MSA
The Safety Company

Received SEC

MAR 29 2010

Washington, DC 20549

OUR MISSION

That men and women may work in safety and that they, their families and their communities may live in health throughout the world.

OUR VISION

To be the leading innovator and provider of quality safety and instrument products and services that protect and improve people's health, safety and the environment.

To satisfy customer needs through the efforts of motivated, involved, highly trained employees dedicated to continuous improvement in quality, service, cost, value, technology and delivery.

ABOUT THE COVER

If MSA has a flagship product it would be the V-Gard® Protective Helmet.

As the market share leader in North America, the V-Gard Helmet is one of the most visible and recognizable symbols on industrial and construction work sites, oil platforms, refining plants and highway construction zones.

In 2009, MSA took steps to generate increased global market share and broaden the reach of the V-Gard brand by launching this unique "V-Design" line of protective helmets throughout Europe.

With its proven design recognized for its unique style, comfort, performance and innovation, the V-Gard Helmet has not only benefited from remarkable staying power in the market, but has an outstanding track record of saving lives.

No matter what the need, MSA remains committed to providing quality safety products wherever people need them most, striving to make the world safer, one person at a time.

BUSINESS OF MSA

MSA is in the business of developing, manufacturing and selling innovative products that enhance the safety and health of workers throughout the world. Critical to MSA's mission is a clear understanding of customer processes and safety needs. MSA dedicates significant resources to research which allows the company to develop a keen understanding of the customer safety requirements for a diverse range of markets, including the fire service, law enforcement, construction, public utilities, mining, chemical, petroleum, HVAC, hazardous materials remediation, military and retail. MSA's principal products, each designed to serve the needs of these target markets, include respiratory protective equipment, thermal imaging cameras, gas detection instruments, ballistic protection, as well as head, eye, face, hearing and fall protection products.

MSA was founded in 1914 by John T. Ryan and George H. Deike, two mining engineers who had firsthand knowledge of the terrible human loss that was occurring in underground coal mines. Their knowledge of the mining industry provided the foundation for the development of safety equipment to better protect underground miners. While the range of markets served by MSA has expanded greatly over the years, the founding philosophy of understanding customer safety needs and designing innovative safety equipment solutions remains unchanged.

MSA is headquartered in Pittsburgh, Pennsylvania, with operations employing 5,000 associates throughout the world. A publicly held company, MSA's stock is traded on the New York Stock Exchange under the symbol MSA.

- Europe
- Asia & Pacific Rim
- Africa
- South America
- Middle East & India

To our shareholders:

To be sure, 2009 was a year in which we took defensive measures, looking hard at our operations—from the way we manage our expenses, use our facilities and deploy our people, to the way we organize our operations and manage inventories.

Inside the museum of MSA's John T. Ryan Memorial Lab near Pittsburgh, MSA's early mine safety innovations provide a fitting backdrop for the FireHawk® M7 Responder Air Mask, shown above with President and CEO Bill Lambert. The M7 Responder, which Mr. Lambert named MSA's 2009 Product of the Year, is an ultra-versatile breathing apparatus designed for the U.S. Air Force and is representative of MSA's rich history of product leadership and innovation.

In this letter to you last year, I had the privilege to report a record year for MSA, with sales exceeding the \$1 billion level for the first time in our history. However, as I noted then, by late in 2008 we saw the economic storm clouds gathering and, as we all know far too well, this storm—"The Great Recession"—hit us all with its full force in early 2009.

For us at MSA, we saw companies in many of the industries we serve, such as construction, the energy sector and manufacturing, where our products help to keep men and women safe on the

job, lose business, lay off workers, and, of course, reduce their purchases of *everything*, including hard hats, gas detectors, fall protection equipment and other MSA products. In addition, we saw Congress inexplicably delay the Assistance to Firefighters Grants (AFG) funding earmarked for firehouses across America, in turn delaying first responders from upgrading their fire helmets, breathing apparatus and other protective gear.

Further, in our military segment, several significant contracts were successfully completed in late 2008, and several new ones were not gearing up to begin until 2010 and 2011.

As a result of these factors, 2009 for MSA was a year that fell noticeably short of the record high we attained in 2008, and one that took an obvious sidestep away from our previous trend of nine years of increasing revenues.

To be sure, 2009 was a year in which we took defensive measures, looking hard at our operations—from the way we manage our expenses, use our facilities and deploy our people, to the way we organize our operations and manage inventories. As this economic cycle makes its inevitable turn upward, as we are

The MSA V-Gard® Hard Hat remained a highly visible symbol of the MSA brand and its presence on work sites around the world in 2009. Left, Mario Lemieux, former hockey great and owner of the Pittsburgh Penguins hockey team, wears a custom-logoed V-Gard Hard Hat at the topping-off ceremony of Pittsburgh's new Consol Energy Center.

now just getting a hint of, we will be well positioned to move even faster down the road of continued success.

OUR MISSION NEVER ENDS

The challenges of 2009 notwithstanding, MSA stayed true to its mission of protecting life and earned significant orders and contracts in 2009, as total revenue exceeded \$900 million.

For example, we secured a two-year, \$45 million contract to supply Advanced Combat Helmets to the U.S. military, as well as a \$10 million order to supply our M7 Responder Air Masks to the U.S. Air Force. The Hong Kong Fire Department purchased 1,300 Self-Contained Breathing Apparatus (SCBA) and complementary products, placing more than \$5.6 million in business with us in the year. In fact, MSA sales in the Greater China Region grew by more than 36% in 2009, well above our most optimistic estimates. And there were green shoots of activity elsewhere in the world. Sales in Japan were up more than 20%, and in Latin America, our new MSA Colombia business exceeded their sales plan in their very first year of operation.

no doubt help us further increase market share in key market segments. We also implemented our European Hard Hat Strategy with the launch of our V-Gard family of hard hats in that region of the world, further expanding market share for what has become a recognizable and flagship brand of MSA.

You can see echoes of these successes in many other numbers as well. In 2009, MSA achieved new levels of customer satisfaction based on our Net Promoter Score (NPS)—a key internal metric we use to assess ongoing customer loyalty. Overall, our NPS metric increased to its highest level since we first began utilizing this tool in 2007. We also showed that “The Safety Company” practices what it preaches as we embarked on a process to establish a world-class global safety program in every MSA location around the world. And we are already seeing great results. For example, one MSA facility achieved an amazing 1.7 million hours without a lost time accident in 2009, while two other plants achieved more than one million hours each. In doing this, these facilities established benchmarks for all other MSA work sites to follow.

We articulated and codified our long-held values structure, with Integrity at its core, and rolled-out these values globally to all MSA associates. In short, these values form the basis for everything we do.

Similarly, there were a number of superstars in our product line-up in 2009, as there have been throughout our history. For example, our ALTAIR family of single and multigas detectors, which deliver a level of durability and features that no other competing product can match, such as an alarm which sounds when a wearer is motionless for 30 seconds, far exceeded all sales projections this year. And, our FireHawk M7 Responder Air Mask continued on its path of success. As noted earlier, the Air Force placed additional orders for this world-class product in 2009, and word also traveled to the U.S. Coast Guard. They did an independent evaluation and soon placed their own order for \$4.5 million of the M7 Responder Mask in 2009. Appropriately, I named the M7 Responder Air Mask our **Product of the Year** for 2009.

We also launched a number of innovative products that met strong customer acceptance in the year. Our next generation air-purifying half-mask, the Advantage 400 Respirator, was released with global approvals, and will

But there was one other metric in 2009 of which I was particularly proud: the level of engagement demonstrated by our MSA associates around the world. Without question 2009 was a year in which we asked much of our associates. Yet, despite the uncertainty of the economy during the year, the cost discipline measures we implemented, and the resulting personal sacrifices that our associates were asked to make, our Employee Engagement levels remained strong and, in some locations such as North America, increased. This re-affirmed what I have always known: that the spirit of commitment and the dedication of MSA associates around the world are second to none.

PREPARING TO MEET THE BEST YEARS TO COME

As I noted above, 2009 was a year in which we took a defensive posture, looked hard at the efficiency of our operations, and advanced changes that will serve us well in the years ahead. Some of our noteworthy accomplishments over the past year include:

- We reduced local currency Selling, General and Administrative expenses by \$32 million through restructuring efforts and various cost-saving initiatives.

MSA's new state-of-the-art manufacturing and R&D facility in Suzhou, China.

INCREASED CASH FLOW FROM OPERATING ACTIVITIES

- We took several steps to improve our working capital, developing new processes and key procedures. This resulted in generation of \$121 million in cash flow from operations, an all-time record for the company. We used this cash flow to pay down debt, fund improvement projects and pay dividends to shareholders. And, we plan to build upon these successes to better manage our working capital assets around the world going forward.
- We articulated and codified our long-held values structure, with *Integrity* at its core, and rolled out these values globally to all MSA associates. In short, these values form the basis for everything we do. You can read more about them in the pages that follow.
- We increased the efficiency of our R&D efforts, opening a state-of-the-art facility in Suzhou, China, while fueling the product innovation that has been the lifeblood of our company for 96 years. In 2009, this included adding new capabilities to our best-selling line of ALTAIR handheld gas detectors; developing a new line of gas detection sensors that raise the bar for sensor life and performance; developing a blueprint for the next generation Enhanced Combat Helmet for the U.S. military; and continuing our quest to engineer a never-before-seen system to quickly locate firefighters in need of rescue.
- We continued our Project Magellan operational excellence voyage in North America, by consolidating manufacturing activities to make optimal use of all our manufacturing space and eliminate excess capacity. Looking ahead, Project Magellan will continue to be an important part of the MSA story in 2010 as we will move forward with plans to consolidate our Corporate headquarters within our existing Cranberry Campus, terminate operations in Evans City, Pa., and exit our Englewood, Co. facility as we complete the transfer of fall protection production from Englewood to Jacksonville, N.C. and Querétaro, Mexico. Once completed, Project Magellan restructuring efforts will lower operating costs significantly and vastly improve our ability to communicate and work together as a team.
- We launched a new Distribution Development Program, increasing the effectiveness of our key channel partners and solidifying those relationships that are so important to our future. As evidence of the effectiveness of this effort, our

largest worldwide distributor rated MSA's level of field support Number One among 27 safety category manufacturers, with our rating a full five percentage points higher than the second place provider.

- Our global product developers applied Voice of the Customer "Best Practices" to our new product R&D efforts, and made more than 200 customer visits to uncover unmet needs, and build innovation and first-to-market features into new products.
- Our new brand positioning, "MSA—The Safety Company," was adopted globally by all affiliates, thereby strengthening the MSA brand and recognition of it in every market where we do business.
- And lastly, despite the need to adjust our workforce to counter the recession's impact on customer demand, we strategically made key hires that add depth and talent to our organization and will serve MSA well in the future.

A FOUNDATIONAL YEAR

I salute the successes our team achieved in 2009, and of our performance in the face of extremely difficult economic conditions. The past year presented challenges not seen in decades over our company's long history. Yet, in this crucible, mettle was formed. We emerge leaner and stronger, and positioned to shift from defense to offense as better times return. With signs of a gradual recovery emerging around us, MSA is making solid progress to make the coming years some of our best ever.

In closing, I want to thank all of my 5,000 MSA colleagues, including our Board of Directors and our Executive Leadership Team, for their especially tireless efforts in a challenging year. It is only through their skills and dedication that we were able to achieve so much. And, I want to thank our shareholders, distributors and customers around the world for your continued trust in us. We work hard to earn it, every day, and will continue to do so in 2010, as we have for nearly 100 years.

Sincerely,

William M. Lambert
President and Chief Executive Officer

Our Values:

Cor·po·rate Val·ues >

a series of standards that provide the identity by which a company is known, and define what is truly important to a company and its people. Executed successfully, they create dynamic, high-performing organizations.

At MSA, we are no stranger to values. They have been at the core of every MSA success story since our founding in 1914. Over these many years, our organization has changed—in size, geographic reach, product offerings and market focus—but what has remained constant has been our commitment to protecting the health and safety of our customers, and doing so in a manner that makes us proud to call ourselves MSA associates. We are, quite simply, an organization built on integrity.

MSA's values do not change from time to time, nor are they situation-dependent or adapted to suit individual personalities. Rather, they are the foundation of our company culture. The pages that follow highlight the actions and behaviors we strive to achieve every day, and as such, outline MSA's seven core values.

INTEGRITY

Integrity is the foundational value at MSA. We conduct ourselves with unwavering high standards of honesty, trust, professionalism and the highest levels of ethical behavior wherever we operate. Without integrity, nothing else matters.

SPEED AND AGILITY

In today's highly competitive environment, operating with speed and agility is more important than ever. Therefore, we anticipate and respond quickly to business issues, opportunities and the needs of our customers, and are accountable for making decisions using processes that achieve quality results.

CUSTOMER FOCUS

We strive to provide our customers with a superior customer experience at every single turn, by delivering high-quality products and support services in order to exceed their expectations and gain their trust and loyalty.

INNOVATION AND CHANGE

Constant change is a fact of doing business. At MSA, we must embrace change and encourage innovation throughout the organization. Innovation is the process of developing and applying new ways of addressing opportunities for improvement, and creating solutions that add value. It's encouraging and rewarding creativity, building on our successes and learning from our failures, and being open to input and feedback from all areas of the organization.

TEAMWORK

As MSA continues to grow across the world, it is critical that our associates work collaboratively and effectively—at all levels—to accomplish our strategic and operational goals. This collective mindset allows us to share ideas, develop skills, operate efficiently, be innovative and, above all, helps us exceed our customers' broadest expectations.

DIVERSITY AND INCLUSION

An inclusive environment and cultural sensitivity is critical to the success of any organization. At MSA, we welcome a wide variety of people, thoughts, perspectives and ideas that enable us to embrace and utilize the rich dimensions of each individual. We believe that openness to people and ideas creates a global competitive advantage for MSA that brings a measurable performance gain to all facets of our business.

ENGAGEMENT

Enabling all of our associates to grow and reach their fullest potential not only enhances company performance, it drives high levels of employee motivation. We value highly motivated employees committed to achieving excellence. We drive this mindset by setting clear expectations and empowering associates to achieve results. We fuel this level of engagement by providing timely feedback, project ownership and opportunities to grow.

Forward-Looking Statements

This report may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our or our industry’s actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. These risks and other factors include, but are not limited to, those listed in this report under “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and elsewhere in this report. In some cases, you can identify forward-looking statements by words such as “may,” “will,” “should,” “expects,” “intends,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential” or the negative of these terms or other comparable words. These statements are only predictions and are not guarantees of future performance. Therefore, actual events or results may differ materially from those expressed or forecasted in these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We are under no duty to update publicly any of the forward-looking statements after the date of this report whether as a result of new information, future events or otherwise.

PART I

Item 1. Business

Overview—Mine Safety Appliances Company was incorporated in Pennsylvania in 1914. We are a global leader in the development, manufacture and supply of products that protect people’s health and safety. Our safety products typically integrate any combination of electronics, mechanical systems, and advanced materials to protect users against hazardous or life threatening situations. Our comprehensive line of safety products is used by workers around the world in the fire service, homeland security, construction, and other industries, as well as the military. Our broad product offering includes self-contained breathing apparatus, or SCBAs, gas masks, gas detection instruments, head protection, respirators, thermal imaging cameras, fall protection, and ballistic helmets and body armor. We also provide a broad offering of consumer and contractor safety products through retail channels.

We dedicate significant resources to research and development, which allows us to produce innovative safety products that are often first to market and exceed industry standards. Our global product development teams include cross-geographic and cross-functional members from various functional areas throughout the company, including research and development, marketing, sales, operations, and quality management. Our engineers and technical associates work closely with the safety industry’s leading standards-setting groups and trade associations, such as the National Institute for Occupational Safety and Health, or NIOSH, and the National Fire Protection Association, or NFPA, to develop industry product requirements and standards and to anticipate their impact on our product lines.

Segments—We tailor our product offerings and distribution strategy to satisfy distinct customer preferences that vary across geographic regions. We believe that we best serve these customer preferences by organizing our business into three geographic segments: North America, Europe, and International. Segment information is presented in the note entitled “Segment Information” in Item 8—Financial Statements and Supplementary Data.

Because our financial statements are stated in U.S. dollars, currency fluctuations may affect our results of operations and financial position and may affect the comparability of our results between financial periods.

Principal Products—We manufacture and sell a comprehensive line of safety products to protect workers around the world in the fire service, homeland security, construction, and other industries, as well as the military. We also provide a broad offering of consumer and contractor safety products through retail channels. Our products protect people against a wide variety of hazardous or life-threatening situations. The following is a brief description of each of our principal product categories:

Respiratory protection. Respiratory protection products are used to protect against the harmful effects of contamination caused by dust, gases, fumes, volatile chemicals, sprays, micro-organisms, fibers, and other contaminants. We offer a broad and comprehensive line of respiratory protection products.

- *Self Contained Breathing Apparatus.* SCBAs are used by first responders, petrochemical plant workers, and anyone entering an environment deemed immediately dangerous to life and health. SCBAs are also used by first responders to protect against exposure to chemical, biological, radiological, and nuclear, or CBRN, agents. Our FireHawk®M7 SCBA meets the latest performance requirements adopted by the NFPA. The FireHawk®M7 Air Mask was the first device of its kind to be certified by the Safety Equipment Institute, or SEI, as NFPA compliant for both its breathing apparatus and Personal Alert Safety System, or PASS. The PASS device is an SCBA component that sounds a loud, piercing alarm when a firefighter becomes disabled or lies motionless for 30 seconds.
- *Air-purifying respirators.* Air-purifying respirators range from the simple, filtering types to powered full-facepiece versions for many hazardous applications, including:
 - full-face gas masks for military personnel and first responders exposed to known and unknown concentrations of hazardous gases, chemicals, vapors, and particulates;

- half-mask respirators for industrial workers, painters, and construction workers exposed to known concentrations of gases, vapors, and particulates;
- powered-air purifying respirators for industrial, hazmat, and remediation workers who have longer term exposures to hazards in their work environment; and
- dust and pollen masks for maintenance workers, contractors, and at-home consumers exposed to nuisance dusts, allergens, and other particulates.
- *Gas masks.* We have supplied gas masks to the U.S. military for several decades. The latest versions of these masks are currently in use by the U.S. military in Iraq, Afghanistan, and other parts of the world. Our commercial version of this gas mask, the Millennium, was developed based on the MCU-2/P, the gas mask currently used by the U.S. Air Force and U.S. Navy.
- *Escape hoods.* Our Response Escape Hood is used by law enforcement personnel, government workers, chemical and pharmaceutical workers, and anyone needing to escape from unknown concentrations of a chemical, biological or radiological release of toxic gases and vapors. The hood gives users head and upper neck coverage and respiratory protection to help them escape from threatening situations quickly and easily.

Portable and permanent gas detection instruments. Our portable and permanent instruments are used to detect the presence or absence of various gases in the air. These instruments can be either hand-held or permanently installed. Typical applications of these instruments include the detection of the lack of oxygen in confined spaces or the presence of combustible or toxic gases.

- *Single- and multi-gas hand-held detectors.* Our single- and multi-gas detectors provide portable solutions for detecting the presence of oxygen, combustible gases and various toxic gases, including hydrogen sulfide, carbon monoxide, ammonia and chlorine, either singularly or up to six gases at once. Our hand-held portable instruments are used by chemical workers, oil and gas workers, utility workers entering confined spaces, or anywhere a user needs to continuously monitor the quality of the atmosphere they are working in and around.
- *Multi-point permanently installed gas detection systems.* Our comprehensive line of gas detection systems is used to continuously monitor for combustible and toxic gases and oxygen deficiency in virtually any application where continuous monitoring is required. Our systems are used for gas detection in pulp and paper, refrigerant monitoring, petrochemical, and general industrial applications. One of our newest lines, the SafeSite® Multi-Threat Wireless Detection System, designed and developed for homeland security applications, combines the technologies and features from our line of permanent and portable gas detection offerings. The SafeSite System detects and communicates the presence of toxic industrial chemicals and chemical warfare agents. With up to 16 monitoring stations, wirelessly connected to a base station, the SafeSite System allows law enforcement officials to rapidly deploy and set up perimeter gas sensing sentinels that continuously monitor the air for toxic gases at large public events, in subways or at federal facilities, and continuously report their status to incident command.
- *Flame detectors and open-path infrared gas detectors.* Our flame and combustible gas detectors are used for plant-wide monitoring of toxic gases and for detecting the presence of flames. These systems use infrared optics to detect potentially hazardous conditions across distances as far as 120 meters, making them suitable for use in such places as offshore oil rigs, storage vessels, refineries, pipelines, and ventilation ducts. First used in the oil and gas industry, our systems currently have broad applications in petrochemical facilities, the transportation industry, and in pharmaceutical production.

Thermal imaging cameras. Our hand-held infrared thermal imaging cameras, or TICs, are used in the global fire service market. TICs detect sources of heat in order to locate downed firefighters and other people trapped inside burning or smoke-filled structures. TICs can also be used to identify “hot spots.” Our Evolution® 5000

series TICs are unmatched for ease of use and durability. Our Evolution® 5800 TIC, the newest addition to our 5000 series of TICs, offers state-of-the-art imagery in a high resolution format. Our Evolution 5600 Thermal Imaging Camera provides high resolution and an extended high sensitivity operating range in a rugged, user-friendly and affordable design.

Head, eye, face, and hearing protection. Head, eye, face, and hearing protection is used in work environments where hazards present dangers such as dust, flying particles, metal fragments, chemicals, extreme glare, optical radiation, and items dropped from above.

- *Industrial hard hats.* Our broad line of hard hats include full-brim hats and traditional hard hats, available in custom colors and with custom logos. These hard hats are used by plant, steel and construction workers, miners and welders.
- *Fire helmets.* Our fire service products include leather, traditional, modern, and specialty helmets designed to satisfy the preferences of firefighters across geographic regions. Our CairnsHELMET is the number one helmet in the North American fire service market based on 2009 sales. Similarly, our Gallet firefighting helmet has a number one market position in Europe based on 2009 sales.
- *Military helmets and communication systems.* The Advanced Combat Helmet, or ACH, is used by the military for ballistic head protection. The ACH was originally designed for the Special Forces of the U.S. military and has now been designated as the “basis of issue” by the U.S. Army. In recent years, military forces in Iraq and Afghanistan have trusted MSA’s battle-tested ACH and related Modular Integrated Communication Headset, or MICH™. MICH is a light weight and comfortable communication system that provides superior hearing protection as well as clear radio/intercom communications.
- *Eye, face, and hearing protection.* Our broad line of hearing protection products, non-prescription protective eyewear, and face shields is used by workers in a wide variety of industries.

Body protection.

- *Fall protection.* Our broad line of fall protection equipment includes confined space equipment, harnesses/fall arrest equipment, lanyards, and lifelines.
- *Ballistic body armor.* Our MSA Paraclete Releasable Assault Vest and Releasable Modular Vest are used primarily by the U.S. military, including Special Forces Units. Our ForceField™ Body Armor line features concealable ballistic vests and over-the-uniform tactical vests designed primarily for law enforcement applications.

Customers—Our customers generally fall into three categories: industrial and military end-users, distributors, and retail consumers. In North America, we make nearly all of our non-military sales through our distributors. In our European and International segments, we make our sales through both indirect and direct sales channels. Our U.S. military customers, which are comprised of multiple U.S. government entities, including the Department of Defense, accounted for approximately 5% of our 2009 sales. The year-end backlog of orders under contracts with U.S. government agencies was \$18.3 million in 2009, \$23.4 million in 2008, and \$35.1 million in 2007.

Industrial and military end-users—Examples of the primary industrial and military end-users of our core products are listed below:

<u>Products</u>	<u>Primary End-Users</u>
Respiratory Protection	First Responders; General Industry Workers; Military Personnel
Gas Detection	Oil, Gas, Petrochemical and Chemical Workers; First Responders; Hazmat, and Confined Space Workers
Head, Eye and Face, and Hearing Protection	Construction Workers and Contractors; First Responders; General Industry Workers; Military Personnel
Thermal Imaging Cameras	First Responders

Sales and Distribution—Our sales and distribution team consists of distinct marketing, field sales and customer service organizations for our three geographic segments: North America, Europe, and International. We believe our sales and distribution team, totaling over 400 dedicated associates, is the largest in our industry. In most geographic areas, our field sales organizations work jointly with select distributors to call on end-users, educating them about hazards, exposure limits, safety requirements, and product applications, as well as specific performance requirements of our products. In our International segment and Eastern Europe where distributors are not as well established, our sales associates often work with and sell directly to end-users. We believe that the development of relationships with end-users is critical to increasing the overall demand for our products.

The in-depth customer training and education provided by our sales associates to our customers are critical to ensure proper use of many of our products, such as SCBAs and gas detection instruments. As a result of our sales associates working closely with end-users, they gain valuable insight into customer preferences and needs. To better serve our customers and to ensure that our sales associates are among the most knowledgeable and professional in the industry, we place significant emphasis on training our sales associates with respect to product application, industry standards and regulations, sales skills and sales force automation.

We believe our sales and distribution strategy allows us to deliver a customer value proposition that differentiates our products and services from those of our competitors, resulting in increased customer loyalty and demand.

In areas where we use indirect selling, we promote, distribute, and service our products to general industry through select authorized national, regional, and local distributors. Some of our key distributors include Airgas, W.W. Grainger Inc., Fisher Safety, and Hagemeyer. In North America, we distribute fire service products primarily through specially trained local and regional distributors who provide advanced training and service capabilities to volunteer and paid municipal fire departments. In our European and International segments, we primarily sell to and service the fire service market directly. Because of our broad and diverse product line and our desire to reach as many markets and market segments as possible, we have over 4,000 authorized distributor locations worldwide.

We market consumer products under the MSA Safety Works brand through a dedicated sales and marketing force. We serve the retail consumer through various channels, including distributors, such as Orgill Bros., hardware and equipment rental outlets, such as United Rentals, and retail chains, such as The Home Depot and TrueValue.

Competition—We believe the worldwide personal protection equipment market, including the sophisticated safety products market in which we compete, generates annual sales in excess of \$10 billion. The industry supplying this market is broad and highly fragmented with few participants offering a comprehensive line of safety products. Over the long-term, we believe global demand for safety products will be stable or growing because purchases of these products are non-discretionary since they protect workers in hazardous and life-threatening work environments and because their use is often mandated by government and industry regulations. Moreover, safety products industry revenues reflect the need to consistently replace many safety products that have limited life spans due to normal wear-and-tear or because they are one-time use products by design.

The safety products market is highly competitive, with participants ranging in size from small companies focusing on a single type of personal protection equipment to a few large multinational corporations that manufacture and supply many types of sophisticated safety products. Our main competitors vary by region and product. We believe that participants in this industry compete primarily on the basis of product characteristics (such as functional performance, agency approvals, design and style), price, brand name recognition and service.

We believe we compete favorably within each of our operating segments as a result of our high quality and cost-efficient product offerings and strong brand trust and recognition.

Research and Development—To maintain our position at the forefront of safety equipment technology, we operate several sophisticated research and development facilities. We believe our dedication and commitment to innovation and research and development allow us to produce innovative safety products that are often first to market and exceed industry standards. In 2009, 2008, and 2007, on a global basis, we spent \$28.8 million, \$35.0 million, and \$30.2 million, respectively, on research and development. Our primary engineering groups are located in the United States, Germany, and China, and to a lesser extent in France. Our global product development teams include cross-geographic and cross-functional members from various areas throughout the company, including research and development, marketing, sales, operations, and quality management. These teams are responsible for setting product line strategy based on their understanding of the markets and the technologies, opportunities and challenges they foresee in each product area. We believe our team-based, cross-geographic and cross-functional approach to new product development is a source of competitive advantage. Our approach to the new product development process allows us to tailor our product offerings and product line strategies to satisfy distinct customer preferences and industry regulations that vary across our three geographic segments.

We believe another important aspect of our approach to new product development is that our engineers and technical associates work closely with the safety industry's leading standards-setting groups and trade associations, such as the National Institute for Occupational Safety and Health, or NIOSH, and the National Fire Protection Association, or NFPA, to develop industry product requirements and standards and anticipate their impact on our product lines. For example, nearly every consensus standard-setting body around the world that impacts our product lines has one of our key managers as a voting member. Key members of our management team understand the impact that these standard-setting organizations have on our new product development pipeline and devote time and attention to anticipating a new standard's impact on our sales and operating results. Because of our technological sophistication, commitment to and membership on global standard-setting bodies, resource dedication to research and development and unique approach to the new product development process, we believe we are well-positioned to anticipate and adapt to the needs of changing product standards and gain the approvals and certifications necessary to meet new government and multinational product regulations.

Patents and Intellectual Property—We own and have obtained licenses to significant intellectual property, including a number of domestic and foreign patents, patent applications and trademarks related to our products, processes and business. Although our intellectual property plays an important role in maintaining our competitive position in a number of markets that we serve, no single patent, or patent application, trademark or license is, in our opinion, of such value to us that our business would be materially affected by the expiration or termination thereof, other than the "MSA" trademark. Our patents expire at various times in the future not exceeding 20 years. Our general policy is to apply for patents on an ongoing basis in the United States and other countries, as appropriate, to perfect our patent development. In addition to our patents, we have also developed or acquired a substantial body of manufacturing know-how that we believe provides a significant competitive advantage over our competitors.

Raw Materials and Suppliers—Many of the components of our products are formulated, machined, tooled, or molded in-house from raw materials. For example, we rely on integrated manufacturing capabilities for breathing apparatus, gas masks, ballistic helmets, hard hats, and circuit boards. The primary raw materials that we source from third parties include rubber, chemical filter media, eye and face protective lenses, air cylinders, certain metals, electronic components, and ballistic resistant and non-ballistic fabrics. We purchase these materials both domestically and internationally, and we believe our supply sources are both well established and reliable. We have close vendor relationship programs with the majority of our key raw material suppliers. Although we generally do not have long-term supply contracts, we have not experienced any significant problems in obtaining adequate raw materials.

Associates—At December 31, 2009, we had approximately 5,000 associates, approximately 3,000 of whom were employed by our European and International segments. None of our U.S. associates are subject to the provisions of a collective bargaining agreement. Some of our associates outside the United States are members of unions. We have not experienced a work stoppage in over 10 years and believe our relations with our associates are good.

Available Information—Our internet address is www.msanet.com. We post the following filings on the Investor Relations page on our website as soon as reasonably practicable after they have been electronically filed with or furnished to the Securities and Exchange Commission: our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. All such filings on our Investor Relations web page are available to be viewed on this page free of charge. Information contained on our website is not part of this annual report on Form 10-K or our other filings with the Securities and Exchange Commission.

Item 1A. Risk Factors

The ongoing effects of the global recession and the duration of the recovery could materially and adversely affect our business, results of operations, and financial condition.

The recent global recession, distress in the financial markets and general uncertainty about the economy has had a significant negative impact on governments, businesses and consumers around the world. In addition, the impact of the recession on the operations or liquidity of any party with whom we conduct business could adversely affect our business. If these conditions continue or worsen, we could experience declines in revenue, profitability and cash flow due to reduced orders, payment delays, supply chain disruptions or other factors caused by the economic challenges faced by our customers and suppliers. We are unsure of the continuing duration of the recession and the length of the recovery. However, a protracted continuation or worsening of the global economic downturn or disruptions in the financial markets could have a material adverse effect on our business, results of operations and financial condition.

A reduction in the spending patterns of government agencies could materially and adversely affect our net sales, earnings and cash flow.

The demand for our products sold to the fire service market, the homeland security market, and to U.S. government agencies, including the Department of Defense, is, in large part, driven by available government funding. For example, the level of government funding in these markets increased significantly after the attacks of September 11, 2001, fueling the demand for many of our products such as SCBAs, gas masks, and Advanced Combat Helmets, and declined in 2005 and 2006, as government funding priorities changed. Approximately 5% of our net sales for the year ended December 31, 2009 were made directly to U.S. military customers. Government budgets are set annually and we cannot assure you that government funding will be sustained at the same level in the future. A significant reduction in available government funding could materially and adversely affect our net sales, earnings and cash flow.

The markets in which we compete are highly competitive, and some of our competitors have greater financial and other resources than we do. The competitive pressures faced by us could materially and adversely affect our business, results of operations and financial condition.

The safety products market is highly competitive, with participants ranging in size from small companies focusing on single types of safety products, to large multinational corporations that manufacture and supply many types of safety products. Our main competitors vary by region and product. We believe that participants in this industry compete primarily on the basis of product characteristics (such as functional performance, agency approvals, design and style), price, brand name trust and recognition, and customer service. Some of our competitors have greater financial and other resources than we do and our business could be adversely affected by competitors' new product innovations, technological advances made to competing products and pricing changes made by us in response to competition from existing or new competitors. We may not be able to compete successfully against current and future competitors and the competitive pressures faced by us could materially and adversely affect our business, results of operations and financial condition.

If we fail to introduce successful new products or extend our existing product lines, we may lose our market position and our financial performance may be materially and adversely affected.

In the safety products market, there are frequent introductions of new products and product line extensions. If we are unable to identify emerging consumer and technological trends, maintain and improve the competitiveness of our products and introduce new products, we may lose our market position, which could have a materially adverse effect on our business, financial condition and results of operations. Although we continue to invest significant resources in research and development and market research, continued product development and marketing efforts are subject to the risks inherent in the development of new products and product line extensions, including development delays, the failure of new products and product line extensions to achieve anticipated levels of market acceptance, and the cost of failed product introductions.

Product liability claims and our inability to collect related insurance receivables could have a materially adverse effect on our business, operating results, and financial condition.

We face an inherent business risk of exposure to product liability claims arising from the alleged failure of our products to prevent the types of personal injury or death against which they are designed to protect. Although we have not experienced any material uninsured losses due to product liability claims, it is possible that we could experience material losses in the future. In the event any of our products prove to be defective, we could be required to recall or redesign such products. In addition, we may voluntarily recall or redesign certain products that could potentially be harmful to end users. A successful claim brought against us in excess of available insurance coverage, or any claim or product recall that results in significant expense or adverse publicity against us, could have a materially adverse effect on our business, operating results, and financial condition.

In the normal course of business, we make payments to settle product liability claims and for related legal fees and record receivables for the amounts covered by insurance. Various factors could affect the timing and amount of recovery of insurance receivables, including: the outcome of negotiations with insurers, legal proceedings with respect to product liability insurance coverage, and the extent to which insurers may become insolvent in the future. Failure to recover amounts due from our insurance carriers could have a materially adverse effect on our business, operating results, and financial condition.

Our ability to market and sell our products is subject to existing regulations and standards. Changes in such regulations and standards or our failure to comply with them could materially and adversely affect our results of operations.

Most of our products are required to meet performance and test standards designed to protect the health and safety of people around the world. Our inability to comply with these standards may materially and adversely affect our results of operations. Changes in regulations could reduce the demand for our products or require us to reengineer our products, thereby creating opportunities for our competitors. Regulatory approvals for our products may be delayed or denied for a variety of reasons that are outside of our control. Additionally, market anticipation of significant new standards, such as the National Fire Protection Association (NFPA) standard for breathing apparatus which became effective August 31, 2007, can cause customers to accelerate or delay buying decisions.

We have significant international operations, and we are subject to the risks of doing business in foreign countries.

We have business operations in over 30 foreign countries. In 2009, approximately 55% of our net sales were made by operations located outside the United States. Our international operations are subject to various political, economic, and other risks and uncertainties, which could adversely affect our business. These risks include the following:

- currency exchange rate fluctuations;
- unexpected changes in regulatory requirements;

- changes in trade policy or tariff regulations;
- changes in tax laws and regulations;
- intellectual property protection difficulties;
- difficulty in collecting accounts receivable;
- complications in complying with a variety of foreign laws and regulations, some of which may conflict with U.S. laws;
- trade protection measures and price controls;
- trade sanctions and embargos;
- nationalization and expropriation;
- increased international instability or potential instability of foreign governments;
- the need to take extra security precautions for our international operations; and
- costs and difficulties in managing culturally and geographically diverse international operations.

Any one or more of these risks could have a negative impact on the success of our international operations, and thereby materially and adversely affect our business as a whole.

Our future results are subject to availability of, and fluctuations in the costs of, purchased components and materials due to market demand, currency exchange risks, material shortages, and other factors.

We depend on various components and materials to manufacture our products. Although we have not experienced any difficulty in obtaining components and materials, it is possible that any of our supplier relationships could be terminated. Any sustained interruption in our receipt of adequate supplies could have a materially adverse effect on our business, results of operations and financial condition. We cannot assure you that we will be able to successfully manage price fluctuations due to market demand, currency risks or material shortages, or that future price fluctuations will not have a materially adverse effect on our business, results of operations and financial condition.

If we lose any of our key personnel or are unable to attract, train and retain qualified personnel, our ability to manage our business and continue our growth would be negatively impacted.

Our success depends in large part on the continued contributions of our key management, engineering, and sales and marketing personnel, many of whom are highly skilled and would be difficult to replace. Our success also depends on the abilities of new personnel to function effectively, both individually and as a group. If we are unable to attract, effectively integrate and retain management, engineering or sales and marketing personnel, then the execution of our growth strategy and our ability to react to changing market requirements may be impeded, and our business could suffer as a result. Competition for personnel is intense, and we cannot assure you that we will be successful in attracting and retaining qualified personnel. In addition, we do not currently maintain key person life insurance.

We are subject to various environmental laws and any violation of these laws could adversely affect our results of operations.

We are subject to federal, state, and local laws, regulations and ordinances relating to the protection of the environment, including those governing discharges to air and water, handling and disposal practices for solid and hazardous wastes, and the maintenance of a safe workplace. These laws impose penalties for noncompliance and liability for response costs and certain damages resulting from past and current spills, disposals, or other releases of hazardous materials. We could incur substantial costs as a result of noncompliance with or liability for cleanup

pursuant to these environmental laws. Environmental laws have changed rapidly in recent years, and we may be subject to more stringent environmental laws in the future. If more stringent environmental laws are enacted, these future laws could have a materially adverse effect on our results of operations.

Our inability to successfully identify, consummate and integrate future acquisitions, or to realize anticipated cost savings and other benefits could adversely affect our business.

One of our operating strategies is to selectively pursue acquisitions. Any future acquisitions will depend on our ability to identify suitable acquisition candidates and successfully consummate such acquisitions. Acquisitions involve a number of risks including:

- failure of the acquired businesses to achieve the results we expect;
- diversion of our management's attention from operational matters;
- our inability to retain key personnel of the acquired businesses;
- risks associated with unanticipated events or liabilities;
- potential disruption of our existing business; and
- customer dissatisfaction or performance problems at the acquired businesses.

If we are unable to integrate or successfully manage businesses that we may acquire in the future, we may not realize anticipated cost savings, improved manufacturing efficiencies and increased revenue, which may result in materially adverse short- and long-term effects on our operating results, financial condition and liquidity. Even if we are able to integrate the operations of our acquired businesses into our operations, we may not realize the full benefits of the cost savings, revenue enhancements or other benefits that we may have expected at the time of acquisition. In addition, even if we achieve the expected benefits, we may not be able to achieve them within the anticipated time frame, and such benefits may be offset by costs incurred in integrating the acquired companies and increases in other expenses.

Because we derive a significant portion of our sales from the operations of our foreign subsidiaries, future currency exchange rate fluctuations may adversely affect our results of operations and financial condition, and may affect the comparability of our results between financial periods.

For the year ended December 31, 2009, the operations in our European and International segments accounted for approximately 52% of our net sales. The results of our foreign operations are reported in the local currency and then translated into U.S. dollars at the applicable exchange rates for inclusion in our consolidated financial statements. The exchange rates between some of these currencies and the U.S. dollar have fluctuated significantly in recent years, and may continue to do so in the future. In addition, because our financial statements are stated in U.S. dollars, such fluctuations may affect our results of operations and financial position, and may affect the comparability of our results between financial periods. We cannot assure you that we will be able to effectively manage our exchange rate risks or that any volatility in currency exchange rates will not have a materially adverse effect on our results of operations and financial condition.

Our continued success depends on our ability to protect our intellectual property. If we are unable to protect our intellectual property, our business could be materially and adversely affected.

Our success depends, in part, on our ability to obtain and enforce patents, maintain trade secret protection and operate without infringing on the proprietary rights of third parties. We have been issued patents and have registered trademarks with respect to many of our products, but our competitors could independently develop similar or superior products or technologies, duplicate any of our designs, trademarks, processes or other intellectual property or design around any processes or designs on which we have or may obtain patents or

trademark protection. In addition, it is possible that third parties may have, or will acquire, licenses for patents or trademarks that we may use or desire to use, so that we may need to acquire licenses to, or to contest the validity of, such patents or trademarks of third parties. Such licenses may not be made available to us on acceptable terms, if at all, and we may not prevail in contesting the validity of third party rights.

In addition to patent and trademark protection, we also protect trade secrets, know-how, and other confidential information against unauthorized use by others or disclosure by persons who have access to them, such as our employees, through contractual arrangements. These agreements may not provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use, misappropriation or disclosure of such trade secrets, know-how or other proprietary information. If we are unable to maintain the proprietary nature of our technologies, our results of operations and financial condition could be materially and adversely affected.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal executive offices are located at 121 Gamma Drive, RIDC Industrial Park, O'Hara Township, Pittsburgh, Pennsylvania 15238 in a 93,000 square-foot building owned by us. We own or lease our primary facilities in the United States and in a number of other countries. We believe that all of our facilities, including the manufacturing facilities, are in good repair and in suitable condition for the purposes for which they are used.

The following table sets forth a list of our primary facilities:

<u>Location</u>	<u>Function</u>	<u>Square Feet</u>	<u>Owned or Leased</u>
North America			
Murrysville, PA	Manufacturing	295,000	Owned
Cranberry Twp., PA	Office, Research and Development, and Manufacturing	212,000	Owned
St. Pauls, NC	Manufacturing	144,000	Leased
Jacksonville, NC	Manufacturing	107,000	Owned
Pittsburgh, PA	Office	93,000	Owned
Evans City, PA	Manufacturing	87,000	Leased
Pittsburgh, PA	Distribution	81,000	Leased
Queretaro, Mexico	Office, Manufacturing and Distribution	77,000	Leased
Cranberry Twp., PA	Research and Development	68,000	Owned
Newport, VT	Manufacturing	12,000	Leased
Bowling Green, KY	Office, Research and Development, and Manufacturing	7,000	Leased
Toronto, Canada	Distribution	5,000	Leased
Europe			
Berlin, Germany	Office, Research and Development, Manufacturing, and Distribution	340,000	Leased
Chatillon sur Chalaronne, France	Office, Research and Development, Manufacturing, and Distribution	94,000	Owned
Glasgow, Scotland	Office and Distribution	25,000	Leased
Milan, Italy	Office and Distribution	25,000	Owned
Mohammedia, Morocco	Manufacturing	24,000	Owned
International			
Suzhou, China	Office, Research and Development, Manufacturing, and Distribution	168,000	Owned
Johannesburg, South Africa	Office, Manufacturing, and Distribution	89,000	Leased
Sydney, Australia	Office, Manufacturing, and Distribution	84,000	Owned
Sao Paulo, Brazil	Office, Manufacturing, and Distribution	74,000	Owned
Wuxi, China	Office, Manufacturing, and Distribution	38,000	Owned
Lima, Peru	Office and Distribution	34,000	Owned
Rajarhat, India	Office and Distribution	10,000	Leased
Buenos Aires, Argentina	Office and Distribution	9,000	Owned

Item 3. Legal Proceedings

We are subject to federal, state, and local laws, regulations and ordinances relating to the protection of the environment, including those governing discharges to air and water, handling and disposal practices for solid and hazardous wastes, and the maintenance of a safe workplace. There are no current or expected legal proceedings or expenditures with respect to environmental matters that would materially affect our operations.

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,500 lawsuits, primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 11,800 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes, and other relevant information. We evaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our results of operations or financial condition.

In the normal course of business, we make payments to settle product liability claims and for related legal fees and record receivables for the amounts covered by insurance. Various factors could affect the timing and amount of recovery of insurance receivables, including: the outcome of negotiations with insurers, legal proceedings with respect to product liability insurance coverage, and the extent to which insurers may become insolvent in the future.

We are currently involved in coverage litigation with Century Indemnity Company (Century). We have sued Century in the Court of Common Pleas of Allegheny County, Pennsylvania, alleging that Century breached five insurance policies by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The Pennsylvania court has denied a motion by Century to stay or dismiss the Pennsylvania lawsuit. Our third motion for partial summary judgment was granted, confirming our position on the full multi-year policy limits. We expect the matter to be ready for trial in late 2010. We believe that Century's refusal to indemnify us under the policies for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with The North River Insurance Company (North River). On March 23, 2009, we sued North River in the United States District Court for the Western District of Pennsylvania, alleging that North River breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. The mediation was unsuccessful and the case will proceed to trial. We believe that North River's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with Columbia Casualty Company (CNA). On March 30, 2009, we sued CNA in the United States District Court for the Western District of Pennsylvania, alleging that

CNA breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. If mediation is unsuccessful, the case will proceed to trial. We believe that CNA's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We regularly evaluate the collectibility of insurance receivables and record the amounts that we conclude are probable of collection based on our analysis of our various policies, pertinent case law interpreting comparable policies and our experience with similar claims. Receivables from insurance carriers totaled \$91.7 million at December 31, 2009, of which \$29.0 million is reported in other current assets and \$62.7 million in other non-current assets. Receivables from insurance carriers totaled \$60.6 million at December 31, 2008. Based upon our evaluation of applicable insurance coverage and our ongoing insurance recovery efforts, we believe that the recorded balances are fully recoverable.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of our security holders during the fourth quarter of 2009.

Executive Officers of the Registrant

The following sets forth the names and ages of our executive officers as of February 26, 2010, indicating all positions held during the past five years:

<u>Name</u>	<u>Age</u>	<u>Title</u>
William M. Lambert ^(a)	51	President and Chief Executive Officer since May 2008.
Joseph A. Bigler ^(b)	60	Vice President and President, MSA North America since May 2007.
Kerry M. Bove ^(c)	51	Vice President, Global Operational Excellence since May 2007.
Rob Cañizares ^(d)	60	Executive Vice President and President, MSA International since May 2007.
Ronald N. Herring, Jr. ^(e)	49	Vice President, Global Product Leadership since May 2007.
Douglas K. McClaine ^(f)	52	Vice President, Secretary and General Counsel since May 2005.
Paul R. Uhler ^(g)	51	Vice President, Global Human Resources since May 2007.
Dennis L. Zeitler ^(h)	61	Senior Vice President, Chief Financial Officer and Treasurer since June 2007.

- (a) Prior to his present position, Mr. Lambert held the positions of President and Chief Operating Officer; Vice President and President, MSA North America; and Vice President and General Manager of the Safety Products Division.
- (b) Prior to his present position, Mr. Bigler was Vice President, primarily responsible for North American Sales and Distribution.
- (c) Prior to his present position, Mr. Bove was Vice President, primarily responsible for Global Manufacturing Operations and Materials Management.
- (d) Prior to his present position, Mr. Cañizares was Vice President and President, MSA International.
- (e) Prior to his present position, Mr. Herring held the positions of Vice President, primarily responsible for Global Marketing, Research and Engineering and Quality Assurance; and General Manager, Safety Products Division.
- (f) Prior to his present position, Mr. McClaine was Secretary and General Counsel.
- (g) Prior to his present position, Mr. Uhler held the positions of Vice President, primarily responsible for North American Human Resources and Corporate Communications; Director of Human Resources and Corporate Communications; and Director of Operations, Safety Products Division.
- (h) Prior to his present position, Mr. Zeitler was Vice President, Chief Financial Officer and Treasurer.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

Our common stock is traded on the New York Stock Exchange under the symbol "MSA". Stock price ranges and dividends declared were as follows:

	<u>Price Range of Our Common Stock</u>		<u>Dividends</u>
	<u>High</u>	<u>Low</u>	
Year ended December 31, 2008			
First Quarter	\$52.37	\$38.66	\$0.22
Second Quarter	42.50	35.20	0.24
Third Quarter	41.61	30.47	0.24
Fourth Quarter	38.84	18.86	0.24
Year ended December 31, 2009			
First Quarter	\$24.45	\$15.82	\$0.24
Second Quarter	26.00	19.18	0.24
Third Quarter	29.60	21.75	0.24
Fourth Quarter	27.99	23.62	0.24

On February 16, 2010, there were 447 registered holders of our shares of common stock.

The information appearing in Part III below regarding common stock issuable under our equity compensation plans is incorporated herein by reference.

Issuer Purchases of Equity Securities

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>
October 1 - October 31, 2009	—	\$—	—	1,910,562
November 1 - November 30, 2009	—	—	—	1,968,481
December 1 - December 31, 2009	—	—	—	1,835,666

On November 2, 2005, the Board of Directors authorized the purchase of up to \$100 million of common stock from time-to-time in private transactions and on the open market. The share purchase program has no expiration date. The maximum shares that may yet be purchased is calculated based on the dollars remaining under the program and the respective month-end closing share price.

We do not have any other share purchase programs.

Comparison of Five-Year Cumulative Total Return

Set forth below is a line graph and table comparing the cumulative total returns (assuming reinvestment of dividends) for the five years ended December 31, 2009 of \$100 invested on December 31, 2004 in each of Mine Safety Appliances Company's common stock, the Standard & Poor's 500 Composite Index, and the Russell 2000 Index. Because our competitors are principally privately held concerns or subsidiaries or divisions of corporations engaged in multiple lines of business, we do not believe it feasible to construct a peer group comparison on an industry or line-of-business basis. The Russell 2000 Index, while including corporations both larger and smaller than MSA in terms of market capitalization, is composed of corporations with an average market capitalization similar to us.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN Among Mine Safety Appliances Company, The S&P 500 Index And The Russell 2000 Index

Comparison of 5 Year Cumulative Total Return
Assumes Initial Investment of \$100
December 2009

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the historical financial statements and other financial information included elsewhere in this annual report on Form 10-K. This discussion may contain forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions, and projections about our industry, business, and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed in the sections of this annual report entitled "Forward-Looking Statements" and "Risk Factors."

BUSINESS OVERVIEW

We are a global leader in the development, manufacture and supply of products that protect people's health and safety. Our safety products typically integrate any combination of electronics, mechanical systems, and advanced materials to protect users against hazardous or life threatening situations. Our comprehensive lines of safety products are used by workers around the world in the fire service, homeland security, construction, and other industries, as well as the military.

We are committed to providing our customers with service unmatched in the safety industry and, in the process, enhancing our ability to provide a growing line of safety solutions for customers in key global markets. Four strategic imperatives drive us toward our goal of building customer loyalty by delivering exceptional levels of protection, quality, and value:

- Achieve sustainable growth through product leadership;
- Expand market penetration through exceptional customer focus;
- Control costs and increase efficiency in asset utilization; and
- Build the depth, breadth, and diversity of our global team.

We tailor our product offerings and distribution strategy to satisfy distinct customer preferences that vary across geographic regions. We believe that we best serve these customer preferences by organizing our business into three geographic segments: North America, Europe, and International. Each segment includes a number of operating companies. In 2009, approximately 48%, 26%, and 26% of our net sales were made by our North American, European, and International segments, respectively.

North America. Our largest manufacturing and research and development facilities are located in the United States. We serve our North American markets with sales and distribution functions in the U.S., Canada, and Mexico.

Europe. Our European segment includes well-established companies in most Western European countries and more recently established operations in a number of Eastern European locations. Our largest European companies, based in Germany and France, develop, manufacture, and sell a wide variety of products. Operations in other European countries focus primarily on sales and distribution in their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in Germany, France, and the U.S., or are purchased from third party vendors.

International. Our International segment includes operating entities located in Abu Dhabi, Argentina, Australia, Brazil, Colombia, Chile, China, Dubai, Egypt, Hong Kong, India, Indonesia, Japan, Malaysia, Peru, Singapore, South Africa, Thailand, and Zambia, some of which are in developing regions of the world. Principal International segment manufacturing operations are located in Australia, Brazil, China, and South Africa. These companies develop and manufacture products that are sold primarily in each company's home country and regional markets. The other companies in the International segment focus primarily on sales and distribution in

their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in the U.S., Germany, and France, or are purchased from third party vendors.

ACQUISITIONS

In December 2007, we acquired TecBOS GmbH of Halstenbek, Germany. TecBOS is a leading developer of software solutions for the fire service and other emergency planning organizations. We believe that this acquisition strengthens our presence in the European fire service and emergency responder market by adding complementary software solutions used for on-site management and reporting of major incidents such as fires, traffic accidents, industrial plant emergencies and public events.

In March 2007, we acquired Acceleron Technologies, LLC, a San Francisco-based developer of advanced technology suitable for personal locator devices. Acceleron has key patents and know-how in the area of compensated inertial navigation sensing as applied to personnel tracking. We believe that this technology is particularly well-suited for personal locator applications inside buildings where GPS is denied. The patented technology and know-how significantly increases data accuracy and minimizes the drift that can occur in conventional systems. We believe that the acquisition of this technology expedites the development of much needed and more reliable systems for use in first responder and soldier location applications.

In March 2007, we acquired the outstanding shares of MSA (India) Limited that were previously held by our joint venture partner. As a wholly-owned subsidiary under MSA management, we believe that we are better positioned to take advantage of opportunities in the large and growing Indian market.

RESULTS OF OPERATIONS

Year Ended December 31, 2009 Compared to Year Ended December 31, 2008

Net sales. Net sales for the year ended December 31, 2009 were \$910.0 million, a decrease of \$224.3 million, or 20%, from \$1,134.3 million for the year ended December 31, 2008.

	<u>2009</u>	<u>2008</u>	<u>Dollar</u> <u>Decrease</u>	<u>Percent</u> <u>Decrease</u>
	<i>(In millions)</i>			
North America	\$434.6	\$596.3	(\$161.7)	(27%)
Europe	238.5	280.6	(42.1)	(15)
International	236.9	257.4	(20.5)	(8)

Net sales of our North American segment were \$434.6 million for the year ended December 31, 2009, a decrease of \$161.7 million, or 27%, compared to \$596.3 million for the year ended December 31, 2008. Sales of Self-Contained Breathing Apparatus (SCBA) were \$58.0 million lower during the current year. SCBA sales during 2008 included \$54.1 million in shipments of our Firehawk® M7 Responder to the U.S. Air Force. Excluding these shipments, SCBA sales were \$3.9 million lower in the current year. Shipments of SCBA's to the fire service market were unusually high during the first quarter of 2008 due to an increase in orders that had been delayed in late 2007 as manufacturers and the fire service market made the transition to the new National Fire Protection Association (NFPA) standard for SCBAs. Fire service market sales of thermal imaging cameras and fire helmets were down \$5.5 million in the current year. Sales of Advanced Combat Helmets to the U.S. military and CG634 helmets to the Canadian Forces were \$34.9 million and \$13.0 million lower, respectively, reflecting the completion of certain contracts. Shipments of head protection and fall protection were down \$20.8 million and \$8.5 million, respectively, as the effects of the economic recession reduced demand in construction and industrial markets. Shipments of instruments were \$8.3 million lower in the current year, also due to lower demand in industrial markets.

Net sales of our European segment were \$238.5 million for the year ended December 31, 2009, a decrease of \$42.1 million, or 15%, from \$280.6 million for the year ended December 31, 2008. Local currency sales in

Europe decreased \$19.9 million, or 7%, for the year ended December 31, 2009. In France, local currency sales were \$4.9 million lower in the current year, reflecting a \$7.5 million decrease in shipments of ballistic vests and helmets to the military. This decrease was partially offset by a \$3.0 million increase in sales of disposable respirators, primarily in response to the swine flu epidemic. In Germany, local currency sales were \$12.0 million lower for the year ended December 31, 2009, reflecting a \$6.8 million decrease in shipments of gas masks, primarily to the military, and a \$2.7 million decrease in instrument shipments due to reduced demand in industrial markets. Local currency sales in Eastern Europe were down \$2.0 million for the year ended December 31, 2009. Unfavorable translation effects of weaker European currencies, particularly the euro, for the year ended December 31, 2009 decreased European segment sales, when stated in U.S. dollars, by approximately \$22.2 million.

Net sales of our International segment were \$236.9 million for the year ended December 31, 2009, a decrease of \$20.5 million, or 8%, compared to \$257.4 million for the year ended December 31, 2008. Local currency sales in the International segment decreased \$6.5 million, or 3%, during the year ended December 31, 2009. In China, local currency sales increased \$12.9 million, reflecting strong shipments of SCBAs and gas masks to the Hong Kong Fire Service, as well as a continued focus on growing our business in the region. Local currency sales in Australia and Latin America were down \$11.8 million and \$5.9 million, respectively, primarily due to the economic recession. Currency translation effects reduced International segment sales, when stated in U.S. dollars by \$14.0 million, primarily related to a weakening of the Australian dollar, South Africa rand, and Brazilian real.

Cost of products sold. Cost of products sold was \$573.3 million for the year ended December 31, 2009, a decrease of \$128.4 million, or 18%, from \$701.7 million for the year ended December 31, 2008.

Cost of products sold and operating expenses include net periodic pension benefit costs and credits. Pension credits, combined with pension costs, resulted in net pension credits for the year ended December 31, 2009 of \$9.1 million, of which credits of approximately \$5.7 million, \$1.7 million, and \$1.7 million were included in cost of products sold, selling, general and administrative expenses, and research and development expenses, respectively. Pension credits, combined with pension costs, resulted in net pension credits for the year ended December 31, 2008 of \$9.8 million, of which credits of approximately \$7.2 million, \$1.4 million and \$1.2 million were included in cost of products sold, selling, general and administrative expenses, and research and development expenses, respectively. Future net pension credits can be volatile depending on the future performance of plan assets, changes in actuarial assumptions regarding such factors as the selection of discount rates and rates of return on plan assets, changes in the amortization levels of actuarial gains and losses, plan amendments affecting benefit pay-out levels, and profile changes in the participant populations being valued. Changes in any of these factors could cause net pension credits to change. To the extent net pension credits decline in the future, our net income would be adversely affected.

Gross profit. Gross profit for the year ended December 31, 2009 was \$336.7 million, a decrease of \$95.9 million, or 22%, from \$432.6 million for the year ended December 31, 2008. The decrease reflects the previously discussed reduction in sales and a lower gross profit percentage. The unfavorable translation effects of weaker foreign currencies reduced gross profit, when stated in U.S. dollars, by \$15.1 million. The ratio of gross profit to sales was 37.0% in 2009 compared to 38.1% in 2008. The lower gross profit ratio in the current period occurred primarily in the European and International segments and related to sales mix, lower production volumes, and recessionary pricing pressures.

Selling, general and administrative expenses. Selling, general and administrative expenses for the year ended December 31, 2009 were \$230.9 million, a decrease of \$39.7 million, or 15%, from \$270.6 million for the year ended December 31, 2008. Selling, general and administrative expenses were 25.4% of sales in 2009 compared to 23.9% of sales in 2008. North American segment selling, general and administrative expenses were down \$18.2 million, or 17%. Local currency selling, general and administrative expenses in the European and International segments were down \$13.3 million, or 8%, during the year ended December 31, 2009. Lower selling, general and administrative expenses for the year were the direct result of cost-savings initiatives that we took in response to the effects of the economic recession. These initiatives included selective staffing reductions,

a salary and hiring freeze in the U.S. and Canada, a temporary suspension of company matching contributions to our 401k plan and temporary pay reductions for executives and senior level managers. Currency exchange effects reduced selling, general and administrative expenses, when stated in U.S. dollars, by \$8.2 million, primarily due to a weaker euro, Australian dollar and Brazilian real.

Research and development expenses. Research and development expenses were \$28.8 million for the year ended December 31, 2009, a decrease of \$6.2 million, or 18%, from \$35.0 million for the year ended December 31, 2008. The decrease reflects cost-savings realized by shifting a portion of our research and development efforts to our new China Technology center, as well as, various other cost reduction initiatives in North America and Europe. Currency exchange effects reduced research and development expense, when stated in U.S. dollars by \$0.6 million.

Restructuring and other charges. Restructuring and other charges were \$11.4 million for the year ended December 31, 2009, compared to \$3.9 million for the year ended December 31, 2008.

For the year ended December 31, 2009, North American segment charges of \$9.6 million were related primarily to a focused voluntary retirement incentive program (VRIP). During January 2009, 61 North American segment employees made irrevocable elections to retire under the terms of the VRIP. These employees retired on January 31, 2009. VRIP non-cash special termination benefits expense totaled \$6.7 million. We estimate that the staff reductions associated with the VRIP have resulted in pre-tax savings of approximately \$5.0 million. The remaining \$2.9 million of North American segment charges related to costs associated with layoffs and stay bonuses and other costs related to our ongoing initiative to transfer certain production activities. European and International segment charges of \$0.8 million and \$1.0 million, respectively, were primarily for severance costs related to staff reductions in Germany, Brazil, Australia and South Africa.

For the year ended December 31, 2008, North American segment charges of \$3.2 million were primarily stay bonuses and other costs associated with our Project Magellan initiative to outsource or transfer certain production activities from our Evans City, Pennsylvania plant. International segment charges of \$0.7 million were for severance costs related to staff reductions in Japan and India.

Interest expense. Interest expense for the year ended December 31, 2009 was \$7.1 million, a decrease of \$1.8 million, or 21%, from \$8.9 million for the year ended December 31, 2008. The decrease in interest expense was due to reductions in both short and long-term debt and lower short-term interest rates.

Currency exchange (gains) losses. During the year ended December 31, 2009, we recorded currency exchange gains of \$0.9 million compared to losses of \$6.9 million for the year ended December 31, 2008. Currency exchange losses during 2008 were primarily unrealized, and related mainly to the effects of a weaker Australian dollar and Mexican peso on inter-company balances and losses on Canadian dollar trade receivables.

Income tax provision. Our effective tax rate for the year ended December 31, 2009 was 33.7% compared to 37.4% for the year ended December 31, 2008. The provision for income taxes for the year ended December 31, 2009 includes tax benefits of \$0.6 million related to recognition of net operating losses in South Africa and \$0.6 million related to a state tax law change. The provision for income taxes for the year ended December 31, 2008 included charges in Germany totaling \$0.9 million related to a tax law change that imposed a 3% flat tax on previously untaxed subsidies and the settlement of a tax audit. Excluding these one-time items, the effective tax rate for the year ended December 31, 2009 was 35.5% compared to 36.6% for the year ended December 31, 2008.

Net income attributable to Mine Safety Appliances Company. Net income for the year ended December 31, 2009 was \$43.3 million, a decrease of \$27.1 million, or 39%, from net income for the year ended December 31, 2008 of \$70.4 million. Basic earnings per share of common stock was \$1.21 in 2009 compared to \$1.98 in 2008.

North American segment net income for the year ended December 31, 2009 was \$35.0 million, a decrease of \$17.4 million, or 33%, from \$52.4 million for the year ended December 31, 2008. North American segment

net income for the year ended December 31, 2009 includes a \$4.4 million after-tax non-cash charge related to the voluntary retirement incentive program that was completed in January and a \$2.1 million after-tax gain on the sale of 25 acres in our Cranberry Woods office park. Excluding these one-time items, North American segment net income was down \$15.1 million in the current year. The decrease reflects the negative effect of a 27% decrease in sales, partially offset by the positive effect of reduced operating expenses.

European segment net income for the year ended December 31, 2009 was \$0.1 million, a decrease of \$9.7 million, or 99%, from \$9.8 million for the year ended December 31, 2008. The decrease in European segment net income during the year ended December 31, 2009 was primarily due to the previously discussed decrease in sales and gross margins. Currency translation effects decreased current period European segment net income, when stated in U.S. dollars, by approximately \$1.1 million, largely due to the weakening of the euro.

International segment net income for the year ended December 31, 2009 was \$7.3 million, a decrease of \$4.5 million, or 38%, from \$11.8 million for the year ended December 31, 2008. The decrease in International segment net income was primarily related to the decrease in sales, partially offset by the previously discussed one-time tax benefit recorded in South Africa. Currency translation effects decreased current period International segment net income, when stated in U.S. dollars, by approximately \$2.1 million, largely due to the weakening of the Australian dollar and Brazilian real.

The loss of \$3.5 million reported in reconciling items for the year ended December 31, 2008 was primarily related to unrealized currency exchange losses.

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Net sales. Net sales for the year ended December 31, 2008 were \$1,134.3 million, an increase of \$144.0 million, or 15%, from \$990.3 million for the year ended December 31, 2007.

	<u>2008</u>	<u>2007</u>	<u>Dollar Increase</u>	<u>Percent Increase</u>
	<i>(In millions)</i>			
North America	\$596.3	\$515.1	\$81.2	16%
Europe	280.6	238.3	42.3	18
International	257.4	236.8	20.6	9

Net sales of our North American segment were \$596.3 million for the year ended December 31, 2008, an increase of \$81.2 million, or 16%, compared to \$515.1 million for the year ended December 31, 2007. Shipments of Self-Contained Breathing Apparatus (SCBA) improved \$68.8 million during the current year. Higher SCBA sales during 2008 included \$54.1 million in shipments of our Firehawk[®]M7 Responder to the U.S. Air Force. The remainder of the increase in SCBA sales was largely due to higher first quarter 2008 shipments on customer orders that had been delayed during the second half of 2007 as manufacturers and the fire service market made the transition to a new National Fire Protection Association (NFPA) standard for SCBAs. Higher sales of Advanced Combat Helmets to the U.S. Army and CG634 helmets to the Canadian Forces, up \$11.8 million and \$14.2 million, respectively, in 2008, were partially offset by a \$4.4 million decrease in shipments of other ballistic protection. Instrument sales were \$6.2 million higher in 2008, primarily due to strong shipments of our new Altair[®] multigas detectors to the oil and gas industry. Sales of head protection, primarily to the construction industry, improved \$3.3 million in 2008. Shipments of gas masks, Chemox breathing apparatus, and communication devices were down \$9.6 million, \$7.2 million, and \$4.2 million, respectively, reflecting the completion of certain U.S. and Canadian military orders.

Net sales of our European segment were \$280.6 million for the year ended December 31, 2008, an increase of \$42.3 million, or 18%, from \$238.3 million for the year ended December 31, 2007. Approximately half of the increase in European sales, when stated in U.S. dollars, was due to the favorable currency translation effects of the stronger euro. Higher local currency sales in Europe during 2008 reflect a \$13.6 million increase in shipments of ballistic helmets and vests to law enforcement agencies and the military in France. The remainder of the improvement in European segment sales was primarily due to stronger shipments of SCBAs in Germany and Eastern Europe.

Net sales of our International segment were \$257.4 million for the year ended December 31, 2008, an increase of \$20.6 million, or 9%, compared to \$236.8 million for the year ended December 31, 2007. The sales increase was primarily in Africa and Latin America, where local currency sales were up \$12.1 million and \$12.7 million, respectively. Higher sales in Africa and Latin America reflect our strategic focus on these markets, particularly with customers in the mining industry. International segment sales for the year ended December 31, 2007 benefited from a one-time \$4.8 million shipment of ballistic vests to the Iraq Joint Contracting Command. Currency translation effects on 2008 International segment sales, when stated in U.S. dollars, were not significant.

Cost of products sold. Cost of products sold was \$701.7 million for the year ended December 31, 2008, an increase of \$85.5 million, or 14%, from \$616.2 million for the year ended December 31, 2007.

Cost of products sold and operating expenses include net periodic pension benefit costs and credits. Pension credits, combined with pension costs, resulted in net pension credits for the year ended December 31, 2008 of \$9.8 million, of which credits of approximately \$7.2 million, \$1.4 million, and \$1.2 million were included in cost of products sold, selling, general and administrative expenses, and research and development expenses, respectively. Pension credits, combined with pension costs, resulted in net pension credits for the year ended December 31, 2007 of \$4.5 million, of which credits of approximately \$5.4 million and \$0.8 million were included in cost of products sold and research and development expenses, respectively, and charges of \$1.7 million in selling, general and administrative expenses.

Gross profit. Gross profit for the year ended December 31, 2008 was \$432.6 million, an increase of \$58.6 million, or 16%, from \$374.0 million for the year ended December 31, 2007. The ratio of gross profit to sales was 38.1% in 2008 compared to 37.8% in 2007.

Selling, general and administrative expenses. Selling, general and administrative expenses for the year ended December 31, 2008 were \$270.6 million, an increase of \$29.5 million, or 12%, from \$241.1 million for the year ended December 31, 2007. Selling, general and administrative expenses were 23.9% of sales in 2008 compared to 24.4% of sales in 2007. Local currency selling, general and administrative expenses in the European and International segments were up \$21.7 million during the year ended December 31, 2008, reflecting an increased focus on global initiatives and the higher selling and marketing expenses required to sustain our growth in these markets. North American segment selling, general and administrative expenses were up \$2.0 million, primarily due to the increased selling and marketing expenses required to support higher sales levels. Currency exchange effects increased selling, general and administrative expenses, when stated in U.S. dollars, by \$5.3 million, primarily due to the stronger euro.

Research and development expenses. Research and development expenses were \$35.0 million for the year ended December 31, 2008, an increase of \$4.8 million, or 16%, from \$30.2 million for the year ended December 31, 2007. The increase occurred in the United States and Germany as a result of our focus on developing innovative new products.

Depreciation and amortization expense. Depreciation and amortization expense, which is reported in cost of sales, selling, general and administrative expenses, and research and development expenses, was \$27.6 million for the year ended December 31, 2008, an increase of \$3.2 million, or 13%, from \$24.4 million for the year ended December 31, 2007. The increase was primarily related to depreciation on production and computer equipment and amortization of intangible assets in North America.

Restructuring and other charges. Restructuring and other charges were \$3.9 million for the year ended December 31, 2008, compared to \$4.1 million for the year ended December 31, 2007.

For the year ended December 31, 2008, North American segment charges of \$3.2 million were primarily stay bonuses and other costs associated with our Project Magellan initiative to outsource or transfer certain production activities from our Evans City, Pennsylvania plant. International segment charges of \$0.7 million were for severance costs related to staff reductions in Japan and India.

For the year ended December 31, 2007, North American segment charges of \$2.5 million were primarily severance costs and moving expenses associated with the transfer of fire helmet manufacturing from Clifton, New Jersey to Jacksonville, North Carolina and to move our Mexican manufacturing operations to Queretaro, Mexico. Charges of \$1.6 million were for severance costs associated with the reorganization of our management team and workforce reductions in the European and International segments.

Interest expense. Interest expense for the year ended December 31, 2008 was \$8.9 million, a decrease of \$1.0 million, or 10%, from \$9.9 million for the year ended December 31, 2007. The decrease was primarily due to lower short-term interest rates and a scheduled reduction in long-term debt.

Currency exchange adjustments. During the year ended December 31, 2008, we recorded currency exchange losses of \$6.9 million compared to gains of \$0.1 million for the year ended December 31, 2007. Currency exchange losses during 2008 were primarily unrealized, and related mainly to the effects of a weaker Australian dollar and Mexican peso on inter-company balances and losses on Canadian dollar trade receivables.

Other income. Other income for the year ended December 31, 2008 was \$5.2 million, a decrease of \$12.4 million, from \$17.6 million in 2007. Other income for the year ended December 31, 2007 included gains of \$10.6 million on the sale of 83 acres of land in our Cranberry Woods office park and \$1.9 million on the sale of property in Clifton, New Jersey.

Income tax provision. Our effective tax rate for the year ended December 31, 2008 was 37.4% compared to 36.3% for the year ended December 31, 2007. The higher effective tax rate in 2008 was primarily due to proportionately higher earnings in high tax jurisdictions.

Net income attributable to Mine Safety Appliances Company. Net income for the year ended December 31, 2008 was \$70.4 million, an increase of \$2.8 million, or 4%, from net income for the year ended December 31, 2007 of \$67.6 million. Net income for the year ended December 31, 2007 included after-tax gains totaling \$7.7 million on the sale of Cranberry Woods and Clifton, New Jersey property. Excluding these gains, net income increased \$10.5 million, or 18%. Basic earnings per share of common stock was \$1.98 in 2008 compared to \$1.89 in 2007.

North American segment net income for the year ended December 31, 2008 was \$52.4 million, an increase of \$2.4 million, or 5%, from \$50.0 million for the year ended December 31, 2007. North American segment net income for the year ended December 31, 2007 included the previously-discussed after-tax gain of \$7.7 million on the sales of Cranberry Woods and Clifton, New Jersey property. Excluding these gains, North American segment net income improved \$10.1 million, or 24%, primarily due to the previously-discussed increase in sales.

European segment net income for the year ended December 31, 2008 was \$9.8 million, an increase of \$2.2 million, or 28%, from \$7.6 million for the year ended December 31, 2007. The improvement reflects the previously-discussed increase in sales, partially offset by higher selling and research and development expenses.

International segment net income for the year ended December 31, 2008 was \$11.8 million, unchanged from \$11.8 million for the year ended December 31, 2007.

LIQUIDITY AND CAPITAL RESOURCES

Our main source of liquidity is operating cash flows, supplemented by borrowings to fund significant transactions. Our principal liquidity requirements are for working capital, capital expenditures, principal and interest payments on debt, and acquisitions. We believe that our financial strength has been evident during the recession and the early stages of recovery. Our long-term debt is primarily at fixed interest rates with manageable repayment schedules through 2022. During 2009, we increased our available credit. At December 31, 2009, we

had \$120.1 million in unused short-term bank lines of credit at competitive interest rates. All of our long-term borrowings and substantially all of our short-term borrowings originate in the U.S., which has limited our exposure to non-U.S. credit markets and to currency exchange rate fluctuations. During 2009, we pursued actions to improve our cash flow by reducing our working capital investment and controlling capital expenditures.

Cash and cash equivalents increased \$11.1 million during the year ended December 31, 2009 compared to decreasing \$24.1 million during 2008.

Operating activities provided cash of \$120.8 million in 2009, compared to providing cash of \$59.8 million in 2008. Significantly higher cash provided by operations in 2009 was primarily related to a \$91.9 million favorable change associated with working capital. This favorable change was partially offset by a \$30.8 million decrease in operating cash flow before changes in working capital, primarily due to the previously discussed decrease in sales and net income. Trade receivables were \$173.4 million at December 31, 2009 compared to \$198.6 million at December 31, 2008. LIFO inventories were \$123.9 million at December 31, 2009 compared to \$159.4 million at December 31, 2008. On a FIFO basis, inventories measured against cost of products sold turned 3.4 times in both 2009 and 2008. The \$25.2 million decrease in trade receivables reflects a \$33.1 million decrease in local currency receivables partially offset by a \$7.9 million increase due to currency translation effects. The \$35.5 million decrease in LIFO inventories reflects a \$47.1 million decrease in local currency inventories, partially offset by a \$11.6 million increase due to currency translation effects.

Our investing activities used cash of \$20.8 million in 2009, compared with using \$44.4 million in 2008. During 2009 and 2008, we used cash of \$25.7 million and \$44.5 million, respectively, for property additions. Higher capital spending in 2008 included costs associated with the construction of our new facility in Suzhou, China, as well as major building improvement projects in Brazil and Australia. Property disposals provided cash of \$5.1 million and \$2.2 million during 2009 and 2008, respectively. During 2009, we received cash of \$4.6 million on the sales of 25 acres of property in our Cranberry Woods office park. Acquisitions and other investing activities during 2009 and 2008 used cash of \$0.1 million and \$2.1 million, respectively. Cash used for acquisitions and other investing activities in 2008 was primarily for additional consideration related to the 2007 acquisition of Acceleron Technologies LLC.

Financing activities used cash of \$91.9 million in 2009 compared to using cash of \$36.6 million in 2008. The change was primarily related to borrowings on our short-term lines of credit. During the year ended December 31, 2009, we paid down \$45.1 million of short-term debt, compared to borrowing \$6.4 million in 2008. During 2009, we made dividend payments of \$34.5 million compared to \$33.7 million in 2008. Dividends paid on our common stock during 2009 (our 92nd consecutive year of dividend payment) were \$0.96 per share. Dividends paid on our common stock in 2008 and 2007 were \$0.94 and \$0.84, per share, respectively.

Long-term debt, including the current portion at December 31, 2009 was \$94.1 million, or 18% of total capital. For purposes of this calculation, total capital is defined as long-term debt plus the current portion of long-term debt and shareholders' equity.

Our long-term debt obligations at December 31, 2009 and 2008 were as follows:

	<u>2009</u>	<u>2008</u>
	<i>(In thousands)</i>	
Industrial development debt issues payable through 2022, 0.54%	\$ 6,000	\$ 6,750
Senior Notes payable through 2012, 8.39%	24,344	32,574
Senior Notes payable through 2021, 5.41%	60,000	60,000
Note payable through 2011, net of unamortized discount of \$230 and \$492 ...	<u>3,770</u>	<u>5,508</u>
Total	94,114	104,832
Amounts due within one year	<u>12,000</u>	<u>10,750</u>
Long-term debt	<u>82,114</u>	<u>94,082</u>

Approximate maturities of these obligations are \$12.0 million in 2010, \$9.8 million in 2011, \$8.3 million in 2012, \$6.7 million in 2013, \$6.7 million in 2014, and \$50.6 million thereafter. Some debt agreements require us to maintain certain financial ratios and minimum net worth and contain restrictions on the total amount of debt. We were in compliance with our debt covenants as of December 31, 2009.

We have short-term bank lines of credit totaling \$124.4 million of which \$120.1 million was unused at December 31, 2009. Generally, these short-term lines of credit are renewable annually. There are no significant commitment fees or compensating balance requirements. Short-term borrowings with banks, which exclude the current portion of long-term debt, were \$4.3 million and \$50.1 million at December 31, 2009 and 2008, respectively. The average month-end balance of total short-term borrowings during 2009 was \$34.1 million. The maximum month-end balance of \$49.9 million occurred at April 30, 2009. The weighted average interest rates of short-term borrowings at December 31, 2009 and 2008 were 3% and 4%, respectively.

We believe our sources of liquidity currently available from our cash reserves on hand, cash flow from operations, and borrowing capacity are sufficient to meet our principal liquidity requirements for at least the next 12 months.

CUMULATIVE TRANSLATION ADJUSTMENTS

The year-end position of the U.S. dollar relative to international currencies resulted in a translation gain of \$17.7 million being credited to the cumulative translation adjustments attributable to Mine Safety Appliances Company shareholders' equity account in the year ended December 31, 2009, compared to loss of \$23.2 million in 2008 and gain of \$16.5 million in 2007. The translation gain in 2009 reflects the strengthening of the euro, Brazilian real, South African rand, and Australian dollar. The translation loss in 2008 reflects the strengthening of the U.S. dollar against most currencies, but particularly the euro, Brazilian real, Australian dollar, and South African rand. The translation gains in 2007 were primarily related to the strengthening of the euro.

COMMITMENTS AND CONTINGENCIES

We are obligated to make future payments under various contracts, including debt and lease agreements. Our significant cash obligations as of December 31, 2009 were as follows:

	<u>Total</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>Thereafter</u>
	<i>(In millions)</i>						
Long-term debt*	\$ 94.1	\$12.0	\$ 9.8	\$ 8.3	\$6.7	\$6.7	\$50.6
Operating leases	<u>23.1</u>	<u>9.8</u>	<u>6.5</u>	<u>3.1</u>	<u>1.5</u>	<u>1.1</u>	<u>1.1</u>
Totals	117.2	21.8	16.3	11.4	8.2	7.8	51.7

* Future interest payments are not included in the table.

The significant obligations table does not include obligations to taxing authorities due to uncertainty surrounding the ultimate settlement of amounts and timing of these obligations.

We expect to make net contributions of \$3.9 million to our pension plans in 2010.

We have purchase commitments for materials, supplies, services, and property, plant and equipment as part of our ordinary conduct of business.

In 2006, we acquired Paraclete Armor and Equipment, Inc. Under the terms of the asset purchase agreement, we issued a \$10.0 million note payable to the former owners of Paraclete. The note is non-interest bearing and is payable in five annual installments of \$2.0 million beginning September 1, 2007. We recorded the note at a fair value of \$8.5 million at the time of issuance. The discount of \$1.5 million is being amortized over the term of the note.

During 2003, we sold our real property in Berlin, Germany for \$25.7 million, resulting in a gain of \$13.6 million. At the same time, we entered into an eight year agreement to lease back the portion of the property that we occupy. Under sale-leaseback accounting, \$12.1 million of the gain was deferred and is being amortized over the term of the lease.

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,500 lawsuits, primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 11,800 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes, and other relevant information. We evaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on results of operations or our financial condition.

In the normal course of business, we make payments to settle product liability claims and for related legal fees and record receivables for the amounts covered by insurance. Various factors could affect the timing and amount of recovery of insurance receivables, including: the outcome of negotiations with insurers, legal proceedings with respect to product liability insurance coverage, and the extent to which insurers may become insolvent in the future.

We are currently involved in coverage litigation with Century Indemnity Company (Century). We have sued Century in the Court of Common Pleas of Allegheny County, Pennsylvania, alleging that Century breached five insurance policies by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The Pennsylvania court has denied a motion by Century to stay or dismiss the Pennsylvania lawsuit. Our third motion for partial summary judgment was granted, confirming our position on the full multi-year policy limits. We expect the matter to be ready for trial in late 2010. We believe that Century's refusal to indemnify us under the policies for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with The North River Insurance Company (North River). On March 23, 2009, we sued North River in the United States District Court for the Western District of Pennsylvania, alleging that North River breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. The mediation was unsuccessful and the case will proceed to trial. We believe that North River's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with Columbia Casualty Company (CNA). On March 30, 2009, we sued CNA in the United States District Court for the Western District of Pennsylvania, alleging that CNA breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. If mediation is unsuccessful, the case will proceed to trial. We believe that CNA's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We regularly evaluate the collectibility of insurance receivables and record the amounts that we conclude are probable of collection based on our analysis of our various policies, pertinent case law interpreting comparable policies and our experience with similar claims. Receivables from insurance carriers totaled \$91.7 million at December 31, 2009, of which \$29.0 million is reported in other current assets and \$62.7 million in other non-current assets. Receivables from insurance carriers totaled \$60.6 million at December 31, 2008. Based upon our evaluation of applicable insurance coverage and our ongoing insurance recovery efforts, we believe that the recorded balances are fully recoverable.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles (GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosures. We evaluate these estimates and judgments on an on-going basis based on historical experience and various assumptions that we believe to be reasonable under the circumstances. However, different amounts could be reported if we had used different assumptions and in light of different facts and circumstances. Actual amounts could differ from the estimates and judgments reflected in our financial statements.

We believe that the following are the more critical judgments and estimates used in the preparation of our financial statements.

Accounting for contingencies. We accrue for contingencies when we believe that it is probable that a liability or loss has been incurred and the amount can be reasonably estimated. Contingencies relate to uncertainties that require our judgment both in assessing whether or not a liability or loss has been incurred and in estimating the amount of the probable loss. Significant contingencies affecting our financial statements include pending or threatened litigation, including product liability claims, and product warranties.

Product liability. We face an inherent business risk of exposure to product liability claims arising from the alleged failure of our products to prevent the types of personal injury or death against which they are designed to protect. We accrue for our estimates of the probable costs to be incurred in the resolution of product liability claims. These estimates are based on actuarial valuations, past experience, and our judgments regarding the probable outcome of pending and threatened claims. Due to uncertainty as to the ultimate outcome of pending and threatened claims, as well as the incidence of future claims, it is possible that future results could be materially affected by changes in our assumptions and estimates related to product liability matters, including our estimates of amounts receivable from insurance carriers. Our product liability expense averaged less than 1% of net sales during the three years ended December 31, 2009.

Product warranties. We accrue for the estimated probable cost of product warranties at the time that sales are recognized. Our estimates are principally based on historical experience. We also accrue for our estimates of the probable costs of corrective action when significant product quality issues are identified. These estimates are principally based on our assumptions regarding the cost of corrective action and the probable number of units to be repaired or replaced. Our product warranty obligation is affected by product failure rates, material usage, and service delivery costs incurred in correcting a product failure. Due to the uncertainty and potential volatility of these factors, it is possible that future results could be materially affected by changes in our assumptions or the effectiveness of our strategies related to these matters. Our product warranty expense averaged approximately 1% of net sales during the three years ended December 31, 2009.

Income taxes. We recognize deferred tax assets and liabilities using enacted tax rates for the effect of temporary differences between the book and tax basis of recorded assets and liabilities. We reduce deferred tax assets by valuation allowances if it is more likely than not that some portion of the deferred tax asset will not be realized.

We record valuation allowances to reduce deferred tax assets to the amounts that we estimate are probable to be realized. When assessing the need for valuation allowances, we consider projected future taxable income and prudent and feasible tax planning strategies. Should a change in circumstances lead to a change in our judgments about the realizability of deferred tax assets in future years, we would adjust the related valuation allowances in the period that the change in circumstances occurs, along with a corresponding charge or credit to income. We had valuation allowances of \$3.2 million and \$3.0 million at December 31, 2009 and 2008, respectively.

We record an estimated income tax liability based on our best judgment of the amounts likely to be paid in the various tax jurisdictions in which we operate. We record tax benefits related to uncertain tax positions taken or expected to be taken on a tax return when such benefits meet a more likely than not threshold. We recognize interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. The tax liabilities ultimately paid are dependent on a number of factors, including the resolution of tax audits, and may differ from the amounts recorded. Tax liabilities are adjusted through income when it becomes probable that the actual liability differs from the amount recorded.

Pensions and other postretirement benefits. We sponsor certain pension and other postretirement benefit plans. Accounting for the net periodic benefit costs and credits for these plans requires us to estimate the cost of benefits to be provided well into the future and to attribute these costs over the expected work life of the employees participating in these plans. These estimates require our judgment about discount rates used to determine these obligations, expected returns on plan assets, rates of future compensation increases, rates of increase in future health care costs, participant withdrawal and mortality rates, and participant retirement ages. Differences between our estimates and actual results may significantly affect the cost of our obligations under these plans and could cause net periodic benefit costs and credits to change materially from year-to-year. The discount rate assumptions used in determining projected benefit obligations are based on published long-term bond indices.

Goodwill. Each year we evaluate for goodwill impairment by comparing the fair value of each of our reporting units with its carrying value. If carrying value exceeds fair value, then a possible impairment of goodwill exists and requires further evaluation. We estimate the fair value of our reporting units using a combination of discounted cash flow analysis and market capitalization based on historical and projected financial information. We apply our best judgment in assessing the reasonableness of the financial projections and other estimates used to determine the fair value of each reporting unit.

RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING STANDARDS

In December 2007, the FASB issued a statement that requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest is to be included in consolidated net income on the face of the income statement. The statement also amended certain consolidation procedures and expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. The adoption of the new statement on January 1, 2009 is reflected in these financial statements and did not have a material effect on our consolidated results of operations or financial condition.

In March 2008, the FASB issued a statement that requires companies to provide disclosures about (a) how and why derivative instruments are used, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect the company's financial position, financial performance, and cash flows. We adopted the new statement on January 1, 2009. See note 15 for disclosures related to derivative instruments and hedging activities.

In April 2008, the FASB issued a staff position that amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The objective of this staff position is to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset. This staff position applies to all intangible assets, whether acquired in a business combination or otherwise, and is to be applied prospectively to intangible assets acquired on or after January 1, 2009. The adoption of this staff position did not have a material effect on our consolidated financial statements.

In April 2009, the FASB issued a staff position that requires disclosures about the fair value of financial instruments for interim reporting periods as well as in annual financial statements. We adopted this staff position for our second quarter 2009 interim reporting period. See note 18 for disclosures related to the fair value of financial instruments.

In May 2009, the FASB issued a statement that establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, the statement sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. Our adoption of the new statement on June 30, 2009 had no impact on the financial statements as management already followed a similar approach prior to the adoption of this standard. See note 21 for disclosures related to subsequent events and the subsequent events evaluation period.

In June 2009, the FASB issued a statement that establishes the FASB Accounting Standards Codification as the source of authoritative U.S. generally accepted accounting principles (U.S. GAAP). The Codification, which changes the referencing of financial standards, became effective for our third quarter 2009 financial statements. The Codification did not change or alter existing U.S. GAAP.

In December 2008, the FASB issued a staff position that provides guidance on an employer's disclosures about defined benefit pension or other postretirement plan assets, including investment policies and strategies, major categories of plan assets, inputs and valuation techniques used to measure the fair value of plan assets, and significant concentrations of risk within plan assets. This staff position is effective on December 31, 2009. The adoption of this staff position did not have a material effect on our consolidated financial statements. See note 11 for disclosures related to pension plan assets.

In June 2009, the FASB issued a statement that removes the concept of a qualifying special-purpose entity and clarifies the objective of determining whether a transferor and all of the entities included in the transferor's financial statements being presented have surrendered control over transferred financial assets. The new statement is effective January 1, 2010. We do not expect the adoption of this statement to have a material effect on our consolidated financial statements.

In June 2009, the FASB issued a statement that amends the consolidation guidance applicable to variable interest entities. We do not expect the adoption of the new statement, which is effective January 1, 2010, to have a material effect on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the risk of adverse changes in the value of a financial instrument caused by changes in currency exchange rates, interest rates, and equity prices. We are exposed to market risks related to currency exchange rates and interest rates.

Currency exchange rate sensitivity. We are subject to the effects of fluctuations in currency exchange rates on various transactions and on the translation of the reported financial position and operating results of our non-U.S. companies from local currencies to U.S. dollars. A hypothetical 10% strengthening or weakening of the U.S. dollar would increase or decrease our reported sales and net income for the year ended December 31, 2009 by approximately \$47.5 million and \$0.7 million, respectively.

When appropriate, we may attempt to limit our transactional exposure to changes in currency exchange rates through contracts or other actions intended to reduce existing exposures by creating offsetting currency exposures. At December 31, 2009, we had open foreign currency forward contracts with a U.S. dollar notional value of \$21.5 million. A hypothetical 10% increase in December 31, 2009 forward exchange rates would result in a \$1.0 million increase in the fair value of these contracts.

Interest rate sensitivity. We are exposed to changes in interest rates primarily as a result of borrowing and investing activities used to maintain liquidity and fund business operations. Because of the relatively short maturities of temporary investments and the variable rate nature of industrial development debt, these financial instruments are reported at carrying values which approximate fair values.

We have \$84.0 million of fixed rate debt which matures at various dates through 2021. The incremental increase in the fair value of fixed rate long-term debt resulting from a hypothetical 10% decrease in interest rates would be approximately \$1.4 million, excluding the impact of outstanding hedge instruments. However, our sensitivity to interest rate declines and the corresponding increase in the fair value of our debt portfolio would unfavorably affect earnings and cash flows only to the extent that we elected to repurchase or retire all or a portion of our fixed rate debt portfolio at prices above carrying values.

Item 8. Financial Statements and Supplementary Data

Management's Reports

Management's Report on Responsibility for Financial Reporting

Management of Mine Safety Appliances Company (the Company) is responsible for the preparation of the financial statements included in this annual report. The financial statements were prepared in accordance with accounting principles generally accepted in the United States of America and include amounts that are based on the best estimates and judgments of management. The other financial information contained in this annual report is consistent with the financial statements.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

The Company's internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2009. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework*. Based on our assessment and those criteria, management has concluded that the Company maintained effective internal control over financial reporting as of December 31, 2009.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2009 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Mine Safety Appliances Company:

In our opinion, the accompanying consolidated balance sheets and related consolidated statements of income, cash flows and changes in retained earnings and other comprehensive income present fairly, in all material respects, the financial position of Mine Safety Appliances Company and its subsidiaries (the "Company") at December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 8. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 7 to the consolidated financial statements, the Company changed the manner in which it accounts for uncertain tax positions in 2007.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

See notes to consolidated financial statements.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1—Significant Accounting Policies

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of Consolidation—The consolidated financial statements include the accounts of the company and all subsidiaries. Intercompany accounts and transactions are eliminated. Certain prior year amounts have been reclassified to conform with the current year presentation.

Noncontrolling Interests—Noncontrolling interests reflect noncontrolling shareholders' original investments in certain consolidated subsidiaries and their proportionate share of the income and accumulated other comprehensive income of those subsidiaries.

Currency Translation—The functional currency of all significant non-U.S. subsidiaries is the local currency. Assets and liabilities of these operations are translated at year-end exchange rates. Income statement accounts are translated using the average exchange rates for the reporting period. Translation adjustments for these companies are reported as a component of shareholders' equity and are not included in income. Foreign currency transaction gains and losses are included in net income for the reporting period.

Cash Equivalents—Cash equivalents include temporary deposits with financial institutions and highly liquid investments with original maturities of 90 days or less.

Inventories—Inventories are stated at the lower of cost or market. U.S. inventories are valued on the last-in, first-out (LIFO) cost method. Other inventories are valued on the average cost method or at standard costs which approximate actual costs.

Property and Depreciation—Property is recorded at cost. Depreciation is computed using straight-line and accelerated methods over the estimated useful lives of the assets, generally as follows: buildings 20 to 40 years and machinery and equipment 3 to 10 years. Expenditures for significant renewals and improvements are capitalized. Ordinary repairs and maintenance are expensed as incurred. Gains or losses on property dispositions are included in income and the cost and related depreciation are removed from the accounts.

Goodwill and Other Intangible Assets—Goodwill is not amortized, but is subject to impairment write-down tests. We test the goodwill of each of our reporting units for impairment at least annually. The annual goodwill impairment tests are performed as of September 30 each year. For this purpose, we consider our reportable business segments to be our reporting units. Fair value is estimated using discounted cash flow methodologies and market comparable information. Intangible assets are amortized on a straight-line basis over their useful lives.

Revenue Recognition—Revenue from the sale of products is recognized when title, ownership, and the risk of loss have transferred to the customer, which generally occurs either when product is shipped to the customer or, in the case of most U.S. distributor customers, when product is delivered to the customer's delivery site. We establish our shipping terms according to local practice and market characteristics. We do not ship product unless we have an order or other documentation authorizing shipment to our customers. We make appropriate provisions for uncollectible accounts receivable and product returns, both of which have historically been insignificant in relation to our net sales. Certain distributor customers receive price rebates based on their level of

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

purchases and other performance criteria that are documented in established distributor programs. These rebates are accrued as a reduction of net sales as they are earned by the customer.

Shipping and Handling—Shipping and handling expenses for products sold to customers are charged to cost of products sold as incurred. Amounts billed to customers for shipping and handling are included in net sales.

Product Warranties—Estimated expenses related to product warranties and additional service actions are charged to cost of products sold in the period in which the related revenue is recognized or when significant product quality issues are identified.

Research and Development—Research and development costs are expensed as incurred.

Income Taxes—Deferred income taxes are provided for temporary differences between financial and tax reporting. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized. We record tax benefits related to uncertain tax positions taken or expected to be taken on a tax return when such benefits meet a more likely than not threshold. We recognize interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. No provision is made for possible U.S. taxes on the undistributed earnings of foreign subsidiaries that are considered to be reinvested indefinitely.

Stock-Based Compensation—We account for stock-based compensation in accordance with the FASB statement on share-based payment, which requires that we recognize compensation expense for employee and non-employee director stock-based compensation based on the grant date fair value. Except for retirement-eligible participants, for whom there is no requisite service period, this expense is recognized ratably over the requisite service periods following the date of grant. For retirement-eligible participants, this expense is recognized at the grant date.

Derivative Instruments—We may use derivative instruments to minimize the effects of changes in currency exchange rates and to achieve a targeted mix of fixed and floating interest rates on outstanding debt. We do not enter into derivative transactions for speculative purposes and do not hold derivative instruments for trading purposes. Changes in the fair value of derivative instruments designated as fair value hedges are recorded in the balance sheet as adjustments to the underlying hedged asset or liability. Changes in the fair value of derivative instruments that do not qualify for hedge accounting treatment are recognized in the income statement in the current period.

Note 2—Restructuring and Other Charges

During the years ended December 31, 2009 and 2008, we recorded charges of \$11.4 million and \$3.9 million, respectively. These charges were primarily related to reorganization activities.

For the year ended December 31, 2009, North American segment charges of \$9.6 million were related primarily to a focused voluntary retirement incentive program (VRIP). During January 2009, 61 North American segment employees made irrevocable elections to retire under the terms of the VRIP. These employees retired on January 31, 2009. VRIP non-cash special termination benefits expense of \$6.7 million was recorded in January 2009. We expect that the staff reductions associated with the VRIP will result in annual pre-tax savings of approximately \$5.0 million. The remaining \$2.9 million of North American segment charges related to costs associated with layoffs and stay bonuses and other costs related to our ongoing initiative to transfer certain production activities. European and International segment charges of \$0.8 million and \$1.0 million, respectively, were primarily for severance costs related to staff reductions in Germany, Brazil, Australia and South Africa.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

For the year ended December 31, 2008, North American segment charges of \$3.2 million were primarily stay bonuses and other costs associated with our Project Magellan initiative to outsource or transfer certain production activities from our Evans City, Pennsylvania plant. International segment charges of \$0.7 million were for severance costs related to staff reductions in Japan and India.

Note 3—Inventories

	December 31	
	2009	2008
	<i>(In thousands)</i>	
Finished products	\$ 54,958	\$ 66,445
Work in process	13,640	29,224
Raw materials and supplies	55,346	63,759
Total LIFO inventories	123,944	159,428
Excess of FIFO costs over LIFO costs	44,860	45,747
Total FIFO inventories	168,804	205,175

Inventories stated on the LIFO basis represent 18% and 30% of the total inventories at December 31, 2009 and 2008, respectively.

Reductions in certain inventory quantities during the years ended December 31, 2009 and 2008 resulted in liquidations of LIFO inventories carried at lower costs prevailing in prior years. The effect of LIFO liquidations during 2009 reduced cost of sales by \$2.5 million and increased net income by \$1.6 million. The effect of LIFO liquidations during 2008 was not significant.

Note 4—Capital Stock

- Common stock, no par value—180,000,000 shares authorized.
- Second cumulative preferred voting stock, \$10 par value—1,000,000 shares authorized; none issued.
- 4½% cumulative preferred nonvoting stock, \$50 par value—100,000 shares authorized; 71,373 shares issued and 52,878 shares (\$1.8 million) held in treasury. There were treasury share purchases in 2008 of 37 shares for \$2 (share purchase dollars in thousands). There were no treasury share purchases in 2009 or 2007.

The Mine Safety Appliances Company Stock Compensation Trust was established to provide shares for certain benefit plans, including the management and non-employee directors' equity incentive plans. Shares held by the Stock Compensation Trust, and the corresponding cost of those shares, are reported as a reduction of common shares issued. Differences between the cost of the shares held by the Stock Compensation Trust and the market value of shares released for stock-related benefits are reflected in common stock issued.

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 5—Segment Information

We are organized into three geographic operating segments: North America, Europe, and International. Each segment is engaged in the manufacture and sale of safety equipment, including respiratory protective equipment, head protection, eye and face protection, hearing protection, fall protection, ballistic body armor, thermal imaging cameras, and monitoring instruments. Reportable segment information is presented in the following table:

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Reconciling items consist primarily of intercompany eliminations and items reported at the corporate level.

In 2009, we changed our method of allocating research and development expenses to each segment. Comparative 2008 and 2007 net income amounts have been revised to conform to the current year presentation. The effect of the revisions to net income for 2008 increased North American and European segment net income by \$0.5 million and \$2.5 million, respectively, and decreased International segment net income by \$3.0 million. The effect of the revisions to net income for 2007 increased North America and European segment net income by \$1.8 million and \$0.8 million, respectively, and decreased International segment net income by \$2.6 million.

Geographic information on sales to external customers, based on country of origin:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		<i>(In thousands)</i>	
United States	\$422,349	\$ 573,943	\$507,520
Germany	79,553	95,828	96,535

Total	<u>909,991</u>	<u>1,134,282</u>	<u>990,252</u>

In 2009, the North American segment reported sales to U.S. military customers of \$48.7 million, or 5% of consolidated sales.

Note 6—Earnings per Share

Basic earnings per share is computed on the weighted average number of common shares outstanding during the period. Diluted earnings per share assumes the exercise of stock options and the vesting of restricted stock and performance stock, provided in each case that the effect is dilutive.

Property, plant and equipment	(24,213)	(21,094)
Pension	(41,233)	(32,785)
Other	(2,649)	(1,149)
	(68,095)	(55,028)
Total deferred tax liabilities		
Net deferred taxes	(9,372)	(6,582)

At December 31, 2009, we had net operating loss carryforwards of approximately \$21.0 million, all in non-U.S. tax jurisdictions. Net operating loss carryforwards of approximately \$6.0 million will expire in 2013 and substantially all of the remainder may be carried forward indefinitely.

No deferred U.S. income taxes have been provided on undistributed earnings of non-U.S. subsidiaries, which amounted to \$195.9 million as of December 31, 2009. These earnings are considered to be reinvested for an indefinite period of time. It is not practicable to determine the deferred tax liability on these undistributed earnings.

On January 1, 2007, we adopted the FASB interpretation on accounting for uncertainty in income taxes. The application of income tax law is inherently complex. Tax statutes and regulations are often ambiguous and subject to various interpretations. As a result, we are required to evaluate all relevant facts and make subjective judgments regarding our tax positions.

Upon the adoption of the FASB interpretation on accounting for uncertainty in income taxes, we recognized a gross increase in the tax liability for unrecognized tax benefits of \$5.7 million. Prior to the adoption of this interpretation, we had recognized \$1.4 million in unrecognized tax benefits. The gross increase in the tax liability

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

upon the adoption of this interpretation created additional tax benefits of \$1.8 million, resulting in a net increase in the liability for unrecognized tax benefits of \$3.9 million, which was accounted for as a reduction in retained earnings at January 1, 2007. These adjustments, if recognized in the provision for income taxes, would have increased our effective income tax rate.

A reconciliation of the change in the tax liability for unrecognized tax benefits for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	<i>(In thousands)</i>		
Beginning balance	\$5,000	\$5,728	\$ 7,083
Additions for tax positions related to the current year	4,526	317	470
Additions (subtractions) for tax positions related to prior years ...	28	(211)	582
Statute expiration	(428)	(645)	—
Settlements	—	(189)	(2,407)
Ending balance	<u>9,126</u>	<u>5,000</u>	<u>5,728</u>

The total amount of unrecognized tax benefits, if recognized, would reduce our future effective tax rate. We have recognized tax benefits associated with these liabilities in the amount of \$7.4 million and \$3.5 million at December 31, 2009 and December 31, 2008 respectively.

We recognize interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. As a result of the adoption of the FASB interpretation on accounting for uncertainty in income taxes, we recognized a \$0.9 million increase in the liability for accrued interest and penalties related to uncertain tax positions, which were also accounted for as a reduction of retained earnings at January 1, 2007. In 2009, we accrued additional interest and penalties related to uncertain tax positions of \$0.3 million. As a result of settlements, we reversed \$0.2 million of accrued interest and penalties related to uncertain tax positions during 2008. Our liability for accrued interest and penalties related to uncertain tax positions was \$0.5 million at December 31, 2009.

We file a U.S. federal income tax return along with various state and foreign income tax returns. Examinations of our federal returns have been completed through 2005. Various state and foreign income tax returns may be subject to tax audits after 2004.

Note 8—Stock Plans

In May 2008, the shareholders approved the 2008 Management Equity Incentive Plan and the 2008 Non-Employee Directors' Equity Incentive Plan. These plans replaced the 1998 Management Share Incentive Plan and the 1990 Non-Employee Directors' Stock Option Plan. The 2008 Management Equity Incentive Plan provides for various forms of stock-based compensation for eligible key employees through May 2018. Management stock-based compensation includes stock options, restricted stock and, beginning in 2009, performance stock units. The 2008 Non-Employee Directors' Equity Incentive Plan provides for grants of stock options and restricted stock to non-employee directors through May 2018. Stock options are granted at market value option prices and expire after ten years, with limited instances of option prices in excess of market value and expiration after five years. Stock options are exercisable beginning three years after the grant date. Restricted stock is granted without payment to the company and generally vests three years after the grant date. Certain restricted stock for management retention vests in three equal tranches four, five, and six years after the grant

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

date. Unvested restricted stock for management retention is forfeited if the grantee's employment with the company terminates for any reason other than death or disability. Restricted stock is valued at the market value of the stock on the grant date. Performance stock units are valued at the market value of the stock on the grant date. The final number of shares to be issued for performance stock units may range from zero to 200% of the target award based on achieving a targeted return on net assets (RONA) over a three year performance period relative to a pre-determined peer group of companies. We issue Stock Compensation Trust shares or new shares for stock option exercises and restricted stock grants. As of December 31, 2009, there were 1,157,542 shares and 315,161 shares, respectively, reserved for future grants under the management and non-employee directors' equity incentive plans.

Stock-based compensation expense was as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	<i>(In thousands)</i>		
Restricted stock	\$3,027	\$2,791	\$2,691
Stock options	2,465	2,665	2,100
Performance stock	368	—	—
Total compensation expense before income taxes	5,860	5,456	4,791
Income tax benefit	2,084	1,896	1,711
Total compensation expense, net of income tax benefit	<u>3,776</u>	<u>3,560</u>	<u>3,080</u>

We did not capitalize any stock-based compensation expense in 2009, 2008, or 2007.

Stock option expense is based on the fair value of stock option grants estimated on the grant dates using the Black-Scholes option pricing model and the following weighted average assumptions for options granted in 2009, 2008, and 2007.

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Fair value per option	\$5.80	\$16.10	\$15.46
Risk-free interest rate	2.2%	3.3%	4.6%
Expected dividend yield	3.0%	1.9%	1.9%
Expected volatility	42%	40%	40%
Expected life (years)	6.1	6.1	6.0

The risk-free interest rate is based on the U.S. Treasury Constant Maturity rates as of the grant date converted into an implied spot rate yield curve. Expected dividend yield is based on the most recent annualized dividend divided by the one year average closing share price. Expected volatility is based on the ten year historical volatility using daily stock prices. Expected life is based on historical stock option exercise data.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A summary of option activity follows:

	Shares	Weighted Average Exercise Price	Exercisable at Year-end
Outstanding January 1, 2007	1,531,359	\$20.95	
Granted	199,292	40.32	
Exercised	(123,874)	17.22	
Forfeited	(44,372)	42.00	
Outstanding December 31, 2007	1,562,405	23.12	1,210,746
Granted	224,961	44.93	
Exercised	(80,927)	9.32	
Outstanding December 31, 2008	1,706,439	26.65	1,229,907
Granted	438,110	18.17	
Exercised	(25,566)	10.00	
Forfeited	(33,908)	30.16	
Outstanding December 31, 2009	2,085,075	25.01	1,323,549

For various exercise price ranges, characteristics of outstanding and exercisable stock options at December 31, 2009 were as follows:

Range of Exercise Prices	Stock Options Outstanding		
	Shares	Weighted-Average	
		Exercise Price	Remaining Life
\$ 7.07 – \$13.57	713,682	\$10.40	2.4 Years
\$17.83 – \$28.06	631,814	20.53	7.4
\$40.08 – \$50.25	739,579	42.95	6.1
\$ 7.07 – \$50.25	2,085,075	25.01	5.2

Range of Exercise Prices	Stock Options Exercisable		
	Shares	Weighted-Average	
		Exercise Price	Remaining Life
\$ 7.07 – \$13.57	713,682	\$10.40	2.4 Years
\$25.07 – \$28.06	210,997	25.20	4.0
\$40.08 – \$50.25	398,870	42.75	4.7
\$ 7.07 – \$50.25	1,323,549	22.51	3.3

The aggregate intrinsic value of stock options exercisable at December 31, 2009 was \$5.3 million. The aggregate intrinsic value of all stock options outstanding at December 31, 2009 was \$3.2 million.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A summary of restricted stock activity follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested at January 1, 2007	138,470	\$37.26
Granted	95,976	41.60
Vested	(51,113)	28.44
Unvested at December 31, 2007	183,333	42.00
Granted	71,900	44.68
Vested	(62,716)	43.35
Forfeited	(3,455)	42.26
Unvested at December 31, 2008	189,062	42.56
Granted	197,464	18.25
Vested	(39,319)	40.57
Forfeited	(9,001)	27.64
Unvested at December 31, 2009	338,206	28.99

A summary of performance stock unit activity follows:

	Shares	Weighted Average Grant Date Fair Value
Granted	64,780	\$17.83
Forfeited	(2,806)	17.83
Unvested at December 31, 2009	61,974	17.83

During the years ended December 31, 2009, 2008, and 2007, the total intrinsic value of stock options exercised (the difference between the market price on the date of exercise and the option price paid to exercise the option) was \$0.4 million, \$2.5 million, and \$3.8 million, respectively. The fair values of restricted stock vested during the years ended December 31, 2009, 2008, and 2007 were \$0.7 million, \$2.5 million, and \$2.1 million, respectively.

On December 31, 2009, there was \$6.9 million of unrecognized stock-based compensation expense. The weighted average period over which this expense is expected to be recognized was approximately two years.

Note 9—Long-Term Debt

	December 31	
	2009	2008
	<i>(In thousands)</i>	
Industrial development debt issues payable through 2022, 0.54%	\$ 6,000	\$ 6,750
Senior Notes payable through 2012, 8.39%	24,344	32,574
Senior Notes payable through 2021, 5.41%	60,000	60,000
Note payable through 2011, net of unamortized discount of \$230 and \$492	3,770	5,508
Total	94,114	104,832
Amounts due within one year	12,000	10,750
Long-term debt	82,114	94,082

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Approximate maturities of these obligations are \$12.0 million in 2010, \$9.8 million in 2011, \$8.3 million in 2012, \$6.7 million 2013, \$6.7 million in 2014, and \$50.6 million thereafter. Some debt agreements require us to maintain certain financial ratios and minimum net worth and contain restrictions on the total amount of debt. We were in compliance with our debt covenants as of December 31, 2009.

Note 10—Goodwill and Intangible Assets

Changes in goodwill and intangible assets, net of accumulated amortization, during the year ended December 31, 2009 were as follows:

	Goodwill	Intangibles
	<i>(In thousands)</i>	
Net balances at January 1, 2009	\$83,211	\$15,501
Goodwill and intangibles acquired	—	150
Amortization expense	—	(2,364)
Currency translation and other	1,516	256
Net balances at December 31, 2009	84,727	13,543

At December 31, 2009, goodwill of approximately \$63.5 million, \$17.5 million, and \$3.7 million related to the North American, European, and International operating segments, respectively.

Intangible assets include patents, license agreements, copyrights, and trademarks. These items are reported in other noncurrent assets. At December 31, 2009, intangible assets totaled \$13.5 million, net of accumulated amortization of \$14.4 million. Intangible asset amortization expense over the next five years is expected to be approximately \$2.0 million in 2010, \$1.9 million in 2011, \$0.9 million in 2012, \$0.8 million in 2013, and \$0.8 million in 2014.

Note 11—Pensions and Other Postretirement Benefits

We maintain various defined benefit and defined contribution plans covering the majority of our employees. Our principal U.S. plan is funded in compliance with the Employee Retirement Income Security Act (ERISA). It is our general policy to fund current costs for the international plans, except in Germany and Mexico, where it is common practice and permissible under tax laws to accrue book reserves.

We provide health care benefits and limited life insurance for certain retired employees who are covered by our principal U.S. defined benefit pension plan until they become Medicare-eligible.

MINE SAFETY APPLIANCES COMPANY

			Pension Benefits	Other Benefits
			2009	2008
Assumptions used to determine benefit obligations				
Discount rate			5.8%	6.2%
Rate of compensation increase			3.8%	3.7%
Assumptions used to determine net periodic benefit cost				
Discount rate			6.2%	6.0%
Expected return on plan assets			8.3%	8.4%
Rate of compensation increases			3.7%	4.4%

Discount rates were determined using various corporate bond indexes as indicators of interest rate levels and movements and by matching our projected benefit obligation payment stream to current yields on high quality bonds.

The expected return on assets for the 2009 net periodic pension cost was determined by multiplying the expected returns of each asset class (based on historical returns) by the expected percentage of the total portfolio invested in that asset class. A total return was determined by summing the expected returns over all asset classes.

Asset Category	Pension Plan Assets at December 31	
	2009	2008

Total	<u>100%</u>	<u>100%</u>

The overall objective of our pension investment strategy is to earn a rate of return over time to satisfy the benefit obligations of the pension plans and to maintain sufficient liquidity to pay benefits and meet other cash

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

requirements of our pension funds. Investment policies for our primary U.S. pension plan are determined by the plan's Investment Committee and set forth in the plan's investment policy. Asset managers are granted discretion for determining sector mix, selecting securities and timing transactions, subject to the guidelines of the investment policy. An aggressive, flexible management of the portfolio is permitted and encouraged, with shifts of emphasis among equities, fixed income securities, and cash equivalents at the discretion of each manager. No target asset allocations are set forth in the investment policy. For our non-U.S. pension plans, our investment objective is generally met through the use of pooled investment funds and insurance contracts.

The following table summarizes our pension plan assets measured at fair value on a recurring basis by fair value hierarchy level:

	December 31, 2009			
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value
	<i>(In thousands)</i>			
Equity securities	\$238,253	\$ —	\$ —	\$238,253
Fixed income securities	4,486	68,188	—	72,674
Pooled investment funds	—	15,991	—	15,991
Insurance contracts	—	—	9,878	9,878
Cash and cash equivalents	6,078	—	—	6,078
Total	248,817	84,179	9,878	342,874

Equity securities consist primarily of publicly traded U.S. and non-U.S. common stocks. Equities are valued at closing prices reported on the listing stock exchange.

Fixed income consists primarily of U.S. government and agency bonds and U.S. corporate bonds. Fixed income securities are valued at closing prices reported in active markets or based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flow approach that maximizes observable inputs, such as current yields of similar instruments, and may include adjustments, for certain risks that may not be observable, such as credit and liquidity risks.

Pooled investment funds consist of mutual and collective investment funds that invest primarily in publicly traded non-U.S. equity and fixed income securities. Pooled investment funds are valued at net asset values calculated by the fund manager based on fair value of the underlying securities. The underlying securities are generally valued at closing prices reported in active markets, quoted prices of similar securities, or discounted cash flows approach that maximizes observable inputs such as current value measurement at the reporting date.

Insurance contracts are valued in accordance with the terms of the applicable collective pension contract.

Cash equivalents consist primarily of money market and similar temporary investment funds. Cash equivalents are valued at closing prices reported in active markets.

The preceding methods may produce fair value measurements that are not indicative of net realizable value or reflective of future fair values. Although we believe the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table presents a reconciliation of Level 3 assets held during the year ended December 31, 2009.

	Insurance Contracts
Balance January 1, 2009	\$8,907
Net realized and unrealized gains included in earnings	376
Net purchases, issuances and settlements	595
Balance December 31, 2009	<u>9,878</u>

We expect to make net contributions of \$3.9 million to our pension plans in 2010.

For measurement purposes, a 9.5% increase in the costs of covered health care benefits was assumed for the year 2009, decreasing by 1.0% for each successive year to 4.5% in 2014 and thereafter. A one-percentage-point change in assumed health care cost trend rates would have increased or decreased the other postretirement benefit obligations and current year plan expense by approximately \$1.7 million and \$1.5million, respectively.

Expense for defined contribution pension plans was \$3.1 million in 2009, \$4.1 million in 2008, \$3.7 and million in 2007.

Estimated pension benefits to be paid under our defined benefit pension plans during the next five years are \$17.5 million in 2010, \$17.6 million in 2011, \$18.5 million in 2012, \$19.1 million in 2013, \$19.0 million in 2014 and are expected to aggregate \$104.5 million for the five years thereafter. Estimated other postretirement benefits to be paid during the next five years are \$2.6 million in 2010, \$2.7 million in 2011, \$2.6 million in 2012, \$2.7 million in 2013, \$2.7 million in 2014 and are expected to aggregate \$13.8 million for the five years thereafter.

Note 12—Other Income

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	<i>(In thousands)</i>		
Interest income	\$1,489	\$2,450	\$ 4,246
Gain on asset dispositions, net	4,919	2,157	13,973
Other, net	(548)	558	(570)
Total	<u>5,860</u>	<u>5,165</u>	<u>17,649</u>

Gain on asset dispositions in 2009 and 2007 includes gains on the sale of property in our Cranberry Woods office park of \$3.4 million and \$10.6 million, respectively.

Note 13—Leases

We lease office space, manufacturing and warehouse facilities, automobiles, and other equipment under operating lease arrangements. Rent expense was \$12.6 million in 2009, \$12.9 million in 2008, and \$12.6 million in 2007. Minimum rent commitments under noncancelable leases are \$9.8 million in 2010, \$6.5 million in 2011, \$3.1 million in 2012, \$1.5 million in 2013, \$1.1 million in 2014, and \$1.1 million thereafter.

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 14—Short-Term Debt

Short-term bank lines of credit amounted to \$124.4 million, of which \$120.1 million was unused at December 31, 2009. Generally, these short-term lines of credit are renewable annually. There are no significant commitment fees or compensating balance requirements. Short-term borrowings with banks, which exclude the current portion of long-term debt, were \$4.3 million and \$50.1 million at December 31, 2009 and 2008, respectively. The average month-end balance of total short-term borrowings during 2009 was \$34.1 million. The maximum month-end balance of \$49.9 million occurred at April 30, 2009. The weighted average interest rates on short-term borrowings at December 31, 2009 and 2008 were 3% and 4%, respectively.

Note 15—Derivative Financial Instruments

In 2004, we entered into an eight year interest rate swap agreement, which was designated as a fair value hedge of a portion of our fixed rate 8.39% Senior Notes. Under the terms of the swap agreement, we received a fixed interest rate of 8.39% and paid a floating interest rate based on LIBOR. At December 31, 2008, the notional amount of the swap was \$16.0 million and the fair value was recorded as an asset of \$0.6 million that was included in other noncurrent assets, with an offsetting increase in the carrying value of long-term debt.

On January 15, 2009, we terminated the interest rate swap agreement and received a termination payment of \$0.6 million, which represented the fair value of the swap on that date. That value was recorded as an increase in the carrying value of long-term debt and is being recognized as a reduction of interest expense over the original term of the interest rate swap agreement.

As part of our currency exchange rate risk management strategy, we enter into certain derivative foreign currency forward contracts that do not meet the GAAP criteria for hedge accounting, but which have the impact of partially offsetting certain foreign currency exposures. We account for these forward contracts on a full mark-to-market basis and report the related gains or losses in currency exchange losses (gains). At December 31, 2009, the notional amount of open forward contracts was \$21.5 million and the unrealized loss on these contracts was \$0.3 million. All open forward contracts will mature during the first quarter of 2010.

The following table presents the balance sheet location and fair value of assets and liabilities associated with derivative financial instruments.

	Balance Sheet Location	Asset Derivatives		Liability Derivatives	
		Fair Value at December 31, 2009	Fair Value at December 31, 2008	Fair Value at December 31, 2009	Fair Value at December 31, 2008
Derivatives designated as hedging instruments:

Derivatives not designated as hedging instruments:			
Foreign currency forward contracts	Currency exchange losses (gains)	3,504	(1,969)
Totals		3,504	(2,006)

Note 16—Acquisitions

In December 2007, we acquired TecBOS GmbH of Halstenbek, Germany, a leading developer of software solutions for the fire service and other emergency planning organizations. A purchase price of \$0.7 million was paid in cash to the previous owners. We allocated \$0.5 million of the purchase price to intangible assets.

In March 2007, we acquired Acceleron Technologies, LLC, a San Francisco-based developer of advanced technology suitable for personal locator devices. We believe that the acquisition of this technology significantly expedites the development of reliable systems for first responder and soldier location applications. The initial purchase price of \$5.7 million included amounts paid to the previous owners and other direct costs associated with the acquisition. In accordance with the terms of the acquisition agreement, additional cash consideration of \$1.9 million was paid to the former owners of Acceleron based on the achievement of specific technology development milestones during 2008. We have no further obligations to the former owners of Acceleron. The total acquisition price of \$7.6 million was allocated to intangible assets.

In March 2007, we acquired the outstanding shares of MSA (India) Limited that were previously held by our joint venture partner. As a wholly-owned subsidiary under MSA management, we believe that we are better positioned to take advantage of opportunities in the large and growing Indian market. We allocated \$0.6 million of the \$1.1 million purchase price to goodwill.

The operating results of all acquisitions have been included in our consolidated financial statements from their respective acquisition dates. Pro forma consolidated results, as if the acquisitions had occurred at the beginning of 2007, would not be materially different from the results reported.

Note 17—Fair Value Measurements

On January 1, 2008, we adopted the FASB statement on fair value measurements, as it relates to financial assets and liabilities that are remeasured and reported at least annually. On January 1, 2009, we adopted the FASB statement on fair value measurements as it relates to nonfinancial assets and liabilities that are recognized and disclosed at fair value in the financial statements on a nonrecurring basis.

The FASB statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Our adoption of this statement, as it relates to financial and nonfinancial assets and liabilities, had no impact on consolidated results of operations, financial condition or liquidity.

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The FASB statement defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This standard is now the single source under generally accepted accounting principles for the definition of fair value, except for the fair value of leased property. The FASB statement establishes a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are:

- Level 1—Unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.
- Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3—Inputs that are both significant to the fair value measurement and unobservable.

The valuation methodologies we used to measure financial assets and liabilities within the scope of the FASB statement were limited to the pension plan assets described in Note 11 and the derivative financial instruments described in Note 15. See Note 11 for the fair value hierarchy classification of pension plan assets. We estimate the fair value of the derivative financial instruments, consisting of an interest rate swap and foreign currency forward contracts, based upon valuation models with inputs that generally can be verified by observable market conditions and do not involve significant management judgment. Accordingly, the fair values of the derivative financial instruments are classified within Level 2 of the fair value hierarchy.

Note 18—Fair Value of Financial Instruments

With the exception of fixed rate long-term debt, we believe that the reported carrying amounts of our financial assets and liabilities approximate their fair values. At December 31, 2009, the reported carrying amount of our fixed rate long-term debt was \$84.0 million and the fair value was \$84.6 million. The fair value of our long-term debt was determined using cash flow valuation models to estimate the market value of similar transactions as of December 31, 2009.

Note 19—Contingencies

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,500 lawsuits, primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 11,800 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes, and other relevant information. We evaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our results of operations or financial condition.

In the normal course of business, we make payments to settle product liability claims and for related legal fees and record receivables for the amounts covered by insurance. Various factors could affect the timing and amount of recovery of insurance receivables, including: the outcome of negotiations with insurers, legal proceedings with respect to product liability insurance coverage, and the extent to which insurers may become insolvent in the future.

We are currently involved in coverage litigation with Century Indemnity Company (Century). We have sued Century in the Court of Common Pleas of Allegheny County, Pennsylvania, alleging that Century breached five insurance policies by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The Pennsylvania court has denied a motion by Century to stay or dismiss the Pennsylvania lawsuit. Our third motion for partial summary judgment was granted, confirming our position on the full multi-year policy limits. We expect the matter to be ready for trial in late 2010. We believe that Century's refusal to indemnify us under the policies for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with The North River Insurance Company (North River). On March 23, 2009, we sued North River in the United States District Court for the Western District of Pennsylvania, alleging that North River breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. The mediation was unsuccessful and the case will proceed to trial. We believe that North River's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We are currently involved in coverage litigation with Columbia Casualty Company (CNA). On March 30, 2009, we sued CNA in the United States District Court for the Western District of Pennsylvania, alleging that CNA breached one insurance policy by failing to pay amounts owing to us and that its refusal to pay constitutes bad faith. The case was assigned to the Court's mandatory Alternative Dispute Resolution program, in an attempt to resolve the dispute. If mediation is unsuccessful, the case will proceed to trial. We believe that CNA's refusal to indemnify us under the policy for settlements and legal fees paid by us is wholly contrary to Pennsylvania law and we are vigorously pursuing the legal actions necessary to collect all amounts.

We regularly evaluate the collectibility of insurance receivables and record the amounts that we conclude are probable of collection based on our analysis of our various policies, pertinent case law interpreting comparable policies and our experience with similar claims. Receivables from insurance carriers totaled \$91.7 million at December 31, 2009, of which \$29.0 million is reported in other current assets and \$62.7 million in other non-current assets. Receivables from insurance carriers totaled \$60.6 million at December 31, 2008. Based upon our evaluation of applicable insurance coverage and our ongoing insurance recovery efforts, we believe that the recorded balances are fully recoverable.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 20—Recently Adopted and Recently Issued Accounting Standards

In December 2007, the FASB issued a statement that requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest is to be included in consolidated net income on the face of the income statement. The statement also amended certain consolidation procedures and expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. The adoption of the new statement on January 1, 2009 is reflected in these financial statements and did not have a material effect on our consolidated results of operations or financial condition.

In March 2008, the FASB issued a statement that requires companies to provide disclosures about (a) how and why derivative instruments are used, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect the company's financial position, financial performance, and cash flows. We adopted the new statement on January 1, 2009. See note 15 for disclosures related to derivative instruments and hedging activities.

In April 2008, the FASB issued a staff position that amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The objective of this staff position is to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset. This staff position applies to all intangible assets, whether acquired in a business combination or otherwise, and is to be applied prospectively to intangible assets acquired on or after January 1, 2009. The adoption of this staff position did not have a material effect on our consolidated financial statements.

In April 2009, the FASB issued a staff position that requires disclosures about the fair value of financial instruments for interim reporting periods as well as in annual financial statements. We adopted this staff position for our second quarter 2009 interim reporting period. See note 18 for disclosures related to the fair value of financial instruments.

In May 2009, the FASB issued a statement that establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, the statement sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. Our adoption of the new statement on June 30, 2009 had no impact on the financial statements as management already followed a similar approach prior to the adoption of this standard. See note 21 for disclosures related to subsequent events and the subsequent events evaluation period.

In June 2009, the FASB issued a statement that establishes the FASB Accounting Standards Codification as the source of authoritative U.S. generally accepted accounting principles (U.S. GAAP). The Codification, which changes the referencing of financial standards, became effective for our third quarter 2009 financial statements. The Codification did not change or alter existing U.S. GAAP.

In December 2008, the FASB issued a staff position that provides guidance on an employer's disclosures about defined benefit pension or other postretirement plan assets, including investment policies and strategies, major categories of plan assets, inputs and valuation techniques used to measure the fair value of plan assets, and significant concentrations of risk within plan assets. This staff position is effective on December 31, 2009. The adoption of this staff position did not have a material effect on our consolidated financial statements. See note 11 for disclosures related to pension plan assets.

MINE SAFETY APPLIANCES COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In June 2009, the FASB issued a statement that removes the concept of a qualifying special-purpose entity and clarifies the objective of determining whether a transferor and all of the entities included in the transferor's financial statements being presented have surrendered control over transferred financial assets. The new statement is effective January 1, 2010. We do not expect the adoption of this statement to have a material effect on our consolidated financial statements.

In June 2009, the FASB issued a statement that amends the consolidation guidance applicable to variable interest entities. We do not expect the adoption of the new statement, which is effective January 1, 2010, to have a material effect on our consolidated financial statements.

Note 21—Subsequent Events

In January 2010, we announced a Voluntary Retirement Incentive Program (VRIP) for 52 eligible employees of our German operations. The decision period for these employees to elect to retire under the terms of the VRIP ends on March 31, 2010, at which time their elections become irrevocable. We are currently unable to estimate the VRIP termination benefit expense because the decision period is still open. If all 52 eligible employees elected to retire under the terms of the VRIP, we estimate that the pre-tax termination benefit expense would be approximately \$6.5 million. Actual termination benefit expense will be recognized in the first quarter of 2010 when employee elections become irrevocable. If all 52 eligible employees elected to retire, we estimate that the VRIP would result in annual pre-tax savings of approximately \$3.2 million.

Management has evaluated subsequent events and has concluded that all events that would require recognition or disclosure are appropriately reflected in the financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures.* Based on their evaluation as of the end of the period covered by this Form 10-K, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) *Changes in internal control.* There were no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

See Item 8. Financial Statements and Supplementary Data—"Management's Report on Internal Control Over Financial Reporting" and "Report of Independent Registered Public Accounting Firm."

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Item 11. Executive Compensation

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Item 13. Certain Relationships and Related Transactions, and Director Independence

Item 14. Principal Accountant Fees and Services

Incorporated by reference herein pursuant to Rule 12b—23 are (1) “Election of Directors,” (2) “Executive Compensation,” (3) “Other Information Concerning the Board of Directors,” (4) “Stock Ownership,” and (5) “Selection of Independent Registered Public Accounting Firm,” appearing in the Proxy Statement filed pursuant to Regulation 14A in connection with the registrant’s Annual Meeting of Shareholders to be held on May 11, 2010. The information appearing in such Proxy Statement under the caption “Audit Committee Report” and the other information appearing in such Proxy Statement and not specifically incorporated by reference herein is not incorporated herein. As to Item 10 above, also see the information reported in Part I of this Form 10-K, under the caption “Executive Officers of the Registrant,” which is incorporated herein by reference. As to Item 10 above, the Company has adopted a Code of Ethics applicable to its principal executive officer, principal financial officer and principal accounting officer and other Company officials. The text of the Code of Ethics is available on the Company’s website at www.MSANet.com. Any amendment to, or waiver of, a required provision of the Code of Ethics that applies to the Company’s principal executive, financial or accounting officer will also be posted on the Company’s Internet site at that address.

As to Item 12 above, the following table sets forth information as of December 31, 2009 concerning common stock issuable under the Company’s equity compensation plans.

<u>Plan Category</u>	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)</u>	<u>Weighted average exercise price of outstanding options, warrants and rights (b)</u>	<u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)</u>
Equity compensation plans approved by security holders	2,085,075	\$25.01	1,472,703*
Equity compensation plans not approved by security holders	None	—	None
Total	2,085,075	\$25.01	1,472,703

* Includes 1,157,542 shares available for issuance under the 2008 Management Equity Incentive Plan and 315,161 shares available for issuance under the 2008 Non-Employee Directors’ Equity Incentive Plan.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) 1. Financial Statements and Report of Independent Registered Public Accounting Firm (see Part II, Item 8 of this Form 10-K).

The following information is filed as part of this Form 10-K.

	<u>Page</u>
Management's Report on Responsibility for Financial Reporting and Management's Report on Internal Control Over Financial Reporting	33
Report of Independent Registered Public Accounting Firm	34
Consolidated Statement of Income—three years ended December 31, 2009	35
Consolidated Balance Sheet—December 31, 2009 and 2008	36
Consolidated Statement of Cash Flows—three years ended December 31, 2009	37

Pittsburgh, Pennsylvania
February 26, 2010

CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO RULE 13a-14(a)

I, William M. Lambert, certify that:

1. I have reviewed this annual report on Form 10-K of Mine Safety Appliances Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
