal 2008, and fiscal 2007, respectively, for share-based payment awards consisting of stock options and restricted stock awards issued based on the estimated grant date fair values. Compensation expense, net of tax, was \$3.9 million, \$4.0 million, and \$3.6 million in fiscal 2009, fiscal 2008, and fiscal 2007, respectively, for share-based payment awards made to the Company's employees and directors consisting of stock options and restricted stock awards issued based on the estimated fair values. In addition, the Company recorded \$0.2 million, \$0.4 million, and \$72,000 of share-based compensation expense in fiscal 2009, fiscal 2008, and fiscal 2007, respectively, for share-based payment awards consisting of stock options and restricted share awards issued to non-employees.

The weighted average fair market value using the Black-Scholes option-pricing model of the options granted was \$7.78, \$13.30, and \$16.90 for fiscal 2009, fiscal 2008, and fiscal 2007, respectively. The fair market value of the stock options at the date of grant was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions:

	Fiscal Year		
	2009	2008	2007
Risk-free interest rate	2.1%	2.9%	4.7%
Expected volatility	48%	45%	34%
Weighted average expected life (in years)	4.50	4.00	4.00
Expected dividends	—	—	—

The risk-free interest rate is based on U.S. Treasury interest rates whose term is consistent with the expected life of the stock options. Expected volatility and expected life are based on the Company's historical experience. Expected dividend yield was not considered in the option pricing formula since CRA does not pay dividends and has no current plans to do so in the future. The forfeiture rate used was based upon historical experience. CRA may adjust the estimated forfeiture rate based upon actual experience.

CRA maintains share-based compensation plans that use restricted stock, stock options and an employee stock purchase plan to provide incentives to its directors, employees and independent contractors. CRA's Amended and Restated 2006 Equity Incentive Plan (the "2006 Incentive Plan") authorizes the grant of a variety of incentive and performance awards to its directors, employees and independent contractors, including incentive stock options, nonqualified stock options, restricted stock awards, restricted stock unit awards, performance awards and other share-based awards. A maximum of 1,368,333 shares of common stock are issuable under the 2006 Incentive Plan, which includes 658,333 shares that remained available for future awards under the Company's 1998 Incentive and Nonqualified Stock Option Plan (the "1998 Plan") as of April 21, 2006. This amount may be increased by up to 341,667 shares to the extent that any stock options that have been issued under the 1998 Plan are forfeited or terminated after April 21, 2006. The "fungibility ratio," the rate at which each share of CRA's common stock that is underlying any award other than a stock option counts against the maximum number of shares issuable under the 2006 Incentive Plan, increased from 1.8 to 2.2 during fiscal 2008. As a result, the grant of restricted share and unit awards through March 12, 2008 counted as the grant of 1.8 shares of common stock available under the plan for each share of common stock subject to the award and the grant of restricted share and unit awards on or after March 12, 2008 counts as the grant of 2.2 shares of common stock available under the plan for each share of common stock subject to the award.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During fiscal 2009, the Company implemented a long-term incentive program (“LTIP”) for certain key employees. Under this program, participants are eligible for stock options, restricted stock units, and performance based restricted stock units. The program is designed to reward key employees and provide participants the opportunity to share in the long-term growth of the Company. During fiscal 2009, the Company made an initial grant of options, restricted stock units, and performance based restricted stock units under this program. The awards were granted under the 2006 Incentive Plan and are included in the discussion below.

The following is a rollforward of the maximum number of shares issuable under the 2006 Incentive Plan as of November 28, 2009:

	Actual Shares	Shares Using Fungibility Ratio
Maximum shares of common stock issuable under the 2006 Incentive Plan		1,368,333
Restricted shares or units granted/reserved through March 12, 2008 .	471,827	(849,289)
Restricted shares or units granted/reserved on or after March 12, 2008	276,904	(609,189)
Cancellation of restricted shares or units through March 12, 2008 . . .	71,893	129,407
Cancellation of restricted shares or units on or after March 12, 2008 .	1,469	3,232
Options granted		(231,318)
Options cancelled		356,227
Options forfeited		10,000
Shares available for grant under the 2006 Incentive Plan		177,403

Under the 1998 Plan, 3,839,216 options to purchase shares have been granted. With the adoption of the 2006 Incentive Plan, no new options will be granted under the 1998 Plan. Under the terms of the 1998 Plan, options have been granted at an exercise price equal to the fair market value of the shares of common stock at the date of grant. Vesting terms were determined at the discretion of the Board of Directors and generally range from immediate vesting to vesting at various rates up to five years. In general, options terminate 10 years after the date of grant.

In addition, under the Company’s 2004 Nonqualified Inducement Stock Option Plan, options to purchase 359,420 shares have been granted. With the adoption of the 2006 Incentive Plan, no new options will be granted under the 2004 Nonqualified Inducement Stock Option Plan.

On May 18, 2009, the Company adopted the 2009 Nonqualified Inducement Stock Option Plan. There are 250,000 shares available for issuance pursuant to stock option grants under the 2009 Nonqualified Inducement Stock Option Plan. During fiscal 2009, options to purchase 200,000 shares were granted. Each option vests over four years, has a term of seven years, and an exercise price equal to \$50.00 per share. There are an additional 50,000 options available for grant under this plan.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

A summary of option activity from all plans is as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at November 29, 2008	1,036,257	\$33.44		
Fiscal 2009:				
Granted	306,421	41.01		
Exercised	(5,000)	22.50		
Forfeited	(43,495)	34.64		
Outstanding at November 28, 2009	<u>1,294,183</u>	35.23	4.82	\$1,986
Options exercisable at November 28, 2009	<u>963,262</u>	\$33.14	4.22	\$1,971

The aggregate intrinsic value of stock options exercised was approximately \$26,000, \$1.5 million, and \$11.0 million, for fiscal 2009, fiscal 2008, and fiscal 2007, respectively. The following table summarizes options outstanding and options exercisable as of November 28, 2009:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding at November 28, 2009	Weighted-Average Remaining Contractual Life (years)	Weighted-Average Exercise Price	Number Exercisable at November 28, 2009	Weighted-Average Exercise Price
\$ 8.88 - 22.81	269,613	2.49	\$16.94	269,613	\$16.94
\$24.11 - 32.09	205,159	5.71	\$27.51	98,738	\$31.18
\$32.26 - 32.26	235,597	4.45	\$32.26	235,597	\$32.26
\$34.02 - 48.85	167,250	5.36	\$40.45	150,625	\$40.29
\$50.00 - 50.00	200,000	6.58	\$50.00	—	—
\$50.01 - 53.72	216,564	5.25	\$50.88	208,689	\$50.83
Total	<u>1,294,183</u>	<u>4.82</u>	<u>\$35.23</u>	<u>963,262</u>	<u>\$33.14</u>

The following table summarizes the status of CRA's non-vested options since November 29, 2008:

	Non-vested Options	
	Number of Shares	Weighted-Average Fair Value
Non-vested at November 29, 2008	108,315	\$14.70
Granted	306,421	7.78
Vested	(75,190)	15.15
Forfeited	(8,625)	15.91
Non-vested at November 28, 2009	<u>330,921</u>	<u>\$ 8.30</u>

The total fair value of options vested was \$1.1 million, \$3.6 million, and \$3.4 million at November 28, 2009, November 29, 2008, and November 24, 2007, respectively. As of November 28, 2009, there was \$2.4 million of total unrecognized compensation cost related to non-vested stock options granted. That cost is expected to be recognized over a weighted-average period of 3.5 years.

CRA grants restricted stock awards, which are subject to the execution of a restricted stock agreement. Generally, these shares will vest in four equal annual installments beginning on the first

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

anniversary of the date of grant. Total unrecognized compensation cost related to restricted stock was \$11.4 million, which is expected to be recognized over a weighted-average period of 2.3 years.

The following table summarizes the status of CRA's non-vested restricted stock awards and units since November 29, 2008:

	Non-vested Restricted Stock and Units	
	Number of Shares	Weighted-Average Fair Value
Non-vested at November 29, 2008	384,429	\$42.37
Granted	132,857	22.38
Vested	(107,865)	45.35
Forfeited	(8,658)	41.24
Non-vested at November 28, 2009	400,763	\$35.20

All of the restricted shares the Company has granted in fiscal 2009 contain a right of first refusal provision, which gives CRA the right to repurchase, at a recent closing price, any shares that the stockholder wishes to sell. As of November 28, 2009, there were 24,977 vested shares outstanding that include the right of first refusal provision.

Performance share awards are valued at the fair value of CRA stock as of the grant date and expense is recognized based on the number of shares expected to vest under the terms of the award under which they are granted. As of November 28, 2009, approximately 73,000 performance based awards were earned upon the achievement of certain financial performance goals for fiscal 2009 and will be distributed in fiscal 2010. In addition, up to approximately 71,000 shares will become payable only upon achievement of certain financial performance goals, including revenue and profits, for a measurement period falling within the fourth quarter of fiscal 2009 through the third quarter of fiscal 2013. The Company is obligated to pay the cash value of up to an additional approximately 71,000 shares if the performance during that period exceeds the Company's current expectations and the Company does not obtain shareholder approval for these additional shares. The Company also has outstanding commitments to make additional equity grants to certain employees of up to an aggregate of approximately 21,000 shares if performance factors contained in their offer letters are met.

The Company has adopted the 1998 Employee Stock Purchase Plan. The Stock Purchase Plan authorizes the issuance of up to an aggregate of 243,000 shares of common stock to participating employees at a purchase price equal to 85% of fair market value on either the first or the last day of the one-year offering period under the Stock Purchase Plan. In fiscal 2009, fiscal 2008, and fiscal 2007, there were no offering periods under the Stock Purchase Plan and no shares were issued.

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Business Segment and Geographic Information

CRA operates in one business segment, which is consulting services. Revenue and long-lived assets by country, based on the physical location of the operation to which the revenues or the assets relate, are as follows (in thousands):

	<u>Fiscal Year</u>		
	<u>2009</u> <u>(52 weeks)</u>	<u>2008</u> <u>(53 weeks)</u>	<u>2007</u> <u>(52 weeks)</u>

Other	3.3	3.3	1.6
	52.9%	62.2%	38.9%

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Components of the Company's deferred tax assets (liabilities) are as follows:

	November 28, 2009	November 29, 2008
	(In thousands)	
Deferred tax assets:		
Accrued compensation and related expense	\$ 9,719	\$14,218
Tax basis in excess of financial basis of net accounts receivable	1,958	3,884
Net operating loss carryforwards	5,789	6,331
Tax basis in excess of financial basis of fixed assets	3,419	2,578
Accrued expenses and other	2,961	—
Total gross deferred tax assets	23,846	27,011
Less: valuation allowance	(3,293)	(3,338)
Total deferred tax assets net of valuation allowance	20,553	23,673
Deferred tax liabilities:		
Financial basis in excess of tax basis of intangible assets	3,138	898
Tax basis in excess of financial basis of debentures	8,370	6,459
Financial basis in excess of tax basis of equity investment	527	527
Other	—	603
Total deferred tax liabilities	12,035	8,487
Net deferred tax asset	\$ 8,518	\$15,186

The net change in the total valuation allowance for the year ended November 28, 2009 was a decrease of approximately \$45,000. This net change was primarily a result of a reduction in the valuation allowances recorded against net operating loss carryforwards utilized which were not previously benefited, net of additional valuation allowances against certain foreign operating losses and foreign tax credits. The net change in the total valuation allowance for the year ended November 29, 2008 was an increase of approximately \$1.8 million. This net change was primarily a result of an increase in the valuation allowances recorded against foreign operating losses.

A valuation allowance was recorded because management currently believes that after considering the available evidence that it is more likely than not that these assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods and in the tax jurisdictions in which those temporary differences become deductible.

At November 28, 2009, the Company has net operating loss carryforwards for federal and foreign tax purposes of \$7.2 million and \$11.1 million, respectively. The federal net operating losses include \$5.9 million that was generated in fiscal 2009 and will begin to expire in 2029. The federal net operating losses include \$1.3 million of losses incurred by an entity prior to its acquisition by CRA in fiscal 2004. These federal net operating losses are subject to an annual limitation of approximately \$3.4 million as a result of Internal Revenue Code Section 382 and will begin to expire in 2017. The foreign operating losses also include approximately \$2.4 million of pre-acquisition losses incurred by an entity acquired by CRA in fiscal 2005 and have an indefinite expiration period. The remaining \$8.7 million were incurred in other jurisdictions and have an indefinite life, except for \$0.6 million which will begin to expire in 2016.

At November 28, 2009, the Company has foreign tax credit carryforwards of approximately \$0.8 million which expire in 2018.

ASC Topic 740-10 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement attribute for

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC Topic 740-10 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Balance as of November 24, 2007	\$ 1,107
Additions (reductions) for tax positions taken during prior years	33
Additions for tax positions taken during the current year	—
Settlements	(1,085)
Expiration of statutes of limitations	—
Balance as of November 29, 2008	<u>\$ 55</u>

During fiscal 2009, there were no material changes to the liability for uncertain tax positions. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is approximately \$55,000. The Company reports accrued interest and penalties related to unrecognized tax benefits in income tax expense. As of November 28, 2009, the Company's accrual for tax-related interest and penalties was not material. The Company reasonably expects reductions in the liability for unrecognized tax benefits of approximately \$55,000 within the next twelve months because the statute of limitations is expected to expire.

The Company files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. A number of years may elapse before an uncertain tax position, for which the Company has unrecognized tax benefits, is audited and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, the Company believes that its unrecognized tax benefits reflect the most likely outcome. The Company adjusts these unrecognized tax benefits, as well as the related interest, in light of changing facts and circumstances. Settlement of any particular position could require the use of cash. Favorable resolution would be recognized as a reduction to the effective income tax rate in the period of resolution.

The number of years with open tax audits varies depending on the tax jurisdiction. The Company's major taxing jurisdiction is the United States. The Company is no longer subject to U.S. federal examinations by the Internal Revenue Service for years before fiscal 2006. The Company has recently been notified that the Internal Revenue Service plans to examine its fiscal 2007 U.S. federal tax return. The examination has not yet commenced and the outcome of this review cannot reasonably be predicted at this time. The HM Revenue and Customs has recently initiated a review of the UK subsidiary's fiscal 2006 and fiscal 2007 corporate tax returns. No adjustments have been proposed and the outcome of this review cannot reasonably be predicted at this time. The Company does not anticipate that any potential tax adjustments will have a significant impact on its financial position or results of operations.

The Company has not provided for deferred income taxes or foreign withholding taxes on undistributed earnings from its foreign subsidiaries of approximately \$9.6 million as of November 28, 2009 because such earnings are considered to be permanently reinvested. If the Company were to distribute its foreign earnings which are permanently reinvested, it would accrue additional tax expense of approximately \$2 million.

16. Related-Party Transactions

The Company made payments to shareholders of the Company who performed consulting services exclusively for the Company in the amounts of \$11.6 million in fiscal 2009, \$15.2 million in fiscal 2008,

CRA INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

and \$10.1 million in fiscal 2007. These payments to exclusive non-employee experts are for consulting services performed for CRA's clients in the ordinary course of business.

17. Commitments & Contingencies

In connection with an acquisition completed in fiscal 2009, CRA agreed to pay incentive performance awards to certain employees of the acquired business, if specific performance targets are met in fiscal 2010 through fiscal 2012. In addition, in connection with an acquisition completed during fiscal 2006, CRA agreed to pay additional consideration, contingent upon the achievement of specific performance targets. CRA believes that it will have sufficient funds to satisfy any obligations related to the incentive performance awards and contingent consideration. CRA expects to fund these payments, if any, from existing cash resources, cash generated from operations, or financing transactions.

18. Restructuring Charges

During fiscal 2009, the Company incurred pre-tax expenses of \$5.8 million associated principally with employee workforce reductions and office space reductions and moves designed to reduce its operating expenses and improve its utilization rate. The following is a summary of the restructuring charges incurred:

- The Company completed an employee workforce reduction, which was designed to better align its workforce with market demand. During fiscal 2009, the Company recorded \$3.4 million in employee separation costs, of which \$2.0 million is included in cost of sales and \$1.4 million is included in selling, general and administrative expenses.
- During fiscal 2009, the Company moved an office from Hamburg, Germany to Frankfurt, Germany and reduced office space in Pasadena, California, Boston, Massachusetts, and Houston, Texas. The Company recorded expense for the difference between its future minimum lease payments and related exit costs from the date of closure through the end of the remaining lease term, net of expected future sublease rental income. This estimated expense required management to make assumptions regarding the estimate of the duration of future vacancy periods, the amount and timing of future settlement payments, and the amount and timing of potential sublease rental income. These office reductions and moves resulted in charges of \$2.4 million during the fifty-two weeks ending November 28, 2009, of which \$1.6 million is included in selling, general and administrative expenses and \$0.8 million is included in depreciation and amortization.

The restructuring expenses and reserve balance are as follows as of November 28, 2009 (in thousands):

	<u>Divested Operations</u>	<u>Office Vacancies</u>	<u>Employee Workforce Reduction</u>	<u>Total Restructuring</u>
Balance at November 29, 2008	\$1,000	\$ 318	\$ 1,995	\$ 3,313
Charges during the fiscal year ending November 28, 2009 .	—	2,433	3,392	5,825
Amounts paid during the fiscal year ending				
November 28, 2009	(970)	(616)	(4,201)	(5,787)
Adjustments and effect of foreign currency translation				
during the fiscal year ending November 28, 2009	25	23	80	128
Balance at November 28, 2009	<u>\$ 55</u>	<u>\$2,158</u>	<u>\$ 1,266</u>	<u>\$ 3,479</u>

The \$3.5 million restructuring liability as of November 28, 2009 is expected to be paid during fiscal 2010 through the end of the third quarter of fiscal 2015.

CRA INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition, a foreign currency exchange loss of \$0.4 million was recorded during the fifty-two weeks ending November 28, 2009 related to the divestiture of the Company's Australian-based operations.

Basic	10,770	10,637	10,521	10,551
Diluted	11,401	10,637	10,764	10,681

The Company's fiscal year is typically based on 13 four-week billing cycles to clients and, consequently, CRA has established quarters that are divisible by four-week periods. As a result, the first, second, and fourth quarters of each fiscal year are generally 12-week periods, and the third quarter of each fiscal year is a 16-week period. However, the fourth quarter of fiscal 2008 was a 13-week period. Accordingly, period-to-period comparisons of CRA's results of operations are not necessarily meaningful if the periods being compared have different lengths.

The amounts for the twelve weeks ended February 15, 2008 and May 9, 2008 are revised based upon the Company's completion of an independent, voluntary review of its historical practices regarding its accounting for acquisition-related earnout payments. Further information related to this voluntary review can be found in Note 2 of the Notes to Consolidated Financial Statements.

CERTIFICATION

I, Paul A. Maleh, certify that:

1. I have reviewed this annual report on Form 10-K of CRA International, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to affect adversely the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. §1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report on Form 10-K of CRA International, Inc. (the "Company") for fiscal 2009, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned President and Chief Executive Officer and Executive Vice President, Treasurer, and Chief Financial Officer of the Company, certifies, to the best knowledge and belief of the signatory, pursuant to 18 U.S.C. §1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Stock Listing

NASDAQ Global Select Market Symbol: CRAI

Stock Price History by Quarter

Fiscal Year Ended November 28, 2009	High	Low
Nov. 30, 2008 — Feb. 20, 2009	\$29.52	\$20.43
Feb. 21, 2009 — May 15, 2009	\$24.16	\$16.77
May 16, 2009 — Sept. 4, 2009	\$31.47	\$22.28
Sept. 5, 2009 — Nov. 28, 2009	\$28.55	\$20.67

The preceding table sets forth the high and low sales prices as reported on the NASDAQ Global Select Market from November 30, 2008 to November 28, 2009. CRA had approximately 170 holders of record of our common stock as of January 28, 2010. This number does not include stockholders for whom shares were held in a "nominee" or "street" name. CRA has not paid cash dividends since its initial public offering and does not anticipate paying any cash dividends in the foreseeable future.
