TASTYKAKE®

2009 ANNUAL REPORT

DEAR FELLOW SHAREHOLDERS,

In 2009, Tasty Baking Company achieved several important milestones while navigating a complex economic environment. Although the economy continued to pose challenges, the Company remained committed to meeting the day-to-day needs of the business while aggressively executing upon its strategic manufacturing initiatives.

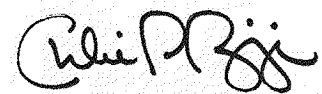

Due to sustained growth in core markets and increased distribution in new ones, notably New York City and North Carolina, Tasty Baking Company realized net sales growth of 3.8% and increased overall volumes by 2.2% in fiscal year 2009 versus the prior year. While these increases are positive given the struggling economy, they are also noteworthy as the Company has now closed on seven consecutive quarters of net sales growth. Even so, we must continue to aggressively find innovative ways to leverage our new and expanded facilities to grow sales and increase profit.

2009 was marked by significant progress toward the opening of our new bakery and distribution center at the Philadelphia Navy Yard. The commissioning of the Navy Yard Bakery continues to be ahead of schedule and on-budget. The first production line shifted to the new facility in October 2009 and by the end of 2009, three lines had been successfully transitioned from our Hunting Park facility, where we have been baking since 1922. Our corporate headquarters also successfully moved in April 2009 into a modern, LEED® (Leadership in Energy and Environmental Design) Gold certified building at The Navy Yard Corporate Center.

As we look ahead, we expect Spring 2010 will mark the full operational transition of Tasty Baking Company to our new manufacturing and distribution facility. The completion of this transformational project is empowering as we can seize immense opportunities for product and packaging efficiencies and innovative new products. We expect this state-of-the-art LEED-registered Bakery will not only provide us with flexible, modern capabilities, but also with an annual pre-tax cash savings of between \$13 and \$15 million, net of facility leases but before debt service. Most importantly, the opening of the new Tastykake Bakery reaffirms our core commitment to providing consumers with the freshest, most delicious baked snacks.

I am confident that the steps taken to implement and execute our strategic plan will position Tasty Baking Company for success - now and in the future.

I am grateful for the leadership of our Board of Directors, the initiative of our management team and finally, the commitment of our entire Tasty Baking Company family. As we fully shift our baking and distribution operations to the Philadelphia Navy Yard in 2010, I anticipate and look forward to our continued and shared success.

Charles P. Pizzi
President and Chief Executive Officer

“We must continue to aggressively find innovative ways to leverage our new and expanded facilities to grow sales and increase profit.”

A MESSAGE FROM THE CHAIRMAN

During 2009, Tasty Baking Company continued to execute its strategic transformation plan. Although faced with an uncertain and volatile economy, the Company achieved volume and net sales growth. The Company also continued to successfully manage the construction of its new bakery and distribution facility at the Philadelphia Navy Yard.

Despite the ongoing challenges of the economy and increased commodity prices, Tasty Baking Company is poised to successfully complete the most important capital project in its history, ahead of schedule and within budget. As the operational transition to the new bakery and distribution center is completed in 2010, the Company is focused on leveraging the new facility to grow sales and market share.

On behalf of the Board of Directors, I would like to report that we remain pleased with the performance of the Company and I want to express our confidence in the leadership of Charlie Pizzi and the management team.

As the Company moves into 2010, the Board will support the strategy of a relentless focus upon sales growth, operational efficiencies and mitigation of cost pressures. Although the past year presented many challenges, the Company was well-prepared to meet the evolving conditions and remain competitive in the marketplace.

The completion and full operation of the new bakery will be a defining moment for Tasty Baking Company. This event will begin a new chapter for the Company - a chapter that we believe will be marked by continued growth, product innovation and an invitation to consumers to re-engage and celebrate the Company's iconic brand. As the Company approaches nearly a century of baking, the opening of this new facility lays the groundwork for another year - and another century - of success.

The Company continues to benefit from a dedicated Board of Directors, all of whom bring a diversity of experience, viewpoints and opinions to our Board that allow us to anticipate changing business needs. As always, I am grateful for their collaboration and I look forward to working with both them and the management team as we help to guide Tasty Baking Company into an exciting future for the benefit of all, particularly our shareholders.

James E. Ksanskak
Chairman

“As the Company moves into 2010, the Board will support the strategy of a relentless focus upon sales growth, operational efficiencies and mitigation of cost pressures.”

'09 FINANCIAL HIGHLIGHTS

In fiscal 2009, Tasty Baking Company grew net sales 3.8% compared to the prior year and outpaced the category in both sales unit and dollar volume growth for its Route territories. The Company reported a Net Loss of \$3.4 million, which included on an after-tax basis: \$5.2 million in accelerated depreciation related to the Company's move from its Hunting Park facility to the Philadelphia Navy Yard; approximately \$1.4 million in straight-line rental expense, of which approximately \$1.3 million was non-cash, related to both the Company's new manufacturing facility and corporate headquarters at the Philadelphia Navy Yard; and \$0.8 million in non-cash costs related to spare parts that are not expected to be utilized at the new manufacturing facility. In addition, the Company recorded \$2.1 million dollars in after-tax income related to a change in the Company's post retirement life insurance plan.

In 2009, the Company made significant progress towards transitioning to its new manufacturing facility at the Philadelphia Navy Yard, which is intended to replace the Company's aged facility at Hunting Park Avenue. As of December 26, 2009, the Company had transitioned three of seven production lines to the new facility: the pie line, the cookie bar line, and one of the cupcake lines. The Company anticipates completing the transition of the remaining production lines in Spring 2010, which is ahead of the original schedule.

Management is committed to improving long-term shareholder value by identifying ways to grow the business profitably through a combination of top-line performance, increased brand support, product innovation, and continuous improvement of operating efficiencies. The successful completion of the transition into the new manufacturing facility is a key element of this strategy. Once fully optimized, the new facility at the Philadelphia Navy Yard is expected to generate between \$13 and \$15 million in annual pre-tax cash savings, net of facility leases but before debt service. These funds will provide the Company with an opportunity to make meaningful investments back into the business to help ensure its long-term success.

FOR THE YEAR

(Dollars in thousands, except per share amounts.)

	2009	2008	2007	2006
Gross sales	\$ 303,105	\$ 281,175	\$ 272,276	\$ 267,911
Net sales	\$ 180,562	\$ 173,966	\$ 169,918	\$ 167,715
Gross profit ^(a)	\$ 47,347	\$ 41,889	\$ 51,620	\$ 57,654
Net income / (loss) ^(b)	\$ (3,389)	\$ (6,806)	\$ 2,128	\$ 4,196
Shares of common stock outstanding ^(c)	8,072	8,034	8,154	8,236
Per share of common stock:				
Net income / (loss), diluted ^(d)	\$ (0.43)	\$ (0.85)	\$ 0.26	\$ 0.51
Cash dividend per share	\$ 0.20	\$ 0.20	\$ 0.20	\$ 0.20
Total assets	\$ 189,470	\$ 159,197	\$ 124,521	\$ 112,291
Shareholders' equity	\$ 27,784	\$ 32,967	\$ 47,436	\$ 48,269

(a) Fiscal years 2007-2009 included incremental depreciation due to a change in the useful lives of assets at the Company's Hunting Park bakery related to the move into the new manufacturing facility at the Philadelphia Navy Yard. The incremental depreciation was: \$8.4 million in fiscal 2009; \$5.2 million in fiscal 2008; and \$3.3 million in fiscal 2007. Fiscal 2009 included a \$3.7 million benefit related to a change in the Company's postretirement life insurance plan. Approximately \$2.2 million of the benefit was recorded in cost of sales with the remainder classified in selling, general, and administrative expenses.

Fiscal 2008 included a \$12.6 million pension corridor charge and a \$7.8 million benefit related to a change in the Company's retiree medical plan. Approximately \$7.6 million of the pension corridor charge and \$4.7 million of the retiree medical plan benefit were recorded in cost of sales. The remainder of the pension corridor charge and retiree medical plan benefit were classified in selling, general, and administrative expenses.

(b) Fiscal 2009 impacted by: \$5.2 million, after-tax, in accelerated depreciation expense related to the Company's move from its Hunting Park facility into the Philadelphia Navy Yard; \$0.8 million, after-tax, in non-cash costs related to spare parts that are not expected to be

utilized at the new manufacturing facility; and \$2.1 million, after-tax, in income related to the termination of the Company's postretirement life insurance plan.

Fiscal 2008 impacted by: \$3.2 million, after-tax, in accelerated depreciation expense related to the Company's move from its Hunting Park facility into the Philadelphia Navy Yard; \$7.8 million, after-tax, in pension corridor expense; \$4.8 million, after-tax, in income from termination of the Company's postretirement medical insurance plan; and \$1.1 million, after-tax, in severance costs primarily related to the Company's transition to its new manufacturing facility.

Fiscal 2007 impacted by \$2.1 million, after-tax, in accelerated depreciation expense related to the Company's move from its Hunting Park facility into the Philadelphia Navy Yard.

Fiscal 2006 included approximately \$1.0 million in after tax income, from the gain on a terminated option agreement entered into with Keystone Redevelopment Partners, LLC.

(c) Represents fully diluted shares.

(d) As described in footnote (b), fiscal 2009 impacted by: \$0.64 per share in accelerated depreciation expense; \$0.10 per share, in non-cash costs related to spare parts that are not expected to be utilized at the new manufacturing facility; and \$0.27 per share in income related to the termination of the Company's postretirement life insurance plan.

As described in footnote (b), fiscal 2008 impacted by: \$0.40 per share in accelerated depreciation expense; \$0.97 per share of expense due to pension corridor charges; \$0.60 per share in income from termination of the Company's postretirement medical insurance plan; and \$0.14 per share due to the impact of severance costs related to the transition to the new manufacturing facility at the Philadelphia Navy Yard.

As described in footnote (b), fiscal 2007 impacted by \$0.26 per share in accelerated depreciation expense related to the transition to the new manufacturing facility at the Philadelphia Navy Yard.

As described in footnote (b), fiscal 2006 impacted by \$0.12 per share in income from gain on termination of the option agreement with Keystone Redevelopment Partners, LLC.

TASTY BAKING COMPANY AND SUBSIDIARIES PART I

Item 1. Business

Tasty Baking Company (the "Company") was incorporated in Pennsylvania in 1914 and maintains its principal offices and manufacturing facilities in Philadelphia, Pennsylvania. The Company manufactures, co-packages and sells a variety of premium single portion cakes, pies, donuts, snack bars, pretzels, and brownies under the well-established trademark, TASTYKAKE®. These products are comprised of approximately 169 varieties. The availability of some products, especially the holiday-themed offerings, varies according to the season. The single portion cakes, snack bars and donuts principally sell at retail prices for individual packages ranging from \$0.39 to \$1.49 per package and family convenience packages from \$3.69 to \$4.19. The individual pies include various fruit and cream-filled varieties and, at certain times of the year, additional seasonal varieties. The best known products with the widest sales acceptance are sponge cakes marketed under the trademarks JUNIORS® and KRIMPETS®, and chocolate enrobed cakes under KANDY KAKES®. The Company produces a line of sugar-free single portion cakes and snack bars under the name TASTYKAKE Sensables® which are sold at retail prices ranging from \$0.75 for single serve to \$4.19 for family convenience packages.

In May 2007, the Company announced that, as part of its comprehensive operational review of strategic manufacturing alternatives, it entered into an agreement to relocate its Philadelphia operations to the Philadelphia Navy Yard. The term of the bakery lease, which commenced in October 2009, provides for a 26-year lease term, with renewal options for two additional 10 year terms, for a 345,500 square foot bakery, warehouse and distribution center located on approximately 25 acres. Construction of the new bakery, warehouse and distribution center is complete and the Company has commenced production of pies, snack bars, krimpets and certain cupcake varieties. The equipment commissioning process has begun for the remaining production lines and the Company expects the new facility to be fully operational in the spring of 2010.

During April 2009, the Company relocated its corporate headquarters to 36,000 square feet of leased office space in the Philadelphia Navy Yard. The office lease term, which commenced in April 2009, will end at the same time as the new bakery lease.

Tasty Baking Oxford, Inc. ("Oxford"), a wholly-owned subsidiary of the Company, located in Oxford, Pennsylvania, currently manufactures honey buns, donuts, mini donuts and donut holes under the trademark TASTYKAKE®. Oxford also manufactures several products which are distributed under private labels.

The Company's products are sold principally by independent sales distributors through distribution routes to approximately 16,000 retail outlets in Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania and Virginia, which comprise the Company's core market. This method of distribution for direct store deliveries via independent sales distributors has been used since 1986. The Company sells products to approximately 413 independent sales distributors and maintains 49 Company operated routes that service route sales areas. The Company also distributes its products through third party distributor arrangements in New York, New England, Florida, Virginia, Georgia and North Carolina, as well as, directly to certain grocery chains that have centralized warehouse distribution capabilities throughout the continental United States and Puerto Rico. In addition, the Company sells its products through the www.tastykake.com program, whereby consumers can visit the Company's website or call a toll-free number to order a variety of Tastykake gift packs for delivery to homes and businesses.

For 2009, the Company's top 20 customers represented 61.1% of its net sales and its largest customer, Wal-Mart, represented approximately 20.6% of its net sales. This relationship has been reasonably consistent over the prior two years. If any of the top twenty customers change their buying patterns with the Company, the Company's sales and profits could be adversely affected.

The Company is engaged in a highly competitive business, specializing in premium snack cakes and pies. Although the number of competitors varies among marketing areas, certain competitors are national companies with multiple production facilities, nationwide distribution systems and significant advertising and promotion budgets. The Company is able to maintain a strong competitive position in its principal marketing area through the quality of its products and brand name recognition. In these areas, the Company has a strong market share. The Company conducts marketing programs that utilize radio and television advertising, outdoor billboard campaigns, newspaper free standing inserts, consumer coupons and public relations.

Outside of its principal marketing area, awareness of the Company's trademarks and reputation is not as strong and the

Company's market share is generally less significant. In these markets, the Company competes for limited shelf space available from retailers, leveraging product quality, price promotions and consumer acceptance. The Company has been able to grow sales outside of its principal marketing area primarily through the distribution of its products using mass merchandisers and third party distributors.

The Company principally competes in the premium snack cake market on price, product quality and brand name recognition with McKee Foods, Bimbo USA and Hostess Brands. McKee Foods Corporation, a large privately held company, competes in the snack cake market under the brand name Little Debbie, primarily selling lower priced snack cakes. Little Debbie holds the largest share of the snack cake market in the United States. Bimbo USA markets certain of its products under the Entenmann's brand name and generally competes with the Company in the multi-serve and single-serve baked goods. Hostess Brands, formerly Interstate Bakeries Corporation, which emerged from Chapter 11 Bankruptcy protection in February 2009, competes with the Company using the Hostess, Dolly Madison and Drakes brand names. Local independent bakers also compete in a number of regional markets. In addition, there are national food companies that are expanding their snack product offerings in the Company's category. Many large food companies advertise and promote single-serve packages of their traditional multi-serve cookie and sweet and salty snack varieties and compete against the Company for a portion of the overall snack market.

The Company is dependent upon sweeteners, cocoa, eggs, oils and flour for its ingredients. The Company procures raw materials through multi-year, annual, short-term and spot market purchases from various suppliers. These raw materials are subject to availability restrictions within the market in which the suppliers operate. Additionally, purchases made in the spot market are subject to price volatility that may negatively affect the Company's operations. The prices paid for raw materials generally reflect external factors such as weather conditions, commodity market fluctuations, value of the U.S. dollar against other currencies and the effects of governmental agricultural programs. The market prices for sweeteners and cocoa have been volatile and experienced significant upward price pressure during the second half of 2009. Eggs, which the Company purchases in the spot market, experienced significant downward price pressure during the first half of 2009 and have since remained relatively stable. Oils and flour pricing remained relatively constant throughout 2009.

The Company's policies with respect to working capital items are not unique. Finished goods inventory is generally maintained at levels sufficient for one to two weeks of sales while packaging and ingredient inventory levels are generally maintained to support eight weeks of sales, depending on product seasonality. Changes in suppliers and new product launches are two reasons why inventory levels may change but these changes are normally short-term in nature. The ratio of current assets to current liabilities as of year-end for fiscal 2009 and fiscal 2008 was 1.0 to 1.0 and 1.5 to 1.0, respectively.

The Company believes that its brand trademarks such as "TASTYKAKE®" and "Sensables®" and product trademarks such as "KRIMPETS®," "KREAMIES®," "JUNIORS®," and "KANDY KAKES®" are of material importance to the Company's strategy of brand building. The Company takes appropriate action from time to time against third parties to prevent infringement of its trademarks and other intellectual property. The Company also enters into confidentiality agreements from time to time with employees and third parties as necessary to protect formulas and processes used in producing its products.

The Company engages in continuous research and development activities at its various manufacturing locations related to new products as well as to the improvement and maintenance of existing products. These initiatives are designed to drive top-line growth and improve the Company's cost position. In the past two years, these expenditures have not been material.

The Company's plants are subject to inspection by the Food and Drug Administration and various other governmental agencies, and its products must comply with regulations under the Federal Food, Drug, and Cosmetic Act and with various comparable state statutes regulating the manufacturing and marketing of food products. The Company's enterprise resource planning ("ERP") system enables the establishment and maintenance of records in compliance with the Public Health Security and Bioterrorism Preparedness and Response Act of 2002.

The Company has historically made investments based on compliance with environmental laws and regulations. These expenditures have not been material with respect to the Company's capital expenditures, earnings or competitive position.

As of March 9, 2010, the Company employed approximately 870 persons, including 104 part-time employees, and approximately 53 maintenance employees that are covered by a labor agreement, which expires in May 2012. In addition, as of March 1, 2010 the Company also retained the services of approximately 45 contract staff at its

Philadelphia operations.

See Item 7 below regarding the use of forward-looking statements contained herein.

The Corporate Governance Guidelines, Code of Business Conduct and charters for the Audit Committee, Compensation Committee, Strategic Planning Committee, and Nominating and Corporate Governance Committee are available on the Company's website at www.tastykake.com, under the "Investors, Corporate Governance" headings or are available upon written request directed to the Secretary of the Company at Navy Yard Corporate Center, Three Crescent Drive, Suite 200, Philadelphia, Pennsylvania 19112.

The Company will also post to its website any amendments to the Code of Business Conduct, or a waiver from the provisions of the Code of Business Conduct relating to the Company's principal executive officers or directors. Waivers will be located under "Investors, Corporate Governance, Code of Business Conduct–Waivers."

Item 1A. Risk Factors

The risks described below, together with all of the other information included in this report, should be carefully considered in evaluating our business and prospects. Additional information regarding various risks and uncertainties facing us are included under Item 7 of this report on Form 10-K. Solely for purposes of the risk factors in this Item 1A, the terms "we," "our," and "us" refer to Tasty Baking Company and its subsidiaries. The risks and uncertainties described herein are not the only ones facing us. Additional risks and uncertainties not presently known or deemed insignificant may also impair our business operations. The occurrence of any of the following risks could harm our business, financial condition or results of operations.

Increased Competition May Impair Profitability

We are engaged in a highly competitive business. The number of choices facing the consumer on how to spend snack food dollars has increased significantly over the last several years, particularly with the introduction of more convenient packaging of traditional products, both sweet and salty. Although the number of competitors varies among marketing areas, certain competitors are national companies with multiple production facilities, nationwide distribution systems, and nationally recognized brands with large advertising and promotion budgets. From time to time, we experience price pressure in certain of our markets as a result of competitors' promotional pricing practices. Increased competition could result in lower sales, profits and market share.

Change in Top Customers' Buying Patterns May Adversely Affect Our Sales and Profits

Our top twenty customers represented 61.1% of our 2009 net sales and 59.0% of our 2008 net sales. Our largest customer, Wal-Mart, represented approximately 20.6% of our net sales in 2009 and 19.7% of our net sales in 2008. If any of the top twenty customers change their buying patterns with us, our sales and profits could be adversely affected.

Increased Commodity Prices and Availability May Impact Profitability

We are dependent upon sweeteners, cocoa, eggs, oils, and flour for our ingredients. Many commodity prices have experienced recent volatility. Increases in commodity prices and availability could have an adverse impact on our profitability.

Change in Consumer Preferences May Adversely Affect Our Financial and Operational Results

Our success is contingent upon our ability to forecast the tastes and preferences of consumers and offer products that appeal to their preferences. Consumer preference changes due to taste, nutritional content or other factors, and the Company's failure to anticipate, identify or react to these changes could result in reduced demand for our products, which could adversely affect our financial and operational results. The current consumer focus on wellness may affect demand for our products. We continue to explore the development of new products that appeal to consumer preference trends while maintaining our product quality standards.

Collectability of Long-term Receivables May Adversely Affect Our Financial Position

Our long-term receivables represent loans issued to our independent sales distributors for the purchase of route territories and delivery vehicles. These loans are issued through a wholly-owned subsidiary, TBC Financial Services, Inc. Current lending guidelines require significant collateral to minimize our risk in the event of default by an independent sales distributor and our loss history has been minimal. The ability to collect the entire loan portfolio, however, is directly

related to the success of our current route distribution system and the independent sales distributor's ability to repay the loan, which is directly related to the economic success of the route. In addition, any external event or circumstance that impacts the independent sales distributors may also affect the collectability of long-term receivables.

The Inability to Further Develop Our Brand Recognition May Adversely Impact Sales and Profitability

Historically, route sales by independent sales distributors have accounted for the largest part of our revenues. As we expanded outside of our core route market, the percentage of volume may shift toward more non-route business, causing some erosion of our gross margin. We continue to evaluate existing and new business possibilities outside the core market utilizing both Company owned routes and third party distributors. We also sell products through distributorships and major grocery chains that have centralized warehouse distribution capabilities throughout the continental United States and Puerto Rico. If we are unable to further develop brand recognition in the expanded markets, sales and profitability could be adversely affected.

Limited Product Shelf Life May Adversely Affect Sales Potential

Our products have limited shelf life. Production planning and monitoring of demand is essential to effective operations, both to fulfill customer demand and to minimize the levels of inventory and returns. Delays in getting products to market for any reason, including transportation disruptions or bad weather, may cause loss of sales, which could adversely affect our operating results.

Product Recall or Safety Concerns May Adversely Affect Our Financial and Operational Results

We may recall certain of our products should they be mislabeled, contaminated or damaged or if there is a perceived safety issue. A perceived safety issue, product recall or an adverse result in any related litigation could have a material adverse effect on our operations, financial condition and financial results.

Loss of Facilities Could Adversely Affect Our Financial and Operational Results

We currently have three production facilities: two in Philadelphia and one in Oxford, Pennsylvania. One Philadelphia facility is a multi-storied manufacturing facility where some of our signature products are manufactured and is in the process of being transitioned to our newly constructed production facility in the Philadelphia Navy Yard. The facility in the Philadelphia Navy Yard will be the exclusive production facility of our signature products once fully operational which is expected in the spring of 2010. The Oxford facility is a single-story manufacturing facility with expansion possibilities. Our data processing operations are located at our Corporate Office in the Navy Yard, with off-site data backup and disaster recovery facilities. The loss of any of the facilities could have an adverse impact on our operations, financial condition and results of operations.

Indebtedness Incurred in Connection with Our Strategic Manufacturing Initiative Could Adversely Affect Our Financial and Operational Results

Higher levels of indebtedness associated with the Company's new manufacturing and distribution facility could increase our vulnerability to general adverse economic and industry conditions; limit our flexibility in planning for and reacting to changes in our business and the industry in which we operate; and require that we use a larger portion of our cash flow to pay principal and interest, thereby reducing availability of cash to fund working capital, capital expenditures and other operating needs.

The Inability to Successfully Implement Our Strategic Manufacturing Initiative Could Adversely Affect Our Financial and Operational Results

We are dependent upon third parties to deliver and install high-tech, modern baking equipment. Unanticipated delays in the completion of the facility or delivery of new equipment could substantially increase the costs and ultimately the indebtedness associated with the initiative. Unexpected increases in equipment or installation costs could also substantially increase the indebtedness associated with the initiative. Unfavorable deviations from expected equipment performance or unforeseen difficulties associated with transitioning to a new facility could significantly increase the costs of future production. Such unanticipated delays, cost increases or unfavorable deviations in equipment performance could also restrict the Company's ability to increase revenues and profitability, and have an adverse impact on our financial condition and results of operations.

A Change in Interest Rates May Adversely Affect Our Financial and Operational Results

Increases in interest rates will increase our recognition of interest expense related to long-term debt and the interest income related to our long-term receivables. A decrease in interest rates used to set the pension discount rate could increase pension liability and adversely impact the relationship of our unrecognized gain or loss to the pension corridor. Refer to the risk factor “Changes in Pension Expense Assumptions and Estimates May Adversely Affect Our Operational Results” below for additional discussion. A sensitivity analysis on the impact of this relationship is included in Note 11 of the consolidated financial statements, included in Item 8 below.

Terms of Indebtedness Impose Significant Restrictions on Our Business

Our bank credit facility, PIDC Local Development Corporation credit facility and the Machinery and Equipment Loan Fund loans with the Commonwealth of Pennsylvania (the “Agreements”) contain various covenants that limit our ability to, among other things, incur or become liable for additional indebtedness; create or suffer to exist certain liens; enter into business combinations or asset sale transactions; make restricted payments, including dividends over a specified amount; make investments; enter into transactions with affiliates; and enter into new businesses.

These restrictions could limit our ability to obtain future financing, sell assets, make acquisitions or needed capital expenditures, withstand a future downturn in our business or the economy in general, conduct operations or otherwise take advantage of business opportunities that may arise. The Agreements also require us to maintain certain financial ratios. Our ability to remain in compliance with our financial ratio requirements in the future could be affected by events beyond our control, such as general economic conditions, a significant increase in the cost of our raw materials or a material increase in our pension or postretirement obligations. Failure to maintain any applicable financial ratios may prevent us from borrowing additional amounts under our bank credit facility and could result in a default under the Agreements, which could cause the indebtedness outstanding under the Agreements to become immediately due and payable if the appropriate waiver could not be obtained by the Company. If we were unable to repay those amounts, our banks could initiate a bankruptcy or liquidation proceeding. If the banks were to accelerate the repayment of all outstanding borrowings under the Agreements, we may not have sufficient assets to repay those amounts and any others that default as a result thereof.

In addition, if we amend our Agreements or seek a waiver for any events of default, we may incur additional fees and/or higher interest rates on all or a portion of our outstanding borrowings.

Changes in Governmental Laws and Regulations Could Adversely Affect Our Financial and Operational Results

Our business is subject to regulation by various federal, state and local government entities and agencies, including regulation of our products, properties, employees, distribution and overall operations. Changes in laws and regulations and the manner in which they are interpreted or applied may alter the environment in which we operate and may affect results of operations or increase liabilities. These include changes in food and drug laws, laws related to advertising and marketing practices, accounting standards, taxation requirements, competition laws, employment laws and environmental laws.

Litigation Could Adversely Affect Our Financial and Operational Results

We are involved in certain legal and regulatory actions, all of which have arisen in the ordinary course of our business. We are unable to predict the outcome of these matters, but do not believe that the ultimate resolution of these matters will have a material adverse effect on our consolidated financial position or results of operations. However, if one or more of these matters were determined adversely to us, the ultimate liability arising therefrom could be material to our financial condition and results of operations. In addition, we may become subject to additional litigation at any time which could have an adverse material impact on us.

Changes in Pension Expense Assumptions and Estimates May Adversely Affect Our Operational Results

Accounting for pension expense requires the use of estimates and assumptions including discount rate, rate of return on plan assets, compensation increases, mortality and employee turnover, all of which affect the amount of expense recognized by us. In addition, the rate of return on plan assets is directly related to changes in the equity and credit markets, which can be volatile. The use of the above assumptions, market volatility and our election in 1987 to recognize

all pension gains and losses in excess of our pension corridor in the current year may cause us to experience significant changes in our pension expense from year to year which could adversely affect our operating results. Most other public companies elected an amortization method that allows recognition of pension gains and losses to be amortized over longer periods of time.

Increases in Employee and Employee-Related Costs Could Adversely Affect Our Financial and Operational Results

Health care and other employee-related costs may continue to rise and any substantial increase in costs may have an adverse impact on our profitability. In addition, a shortage of qualified employees, a substantial increase in the cost of qualified employees, or any adverse affect resulting from third party labor negotiations could have an adverse affect on our operations and financial results.

Loss or Impairment of Intellectual Property and Trade Secrets Could Adversely Affect Our Brands and Our Business

We have taken efforts to protect our trademarks, copyrights and trade secrets as we consider our intellectual property rights important to our success. However, other parties may take actions or, without authority, make use of our intellectual property that could impair the value of our proprietary rights or the reputation of our brands. Any such impairment could adversely affect our business.

Current Economic and Market Conditions Could Adversely Affect Our Financial and Operational Results

Our business may be adversely affected by changes in economic and business conditions nationally and particularly within our core market. In addition, the business strategies implemented by management to meet these business conditions and other market challenges may have a significant impact upon our future financial condition and results of operations. During the second half of 2008 and throughout 2009, the U.S. economy has experienced a significant downturn that has resulted in elevated levels of financial market volatility, customer uncertainty and widespread concerns about the U.S. and world economies. This may negatively impact the demand for our products and our allowance for doubtful accounts, all of which may have a material adverse effect on our business, financial condition and results of operations. In addition, this economic crisis has had a material and direct impact on financial institutions resulting in limited access to capital, which may impact our ability to borrow funds to support operations or other liquidity needs under our credit facility or otherwise borrow or raise capital. Moreover, our stock price could decrease if investors have concerns that our business, financial condition or results of operations will be negatively impacted by the economic downturn.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The locations and primary use of the materially important physical properties owned or leased by the Company and its subsidiaries are as follows:

<u>Location</u>	<u>Lease /Own</u>	<u>Primary Facility Use</u>
2801 Hunting Park Avenue ^(a) Philadelphia, PA	Own	Production of cakes
3413 Fox Street ^(a) Philadelphia, PA	Own	Warehouse, Shipping and Distribution Operations through February 2010
700 Lincoln Street ^(a) Oxford, PA	Own	Tasty Baking Oxford Offices, Production of honey buns, cake, mini donuts and donut holes
Three Crescent Drive ^(b) Suite 200 Philadelphia, PA	Lease	Executive, Sales and Finance Offices, Data Processing Operations, Office Services
4300 S. 26 th Street ^(b) Philadelphia, PA	Lease	Production of cakes, pies, snack bars Warehouse, Shipping and Distribution Operations

^(a)These properties are encumbered by a shared first and second priority lien under the Company's bank credit facility, the MELF Loans and PIDC Local Development Corporation credit facility.

^(b)These properties are also referred to herein as being located in the Philadelphia Navy Yard.

In addition, the Company leases various other properties used principally as local pick-up and sales distribution points. During 2010, the leased facility at 4300 S. 26th Street is expected to fully replace the Company's current manufacturing facility located at 2801 Hunting Park Avenue, Philadelphia, and has replaced the Company's current distribution operations at 3413 Fox Street, Philadelphia.

Item 3. Legal Proceedings

The Company is involved in certain legal and regulatory actions from time to time which arise in the ordinary course of the Company's business. The Company is unable to predict the outcome of these matters, but does not believe that the ultimate resolution of such matters will have a material adverse effect on the consolidated financial position or results of operations of the Company. However, if one or more of such matters were determined adversely to the Company, the ultimate liability arising therefrom is not expected to be material to the financial position of the Company, but could be material to its results of operations in any quarter or annual period.

Item 4. (Removed and Reserved)

**TASTY BAKING COMPANY AND SUBSIDIARIES
PART II**

Item 5. Market for the Company's Common Equity and Related Shareholder Matters

Summarized quarterly market prices per share for the Company's common stock and cash dividend payments for 2009 and 2008 are as follows:

	First	Second	Third	Fourth	Year
2009					
Market prices:					
High	4.60	7.01	7.24	6.88	7.24
Low	3.25	4.10	6.32	5.70	3.25
Cash Dividends	.05	.05	.05	.05	.20
2008					
Market prices:					
High	9.20	6.57	5.89	4.98	9.20
Low	5.23	5.27	3.21	2.75	2.75
Cash Dividends	.05	.05	.05	.05	.20

Each quarter consisted of 13 weeks. The market prices of the Company's common stock reflect the high and low sales price by quarter as traded on the NASDAQ Global Market (formerly the NASDAQ National Market). The approximate number of holders of record of the Company's common stock (par value \$ 0.50 per share) as of February 17, 2010, was 1,967. On March 9, 2010, the closing sale price per common share was \$6.95.

Dividends

The declaration and payment of dividends is subject to the discretion of the Company's Board of Directors ("Board"). The Board bases its decisions regarding dividends on, among other things, general business conditions, the Company's financial results, contractual, legal and regulatory restrictions regarding dividend payments and any other factors the Board may consider relevant. Under the terms of the Company's credit agreement with its banks, the Company may currently pay cash dividends to its shareholders in an aggregate amount not to exceed \$1.8 million in any one fiscal year.

The following table provides information regarding purchases made by the Company of its common stock during the fourth quarter of fiscal 2009:

Period	Total Number of Shares Repurchased ^(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Appropriate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
September 27 2009 – October 31, 2009	16,977	\$ 6.44	-	-
November 1, 2009 – November 28, 2009	-	\$ -	-	-
November 29, 2009 – December 26, 2009	-	\$ -	-	-
Total	16,977	\$ 6.44	-	-

^(a)Shares represent restricted shares surrendered by employees to satisfy tax obligations arising from the vesting of restricted shares.

Item 6. Selected Financial Data

Not Applicable.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

All disclosures are pre-tax, unless otherwise noted.

Forward-Looking Statements

Statements contained in this Annual Report on Form 10-K, including but not limited to those under the headings "Business," "Risk Factors," "Legal Proceedings" and "Management's Discussion and Analysis," contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, and are subject to the safe harbor created by that Act. Such forward-looking statements are based upon assumptions by management, as of the date of this Report, including assumptions about risks and uncertainties faced by the Company. These forward-looking statements can be identified by the use of such words as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "predict," "project," "should," "would," "is likely to," or "is expected to" and other similar terms. They may include comments about competition within the baking industry, concentration of customers, commodity prices, consumer preferences, long-term receivables, inability to develop brand recognition in the Company's expanded markets, production and inventory concerns, loss of one of the Company's production facilities, availability of capital, legal proceedings, fluctuation in interest rates, pension expense and related assumptions, changes in long-term corporate bond rates or asset returns that could affect the recognition of pension corridor expense or income, governmental regulations, protection of the Company's intellectual property and trade secrets and other statements contained herein that are not historical facts.

Because such forward-looking statements involve risks and uncertainties, various factors could cause actual results to differ materially from those expressed or implied by such forward-looking statements, including, but not limited to, changes in general economic or business conditions nationally and in the Company's primary markets, the availability of capital upon terms acceptable to the Company, the availability and pricing of raw materials, the level of demand for the Company's products, the outcome of legal proceedings to which the Company is or may become a party, the actions of competitors within the packaged food industry, changes in consumer tastes or eating habits, the success of business strategies implemented by the Company to meet future challenges, the costs to complete a new facility and relocate thereto, the costs and availability of capital to fund improvements to its new facilities and equipment, the retention of key employees, and the ability to develop and market in a timely and efficient manner new products which are accepted by consumers. If any of our assumptions prove incorrect or should unanticipated circumstances arise, the Company's actual results could differ materially from those anticipated by such forward-looking statements. The differences could be caused by a number of factors or combination of factors, including, but not limited to, those factors described directly above and under "Risk Factors." Readers are strongly encouraged to consider these factors when evaluating any such forward-looking statements. There can be no assurance that the Company's new manufacturing strategy will be successful. The Company undertakes no obligation to publicly revise or update such forward-looking statements, except as required by law. Readers are advised, however, to consult any further public disclosures by the Company (such as in the Company's filings with the SEC or in Company press releases) on related subjects.

Critical Accounting Estimates

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States, which require that management make numerous estimates and assumptions. Actual results could differ from those estimates and assumptions, impacting the Company's reported results of operations and financial position. Certain accounting estimates are considered to be critical in that (i) they are most important to the depiction of the financial condition and results of operations of the Company and (ii) their application requires management's most subjective judgment in making estimates about the effect of matters that are inherently uncertain. The Company's significant accounting policies are more fully described in Note 1 to the Company's audited consolidated financial statements in this Annual Report on Form 10-K.

Customer Sales and Discounts and Allowances

The Company gives allowances and offers various sales incentive programs to customers and consumers that are accounted for as a reduction of sales. The Company records estimated reductions to sales for:

- Price promotion discounts at the time the product purchased by the independent sales distributor is sold to the customer
- Distributor discounts at the time revenue is recognized
- Coupon expense at the estimated redemption rate
- Customer rebates at the time revenue is recognized

- Cooperative advertising at the time the Company's obligation to the customer is incurred
- Product returns received from independent sales distributors

Price promotion discount expense is recorded when the related product being discounted is sold by the independent sales distributor to the customer. The amount of the price promotion is captured when the independent sales distributor sells product to the customer. The price promotion discount is based upon actual discounts per case using an approved price promotion calendar. Any increase or decrease in volume may result in variations to price discounts recorded each month. Independent sales distributors receive a purchase discount equal to a percentage of the wholesale price of product sold to customers, adjusted for price promotions and product returns. Direct customers receive a purchase discount equal to a percentage of the wholesale price of product received. Discounts to distributors and customers are based on agreed upon rates, and amounts vary based upon volume.

Coupon expense estimates are calculated using the number of coupons dropped to consumers and the estimated redemption percentage. The estimated redemption percentages are based on data obtained from the Company's third party coupon processor and its experience with similar coupon drops. Upon monthly receipt of the actual coupon redemption report, the coupon expense is updated based upon actual coupon activity as well as changes in the forecasted redemption percentage as estimated by the third party coupon processor.

Estimates for customer rebates assume that customers will meet the required quantities to qualify for payment. If the customers fall above or below the required quantities as the year progresses, this could impact the estimate.

Cooperative advertising expense is recorded based on the estimated advertising cost of the underlying program.

Product returns are recorded as product is returned to the Company. At quarter and year-end, an estimated reserve for product returns is recorded based upon sales in the last two weeks of the quarter or year and historical return experience. Actual returns may vary from this estimate.

Some customers take unauthorized deductions when they make payments to the Company. Unauthorized deductions are taken by customers for various reasons, including, but not limited to missing or damaged product. It is the Company's policy to establish a reserve for each unauthorized deduction at the time it is taken by the customer. The reserve is maintained until such time as the Company can determine the validity of the deduction. If it is ultimately determined after investigation that a deduction is not valid, the customer is charged back and the reserve is reversed.

Since the Company obtains updated information on every discount and allowance account each month, the risk that estimates are not properly recorded is generally limited to a percentage of one month's activity. The average monthly amount of discounts and allowances was approximately \$10.2 million in 2009. Historically, actual discounts and allowances have not varied significantly from estimates. Total discounts and allowances were 40.4% of gross sales in 2009. This percentage is consistent with prior years and is a significant percentage of gross sales since all price discounts given to both independent sales distributors and third party distributors are reflected as reductions to gross sales.

Allowance for Doubtful Accounts

The Company aggressively pursues the collection of accounts receivable balances. The Company performs ongoing credit evaluations of customers' financial condition and makes quarterly estimates of its ability to collect its accounts receivable balances. When evaluating the adequacy of the allowance for doubtful accounts, management specifically analyzes accounts receivable trends and historical bad debts, customer concentrations, customer credit worthiness, levels of customer deductions, current economic trends and changes in customer payment terms. If the financial condition of customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

The provision for doubtful accounts is recorded as a selling, general and administrative expense. The allowance for doubtful accounts has three components. The first component is a reserve against all accounts receivable balances based on a specific percentage depending on the age of the receivables, with the remaining receivables reserved against using the last five years of write-off experience for the Company. The second component is for specific trade customer accounts receivable balances from customers whose ability to pay is in question, such as customers who file for bankruptcy while they have an outstanding balance due the Company. The third component is a reserve against any breached independent sales distributor accounts receivable balances that are not adequately covered by the independent sales distributor's equity in the route territory. Although the total allowance for doubtful accounts reflects the estimated risk for all customer balances, if any one of our top twenty customers' accounts receivable balances became fully uncollectable, it would have a material impact on our consolidated statement of operations and would negatively impact cash flow.

Long-lived Asset Impairment

Long-lived assets are reviewed for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In instances where the carrying amount may not be recoverable, the review for potential impairment utilizes estimates and assumptions of future cash flows directly related to the asset. Cash flow estimates are typically derived from the Company's historical experience and internal business plans.

For assets where there is no plan for future use, the review for impairment includes estimates and assumptions of the fair market value of the asset, which is based on the best information available. The Company uses market prices, when available, and independent appraisals as appropriate to determine fair value. These assets are recorded at the lower of their book value or market value. Adverse changes in future market conditions could result in losses or an inability to recover the carrying value of an affected asset. For assets which are expected to be disposed of through abandonment before the end of their previously estimated useful life, depreciation estimates are revised to reflect the shortened useful life.

Pension and Postretirement Plans

Accounting for pensions and postretirement benefit plans requires the use of estimates and assumptions regarding numerous factors, including discount rate, rate of return on plan assets, compensation increases, health care cost increases, and mortality and employee turnover. A sensitivity analysis for pensions is included in Note 11 to the Company's audited consolidated financial statements in this Annual Report on Form 10-K. The Company may experience significant changes in its pension expense from year to year because of its election in 1987 to immediately recognize all pension gains and losses in excess of its pension corridor in the year that they occur. For comparative purposes, this is relevant because most other public companies use an amortization method that allows recognition of pension gains and losses to be amortized over longer periods of time. Also, the final determination of the gains and losses that could potentially exceed the corridor is not known until the last day of the year, which makes it difficult to estimate. The combination of low interest rates and low or negative rates of return on plan assets can cause higher levels of pension expense; conversely, high interest rates and high rates of return on assets could result in higher levels of pension income. Market conditions where interest rates and asset returns move inversely relative to each other, in most instances, cause the Company to have pension expense or income within its allowable pension corridor. Actual results may differ from the Company's assumptions and may impact the liability and expense amounts reported for pensions and postretirement benefits. During 2009, overall pension asset returns were above the 8.0% assumption. In addition, the discount rate decreased from 6.45% at the end of 2008 to 5.80% at the end of 2009. In 2009, there were no gains or losses in excess of the pension corridor. In 2008, pension losses exceeded the pension corridor and the Company recorded \$12.6 million in additional pension expense during the fourth quarter.

With the implementation of Medicare Part D in January 2006, the Company stopped providing medical benefits for most of its post-65 retirees and began requiring incumbent retirees to pay age-based rates for life insurance benefits in excess of \$20 thousand. Since January 2006, the Company provided subsidized medical benefits for its retirees and their dependents who had not yet reached age 65. In December 2008, the Company made the decision to terminate its retiree medical benefit plan, which offered medical insurance to pre-65 retirees at a subsidized rate. The decision to terminate the plan was made prior to December 27, 2008 and the Company set the benefits' cessation date as December 1, 2009. This plan amendment and curtailment resulted in the Company recording \$7.8 million in income in the fourth quarter 2008, which is reflected in the Company's income from operations.

Life insurance for individuals retiring before January 1, 2006 was capped at \$20 thousand of coverage. Incumbent retirees who purchased coverage in excess of \$20 thousand and all new retirees after January 1, 2006 paid age based rates for their life insurance benefit for which the Company incurs no liability. In June 2009, the Company made the decision to cease providing post-employment life insurance benefits and terminated the plan. The associated plan amendment and curtailment resulted in the Company recording approximately \$3.7 million in income in the second quarter of 2009. Approximately \$2.2 million of the \$3.7 million was recorded as a reduction in cost of sales, with the remainder of approximately \$1.5 million recorded as an offset to selling, general and administrative expenses.

Workers' Compensation Expense

Accounting for workers' compensation expense requires the use of estimates and assumptions regarding numerous factors, including the ultimate severity of injuries, the timeliness of reporting injuries, and health care cost increases. The Company insures for workers' compensation liabilities under a large deductible program where losses are incurred by the

Company up to certain specific and aggregate amounts. Accruals for claims under the large deductible insurance program are recorded as claims are incurred. The Company estimates the liability based on total incurred claims and paid claims, adjusted by loss development factors that account for the development of losses over time. Loss development factors are based on prior loss experience and on the age of incurred claims, and are reviewed by a third party claim loss specialist. The Company's estimated liability is the difference between the amounts we expect to pay and the amounts we have already paid for those years, adjusted for the limits on the aggregate amounts and discounted to present value. The Company evaluates the estimated liability on a continuing basis and adjusts it accordingly. Included in the estimate of liability is an estimate for expected changes in inflation and health care costs.

If there were to be an excessive number of workers' compensation claims in a given accounting period and these actual results varied from the Company's assumptions, these could have a material impact on our cash flow and consolidated statement of operations.

Income Tax Valuation

During the year, the Company records income tax expense and liabilities based on estimates of book and tax income, and current tax rates. These estimates could vary in the future due to uncertainties in Company profits, new laws, new interpretations of existing laws, and rulings by taxing authorities. Differences between actual results and our assumptions, or changes in our assumptions in future periods, are recorded in the period they become known.

The Company has recorded a state deferred income tax asset, before consideration of any valuation allowance, for the benefit of state income tax loss carryforwards ("NOLs"). These carryforwards expire in varying amounts between 2010 and 2029. The Company also has recorded a deferred income tax asset for the benefit of federal income tax NOLs.

The valuation allowance for deferred tax assets as of December 26, 2009 and December 27, 2008 was \$0.9 million and \$1.2 million, respectively. Realization of both state and federal NOLs is dependent on generating sufficient taxable income prior to expiration of the loss carryforwards. Although realization is not assured, management believes that it is more likely than not that the deferred tax assets will be realized. However, the amount realized could be reduced if estimates of future taxable income during the carryforward period are not achieved.

Results of Operations

Percentages may not calculate due to rounding.

The following table sets forth the percentage relationships to gross sales of certain items in the Company's consolidated statements of operations:

	52 Weeks Ended December 26, 2009	52 Weeks Ended December 27, 2008
Gross sales	100.0%	100.0%
Discounts and allowances	40.4	38.1
Net sales	59.6	61.9
Costs, expenses and other		
Cost of sales	38.5	42.4
Depreciation	5.5	4.6
Selling, general & administrative expenses	16.8	17.6
Other expense (income), net	.1	0.3
Interest expense	0.8	0.7
Loss before provision for income taxes	(2.1)	(3.7)
Provision for income taxes	(1.0)	(1.3)
Net loss	(1.1)	(2.4)

Overview

Net loss for the fiscal year ended December 26, 2009 was \$3.4 million. Net loss for 2009 includes, on a pre-tax basis, \$8.4 million of accelerated depreciation and a spare parts reserve of \$1.4 million for equipment deemed to be no longer usable or have any fair market value, which were both due to the Company's transition to the new manufacturing facility at the Philadelphia Navy Yard. In addition, the Company recognized \$3.7 million of pre-tax income related to the termination of the Company's postretirement life insurance plan and a \$0.6 million reduction in accrued postemployment costs associated with the planned transition to the Company's new manufacturing facility at the Philadelphia Navy Yard. Net loss for the fiscal year ended December 27, 2008 was \$6.8 million. Net loss for 2008 includes, on a pre-tax basis, \$5.2 million of accelerated depreciation related to the Company's transition to the new manufacturing facility at the

Philadelphia Navy Yard, \$12.6 million of additional pension expense related to pension losses in excess of the pension corridor, \$1.8 million in postemployment costs primarily related to the Company's planned move to a new bakery and \$7.8 million of income related to the termination of the Company's postretirement medical benefit plan.

Sales

Total gross sales increased 7.8% on a volume increase of 2.2% in 2009 as compared to 2008. During fiscal 2009, total net sales increased by 3.8% versus the prior year period driven by a 5.0% increase in Route net sales while Non-route net sales remained flat as compared to the prior year period. The increase in Route net sales was primarily driven by higher net selling prices and increased sales volumes primarily in the grocery channel, resulting from increased promotional effectiveness as compared to 2008. Non-route net sales for fiscal 2009 remained constant versus the prior year as increased sales to direct customers were offset by declines with third party distributors and vending customers.

Cost of Sales

Cost of sales, excluding depreciation, decreased \$2.6 million in fiscal 2009 as compared to fiscal 2008. The decrease resulted from a \$2.2 million reduction in key ingredient and packaging costs and a \$3.1 million reduction in fixed manufacturing costs, which were only partially offset by the impact of higher sales volumes.

The \$3.1 million reduction in fixed manufacturing costs in fiscal 2009 versus 2008 was partly attributable to \$2.2 million of income in the second quarter of 2009 associated with the termination of the Company's postretirement life insurance plan, which was partially offset by a \$1.5 million increase in non-cash rental expense associated with the commencement of the operating lease for the Company's new manufacturing facility at the Philadelphia Navy Yard, as well as a \$0.4 million increase in incentive compensation costs. An additional \$1.5 million of income related to the termination of the postretirement life insurance plan was recorded as a component of selling, general and administrative expenses.

Also driving the year over year reduction in fixed manufacturing costs was the impact of a pension corridor charge and postretirement medical insurance plan termination benefit that occurred in fiscal 2008, but did not reoccur in fiscal 2009. The total pension corridor costs in fiscal 2008 were \$12.6 million of which \$7.6 million, or 60%, of the additional pension expense was recorded in fixed manufacturing expense with the remainder, \$5.0 million, recorded as a component of selling, general and administrative expenses. This pension corridor expense in fiscal 2008 resulted from losses in the Company's defined benefit pension plan exceeding its pension corridor, which is equal to the greater of ten percent of the projected pension benefit obligation or ten percent of the market-related value of plan assets. Also, in 2008 the Company recorded a \$7.8 million benefit resulting from a change in the Company's postretirement medical insurance plan of which \$4.7 million, or 60% of this benefit, was recorded in fixed manufacturing costs with the remainder, or \$3.1 million, recorded as a component of selling, general and administrative expenses. The net impact of the pension corridor charge and postretirement medical insurance plan termination benefit on the fixed manufacturing costs in fiscal 2008 was \$2.9 million in expense.

Depreciation

Depreciation expense increased \$3.8 million to \$16.6 million in fiscal 2009 from \$12.9 million in fiscal 2008. The increase was primarily due to the impact of the change in the useful lives of certain assets at the Philadelphia operation which will not be relocated to the new facility, combined with higher depreciation resulting from investments in property and equipment related to the Company's planned move to the new facility. Incremental depreciation resulting from the change in useful lives of the assets at the Philadelphia operation which will not be relocated to the new facility totaled \$8.4 million and \$5.2 million for fiscal 2009 and 2008, respectively. The Company expects incremental depreciation resulting from the change in useful lives to continue through the second quarter of 2010, when the new facility is expected to be fully operational.

Gross Profit

For fiscal 2009, gross profit increased 13.0% to \$47.3 million, which represented 26.2% of 2009 net sales, an increase from 24.1% of 2008 net sales. The biggest drivers of the change were approximately \$4.0 million of benefit from increased volumes and higher net selling prices combined with the reduction in the cost of key ingredients and packaging as well as the decline in fixed manufacturing expenses as explained above. Partially offsetting these benefits was a \$3.8 million increase in depreciation expense.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased by \$1.6 million or 3.3% to \$51.0 million in fiscal 2009 as compared to \$49.4 million in fiscal 2008. The primary drivers of the change were a \$1.2 million increase in accrued incentive compensation costs combined with \$0.8 million in rental expense associated with the new corporate office space at the Philadelphia Navy Yard. In addition, non-incentive salary related compensation expenses increased in fiscal 2009 by approximately \$0.8 million driven in part by the impact of the correction of an error related to the capitalization of certain internal labor costs incurred in connection with the transition of the Company's bakery operations to the Philadelphia Navy Yard. Partially offsetting these increases was a \$1.6 million reduction in general operating expenses including lower transportation costs driven by favorable shipping rates as well as a \$1.5 million in benefit related to the termination of the Company's postretirement life insurance plan in the second quarter of 2009. Additionally, in 2008 the Company recorded \$1.9 million for the net impact of a pension corridor charge and postretirement medical insurance plan termination benefit which did not reoccur in 2009.

Other (Income) Expense, Net

For fiscal 2009, the Company had other expense, net of \$0.1 million compared to \$0.9 million in fiscal 2008. This decrease was primarily driven by revisions to the estimate for postemployment costs associated with the relocation of the Company's bakery operations to the Philadelphia Navy Yard, partially offset by the spare parts reserve of \$1.4 million taken for equipment deemed to be no longer usable or have any fair market value due to the relocation of the Company's bakery operations to the Philadelphia Navy Yard.

Interest Expense

Interest expense increased \$0.6 million to \$2.7 million in fiscal 2009, from \$2.1 million in fiscal 2008. The increase was primarily due to higher debt levels resulting from investments in equipment for the Company's new manufacturing and distribution facility and higher credit spreads.

Taxes

The effective tax rates for fiscal 2009 and fiscal 2008 were 47.3% and 35.2% of income (loss) before provision for income taxes, respectively. These rates compare to a federal statutory rate of 34.0%. During 2009, the Company reversed certain valuation allowances on Philadelphia deferred tax assets totaling \$711 thousand and favorably settled a state tax matter that resulted in discrete tax benefits of approximately \$411 thousand.

Liquidity and Capital Resources

Current assets at December 26, 2009 were \$31.8 million compared to \$34.7 million at December 27, 2008, while current liabilities at December 26, 2009 were \$31.9 million compared to \$23.7 million at December 27, 2008. The decrease in current assets was primarily driven by a reduction in accounts receivable and inventory, partially offset by an increase in deferred income taxes. In fiscal 2009, current liabilities increased \$8.1 million driven by the increase in cash overdraft of \$3.2 million primarily due to management of working capital, an increase in accounts payable of \$1.2 million due primarily to equipment purchases associated with the relocation of the Company's Philadelphia operations and a \$1.3 million increase in accrued employee benefits, primarily related to incentive compensation costs.

In May 2007, the Company announced that as part of its comprehensive operational review of strategic manufacturing alternatives, it entered into an agreement to relocate its Philadelphia operations to the Philadelphia Navy Yard. The bakery lease agreement provides for a 26-year lease term, with renewal options for two additional 10 year terms, for a 345,500 square foot bakery, warehouse and distribution center located on approximately 25 acres. Construction of the new bakery, warehouse and distribution center is complete and the Company has commenced production of pies, snack bars, certain cupcakes and krimpets at the new facility. The equipment commissioning process has begun for the remaining production lines and the Company expects the new facility to be fully operational in the spring of 2010. The term of the bakery lease commenced in October 2009, and the lease provides for no rent payments in the first year of occupancy. Annual rental payments increase from \$3.5 million in the second year of occupancy to \$7.2 million in the final year of the lease. The Company also entered into a 16-year agreement for \$9.5 million in financing at a fixed rate of 8.54% to be used for leasehold improvements. This agreement provides for no payments in the first year of occupancy and then requires monthly payments totaling \$1.2 million annually over the remainder of the term. As of December 26, 2009, the Company recorded prepaid rent of \$7.5 million in "Other Assets" related to improvements of the leased facility net of deferred rent associated with the facility. The Company will account for both agreements as a single unit of

account and as an operating lease and will recognize rental expense associated with this operating lease on a straight-line basis over 26 years.

During April 2009, the Company relocated its corporate headquarters to 36,000 square feet of leased office space in the Philadelphia Navy Yard. The office lease term, which commenced in April 2009, will end at the same time as the new bakery lease. The lease provides for no rent payments in the first six months of occupancy. Annual rental payments increase from approximately \$0.9 million after the first six months of occupancy to approximately \$1.6 million in the final year of the lease. The Company will recognize rental expense associated with the agreement on a straight-line basis over the term of the agreement.

In connection with these agreements, the Company provided a \$1.1 million letter of credit, which increased to \$8.1 million in the beginning of 2009. The outstanding amount of the letter of credit will be reduced starting in 2026 and will be eliminated by the end of the lease term. As of December 26, 2009, the outstanding letter of credit under this arrangement totaled \$8.1 million.

In connection with these agreements and the related construction of the new facilities, the Company provided an additional \$0.5 million letter of credit. There were no outstanding amounts as of December 26, 2009 and this letter of credit will be eliminated in June 2010.

In addition to the facility leases, the Company purchased high-tech, modern baking equipment. This equipment is designed to increase product development flexibility and efficiency, while maintaining existing taste and quality standards. The investment for this project, in addition to any costs associated with the agreements described above, is projected to be approximately \$78.0 million through 2010. The Company anticipates that this project, when completed, will generate approximately \$13.0 million to \$15.0 million in annual pre-tax savings, after taking into account the impact of the new leases, but before any debt service requirements resulting from the investment in the project. In September 2007, the Company closed on a multi-bank credit facility and low-interest development loans provided in part by the Commonwealth of Pennsylvania and the Philadelphia Industrial Development Corporation to finance this investment and refinance the Company's existing revolving credit facilities, as well as to provide for financial flexibility in running the ongoing operations and working capital needs. Capital expenditures were \$38.2 million for 2009 which were primarily related to the construction of the new facility and investment in high-tech equipment. Capital expenditures are projected to be approximately \$13.9 million in 2010 which includes transition and non-transition related capital projects.

The Company had approximately \$20.4 million remaining of available credit facilities as of December 26, 2009, with no outstanding commercial paper obligations; compared to debt principal of approximately \$1.1 million due to be paid off in 2010. In addition to the Company's cash requirements associated with normal operating activity and the financing of the new facilities, the Company has a minimum pension contribution requirement of \$2.9 million in 2010, of which \$0.6 million was made in January 2010. The global financial markets have experienced a high level of turbulence, with instability in the equity and credit markets, and with some banking and financing institutions experiencing significant economic distress. These markets have shown some degree of improvement during 2009, but have not completely restabilized. The Company's access to and value of cash equivalents and short-term investments has not been negatively impacted by the liquidity problems in the banking and financial markets. Although the Company has exercised prudence in the applied investment strategy, it is impossible to predict how the banking and financial markets' future stability and economic conditions might affect the Company's financial position. Further, additional failures of banking and financial institutions could reduce the availability of committed credit facilities and could cause losses to the extent cash amounts or the value of securities exceed government deposit insurance limits, and could restrict access to the public equity and debt markets.

Cash and Cash Equivalents

Historically, the Company has been able to generate sufficient amounts of cash from operations. Bank borrowings are used to supplement cash flow from operations during periods of cyclical shortages. The Company maintains a Bank Credit Facility, a PIDC Credit Facility and MELF Loan 1 and MELF Loan 2, as defined below, and utilizes certain capital and operating leases. Contractual obligations arising under these arrangements and related commitment expirations are detailed in Notes 6 through 8 to the Company's audited consolidated financial statements.

Cash overdrafts are recorded within current liabilities. Cash flows associated with cash overdrafts are classified as financing activities.

In September 2007, the Company entered into a 5 year, \$100.0 million secured credit facility with 4 banks (the "Bank Credit Facility"), consisting of a \$55.0 million fixed asset line of credit, a \$35.0 million working capital revolver and a

\$10.0 million low-interest loan from the agent bank with the Commonwealth of Pennsylvania. The Bank Credit Facility is secured by a blanket lien on the Company's assets and contains various non-financial and financial covenants, including a fixed charge coverage covenant, a funded debt covenant, a minimum liquidity ratio covenant and minimum level of earnings before interest, taxes, depreciation and amortization ("Bank EBITDA") covenant. Bank EBITDA is fully defined as consolidated net income excluding option proceeds and extraordinary gains and losses, plus income tax expense, interest expense, depreciation and amortization, non-cash pension charges subject to certain limitations and any other allowable non-cash gains to or non-cash charges against net income (including a non-cash charge against net income in connection with stock-based compensation), less any non-cash pension gains, in each case to the extent deducted in determining net income. For purposes of this definition of Bank EBITDA, transition costs, restructure charges and any other allowable gains or losses that result from the execution of the strategic manufacturing initiative at the Philadelphia Navy Yard project are excluded.

Interest rates for the Bank Credit Facility fixed asset line of credit and working capital revolver are indexed to LIBOR and include a spread above that index from 125 to 325 basis points based upon the Company's ratio of debt to Bank EBITDA. The fixed asset line of credit and the working capital revolver include commitment fees from 20 to 50 basis points based upon the Company's ratio of debt to Bank EBITDA. The \$10 million low-interest loan bears interest at a fixed rate of 5.5% per annum. As of December 26, 2009 and December 27, 2008, the outstanding balances under the Bank Credit Facility were \$67.3 million and \$45.2 million, respectively.

In September 2007, the Company entered into a 10 year, \$12.0 million secured credit agreement with the PIDC Local Development Corporation ("PIDC Credit Facility"). This credit facility bears interest at a blended fixed rate of 4.5% per annum. As of December 26, 2009 and December 27, 2008, the outstanding balances under the PIDC Credit Facility were \$12.0 million and \$3.0 million, respectively.

In September 2007, the Company entered into a 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 1"). This loan bears interest at a fixed rate of 5.0% per annum. In September 2008, the Company entered into a second 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 2"). The terms and conditions of MELF Loan 2 are substantially the same as MELF Loan 1. The Company borrowed \$5.0 million under MELF Loan 2 in October 2008. As of December 26, 2009 and December 27, 2008, the aggregate outstanding balance under the MELF Loan 1 and MELF Loan 2 was \$10.0 million.

In September 2007, the Company entered into an agreement which governs the shared collateral positions under the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 (the "Intercreditor Agreement") and establishes the priorities and procedures that each lender has in enforcing the terms and conditions of each of their respective agreements. The Intercreditor Agreement permits the group of banks and their agent bank in the Bank Credit Facility to have the initial responsibility to enforce the terms and conditions of the various credit agreements, subject to certain specific limitations, and allows such bank group to negotiate amendments and waivers on behalf of all lenders, subject to the approval of each lender.

As of December 26, 2009, the Company was in compliance with the various non-financial and financial covenants associated with the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2.

The representations, covenant and events of default in the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 are customary for normal financing transactions. Events of default include, among others, (a) the failure to pay when due the obligations owing under the credit facilities; (b) the failure to perform (and not timely remedy, if applicable) certain specific covenants; (c) any representation or warranty made, or report, certificate or financial statement delivered, to the lenders subsequently proven to have been incorrect in any material respect; (d) cross default and cross acceleration; (e) the occurrence of bankruptcy and insolvency events; (f) certain judgments against the Company or any of its subsidiaries; (g) the occurrence of a Change in Control; and (h) violation of certain financial covenants. Upon the occurrence of an event of default, the lenders may terminate the local commitments, accelerate all loans and exercise any of their rights under agreements and the ancillary loan document as a secured party.

Additionally, negative covenants include, among others, limitations on the issuance or repurchase of Company stock and on the incurrence of liens and secured indebtedness by the Company, other than in connection with the Bank Credit Facility and the PIDC Credit Facility or MELF Loan 1 or MELF Loan 2, as applicable.

	<u>Year-End Requirement</u>
Minimum Bank EBITDA	\$15,250,000
Minimum fixed charge coverage ratio	1.2 to 1.0
Maximum debt to Bank EBITDA ratio	6.0 to 1.0
Minimum liquidity ratio	1.0 to 1.0
Limit on annual non-transition related capital expenditures	\$6,500,000

In December 2009, the Company amended its Bank Credit Facility to provide for additional flexibility and to change certain financial covenants, including the maximum operating leverage ratio as of March 27, 2010 and June 26, 2010. In October 2008, the Company amended its Bank Credit Facility to provide for additional flexibility and to change certain financial covenants, including the minimum Bank EBITDA requirement as of December 27, 2008 and the maximum operating leverage as of September 27, 2008 and December 27, 2008, which was necessary to eliminate an instance of non-compliance.

Certain of our covenants become more restrictive over the term of the agreement. Our most restrictive covenants, Bank EBITDA and maximum debt to Bank EBITDA, as amended, have the following requirements for the next year as follows:

	Bank EBITDA	Maximum Debt to Bank EBITDA
Fiscal 2009 Year End	\$15,250,000	6.00 to 1.0
Fiscal 2010 First Quarter	\$15,250,000	5.75 to 1.0
Fiscal 2010 Second Quarter	\$15,250,000	5.50 to 1.0
Fiscal 2010 Third Quarter	\$15,250,000	4.75 to 1.0
Fiscal 2010 Fourth Quarter	\$21,000,000	4.75 to 1.0

As of December 26, 2009, Bank EBITDA was approximately \$18.5 million and the ratio of debt to Bank EBITDA was approximately 5.5 to 1.0. As of December 26, 2009, the Company was in compliance with the various non-financial and financial covenants associated with the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1, and the MELF Loan 2 and is currently projecting compliance with its debt covenants through 2010.

In order to hedge a portion of the Company's exposure to changes in interest rates on debt incurred under its Bank Credit Facility, the Company enters into variable-to-fixed interest rate swap contracts to fix the interest rates on a portion of its variable interest rate debt. These contracts are accounted for as cash flow hedges. Accordingly, these derivatives are marked to market and the resulting gains or losses are recorded in other comprehensive income as an offset to the related hedged asset or liability. The actual interest expense incurred, inclusive of the effect of the hedge in the current period, is recorded in the consolidated statements of operations.

In January 2008, the Company entered into an \$8.5 million notional value interest rate swap contract that increases to \$35.0 million by April 2010 with a fixed LIBOR rate of 3.835% that expires on September 5, 2012. As of December 26, 2009, the notional value of the swap was \$23.5 million. The LIBOR rates were subject to an additional credit spread ranging from 125 basis points to 325 basis points and were equal to 325 basis points as of December 26, 2009. The cumulative change in the fair market value of the derivative instrument was reflected as a liability totaling \$2.1 million and \$1.8 million as of December 26, 2009 and December 27, 2008, respectively.

Net cash generated from operating activities increased by \$4.0 million in fiscal 2009 to \$5.0 million. The increase in net cash generated from operating activities was primarily driven by the aggregate effect of the year over year changes in the Company's net loss, employee related benefits, accounts receivable, and prepayments and other.

Net cash used for investing activities in 2009 increased by \$3.0 million over 2008 to \$37.8 million. The increase was primarily due to the purchase of machinery and equipment for the Company's new manufacturing facility in the Philadelphia Navy Yard.

Net cash generated from financing activities in 2009 decreased by \$1.1 million versus 2008 to \$32.8 million. The decrease was due to the net change in long-term borrowings related to the implementation of the Company's new manufacturing strategy and the Company's management of working capital.

The Company currently anticipates that cash flow from operations, along with the continued availability under the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2, all as described in detail above, will provide sufficient cash to meet the short-term and long-term operating, capital expenditure and financing requirements of the Company.

Recent Accounting Statements

In June 2008, the FASB issued guidance on the accounting for certain share-based payments in the calculation of earnings per share (formerly referred to as “FSP No. EITF 03-06-01, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*”) which classifies unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents as participating securities and requires them to be included in the computation of earnings per share under the two-class method. This guidance is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years and requires all prior period earnings per share data presented to be adjusted retrospectively. The Company adopted the provisions of this guidance for the quarter ended March 28, 2009. The adoption of the required provisions did not have a material impact on the calculation of earnings per share – basic or earnings per share – diluted.

In June 2009, the FASB issued guidance on accounting for the transfers of financial assets (formerly referred to as “Statement No. 166, *Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140*”) which amends the existing guidance on transfers of financial assets. The amendments include: (1) eliminating the qualifying special-purpose entity concept; (2) a new unit of account definition that must be met for transfers of portions of financial assets to be eligible for sale accounting; (3) clarifications and changes to the derecognition criteria for a transfer to be accounted for as a sale; (4) a change to the amount of recognized gain or loss on a transfer of financial assets accounted for as a sale when beneficial interests are received by the transferor; and (5) extensive new disclosures. This guidance is effective for new transfers of financial assets occurring on or after January 1, 2010. The adoption of this guidance is not expected to have a material impact on the Company’s condensed consolidated financial statements; however, it could impact future transactions entered into by the Company.

In June 2009, the FASB issued guidance on the accounting for variable interest entities (formerly referred to as “Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*”) which amends the consolidation guidance for variable-interest entities. The amendments include: (1) the elimination of the exemption for qualifying special purpose entities; (2) a new approach for determining who should consolidate a variable-interest entity; and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. The Company does not expect the adoption of this guidance to have a material impact on the Company’s condensed consolidated financial statements.

In January 2010, the FASB issued Accounting Standards Update (ASU) No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, which provides additional disclosure requirements and clarifies existing disclosure requirements for fair value measurements. This guidance is effective for interim and annual reporting periods beginning after December 15, 2009. The Company does not expect the adoption of this guidance to have a material impact on the Company’s condensed consolidated financial statements.

Item 8. Consolidated Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of the Tasty Baking Company:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations and retained earnings, statements of cash flows, and statements of stockholder's equity and comprehensive income (loss) present fairly, in all material respects, the financial position of Tasty Baking Company and its subsidiaries at December 26, 2009 and December 27, 2008 and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 26, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

All disclosures are pre-tax, unless otherwise noted.

1. Summary of Significant Accounting Policies

Nature of the Business

Tasty Baking Company is a leading producer of sweet baked goods and is one of the nation's oldest and largest independent baking companies and has been in operation since 1914. It has three manufacturing facilities, two in Philadelphia, Pennsylvania, and a third facility in Oxford, Pennsylvania. The Company is in the process of transitioning bakery operations from the Hunting Park, Philadelphia facility to the facility at the Philadelphia Navy Yard. The Company expects this transition to be complete in 2010.

Fiscal Year

The Company and its subsidiaries operate on a 52-53 week fiscal year, ending on the last Saturday of December. Fiscal years 2009 and 2008 were 52-week years.

Basis of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions are eliminated.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to customer sales, discounts and allowances, long-lived asset impairment, indefinite-lived asset impairment, pension and postretirement plan assumptions, workers' compensation expense and income taxes. Actual results may differ from these estimates.

Concentration of Credit

The Company encounters, in the normal course of business, exposure to concentrations of credit risk with respect to trade receivables. Ongoing credit evaluations of customers' financial conditions are performed and, generally, no collateral is required. The Company maintains reserves for potential credit losses and such losses have not exceeded management's expectations. The Company's top twenty customers represented 61.1% of its 2009 net sales and 59.0% of its 2008 net sales. The Company's largest customer, Wal-Mart represented 20.6% of its net sales in 2009 and 19.7% of its net sales in 2008. In addition, Wal-Mart represented 23.1% and 21.0% of total net accounts receivable as of December 26, 2009 and December 27, 2008, respectively. If any of the top twenty customers could not pay their current balance due, the Company's ability to maintain current profits could be adversely affected.

Revenue Recognition

Revenue is recognized when title and risk of loss pass, which is upon receipt of goods by the independent sales distributors, retailers or third party distributors. For route sales, the Company sells to independent sales distributors who in turn, sell to retailers. Revenue for sales to independent sales distributors is recognized upon receipt of the product by the distributor. For sales made directly to a customer or a third party distributor, revenue is recognized upon receipt of the products by the retailer or third party distributor.

The Company gives allowances and offers various sales incentive programs to customers and consumers that are accounted for as a reduction of sales, including price promotion discounts; distributor discounts; coupons; customer rebates; cooperative advertising; and product returns. Price promotion discount expense is recorded when the related product being discounted is sold by the independent sales distributor to the customer. Independent sales distributors receive a purchase discount equal to a percentage of the wholesale price of product sold to customers, net of promotion and return costs, and are recorded at the time of sale. Coupon expense estimates are calculated using the number of coupons dropped to consumers and the estimated redemption percentage. Estimates for customer rebates assume that customers will meet the required quantities to qualify for payment. Cooperative advertising expense is recorded based on the estimated advertising cost of the underlying program. Product returns are estimated based upon sales in the last two weeks of the year and the historical return experience.

Sale of Routes

Sales distribution routes are primarily owned by independent sales distributors that purchase the exclusive right to sell and distribute Tastykake products in defined geographic areas. When the Company sells routes to independent sales distributors, it recognizes a gain or loss on the sale. Routes sold by the Company are either existing routes that the Company has previously purchased from an independent sales distributor, or newly established routes in new areas. Any gain or loss recorded by the Company is based on the difference between the sales price and the carrying value of the route. Any potential impairment of net carrying value is reserved as identified. The Company recognizes gains or losses on sales of routes when all material services or conditions related to the sale have been substantially performed or satisfied by the Company. In most cases, the Company will finance a portion of the purchase price with interest bearing notes, which are required to be repaid in full. Interest rates on the notes are based on Treasury or LIBOR yields plus a spread. The Company has no obligation to later repurchase a route but may choose to do so to facilitate a change in route ownership.

Sales distribution routes owned by the Company are considered to have an indefinite life and are reviewed for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Any potential impairment is recognized when the fair value of the route is less than its net carrying value. As of December 26, 2009 and December 27, 2008, the net carrying values of sales distribution routes owned by the Company were \$2.1 million and \$1.9 million, respectively.

Cash and Cash Equivalents

The Company considers investments with an original maturity of three months or less on its acquisition date to be cash equivalents. Cash overdrafts are recorded within current liabilities. Cash flows associated with cash overdrafts are classified as financing activities.

Inventory Valuation

Inventories, which include material, labor and manufacturing overhead, are stated at the lower of cost or market, cost being determined using the first-in, first-out ("FIFO") method. Inventory balances for raw materials, work in progress, and finished goods are regularly analyzed and provisions for excess and obsolete inventory are recorded, if necessary, based on the forecast of product demand and production requirements.

Property and Depreciation

Property, plant and equipment are carried at cost. Depreciation is computed by the straight-line method over the following estimated useful lives of the assets, except where a shorter useful life is necessitated by the Company's decision to relocate its Philadelphia Operations.

<u>Asset Category</u>	<u>Estimated Useful Life</u>
Buildings and improvements	26-39 years
Machinery and equipment	7-15 years
Vehicles	5-10 years
Capitalized hardware and software	5 years
Construction in progress	Not applicable

Spare parts are capitalized as part of machinery and equipment and are expensed as utilized or capitalized as part of the relevant fixed asset. Spare parts are valued using a moving average method and are reviewed for potential obsolescence on a regular basis. Reserves are established for all spare parts that are no longer usable and have no fair market value. As of December 26, 2009 and December 27, 2008, the Company had a reserve for excess and obsolete spare parts of \$1.5 million and \$0.1 million, respectively.

Costs of major additions, replacements and betterments are capitalized, while maintenance and repairs, which do not improve or extend the life of the respective assets, are expensed as incurred. For significant projects, the Company capitalizes interest and internal and external labor costs associated with the construction and installation of plant and equipment and significant information technology development projects.

Long-lived assets are reviewed for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In instances where the carrying amount may not be recoverable, the review for potential impairment utilizes estimates and assumptions of future cash flows directly related to the asset. For assets where there is no plan for future use, the review for impairment includes estimates and assumptions of the fair value of the asset, which is based on the best information available. These assets are recorded at the lower of their book

value or fair value.

The Company has a conditional asset retirement obligation related to asbestos in its Philadelphia manufacturing facility. As a result of the Company's decision to relocate its Philadelphia operations, it was able to estimate a settlement date for the asset retirement obligation and recognized a liability for this obligation. This obligation will continue to accrete to the full value of the future obligation over the remaining period until settlement of the obligation which is expected to occur in the second quarter of 2010, while the capitalized asset retirement cost is depreciated through the remaining useful life of the Philadelphia manufacturing facility. The Company recorded \$0.4 million in interest during 2009 and 2008 associated with the conditional asset retirement obligation. As of December 26, 2009 and December 27, 2008 the asset retirement obligation totaled approximately \$7.5 million and \$7.1 million, respectively.

Grants

The Company receives grants from various government agencies for employee training purposes. Expenses for the training are recognized in the Company's income statement at the time the training takes place. When the proper approvals are given and funds are received from the government agencies, the Company records an offset to the training expense already recognized.

In 2007, in connection with the decision to relocate its Philadelphia manufacturing operations, the Company received a \$0.6 million grant from the Department of Community and Economic Development of the Commonwealth of Pennsylvania ("DCED"). The opportunity grant has certain spending, job retention and nondiscrimination conditions with which the Company must comply. The Company accounted for this grant under the deferred income approach and will amortize the deferred income over the same period as the useful life of the asset acquired with the grant. The asset acquired with the grant is expected to be placed into service in 2010.

The Company, in conjunction with The Reinvestment Funds, Allegheny West Foundation and the DCED, developed and participates in Project Fresh Start (the "Project"). The Project is an entrepreneurial development program that provides an opportunity for qualified minority entrepreneurs to purchase routes from independent sales distributors. The source of grant monies for this program is the DCED. The grants are used by minority applicants to partially fund their purchase of an independent sales distribution route.

Because the Project's grant funds merely pass through the Company in its role as an intermediary, the Company records an offsetting asset and liability for the total amount of grants as they relate to the Project. There is no statement of operations impact related to the establishment of, or subsequent change to, the asset and liability amounts.

Marketing Costs

The Company expenses marketing costs, which include advertising and consumer promotions, either as they are incurred or over the period in which the future benefits are expected to be received. Marketing costs are included as a part of selling, general and administrative expense. Total marketing expenses, including direct marketing and marketing overhead costs, totaled \$3.8 million and \$3.7 million, for the years ended December 26, 2009 and December 27, 2008, respectively.

Computer Software Costs

The Company capitalizes certain costs, such as software coding, installation and testing that are incurred to purchase or create and implement internal use computer software. The majority of the Company's capitalized software relates to the implementation of its enterprise resource planning system and the handheld computer system, as well as various upgrades and enhancements to existing software. The Company's unamortized capitalized computer software costs totaled \$5.0 million and \$5.2 million as of December 26, 2009 and December 27, 2008, respectively. The Company recognized \$2.4 million and \$2.2 million of amortization expense related to its capitalized computer software costs in the consolidated statements of operations during fiscal 2009 and 2008, respectively.

Freight, Shipping and Handling Costs

Outbound freight, shipping and handling costs are included as a part of selling, general and administrative expense. Total outbound freight, shipping and handling costs totaled \$10.9 million and \$11.4 million, for the years ended December 26, 2009 and December 27, 2008, respectively. Inbound freight, shipping and handling costs are capitalized with inventory and expensed with cost of sales.

Retirement Plans

The Company's funding policy for the pension plan is to contribute amounts deductible for federal income tax purposes plus such additional amounts, if any, as the Company's actuarial consultants advise to be appropriate. In 1987, the Company elected to immediately recognize all gains and losses in excess of the pension corridor, which is equal to the greater of ten percent of the projected pension benefit obligation or ten percent of the market-related value of plan assets.

The Company accrues normal periodic pension expense or income during the year based upon certain assumptions and estimates from its actuarial consultants. These estimates and assumptions include discount rate, rate of return on plan assets, compensation increases, mortality and employee turnover. In addition, the rate of return on plan assets is directly related to changes in the equity and credit markets, which can be very volatile. The use of the above estimates and assumptions, market volatility and the Company's election to immediately recognize all gains and losses in excess of its pension corridor in the current year may cause the Company to experience significant changes in its pension expense or income from year to year. Expense or income that falls outside the corridor is recognized only in the fourth quarter of each year.

Accounting for Derivative Instruments

The Company has entered into variable-to-fixed rate interest rate swap contracts to fix the interest rates on a portion of its variable interest rate debt. These contracts are accounted for as cash flow hedges. Accordingly, these derivatives are marked to market and the resulting gains or losses are recorded in other comprehensive income as an offset to the related hedged asset or liability. The actual interest expense incurred, inclusive of the effect of the hedge in the current period, is recorded in the consolidated statement of operations.

The Company has also entered into foreign currency forward contracts to hedge against fluctuations in foreign currency exchange rates. These contracts are accounted for as fair value foreign currency hedges. Accordingly, the changes in fair value of both the commitment and the derivative instruments are recorded currently in the consolidated statement of operations, with the corresponding asset and liability recorded on the balance sheet.

Treasury Stock

Treasury stock is stated at cost. Cost is determined by the FIFO method.

Accounting for Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates in effect when the differences are expected to be recovered or settled.

Net Income (Loss) Per Common Share

Net income (loss) per common share is presented as basic and diluted earnings per share. Net income (loss) per common share – basic represents the earnings for the period available to each share of common stock outstanding during the reporting period. Net income (loss) per common share – diluted represents the amount of earnings for the period available to each share of common stock outstanding during the reporting period and to each share that would have been outstanding assuming the issuance of common shares for all dilutive potential common shares outstanding during the reporting period. Refer to Note 19 for additional information regarding the calculation of basic and diluted earnings per common share for the periods presented.

Share-based Compensation

Share-based compensation expense recognized during the current period is based on the value of the portion of share-based payment awards that is ultimately expected to vest. The total value of compensation expense for restricted stock and restricted stock units payable in stock is equal to the ending price of Tasty Baking Company shares on the date of grant. Forfeitures are required to be estimated at the time of grant in order to estimate the amount of share-based awards that will ultimately vest. The forfeiture rate is based on the Company's historical forfeiture experience. The Company calculated its historical pool of windfall tax benefits.

Out of Period Adjustment

During the fourth quarter of fiscal 2009, we identified an error in our financial statements related to 2007 through the third quarter of fiscal 2009. This error related to the capitalization of certain internal labor costs incurred in connection with the transition of the Company's bakery operations to the Philadelphia Navy Yard. We corrected the error during the fourth quarter of fiscal 2009, which had the effect of increasing selling, general and administrative costs by \$0.7 million,

and increasing the net loss by \$0.4 million. This prior period error is not material to the financial results of the current or previously issued annual financial statements or previously issued interim financial statements.

Recent Accounting Statements

In June 2008, the FASB issued guidance on the accounting for certain share-based payments in the calculation of earnings per share (formerly referred to as “FSP No. EITF 03-06-01, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*”) which classifies unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents as participating securities and requires them to be included in the computation of earnings per share under the two-class method. This guidance is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years and requires all prior period earnings per share data presented to be adjusted retrospectively. The Company adopted the provisions of this guidance for the quarter ended March 28, 2009. The adoption of the required provisions did not have a material impact on the calculation of earnings per share – basic or earnings per share – diluted.

In June 2009, the FASB issued guidance on accounting for the transfers of financial assets (formerly referred to as “Statement No. 166, *Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140*”) which amends the existing guidance on transfers of financial assets. The amendments include: (1) eliminating the qualifying special-purpose entity concept; (2) a new unit of account definition that must be met for transfers of portions of financial assets to be eligible for sale accounting; (3) clarifications and changes to the derecognition criteria for a transfer to be accounted for as a sale; (4) a change to the amount of recognized gain or loss on a transfer of financial assets accounted for as a sale when beneficial interests are received by the transferor; and (5) extensive new disclosures. This guidance is effective for new transfers of financial assets occurring on or after January 1, 2010. The adoption of this guidance is not expected to have a material impact on the Company’s condensed consolidated financial statements; however, it could impact future transactions entered into by the Company.

In June 2009, the FASB issued guidance on the accounting for variable interest entities (formerly referred to as “Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*”) which amends the consolidation guidance for variable-interest entities. The amendments include: (1) the elimination of the exemption for qualifying special purpose entities; (2) a new approach for determining who should consolidate a variable-interest entity; and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. The Company does not expect the adoption of this guidance to have a material impact on the Company’s condensed consolidated financial statements.

In January 2010, the FASB issued Accounting Standards Update (ASU) No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements* which provides additional disclosure requirements and clarifies existing disclosure requirements for fair value measurements. This guidance is effective for interim and annual reporting periods beginning after December 15, 2009. The Company does not expect the adoption of this guidance to have a material impact on the Company’s condensed consolidated financial statements.

2. New Facilities

In May 2007, the Company announced that as part of its comprehensive operational review of strategic manufacturing alternatives, it entered into an agreement to relocate its Philadelphia operations to the Philadelphia Navy Yard. The term of the bakery lease provides for a 26-year lease term, with renewal options for two additional 10 year terms, for a 345,500 square foot bakery, warehouse and distribution center located on approximately 25 acres. Construction of the new bakery, warehouse and distribution center is complete and the Company has commenced production of pies, snack bars and certain cupcakes and krimpets. The equipment commissioning process has begun for the remaining production lines and the Company expects the new facility to be fully operational in the spring of 2010. The term of the bakery lease commenced in October 2009, and provides for no rent payments in the first year of occupancy. Rental payments increase from \$3.5 million in the second year of occupancy to \$7.2 million in the final year of the lease. The Company also entered into a 16-year agreement for \$9.5 million in financing at a fixed rate of 8.54% to be used for leasehold improvements. This agreement provides for no payments in the first year of occupancy and then requires monthly payments totaling \$1.2 million annually over the remainder of the term. As of December 26, 2009, the Company recorded prepaid rent of \$7.5 million in “Other Assets” related to improvements of the leased facility net of deferred rent associated with the facility. The Company will account for both agreements as a single unit of account and as an operating lease and will recognize rental expense associated with this operating lease on a straight-line basis over 26 years.

During April 2009, the Company relocated its corporate headquarters to 36,000 square feet of leased office space in the Philadelphia Navy Yard. The office lease term, which commenced in April 2009, will end at the same time as the new bakery lease. The office lease provides for no rent payments during the first six months of occupancy. Annual rental payments increase from approximately \$0.9 million after the first six months of occupancy to approximately \$1.6 million in the final year of the lease. The Company will recognize rental expense associated with the operating lease on a straight-line basis over the term of the agreement.

In connection with these agreements, the Company provided a \$1.1 million letter of credit, which increased to \$8.1 million in the beginning of 2009. The outstanding amount of the letter of credit will be reduced starting in 2026 and will be eliminated by the end of the lease term. As of December 26, 2009, the outstanding letter of credit under this arrangement totaled \$8.1 million.

In connection with these agreements and the related construction of the new facilities, the Company provided an additional \$0.5 million letter of credit. There were no outstanding amounts as of December 26, 2009 and this letter of credit will be eliminated in June 2010.

In addition to the facility leases, the Company purchased high-tech, modern baking equipment. The equipment is designed to increase product development flexibility and efficiency, while maintaining existing taste and quality standards. The investment for this project, in addition to any costs associated with the agreements described above, is projected to be approximately \$78.0 million through 2010. In September 2007, the Company closed on a multi-bank credit facility and low-interest development loans provided in part by the Commonwealth of Pennsylvania and the Philadelphia Industrial Development Corporation (“PIDC”) to finance this investment and refinance the Company’s existing revolving credit facilities, as well as to provide for financial flexibility in running the ongoing operations and working capital needs.

As of December 26, 2009, the Company had not incurred any material obligations related to one-time termination benefits, contract termination costs or other associated costs.

The Company has evaluated the long-lived assets utilized in its Philadelphia operations for potential impairment or held-for-sale classification. Based on the commitment to the planned relocation, neither the assets to be relocated nor the assets to be left in place at the Philadelphia operations have suffered impairment. Therefore the estimated fair value of the asset groups continues to exceed the carrying amount of such asset groups. The remaining useful lives of these assets have been updated to be consistent with the time remaining until the completion of the relocation of the Company’s operations.

3. Restructure

As part of the relocation of its Philadelphia operations the Company expects approximately 215 positions to be eliminated over the course of the transition. While the Company expects to achieve much of this result through normal attrition and the reduction of contract labor, it is probable that the Company will incur obligations related to postemployment benefits. During the third quarter of 2009, the Company revised its estimate of the postemployment costs expected to be incurred in connection with the relocation of its Philadelphia operation. Amounts associated with the initial recognition of the restructuring liability and subsequent changes to the estimated liability are recorded in the other (income) expense, line of the statement of operations. The Company expects the restructuring liability to settle and likewise the majority of payments to be made in connection with the restructuring program to be paid during 2010.

The following is the estimated future obligations related to postemployment benefits associated with the relocation of the Company’s Philadelphia operations (in thousands):

	2009	2008
Restructure reserve, beginning of the year	\$ 1,652	\$ -
Additions	-	1,652
Net change resulting from update to estimate	(574)	-
Restructure reserve, end of the year	\$ 1,078	\$ 1,652

4. Inventories

Inventories are classified as follows (in thousands):

	December 26, 2009	December 27, 2008
Finished goods	\$ 1,939	\$ 2,275
Work in progress	116	109
Raw materials and supplies	4,712	4,806
	<hr/>	<hr/>
	\$ 6,767	\$ 7,190

The inventory balance has been reduced by reserves for obsolete and slow-moving inventories totaling \$42 thousand as of December 26, 2009. At December 27, 2008, there were no reserves established for obsolete or slow-moving inventories.

5. Long-Term Receivables from Independent Sales Distributors

The Company's sales distribution routes are primarily owned by independent sales distributors that purchased the exclusive right to sell and distribute TASTYKAKE® products in defined geographical territories. The Company maintains a wholly-owned subsidiary to assist in financing route purchase activities if requested by new independent sales distributors, using the route and certain associated assets as collateral. Most route purchase activities involve transactions between existing and new independent sales distributors. At December 26, 2009 and December 27, 2008, interest-bearing notes receivable (based on Treasury or LIBOR yields plus a spread) of \$10.7 million and \$11.3 million, respectively, were included in current and long-term receivables in the accompanying consolidated balance sheets.

6. Notes Payable and Long-Term Debt

In September 2007, the Company entered into a 5 year, \$100.0 million secured credit facility with 4 banks (the "Bank Credit Facility"), consisting of a \$55.0 million fixed asset line of credit, a \$35.0 million working capital revolver and a \$10.0 million low-interest loan from the agent bank with the Commonwealth of Pennsylvania. The Bank Credit Facility is secured by a blanket lien on the Company's assets and contains various non-financial and financial covenants, including a fixed charge coverage covenant, a funded debt covenant, a minimum liquidity ratio covenant and minimum level of earnings before interest, taxes, depreciation and amortization ("Bank EBITDA") covenant. Interest rates for the fixed asset line of credit and working capital revolver are indexed to LIBOR and include a spread above that index from 125 to 325 basis points based upon the Company's ratio of debt to Bank EBITDA. The fixed asset line of credit and the working capital revolver include commitment fees from 20 to 50 basis points based upon the Company's ratio of debt to Bank EBITDA. The \$10 million low-interest loan bears interest at a fixed rate of 5.5% per annum. In December 2009, the Company amended its Bank Credit Facility to provide for additional flexibility and to change certain financial covenants, including the maximum operating leverage ratio as of March 27, 2010 and June 26, 2010. In October 2008, the Company amended its Bank Credit Facility to provide for additional flexibility and to change certain financial covenants, including the minimum Bank EBITDA requirement as of December 27, 2008 and the maximum operating leverage as of September 27, 2008 and December 27, 2008 which was necessary to eliminate an instance of non-compliance. As of December 26, 2009 and December 27, 2008, the outstanding balances under the Bank Credit Facility were \$67.3 million and \$45.2 million, respectively.

In September 2007, the Company entered into a 10 year, \$12.0 million secured credit agreement with the PIDC Local Development Corporation ("PIDC Credit Facility"). This credit facility bears interest at a blended fixed rate of 4.5% per annum, participates in the blanket lien on the Company's assets and contains customary representations and warranties as well as customary affirmative and negative covenants essentially similar to those in the Bank Credit Facility, as amended. As of December 26, 2009 and December 27, 2008, the outstanding balances under the PIDC Credit Facility were \$12.0 million and \$3.0 million, respectively.

In September 2007, the Company entered into a 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 1"). This loan bears interest at a fixed rate of 5.0% per annum and contains customary representations and warranties as well as customary affirmative and negative covenants similar to those in the Bank Credit Facility, as amended. In September 2008, the Company entered into a second 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 2"). The terms and conditions of MELF Loan 2 are substantially the same as MELF Loan 1. The Company borrowed \$5.0 million under MELF Loan 2 in October 2008. As of December 26, 2009 and December 27, 2008, the aggregate

outstanding balance under the MELF Loan 1 and MELF Loan 2 was \$10.0 million.

As of December 26, 2009, the Company was in compliance with the various nonfinancial and financial covenants associated with the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2.

In September 2007, the Company entered into an agreement which governs the shared collateral positions under the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 (the "Intercreditor Agreement"), and establishes the priorities and procedures that each lender has in enforcing the terms and conditions of each of their respective agreements. The Intercreditor Agreement permits the group of banks and their agent bank in the Bank Credit Facility to have the initial responsibility to enforce the terms and conditions of the various credit agreements, subject to certain specific limitations, and allows such bank group to negotiate amendments and waivers on behalf of all lenders, subject to the approval of each lender.

The Company has used and expects to continue to utilize proceeds from the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 to finance the Company's move of its corporate headquarters to the Philadelphia Navy Yard and its move of the Philadelphia manufacturing facility to new facilities at the Philadelphia Navy Yard, along with working capital needs.

Notes payable, banks, and current portion of long-term debt consists of the following (in thousands):	Maturity Dates	December 26, 2009	December 27, 2008
Current portion of long term debt (5.44% at December 26, 2009 and 5.50% at December 27, 2008)		<u>\$ 1,128</u>	<u>\$ 1,000</u>
Long-term debt consists of the following (in thousands):			
Credit Facility (5.09% at December 26, 2009 and 4.55% at December 27, 2008)	September 2012	\$ 22,730	\$ 29,900
Fixed Asset Loan (5.03% at December 26, 2009 and 6.03% at December 27, 2008)	September 2012	43,545	14,294
MELF (5.00% at December 26, 2009 and 5.00% at December 27, 2008)	September 2017	9,872	10,000
PIDC (4.50% at December 26, 2009 and 6.50% at December 27, 2008)	September 2017	<u>12,000</u>	<u>3,000</u>
Total long-term debt		<u>\$ 88,147</u>	<u>\$ 57,194</u>

The aggregate amount of long-term debt maturing is as follows (in thousands):

	Long-Term Debt
2011	\$ 3,849
2012	68,178
2013	2,960
2014	3,019
2015	3,081
Later years	<u>7,060</u>
Total long-term debt	<u>\$ 88,147</u>

7. Obligations under Capital Leases

Obligations under capital leases consist of the following (in thousands):

	December 26, 2009	December 27, 2008
Capital lease obligation, maturing August 2012	\$ 84	\$ -
Capital lease obligation, with interest at 5.90% and 7.49%, and maturities between March 2011 and March 2013	615	810
Capital lease obligation, with interest rates between 7.50% and 9.50% and maturities between June 2010 and October 2014	1,443	1,052
Capital lease obligation, with interest rates between 11.00% and 14.50% and maturities between March 2010 and November 2014	164	57
	<u>2,306</u>	<u>1,919</u>
Less: current portion	(919)	(720)
	<u>\$ 1,387</u>	<u>\$ 1,199</u>

8. Commitments and Contingencies

The Company leases certain facilities, machinery, automotive equipment, computer equipment and facilities, including the new manufacturing and distribution facility at the Philadelphia Navy Yard under noncancelable lease agreements. The Company expects that in the normal course of business, leases that expire will be renewed or replaced by other leases. Property, plant and equipment related to capital leases were \$3.8 million at December 26, 2009, and \$2.6 million at December 27, 2008, with accumulated amortization of \$1.5 million and \$0.7 million, respectively. Depreciation and amortization of assets recorded under capital leases was \$0.8 million in 2009 and \$0.6 million in 2008.

The following is a schedule of future minimum lease payments as of December 26, 2009 (in thousands):

	Capital Leases	Noncancelable Operating Leases
2010	\$ 1,066	\$ 2,850
2011	799	6,298
2012	451	6,054
2013	167	6,112
2014	99	6,039
Later years	-	151,058
Total minimum lease payments	<u>\$ 2,582</u>	<u>\$ 178,411</u>
Less interest portion of payments	(276)	
Present value of future minimum lease payments	<u>\$ 2,306</u>	

Rental expense was approximately \$4.5 million in 2009 and \$2.2 million in 2008.

In connection with a workers' compensation insurance policy, the Company has obtained standby letters of credit in the amount of \$2.4 million that is required by its insurance carriers in order to guarantee future payment of claims.

In connection with the lease agreement for the Company's new production facility, the Company provided a \$1.1 million letter of credit, which increased to \$8.1 million in the beginning of 2009. The outstanding amount of the letter of credit will be reduced starting in 2026 and will be eliminated by the end of the lease term. As of December 26, 2009, the outstanding letter of credit under this arrangement totaled \$8.1 million.

In connection with funding its pension requirement, the Company is obligated to make a minimum contribution of \$2.9 million in 2010, of which \$0.6 million was made in January 2010.

The Company enters into purchase commitments primarily related to the purchase of ingredients and packaging utilized in the ordinary course of business, which historically approximates \$60.0 million to \$70.0 million annually. The majority of these items are obtained by purchase orders on an as needed basis.

The Company is also involved in certain legal and regulatory actions, all of which have arisen in the ordinary course of the Company's business. The Company is unable to predict the outcome of these matters, but does not believe that the ultimate resolution of such matters will have a material adverse effect on the consolidated financial position or results of operations of the Company. However, if one or more of such matters were determined adversely to the Company, the ultimate liability arising therefrom is not expected to be material to the financial position of the Company, but could be material to its results of operations in any quarter or annual period.

9. Derivative Instruments

In order to hedge a portion of the Company's exposure to changes in interest rates on debt incurred under its Bank Credit Facility, the Company enters into variable-to-fixed interest rate swap contracts to fix the interest rates on a portion of its variable interest rate debt. These contracts are accounted for as cash flow hedges. Accordingly, these derivatives are marked to market and the resulting gains or losses are recorded in other comprehensive income as an offset to the related hedged asset or liability. The actual interest expense incurred, inclusive of the effect of the hedge in the current period, is recorded in the consolidated statements of operations. The Company has hedged a portion of its exposure to changes in interest rates through September 5, 2012.

In January 2008, the Company entered into an \$8.5 million notional value interest rate swap contract that increases to \$35.0 million by April 2010 with a fixed LIBOR rate of 3.835% that expires on September 5, 2012. As of December 26, 2009, the notional value of the swap was \$23.5 million. The LIBOR rates were subject to an additional credit spread ranging from 125 basis points to 325 basis points and were equal to 325 basis points as of December 26, 2009. The cumulative change in the fair market value of the derivative instrument is reflected as a liability totaling \$2.1 million and \$1.8 million as of December 26, 2009 and December 27, 2008, respectively.

In May 2008, the Company entered into an \$8.0 million notional value interest rate swap with a fixed LIBOR rate of 2.97% that expires on May 1, 2011. The LIBOR rates were subject to an additional credit spread ranging from 125 basis points to 325 basis points and were equal to 325 basis points as of December 26, 2009. The cumulative change in the fair market value of the derivative instrument is reflected as a liability totaling \$0.3 million as of December 26, 2009 and December 27, 2008.

As part of the construction of its new manufacturing facility, the Company entered into firm commitments to acquire machinery and equipment denominated in a foreign currency. In order to hedge the exposure resulting from changes in foreign currency rates, the Company entered into foreign currency forward contracts denominated in Australian Dollars ("AUD"). These contracts are accounted for as foreign currency fair value hedges. Accordingly, the changes in fair value of both the firm commitments and the derivative instruments are recorded currently in the consolidated statements of operations, with the corresponding asset and liability recorded on the balance sheets.

As of December 26, 2009 and December 27, 2008, the notional principle of outstanding foreign currency forward contracts designated as hedges was 1.4 million AUD (\$1.2 million USD) and 5.3 million AUD (\$3.6 million USD), respectively.

The Company held foreign currency forward contracts, which were originally entered into to hedge the risk of foreign currency fluctuations associated with commitments denominated in AUD; however, during fiscal 2009 certain of these forward contracts were determined to be no longer designated as hedging instruments. All of these contracts have been settled as of December 26, 2009.

The following table provides the location and amounts of gains and losses associated with the Company's derivative instruments (in thousands):

	Income Statement Location	Fifty-two Weeks Ended	
		December 26, 2009	December 27, 2008
<u>Cash Flow Hedges</u>			
<u>Interest Rate Swaps</u>			
Net loss recognized in accumulated other comprehensive income		\$ (254)	\$ (2,089)
Net loss reclassified from accumulated other comprehensive income to interest expense	Interest expense	(630)	(117)
<u>Fair Value Hedges</u>			
<u>Foreign currency forward contracts</u>			
Net gain (loss) recognized in other income, net	Other (income) expense, net	718	(981)

Amounts are reclassified from accumulated other comprehensive income to interest expense for the interest rate swaps on the scheduled maturity dates defined by the agreements.

Foreign currency fair value hedges are entered into against foreign currency fluctuations of firm commitments. Amounts recognized in other income associated with these fair value hedges are fully offset by foreign currency fluctuations of the firm commitments also recognized as other income, net.

In addition to the derivative instruments described above, the Company has entered into foreign currency forward contracts that are not designated as hedging activities. These forward contracts do not have any impact on net income as the Company has entered into equal and offsetting buy and sell contracts and changes in fair value are fully offsetting within the other (income) expense, net line of the consolidated statements of operations.

Derivative instruments are reflected in the condensed consolidated balance sheets as follows (in thousands):

	Balance Sheet Location		
		December 26, 2009	December 27, 2008
<u>Hedging derivative instruments</u>			
Interest rate swaps	Other non-current liabilities	\$ (2,342)	\$ (2,089)
Foreign currency hedges	Prepayments and other	133	-
Foreign currency hedges	Other current liabilities	-	(382)
Foreign currency hedges	Other non-current liabilities	-	(203)

Counterparties to the foreign currency forward contracts and interest rate swaps are primarily major banking institutions with credit ratings of investment grade or better and no collateral is required. There are no significant risk concentrations. The Company believes the risk of incurring losses on derivative contracts related to credit risk is remote.

10. Fair Value Measurements

The Company discloses certain fair value measurements based on a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;
- Level 2. Inputs, other than quoted prices included within Level 1, that are observable either directly or indirectly; and
- Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The following table presents assets / (liabilities) measured at fair value on a recurring basis at December 26, 2009 (in thousands):

Description	Balance as of December 26, 2009	Fair Value Measurement at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial instruments owned:				
Interest rate swaps	\$ (2,342)	\$ —	\$ (2,342)	\$ —
Foreign currency hedges	133	—	133	—
Total financial instruments owned	\$ (2,209)	\$ —	\$ (2,209)	\$ —

The following table presents assets / (liabilities) measured at fair value on a recurring basis at December 27, 2008 (in thousands):

Description	Balance as of December 27, 2008	Fair Value Measurement at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial instruments owned:				
Interest rate swaps	\$ (2,089)	\$ —	\$ (2,089)	\$ —
Foreign currency hedges	(585)	—	(585)	—
Total financial instruments owned	\$ (2,674)	\$ —	\$ (2,674)	\$ —

As of December 26, 2009 and December 27, 2008, the carrying values of cash and cash equivalents, accounts receivable, notes receivable, accounts payable and other current assets and liabilities are representative of fair value due to the short-term nature of the instruments. The Company's carrying value of long-term debt approximates fair value.

11. Defined Benefit Retirement Plans

The Company maintains a partially funded noncontributory Defined Benefit Retirement Plan (the "DB Plan") providing retirement benefits. Benefits under this DB Plan generally are based on the employees' years of service and compensation during the years preceding retirement. The Company amended the DB Plan to freeze benefit accruals effective March 26, 2005. The Company maintains a DB Supplemental Executive Retirement Plan ("SERP") for key employees designated by the Board of Directors (the "Board"), however, there are no current employees earning benefits under this plan. See Note 12 for more information. The Company also maintains a frozen unfunded Retirement Plan for Directors (the "DB Director Plan"). The benefit amount is the annual cash retainer in the year of retirement, but not less than \$16 thousand for Directors serving on December 31, 1993.

Effective February 15, 2007, benefit accruals under the DB Director Plan were frozen for current directors and future directors were precluded from participating in the plan. Participants are credited for service under the DB Director Plan after February 15, 2007 solely for vesting purposes. On February 15, 2007, the Board of Directors approved a Deferred Stock Unit Plan (the "DSU Plan"). The DSU Plan provides that for each fiscal quarter, the Company will credit DSUs to the director's account equivalent in value to \$4 thousand on the last day of such quarter, provided that he or she is a

director on the last day of such quarter. Directors will be entitled to be paid in shares upon termination of Board service provided the director has at least five years of continuous service on the Board. The shares may be paid out in a lump sum or at the director's election, over a period of five years.

The amounts in accumulated other comprehensive loss that are expected to be recognized as components of net periodic pension cost (credit) during the next fiscal year are as follows (in thousands):

Actuarial loss	\$	60
Prior service (credit) cost		-
Transition (asset) obligation		-
Total	\$	<u>60</u>

The components of the DB Plan, DB SERP, and DB Director Plan's costs are summarized as follows (in thousands):

	2009	2008
Service cost-benefits earned during the year	\$ -	\$ -
Interest cost on projected benefit obligation	5,031	5,020
Expected return on plan assets	(3,823)	(5,071)
Prior service cost amortization	(10)	(18)
Actuarial loss recognition	48	61
Actuarial loss recognition, in excess of corridor	-	12,631
Curtailement charge	-	-
Net pension amount charged to (income) expense:	<u>\$ 1,246</u>	<u>\$ 12,623</u>

The following table sets forth the change in projected benefit obligation, change in plan assets and funded status of these plans (in thousands):

	2009	2008
Change in Projected Benefit Obligation		
Projected benefit obligation, beginning of year	\$ 80,502	\$ 83,329
Service cost	-	-
Interest cost	5,031	5,020
Actuarial (gain) loss	5,318	(1,454)
Benefits paid	(6,297)	(6,393)
Curtailement	-	-
Projected benefit obligation, end of year	<u>\$ 84,554</u>	<u>\$ 80,502</u>
Change in Accumulated Benefit Obligation		
Accumulated benefit obligation, beginning of year	\$ 80,502	\$ 83,329
Accumulated benefit obligation, end of year	\$ 84,554	\$ 80,502
Change in Pension Plan Assets		
Fair value of plan assets, beginning of year	\$ 49,361	\$ 66,304
Actual return on plan assets	9,900	(13,071)
Voluntary company contribution	-	-
Required company contribution	2,373	1,990
Benefits paid	(5,784)	(5,862)
Fair value of plan assets, end of year	<u>\$ 55,850</u>	<u>\$ 49,361</u>
Net Liability Recognized in Balance Sheet		
Funded status of plan, end of year	\$ (28,704)	\$ (31,142)
Unrecognized actuarial loss	-	-
Unrecognized prior service cost	-	-
Net liability recognized in balance sheet, end of year	<u>\$ (28,704)</u>	<u>\$ (31,142)</u>

Amounts Recognized in the Statement of Financial Position consists of:

Current liability	\$ (3,447)	\$ (3,221)
Non-current liability	(25,257)	(27,921)
Net amount recognized, end of year	\$ (28,704)	\$ (31,142)
Additional minimum pension liability, non-current	\$ -	\$ -

The actuarial present value of benefits and projected benefit obligations were determined using a discount rate of 5.80% for fiscal year 2009 and 6.45% for fiscal year 2008. The discount rate is selected by discounting the expected cash flows supporting the benefit obligations of the Tasty Baking Company Pension Plan to the spot rates derived from a yield curve representing quoted yields on over 250 high quality (Aa or equivalent) graded corporate bonds as of December 31, 2009. The present value based on the spot rates was subsequently calibrated to a single equivalent discount rate. The expected long-term rate of return on assets for fiscal years 2009 and 2008 was 8.0%. No rate of compensation increase applies to 2009 or 2008 since the Plan's participants are not accruing additional benefits after March 26, 2005. At the end of 2005, the DB Plan adopted the use of an updated mortality table determining its liabilities. Plan assets are invested in a diverse portfolio that primarily consists of equity and debt securities.

The return on assets assumption is based upon analysis of historical market returns, current market conditions, and the DB Plan's past performance.

The degree of sensitivity of the net cost to changes in the discount rate is dependent on the relationship of the unrecognized gain or loss to the pension corridor. The following reflects sensitivities of net cost and projected benefit obligations to 25 basis point changes based on a 5.80% discount rate and 8.0% expected return on assets (in thousands):

	Impact on Pension Expense without Corridor Recognition	Impact on Pension Expense with Full Corridor Recognition	Impact on Projected Benefit Obligation
25 basis point decrease in discount rate	\$ (88)	\$ 90	\$ 1,860
25 basis point increase in discount rate	81	81	(1,818)
25 basis point decrease in return on assets assumption	136	136	-
25 basis point increase in return on assets assumption	(136)	(136)	-

As of December 26, 2009, the DB Plan's corridor is \$7.9 million, which is the greater of 10% of the projected benefit obligation or plan assets of the Pension Plan. This compares to unrecognized actuarial losses of \$6.7 million as of December 26, 2009. Accordingly, during fiscal 2009 no gains or losses in excess of the corridor were recognized. Any actuarial losses in excess of the corridor would be charged immediately to the income statement in 2010.

Expected Cash Flows

Information about cash flows for the pension plans follows (in thousands):

Employer Contributions

2010 (expected) to plan trusts	\$ 2,947
2010 (expected) to plan participants	\$ 500

Benefit Payments From:

	Plan Trust	Company Assets
2010	\$ 5,977	\$ 500
2011	5,939	506
2012	5,937	502
2013	5,893	493
2014	5,868	481
2015-2019	29,150	2,087

Investment Strategy

The investment strategy of the DB Plan is based on the Statement of Investment Policy, which was designed by the Company in corroboration with an outside investment consultant. There is a pension committee that consists of a number of the Company's employees assisted by the third party investment advisor that evaluates performance quarterly. The policy and the underlying asset allocation were created by analyzing both the current and the long-term payout stream and modeling various asset allocation scenarios around the liability data. The asset-liability analysis was used to create an investment strategy which provides the highest likelihood of generating returns sufficient to meet the payout requirements, while preserving capital in down markets and minimizing downside return volatility.

The asset allocation for the DB Plan at the end of 2009 and the target allocation for 2010 by asset category follow:

Asset Category	Target Allocation for 2010	Percentage of Plan Assets at Year End 2009
Equity securities	50 %	49 %
Debt securities	40 %	40 %
Other	10 %	11 %
Total	<u>100 %</u>	<u>100 %</u>

Equity securities include Tasty Baking Company's common stock which is less than 1.0% of plan assets at the end of 2009.

Plan assets measured at fair value are categorized as follows (in thousands):

Assets	Fair Value Measurement at Reporting Date Using				Balance as of December 27, 2008
	Balance as of December 26, 2009	Quoted Prices in Active markets for Identical Assets (Level 1)	Significant Other Observabl e Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
			\$	\$	
Common equity securities ^(a)	\$ 90	\$ 90	-	-	\$ 45
Equity mutual funds ^(a)	21,567	21,567	-	-	21,923

^(a)Based on quoted market prices in active markets.

The following table presents the fair value reconciliation of Level 3 assets and liabilities measured at fair value for pension and defined benefit retirement plans during the fiscal year ended December 26, 2009 (in thousands):

	Collective Fund
Balance as of December 27, 2008	\$ 5,855
Actual return on plan assets:	
Relating to assets still held at the reporting date	177
Relating to assets sold during the period	-
Purchases, sales and settlements	-
Transfers into (out of) Level 3	-
Balance as of December 26, 2009	<u>\$ 6,032</u>

12. Defined Contribution Retirement Plans

The Company maintains the Tasty Baking Company 401(k) and Company Funded Retirement Plan (the "DC Retirement Plan") which has two separate benefits. The first benefit in the DC Retirement Plan is a funded Defined Contribution Retirement Plan (the "DC Plan"), which is offered in lieu of the benefits previously provided in the now frozen DB Plan. Under the DC Plan, the Company makes weekly cash contributions into individual accounts for all eligible employees. These contributions are based on employees' point values which are the sum of age and years of service as of January 1 each year. All employees receive contributions that range from 2.0% to 5.0% of covered compensation relative to their

point totals. Employees at March 27, 2005 who had 20 years of service or 10 years of service and 60 points received an additional “grandfathered” contribution between 1.5% and 3.5% of salary. The “grandfathered” contribution percentage is paid weekly with the regular contribution until those covered employees retire or separate from the Company. These “grandfathered” contributions are being made to compensate older employees for the shorter earnings period that their accounts will have to appreciate in value relative to their normal retirement dates.

The second benefit in the DC Retirement Plan is a 401(k) Plan (“401(k) Plan”). Under the 401(k) Plan, all participants receive a discretionary Company match of their elective deferrals. Historically, the Company matching contribution has been 50% of their elective deferrals that do not exceed 4.0% of their covered compensation as defined in the 401(k) Plan. As of June 27, 2009, the Company suspended the discretionary matching contribution under the 401(k) Plan for the remainder of fiscal 2009 for all employees who participate in the program. The Company elected to reinstate the discretionary matching contribution under the 401(k) Plan beginning in fiscal 2010.

The Company maintains an unfunded defined contribution SERP (“DC SERP”) for one eligible active employee. The total DC SERP liability as of December 26, 2009 and December 27, 2008, was \$1.7 million and \$1.4 million, respectively.

Components of DC pension amounts charged to income (in thousands):

	Fifty-two Weeks Ended	
	December 26, 2009	December 27, 2008
DC Plan expense	\$ 1,750	\$ 1,647
DC SERP expense	290	356
401(k) matching contribution	351	667
Net defined contribution retirement plan amount charged to income	\$ 2,391	\$ 2,670

13. Postretirement Benefits Other than Pensions

In addition to providing pension benefits, the Company historically provided certain unfunded health care and life insurance programs for substantially all retired employees, or Other Postretirement Benefits (OPEB). These benefits had been provided through contracts with insurance companies and health service providers.

With the implementation of Medicare Part D in January 2006, the Company stopped providing medical benefits for most of its post-65 retirees and began requiring incumbent retirees to pay age-based rates for life insurance benefits in excess of \$20 thousand. Starting in January 2006, the Company provided subsidized medical benefits for its retirees and their dependents who had not yet reached age 65. In December 2008, the Company made the decision to terminate its retiree medical benefit plan, which offered medical insurance to pre-65 retirees at a subsidized rate. The decision to terminate the plan was made prior to December 27, 2008 and the Company set the benefits’ cessation date as December 1, 2009.

Life insurance for individuals retiring before January 1, 2006 was capped at \$20 thousand of coverage. Incumbent retirees who purchased coverage in excess of \$20 thousand and all new retirees after January 1, 2006 paid age based rates for their life insurance benefit for which the Company incurred no liability. In June 2009, the Company made the decision to cease providing postretirement life insurance benefits and terminated the plan. The associated plan amendment and curtailment resulted in the Company recording approximately \$3.7 million in income in the second quarter of 2009. Approximately \$2.2 million of the \$3.7 million was recorded as a reduction in cost of sales, with the remainder of approximately \$1.5 million recorded as an offset to selling, general and administrative expenses.

There are no amounts in accumulated other comprehensive loss that are expected to be recognized as components of net periodic pension cost (credit) during the next fiscal year.

The components of net postretirement benefits are summarized as follows (in thousands):

	2009	2008
Service cost	\$ -	\$ 345
Interest cost	86	438
Net amortization and deferral	(398)	(1,872)
Total FAS 106 net periodic postretirement (income) expense	\$ (312)	\$ (1,089)
Other charges (credits)		
Curtailed benefit	\$ -	\$ (7,790)
Settlement	-	-
Special termination benefits	(3,725)	-
Total OPEB net periodic postretirement benefit	\$ (4,037)	\$ (8,879)

Payments made in connection with the OPEB plans totaled \$0.4 million and \$0.6 million for fiscal 2009 and 2008, respectively.

The following table sets forth the change in projected benefit obligation, funded status of the postretirement benefit plan and the net liability recognized in the Company's balance sheets at December 26, 2009 and December 27, 2008 (in thousands):

	2009	2008
Change in Projected Benefit Obligation		
Projected benefit obligation, beginning of year	\$ 2,714	8,064
Service cost	-	345
Interest cost	86	438
Actuarial loss (gain)	16	(106)
Benefits paid	(408)	(630)
Change in plan provision	(2,408)	(5,397)
Projected benefit obligation, end of year	\$ -	\$ 2,714
Net Liability Recognized in Balance Sheet		
Funded status of plan, end of year	\$ -	\$ (2,714)
Net liability recognized in balance sheet, end of year	\$ -	\$ (2,714)
Less current liability	-	488
Net long term liability recognized in balance sheet, end of year	\$ -	\$ (2,226)

The accumulated postretirement benefit obligation was determined using a weighted average discount rate of 6.6% in 2009 and 2008.

Expected Cash Flows

There are no future expected cash flows for the postretirement benefits other than pensions.

14. Stock Compensation

The Company maintains the Tasty Baking Company 2006 Long Term Incentive Plan (the "2006 Plan"). As of December 26, 2009, the aggregate number of shares reserved and available for grant under the 2006 Plan was 121,100 shares of the Company's common stock.

The 2006 Plan authorizes the Compensation Committee (the "Committee") of the Board to grant awards of stock options, stock appreciation rights, unrestricted stock, restricted stock ("RSA") (including performance restricted stock) and performance shares to employees, directors and consultants or advisors of the Company. The option price is determined by the Committee and, in the case of incentive stock options, will be no less than the fair market value of the shares on the date of grant. Options lapse at the earlier of the expiration of the option term specified by the Committee (not more than ten years in the case of incentive stock options) or three months following the date on which employment with the Company terminates.

On December 17, 2008, the Board of Directors of the Company terminated the 1997 Long Term Incentive Plan (the "1997 Plan") effective as of such date. No further awards may be granted under the 1997 Plan; however, this termination will not affect any awards of stock options or restricted stock previously granted under the 1997 Plan and such awards will continue in effect in accordance with their original terms.

The Company also has an active 2003 Long Term Incentive Plan ("2003 Plan"). As of December 26, 2009, the aggregate number of shares available for grant under the 2003 Plan was 29,744. The terms and conditions of the 2003 Plan are generally the same as the 2006 Plan. A notable difference is that the 2003 Plan can only award shares to employees and directors of the Company. The Company also has options outstanding under the 1994 Long Term Incentive Plan, the terms and conditions of which are similar to the 2003 Plan.

Under the terms of the Change of Control Agreements and Employment Agreements that the Company entered into with certain executive officers, upon a change of control, the shares granted as RSAs vest and any restrictions on outstanding stock options lapse immediately.

A summary of stock options as of December 26, 2009 is presented below:

	Shares (000s)	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value (000s)
Outstanding at December 27, 2008	322	\$ 10.38		
Granted	-	-		
Forfeited	(8)	11.21		
Exercised	-	-		
Outstanding at December 26, 2009	<u>314</u>	\$ 10.36	3.41	\$ 758
Options exercisable at December 26, 2009	314	\$ 10.36	3.41	\$ 758

As of December 26, 2009, there was no unrecognized compensation related to nonvested stock options, and there were no options granted and there was no cash received from option exercises during 2009.

The Company recognizes expense for restricted stock using the straight-line method over the requisite service period. A summary of the restricted stock as of December 26, 2009 is presented below:

	Shares (000s)	Weighted -Average Fair Value
Nonvested at December 27, 2008	417	\$ 6.07
Granted	100	4.08
Forfeited	(1)	7.16
Exercised	(52)	8.00
Nonvested at December 26, 2009	<u>464</u>	\$ 5.42

As of December 26, 2009, there was \$1.4 million of unrecognized compensation cost related to nonvested restricted stock which is expected to be recognized over a weighted-average period of approximately 2.15 years. Total compensation expense recognized in the consolidated statements of operations for equity based compensation was \$0.7 million and \$0.2 million for the years ended December 26, 2009 and December 27, 2008, respectively. Related income tax benefits recognized in earnings were \$0.3 million and \$0.1 million for the fiscal years ended December 26, 2009 and December 27, 2008, respectively.

On December 16, 2005, the Board and the Committee approved the acceleration of vesting of all outstanding, unvested stock options previously awarded to the Company's employees, officers (including executive officers) and directors under the Company's 1994, 1997 and 2003 Long Term Incentive Plans. The following table provides certain information with respect to stock options outstanding and exercisable by employees for fiscal 2009 and fiscal 2008:

	2009		2008	
	Weighted-Average Shares (000s)	Exercise Price	Weighted-Average Shares (000s)	Exercise Price
Options outstanding at beginning of year	258	\$ 10.32	331	\$ 10.31
Less: Exercises	-	-	-	-
Forfeitures	(8)	11.21	(73)	10.30
	250		258	
Granted	-	-	-	-
Outstanding at end of year	250	\$ 10.29	258	\$ 10.32
Options exercisable at year-end	250		258	
Weighted-average fair value of options granted during the year		\$ -		\$ -

The following table provides certain information with respect to stock options outstanding and exercisable at December 26, 2009:

Range of Exercise Prices	Outstanding Options			Exercisable Options	
	Weighted-Average Shares (000s)	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Weighted-Average Shares (000s)	Weighted-Average Exercise Price
\$7.55-\$11.30	250	3.50	\$ 10.29	250	\$ 10.29
Weighted-average fair value of options granted during the year			\$ -		\$ -

A summary of the status of options outstanding and exercisable by the Directors of the Company for the fiscal years 2009 and 2008 is presented below:

	2009		2008	
	Weighted-Average Shares (000s)	Exercise Price	Weighted-Average Shares (000s)	Exercise Price
Options outstanding at beginning of year	64	\$ 10.61	108	\$ 10.84
Less: Exercises	-	-	-	-
Forfeitures	-	-	(44)	11.18
	64		64	
Granted	-	-	-	-
Outstanding at end of year	64	\$ 10.61	64	\$ 10.61
Options exercisable at year-end	64		64	
Range of exercise prices		\$8.65 to \$11.60		\$8.65 to \$11.60
Weighted-average fair value of options granted during the year		\$ -		\$ -

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model and certain weighted-average assumptions.

On February 15, 2007, the Board of Director's approved a Deferred Stock Unit Plan (the "DSU Plan") for non-employee directors of the Company. The DSU Plan provides that for each fiscal quarter, the Company will credit DSUs to each non-employee director's account equivalent in value to \$4 thousand on the last day of such quarter, provided that he or she is a director on the last day of such quarter. Directors will be entitled to be paid in shares upon termination of Board

service provided the director has at least five years of continuous service on the Board. The shares may be paid out in a lump sum or at the director's election, over a period of five years.

A summary of the status of Director Stock Units ("DSU's") outstanding and exercisable by the Directors of the Company for the fiscal years 2009 and 2008 is presented below:

	2009		2008	
	Weighted-Average Shares (000s)	Exercise Price	Weighted-Average Shares (000s)	Exercise Price
DSU's outstanding at beginning of year	42	\$ 6.12	13	\$ 9.34
Less: Exercises	-	-	-	-
Forfeitures	-	-	-	-
Granted	24	5.83	29	4.62
Outstanding at end of year	66	\$ 6.02	42	\$ 6.12
DSU's vested at year-end	33		24	
Range of exercise prices		\$3.31 to \$10.45		\$3.31 to \$10.45

15. Capitalization of Interest Costs

The Company capitalizes interest as a component of the cost of significant construction projects. The following table sets forth data relative to capitalized interest (in thousands):

	2009	2008
Total interest	\$ 4,998	\$ 3,185
Less: Capitalized interest	(2,320)	(1,111)
Interest expense	\$ 2,678	\$ 2,074

16. Other Expense (Income), Net

Other expense (income), net consists of the following (in thousands):

	2009	2008
Interest income	\$ (832)	\$ (907)
Restructuring expense	(470)	1,850
Spare parts expense ^(a)	1,368	-
Other expense (income), net	2	(43)
	\$ 68	\$ 900

^(a) Reserve for excess and obsolete spare parts recognized in the fourth quarter of fiscal 2009 in connection with the Company's relocation of bakery operations to the Philadelphia Navy Yard and represents equipment deemed to be no longer usable or have any fair market value.

17. Income Taxes

The effective tax rates were a provision of 47.3% in 2009 and 35.2% in 2008. The provision for income taxes differs from the amounts derived from applying the statutory U.S. federal income tax rate of 34.0% to income before provision for income taxes as follows (in thousands):

	2009	2008
Statutory tax provision	\$ (2,185)	\$ (3,560)
State income taxes, net of federal income tax (credit)/benefit	(301)	(623)
Addition to (release of) tax reserves	(270)	136
Change in valuation allowance	(284)	241
Non-deductible expenses and other	2	122
Provision for income taxes	<u>\$ (3,038)</u>	<u>\$ (3,684)</u>

For the year ended December 26, 2009, the Company recognized an income tax benefit of \$3.0 million, which is comprised of \$2.9 million related to deferred income taxes and \$0.1 million related to current income taxes. For the year ended December 27, 2008, the Company recognized an income tax benefit of \$3.7 million, which is comprised of a \$3.8 million benefit related to deferred income taxes and \$0.1 million of expense related to current income taxes.

During fiscal 2009, the Company favorably settled a state tax matter that resulted in discrete tax benefits of approximately \$411 thousand which reduced the Company's effective tax rate for the periods presented.

Deferred income taxes represent the future tax consequences of differences between the tax bases of assets and liabilities and their financial reporting amounts at each year end. Significant components of the Company's deferred income tax assets (liabilities) are as follows (in thousands):

	2009	2008
Deferred tax assets		
Pension and employee benefit costs	\$ 12,161	\$ 13,392
Postretirement benefits other than pensions	-	1,116
Vacation pay	45	3
Provision for doubtful accounts	814	628
Charitable contributions	596	659
Net operating loss carryforwards	5,947	3,708
Unused federal tax credits	433	293
Unused state tax credits	250	250
Other	4,141	2,547
Net deferred tax asset	<u>24,387</u>	<u>22,596</u>
Less: valuation allowance	(907)	(1,247)
Net deferred tax assets	<u>\$ 23,480</u>	<u>\$ 21,349</u>
Deferred tax liabilities		
Depreciation and amortization	<u>(4,005)</u>	<u>(5,554)</u>
Total net deferred tax assets	<u>\$ 19,475</u>	<u>\$ 15,795</u>

The Company has recorded a state deferred income tax asset of \$2.6 million, before consideration of any valuation allowance, for the benefit of state income tax loss carryforwards ("NOLs"). These carryforwards expire in varying amounts between 2010 and 2029. The Company has recorded a deferred income tax asset of \$3.4 million for the benefit of federal income tax NOLs. Realization of both state and federal NOLs is dependent on generating sufficient taxable income prior to expiration of the loss carryforwards. Although realization is not assured, management believes that it is more likely than not that the deferred tax asset will be realized.

The valuation allowance for deferred tax assets as of December 26, 2009 and December 27, 2008 was \$0.9 million and \$1.2 million, respectively. The net change in the total valuation allowance for the year ended December 26, 2009 was a decrease of \$0.3 million. The valuation allowance at 2009 and 2008 was primarily related to deferred tax assets in jurisdictions with relatively short carryforward periods that, in the judgment of management, are not more likely than not to be realized. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets depends

on the generation of future taxable income during the periods in which those temporary differences are deductible. Management considers the scheduled reversal of deferred tax liabilities (including the impact of available carryback and carryforward periods), projected taxable income, and tax-planning strategies in making this assessment. In order to fully realize the deferred tax assets, the Company will need to generate future taxable income before the expiration of the deferred tax assets governed by the tax code. Based on the level of historical taxable income and projections of future taxable income over the periods for which the deferred tax assets are deductible, management believes that it is more likely than not that the Company will realize the benefits of these deductible differences, net of the existing valuation allowances as December 26, 2009. The amount of the deferred tax asset considered realizable; however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

Subsequent recognized tax benefits related to the valuation allowance for deferred tax assets as of December 26, 2009 would be recognized through an income tax benefit that would be reported in the consolidated statement of earnings.

The following table summarizes the activity related to the Company's gross unrecognized tax benefits (in thousands):

	2009	2008
Beginning balance	\$ 855	\$ 803
Increase related to prior year tax positions	-	3
Increases related to current year tax positions	52	103
Decreases related to settlements with taxing authorities	(558)	-
Decreases related to lapsing of statute of limitations	(55)	(54)
Ending balance	<u>\$ 294</u>	<u>\$ 855</u>

As of December 26, 2009 and December 27, 2008, the total amount of gross unrecognized tax benefits was \$0.3 million and \$0.9 million, respectively. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate as of December 26, 2009 and December 27, 2008, respectively, are \$0.2 million and \$0.6 million.

The Company recognizes interest and penalties accrued related to uncertain tax positions in income tax expense. At December 26, 2009 there were no accrued interest and penalties. At December 27, 2008, accrued interest and penalties on a net basis was \$0.5 million. For the fiscal years ended December 26, 2009 and December 27, 2008, the Company recognized interest and penalties as income tax expense in the consolidated statements of operations totaling \$(0.2) million and \$0.1million, respectively.

The Company is subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The Company has concluded all U.S. federal income tax matters for years through 2007. Substantially all material state income tax matters have been concluded through 2001. The Company is currently under audit in the State of New Jersey for the 2004 through 2006 tax years. As the audit has progressed, no issues have been identified to cause the Company to adjust its unrecognized tax positions. The Company does not anticipate that total unrecognized tax benefits will significantly change due to the expiration of the statute of limitations with respect to any open tax year prior to December 26, 2009.

18. Accumulated Other Comprehensive Income (Loss)

(in thousands)

	Pension Plan	Interest Rate Swap	OPEB Plan	Total	Comprehensive Income (Loss)
Balance at December 29, 2007	\$ (2,881)	\$ -	\$ 3,515	\$ 634	\$ 766
Net loss 2008					(6,806)
2008 activity, net of tax of (\$1,586), (\$816) and (\$1,612)	(2,446)	(1,273)	(2,514)	(6,233)	(6,233)
Balance at December 27, 2008	(5,327)	(1,273)	1,001	(5,599)	(13,039)
Net loss 2009					(3,389)
2009 activity, net of tax of \$383, (\$91) and (\$730)	414	(162)	(1,001)	(749)	(749)
Balance at December 26, 2009	<u>\$ (4,913)</u>	<u>\$ (1,435)</u>	<u>\$ -</u>	<u>\$ (6,348)</u>	<u>\$ (4,138)</u>

19. Net Loss per Common Share

(in thousands, except per share amounts)

The following is a reconciliation of the basic and diluted net income (loss) per common share computations:

	Fifty-Two Weeks Ended			
	December 26, 2009		December 27, 2008	
	Income (Loss)	Shares	Income (Loss)	Shares
Net loss	\$ (3,389)		\$ (6,806)	
Less:				
Income attributable to participating securities	(70)		(53)	
Net loss available for common shareholders	<u>\$ (3,459)</u>		<u>\$ (6,859)</u>	
Net loss per common share - basic	(0.43)	8,072	(0.85)	8,046
Net loss per common share - diluted	<u>(0.43)</u>	8,072	<u>(0.85)</u>	8,046

The Company has determined that the calculation of net income per common share – basic includes all securities that are also required by the net income per common share – diluted calculation, and therefore are the same for all periods presented. For the fiscal year ended December 26, 2009 and December 27, 2008, options to purchase common stock totaling 316,375 and 517,722, respectively, were not included in the calculation of net income (loss) per common share – diluted since the exercise price per share exceeded the actual price per share during the periods presented.

20. Subsequent Events

In February 2010, the Company had a fire at its Philadelphia bakery facility at 2801 Hunting Park Avenue which damaged certain of its bakery equipment. The Company is in the process of quantifying the losses incurred, including losses related to the interruption of the Company's normal operations. The Company expects to record a receivable, net of the deductible under the Company's insurance policies once the determination of the total losses is complete. Losses related to the fire and the benefit associated with expected insurance recoveries will be recorded in cost of sales.

Item 9. Changes and Disagreements with Accountants

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure at a reasonable assurance level that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management of the Company, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Exchange Act Rule 13a-15(e)) as of December 26, 2009. Based upon the evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of December 26, 2009.

Management's Report on Internal Control over Financial Reporting

The management of Tasty Baking Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) of the Exchange Act. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the Company's assets that could have a material effect on the financial statements.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, risk. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 26, 2009. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework*. Based on this assessment using the COSO criteria, management concluded that the Company's internal control over financial reporting was effective as of December 26, 2009.

The Company's independent registered public accounting firm has issued its auditors' report on the Company's internal control over financial reporting, which appears herein.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended December 26, 2009 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Not applicable.

TASTY BAKING COMPANY AND SUBSIDIARIES
PART III

Item 10. Directors and Executive Officers

The names, ages, periods of service as a director, principal occupations, business experience and other directorships of nominees for director and other continuing directors of the Company are set forth in the Proxy Statement in the section entitled "Election of Directors," which information is incorporated herein by reference.

The names, ages, positions held with the Company, periods of service as executive officer, and business experience for executive officers of the Company, who are not also directors, are set forth in the Proxy Statement in the section entitled "Executive Officers," which information is incorporated herein by reference.

Information regarding the identity of the Audit Committee as a separately designated standing committee of the Board and information regarding the status of one or more members of the Audit Committee being an "audit committee financial expert" are set forth in the Proxy Statement in the section entitled "Meetings and Committees of the Board-Committees of the Board," which information is incorporated herein by reference.

Information regarding compliance with Section 16(a) of the Exchange Act is set forth in the Proxy Statement in the section entitled "Section 16(a) Beneficial Ownership Reporting Compliance," which information is incorporated herein by reference.

Information regarding the Company's Code of Business Conduct applicable to the Company's directors, officers and employees is set forth in the section of the Proxy Statement entitled "Corporate Governance-Code of Business Conduct," which information is incorporated herein by reference.

Item 11. Executive Compensation

Information concerning compensation of each of the named executive officers, including the Chief Executive Officer, of the Company during 2009 and compensation of directors, is set forth in the Proxy Statement in the sections entitled, respectively, "Compensation of Executive Officers," and "Compensation of Directors," which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information concerning ownership of the Company's voting securities by certain beneficial owners, individual nominees for director, each of the named executive officers, including the Chief Executive Officer, of the Company and the executive officers as a group, is set forth in the Proxy Statement in the section entitled "Ownership of Tasty Baking Common Stock," which information is incorporated herein by reference.

Information regarding equity compensation plans is set forth in the Proxy Statement in the section entitled "Securities Authorized for Issuance Under Equity Compensation Plans," which information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information concerning the independence of each director or nominee for director of the Company is set forth in the Proxy Statement in the sections entitled "Corporate Governance-Director Independence," and "Meetings and Committees of the Board-Committees of the Board," which information is incorporated herein by reference.

There are no relationships or related transactions to report under Item 404 of Regulation S-K.

Item 14. Principal Accountant Fees and Services

Information concerning principal accountant fees and services, and the pre-approval policy for services by the independent accounting firm, is set forth in the Proxy Statement in the sections entitled, respectively, "Fees Paid to the Independent Registered Public Accounting Firm" and "Pre-Approval Policy for Services by Independent Registered Public Accounting Firm," which information is incorporated herein by reference.
